On 26 May 2021, the Compensation Fund of the Department of Labour called on its pensioners to apply for vaccination, as the Fund together with Rand Mutual Assurance Company Limited and The Federated Employers Mutual Assurance Company, have made available ZAR1.35 billion for vaccines.⁷⁶⁵⁷ The funding is anticipated to benefit an estimated three million pensioners.⁷⁶⁵⁸

On 30 May 2021, the National Coronavirus Command Council, Premiers, mayors and traditional leaders in the President's Coordinating Council decided on placing the country at the Adjusted Alert Level 2 on 31 May 2021.⁷⁶⁵⁹ The Adjusted Alert Level 2 includes curfew from 11 PM to 4 AM, restricting non-essential establishments and limiting all gatherings to a maximum of 100 people indoors and 250 people outdoors.⁷⁶⁶⁰

On 13 June 2021, South African President Cyril Ramaphosa attended the G7 summit in Cornwall, UK and urged G7 members to support the Access to COVID-19 Tools Accelerator to fill the USD16.8 billion funding gap.⁷⁶⁶¹ He said, "We need to address the substantial financing gap for tests, treatments, critical supplies like oxygen and the health systems that enable testing, treatment and vaccination."⁷⁶⁶² He also called on G7 leaders to support the TRIPS waiver on patents for COVID-19 vaccines and engage in negotiations that could help boost vaccine production.⁷⁶⁶³

On 19 June 2021, Minister of Basic Education Angie Motshekga, announced that the vaccination programme will unfold in the Basic Education Sector with immediate effect and that it will continue until 8 July 2021.⁷⁶⁶⁴ The department will vaccinate all staff at all public schools including educators, administrative and support staff.⁷⁶⁶⁵

Level 3 of the national state of disaster, and agreed that the government will hold consultations with political parties and the religious sector on the observance of safety measures.⁷⁶⁹³

On 8 September 2021, Chairperson of the Inter-Ministerial Committee on Covid-19 Vaccines David Mabuza led the launch of the National Campaign “Return to Play – it’s in your hands.”⁷⁶⁹⁴ The campaign aims at encouraging vaccinations towards reaching population immunity by galvanizing support and voice from the country’s sporting and creative industries.⁷⁶⁹⁵

On 10 September 2021, Health Minister Dr. Joe Phaahla announced that the country has commenced the development of a digital certificate to confirm vaccination status.⁷⁶⁹⁶ He said that the certificates may be useful for access to entertainment, sports, and other events, and the government has made sure that this certificate will be protected from fraud and will be uploaded on people’s smartphones as well as printed.⁷⁶⁹⁷

South Africa has taken strong action to advance global pandemic prevention, detection, and response by administering and expanding COVID-19 vaccination sites, participating in the “Recover Better Together” campaign and creating genomic surveillance technologies of the COVID-19 virus.

Thus, South Africa has received a score of +1.

Analyst: YanYui Mork

Turkey: 0

Turkey has partially complied with its commitment to advance global pandemic preparedness, prevention, detection, and response.

On 26 November 2020, at the Coronavirus Scientific Committee meeting, the Minister of Health Dr. Fahrettin Koca discussed prevention and control measures that Turkey has undertaken to combat COVID-19.⁷⁶⁹⁸ The government began contact tracing, isolating positive cases, increased testing and imposed lockdown measures throughout the state.⁷⁶⁹⁹

On 13 January 2021, Turkey launched its mass COVID-19 vaccination program.⁷⁷⁰⁰ Minister Koca announced the vaccination program will be delivered in four stages.⁷⁷⁰¹ The first two stages focusing on vaccinating healthcare workers, government officials, and the elderly.⁷⁷⁰² The last two stages will vaccinate the rest of the population. Turkey has 3 million doses of China's Sinovac vaccine to administer and is waiting on a shipment of an extra 50 million doses.⁷⁷⁰³

On 31 January 2021, the Ministry of Industry and Technology had the first meeting of the COVID-19 Turkey Platform.⁷⁷⁰⁴ Under this platform, 17 projects were established to further study vaccines and immunization.⁷⁷⁰⁵ The COVID-19 Turkey Web portal was created in order to share evidence-based information and cultivate social awareness.⁷⁷⁰⁶ The portal provides open access to articles, datasets, and scientific literature on COVID-19.⁷⁷⁰⁷

On 12 March 2021, Minister Koca announced human vaccine trials of 5 vaccine candidates would begin in Turkey promptly.⁷⁷⁰⁸ This is to support efforts in increasing vaccine quantity and providing safe and effective vaccines to Turkish citizens.⁷⁷⁰⁹ They have provided 130 million doses.⁷⁷¹⁰ After consultation with three more manufacturers a quota of 10 million more doses will be made available to Turkish citizens.⁷⁷¹¹

On 22 March 2021, the Ministry of Interior announced a nightly curfew in order to curb the spread of COVID-19.⁷⁷¹² The curfew would occur on weekdays from 9pm to 5am throughout the state.⁷⁷¹³ On weekends, in low and medium risk areas the curfew would remain the same, while high risk and

very high-risk areas have longer curfew hours.⁷⁷¹⁴ Those who did not comply were subjected to judicial and administrative action.⁷⁷¹⁵

On 26 April 2021, President Recep Tayyip Erdoğan, announced that Turkey will be under lockdown from April 29 until May 17.⁷⁷¹⁶ The lockdown will consist of a stay-at-home order, the closure of schools, and official approval for domestic travel.⁷⁷¹⁷ These measures were invoked in order to curb the spread of COVID-19 and prevent potential deaths.⁷⁷¹⁸

On 14 May 2021, President Erdogan announced that Turkey will continue to remain cautious with its COVID-19 measures and adhere to protocols until the end of May.⁷⁷¹⁹ Turkey will then start easing restrictions from June onwards in a controlled manner. A lockdown began on 29 April and will last until 17 May when the new guidelines will be released.⁷⁷²⁰ Turkey's restrictions over the last three weeks have led to significant decreases in COVID-19 cases in 80 provinces between 1-7 May, according to the latest Health Ministry statistics.⁷⁷²¹

On 24 May 2021, Minister of Health Dr. Fahrettin Koca, revealed that Turkey will receive 120 million doses of the BioNtech vaccine by September 2021.⁷⁷²² Koca clarified that the vaccine has been tested on 30 variants, including the delta variant, where it has proven to be 25 to 30 per cent more effective.⁷⁷²³ Vaccination has begun for high-risk individuals and those over the age of 55 in Turkey and 84 per cent of individuals over the age of 65 have been vaccinated.⁷⁷²⁴

On 25 June 2021, the Minister of Health announced that “every individual over the age of 18 will be able to book an appointment for the COVID-19 vaccine.”⁷⁷²⁵ Koca revealed that the phase III

clinical trials for Turkey's Turkovac vaccine will be carried out on 40,800 individuals.⁷⁷²⁶ The vaccine will be administered in 29 centres throughout Turkey, Azerbaijan, Hungary, and Kyrgyzstan.⁷⁷²⁷

On 24 July 2021, the Ministry of Family and Social Services provided "approximately TRY10.6 billion to 7 million families in the fight against COVID-19."⁷⁷²⁸ The Epidemic Social Support Program which began in April, is administered in three phases to households with elderly, disabled, or has financial need.⁷⁷²⁹ Households are eligible to receive TRY1000.⁷⁷³⁰

On 6 September 2021, the Government of Turkey introduced new COVID-19 regulations.⁷⁷³¹ Citizens are now required to have proof of vaccination or a negative COVID-19 test if they choose to utilize public transit, airways, or attend large events.⁷⁷³² Further, mandates pertaining to masks and social distancing are to remain in place.⁷⁷³³

On 6 September 2021, Minister of Health Dr. Fahrettin Koca revealed that over 78 per cent of people in Turkey have received the first dose, and over 60 per cent have received the second dose.⁷⁷³⁴ He noted that 81 per cent of current COVID-19 cases are amongst the unvaccinated.⁷⁷³⁵ In order to reduce transmission within schools, he announced the allocation of TRY650 million to be used for masks, disinfectants, and cleaning supplies for schools across the country.⁷⁷³⁶ Furthermore, all unvaccinated school employees are required to take a COVID-19 test twice a week.⁷⁷³⁷

Turkey has taken strong action in advancing global pandemic, prevention, detection, and response by following the strict protocols of the Coronavirus Scientific Committee and launching its mass COVID-19 vaccination campaign. However, Turkey has not demonstrated significant pandemic preparedness.

Thus, Turkey has received a score of 0.

Analyst: Shafna Kallil

United Kingdom: +1

The United Kingdom has fully complied with its commitment to advance global pandemic preparedness, prevention, detection and response.

