The G7 Research Group presents the

2020 G7 USA Virtual Summit Interim Compliance Report

17 March 2020 to 25 February 2021

Prepared by
Meagan Byrd
and the G7 Research Group

16 May 2021

www.g7.utoronto.ca
g7@utoronto.ca
[@g7_rg](https://twitter.com/g7_rg)

“We have meanwhile set up a process and there are also independent institutions monitoring which objectives of our G7 meetings we actually achieve. When it comes to these goals we have a compliance rate of about 80%, according to the University of Toronto. Germany, with its 87%, comes off pretty well. That means that next year too, under the Japanese G7 presidency, we are going to check where we stand in comparison to what we have discussed with each other now. So a lot of what we have resolved to do here together is something that we are going to have to work very hard at over the next few months. But I think that it has become apparent that we, as the G7, want to assume responsibility far beyond the prosperity in our own countries. That’s why today’s outreach meetings, that is the meetings with our guests, were also of great importance.”

Chancellor Angela Merkel, Schloss Elmau, 8 June 2015

G7 summits are a moment for people to judge whether aspirational intent is met by concrete commitments. The G7 Research Group provides a report card on the implementation of G7 and G20 commitments. It is a good moment for the public to interact with leaders and say, you took a leadership position on these issues — a year later, or three years later, what have you accomplished?

Achim Steiner, Administrator, United Nations Development Programme,

Background

The global response to the COVID-19 pandemic has highlighted the importance of leveraging all available measures to protect people at risk from COVID-19.¹⁶³² This includes coordinating with online platforms and utilizing social media to provide citizens with the latest credible information on the pandemic.¹⁶³³ At previous G7/G8 summits, the importance of coordinating with online platforms and social media has been recognized to help promote an open, free and secure digital transformation.¹⁶³⁴

At the 2011 Deauville Summit, the G8 leaders recognized that the Internet has become a valuable information and education source for citizens.¹⁶³⁵ They noted that Internet technologies can help improve government efficiency, the provision of services, and enhancing relations with citizens.¹⁶³⁶

At the 2013 Lough Erne Summit, the G8 leaders adopted the G8 Open Data Charter in recognition of the global proliferation of technology, social media and information.¹⁶³⁷ They stated that this global movement “contains enormous potential to create more accountable, efficient, responsive, and effective governments and business, and to spur economic growth.”¹⁶³⁸ They committed to releasing open data on government and business operations, noting that citizens expect free access to information and services electronically.¹⁶³⁹

At the 2016 Ise-Shima Summit, the G7 leaders adopted the Charter for a Digitally Connected World, recognizing that the rapid evolution and spread of Internet technologies has created new opportunities for cooperation and addressing global challenges.¹⁶⁴⁰ They affirmed that the historic shift towards the digitally connected view requires promoting and protecting the free flow of information.¹⁶⁴¹

At the 2019 Biarritz Summit, the G7 leaders adopted the Biarritz Strategy for an Open, Free and Secure Digital Transformation.¹⁶⁴² They recognized that the Internet and related technologies have “brought new ways of empowering all individuals and communities, and provided access to an unprecedented body of information and knowledge.”¹⁶⁴³

On 16 March 2020, under the U.S. presidency, G7 leaders met virtually to respond to the COVID-19 pandemic. At the time, they expected to meet again in three months at their regularly scheduled summit on 10-12 June 2020, which was later postponed indefinitely.

Commitment Features

The G7 members agreed to “coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.”

The first component of the commitment is “coordinating with online platforms.” These coordination efforts must also “maximize public access to the latest correct and relevant official information.” “Coordinate” is defined as “to bring into a common action, movement, or condition.”¹⁶⁴⁴ An online platform is understood as “a digital service that facilitates interactions between two or more distinct but interdependent sets of users (whether firms or individuals) who interact through the service via the Internet.”¹⁶⁴⁵ To maximize is “to increase to a maximum,” or to increase to “the greatest quantity or value attainable.”¹⁶⁴⁶ Public access is understood as perceptible and exposed to a general view.¹⁶⁴⁷ Information is defined as “knowledge obtained from investigation, study or instruction” and may include intelligence, news, facts, or data.¹⁶⁴⁸ The information must also be official, correct, and relevant, meaning it is “authoritative” or “relating to an authority or public body and its duties, actions, and responsibilities.”¹⁶⁴⁹

This commitment continues by stating that coordination efforts will be done in recognition that millions of citizens receive information and news via social media.” To recognize is to “acknowledge formally” and it

¹⁶⁴⁶ Maximize, Merriam Webster Dictionary (Massachusetts). Access Date: 21 December 2020. <https://www.merriam-webster.com/dictionary/maximize>.

