The G7 Research Group presents the

2022 G7 Elmau Summit Interim Compliance Report

28 June 2022 to 6 January 2023

Prepared by
Keah Sharma and Malhaar Moharir
and the G7 Research Group
7 March 2023 (updated from 22 February 2023)
www.g7.utoronto.ca • g7@utoronto.ca • [@g7_rg](https://twitter.com/g7_rg)

“We have meanwhile set up a process and there are also independent institutions monitoring which objectives of our G7 meetings we actually achieve. When it comes to these goals we have a compliance rate of about 80%, according to the University of Toronto. Germany, with its 87%, comes off pretty well. That means that next year too, under the Japanese G7 presidency, we are going to check where we stand in comparison to what we have discussed with each other now. So a lot of what we have resolved to do here together is something that we are going to have to work very hard at over the next few months. But I think that it has become apparent that we, as the G7, want to assume responsibility far beyond the prosperity in our own countries. That’s why today’s outreach meetings, that is the meetings with our guests, were also of great importance.”

Chancellor Angela Merkel, Schloss Elmau, 8 June 2015

G7 summits are a moment for people to judge whether aspirational intent is met by concrete commitments. The G7 Research Group provides a report card on the implementation of G7 and G20 commitments. It is a good moment for the public to interact with leaders and say, you took a leadership position on these issues — a year later, or three years later, what have you accomplished?

Achim Steiner, Administrator, United Nations Development Programme,

Background

Since the 1992 United Nations Framework Convention on Climate Change (UNFCCC), reducing greenhouse gas emissions has been discussed internationally as a way to combat climate change.⁴⁹⁷ The 2015 Paris Agreement set out a global framework to ideally limit the global temperature increase to 2°C, striving for 1.5°C, calling for net-zero economies.⁴⁹⁸ Among other measures to reach the target of the Paris Agreement, it is imperative that countries overcome the hurdle of decarbonizing their energy sector to eliminate greenhouse gas emissions from electricity-generating facilities. The G7 has explored and supported a diversified energy mix since its early summits.

At the 1979 Tokyo Summit, the G7 first recognized the importance of developing clean technology.⁴⁹⁹ This summit was the first to acknowledge the pressing need to stabilize the carbon dioxide levels in the atmosphere and establish principled and normative directions for dealing with climate change for future summits.

At the 1990 Houston Summit, G7 leaders acknowledged the importance of international cooperation to develop new technologies and methods to complement energy conservation in the reduction of carbon emissions.⁵⁰⁰ Leaders supported accelerated scientific and economic research on potential responses to climate change in developing and developed countries.

At the 2000 Okinawa Summit, G7 leaders discussed renewable energy and its ability to mitigate climate change and air pollution.⁵⁰¹ Leaders also discussed the findings of the G8 Environment Ministers' Meeting in Otsu and Cartagena Protocol on Biosafety and committed to investigating renewable energy barriers and solutions in developing countries as a way to combat pollution and climate change.

⁵⁰¹ G8 Communiqué Okinawa 2000, G7 Information Centre (Toronto) 23 July 2000. Access Date: 9 October 2022. <http://www.g7.utoronto.ca/summit/2000okinawa/finalcom.htm>

At the 2001 Environment Ministerial Meeting in Trieste, G8 Environment Ministers promoted timely action to address climate change and greenhouse gas emissions.⁵⁰² Leaders committed to promoting the reduction of emissions by strengthening and implementing national programs and promoting renewable energies.

At the 2002 Environment Ministerial Meeting in Banff, G8 Environment Ministers committed to working together with governments and other partners to take effective actions in the field of energy.⁵⁰³ These actions included increasing energy efficiency, improving energy resources, developing new technologies and promoting the use of renewable energy sources in all countries.

At the 2005 Gleneagles Summit, G8 leaders committed to tackling climate change and promoting clean energy.⁵⁰⁴ Leaders also committed to taking measures to develop markets for clean energy technologies to increase their availability in developing nations and to help vulnerable communities adapt to the impact of climate change.

At the 2009 L'Aquila Summit, G8 leaders discussed renewable energy's role in the global green recovery and CO2 reduction.⁵⁰⁵ Leaders discussed barriers to combat climate change and incorporated renewable energy into action-based discussions on technology-driven paths to tackle climate change.

At the 2010 Muskoka Summit, G8 leaders reaffirmed the need to commit to low carbon and renewable energies.⁵⁰⁶ Leaders also called on the International Energy Agency (IEA) to develop an International Platform for low-carbon technologies for the purpose of accelerating their development and deployment.

At the 2014 Energy Ministerial Meeting in Rome, G7 Energy Ministers committed to promoting the use of low carbon technologies such as renewable energies.⁵⁰⁷ Leaders also committed to working with institutions like the International Renewable Energy Agency and international financial institutions to supply technical assistance for renewable energies in Ukraine and other European nations.

At the 2015 Energy Ministerial Meeting in Hamburg, G7 Energy Ministers committed to supporting the use of renewable energy sources.⁵⁰⁸ Leaders mentioned that their goal with the usage of renewable energy sources is to reduce the GHG emissions in their energy systems but also acknowledged that fossil fuels “will remain an important part of the energy mix for some time.”

At the 2016 Energy Ministerial Meeting in Fukuoka, G7 Energy Ministers committed to investing in energy sectors including renewable energy sources and other low carbon technologies to help to build economic growth from carbon emissions.⁵⁰⁹ Leaders reaffirmed their commitment to enhancing cooperation in energy

technology innovation, research, development and deployment in order to accelerate technological progress towards clean energy including renewable energy sources.

At the 2018 Energy Ministers' Meeting in Halifax, G7 Energy Ministers highlighted their progress in the development and deployment of renewable energy including solar and wind power.⁵¹⁰ This progress was highlighted in the context of the need to reduce emissions and improve the sustainability of energy systems.

At the 2019 Energy Ministers' Meeting in Metz, G7 Energy Ministers committed to promoting highly efficient technologies, including renewable energies, and the best standard policies in order to increase energy efficiency.⁵¹¹ Ministers emphasized the importance of energy efficiency for a low emission global economy that sustainably uses natural resources.

At the 2021 Cornwall Summit, G7 leaders committed to accelerating the deployment of zero emissions energy and reducing wasteful consumption.⁵¹² The push for renewable energy alternatives was also a way to “build back better” from the COVID-19 pandemic, as per the roadmap designed by the International Energy Agency and to adhere to the targets from the Paris Agreement.

Commitment Features

At the 2022 Elmau Summit, G7 leaders committed to “a fully or predominantly decarbonized power sector by 2035 ... prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power.”⁵¹³ The actionable and measurable aspect of this commitment is therefore to accelerate a phase-out of domestic unabated coal power in pursuit of decarbonizing power sectors.

“Decarbonise” is understood to mean to “reduce the levels of carbon emission.”⁵¹⁴ In the context of this commitment, decarbonised refers to means of producing, storing, and using energy that are less carbon-intensive than fossil fuels, such as renewable energies.

“Power sector” is understood to mean “a sector that consists of electricity only and combined heat and power plants whose primary business is to sell electricity, or electricity and heat, to the public.”⁵¹⁵

“Timely” refers to something coming early or at the right time.⁵¹⁶ In the context of the commitment, it refers to decarbonisation steps that are taken at the time during which they are needed and whose implementation is prompt.

“Accelerate” is understood to mean “to bring [something] about at an earlier time” or “to hasten the progress or development of [something].”⁵¹⁷ This indicates that the commitment deals with a process that has already been started, which is the transition away from coal power, and that the G7 members agree to move quickly to speed up the process of a coal phase-out

⁵¹⁰ Chair's Summary: G7 Energy Ministers' Meeting, G7 Information Centre (Toronto) 21 September 2018. Access Date: 9 October 2022. <http://www.g7.utoronto.ca/energy/2018-energy.html>

⁵¹¹ Communiqué, G7 Information Centre (Toronto) 6 May 2019. Access Date: 24 September. 2022. <http://www.g7.utoronto.ca/environment/2019-environment.html>

⁵¹² Carbis Bay G7 Summit Communiqué, The White House (Washington D.C.) 13 June 2021. Access Date: 9 October 2022. <https://www.whitehouse.gov/briefing-room/statements-releases/2021/06/13/carbis-bay-g7-summit-communique/>

⁵¹³ G7 Leaders' Communiqué, G7 Information Centre (Toronto) 28 June 2022. Access Date: 21 September 2022. <http://www.g7.utoronto.ca/summit/2022elmau/220628-communique.html>

⁵¹⁴ Decarbonize, Merriam-Webster (Springfield) n.d. Access Date: 21 September 2022. <https://www.merriam-webster.com/dictionary/decarbonize>

⁵¹⁵ Electric Power Sector, Energy Information Administration (Washington D.C.) Access Date: 22 September 2022. <https://www.eia.gov/tools/glossary/index.php?id=Electric%20power%20sector>

⁵¹⁶ Timely, Merriam-Webster (Springfield) n.d. Access Date: 9 October 2022. <https://www.merriam-webster.com/dictionary/timely>

⁵¹⁷ Accelerate, Merriam-Webster (Springfield) n.d. Access Date: 9 October 2022. <https://www.merriam-webster.com/dictionary/accelerate>

“Phase-out” refers to a gradual stopping of something or closing it down by phases.⁵¹⁸

“Unabated coal power” refers to the “use of coal that is not mitigated with technologies to reduce the CO₂ [carbon dioxide] emissions, such as Carbon Capture Utilisation and Storage (CCUS).”⁵¹⁹

Examples of weak actions toward the phasing-out of unabated domestic coal power can include, but are not limited to: making a public statement on the importance of phasing out coal power generation without providing concrete support.

Full compliance, or a score of +1, will be assigned to G7 members who take strong action within the compliance period to accelerate, or to do more than they have before, to speed up a domestic phase-out of unabated coal power. Examples of strong actions include, but are not limited to: deploying CCUS systems for coal power plants, phasing-out infrastructures supporting coal power, implementing a carbon tax, putting an end to public financing of coal and relevant policy and legislation.

Partial compliance, or a score of 0, will be assigned to G7 members who take less than strong action to phase out domestic unabated coal power plants. Examples of less than strong action include efforts that are weaker than those listed above dealing with legislation, policy, financing and investments. This can include diplomatic efforts, public awareness efforts, information or knowledge sharing, and reiterations of support for the commitment.

Non-compliance, or a score of -1, will be assigned to G7 members who backslide on this commitment by opening new domestic coal plants with or without abatement technology or who fail to take even weak action to phase-out existing plants. Actions taken internationally do not count towards compliance, as the commitment explicitly identifies countries’ domestic coal markets as the target.

Scoring Guidelines

| | |
|----|---|
| -1 | The G7 member takes very weak actions OR takes no actions to phase-out domestic unabated coal power OR takes action that is antithetical to the commitment. |
| 0 | The G7 member takes some action to phase-out domestic unabated coal power. |
| +1 | The G7 member takes strong action to for a timely phase-out of domestic unabated coal power. |

*Compliance Director: Thomas Houlie
Lead Analyst: Serena Honekin*

Canada: +1

Canada has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power.