On 3 December 2020, the Ministry of Housing, Communities and Local Government announced a GBP68 million investment supporting people living independently with disabilities.⁷⁷³⁸ The grant covers over 280,000 households and aims to assist individuals and local councils in making changes and adaptations necessary for households to allow people to live independently in their own homes throughout the pandemic.⁷⁷³⁹

On 14 December 2020, the British Embassy in Cairo announced GBP1 million in funding to support Egypt against COVID-19 in partnership with the World Health Organization.⁷⁷⁴⁰ The funds aim to provide “e-training to staff in the rapid response teams at governorate and district levels.”⁷⁷⁴¹ This agreement helps maintain essential trade and procurement of personal protective equipment from the UK.⁷⁷⁴²

On 11 January 2021, the Ministry for COVID-19 Vaccine Deployment shared the national delivery plan with the UK parliament.⁷⁷⁴³ The plan rests on four major categories: supply, prioritization, places and people. The initiative and overall plan aim to ensure the protection of the greatest number of at-risk people in the shortest possible time.⁷⁷⁴⁴

On 27 January 2021, the UK announced greater restrictions at the borders to protect public health.⁷⁷⁴⁵ The new initiatives at the border will impose more significant restrictions on travelers,

increase police enforcement, and centralize travelers' isolation at hotels.⁷⁷⁴⁶ With the new rules in place, the government aims to stem the flow of travelers on a daily basis.⁷⁷⁴⁷

On 18 February 2021, the Department of Health and Social Care announced a GBP18.5 million investment in the research of longer-term effects of COVID-19.⁷⁷⁴⁸ This new initiative establishes a new working relationship between the government and the National Institute for Health Research and UK Research and Innovation.⁷⁷⁴⁹

On 22 February 2021, the Cabinet Office released the "COVID-19 Response – Spring 2021" setting out the government's plans to end the lockdowns affecting large portions of the UK.⁷⁷⁵⁰ The report outlines the rollout of vaccines, prioritizes children's educations and getting young people back to school, outlines how businesses are meant to get back to work, and reviews all social distancing measures.⁷⁷⁵¹

On 26 February 2021, the Government Equalities Office (Race Disparity Unit) released an update on plans to address identifying and tackling COVID-19 disparities. The report emphasized the importance of vaccines and that people of all communities take them. To create and update this report, the government is working across ethnic communities and languages to ensure the adoption of the vaccine across the UK.⁷⁷⁵²

On 28 February 2021, the Department of Health and Social Care announced that all households with children currently attending school will receive two rapid COVID-19 tests per person per week.⁷⁷⁵³ Recognizing that testing will be a vital component of the "COVID-19 Response – Spring 2021" plan, households will be able to test themselves twice a week ahead of and during the school reopening period.⁷⁷⁵⁴

On 1 March 2021, the Foreign, Commonwealth and Development Office announced that Côte d'Ivoire would receive the first COVID-19 vaccines with the UK's aid through the COVID-19 Vaccines Global Access (COVAX) initiative.⁷⁷⁵⁵ To date, the UK is the largest contributor to

COVAX, and Côte d'Ivoire is one of several countries set to receive shipments of the vaccine through this program.⁷⁷⁵⁶

On 5 March 2021, the Department of Health and Social Care announced a GBP79 million investment to boost mental health for children and young people in response to the COVID-19 Pandemic.⁷⁷⁵⁷ This investment will allow the number of mental health support teams in schools to grow from 59 to 400 by April of 2023.⁷⁷⁵⁸ The initiative also aims to provide over 22,500 children and young people enhanced access to support by the end of 2021, including therapies and directed supports.⁷⁷⁵⁹

On 15 March 2021, the Department of Health and Social Care secured two new contracts with domestic manufacturers to ensure a continual supply of COVID-19 lateral flow tests.⁷⁷⁶⁰ The new supply of tests will aid in the government's plans to re-open the UK and provide capacity for creating an additional 200 million test packages.⁷⁷⁶¹

On 20 March 2021, the UK announced GBP46 million for a new vaccine innovation and manufacturing center.⁷⁷⁶² The funding aims to support work that is already underway and help the United Kingdom respond to pandemics by producing larger amounts of the vaccine faster.⁷⁷⁶³ The initiative is projected to “expand the capacity twenty-fold” allowing the facility to make up to 70 million doses in 6 months.⁷⁷⁶⁴

On 20 March 2021, the Department of Health and Social Care launched trials to find preventative COVID-19 treatments for the most vulnerable segments of the populations across the United Kingdom.⁷⁷⁶⁵ The initiative targets individuals in “care homes and health settings” to stop the spread

2022 summit will support the goal of cutting vaccine development and raise funds for global vaccine research.⁷⁷⁷⁸

On 2 May 2021, Public Health England launched a 40,000-person daily contact testing study.⁷⁷⁷⁹ The study aims to understand how effective daily contact testing could keep society open, reduce quarantine times, and catch positive cases quicker.⁷⁷⁸⁰

On 14 May 2021, Prime Minister Boris Johnson announced that the COVID-19 Indian variant could pose “significant disruption” to the planned relaxation of lockdown on 21 June. Due to the surge in the COVID-19 variant, the government’s aim with the fourth and final step of the reopening roadmap will be stalled.⁷⁷⁸¹

On 19 May 2021, the Department of Health and Social Care launched the world's first COVID-19 vaccine booster study with GBP19.3 million in funding.⁷⁷⁸² The results are expected in September of 2021 and will be used to design a booster programme.⁷⁷⁸³ The Department of Health and Social Care recruited thousands of volunteers to receive a booster vaccine in a study led by the University Hospital Southampton.⁷⁷⁸⁴

On 22 May 2021, the Environmental Monitoring for Health Protection (EMHP) Programme, led by the Joint Biosecurity Centre (JBC), a part of the newly formed UK Health Security Agency (UKHSA), launched a new program to test waste and sewage to support variant detection across the United Kingdom.⁷⁷⁸⁵ The program covers over two-thirds of the population, and will help detect outbreaks of variants that are being monitored by the government.⁷⁷⁸⁶

On 24 May 2021, the Department of Health and Social Care announced that it would invest GBP12 million to support nine pilot programs in areas with a higher prevalence of infection, including from

trials for COVID-19 treatments, more efficient ways to deliver results, boosting capacity while making new endeavors cheaper and faster to start.⁷⁷⁹⁸

On 17 July 2021, the Department of Health and Social Care announced that it will offer the seasonal flu vaccine to over 35 million people for free this year.⁷⁷⁹⁹ From September 2021, providers will offer the vaccine to vulnerable populations, including secondary school students up to grade eleven for the first time.⁷⁸⁰⁰ This program follows the expanded 2020 campaign to get people vaccinated against the seasonal flu in response to COVID-19 exacerbating symptoms.⁷⁸⁰¹

On 19 July 2021, the Department of Health and Social Care announced that within the United Kingdom, every adult had been offered their first dose of the COVID-19 vaccine ahead of schedule and that everyone over the age of 18 is now able to book their second dose immediately.⁷⁸⁰²

On 22 July 2021, the UK government launched a new campaign across England to ensure that citizens continue to follow community health measures.⁷⁸⁰³ The campaign is designed to stress the importance of staying vigilant as the country reopens.⁷⁸⁰⁴

On 23 July 2021, the Department of Health and Social Care announced that the government will deploy additional resources to help stop the spread of COVID-19 in the Northeastern regions of the country.⁷⁸⁰⁵ The support package includes increased testing capabilities, programs to encourage vaccine uptake, and support for logistics and public health campaigns in the areas affected.⁷⁸⁰⁶

On 13 August 2021, the United Kingdom sent 119,200 doses of the AstraZeneca COVID-19 vaccine to Zambia and 51,840 in the Democratic Republic of the Congo.⁷⁸⁰⁷ Later in August, 119,040 doses are due to arrive in Malawi, 140,160 doses in Senegal, 299,680 doses in Egypt, and 299,520 doses are scheduled to touch down in Uganda.⁷⁸⁰⁸

Funding includes GBP2.6 billion for enhanced infection control measures, GBP1 billion to address backlog in the system, and GBP478 million to continue to free beds in hospitals across the United Kingdom.⁷⁸²⁰

The United Kingdom has taken strong action to advance global pandemic preparedness, prevention, detection and response by administering a national vaccine delivery plan, collaborating internationally through vaccine distribution with Egypt and creating a mental health initiative.

Thus, the United Kingdom has received a score of +1.

Analyst: Rahul Pallan

United States: +1

United States has fully complied with its commitment to advance global pandemic preparedness, prevention, detection, and response.

On 7 January 2021, the Department of Health and Human Services (HHS) extended the Community Based Testing Site program, which aimed to establish COVID-19 testing locations across the country, with particular focus on vulnerable and underserved communities.⁷⁸²¹ The HHS allocated an additional USD550 million to continue program operations until April 2021.⁷⁸²²

On 12 January 2021, the Centres for Disease Control and Prevention implemented new travel restrictions that would require all air passengers entering the United States to produce a negative COVID-19 test prior to departure.⁷⁸²³

On 21 January 2021, President Joseph Biden enacted two Executive Orders aimed towards advancing pandemic detection and response. Executive Order 13994, “On Ensuring a Data-Driven Response to COVID-19 and Future High-Consequence Public Health Threats,” called upon relevant executive departments and agencies to gather and publish all COVID-19 data under the oversight of a federally appointed COVID-19 Response Coordinator.⁷⁸²⁴ Executive Order 13996, “On Establishing the COVID-19 Pandemic Testing Board and Ensuring a Sustainable Public Health Workforce for COVID-19 and Other Biological Threats,” called for the formation of a national COVID-19 testing board and public health workforce strategy.⁷⁸²⁵

On 25 January 2021, the Federal Emergency Management Agency established the Interagency Vaccination Task Force to deploy staff to vaccination sites, where they were required to develop data dashboards to track personnel movement and vaccine distribution.⁷⁸²⁶

On 26 January 2021, President Biden enacted the Defence Production Act to expedite COVID-19 vaccine production and to address supply shortages of medical equipment.⁷⁸²⁷

On 9 February 2021, President Biden launched the Federally Qualified Health Centre program to increase vaccine availability and accessibility in underserved and vulnerable communities within the United States.⁷⁸²⁸