¹⁶⁴⁷ Public, Merriam Webster Dictionary (Massachusetts). Access Date: 21 December 2020. <https://www.merriam-webster.com/dictionary/public>.

¹⁶⁴⁸ Information, Merriam Webster Dictionary (Massachusetts). Access Date: 21 December 2020. <https://www.merriam-webster.com/dictionary/information>.

¹⁶⁴⁹ Official, Merriam Webster Dictionary (Massachusetts). Access Date: 21 December 2020. <https://www.merriam-webster.com/dictionary/official>.

should be interpreted to mean “explicit acknowledgment of something.”¹⁶⁵⁰ Social media is understood as “forms of electronic community (such as websites for social networking and microblogging) through which users create online communities to share information, ideas, personal messages and other content (such as videos).”¹⁶⁵¹ Thus, while there are two parts to this commitment, the second part is connected to the first part by the conjunction “in recognition,” suggesting that the first more general part on coordinating with online platforms to maximize public access to information is the intended core of this commitment. Examples of compliance include distributing public information by working directly with online platforms such as Facebook, Instagram, Twitter, Snapchat, YouTube, TikTok, Google, and others. Actions may include hosting informal and formal meetings with such platforms, establishing memorandums of understanding, or creating joint policies and content strategies.

The extent to which a G7 member fulfills this commitment will be measured by a depth analysis. A G7 member “fully coordinating” with online platforms to maximize public access to the latest and correct relevant information will have publicly and directly engaged in coordinated efforts with online platforms in pursuit of this goal. A G7 member “partially coordinating” with online platforms may unilaterally launch online social media campaigns to provide public information, but not have coordinated directly with online platforms in pursuit of this goal. Examples of partial compliance include only unilaterally launching online marketing campaigns, new social media accounts with relevant information, creating online content such as videos, and launching new web portals.

To achieve full compliance, G7 members must take action according to both parts of the commitment by maximizing public access to the latest and relevant information in recognition that millions of citizens receive information and news via social media, while also coordinating directly with online platforms to achieve this goal.

Partial compliance will be awarded only if G7 members seek to maximize public access to information and news via online platforms and social media, but efforts do not cooperate directly with online platforms. A score of no compliance will be awarded only with no demonstrable compliance to any part of the commitment.

Scoring Guidelines

-1	G7 member does NOT take any efforts to coordinate with online platforms AND has not attempted to maximize public access to the latest correct and relevant official information via social media.
0	G7 member has taken efforts to maximize public access to the latest correct and relevant official information via social media, but HAS NOT coordinated with online platforms.
+1	G7 member has taken efforts to coordinate with online platforms AND has demonstrated efforts to maximize public access to the latest correct and relevant official information via online platforms.

*Compliance Director: Foti Veto
Lead Analyst: Kiayla Amos-Flom*

Canada: +1

Canada has fully complied with its commitment to coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

¹⁶⁵¹ Social Media, Merriam Webster Dictionary (Massachusetts). Access Date: 21 December 2020. <https://www.merriam-webster.com/dictionary/social%20media>.