On 11 July 2022, Minister of Natural Resources Jonathon Wilkinson announced an investment of nearly CAD10 million for five projects in Saskatchewan that support renewable energy technologies in rural, remote and Indigenous communities.⁵²⁰ Technologies include the replacement of propane heating systems, an 816-kilowatt solar farm and development of other renewable energy projects to replace existing higher carbon options in the electricity system.

⁵¹⁸ Phaseout, Merriam-Webster (Springfield) n.d. Access Date: 9 October 2022. <https://www.merriam-webster.com/dictionary/phaseout>

⁵¹⁹ What does ‘unabated coal’ mean?, E3G (London) 24 June 2021. Access Date: 22 September 2022. <https://www.e3g.org/news/explained-what-does-unabated-coal-mean/>

⁵²⁰ Minister Wilkinson Announces Nearly \$10 million in Clean Energy Support for Indigenous Communities in Saskatchewan, Natural Resources Canada (Regina) 11 July 2022. Access Date: 12 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/07/minister-wilkinson-announces-nearly-10-million-in-clean-energy-support-for-indigenous-communities-in-saskatchewan.html>

On 26 July 2022, Minister of Environment and Climate Change Steven Guilbeault announced the second round of consultations to develop the Clean Electricity Regulations, which follow feedback gathered from a March 2022 discussion paper regarding a Clean Electricity Standard.⁵²¹ Draft regulations are expected by the end of 2022. Ensuring access to affordable and reliable clean electricity for powering transportation, residences, and commercial and industrial businesses is critical to achieving a net zero economy by 2050.

On 26 July 2022, Member of Parliament René Arseneault announced CAD5.4 million in federal funding for Edmundston's first solar panels.⁵²² The one-megawatt (MW) solar panels on the Jean Daigle Centre will help decarbonize the power system and reduce emissions.

On 27 July 2022, Parliamentary Secretary to the Minister of Natural Resources and to the Minister of Environment and Climate Change Julie Dabrusin announced CAD175,000 in funding to assist Toronto in transitioning to low carbon and renewable energy.⁵²³ The projects focus on two childcare and community centres.

On 28 July 2022, Member of Parliament Ryan Turnbull announced the first investment of CAD44,250 for a geothermal district heating project in Whitby, Ontario.⁵²⁴ The geothermal system will be integrated with construction of a sports complex and is expected to be 90 per cent more efficient than external electricity sources, which will help decarbonize the power sector.

On 28 July 2022, Minister Wilkinson announced the call for proposals for the new Toward Net Zero Homes and Communities Program.⁵²⁵ The program will help drive innovation increasing the use of renewables and low-carbon energy and electricity sources in buildings and communities, which will reduce emissions and ensure resilience. The program will invest CAD14.6 million over four years and proposals will be accepted until 31 August 2022.

On 2 August 2022, Minister Wilkinson announced Canada's investment of CAD9 million to install a 4.86-MW solar project in the Smoky Lake County at Metis Crossing.⁵²⁶ The 100 per cent Metis-owned initiative will help decarbonize Alberta's power system and will reduce 4,700 tonnes of carbon dioxide annually.

⁵²¹ Government of Canada launches second round of public engagements to establish the Clean Electricity Regulations, Environment and Climate Change Canada (Gatineau) 26 July 2022. ⁵²⁶ Canada Invests in Smoky Lake County Metis Crossing Solar Project, Natural Resources Canada (Smoky Lake) 2 August 2022. Access Date: 12 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/07/canada-invests-in-smoky-lake-county-metis-crossing-solar-project.html>

On 2 August 2022, Minister of Tourism Randy Boissonnault announced a contribution of CAD6.6 million for the new net zero River Valley Outdoor Activity Centre.⁵²⁷ The new facility will incorporate solar panels and other design features to decarbonize the building and power systems.

On 9 August 2022, Minister of Northern Affairs Daniel Vandal announced funding of CAD1.2 million over three years to assess Nunavut's geothermal potential.⁵²⁸ The project will assess geothermal production and waste energy storage in Baker Lake, Cambridge Bay and Resolute Bay and will provide the groundwork for design and cost estimates for future phases. Geothermal has the potential to decrease reliance on diesel and other carbon-based heating and electricity sources in Canada's north.

On 15 August 2022, Ministers Vandal and Wilkinson announced a CAD5.586 million investment in a solar project in Inuvik, Northwest Territories by Nihtat Energy Ltd., a northern and Indigenous owned enterprise.⁵²⁹ The one-MW solar initiative will divert use from diesel to create electricity in the amount of 1,435 MW hours. Inuvik currently uses the most diesel of anywhere in the Northwest Territories. It will also reduce some 824 tonnes of greenhouse gas emissions. The project is an important part of decarbonizing the power system in Canada's north.

On 16 August 2022, Minister Guilbeault kicked off in-person consultations regarding the regional assessment for offshore wind projects in Nova Scotia and Newfoundland and Labrador.⁵³⁰ Clean wind power is a critical component to help decarbonize the power system.

On 17 August 2022, Minister Vandal announced a federal contribution of nearly CAD15.5 million towards the Beaver Creek Solar Project in the Yukon.⁵³¹ The project is in partnership with and sits on the Traditional Territory of the White River First Nation. It involves 1.9 MW of solar panels and 3.5 MW of battery storage, and will displace 55 per cent of the diesel used for electricity generation. It will reduce 1100 tonnes of carbon dioxide annually, reduce reliance on diesel fuel and increase energy security for the First Nation.

On 17 August 2022, Minister Wilkinson launched public consultations on the Canada Green Building Strategy.⁵³² The strategy is part of an effort to decarbonize Canada's economy, including the building and power sectors, and to achieve a net-zero economy by 2050. The strategy will address new building retrofits including

⁵²⁷ Government of Canada Funds New Net Zero River Valley Outdoor Activity Centre in Edmonton, Infrastructure Canada (Edmonton) 2 August 2022. ⁵³⁰ Minister Guilbeault Kicks off in-person engagement on the future of clean offshore wind power in Newfoundland and Labrador and Nova Scotia, Environment and Climate Change Canada (St. John's) 16 August 2022. Access Date: 12 November 2022. <https://www.canada.ca/en/environment-climate-change/news/2022/08/minister-guilbeault-kicks-off-in-person-engagement-on-the-future-of-clean-offshore-wind-power-in-newfoundland-and-labrador-and-nova-scotia.html>

⁵³¹ Minister Vandal announces a CAD15.5 million Investment in the Yukon's Largest Solar Project, Natural Resources Canada (Yukon) 17 August 2022. Access Date: 11 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/08/minister-vandal-announces-a-155-million-investment-in-the-yukons-largest-solar-project.html>

⁵³² Minister Wilkinson Advances the Canada Green Buildings Strategy and Announces Funding to Revitalize Community Recreation Centre, Natural Resources Canada (North Vancouver) 17 August 2022. Access Date: 11 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/08/minister-wilkinson-advances-the-canada-green-buildings-strategy-and-announces-funding-to-revitalize-community-recreation-centre.html>

space and water heating, electrical systems and other design features. It will be backed by CAD150 million. The building sector accounts for some 30 per cent of Canada's emissions.

On 19 August 2022, Associate Minister of Finance Rachel Bendayan, announced CAD10 million in federal funding for a net-zero community centre for Sun Youth.⁵³³ The building will incorporate measures to help Canada decarbonize its power system and reduce emissions. The measures include solar panels, natural lighting and energy efficiency in structural design.

On 23 August 2022, Minister Wilkinson and Vice Chancellor of Germany Robert Habeck signed an agreement to establish a Canada-Germany Hydrogen Alliance.⁵³⁴ The joint declaration recognizes the energy security challenges for Germany posed by Russian weaponization of conventional fuels and builds on Canada's December 2020 Hydrogen Strategy to expedite transitions to clean energy globally. The two countries intend to establish a policy and regulatory framework to encourage investment in secure hydrogen value chains in both countries through a trans-Atlantic corridor and to export Canadian hydrogen to Germany by 2025.

On 25 August 2022, Minister Wilkinson issued a call for proposals for establishing biomass supply chain projects.⁵³⁵ The goal is to ensure steady reliable feedstock supplies for clean fuel producers across Canada. Renewable biofuels will help Canada decarbonize its energy systems and reduce GHG emissions.

On 25 August 2022, Member of Parliament Wayne Long announced funding of CAD815,115 for Smart Grid Innovation Network Canada.⁵³⁶ The funds will be used to support electric utilities to decarbonize and expand the electricity grid using smart benchmarking. A Smart Energy Scorecard will be developed for utilities to use to guide their visions, activities and progress toward decarbonization.

On 26 August 2022, Minister Wilkinson released a report documenting the needs for public charging for electric vehicles across Canada.⁵³⁷ The report noted that it is critical to have objective data to determine the quantity and location of public charging stations to facilitate the transition to a pollution-free electrified transportation system. Transportation accounts for some 25 per cent of Canada's greenhouse gas emissions. There is a need to make it easy for individuals and businesses to purchase electric vehicles to decarbonize Canada's industries.

On 26 August 2022, Minister Guilbeault announced the Net Zero Challenge, a voluntary business initiative to encourage businesses, including provincial and municipal utilities, to become more environmentally resilient and competitive.⁵³⁸ The challenge includes minimum performance targets, and annual and five-year reporting.

⁵³⁶ Canada Invests in Smart Energy Benchmarking to Decarbonize Electricity Grid, Natural Resources Canada (Saint John) 25 August 2022. Access Date: 11 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/08/canada-invests-in-smart-energy-benchmarking-to-decarbonize-electricity-grid.html>

⁵³⁷ Minister Wilkinson Releases Report on Public Charging Needs for Electric Vehicles in Canada, Natural Resources Canada (Ottawa) 26 August 2022. Access Date: 11 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/08/minister-wilkinson-releases-report-on-public-charging-needs-for-electric-vehicles-in-canada.html>

⁵³⁸ Launching the Net Zero Challenge to Recognize and Support Businesses Transitioning to Cleaner Operations, Environment and Climate Change Canada (St-Constant) 26 August 2022. Access Date: 11 November 2022. <https://www.canada.ca/en/environment-climate-change/news/2022/08/launching-the-net-zero-challenge-to-recognize-and-support-businesses-transitioning-to-cleaner-operations.html>

The challenge will assist Canada's industry sectors to reduce their emissions and transition away from carbon to help Canada meet its decarbonization and climate change goals.

On 2 September 2022, Parliamentary Secretary to the Minister of Indigenous Services Vince Badawey announced CAD5.4 million in funding to build a net zero carbon library.⁵³⁹ The new library will include rooftop solar panels, glazing and natural lighting to lower Canada's use of carbon in the power system.

On 6 September 2022, Parliamentary Secretary to the Minister of Agriculture and Agrifood Francis Drouin announced CAD1.4 million in funding for SixRing Clean Technology.⁵⁴⁰ The funds will help the company scale up production of its renewable biofuels made from agricultural wastes as well as production of advanced sustainable materials. Success will help decarbonize the fuels system and reduce Canada's emission levels.