On 18 February 2021, the US pledged USD2 billion in funding to GAVI, the Vaccine Alliance which aims to secure equitable access to safe and effective COVID-19 vaccines for low- and middle-income countries.⁷⁸²⁹

On 11 March 2021, the US enacted the American Rescue Plan Act of 2021, which provides USD1.9 trillion in funding towards COVID-19 relief efforts.⁷⁸³⁰ International funding commitments include: USD245 million to COVID-19 relief efforts conducted by the US Department of State and the US Agency for International Development; USD905 million to US AID for global health programs and vaccine procurement; and USD580 million to UN Global Humanitarian Response Plan for COVID-19.⁷⁸³¹

On 12 March 2021, the US entered the Quad Vaccine Partnership with Japan, India, and Australia.⁷⁸³² The partnership is aimed towards strengthening vaccination efforts in the Indo-Pacific region, expanding global COVID-19 vaccine development and distribution, coordinating with international pandemic response initiatives, and assisting in health workforce preparedness and training.⁷⁸³³

On 25 March 2021, the US announced an investment of USD10 billion into the expansion of the national COVID-19 vaccination program.⁷⁸³⁴ Funding was allocated towards expanding equitable access to vaccines and medical services in underserved and high-risk communities, strengthening vaccine confidence and uptake, targeting vulnerable populations, and aiding community healthcare workers.⁷⁸³⁵

On 15 April 2021, the US cooperated with GAVI to launch a campaign dedicated towards raising USD2 billion in international funding for the fight against COVID-19.⁷⁸³⁶ Funding was dedicated towards support the COVID-19 Vaccines Global Access (COVAX) mechanism in accruing and distributing 1.8 billion vaccine doses to low and middle-income countries.⁷⁸³⁷ The United States also committed USD2 billion in funding for GAVI and COVAX.⁷⁸³⁸

On 16 April 2021, the US announced an investment of USD1.7 billion towards researching, detecting, and preventing the spread of COVID-19 variants.⁷⁸³⁹ Funding was allocated to support increased genomic sequencing and epidemiology research, increased variant detection and tracing, and the development of a national bioinformatics infrastructure for the prevention of future outbreaks and pandemics.⁷⁸⁴⁰

On 28 April 2021, the US delivered emergency COVID-19 assistance to India in response to a recent surge in infections and critical cases.⁷⁸⁴¹ Medical support and equipment worth over USD100 million were provided, including: oxygen generation units, personal protective equipment, rapid diagnostic test kits, and therapeutics.⁷⁸⁴²

On 30 April 2021, the US issued travel restrictions preventing the entry of non-citizens who stayed in India within a 14-day period prior to departure to the US.⁷⁸⁴³ Such individuals are not permitted to board an aircraft traveling to the US or are subject to refusal upon landing.⁷⁸⁴⁴ The US issued these restrictions in response to the detection of community transmission of the COVID-19 variant strain B.1.617 in India.⁷⁸⁴⁵

On 13 May 2021, the Biden-Harris Administration committed to investing USD7.4 billion into pandemic preparation, response, and prevention.⁷⁸⁴⁶ The funding targeted programs designed for recruiting and training healthcare workers in pandemic response skills, as well as initiatives aimed at preparing for future outbreaks and public health crises.⁷⁸⁴⁷ USD4.4 billion were allocated towards expanding and improving existing healthcare facilities and infrastructure, while USD3 billion were targeted at developing future preparatory and preventative measures.⁷⁸⁴⁸ USD250 million was allocated towards mobilizing community outreach programs for encouraging vaccine uptake in high-risk and under-resourced communities.⁷⁸⁴⁹

On 14 May 2021, the Centre for Disease Control announced that fully vaccinated people are no longer required to wear masks.⁷⁸⁵⁰ In his address in the Rose Garden, without wearing a mask President Biden said that 250 million vaccine shots have been given in 114 days and the US is said to return to normalcy when the virus raging other countries. Moreover, those travelling within the United States need not get tested before or after travel or self-quarantine after travel.⁷⁸⁵¹

On 17 May 2021, the Biden-Harris Administration pledged to donate at least 80 million COVID-19 vaccine doses from its surplus supplies, in coordination with global inoculation efforts led by COVAX and G7 partners.⁷⁸⁵²

On 26 May 2021, the President instructed US spy agencies to investigate the origins of COVID-19.⁷⁸⁵³ This investigation gave rise to two scenarios that either it was due to contact with humans and animals or a “lab leak” from the Wuhan Institute of Virology.⁷⁸⁵⁴ Although China had condemned the possibility of the latter scenario a group of 14 countries that include US, UK and Japan said that a World Health Organization (WHO) report that had cited the origins of COVID-19 lacked full access to data and further investigations need to be done.⁷⁸⁵⁵

On 11 June 2021, President Biden committed to enacting a pandemic prevention program, in cooperation with G7 partners.⁷⁸⁵⁶ The goals of this program include: vaccinating vulnerable populations globally; ensuring equitable access to emergency medical supplies; and preparing for future health crises.⁷⁸⁵⁷ It further committed to accelerating the production and administration of COVAX vaccines, delivering emergency medical supplies to low-income countries, and strengthening global disease surveillance and detection infrastructure.⁷⁸⁵⁸

On 1 July 2021, the United States committed to re-engaging with the World Health Organization (WHO) with the objective of bolstering global health security and diplomacy.⁷⁸⁵⁹ It committed to advancing international cooperation on scientific research to prevent future infectious disease outbreaks and other global health crises.⁷⁸⁶⁰

On 16 July 2021, the Government of the United States contributed shipments of 25 million COVID-19 vaccine doses to low-income countries in Africa.⁷⁸⁶¹ The vaccines were delivered and distributed via COVAX.⁷⁸⁶²

On 3 August 2021, the United States committed to begin distributing half a billion doses of the Pfizer COVID-19 vaccine to 100 low-income countries via COVAX facility, as part of its goal to bolster global immunization coverage and curb the pandemic.⁷⁸⁶³

On 9 August 2021, President Biden announced that the COVID-19 vaccine would be added to the list of required immunizations for U.S. service members, to be made effective by mid-September.⁷⁸⁶⁴

On 11 August 2021, the United States announced that rural hospitals and medical providers would receive enhanced access to COVID-19 testing equipment, vaccines, and treatments via the Emergency Rural Health Care Grant Program.⁷⁸⁶⁵ The grant also designates funds towards improving telehealth services and medical infrastructure in disadvantaged and under-resources areas.⁷⁸⁶⁶

On 18 August 2021, President Biden announced new vaccination regulations requiring all employees in nursing or elderly care homes and Medicare or Medicaid services to be fully vaccinated against COVID-19.⁷⁸⁶⁷ President Biden further announced the implementation of a federal initiative providing COVID-19 vaccine booster doses to eligible individuals by mid-September.⁷⁸⁶⁸

On 3 September 2021, the United States announced a plan for improving pandemic preparedness and capacities to contain future viral outbreaks, which covers the following primary areas: improving

medical defences, enhancing early detection and monitoring programs, reducing disparities in public health systems, and building stockpiles and medical supply chains.⁷⁸⁶⁹

On 24 September 2021, the leaders of the United States, Japan, India and Australia met at their first in-person person summit of the Indo-Pacific Quadrilateral Security Dialogue.⁷⁸⁷⁰ Following the summit in March, the leaders released a joint statement promoting “a free, open rules-based order.” This statement encouraged and pledged to combine “medical, scientific, financing, manufacturing and delivery” capacity for COVID-19 vaccines, and combating climate change.⁷⁸⁷¹

The United States has taken strong action to advance global pandemic preparedness, prevention, detection and response by implementing initiatives such as the American Rescue Plan Act of 2021 and actions such as summoning the Inter Agency Vaccination Task Force and administering public health regulations. Thus, the United States has received a score of +1.

Analyst: Tamara Saadi

European Union: +1

The European Union has fully complied with the commitment to advance global pandemic preparedness, prevention, detection and response.

On 3 December 2020, President of the European Council Charles Michel proposed an international Treaty on Pandemics within the framework of the World Health Organization.⁷⁸⁷² An international treaty would enable the international community to better prepare for and respond to pandemics.⁷⁸⁷³ The treaty would address risk monitoring, financing and coordination of research, a system of alerts and information sharing, access to healthcare and strengthening and securing healthcare systems and supply chains.⁷⁸⁷⁴

On 10 December 2020, the European Parliament and the European Council reached a political agreement on Horizon Europe, a transnational programme supporting research and innovation.⁷⁸⁷⁵ The programme will have a budget of EUR95.5 billion for 2021-2027.⁷⁸⁷⁶ The health cluster of the

programme will fund the extension of clinical trials, innovative protective measures, virology, vaccines, treatments and diagnostics and the translation of research into public policy measures.⁷⁸⁷⁷

On 15 December 2020, the European Parliament and Council reached an agreement on the EU4Health programme.⁷⁸⁷⁸ The programme will receive EUR5.1 billion in funding and aims to strengthen crisis preparedness in EU health systems, as well as make health systems more resilient to cross-border health threats such as COVID-19.⁷⁸⁷⁹ The programme will specifically emphasize pandemic preparedness and response.⁷⁸⁸⁰

On 21 December 2020, the European Commission granted a conditional marketing authorisation for the COVID-19 vaccine developed by BioNTech and Pfizer.⁷⁸⁸¹ The vaccine was authorized following an assessment by the European Medicines Agency. This was the first vaccine approved for use in the EU.⁷⁸⁸²