On 22 March 2020, the Government of Canada launched a CAD30 million ad campaign promoting methods to reduce the spread of COVID-19, including personal hygiene and social distancing, across print, television, radio, and federal social media accounts on Twitter, Instagram, Facebook, YouTube, and LinkedIn.¹⁶⁵²

On 28 April 2020, the Public Health Agency of Canada began an education video series on COVID-19 in collaboration with YouTube.¹⁶⁵³ The series featured four videos where some of Canada's top YouTube creators interviewed Deputy Chief Public Health Officer Dr. Howard Njoo.¹⁶⁵⁴

On 31 July 2020, the Government of Canada rolled out COVID Alert, a digital app that aims to help mitigate the spread of the coronavirus in Canada.¹⁶⁵⁵ The app helps to notify a user should they have been exposed to another user who has COVID-19.¹⁶⁵⁶ First launched in the province of Ontario, the Canadian government aims to soon have it available across Canada.¹⁶⁵⁷ The Government of Canada's contemporary awareness of their citizens' usage of apps and social media has helped to increase public access to prevalent information as well as keep citizens safe and informed.¹⁶⁵⁸

On 27 October 2020, the Government of Canada launched a second bilingual ad campaign featuring prominent health officers reminding citizens of basic health precautions and encouraging downloads of the federal "COVID Alert" app.¹⁶⁵⁹ This ad campaign was simultaneously distributed across online platforms and social media as well as on television and radio.¹⁶⁶⁰

On November 2020, the Government of Canada launched a CAD850,000 ad campaign warning Canadians to stay home and avoid travelling abroad during the COVID-19 pandemic.¹⁶⁶¹ The campaign will run until March 2021 and targets "snowbirds" on Facebook, Twitter, travel websites, online magazines, and other digital platforms.¹⁶⁶²

On 14 February 2021, Canada's Chief Public Health Officer Dr. Theresa Tam recognized the role social media platforms have in keeping Canadians "safe, informed and connected."¹⁶⁶³ Dr. Tam underlined the importance however, in also "distinguish[ing] between misinformation" and fact on these platforms.¹⁶⁶⁴

Canada has fully complied with this commitment though strong actions aimed at coordinating with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media."

Thus, Canada receives a score of +1.

Analyst: Khalil Khalifa

France: +1

France has fully complied with its commitment to coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 18 March 2020, the Government of France¹⁶⁶⁵ and Public Health France¹⁶⁶⁶ began posting correct and relevant COVID-19 health information on social media platforms including Instagram, Facebook, Twitter, and LinkedIn.

On 22 October 2020, the Government of France launched TousAntiCovid, a contact tracing application that also gives the user access to COVID-19 health information.¹⁶⁶⁷ TousAntiCovid is an updated version of the StopCovid application.¹⁶⁶⁸

On 19 February 2021, Public Health France posted an epidemiological update on the surveillance of COVID-19, which presented a detailed analysis of the indicators put in place by Public Health France and its network of partners.¹⁶⁶⁹ The information is updated weekly.¹⁶⁷⁰

On 24 February 2021, the Government of France updated its online COVID-19 information platform to show the new confirmed cases and new patients in intensive care.¹⁶⁷¹ This information is updated on a daily

basis.¹⁶⁷² Other information, such as vaccine administration and positivity rate, is provided but updated less frequently.¹⁶⁷³

France has fully complied with its commitment to maximize public access to online health information by taking efforts to coordinate with online platforms and by demonstrating efforts to provide correct and relevant health information, with many ways for the public to access government-provided health information.

Thus, France has received a score of +1.

Analyst: Andrew McFall

Germany: +1

Germany has fully complied with its commitment to coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 20 March 2020, the Federal Chancellery, along with the Ministry for Education and Research, began their #WirVsVirus hackathon.¹⁶⁷⁴ This digital program brought together citizens, non-governmental organizations, and corporations to solve a variety of COVID-19 related social problems, including issues of online access to information. A number of organizations provided support for the implementation of digital solutions or project funding.¹⁶⁷⁵

On 20 March 2020, the Government of Germany also began a social media campaign called #WirBleibenZuhause, which translates in English to #WeStayatHome.¹⁶⁷⁶ Health Minister Jens Spahn later personally involved himself in the production of video promotions for the campaign.¹⁶⁷⁷

On 14 June 2020, the Government of Germany announced the launch of its own COVID-19 warning app, available for iOS and Android.¹⁶⁷⁸