On 8 September 2022, Minister Wilkinson announced a CAD11.5 million contribution to construct a net-zero energy ready RCMP building in North Cowichan.⁵⁴¹ The building will include the incorporation of energy efficiency in all aspects of the structure and site orientation, solar panels on the roof, solar shading and daylight sensors. The program will help shift power choices away from carbon sources, reduce GHG emissions, and help Canada advance towards net zero by 2050.

On 15 September 2022, Minister Guilbeault announced an investment of CAD250 million over four years into the Low Carbon Economy Fund.⁵⁴² The fund will help homeowners who use home heating oil transition to greener home heating sources like electric heat pumps. The program will help decarbonize the power and fuel system and will improve affordability for Canadians, especially those in areas like Atlantic Canada where home heating oil use is prevalent.

On 23 September 2022, Minister Guilbeault announced Canada's Methane Strategy to cut methane emissions and help decarbonize the power system.⁵⁴³ Measures outlined in the plan will reduce Canada's methane emissions by more than 35 per cent by 2030 from a base year of 2020.

On 23 September 2022, Member of Parliament Marcus Powlowski announced funding of CAD1.3 million for the Confederation College of Applied Arts and Technology.⁵⁴⁴ The funding will enable the college to establish a net zero facility, pursue renewable energy projects with excess capacity sold to the grid and modernize its curriculum as it pertains to decarbonizing the power system.

⁵⁴⁴ Government of Canada Contributes CAD1.3 million to Confederation College of Applied Arts and Technology to Advance Renewable Energy Projects, Natural Resources Canada (Thunder Bay) 23 September 2022. Access Date: 11 November 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/09/government-of-canada-contributes-13-million-to-the-confederation-college-of-applied-arts-and-technology-to-advance-renewable-energy-projects.html>

On 27 September 2022, Minister of Transportation Omar Alghabra released Canada's Aviation Climate Action Plan.⁵⁴⁵ The plan presents a net-zero vision for 2050 (including electrification and batteries) and specific actions between 2020 and 2030 to develop and use sustainable aviation fuels by 2030. It also includes pathways to improve efficiency and reduce emissions in the interim.

On 28 September 2022, Parliamentary Secretary Dabrusin announced funding of CAD2.3 million for energy storage infrastructure being delivered by SWITCH Power Ontario Battery Operations Corporation.⁵⁴⁶ The project involves six storage systems, 3.82 MW of energy storage capacity and distributed energy resources in a partnership between SWITCH and the Independent Electricity System Operator. Grid modernization is important to bolster Canada's green electricity system, which is more than 75 per cent emissions-free.

On 3 October 2022, Minister Wilkinson announced funds for Calgary, St. Albert, Lethbridge and Canmore to improve building energy efficiency.⁵⁴⁷ The CAD25.6 million investment permits the municipalities to create loan and grant funding programs to enable homeowners to retrofit buildings to lower carbon use, reduce emissions and transition to renewable energy sources.

On 4 October 2022, Minister Wilkinson announced funding of nearly CAD3.4 million to Elemental Energy's 20 MW East Strathmore Solar project.⁵⁴⁸ Elemental Energy invested over CAD30 million in the initiative with debt financing from the Alberta Treasury. The funding supports the renewable energy sector as a means to decarbonize the power system and to reduce emissions.

On 4 October 2022, the Canadian Coast Guard announced the start of a biodiesel testing project and the construction of Canada's first hybrid electric vessel.⁵⁴⁹ Biodiesel blend ratios will be tested for operational efficiency and to ascertain the technological capacity for higher blends in different operational settings. In addition to fuel testing, the Coast Guard has issued a request for proposals to build its Near-shore Fishery Research Vessel. The successful bidder will begin construction incorporating the overall design by British Columbia vessel designer Robert Allan Ltd and will lower the overall fleet's carbon emissions.

On 12 October 2022, the Canadian government issued payments to Canadians living in Ontario, Manitoba, Alberta and Saskatchewan, where the federal carbon pollution pricing system operates.⁵⁵⁰ The carbon price exists to provide price signals to Canadians to lower their use of carbon and to help facilitate the transition to a decarbonized power system. The climate action incentive payments occur quarterly.

⁵⁴⁵ Minister Alghabra Announces the Release of Canada's Aviation Climate Action Plan, Transport Canada (Montreal) 27 September 2022. ⁵⁵⁰ Latest Climate Action Incentive Payments Helping Make Life More Affordable and Fight Climate Change, Environment and Climate Change Canada (Gatineau) 12 October 2022. Access Date: 11 November 2022 <https://www.canada.ca/en/environment-climate-change/news/2022/10/latest-climate-action-incentive-payments-helping-make-life-more-affordable-and-fight-climate-change.html>

On 12 October 2022, Minister Wilkinson, Minister Vandal and Minister of Indigenous Services Patty Hajdu announced the call for applications for the second cohort of Indigenous off-diesel projects.⁵⁵¹ Successful applicants will receive a total of CAD1.525 million funds in three phases to help switch their community off diesel for heating in order to decarbonize the power system.

On 13 October 2022, Minister Wilkinson announced the second phase of work by Regional Energy and Resource Tables.⁵⁵² New Brunswick, Nova Scotia, Prince Edward Island, the Northwest Territories and Yukon joined following the phase one launch by Canada, British Columbia, Manitoba and Newfoundland and Labrador. Canada wants all provinces and territories to join by early 2023. The objective is to align regulatory, timeline and resource allocation efforts to decarbonize the power system and to advance economic opportunities related to the low-carbon economy. These opportunities include critical mineral mining for EV vehicles and batteries, hydrogen, small modular nuclear reactors (SMRs), biofuels, carbon capture and wind and solar projects.

On 13 October 2022, Parliamentary Secretary to the Minister of Seniors Darren Fisher announced a CAD3.7 million contribution to the Clean Foundation's clean energy and equity network.⁵⁵³ The network will help Indigenous and African Nova Scotians access resources and capital for wind, solar and energy efficiency installations and upgrades. The partnership will assist Canada to decarbonize the power system and will ensure that historically under-represented communities can participate in these efforts.

On 21 October 2022, Minister of Labour Seamus O'Regan Jr. announced an investment of CAD37,000 to advance a fuel switching project for Sea Force Hyperbaric Inc.⁵⁵⁴ The project will reduce carbon emissions and facilitate the company's transition from oil by replacing three furnaces with air to water heat pumps.

On 25 October 2022, Minister Wilkinson and Ontario Minister of Energy Todd Smith announced that Ontario would join the partnership among the federal and provincial governments to transition energy systems sustainably and inclusively for security and environmental and economic benefit.⁵⁵⁵ The priorities that Ontario and Canada have set are expanding Ontario's clean electricity grid, leading in nuclear technology, and expediting hydrogen production. The goal is to align regulatory approaches, timelines, and resource allocations.

On 26 October 2022, Minister Wilkinson issued Canada's National Statement on Nuclear Energy and announced Canada's support of new nuclear technology, such as SMRs, in addition to its existing CANDU nuclear reactors.⁵⁵⁶ Minister Wilkinson also announced a CAD970 million loan from the Canada Infrastructure

⁵⁵⁶ Canada's National Statement on Nuclear Energy by the Honourable Jonathon Wilkinson, Minister of Natural Resources to the International Atomic Energy Agency's 5th Ministers' Conference, Natural Resources Canada (Washington) 26 October 2022. Access Date: 11 November 2022 <https://www.canada.ca/en/natural-resources-canada/news/2022/10/canadas-national-statement-on-nuclear-energy--the-honourable-jonathan-wilkinson-minister-of-natural-resources--the-international-atomic-energy-agen.html>

Bank for a commercial SMR of 300 MW to be built on the site of the Darlington Nuclear Generating Station in Ontario to come on-line by 2028. These projects build on recent federal budget commitments to develop and deploy SMRs, improve fuel supply chains, minimize waste generation and enhance the role of the Canadian Nuclear Safety Commission in regulating SMRs.

On 28 October, Parliamentary Secretary Dabrusin announced funding of CAD1.6 million as a contribution to CanREA's Electricity Transition Hub.⁵⁵⁷ The hub adds capacity to system operators and utilities to implement clean power, storage, and grid modernization. Its electronic library will foster knowledge and tool exchange to accelerate change and decarbonization of the power system.

On 3 November 2022, Minister of Finance Chrystia Freeland delivered the 2022 Fall Economic Statement, which outlined measures to decarbonize and transition the Canadian economy.⁵⁵⁸ The statement's technical background document describes operationalization and governance of the CAD15 billion Canada Growth Fund to attract the scale of private sector capital necessary to accelerate deployment of the innovative technologies required to transform and grow Canada's economy with net-zero emission goals. The statement also outlined CAD250 million over five years to help Canadian workers adjust to the changing economy and retrain for clean energy jobs through a Sustainable Jobs Training Centre, a new sustainable stream within the Union Training and Innovation Program and a Sustainable Jobs Secretariat as a one-stop shop for federal green jobs. Minister Freeland also announced two tax credits. A refundable tax credit equal to 30 per cent of capital cost investments will be effective Budget Day 2023 through 2035 for investments in clean electricity systems (solar, small modular nuclear, wind, small hydro, run-of-river, wave and tidal power), stationary electricity storage systems, low carbon heat equipment and industrial zero emissions vehicles. A clean hydrogen investment tax credit will also be implemented effective Budget Day 2023 with the level of tax credit tied to lifecycle carbon intensity and labour conditions.

On 7 November 2022, Minister of Transportation Omar Alghabra committed Canada to the Canadian Green Shipping Corridors Framework and to Canada becoming a member supporter of the Zero Emission Shipping Mission.⁵⁵⁹ Specifically, Minister Alghabra referenced Canada's joint work with the United States to address zero emission shipping within the Great Lakes and the busy St. Lawrence Seaway corridor. The Canadian initiative will test scalable net zero fuels and hybrid electric technologies.

On 8 November 2022, Minister of Innovation, Science and Industry Francois-Philippe Champagne, along with other federal and Alberta representatives, announced the investment of CAD300 million towards a CAD1.6 billion hydrogen production and liquefaction facility in Edmonton.⁵⁶⁰ The plant will spur Canada's hydrogen production sector and establish Edmonton and Alberta as a hydrogen hub in the new economy. Minister Champagne also stated that ten projects have been selected for further assessment in the call to action for high

⁵⁵⁷ Parliamentary Secretary Julie Dabrusin Delivers CAD1.6 million in Federal Support for CanREA's Electricity Transition Hub, Natural Resources Canada (Toronto) 28 October 2022. ⁵⁶⁰ Canada Makes Significant Investment in Alberta's Clean Hydrogen Sector and Outlines Next Steps to help Canadian Industry Sectors Cut Pollution, Innovation Science & Economic Development Canada (Edmonton) 8 November 2022. Access Date: 10 November 2022. <https://www.canada.ca/en/innovation-science-economic-development/news/2022/11/government-of-canada-makes-significant-investment-in-albertas-clean-hydrogen-sector-and-outlines-next-steps-to-help-canadian-industry-sectors-cut-p.html>

emitting sectors. The projects have been identified as early movers to expedite decarbonization efforts in their sectors and project greenhouse gas reductions of 10 million tonnes by 2030, or the equivalent of two million cars.