On 11 January 2021, the European Commission announced that the rescEU medical reserve (part of the EU Civil Protection Mechanism) was expanded to include new host countries for rescEU medical supplies.⁷⁸⁸³ There are nine countries hosting the common European stockpiles of medical equipment such as medical masks, gloves, gowns, aprons, oxygen concentrators and ventilators.⁷⁸⁸⁴

On 19 January 2021, the European Commission published a Communication addressing the European Parliament, the European Council and the Council of Europe.⁷⁸⁸⁵ The Communication details the decisions and coordinated approach needed to deliver on four priorities: speeding up vaccination and vaccine supplies, ramping up testing and sequencing to control infections and new variants, ensuring the functioning of the Single Market and showing international leadership and solidarity with partners.⁷⁸⁸⁶ The Commission set the goal of vaccinating 80 per cent of healthcare workers and people over 80 years by March 2021, and 70 per cent of the adult population by summer 2021.⁷⁸⁸⁷

On 17 February 2021, the European Commission proposed the launch of “the Health Emergency Preparedness and Response Authority (HERA) Incubator,” a European bio-defence preparedness programme funded by EUR30 million from the Horizon 2020 Research and Innovation programme

and EUR120 million from the Horizon Europe Research and Innovation Framework.⁷⁸⁸⁸ The HERA Incubator will address the emerging threat of COVID-19 variants through rapid detection and swift adaptation of vaccines, as well as by setting up a European Clinical Trials Network.⁷⁸⁸⁹ The HERA Incubator will also fund the VACCELERATE vaccine research network, comprised of 26 partner institutions from 21 countries.⁷⁸⁹⁰

On 19 February 2021, the European Commission committed an additional EUR500 million for the COVAX Facility, bringing its total contribution to EUR1 billion.⁷⁸⁹¹ President of the Commission Ursula von der Leyen announced the commitment at the G7 virtual leaders' meeting and emphasized the need for effective COVID-19 vaccine deliveries to low-income countries.⁷⁸⁹²

On 10 March 2021, the European Commission published a Communication detailing plans for a new European Humanitarian Response Capacity.⁷⁸⁹³ The capacity would intervene directly in humanitarian crises when traditional approaches were insufficient.⁷⁸⁹⁴ It would offer logistical assessments, support for initial deployment and procurement, stockpiling and transporting of relief items such as COVID-19 vaccines.⁷⁸⁹⁵

On 23 March 2021, the European Commission announced it would allocate EUR11 million to Nepal, the Philippines and South East Asia for disaster preparedness and humanitarian aid.⁷⁸⁹⁶ EUR2 million of this funding will support the fight against the coronavirus pandemic and EUR9 million will target disaster preparedness actions.⁷⁸⁹⁷ Nepal, the Philippines and South East Asia are in some of the most disaster-prone regions in the world due to their location and climatic conditions, further compounding the effects of the coronavirus pandemic.⁷⁸⁹⁸

On 24 March 2021, the European Commission launched Open Research Europe, an open access publishing platform for scientific papers.⁷⁸⁹⁹ The platform will publish results funded by Horizon Europe, the EU research and innovation programme.⁷⁹⁰⁰ It will offer researchers the opportunity to share their results and insights rapidly and in a public venue to facilitate open, constructive research debates.⁷⁹⁰¹ The EU's response to the coronavirus has highlighted the value of open science and increased collaboration to find new treatments, diagnostics and vaccines.⁷⁹⁰²

On 24 March 2021, the European Commission introduced a new regulation impacting COVID-19 vaccine exports.⁷⁹⁰³ The principles of reciprocity and proportionality are new criteria to be considered for authorizing COVID-19 vaccine exports, with the objective of ensuring timely access to COVID-19 vaccines for all EU citizens.⁷⁹⁰⁴ Reciprocity considers if the destination country of vaccines is restricting its own export of vaccines or their raw materials, and proportionality considers if conditions prevailing in the destination country are better or worse than the EU's.⁷⁹⁰⁵ The new regulation is temporary and excludes vaccines destined to the 92 low and middle income countries under the COVID-19 Vaccines Global Access scheme.⁷⁹⁰⁶

On 24 March 2021, the European Commission amended the Variation Regulation to enable the HERA Incubator to fast-track regulatory approval of updated vaccines to tackle new variants.⁷⁹⁰⁷ A smaller set of additional data would need to be submitted to the European Medicines Agency for the authorization of adapted COVID-19 vaccines.⁷⁹⁰⁸ Commissioner for Health and Food Safety Stella Kyriakides said: "We need to be prepared to adapt vaccines as quickly as possible to respond to new

and potentially vaccine-resistant variants.⁷⁹⁰⁹ The measure is awaiting approval from the European Parliament and Council before entering into force.⁷⁹¹⁰

On 26 March 2021, the European Commission launched the EU4Health programme.⁷⁹¹¹ The programme makes EUR5.1 billion available to strengthen the resilience of health systems and promote innovation in the health sector.⁷⁹¹² The purpose of EU4Health is to support the fight against cross-border health threats and improve the EU's preparedness and capability to respond to future health crises.⁷⁹¹³ Commissioner Kyriakides said: "This unprecedented budget of EUR5.1 billion will enable us to make targeted investments to enhance our crisis preparedness and build stronger, more resilient and more accessible health systems."⁷⁹¹⁴

On 31 March 2021, the European Commission launched a six week online public consultation to collect stakeholders' input on HERA.⁷⁹¹⁵ HERA was announced in September 2020 in order to support the development, manufacturing and deployment of medical countermeasures during a health crisis.⁷⁹¹⁶ Following the public consultation, the scope of HERA will be outlined in a legislative proposal later this year.⁷⁹¹⁷ Commissioner Kyriakides said "The Health Emergency Preparedness and Response Authority, EU's HERA, is a fundamental part of the solution that we need for the next health crisis to prepare better and respond more swiftly, together. HERA will strengthen our foresight, preparation, anticipation and response."⁷⁹¹⁸

On 5 April 2021, the European Union contributed EUR170 million to the International Monetary Fund's Catastrophe Containment and Relief Trust (CCRT).⁷⁹¹⁹ The CCRT provides debt relief to countries hit by catastrophic events, including public health disasters such as COVID-19.⁷⁹²⁰

European Commissioner for International Partnerships Jutta Urpilainen said “Through this contribution to the CCRT, Team Europe continues to stand in solidarity with its most vulnerable partners. In this difficult period, the resources freed up can provide social services for the most vulnerable people, such as access to essential healthcare and education for young people, including girls.”⁷⁹²¹

On 7 April 2021, the European Commission mobilized EUR123 million from Horizon Europe for the purpose of combating the threat of coronavirus variants.⁷⁹²² Horizon Europe, the new EU research and innovation programme, funds a range of research and innovation actions to fight against the coronavirus.⁷⁹²³ Commissioner for Innovation, Research, Culture, Education and Youth Mariya Gabriel said: “We continue to mobilize all means at our disposal to fight this pandemic and the challenges presented by coronavirus variants.”⁷⁹²⁴ The EUR123 million will fund projects to establish new or build on existing multinational cohorts to advance the knowledge on SARS-CoV-2 and its emerging variants, develop further treatment and vaccine candidates, and support research infrastructure to improve data sharing with the goal of confronting the virus variants and preparing for future epidemics.⁷⁹²⁵

On 12 April 2021, the European Commission proposed exempting goods and services distributed by the EU from the Value Added Tax (VAT) during times of crisis.⁷⁹²⁶ The proposal is in response to the experience gained throughout the Coronavirus pandemic, with the purpose of maximizing the efficiency of use of EU funds used in response to crises such as natural disasters and public health emergencies.⁷⁹²⁷ Waiving the VAT will strengthen disaster crisis management bodies such as the EU’s Health Union and the EU Civil Protection Mechanism.⁷⁹²⁸ Goods and services covered by the exemption include diagnostic tests and testing materials, personal protective equipment, antimicrobials and antibiotics and blood products or antibodies.⁷⁹²⁹

On 14 April 2021, President von der Leyen announced that the EU reached an agreement with BioNTech-Pfizer to deliver 50 million additional vaccine doses in quarter 2 of 2021.⁷⁹³⁰ The doses were originally due to only arrive in the fourth quarter of 2021.⁷⁹³¹ Additionally, the EU is entering a third contract negotiation with BioNTech-Pfizer for the delivery of 1.8 billion doses of vaccine from 2021 to 2023.⁷⁹³² The contract will also entail that the production of the vaccines and all essential components will be based in the EU.⁷⁹³³ President von der Leyen said: “The negotiations we are launching today – and hope to conclude very rapidly – are a further important step in Europe’s response to the pandemic.”⁷⁹³⁴

On 20 April 2021, the EU launched a EUR100 million humanitarian initiative to support COVID-19 vaccination campaigns in Africa.⁷⁹³⁵ The initiative is part of the European Commission’s efforts to provide safe and effective vaccines for all and support a fast and safe vaccine rollout in Africa.⁷⁹³⁶ EUR25 million of the funding will support the rollout of vaccinations in all African countries, while EUR65 million is dedicated to support vaccinations in conflict and hard-to reach areas.⁷⁹³⁷ The remaining EUR10 million is in reserve and will be allocated to either of the two tracks as needed.⁷⁹³⁸ Commissioner for Crisis Management Janez Lenarčič emphasized: “This additional EU funding in support of the rollout of vaccination campaigns against the coronavirus pandemic in Africa will help to ensure that no one is left behind, including people in hard-to-access humanitarian crisis settings.”⁷⁹³⁹