On 21 June 2020, Chancellor Angela Merkel promoted the app on her weekly podcast, which features up-to-date statistics and warns users of recent possible exposures.¹⁶⁷⁹ By 1 February 2021, the app had been

downloaded over 25 million times.¹⁶⁸⁰ The exposure-tracking technology for the app was developed in coordination with Google.¹⁶⁸¹

On 12 November 2020, Minister Spahn announced that internet searches on Google would return a highlighted Knowledge Panel containing links to the National Health Portal website, if certain medical keywords were used.¹⁶⁸² This website offers current information on COVID-19, and Google Knowledge Panels also provide links to official information regarding 160 other diseases.¹⁶⁸³

Germany has coordinated with online platforms such as Google to maximize public access to official health information, while also promoting its informational websites through its own social media accounts.

Thus, Germany receives a score of +1.

Analyst: Daniel Parsons

Italy: +1

Italy has fully complied with its commitment to coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 27 March 2020, the Ministry of Health launched a COVID-19 communication campaign featuring Amadeus, a famous television presenter, promoting simple precautions and to use the Health Ministry's website as a reputable source of COVID-19 information.¹⁶⁸⁴ The campaign was spread across television, radio, and the Ministry of Health's social media accounts.¹⁶⁸⁵

On 6 October 2020, the Ministry of Health launched the app Immuni, to aid in contact tracing and to contain the spread of COVID-19.¹⁶⁸⁶ The app helps to notify a user should they have been exposed to another user who has COVID-19. A test of the contract-tracing app had previously been launched on 1 June 2020.¹⁶⁸⁷

On 31 January 2021, the Italian Government last updated their website to provide detailed information on the COVID-19 Pandemic.¹⁶⁸⁸ The website provides information and updates on travel restrictions, vaccine rollout, symptoms of the virus, and containment measures.¹⁶⁸⁹

Italy has fully complied with its commitment to maximize public access to online health information by taking efforts to coordinate with online platforms and by demonstrating efforts to provide correct and relevant health information, with many ways for the public to access government-provided health information.

Thus, Italy receives a score of +1.

Analyst: Khalil Khalifa

Japan: +1

Japan has fully complied with its commitment to coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 3 April 2020, Opposition Member Kazuma Nakatani of the Constitutional Democratic Party submitted a question to the government in the National Diet.¹⁶⁹⁰ He argued that the government's informational websites were not effective enough in providing access to pandemic guidelines and asked if the government had plans to coordinate with social media platforms to improve public access to official health information.¹⁶⁹¹

On 14 April 2020, the Cabinet issued a written response which stated that the government was disseminating health guidelines by posting links to government websites on PMO social media accounts of the Prime Minister's Office (PMO).¹⁶⁹² The PMO continues to link the latest official health information to its social media accounts on Facebook, Twitter, and YouTube.

On 16 June 2020, the Government of Japan released its COVID-19 tracking app for iOS and Android, which it developed in coordination with an engineering team at Microsoft.^{1693,1694} By 26 June, the app had 4 million downloads, and Health Ministry official Yasuyuki Sahara said that the government hoped for as many downloads as possible.¹⁶⁹⁵

On 9 February 2021, Digital Transformation Minister Takuya Hirai joined other legislators for a public discussion on the new platform Clubhouse.¹⁶⁹⁶ They discussed how government officials can use online platforms to connect with voters.¹⁶⁹⁷

Japan has coordinated with online platforms such as Microsoft to maximize public access to official health information, while also promoting its informational websites through its own social media accounts.

United Kingdom: +1

The United Kingdom has fully complied with its commitment to coordinate with online platforms to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 16 March 2020, the Department of Health and Social Care (DHSC) website began to upload daily news stories and health and safety documents, which are all available under the headline “Latest from the Department of Health and Social Care.”¹⁶⁹⁸ The DHSC has also shared health information to the public through Twitter, Facebook, LinkedIn, YouTube, and email newsletters.¹⁶⁹⁹

On 16 March 2020, the DHSC YouTube Channel created a playlist that informs of National Restrictions, COVID-19 information, and tracking updates.¹⁷⁰⁰ The playlist is continuously updated with new videos.¹⁷⁰¹