On 9 November 2022, Minister Wilkinson participated with Awasis Solar Limited Partnership and its community partners to recognize the commissioning of the 10-MW solar initiative.⁵⁶¹ More than 14,000 tonnes of carbon dioxide equivalent will be reduced in the first year, leading to a reduction of over 350,000 tonnes over the project's lifetime. The announcement shows support for indigenous-led energy projects that demonstrate community energy security and achievement of decarbonization and climate change goals.

On 9 November 2022, Parliamentary Secretary to the Minister of Crown-Indigenous Relations Jaime Battiste announced federal funding of CAD1.3 million for geothermal energy capacity development in Nova Scotia. Geothermal projects will be undertaken in five Mi'kmaw and twelve rural communities in Nova Scotia.⁵⁶² The projects will be delivered through Net Zero Atlantic in partnership with the Confederacy of Mainland Mi'kmaq and Nova Scotia's Department of Natural Resources and Renewables.

On 9 November 2022, Minister Champagne, along with industry representatives, released the cement industry's roadmap to net-zero concrete.⁵⁶³ The initiative is important given concrete's role as the most used building material and its 7 per cent share of global carbon dioxide emissions. Realization of the plan will reduce more than 15 million tonnes by 2030 and over 4 million tonnes annually thereafter. The government and industry partnership will focus on deployment of industrial decarbonization technologies, electricity generation with excess sales to the grid, research and development and skills upgrading. The initiative ties into Canada's agreement to lead the post-Glasgow Breakthrough on Cement and Concrete and will accelerate domestic and international efforts to decarbonize cement and concrete.

On 10 November 2022, Minister of Crown-Indigenous Relations Marc Miller announced a CAD750,000 investment in Edgohog Advanced Technologies.⁵⁶⁴ The investment assists the scale-up of proprietary glass technology to enhance performance of solar panels. The scale-up aims to increase winter energy production and facilitate the adoption of solar panels in northern and remote locations.

On 10 November 2022, Parliamentary Secretary to the Minister of Fisheries, Oceans and the Canadian Coast Guard Mike Kelloway announced funding of CAD1.8 million towards building offshore wind capacity in the Atlantic Region.⁵⁶⁵ The projects will be delivered through Net Zero Atlantic in partnership with the Confederacy of Mainland Mi'kmaq. Infrastructure investment through the project will also be eligible for the Clean Technology Tax Credit announced in the Fall 2022 Economic Statement.

On 15 November 2022, Minister Guilbeault released the most recent report of the Powering Past Coal Alliance to demonstrate current progress towards decarbonization of the power sector.⁵⁶⁶ He also noted a new partnership between the alliance and health groups globally, Canadian investments towards the coal phase out domestically and internationally and Canada's funding of the Just Transition Partnership to foster change in the developing world.

On 16 November 2022, Minister Wilkinson announced a CAD500,000 investment in Opus One Solutions Inc. to advance a clean energy grid.⁵⁶⁷ Combined with its own funds, the company enhanced Opus One DERMs, software technology, which assists utilities in increasing the number and types of distributed energy systems which can connect with the grid. The software provides real time monitoring and optimal dispatch integration to ensure sustainable, reliable and affordable electricity grids.

On 25 November 2022, Minister Wilkinson announced an agreement between Natural Resources Canada and Enbridge Gas to co-deliver the Canada Greener Homes initiative across Ontario through the company's Home Efficiency Rebate Plus program.⁵⁶⁸ This follows up on the May 2021 original Canada Greener Homes program announcement. Rebates will be provided to homeowners to offset the costs of green home assessment audits (up to CAD600) and deep energy retrofits (up to CAD40,000) such as window and door replacements, home insulation improvements and renewable energy systems.

On 1 December 2022, the Department of Finance launched consultations regarding an investment tax credit for clean hydrogen and related labour conditions as a follow-up to commitments contained in the Fall Economic Statement.⁵⁶⁹ The federal government seeks to learn the levels of support needed to develop a variety of production pathways and a corollary skilled workforce.

On 8 December 2022, Minister Wilkinson announced nearly CAD3 million for the Fraser Basin Council's Energy Peers in Indigenous Communities Network (EPIC).⁵⁷⁰ Funds will flow from the Smart Renewables and Electrification Pathways program, and EPIC will work with eight communities to hire clean energy champions to develop knowledge and skills to develop small scale under-100-kw on-grid renewable energy projects.

On 8 December 2022, Minister Wilkinson announced the Government of Canada's practical steps to deliver on its international commitment to end public support for international unabated fossil fuel energy.⁵⁷¹ The Minister released policy guidelines which will direct how federal departments and agencies meet, or exceed, the

⁵⁷¹ Government of Canada delivers on key international climate commitment to end new public support for the international unabated fossil fuel energy, Natural Resources Canada (Ottawa) 8 December 2022. Access Date: 20 December 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/12/government-of-canada-delivers-on-key-international-climate-commitment-to-end-new-public-support-for-the-international-unabated-fossil-fuel-energy-s.html>

goals set out at the 26th Conference of the Parties to the United Nations Framework Convention on Climate Change in Glasgow to end financial support for the fossil fuel sector. This means that Canada will be investing in clean energy and electricity only. Minister Wilkinson also committed to eliminating further domestic fossil fuel subsidies early in 2023 to build on the phase-out of flow-through shares for oil, gas and coal production, and to end nine other subsidy initiatives.

On 12 December 2022, Minister Hajdu, Minister for the Pacific Economic Development Canada Harjit Sajjan and CEO of the New Relationship Trust Walter Schneider announced CAD10 million in new clean energy initiatives.⁵⁷² The funds will support a First Nations owned and operated hydroelectric project and solar farm that will generate clean electricity to replace diesel, thereby decarbonizing the power system, reducing GHG emissions and saving the community over CAD600,000 annually in diesel fuel operating and maintenance costs.

On 13 December 2022, Parliamentary Secretary Badaway announced a CAD4.9 million investment in a woody biomass to renewable energy facility to be developed in Thorold, Ontario.⁵⁷³ The funds increase the previous FederalDev ON contribution of CAD1.5 million to bring the total federal assistance to CAD6.4 million.

On 16 December 2022, MP Long announced a CAD45.9 million joint investment by the Canadian and New Brunswick governments to support green retrofits at the New Brunswick Community College's Saint John Campus.⁵⁷⁴ In addition to adding new courtyards and facility spaces, the funds will support on-site renewable sources, building energy efficiency upgrades and electric vehicle chargers. The investments will reduce emissions by 385 tonnes of CO₂ per year.

Canada has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power. Canada built upon its a foundation of coal phase-out in Ontario and abatement systems on remaining coal facilities in other provinces. Canada also strengthened its clean electricity power system regulatory framework and funded direct and indirect phase-out of carbon fuels such as coal, propane, diesel and oil. Canada has also increased renewable and alternate fuel sources and modernized its grid infrastructure.

Thus, Canada receives a score of +1.

generation to increase energy efficiency.⁵⁷⁵ The objectives are reflected in the plan's actions to expedite the development of renewable energies and the relaunching of the French nuclear energy industry.

On 13 July 2022, Prime Minister Élisabeth Borne, along with the Ministries of Economy, Energy Transition and Industry announced the third phase of the Zero Fossil Industry plan, which is part of the overall France 2030 project to decarbonize the economy.⁵⁷⁶ The third phase of the plan is centered on recruiting small to medium-sized companies to take part in the decarbonization plan, and any prospective applicants must submit technologies that aim to decarbonize the economy, including the power sector. The first phase of the program, which focused on developing biomass power for the power sector as part of a plan to phase out fossil fuel, opened earlier this year and has attracted large investments from private firms.

On 2 August 2022, Minister for Ecological Transition and Territorial Cohesion Christophe Béchu, Minister for Energy Transition Agnès Pannier-Runacher and Secretary of State for the Sea Hervé Berville began the selection phase of companies for the construction of 50 offshore wind farms by 2050.⁵⁷⁷ 13 corporate groups will compete for this contract to reduce greenhouse emissions in the energy sector.

On 26 August 2022, the Ministry of Ecological Transition and Territorial Cohesion announced the expansion of the production capacity of the hydroelectric power network by 200 megawatts by 2023 and by 1,200 megawatts by 2028.⁵⁷⁸ The expansion is planned to be done through upgrading about 60 per cent of the current infrastructure. There are also plans to equip dams in France with more hydroelectric facilities.

On 26 September 2022, the Ministry of Ecological Transition and Territorial Cohesion announced that EUR1.2 billion of its EUR19 billion total annual budget for 2023 will be dedicated to investments in developing its nuclear power sector.⁵⁷⁹ The ministry would also continue its support in building other renewable energy infrastructure for the future and is researching the feasibility of building offshore wind farms. The investments in nuclear and renewable energy will aid in the decarbonization of the French energy sector.

On 28 September 2022, Prime Minister Borne introduced a EUR2.1 billion funding scheme for the development of hydrogen power in France.⁵⁸⁰ The money would be primarily used to fund research and development within the power sector as part of France's long-term goal of completely decarbonizing its power grid. The plan is also expected to raise 5,200 jobs in the power sector for the development of future technologies, such as electrolyzers for generating hydrogen power.

⁵⁸⁰ Make France the "leader" in carbon-free hydrogen with France 2030, Ministry of Ecological Transition and Territorial Cohesion (Paris) 28 September 2022. Translation provided by Google Translate. Access Date: 25 December 2022.

<https://www.gouvernement.fr/actualite/faire-de-la-france-le-leader-de-lhydrogene-decarbone-avec-france-2030>

On 30 September 2022, the Ministry of Ecological Transition and Territorial Cohesion sought to decrease and eventually eliminate the mining and utilization of fossil fuels, including coal, within France.⁵⁸¹ The French government plans to eliminate all fossil fuel exploitation by 2040 and aims to restrict the opening of new mining operations with existing laws and permits after the passing of a law that stops research of new sources of hydrocarbons in 2017.

On 4 October 2022, the Ministry of Ecological Transition and Territorial Cohesion confirmed that the plan for increasing the usage of biogas in powering the French power generation sector will be continuing.⁵⁸² The plan is part of an ongoing initiative for replacing fossil fuels with biogas energy since 2014.

On 12 October 2022, the Ministry of Ecological Transition introduced objectives regarding the development of offshore wind power to increase its share in the French electricity mix.⁵⁸³ The plan is part of the France 2030 initiative, which plans to increase the offshore wind deployed capacity to 2.4 gigawatts in 2023 and 5 gigawatts in 2028. Currently, the project comprises 17 offshore wind farms under construction or bidding, with the earliest being ready in 2025 and are set to contribute to the goal of generating 40 per cent of France's power with renewables.