On 11 May 2021, the EU met to discuss progress on a COVID-19 certificate. This is proposed to help citizens travel more freely across the 27-nation bloc and open up summer tourism.⁷⁹⁴⁰ It was announced that no one is obliged to use an EU certificate, but it will be handed out for free by health authorities. It will be given to EU citizens who have received a vaccine, had a negative test or are immune, having recovered from COVID-19.⁷⁹⁴¹

On 20 May 2021, the European Union Civil Protection Mechanism sent support to Nepal.⁷⁹⁴² The repatriation of European citizens in Nepal also occurred at the same time.⁷⁹⁴³

On 20 May 2021, the European Commission signed a contract with BioNTech and Pfizer to “reserve an additional 1.8 billion doses on behalf of all European Union member states.”⁷⁹⁴⁴ It allows for the purchase of 900 million doses of the current vaccine and of a vaccine adapted to variants, with the option to purchase an additional 900 million doses.⁷⁹⁴⁵

On 20 May 2021, the European Union supported the start of the World Health Organization’s process for the establishment of the Pandemic Treaty in the context of international efforts to reinforce global health security.⁷⁹⁴⁶

On 21 May 2021, the EU hosted the Global Health Summit alongside Italy. At this summit, the participants adopted the Rome Declaration. The Rome Declaration is a set of 16 principles and guiding commitments that “serve as voluntary orientation for current and future action for global health to support the financing, building, and sustaining of effective health system capabilities and capacities and Universal Health Coverage to improve preparedness, early warning of, prevention, detection, coordinated response, and resilience to, and recovery from, the current pandemic and future potential public health emergencies.”⁷⁹⁴⁷

On 4 June 2021, the European Union submitted its proposal “seeking the commitment of the World Trade Organization members for a multilateral trade action plan to expand the production of COVID-19 vaccines and treatments to ensure universal and fair access.”⁷⁹⁴⁸ The European Union’s proposal includes ensuring that COVID-19 vaccines, treatments and their components can cross borders freely, encourage producers to expand their production and facilitate the use of compulsory licensing within the World Trade Organization’s existing Agreement on Trade-Related Aspects of Intellectual Property Rights.⁷⁹⁴⁹

On 9 June 2021, the European Parliament passed the EU Digital COVID Certificate Regulations.⁷⁹⁵⁰ The certificates will take the form of a digital or paper format containing a QR code and all

On 22 September 2021, the European Commission published its second report on the impact of SURE, the EUR100 billion instrument designed to protect jobs and incomes affected by the COVID-19 pandemic.⁷⁹⁸⁰ The report highlights that this initiative has been successful in cushioning the severe socio-economic impact resulting from the COVID-19 pandemic.⁷⁹⁸¹ Moreover, the national labour market measures supported by SURE are estimated to have reduced unemployment for nearly 1.5 million people in 2020.⁷⁹⁸² Some of its positive impacts have been effectively containing the increase in unemployment in the beneficiary Member States during the crisis and preventing obstacles to unemployment and slow GDP growth.⁷⁹⁸³ SURE is thus a crucial element of the EU's comprehensive strategy to protect citizens and mitigate the negative consequences of the COVID-19 pandemic.⁷⁹⁸⁴

The European Union has taken strong action to advance global pandemic preparedness, prevention, detection and response by implementing initiatives such as using the rescEU medical reserve, agreeing on Horizon Europe, launching HERA incubator, authorizing the production of vaccines BioNTech and Pfizer, and pledging humanitarian aid to support vaccination campaigns in crisis settings.

Thus, the European Union receives a score of +1.

Background

The G20 members have remained committed to maintaining and improving citizens’ health, however, the focus of health commitments has been centred around general improvement of health systems, universal health care and crisis response (such as antimicrobial resistance). Information sharing is a critical aspect of cooperation in ameliorating global health systems and tackling advancement of overall health and response to global health issues such as antimicrobial resistance and COVID-19 pandemic. Thus, World Health Organization’s (WHO) International Health Regulations (IHR) 2005 require countries to detect and assess acute public health events, report such events to WHO and respond to any risks and emergencies.⁷⁹⁸⁵

At the 2014 Brisbane Summit, G20 members committed to support others in implementing International Health Regulations to “prevent, detect, report early and rapidly respond to infectious diseases,” implying commitment to sharing of data and information pertaining to such infectious diseases.⁷⁹⁸⁶ Health information sharing was first explicitly mentioned at the 2017 Berlin Summit as a critical component of Global Health Crises Management. Commitment to enhancing the transparency of sharing key information was made to facilitate timely communication and elicit faster

⁷⁹⁸⁵ International Health Regulations, World Health Organization (Geneva) 2005. Access Date: 28 February 2021. <https://www.who.int/health-topics/international-health-regulations>

⁷⁹⁸⁶ G20 Leaders’ Brisbane Statement on Ebola, G20 Information Centre (Toronto) 15 November 2014. Access Date: 28 February 2021. <http://www.g20.utoronto.ca/2014/2014-1115-ebola.html>

responses from the international community. G20 members recognized that information sharing efforts, especially information pertaining to Public Health Emergencies of International Concern (PHEIC), may be thwarted if members would face consequences such as trade/travel bans. Thus, G20 members reaffirmed their commitment to the reporting obligations outlined in the IHR pertaining to PHEIC and following applicable WHO recommended measures.

From 19-20 May 2017, G20 health ministers met for the first time in Berlin, Germany under the theme of “Together Today for a Healthy Tomorrow.” In their Berlin Declaration, the health ministers stated that “enhancing transparency facilitates the sharing of key information that can prompt faster responses by the international community. Early communication of disease outbreaks, including those which may constitute a PHEIC, may be discouraged if countries are led to believe they will face negative consequences due to unjustified travel and trade restrictions by other countries. To limit the negative impact on economies and societies and to foster early communication, we reiterate our commitment to adhering to reporting obligations under the IHR concerning a potential or declared Public Health Emergency of International Concern and underline the importance of following relevant WHO recommendations, including those on travel and trade.”⁷⁹⁸⁷ At the 2017 Hamburg Summit, G20 members recognized that implementing and complying with IHR is crucial in preventing and responding to the polio crisis.⁷⁹⁸⁸ Furthermore, G20 members also committed to remaining prepared for research and development (R&D) through globally coordinated models directed by WHO R&D blueprint.⁷⁹⁸⁹

On 4 March 2018, G20 health ministers met in Mar del Plata, Argentina where they stated that “the G20 ministers would like to highlight the work done by the Organisation for Economic Co-operation and Development (OECD), the World Bank and WHO on this subject regarding data collection and recommendations for best practices and encourage sharing of this information” in reference to people-centered care and increasing the quality of health care delivery systems.⁷⁹⁹⁰ At the 2018 Buenos Aires Summit, G20 leaders committed to “continue to strengthen core capacities required by International Health Regulations (IHR, 2005) for prevention, detection and response to public health emergencies, while recognizing the critical role played by WHO in this regard.”⁷⁹⁹¹

Prior to the 2019 Osaka Summit, G20 health ministers met to discuss universal health coverage, which “builds an essential basis for sustainable and inclusive growth.”⁷⁹⁹² At the 2019 Osaka Summit, G20 members reaffirmed their commitment to enhanced information sharing pertaining to plant and animal health issues to facilitate response to emerging and existing issues. G20 members also committed to supporting countries experiencing the Ebola epidemic through financial and technical assistance.⁷⁹⁹³

Prior to the 2020 Riyadh Summit, G20 finance and health ministers held a joint meeting. They committed to “full compliance with the International Health Regulations (IHR 2005), to improve their implementation and to the continued sharing of timely, transparent and standardized data and information including on health measures and the effectiveness of non-pharmaceutical interventions.”⁷⁹⁹⁴ At the 2020 Riyadh Summit, G20 members took note of gaps in preparedness for responding to the COVID-19 pandemic and reaffirmed their commitment to continue sharing of information to advance “global pandemic preparedness, prevention, detection and response.”⁷⁹⁹⁵ G20 members specifically commended the proposal towards establishing access to various pandemic tools, including data.⁷⁹⁹⁶

The IHR “were adopted by the Health Assembly in 1969, having been preceded by the International Sanitary Regulations adopted by the Fourth World Health Assembly in 1951. The 1969 Regulations, which initially covered six “quarantinable diseases” were amended in 1973 and 1981, primarily to reduce the number of covered diseases from six to three (yellow fever, plague and cholera) and to mark the global eradication of smallpox.” The IHR summarise the purpose and scope as: “to prevent, protect against, control and provide a public health response to the international spread of disease in ways that are commensurate with and restricted to public health risks, and which avoid unnecessary interference with international traffic and trade.” It contains “a range of innovations, including: (a) a scope not limited to any specific disease or manner of transmission, but covering “illness or medical condition, irrespective of origin or source, that presents or could present significant harm to humans”; (b) State Party obligations to develop certain minimum core public health capacities; (c) obligations on States Parties to notify WHO of events that may constitute a public health emergency of international concern according to defined criteria; (d) provisions authorizing WHO to take into consideration unofficial reports of public health events and to obtain verification from States Parties concerning such events; (e) procedures for the determination by the Director-General of a “public health emergency of international concern” and issuance of corresponding temporary recommendations, after taking into account the views of an Emergency Committee; (f) protection of the human rights of persons and travellers; and (g) the establishment of National IHR Focal Points and WHO IHR Contact Points for urgent communications between States Parties and WHO.”⁷⁹⁹⁷

Commitment Features

The G20 commitment is “reaffirm(ing) our commitment to the continued sharing of timely, transparent, and standardized data and information [IHR].” In this commitment, there are two targets: 1) the continued sharing of timely, transparent, and standardized data and 2) the continued sharing of timely, transparent, and standardized information.