On 17 April 2020, the Government of the United Kingdom partnered with the online and print newspaper industry for a three-month COVID-19 ad campaign titled “All in, all together.”¹⁷⁰² The campaign aims to help keep the public safe and the nation united throughout the COVID-19 pandemic.¹⁷⁰³

On 24 September 2020, the Government of the United Kingdom launched the National Health Service (NHS) COVID-19 contact-tracing app in England and Wales, with the additional purpose of ensuring easy access to information.¹⁷⁰⁴ The framework of the app was developed in collaboration with Apple and Google.¹⁷⁰⁵

On 22 January 2021, the DHSC launched an ad called “Look into my eyes.”¹⁷⁰⁶ This video is a national campaign featuring hospital staff and COVID-19 patients urging people to stay home during the national lockdown.¹⁷⁰⁷

United States: +1

The United States has fully complied with its commitment to coordinate with online platforms and demonstrates effort to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 16 March 2020, the Centers for Disease Control and Prevention (CDC) Facebook page began posting daily updates on COVID-19.¹⁷⁰⁸ The CDC Instagram has created daily posts for credible health and safety updates.¹⁷⁰⁹

On 16 March 2020, the Instagram page of the Department of Health and Human Services (HHS) began posting daily health information and added a story series titled “The President’s Coronavirus Guidelines for America” to its COVID-19 story highlight.¹⁷¹⁰

On 16 March 2020, the CDC began publishing ongoing news related to health through monthly press releases, media advisories, transcripts, and statements on their official website.¹⁷¹¹

On 16 March 2020, the National Library of Medicine MedlinePlus Twitter account began creating daily posts related to the “latest news & info on health & medicine” available for the public.¹⁷¹²

On 16 March 2020, the HHS YouTube channel began posting weekly videos of virtual meetings and topics related to health.¹⁷¹³

On 27 March 2020, the White House Coronavirus Task Force and HHS, in partnership with Apple, released a COVID-19 screening app and website that guides Americans through a series of questions about their health and exposure to determine if they should seek care for COVID-19 symptoms.¹⁷¹⁴

On 3 April 2020, the CDC modified and re-launched existing surveillance system to track COVID-19 called “COVIDView.”¹⁷¹⁵ The report, updated each Friday, summarizes and interprets key indicators, including

information related to COVID-19 outpatient visits, emergency department visits, hospitalizations and deaths, as well as laboratory data.¹⁷¹⁶

Since 3 June 2020, the CDC Instagram account has also created a new COVID-19 story highlight and provides ongoing health information accessible to the public.¹⁷¹⁷

On 20 November 2020, the Online Guide to Government Information and Services updated its Health Information from the Government page. The page now includes COVID-19 information and the National Library of Medicine Medline Plus database to answer any medical questions.¹⁷¹⁸

The United States has fully complied with its commitment to maximize public access to health information through its consistent effort to disseminate the latest correct and relevant official information on social media platforms and coordinate with online platforms to produce screening websites and apps.

Thus, the United States has received a score of +1.

European Union: +1

The European Union has fully complied with its commitment to coordinate with online platforms and demonstrated efforts to maximize public access to the latest correct and relevant official information, in recognition that millions of citizens receive information and news via social media.

On 16 March 2020, the European Parliament, the European Commission, and the European Centre for Disease Prevention and Control (ECDC) began posting correct and relevant information on social media platforms including Instagram, Facebook, Twitter, LinkedIn, and YouTube.^{1719,1720,1721}

On 19 October 2020, the European Commission set up an “EU wide system to ensure interoperability” between COVID-19 tracing apps across EU member states.¹⁷²² The system allows for COVID-19 tracing apps to work across EU members states so users will only need to install one app, and if users travel to another participating European country, they will still benefit from contact tracing and receiving alerts.¹⁷²³

On 17 December 2020, the ECDC switched to a weekly reporting schedule for COVID-19 updates worldwide, in the EU, and in the United Kingdom.¹⁷²⁴ The ECDC discontinued daily updates on 14 December 2020.¹⁷²⁵