On 13 October 2022, the Ministry of Ecological Transition and Territorial Cohesion reviewed the results of the first year of the France 2030 plan to decarbonize the economy.⁵⁸⁴ Of the EUR8.4 billion spent on various sectors of the economy to decarbonize them, EUR105 million is directly invested in the development of clean energy, while EUR64 million is spent on decarbonization and hydrogen power research. The majority of the budget is spent on three other areas, which are other unspecified investment funds that are involved in decarbonization (EUR1.9 billion), research in universities (EUR1.7 billion), and clean energy start-ups (EUR1.5 billion). Out of the 1,752 projects funded by the plans, 669 projects are from small companies.

On 13 October 2022, the Ministry of Ecological Transition and Territorial Cohesion detailed the plans for geothermal energy in France that is being developed.⁵⁸⁵ By 2023, it plans to raise the power generation of geothermal facilities to generate 24 megawatt hours.

On 14 October 2022, the Ministry of Ecological Transition and Territorial Cohesion met with representatives of 45 French startup companies that are designated as Greentech Innovators for their work on technologies that would allow the transition of the French economy to meet its climate targets.⁵⁸⁶ Among these startups, there are several that aim to develop renewable energy technologies that aim to decarbonize the energy sector.

On 14 October 2022, the French government announced that the offshore wind power site at Saint-Nazaire has successfully produced hydrogen from desalinated seawater that can be transported back to land for

hydrogen power production.⁵⁸⁷ Production of hydrogen through electrolysis in offshore wind facilities can greatly increase the efficiency of renewable power production and has the added benefit of increasing the efficiency of production, as the facility now contributes to two renewable energy sources targeted in the French 2030 plan. The development and operation of the power station of Saint-Nazaire is part of the renewables plan that France intends to implement in the future.

On 2 November 2022, the Ministry of Ecological Transition and Territorial Cohesion announced a bill to investigate the feasibility of the construction of new nuclear reactors as a part of the French government's goals of decarbonizing the power sector.⁵⁸⁸ The bill specifically facilitates the construction of nuclear power plants close to any existing nuclear power generation facilities and will aim to accelerate the bureaucratic processes regarding the building of new nuclear plants and the maintenance of any existing nuclear plants.

On 4 November 2022, President Emmanuel Macron announced new plans for the decarbonization of the power sector during a pre-meeting of the 27th Conference of the Parties to the United Nations Framework Convention on Climate Change.⁵⁸⁹ Chief among these plans is the announcement to build 40 windfarms by 2050 and build an additional six nuclear reactors. Offshore wind power is also planned to be the primary source of energy generation for France. President Macron also announced that EUR30 billion will be pledged in a recovery plan to boost environmental friendliness, with a significant amount of these funds being devoted to green energy in 2023.

On 24 November 2022, France and Germany hosted the Fifth Franco-German Energy Forum and collaborated to implement and shape the energy transition.⁵⁹⁰ They included the fundamental role of energy in achieving the energy and climate targets for 2030, the challenges of energy reform in the geopolitical context, and concrete questions about how to finance energy reforms and industry decarbonization.

On 6 December 2022, the Ministry of Ecological Transition and Territorial Cohesion announced progress towards using and further developing methods of water electrolysis to produce hydrogen power carbon-free.⁵⁹¹ Water electrolysis will ultimately replace the processing of fossil fuels to generate hydrogen.

On 7 December 2022, Minister Pannier-Runacher, Minister Delegate for Industry Roland Lescure and Minister of Economics and Finance Bruno Le Maire announced the creation of a working group for designing the long-term national hydrogen strategy.⁵⁹² The plan outlines that industries must develop hydrogen hubs close to high-carbon industries to provide them with effective energy with reduced transport costs. They also announced that electric companies in France need to integrate hydrogen power generation into their power grids through long-term contracts.

On 7 December 2022, President Macron pledged to continually follow the Fit for 55 plan laid out by the European Union, which plans to cut emissions by 55 per cent by 2030.⁵⁹³ President Macron reassured that the objectives will be met by the measures implemented by the French Energy Sobriety plan, which plans to cut emissions by replacing fossil fuels with renewable and low-carbon energy sources.

On 9 December 2022, the Ministry of Ecological Transition and Territorial Cohesion approved funding for research for firms that aim to develop innovative measures in radioactive waste management.⁵⁹⁴ In total, EUR134.9 million will be allocated to this research.

France has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035 and prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power. France partnered with the private sector to advance technology in producing more low-carbon energy. France has also funded decarbonization projects while reaffirming and pledging to increase the scope of their commitments in the latest 2022 United Nations Climate Change Conference in Egypt. Additionally, France has halted any operations to mine coal within its borders, maintaining a low share of coal power in the nation's overall power grid.

Thus, France receives a score of +1.

Germany has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035 and prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power.

On 7 July 2022, the Federal Ministry for Economic Affairs and Climate Action announced funding of almost EUR3 billion for the industrial production of battery cells for mobile and stationary energy storage.⁵⁹⁵ This initiative aims at strengthening the technological expertise required for battery cell production to achieve carbon neutrality.

On 15 July 2022, the Federal Ministry for Economic Affairs and Climate Action and Federal Ministry for Digital and Transport had four large-scale hydrogen projects approved by the European Commission.⁵⁹⁶ The federal and state governments provided a total of more than EUR8 billion for the IPCEI Hydrogen projects.

On 27 July 2022, the German government expanded the Energy and Climate Fund to create the Climate and Transformation Special Fund to finance EUR177.4 billion between 2023 and 2026 for energy transformation and climate protection.⁵⁹⁷ The funding will help promote an environmentally friendly and reliable energy supply.

On 29 July 2022, the Federal Ministry for Economic Affairs and Climate Action revised the Renewable Energy Sources Act to further speed up the expansion of renewable energy.⁵⁹⁸ The aim is to prioritize renewable energy when making decisions to minimize the usage of fossil fuels and transform Germany's energy systems.

On 23 August 2022, Vice Chancellor Robert Habeck and Canada's Minister of Natural Resources Jonathon Wilkinson signed an agreement to establish the Canada-Germany Hydrogen Alliance.⁵⁹⁹ The joint declaration recognizes the energy security challenges for Germany posed by Russian weaponization of conventional fuels and builds on Canada's December 2020 Hydrogen Strategy to expedite transitions to clean energy globally. The two countries intend to establish a policy and regulatory framework to encourage investment in secure hydrogen value chains in both countries through a trans-Atlantic corridor and to export Canadian hydrogen to Germany by 2022.

On 2 September 2022, the German government announced that it had committed EUR40 billion under the Structural Improvement Act to support structural change in the lignite mining regions for coal phase-out.⁶⁰⁰ The fund will be used for establishment of research institutions, promoting innovative energy transition projects and funding key infrastructure projects.

On 22 September 2022, the Ministry for Digital and Transport awarded EUR80 million to 19 Fraunhofer Institutes to support the National Fuel Cell Production Action Plan (H2GO), which is a joint project about fuel cell production.⁶⁰¹ H2GO investigates efficient and cost-effective large-scale production of fuel cells for converting hydrogen to electric power on board a vehicle.

On 7 October 2022, the Ministry of Economic Affairs and Climate Action adopted Energy Security of Supply Act 3.0 to temporarily increase the production of electricity using renewables and to raise transmission capacities in the power grid.⁶⁰² These actions aim to increase electricity production using photovoltaics, biogas and onshore wind power to cut gas consumption.

On 12 October 2022, the Ministry of Finance published the German Draft Budgetary Plan for 2023.⁶⁰³ It recommended policies that reduce overall reliance on fossil fuels, such as making amendments to the Renewable Energy Sources Act that increases the share of renewable energy in electricity consumption from 65 per cent to 80 per cent by 2030.

On 18 October 2022, Germany's Foreign Minister held the 6th German-Belgian Conference at the Federal Foreign Office in Berlin to develop joint solutions and approaches for climate change and energy transition.⁶⁰⁴

On 19 July 2022, Italy received EUR42.1 billion from the Cohesion Policy Partnership Agreement of the EU.⁶¹⁰ EUR1 billion of the fund is meant to support the transition to renewable energy sources in Sardinia.

On 5 September 2022, Italy mandated government bonds to be used in agreement with Italy's Green Bond Framework.⁶¹¹ The framework supports the objective of energy efficiency and renewable sources for electricity and heat production.

On 6 October 2022, the Council of Ministers approved the construction of eight renewable energy projects that were introduced in March 2022.⁶¹² The projects include wind energy that has a capacity of 314 MW when totaled and aim to further reduce reliance on gas.

On 7 November 2022, Prime Minister Giorgia Meloni reaffirmed Italy's commitment to the Paris Agreement during the COP27 summit.⁶¹³ Part of the agreement focuses on decarbonization and achieving climate neutrality by 2050. On that occasion, Prime Minister Meloni announced that Italy has almost tripled its financial commitment to climate finance to USD1.4 billion for the next five years, including EUR840 million in the new "Italian Climate Fund." This investment is dedicated towards creating and deploying clean technology to assist in climate change in developing countries. In October 2022, the Minister of Ecological Transition, together with the Minister of Economy and Finance and the Minister of Foreign Affairs, adopted ministerial decrees setting up the structure of the new Fund, which will start its operations in the first half of 2023.

On 15 November 2022, at the margins of the Bali Summit, Italy adopted, as part of an "International Partners Group" a Joint Statement with the government of Indonesia to establish a Just Energy Transitions Partnerships as a long-term partnership to help Indonesia pursue an accelerated and ambitious just energy transition, including an ambitious power sector emissions reduction pathway and strategy based on the expansion of renewable energies and the phase down of on and off-grid coal-fired electricity generation; and the implementation of concrete actions achieving a just energy transition for workers and communities, particularly those most affected by an energy transition away from coal.

On 13 December 2022, Italy, alongside other G7 members, reaffirmed its commitment to continue its work on Just Energy Transitions Partnerships.

On 20 December 2022 the EU granted Italy EUR1 billion under the Just Transition Fund (JTF) to support the just climate transition in Taranto, Apulia, and in Sulcis Iglesiente, Sardinia.⁶¹⁴ Currently, the last coal mine of the country is in Sardinia. JTF aid will invest in construction of wind turbines and the development of green hydrogen to phase out the usage of coal.

Italy has partially complied with its commitment to a fully or predominantly decarbonized power sector by 2035, by accelerating the deployment of low-carbon energy sources. However, the phase-out of coal power has not been addressed through direct policy implementation.

Thus, Italy receives a score of 0.

Analyst: Manraj Johal

Japan: 0

Japan has partially complied with its commitment to a fully or predominantly decarbonized power sector by 2035, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power.

On 30 September 2022, the Ministry of the Economy, Trade and Industry held the Second International Conference on Fuel Ammonia.⁶¹⁵ Japan is considering the use of ammonia to replace coal and natural gas for dispatchable power generation as part of its energy system decarbonation strategy.