To “reaffirm” is understood as “affirm again” whereby affirm is to assert strongly, state as fact, confirm or ratify a judgment.⁷⁹⁹⁸ “Continued” is understood as “lasting or enduring without interruption.”⁷⁹⁹⁹ “Continued sharing” will be understood as disseminating all relevant data and information. Thus, a single act of sharing data or information will not count as compliance.

<https://www.dictionary.com/browse/continued?s=t>

Furthermore, a G20 member can share data or information with another country or with an international organization, such as the WHO.

“Timely” is understood as “coming early or at the right time.”⁸⁰⁰⁰ Data that is “timely” should be “recorded as quickly as possible and used within a reasonable time period.”⁸⁰⁰¹ The WHO recognizes that the “rapid data sharing is critical during an unfolding health emergency. The ethically appropriate and rapid sharing of data can help identify etiological factors, predict disease spread, evaluate existing and novel treatments, symptomatic care and preventive measures, and guide the deployment of limited resources.”⁸⁰⁰²

“Transparency” is understood as “governments making information publicly available so that their actions and decisions are visible and understandable to the public and so they can, therefore, be held to account.”⁸⁰⁰³ Examples of compliance include sharing data pertaining to COVID-19 infections and mortality rates through an open access government website.

To achieve compliance, the standardized data and information shared must be relevant to “advancing global pandemic preparedness, prevention, detection and response.”⁸⁰⁰⁴ This is generally understood as standardized data and information relevant to COVID-19 pandemic, however, compliance can be achieved if the standardized data and information shared is pertaining to any global pandemic.

Part One: the continued sharing of timely, transparent, and standardized data

“Standardized data” is understood as data that is in “a common format that allows for collaborative research, large scale analytics, and sharing of sophisticated tools and methodologies,” according to Observational Health Data Sciences and Informatics (OHDSI).⁸⁰⁰⁵ Healthcare data can be found in various formats and the same term may be represented in different contexts. To comply, members should share data that is consistent longitudinally and comparable with other datasets and variables should be precisely defined.⁸⁰⁰⁶ Examples of standardized data in the context of COVID-19 pandemic could include variables such as per cent 7-day average positivity and infection fatality ratio.

Part Two: the continued sharing of timely, transparent, and standardized information

“Information” is understood as “knowledge gained through study, communication, research, instruction, etc.”⁸⁰⁰⁷ This includes any knowledge that can have a material impact on a members’ understanding, preparedness, prevention, detection and response to public health issues. Furthermore, “information” will also include analysis generated from standardized data or any other non-standardized data. Examples of information can include understanding of adverse side-effects, effective policy approaches, and best practices. These examples are not meant to be exhaustive.

<https://www.dictionary.com/browse/information>

To achieve full compliance (+1), a G20 member must share standardized data and information in a timely and transparent manner, that is numerous times over the course of the compliance period and without delay from the time the information is received by the G20 member. If a G20 member does share data and/or information but it is not timely, transparent or standardized, it would only be considered partial compliance. If a G20 member only shares data and/or information once or twice over the compliance period, it would still be considered partial compliance. Furthermore, if a G20 member only takes action to share either timely, transparent and standardized data or information, it would only be considered partial compliance. Non-compliance (-1) will be considered if a G20 member does not continually share timely, transparent and standardized data or information, including if members have shared data/information on a single occasion. This commitment requires concrete actions for compliance. If a G20 member reaffirms the commitment or makes verbal statements on sharing data and/or information, it would not count towards compliance.

Scoring Guidelines

| | |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| -1 | G20 member does NOT continually share timely, transparent and standardized data or information. |
| 0 | G20 member continually shares timely, transparent and standardized data in a timely and transparent manner OR continually shares timely, transparent and standardized information. |
| +1 | G20 member continually shares timely, transparent and standardized data in a timely and transparent manner AND continually shares timely, transparent and standardized information. |

Argentina: +1

Argentina has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 30 November 2020, President Alberto Fernandez and Brazilian President Jair Bolsonaro exchanged experience in dealing with the COVID-19 pandemic and challenges it posed to their respective countries.⁸⁰⁰⁸

On 14 December 2020, the Ministry of Health in partnership with the UK organized a virtual seminar discussing vaccine distribution strategy and combating misinformation regarding COVID-19.⁸⁰⁰⁹ It was the third in a series of joint events between Argentina and the UK within the Latin American and Caribbean region. The CEO of GAVI, the Vaccine Alliance, spoke at the seminar to share information on the progress of COVAX, the global initiative to ensure fair and equitable access to COVID-19 vaccines.⁸⁰¹⁰

On 7 January 2021, health officials from Mexico visited Argentina to discuss Argentina’s experience with the Russian vaccine, Sputnik V, as to help Mexico in its consideration of acquiring the

vaccine.⁸⁰¹¹ Argentina and Mexico exchanged information about “distinct vaccine initiatives” and “the strategic agreement signed between both countries to produce and distribute the (vaccine) developed by the University of Oxford and AstraZeneca, which is produced in Argentina.”⁸⁰¹²

On 5 February 2021, President Fernandez and French President Emmanuel Macron met virtually where they discussed the epidemiological situations in both of their countries at length.⁸⁰¹³ The discussion included the vaccination process, the need to increase production of vaccines and how to ensure a more equitable production and distribution of the COVID-19 vaccine.⁸⁰¹⁴

On 15 March 2021, Foreign Minister Felipe Sola held a videoconference with Tunisian Minister of Foreign Affairs, Migration and Tunisians Abroad Othman Jerandi. They discussed opportunities to increase exchanges and shared experiences with combating the COVID-19 pandemic.⁸⁰¹⁵

On 16 March 2021, Minister of Health Carla Vizotti met with the United Kingdom’s Minister for the Deployment of Vaccines against COVID-19 Nadhim Zahawi to discuss developing and distributing the COVID-19 vaccine.⁸⁰¹⁶ The ministers discussed postponing second doses to ensure as many people as possible are vaccinated and prioritizing by age, risk and activity.⁸⁰¹⁷

On 31 March 2021, Foreign Minister Guillermo Justo Chaves met with the EU Ambassador to Argentina Audo Maio-Coliche. They discussed enhancing cooperation and multilateralism in the view of a more equitable supply of vaccines among countries, “as well as for the sharing of experiences and knowledge regarding COVID-19.” They also agreed that the vaccine should be a universal public good for all the access, manufacture and distribute at will.⁸⁰¹⁸

On 19 April 2021, Mexico announced that cooperation with Argentina has led to the two countries to coproduce AstraZeneca vaccinations as well as create a network of vaccine projects throughout Central and South America.⁸⁰¹⁹

On 29 April 2021, Minister Vizotti and Presidential Advisor Cecilia Nicolini met with the Chargé d'Affaires of the United States Embassy MaryKay Carlsson to discuss joint cooperation on scientific and technological development to respond to the COVID-19 pandemic.⁸⁰²⁰ They reviewed actions already taken by the Argentine government to respond to the pandemic.⁸⁰²¹

On 3 May 2021, Minister Vizotti and Presidential Advisor Cecilia Nicolini met virtually with the UK Minister for the Deployment of Vaccines against COVID-19. They met shortly thereafter with UK Ambassador Kirsty Hayes in person to discuss vaccination campaign strategy based on the UK's experience.⁸⁰²²

On 3 May 2021, Minister Vizotti, Advisor Nicolini and the Ambassador for Argentina to China Sabino Vaca Narvaja met virtually with the Chinese Ambassador to Argentina Zou Xiaoli and pharmaceutical executives to discuss Argentina-China bilateral cooperation in COVID-19 virological research and vaccine production, as well as vaccine distribution experiences.⁸⁰²³

On 21 May 2021, President Fernández participated in the Global Health Summit in which all G20 members shared the lessons they learned from their experiences with the COVID-19 pandemic. He appealed to the other countries for more efficient transfer of technology and licensing of intellectual property to aid countries such as those in Latin America who are struggling to fight the pandemic.⁸⁰²⁴

On 24 May 2021, Minister Vizotti and Advisor Nicolini met with the Mexican Secretary of Health Jorge Alocer Valera in Mexico City for the Mexico-Argentina Binational Meeting Towards a Latin American Platform for Preparation and Response in Public Health. They discussed their COVID-19 experiences and planned cooperative vaccination strategy.⁸⁰²⁵

On 29 July 2021, the Minister Vizotti presented Argentina's findings regarding the effectiveness of the Sinopharm vaccine to a World Health Organization panel including representatives from China and Brazil, among other countries.⁸⁰³⁴ The vaccine was found to have 84 per cent effectiveness based on its' use in Argentina.⁸⁰³⁵

In meeting with representatives of the governments of other G20 countries to discuss health strategies and outcomes and to cooperate on formulating new ones, Argentina has fully complied with its' commitment to continually share timely, transparent, and standardized public health information. By cooperating with other G20 countries in original public health research, it has fully complied with its' commitment to share timely, transparent, and standardized public health data.

Thus, Argentina receives a score of +1.