On 28 October 2022, the Ministry of the Environment invested JPY10.2 billion to set up the Japan Green Investment Corporation for decarbonization projects.⁶¹⁶ This corporation operated a fund business to provide investments and loans for projects contributing to decarbonization and created cash flow for achieving carbon neutrality.

On 7 December 2022, the Ministry of Economy, Trade and Industry and the National Development and Reform Commission of the *People's Republic of China* held the second bilateral policy dialogue on decarbonization.⁶¹⁷ Participants discussed, among other things, the possibilities of using hydrogen and ammonia as energy sources.

On 22 December 2022, the Government of Japan announced during the Green Transformation Executive Committee that it will maximize the use of its nuclear infrastructures by restarting as many reactors as possible, as well as extending their lifetime beyond the original 60-years limit.⁶¹⁸ Reactors at their end-of-life would also be recommissioned.

Japan has partially complied with its commitment to a fully or predominantly decarbonized power sector by 2035, by accelerating the deployment of low-carbon energy sources. However, the phase-out of coal power has not been addressed through direct policy implementation.

Thus, Japan receives a score of 0.

On 7 July 2022, the Contracts for Difference scheme of the British government attracted investments in low-carbon and renewable energy, such as offshore wind, onshore wind, solar and tidal power to power 12 million homes.⁶¹⁹ The plan provides investors with future energy infrastructure to invest in while protecting them and consumers from the price fluctuations of the energy market.

On 19 July 2022, the Department for Business, Energy and Industrial Strategy enacted the Nuclear Fuel Fund.⁶²⁰ The program aims to protect the UK's nuclear power industry and to replace more of the infrastructure of the current energy sector with nuclear power plants. Up to GBP75 million in funding will be spent on achieving these nuclear power objectives.

On 19 July 2022, the Coal Authority of the UK issued a report in which they recognized the role of the coal industry in contributing to global warming.⁶²¹ The Coal Authority outlined measures to reduce the carbon emissions of the process, such as using low-carbon vehicles in the extraction of coal and recycling 86 per cent of their waste.

On 11 August 2022, the UK Government launched a consultation to develop biomass energy to reduce carbon emissions in the national power sector.⁶²² This announcement is preceded by a grant of GBP37 million in funding to various biomass energy projects around the UK.

On 12 August 2022, the Department for Business, Energy and Industrial Strategy announced that it had allowed 20 projects focusing on carbon capture, usage and storage to be considered in future development schemes.⁶²³ The plan is significant as it is a step forward in facilitating the capturing of GHGs in the seabeds of the North Sea, which can mitigate emissions for years to come.

On 23 September 2022, the Department for Business, Energy and Industrial Strategy announced the investment of GBP49.4 million to key industries such as steel, pharmaceuticals and food production to develop technologies that will reduce the use of fossil fuels.⁶²⁴ The technologies developed with the funding are expected to also allow these industries to move to more sustainable means of powering their operations, such as renewable power and hydrogen.

On 27 October 2022, the Department for Business, Energy and Industrial Strategy called for research proposals that inquire into the feasibility of using low-carbon hydrogen to heat homes as part of its plan to decarbonize the energy sector.⁶²⁵ The plan is also seeking to introduce any potential effective solutions that result from the research to designate metropolitan areas in the future to test their effectiveness.

Access Date: 10 November 2022. <https://www.gov.uk/government/publications/hydrogen-heating-town-pilot-open-letter-to-gas-distribution-networks>

On 31 October 2022, the Department for Business, Energy and Industrial Strategy announced the winners of the Low Carbon Hydrogen Supply 2 Competition, which aims to select innovative projects that are feasible in producing low-carbon hydrogen for the energy sector of the future.⁶²⁶ In total, five projects have been successful in their efforts, including one that aims to produce low-carbon hydrogen through ammonia reactors.

On 7 November 2022, Prime Minister Rishi Sunak promised to accelerate the decarbonization process of the British energy sector in light of the 2022 Russian invasion of Ukraine.⁶²⁷ Prime Minister Sunak promised to continue to create high-skill professions within the low-carbon energy sector to keep up with the demand.

On 11 November 2022, the Department for Business, Energy and Industrial Strategy signed a joint declaration with energy importers and exporters on reducing greenhouse gas emissions from fossil fuels.⁶²⁸ The declaration signed during the 27th Conference of the Parties to the United Nations Framework Convention on Climate Change in Egypt aims to limit various types of emissions as part of the plan to phase out coal in the UK.

On 29 November 2022, Business and Energy Secretary Grant Shapps of the Department for Business, Energy and Industrial Strategy announced the decision to fund the development of the Sizewell C nuclear power station with GBP700 million.⁶²⁹ The station is set to create 10,000 high-skill jobs in the low-carbon nuclear energy sector while powering six million homes in the UK. The decision is part of the plan to decarbonize the British energy sector and will work with other government schemes such as the plan to deliver 50 gigawatts of offshore wind power.

On 13 December 2022, the Department for Business, Energy and Industrial Strategy announced new strategies for increasing the hydrogen production capacity to 10 gigawatts in 2030 as part of the UK's plan to achieve net-zero in the power sector by 2050.⁶³⁰ The UK government aims to achieve this goal in hydrogen power production by increasing the sponsoring of private market-driven initiatives to drive innovation and research in the hydrogen power sector.

On 13 December 2022, the Department for Business, Energy and Industrial Strategy started the second phase of its Hydrogen BECCS Innovation Programme.⁶³¹ The program will fund projects that are proven to be feasible enough to produce hydrogen from low-cost biomass and that can be integrated with carbon capture technologies to lessen environmental impact. There are currently 22 projects eligible for application for the second phase.

On 13 December 2022, the Department for Business, Energy and Industrial Strategy launched a funding program designed to facilitate nuclear and hydrogen technology development in the UK.⁶³² The UK government has pledged GBP102 million to support the nuclear and hydrogen power industries. GBP77 million will be distributed for projects relating to the development of more advanced nuclear reactors and nuclear fuel, while GBP25 million would be used in developing technologies to obtain low-carbon hydrogen through biomass.

On 29 December 2022, the Department for Business, Energy and Industrial Strategy outlined an upgraded plan for offshore wind energy production, which is part of the Energy Security Bill passed on 6 July 2022.⁶³³ The improvement plan entails an Offshore Wind Environmental Improvement Package, which aims to accelerate the pace of deploying new offshore wind production facilities by 25 per cent starting 2023.

The United Kingdom has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power. The UK funded programs that aim to transform the power sector to lower its carbon output, particularly in developing renewable energy sources such as nuclear, hydrogen, and wind farms. The UK also implemented carbon capture, utilization and storage technologies to reduce carbon emissions and has adopted measures such as using low-carbon vehicles and recycling while reducing coal.

Thus, the United Kingdom receives a score of +1.

Analyst: Harry Pun

United States: +1

The United States has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power.

On 3 August 2022, the Biden-Harris Administration announced the Climate Smart Buildings Initiative, which is expected to reduce greenhouse gas emissions by 2.8 million metric tonnes annually by 2030.⁶³⁴ It will also grow the clean energy industry by increasing on-site clean electricity generation by catalyzing USD8 billion of private sector investments.

On 16 August 2022, the Biden-Harris Administration enacted the Inflation Reduction Act.⁶³⁵ The Act seeks to lower energy costs and build a clean energy economy by installing 950 million solar panels, 120,000 wind turbines and 2,300 grid-scale battery plants to power businesses and homes with clean energy by 2030. The Inflation Reduction Act also set up a USD5 billion fund for retrofitting existing coal plants to abate emissions, as well as funding for energy communities dependent on coal power.

On 26 August 2022, the Department of Energy and the Office of Fossil Energy and Carbon Management announced a funding of USD31 million for ten projects to develop carbon capture technologies.⁶³⁶ The carbon capture technologies are capable of capturing 95 per cent of carbon dioxide emissions from natural gas power plants, waste-to-energy power plants and industrial applications, including cement and steel. These technologies will transition the energy and industrial sectors to net-zero emissions.

On 12 September 2022, President Joe Biden implemented the Energy and Infrastructure Provisions of the Inflation Reduction Act of 2022.⁶³⁷ The Act seeks to increase the deployment of clean energy technologies in both private and public sectors, incentivize the purchase of electric vehicles, invest in domestic clean energy supply chains and expand research to increase the development of clean energy, climate, and related technologies.

On 21 October 2022, the Department of Energy announced USD28 million to fund research and development projects that will advance hydropower as a source of clean energy.⁶³⁸ The first project aims to develop sustainable hydropower, while the remaining two projects involve researching the environmental impact and sustainability of hydropower.

On 14 November 2022, the Biden-Harris administration announced USD350 million in funding towards Long-Duration Energy Storage Demonstrations (LDES).⁶³⁹ LDES apply to projects that can deliver electricity for longer than 10 hours to support a reliable, carbon-free electric grid, and the funding of LDES will advance new renewable energy technologies.

On 17 November 2022, US Secretary of Energy Jennifer Granholm announced that the US joined Mission Innovation's Net-Zero Industries Mission at the 27th Conference of the Parties to the United Nations Framework Convention on Climate Change.⁶⁴⁰ The Mission aims to tackle technical challenges that impede on clean energy innovations and a clean energy economy.

On 17 November 2022, Secretary Granholm signed a Memorandum of Understanding to advance Zero-Emission Medium and Heavy-Duty Vehicles.⁶⁴¹ This non-binding memorandum is part of the Drive to Zero Campaign of the Electric Vehicles Initiative under the Clean Energy Ministerial.

On 21 November 2022, the Biden-Harris Administration announced an investment of USD6 billion towards the Civil Nuclear Credit program (CNC).⁶⁴² The CNC provides clean, reliable nuclear energy facilities and avoids carbon emissions.

On 8 December 2022, the Department of Energy announced USD8 million in funding for six solar energy research projects across six states.⁶⁴³ The project supports the co-location of agricultural production and solar energy generation on the same land and reduces barriers to larger community-scale solar energy.

On 13 December 2022, the Biden-Harris administration, through the Department of Energy, funded four programs to remove the domestic carbon dioxide industry.⁶⁴⁴ USD3.7 billion will be directed to these programs, which are a part of the Bipartisan Infrastructure Law. The programs are the following: the Direct Air Capture Commercial and Pre-Commercial Prize, the Regional Direct Air Capture Hubs, the Carbon Utilization Procurement Grants and the Bipartisan Infrastructure Law Technology Commercialization Fund.

On 14 December 2022, the US Department of Energy announced USD15 million in funding towards two geothermal energy projects.⁶⁴⁵ The projects are the following: the Geothermal Limitless Approach to Drilling Efficiencies (GLADE) in the Denver-Julesburg Basin of Colorado and the Evaluation of Physics-Based Drilling and Alternative Bit Design in the Geysers Geothermal Field of California. The GLADE project seeks to drill twin high-temperature geothermal wells at a deeper depth at a rapid rate compared to current standard for Geothermal drilling.

On 16 December 2022, the Biden-Harris administration announced the issue of USD750 million on behalf of the US Department of Energy to reduce the cost of clean hydro energy.⁶⁴⁶ The funding will advance the technical expansion required to achieve the Department's Hydrogen Shot goal of USD1 per kilogram of clean hydrogen by 2030.

The United States has fully complied with its commitment to a fully or predominantly decarbonized power sector by 2035, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power. The US has funded initiatives and projects, such as the Climate Smart buildings, investments in solar panels and offshore wind energy that accelerate the transition to clean energy.

Thus, the United States receives a score of +1.

European Union: +1

The European Union has fully complied with its commitment to a fully or predominantly decarbonized power sector, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power.

On 29 June 2022, the European Council adopted its negotiating position regarding the Fit for 55 package.⁶⁴⁷ Fit for 55 will enable the EU to reduce its greenhouse gas emissions by 55 per cent by 2030 compared to 2019 levels and to achieve climate neutrality by 2050. The package places strong emphases on decarbonization of the power sector and accelerating renewables deployment.

On 5 July 2022, the European Investment Bank (EIB) invested EUR475 million for wind energy in Denmark.⁶⁴⁸ The European Investment Bank will loan the funds to Vesta A/S to accelerate deployment of its wind power generation technology to more sites in Denmark.

On 13 July 2022, the EIB strengthened its lending for sustainable transportation and approved EUR8.6 billion for innovation, renewable energy, education and water projects.⁶⁴⁹ Specifically, the European Investment Bank backed research and development into on and offshore wind turbine technology, three large scale solar power farms in central Spain and the acceleration of small-scale wind and solar projects in France and Italy.

On 14 July 2022, the European Commission published new rules to drive more renewable energy generation so that its share comprises 40 per cent of the energy mix by 2030 and to cut energy consumption by 9 per cent by 2030.⁶⁵⁰ The Fit for 55 package must be negotiated by EU countries and the European Parliament in a process that takes approximately two years.

On 18 July 2022, the EIB and BBVA agreed to mobilize EUR1.194 billion to boost climate action and the economic recovery of small and medium enterprises in Spain.⁶⁵¹ EUR512 million will fund clean energy and climate action including the construction and operation of photovoltaic plants.

On 22 July 2022, Iberdrola and the EIB signed a EUR550 million green loan to boost renewable energy in Spain.⁶⁵² The agreement will accelerate Spain's green energy transition, and the funds will finance some 1800-MW of photovoltaic and wind farms in rural areas around the country. The new facilities will supply the equivalent amount of electricity needed to power over one million homes.

⁶⁵² Spain: Iberdrola and eib sign EUR550 million green loan to boost renewable energy, European Investment Bank (Luxembourg City) 22 July 2022. Access Date: 13 November 2022. <https://www.eib.org/en/press/all/2022-334-spain-iberdrola-and-eib-sign-eur550-million-green-loan-to-boost-renewable-energy>

On 8 August 2022, the European Commission approved a EUR149 million Romanian measure to support development of renewable hydrogen production under the Recovery and Resilience Facility.⁶⁵³ Romania's measure will run until December 2023 and is open to companies of any size active in electricity and/or hydrogen production, administrative territorial units and national institutes for research and development in the energy field. By the end of December 2025, Romania aims to install 100 MW capable of producing at least 10,000 tonnes of hydrogen annually.

On 10 August 2022, the EIB provided the Unicredit Bank of Austria with a EUR92 million framework loan.⁶⁵⁴ Unicredit will create a financing portfolio for funding clean energy projects from small and medium sized companies. The long-term loan meets a financing vehicle gap created by Austria's goal to power itself 100 per cent by renewables by 2030.

On 1 September 2022, the EIB lent EUR3 million to Oesterreiche Bundesforste AG for an additional four wind turbines.⁶⁵⁵ The funding built on European Investment Bank's Initial investment of EUR36.7 million for the Pretul 42-MW wind farm and the seven-kilometer line connecting it to the electricity system. Austria plans to generate 100 per cent of its electricity from renewables by 2030, and the four new turbines will add an incremental 16.6 MW.

On 5 September 2022, the European Commission approved a EUR341 million Green measure under the Recovery and Resilience Facility to support the development of electricity storage facilities.⁶⁵⁶ Construction and operation of storage facilities will smooth the integration of wind and solar installations into the Greek electricity system.

On 7 September 2022, the EIB signed an agreement with the European Commission on the Public Sector Loan Facility under the Just Transition Fund.⁶⁵⁷ The EIB will combine EUR10 billion with an EU budgeted EUR1.5 billion to the loan facility. The facility will offer loans and grants to reduce the burden on public coffers in the affected regions transitioning away from coal and other fossil fuels.

On 7 September 2022, Aquila Clean Energy raised financing for 2.6 gigawatt (GW) of capacity for renewable energy projects in Spain and Portugal with the support of Invest EU.⁶⁵⁸ There will be more than 50 projects consisting of solar photovoltaics and onshore wind, and total generation capacity will be the equivalent of serving 1.4 million households.

⁶⁵⁸ Aquila Clean Energy raises financing for 2.6 GW capacity renewable energy projects in Southern Europe with support of InvestEU, European Commission (Brussels) 7 September 2022. Access Date: 12 November 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_22_5370

On 14 September 2022, the EIB approved EUR15 billion for business, climate action, sustainable transport, innovation and urban investment.⁶⁵⁹ Specifically, the European Investment Bank allocated EUR4.4 billion for projects such as wind, photovoltaic, hydro and geothermal power in France; small scale solar in Italy; and larger scale wind farms in central Spain.

On 27 September 2022, the European Commission approved additional German measures to support electricity production from renewable energy sources.⁶⁶⁰ The measures include the introduction of financial incentives to encourage consumers to install rooftop solar photovoltaic panels and to incentivize selling excess power to the grid.

On 27 September 2022, at the 41st assembly of the International Civil Aviation Organization, the European Commission advocated for “a long-term aspirational goal for net-zero aviation emissions by 2050.”⁶⁶¹ Additionally, it reaffirmed its commitment to the Carbon Offsetting and Reduction Scheme for International Aviation as well as its future implementation.

On 3 October 2022, Iberdrola and the EIB signed a EUR220 million green loan top up to boost smart grids in Spain.⁶⁶² The additional resources will focus on the distribution company’s strategic plan which emphasizes renewables and smart grids in twelve Spanish regions.

On 4 October 2022, the European Council agreed to its general approach on the May 2022 REPowerEU plan.⁶⁶³ The approach revised several measures designed to decrease dependency on fossil fuels and accelerate renewable generation. It also allocates an additional EUR20 billion, as proposed by the European Commission. The Council modified the formula for allocation of funds to consider fossil fuel dependency, member social cohesion policy, and increased renewable investment prices.

On 13 October 2022, the European Commission approved EUR220 million to support a Spanish measure for COBRA in the production of renewable hydrogen.⁶⁶⁴ COBRA will start its first renewable hydrogen production facility with the intent of supplying hard to abate sectors such as refineries and ceramics who need to reduce dependence on Russian fossil fuels. There will be two electrolyzers in Cartagena and Castillon with a total capacity of 205 MW, which will help generate 8,550 tonnes of renewable hydrogen and reduce 47,038 tonnes of emissions annually.

On 18 October 2022, the European Commission issued its call for applications for candidate projects in all categories under the new energy infrastructure regulation.⁶⁶⁵ The categories include projects for electricity

transmission, offshore grids for renewable energy, electricity storage, hydrogen, electrolyzers, smart electricity grids, smart gas grids and CO2 networks.

On 19 October 2022, Members of the European Parliament (MEPs) called for the 2023 EU budget to address energy and climate.⁶⁶⁶ Specifically, MEPs supported an additional EUR533 million to increase EU energy independence, help citizens and small/medium enterprises with their bills, and accelerate the green energy transition to combat climate change.

On 21 October 2022, the European Commission and Latvia adopted a partnership agreement to allocate EUR4.6 billion to support a green and fair economy and society as Latvia shifts out of coal and other fossil fuels from 2021 to 2027.⁶⁶⁷ Specifically, EUR839 million will be allocated to renewable energy projects including wind and solar.

On 21 October 2022, the German Lander North-Rhine Westphalia, Brandenburg, Saxony and Saxony Anhalt launched their programming under their EUR2.5 billion share of the EU Just Transition Fund to support a fair transition to the green economy.⁶⁶⁸ Germany's commitment to phase out of coal by 2038 means these territorial regions need to be supported so that the local economy and population do not fall behind economically and socially.

On 21 October 2022, the European Council issued its meeting conclusions.⁶⁶⁹ One conclusion recommended an emergency measure to simplify and expedite administrative approvals for renewable energy projects under Article 122 of the Treaty given worsening energy market conditions from the Russian invasion of Ukraine.

On 26 October 2022, the EIB announced support for the REPowerEU plan with an additional EUR30 billion in equity financing over the next five years.⁶⁷⁰ The funds will be directed to renewables, energy efficiency, grids and storage, electric vehicle charging stations, and breakthrough technologies such as low carbon hydrogen.

On 28 October 2022, the European Environment Agency issued a statement to cities that they can offer new opportunities for consumers to both produce and consume renewable energy.⁶⁷¹ Through efficient use of rooftops and targeted financing, city dwellers can be encouraged to pursue citizen-led renewable energy generation. Municipalities can also act as information and resource hubs to build capacity. The brief accelerates renewable generation which is critical to decarbonizing the power system.

On 3 November 2022, the European Commission announced its third call for large scale projects as part of the EU Innovation Fund.⁶⁷² The objective of the projects is to accelerate energy independence from Russian

⁶⁷² Commission invests €3 Billion in innovative clean tech projects to deliver on REPowerEU and accelerate energy independence from Russian fossil fuels, European Commission (Brussels) 3 November 2022. Access Date: 12 November 2022. https://ec.europa.eu/commission/presscorner/detail/en/IP_22_6489

fossil fuels and to deliver on REPowerEU. Projects may include general decarbonization, innovative electrification in industry and hydrogen, clean tech manufacturing and mid-size pilots.

On 7 November 2022, President of the European Commission Ursula von der Leyen and Prime Minister of Kazakhstan Alikhan Smailov concluded a strategic partnership on raw materials, batteries, and renewable hydrogen.⁶⁷³ The agreement's objectives include a sustainable and secure supply of raw and refined materials critical to renewable energy deployment. It also focuses on battery and green hydrogen value chains.

On 8 November 2022, President von der Leyen and President of Egypt Abdel Fattah El-Sisi issued a joint statement announcing a green hydrogen partnership.⁶⁷⁴ They committed to a long-term partnership focused on accelerating deployment of renewable energy sources as an enabler for green hydrogen production. They intend to cooperate on regulatory frameworks, market assessment and research and development. They also plan to promote investments which will lead to production, storage, distribution and transportation of green hydrogen.

On 9 November 2022, the European Commission proposed a temporary new emergency regulation to expedite the permitting of renewables.⁶⁷⁵ The Commission proposed a European Council regulation under Article 122 of the Treaty to apply for one year until member countries adopt and transpose the Renewables Directive.