Analyst: Dre Daley

Australia: +1

Australia has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 26 November 2020, foreign affairs and health officials from Mexico, Indonesia, Korea, Turkey and Australia (MIKTA) met to discuss ways to strengthen the global health system and co-operation and collaboration, among the five MIKTA countries, specifically regarding how to overcome the current pandemic and preventing others.⁸⁰³⁶

On 4 December 2020, Minister for Foreign Affairs and Women of Australia Marise Payne co-chaired the third Malaysia-Australia Annual Foreign Ministers' Meeting. The ministers discussed the impact of the COVID-19 pandemic and agreed to further cooperation to combat the pandemic. Furthermore, they "underlined the importance of sharing the benefits of scientific and medical research and development on mutually agreed terms, strengthening public healthcare systems, and improving readiness for future global pandemic prevention, preparedness, and response, and recognised the importance of the World Health Assembly's independent evaluation into the COVID-19 response in this regard."⁸⁰³⁷

On 15 December 2020, Australia met with Indonesia and Timor-Leste to discuss strengthening their trilateral cooperation. The first item on the agenda was to discuss the impact of the COVID-19 pandemic in the respective countries and region, as well as the challenges faced due to the pandemic. "Ministers discussed the importance of working together in support of the health security, economic recovery and stability of the region, including to ensure fair and equitable distribution of safe and affordable vaccines, and supporting vulnerable communities. Ministers also discussed ways to

combat the rise of threats in cyber space including disinformation and misinformation in the context of the pandemic.”⁸⁰³⁸

On 18 December 2020, Australia participated in the 14th regular multilateral teleconference with the US, Japan, Korea, New Zealand and Vietnam. The participants “exchanged views on facilitating regional cooperation on COVID-19 response, developing and distributing vaccines, resuming economic activities, and facilitating international travel.”⁸⁰³⁹

On 19 February 2021, Australia attended the third Quadrilateral Foreign Ministers’ Meeting with Japan, India and the US. The participants pledged to deepen cooperation on the response to the COVID-19 pandemic, as well as cyber and critical technologies to countering disinformation.⁸⁰⁴⁰

On 30 March 2021, Australia issued a joint statement alongside the UK, Canada, Czechia, Denmark, Estonia, Israel, Japan, Latvia, Lithuania, Norway, Korea, Slovenia, and the US on the World Health Organization’s (WHO) study on COVID-19 origins. The statement underlined the commitment of the governments to working with the WHO on data and information sharing regarding the start and spread of the COVID-19 pandemic. Furthermore, they stated that “With all data in hand, the international community may independently assess COVID-19 origins, learn valuable lessons from this pandemic, and prevent future devastating consequences from outbreaks of disease...We will work collaboratively and with the WHO to strengthen capacity, improve global health security, and inspire public confidence and trust in the world’s ability to detect, prepare for, and respond to future outbreaks.”⁸⁰⁴¹

On 4 May 2021, Minister for Foreign Affairs Marise Payne met with Indian Minister for External Affairs Subramanyam Jaishankar and French Minister for Europe and Foreign Affairs Jean-Yves Le Drian in London to discuss trilateral cooperation in confronting challenges from the COVID-19 pandemic.⁸⁰⁴² Topics discussed included fair and equitable access to high quality, safe, effective and affordable COVID-19 vaccines and treatments globally.⁸⁰⁴³ They highlighted that this is essential for collective recovery.⁸⁰⁴⁴

Brazil has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 24 November 2020, Brazil attended the 2020 Korea-Latin America and the Caribbean Future Cooperation Forum through pre-recorded videos. Topics of the forum included how Korea and Latin America would officialise their cooperation in health, medical, and disease control and prevention, and how they would ensure the fair distribution of treatments and vaccines.⁸⁰⁴⁷

On 30 November 2020, President Jair Bolsonaro and Argentinian President Alberto Fernandez exchanged experience in dealing with the COVID-19 pandemic and challenges it posed to their respective countries.⁸⁰⁴⁸

On 25 February 2021, Brazil met with Chile, Colombia, Ecuador, Guyana, Paraguay and Peru for the 5th Extraordinary Meeting of Presidents of the Forum for the Progress and Development of South America. The participants discussed the importance of using the IHR to strengthen health response and collaborate with other multilateral organizations to ensure universal, equitable, and timely access to COVID-19 vaccines, demonstrating the sharing of best practices. They declared to “Exchange best practices in communication and access to information that is timely, correct and easy to understand on public health issues and health emergencies and combat misinformation and misinformation, especially about vaccination against COVID-19.” And “To request the countries of South America to resort to the application of the International Health Regulations, when the management of such an event deserves, through timely communication and exchange of information, and with the support of the Pan American Health Organization.”⁸⁰⁴⁹

On 7 March 2021, Minister of Foreign Affairs Ernesto Araujo and Israeli Minister of Foreign Affairs Gabi Ashkenazi held a dialogue to discuss pressing issues, including potential recovery paths from the COVID-19 pandemic through a public health perspective. They agreed to “support engagements and foster partnerships between research institutes in Israel and Brazil, in the public and private sectors, for the development of vaccines, treatments and medicines for COVID-19.”⁸⁰⁵⁰

On 7 May 2021, Minister of Foreign Affairs Carlos Alberto Franco França and Spanish Minister of Foreign Affairs Arancha González Laya held the Ministerial Political Dialogue Commission where they exchanged COVID-19 pandemic experiences and reaffirmed their commitment to collaborate in a timely manner to ensure equitable and prompt access to vaccines.⁸⁰⁵¹

On 13 July 2021, Health Minister Marcelo Queiroga and World Health Organization (WHO) director Tedros Adhanom met to confer about immunization advancement, vaccination of Indigenous peoples and increasing local capacity for vaccine production.⁸⁰⁵²

On 21 July 2021, Minister Queiroga participated in a High Level Panel organized by the WHO and the World Trade Organization and discussed the role of the Brazilian Unified Health System in responding to the pandemic and considered strategies to improve the distribution and timely access to vaccines.⁸⁰⁵³

On 28 July 2021, Minister Queiroga engaged in the Meeting of Health Ministers of the BRICS where he emphasized the importance of strengthening Brazilian Unified Health System during the pandemic and supporting national and multinational strategies to respond to the pandemic.⁸⁰⁵⁴

On 9 September 2021, President Bolsonaro attended the 8th BRICS Summit in New Delhi. The leaders at the Summit emphasized the importance of global vaccine equity and support the establishment of a BRICS Integrated Early Warning System to prevent mass infectious disease risks for identifying future pandemics.⁸⁰⁵⁵ The need for this system was based on satisfaction within intra-BRICS cooperation throughout the pandemic.⁸⁰⁵⁶

Canada has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 29 March 2021, Canada and the Pan American Health Organization (PAHO) donated computer equipment to Belize. The equipment will support Belize's ability "to implement health measures such as planning, and surveillance and risk monitoring, the ability to efficiently prevent, detect, and respond to health risks and emergencies." The data and information gathered with this equipment will then be able to be shared with the rest of the world.⁸⁰⁵⁷

On 30 March 2021, Canada issued a joint statement alongside the UK, Australia, Czechia, Denmark, Estonia, Israel, Japan, Latvia, Lithuania, Norway, Korea, Slovenia, and the US on the World Health Organization's study on the source of COVID-19 origins. The statement underlined the commitment of the governments to working with the WHO on data and information sharing regarding the start and spread of the COVID-19 pandemic. Furthermore, they stated that "With all data in hand, the international community may independently assess COVID-19 origins, learn valuable lessons from this pandemic, and prevent future devastating consequences from outbreaks of disease... We will work collaboratively and with the WHO to strengthen capacity, improve global health security, and inspire public confidence and trust in the world's ability to detect, prepare for, and respond to future outbreaks."⁸⁰⁵⁸

On 5 May 2021, Canada announced that it is teaming up with international partners to develop a "standardized vaccine certification for travel."⁸⁰⁵⁹ Minister of Tourism Melanie Joly stated that there were ongoing talks with G7 and some G20 partners regarding vaccine certification. This stance is to position themselves as a safe destination, according to Minister Joly.⁸⁰⁶⁰

On 7 May 2021, Minister of Small Business, Export Promotion and International Trade Mary Ng released a statement on intellectual property waiver for COVID-19 vaccines. Minister Ng stated "The Government of Canada remains committed to working with all international partners to reach a rapid and just end to the COVID-19 pandemic. Our government firmly believes in the importance of protecting [intellectual property], and recognizes the integral role that industry has played in innovating to develop and deliver life-saving COVID-19 vaccines. Canada is ready to discuss proposals on a waiver for intellectual property protection, in particular for COVID-19 vaccines, under the WTO Agreement on [Trade-Related Aspects of Intellectual Property Rights]."⁸⁰⁶¹

China: 0

China has partially complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 2 January 2021, State Councillor and Foreign Minister Wang Yi discussed China's efforts in combating the COVID-19 pandemic. Minister Yi underlined how China "organized over 100 video meetings with experts from other countries, opened an online knowledge center to share China's experiences with all countries, and published eight updated versions of diagnosis and therapeutic solutions and seven updated versions of prevention and control protocols."⁸⁰⁷⁰

On 14 February 2021, one of the members of the World Health Organization (WHO) team investigating the source of SARS-CoV-1-19 stated that China refused to hand over key data on early cases and only provided a summary. Specifically, the WHO requested the raw data on the 174 identified cases of the virus from Wuhan in December 2019.⁸⁰⁷¹

As of March 2021, mass vaccinations are being administered to the population in China. However, due to the withheld trial data, none of the vaccines developed in China have received full regulatory approval from the WHO and only one out of more than a dozen Chinese vaccines has received an emergency approval from the WHO.⁸⁰⁷²