On 10 November 2022, MEPs voted to include energy measures in their national recovery plans.⁶⁷⁶ Measures would include reductions in energy use, production of clean energy and diversification of energy supplies. The proposal aims to support acceleration of independence from Russian fossil fuel supplies and towards a clean energy transition as per the EU's RePowerEU Plan. Members also called for an additional EUR20 billion and additional funding to financially assist members with these measures.

On 10 November 2022, Eiffel Investment Group and the European Investment Fund backed by InvestEU announced the launch of Eiffel Transition Infrastructure, an innovative bridge equity fund.⁶⁷⁷ The EIF committed EUR75 million to the new fund. Several top institutional investors joined the fund as well, which is expected to raise EUR500 million for its first close. The fund's goal is to accelerate development of renewable energy assets for developers and independent power producers who may have difficulty accessing capital for the development phase of their projects. The fund expects to expedite up to 7 GW of renewable assets and offset four million tonnes of carbon dioxide annually.

On 15 November 2022, the European Commission pledged an additional EUR10 million in funds "for a project to reduce international shipping's greenhouse gas emissions."⁶⁷⁸ This project is being managed by the International Maritime Organization and intends to establish five Maritime Technology Cooperation Centres

around the world. These centres are designed to increase energy efficiency through solar power vessels, data collection systems and energy-efficiency assessments.

On 17 November 2022, the EIB approved EUR11 billion in additional investments for climate action and clean energy, business, sustainable transport, health and urban renewal.⁶⁷⁹ The EUR4 billion meant for climate action and clean energy includes projects to reinforce energy networks in Spain, the Czech Republic and Moldova, as well as renewable energy endeavors in Greece, Estonia and Cyprus.

On 21 November 2022, the European Commission approved EUR37.3 billion for Spain between 2021 and 2027 to support its green transition and to develop a fair and competitive economy.⁶⁸⁰ Some EUR3.3 billion will assist the country to meet its target of 74 per cent of electricity produced from renewable sources by 2030.

On 23 November 2022, Eurazeo announced its first close of EUR210 million for its Eurazeo Transition Infrastructure Fund.⁶⁸¹ The objectives of the Fund include climate change mitigation and infrastructure transition towards zero carbon futures.

On 23 November 2022, MEPs approved the 2023 Budget with focus on key priorities including decarbonizing the power sector.⁶⁸² Specifically, they added EUR103.5 million to the Connecting Europe Facility, which funds high quality cross-border transmission and energy systems, modernizes infrastructure and fosters renewable connectivity. Members also added EUR30 million to the environment and climate action LIFE programme.

On 24 November 2022, EU Energy Ministers agreed to changes in permit granting processes to expedite renewable energy projects.⁶⁸³ The temporary 18-month regulation will accelerate projects which can deploy quickly and carry limited environmental impacts. Solar energy equipment will be permitted within three months and some projects may be excused from environmental impact assessment. Projects above 50 MW will be approved within one month assuming no grid reliability or connectivity issues. Repowering of existing renewable energy projects will carry a maximum six-month deadline for approval. Where repowering increases plant capacity more than 15 per cent, the deadline will be three months. Heat pumps with less than 50MW will be approved within one month and ground source heat pumps within three months.

On 24 November 2022, the European Commission approved EUR459 million for a just climate transition in Slovakia.⁶⁸⁴ The funds allocated will assist Slovakia in phasing out coal mining and thermal power production in its Trencin/Upper Nitra region during 2023. The funds will also invest in renewable energy projects, electricity system improvements, building efficiency and geothermal heating.

On 2 December 2022, the European Commission announced EUR623 million in funding for a just transition to climate neutrality for the Netherlands.⁶⁸⁵ In addition to moving away from carbon intensive energy sources, greening traditional manufacturing, economic diversification and worker up-skilling, the Just Transition Fund will support renewable energy production and improvements to the electricity transmission system.

On 2 December 2022, the EIB established a EUR100 million framework loan with Austria's regional bank RLB NO-Wien to support Austria's national green energy goals.⁶⁸⁶ The loan will permit RLB NO-Wien to institute a EUR200 million credit portfolio to fund clean energy products.

On 5 December 2022, the European Commission announced EUR3.85 billion in funding to support a just climate transition in five Polish regions.⁶⁸⁷ One region, Silesia, is the largest hard coal mining centre in the EU. Besides economic diversification, worker training and reskilling and land rehabilitation, the funds will support renewable energy projects and energy efficiency.

On 7 December 2022, the European Commission announced EUR67 million in funding for Luxembourg to support its green transition.⁶⁸⁸ Some EUR23 million will be invested in renewable energy production such as biomass and solar.

On 7 December 2022, the EIB signed a partnership agreement with Caisse d'Épargne CEPAC, which is dedicated to financing French solar and wind projects.⁶⁸⁹ The financing package is valued at EUR350 million.

On 8 December 2022, EU members agreed to a European Commission proposal to allocate EUR602 million in eight trans-European energy infrastructure projects.⁶⁹⁰ These include a high voltage undersea cable to connect the electricity infrastructure of Italy and Tunisia, a smart grid project between Austria-Croatia and Slovenia, a hydroelectric pumped storage project in Ireland and carbon capture and storage initiatives in Belgium and France.

On 9 December 2022, the European Commission announced EUR2.14 billion in funding for a just climate transition in Romania.⁶⁹¹ In addition to worker training and reskilling along with economic diversification, the funds will support renewable energy projects, hydrogen production, and other clean energy sources.

On 9 December 2022, the European Commission launched a new industrial alliance with partners from industry sectors, research organizations and other associations.⁶⁹² The alliance's main target encompasses 30 GW of manufacturing capacity by 2025 across the value chain to support REPowerEU targets of 320 GW of solar

photovoltaic power by 2025. The group proposes to increase domestic production capacity, diversify import sources, support investment, and address policy and other regulatory barriers to mitigate supply risks.

On 12 December 2022, the EIB announced a EUR790 million loan to the Czech Republic.⁶⁹³ The loan provides financing for modernization of the Czech electricity grid and facilitates connectivity for renewable energy sources. CEZ, the country's energy utility, will connect approximately 2.2 GW of new renewable energy supply to help decarbonize the Czech economy.

On 12 December 2022, the European Commission signed an InvestEU agreement with the Nordic Investment Bank.⁶⁹⁴ The agreement, which is worth up to EUR114 million, will unlock some EUR480 million in green energy investments, including decarbonization and modernization of the power system. The funds are expected to generate overall private and public investments of EUR2 billion. Eligible projects must be sited in Denmark, Estonia, Latvia, Lithuania, and Poland, and/or Finland and Sweden.

On 13 December 2022, the European Parliament and the European Council struck an agreement on the Carbon Border Adjustment Mechanism (CBAM).⁶⁹⁵ The CBAM is the EU's tool to put a fair price on carbon for goods entering the EU market and to foster lower carbon production in non-EU countries. The agreement will spark amendment of the Emissions Trading System to encourage EU production and power systems to decarbonize and reduce carbon leakage risk.

On 14 December 2022, the European Commission announced that Belgium will receive nearly EUR3 billion as part of EU Cohesion Policy to support its green and digital transition between 2021 and 2027.⁶⁹⁶ Almost EUR400 million will be invested in emission reductions, energy efficiency and renewable energy projects.

On 14 December 2022, the European Parliament struck a deal with the European Council to include REPowerEU measures in national recovery plans to accelerate decarbonization and the transition away from Russian fuel.⁶⁹⁷ Under the provisional agreement, EU countries who apply for extra funds under amended recovery and resilience plans must include specific efforts to reduce energy use, produce clean energy and diversify energy supplies consistent with REPowerEU.

On 14 December 2022, MEPs amended the European Commission legislative proposal to expedite approvals of renewable energy projects.⁶⁹⁸ Specifically, the proposed law accelerates timelines for approvals for renewable energy proposals from one year to nine months. EU countries must also approve solar panel on roof proposals within one month. The European Commission tabled the draft legislation as part of the REPowerEU package.

⁶⁹³ Czech Republic: EIB to finance modernisation of CEZ's distribution grid and connection of new renewable energy sources with a record-breaking loan of EUR790 million, European Investment Bank (Luxembourg) 12 December 2022. ⁶⁹⁸ Energy Crisis: MEPs back plans to boost the deployment of renewables, European Parliament (Brussels) 14 December 2022. Access Date: 16 December 2022. <https://www.europarl.europa.eu/news/en/press-room/20221209IPR64422/energy-crisis-meps-back-plans-to-boost-the-deployment-of-renewables>

On 15 December 2022, the European Commission welcomed the agreements reached at the 20th Ministerial Council meeting of the Energy Community.⁶⁹⁹ The agreement included a renewable energy target of 31 per cent for 2030 along with energy efficiency and reduction objectives. The Parties also committed to adopting the EU electricity market rules.

On 15 December 2022, the European Council issued its meeting conclusions.⁷⁰⁰ In the energy and economy section, the Council called for rapid completion of the Renewable Energy Directive, the Energy Efficiency Directive and the Energy Performance of Buildings Directive. It emphasized the importance of innovation and investment in the decarbonized power and energy systems to meet green deal objectives, reduce dependence on Russian energy supplies and ensure energy security. The Council asked the European Commission to submit its impact assessment on the structural reform of the electricity market by early 2023 to facilitate uptake of renewable energy and make it fully decarbonized.

On 15 December 2022, the EU institutions, European Parliament, European Council and European Commission released their joint 2023-24 priorities and legislative measures.⁷⁰¹ Highest priority will be accorded to laws and regulations required to expedite implementation of the European Green Deal with its decarbonization of the power system and investment in renewable and alternate energy sources.

On 16 December, the European Commission announced that Slovenia will be granted EUR258 million to work towards a just climate transition in the regions of Savinjsko-Saleska (SASA) and Zasavje.⁷⁰² In addition to supporting life-long training and redeployment of coal workers and economic diversification, the funds will help to repurpose the former mines for investment in renewable energy projects and hydrogen production. The fund will also redesign the district heating system to transition from coal to other sources of power such as solar and heat pumps. In SASA, coal mining and the thermal plants will close by 2033.

On 16 December 2022, the European Commission authorized EUR1.2 billion under EU state aid rules for the Czech Republic's green district heating proposal.⁷⁰³ The plan supports the decarbonization and modernization of heat generation units fueled by renewable energy. Direct grants will be paid to the owners of heating generation units and district heating systems to install new or replace existing units with heat generation units based on renewable energy and to modernize units and systems to replace coal with biomass. The plan will also foster transitions from natural gas-powered systems to low or no carbon fuels and will support carbon capture systems.

The European Union has fully complied with its commitment to a fully or predominantly decarbonized power sector, prioritizing concrete and timely steps towards the goal of accelerating phase-out of domestic unabated coal power. The EU strengthened its regulatory regime, increased funding, established strategic partnerships and adopted other measures to accelerate the deployment of renewable energy and secure a just transition away from coal and other fossil fuels for the power sector.

Thus, the European Union receives a score of +1.