On 30 March 2021, the Ministry of Foreign Affairs and the National Administration of Traditional Chinese Medicine co-hosted the Forum on Traditional Chinese Medicine and International Cooperation to Fight Against COVID-19 Pandemic, under the theme of Deepen Traditional Chinese Medicine Exchanges and Cooperation, Build a Global Community of Health for All. Officials and leaders from 28 countries and regions, as well as the WHO, attended the forum to exchange views and share information on tackling the pandemic, including through traditional Chinese medicine.⁸⁰⁷³

measures.⁸⁰⁸⁸ The government officials led this initiative in an effort to facilitate cross-border travel for workers and do combat disinformation concerning COVID-19.⁸⁰⁸⁹

On 1 January 2021, the French government created a new autonomous research agency, National Aids Research Agency (ANRS), merging two previously existing research institutions: the ANRS and REACTing.⁸⁰⁹⁰ This research agency studies infectious and emerging diseases in an effort to better inform the global response to such health-related challenges. France's Minister of Solidarity and Health, Olivier Véran, stated that the ANRS initiative would allow for a link with "the countries of the South" and therefore enable information sharing between nations.⁸⁰⁹¹

On 5 February 2021, French President Emmanuel Macron and Argentinian President Alberto Fernandez met virtually to discuss the epidemiological situations in both their countries at length.⁸⁰⁹² The discussion included the vaccination process, the need to increase production of vaccines and how to ensure a more equitable production and distribution of the COVID-19 vaccine.⁸⁰⁹³

On 30 March 2021, President Macron joined other global leaders calling for an international pandemic treaty.⁸⁰⁹⁴ Such a treaty would improve both national and global health systems in order to facilitate cooperation between nations, in the event of another global health crisis. The main goal is to foster pandemic preparedness and response.⁸⁰⁹⁵ France formally backed the ideas of a treaty to ensure universal and equitable access to health-related information and data for future pandemics.⁸⁰⁹⁶

On 6 April 2021, the French Development Agency in collaboration with Expertise France, another public agency, and the Governance Lab at the NYU Tandon School of Engineering announced the

seven projects selected to receive the #Data4COVID19 Africa Challenge.⁸⁰⁹⁷ This project, in large part funded and driven by French public agencies, sought to promote “new collaborations around non-traditional, non-statistical datasets,”⁸⁰⁹⁸ informed by the experiences of African nations during the COVID-19 pandemic.

On 6 May 2021, France announced its support for the India and South Africa proposal to temporarily eliminate intellectual property rights on vaccines. The argument for the temporary elimination of intellectual property rights on vaccines is that “rules requiring countries to protect patents and other forms of intellectual property are an obstacle to increasing the production of vaccines and other products needed to tackle the pandemic.”⁸⁰⁹⁹

On 24 May 2021, President Macron spoke at the 74th World Health Assembly to reaffirm France’s commitment to “coordination, monitoring and information-sharing, and solidarity.”⁸¹⁰⁰ He proposed several tangible measures to support this mission: bolstering the WHO, strengthening the implementation of the International Health Regulations, incorporating the “One Health” approach and ensuring access to accurate and reliable scientific data and information.⁸¹⁰¹

From 11 to 13 June 2021, G7 Leaders, including President Macron, discussed a more “systematic” approach to data collection and sharing as part of their pandemic preparedness partnership.⁸¹⁰² The partnership supported the roadmap put forward by the G7 science academies, which focuses on better global disease surveillance and emphasizes public health response data informing policy responses to epidemics.⁸¹⁰³

France has fully complied with this commitment and taken steps to promote the continued sharing of timely, transparent, and standardized data and information. France has taken active steps to continually share health information with other EU member countries and abroad but has been less consistent concerning the sharing of health data. France has partnered with other countries and global organizations to improve the accessibility of health information throughout the past year and has reaffirmed their commitment to taking similar steps concerning the sharing of health data on a timely basis.

Thus, France receives a score of +1.

Germany: +1

Germany has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 15 December 2020, health ministers from Germany, France, Italy, Belgium, Luxembourg, the Netherlands, Spain and Switzerland met to share and coordinate vaccination strategies in the effort to curb the spread of COVID-19.⁸¹⁰⁴ The countries pledged to share information regarding their respective vaccination campaigns to promote transparency and implement any successful measures.⁸¹⁰⁵ The government officials led this initiative in an effort to facilitate cross-border travel for workers and do combat disinformation concerning COVID-19.⁸¹⁰⁶

On 19 February 2021, the Federal Institute for Vaccines and Biomedicines, the Paul Ehrlich Institute, published a report on the AstraZeneca vaccine. The report stated that the AstraZeneca vaccine is high effective and safe, providing 70 per cent efficacy against the COVID-19 virus.⁸¹⁰⁷

On 28 April 2021, Chancellor Angela Merkel and China's Prime Minister Li Keqiang met for the 6th Sino-German government consultations. They discussed several topics, including the respective experiences with the COVID-19 crisis. Chancellor Merkel stated, "We can only contain this pandemic if we work together – China and Germany can play an important part" and "advocated an open and transparent discussion about vaccine production and called for reciprocal recognition of vaccines – at least at the World Health Organization – to help us win the battle against the virus."⁸¹⁰⁸

On 30 April 2021, Germany and the Pan American Health Organization/World Health Organization (PAHO/WHO) donated computer equipment to Belize to support its ability to conduct data entry where internet may not be available, to improve Belize's capacity for monitoring and evaluation. This will allow Belize "to gather and record individual data for reporting and documenting any adverse events following immunizations and respond timely," which then can be shared with other countries and the PAHO/WHO.⁸¹⁰⁹

On 5 May 2021, Germany announced that in partnership with the WHO, it would "establish a new global hub for pandemic and epidemic intelligence, data, surveillance and analytics innovation" based in Berlin. The WHO Hub for Pandemic and Epidemic Intelligence "will also promote greater access to data and information."⁸¹¹⁰

On 6 May 2021, Germany announced it opposed the India and South Africa proposal to temporarily eliminate intellectual property protections on vaccines. The argument for the temporary elimination of intellectual property rights on vaccines is that “rules requiring countries to protect patents and other forms of intellectual property are an obstacle to increasing the production of vaccines and other products needed to tackle the pandemic.” However, Germany, which hosts BioNTech, and other countries that oppose the notion state that the removal of intellectual property rights will not solve the problem of inequitable access to vaccines.⁸¹¹¹

On 15 July 2021, Health Minister Jens Spahn requested for China to allow further investigations about the origins of the COVID-19 virus.⁸¹¹² While visiting the WHO headquarters, Spahn announced that the shared information was necessary to obtain.⁸¹¹³

On 1 September 2021, Federal Chancellor Angela Merkel joined forces with WHO Director Tedros Adhanom Ghebreyesus to finally open the WHO Hub for Pandemic and Epidemic Intelligence in Berlin.⁸¹¹⁴ The new centre will be operated by WHO and will collect health data internationally in hopes to be “Better prepared for future epidemics and pandemics.”⁸¹¹⁵ The WHO Hub will collect and evaluate data from all countries, and the information will be shared on a global level.⁸¹¹⁶

Germany has fully complied with its commitment to share timely, transparent, and standardized data or information by meeting and collaborating with other countries and international organizations like the World Health Organization to eliminate barriers to ending the COVID-19 pandemic. These strategies include opposing intellectual property protections on vaccines and collecting health data to share on an international level.

Thus, Germany receives a score of +1.

for identifying future pandemics.⁸¹²⁴ The need for this system was based on satisfaction within intra-BRICS cooperation throughout the pandemic.⁸¹²⁵

India has fully complied with its commitment to share timely, transparent, and standardized data or information by taking on significant measures to develop new programs and platforms to share information with the public.

Thus, India receives a score of +1.

Analyst: Arun Eswaran

Indonesia: 0

Indonesia has partially complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 26 November 2020, foreign affairs and health officials from Mexico, Indonesia, Korea, Turkey and Australia (MIKTA) met to discuss ways to strengthen the global health system and co-operation and collaboration, among the five MIKTA countries, specifically regarding how to overcome the current pandemic and preventing others.⁸¹²⁶

On 15 December 2020, Indonesia met with Australia and Timor-Leste to discuss strengthening their trilateral cooperation. The first item on the agenda was to discuss the impact of the COVID-19 pandemic in the respective countries and region, as well as the challenges faced due to the pandemic. “Ministers discussed the importance of working together in support of the health security, economic recovery and stability of the region, including to ensure fair and equitable distribution of safe and affordable vaccines, and supporting vulnerable communities. Ministers also discussed ways to combat the rise of threats in cyber space including disinformation and misinformation in the context of the pandemic.”⁸¹²⁷

On 19 January 2021, Minister of Health Budi Gunadi Sadikin attended a virtual roundtable to discuss the development of value-based healthcare. The discussion, hosted by the Ministry of Health in Saudi Arabia and the World Economic Forum, focused on the construction and transformation of sustainable health development after the COVID-19 pandemic through value-based healthcare. Value-based healthcare focuses on patient’s health outcome along with the digitalization of health services. The minister emphasized the needed development in information technology.⁸¹²⁸

On 17 March 2021, Director for Communicable Diseases Prevention and Control Dr. Siti Nadia Tarmizi addressed the concerns regarding the COVID-19 AstraZeneca and Sinovac vaccines. Dr. Tarmizi also clarified the worries regarding the connection of blood clots and the AstraZeneca vaccine where she states that on 11 March 2021, the World Health Organization along with the

On 9 September 2021, the seventh Indonesia-Australia Foreign and Defence Ministers took place in Jakarta Indonesia.⁸¹³⁸ Regarding COVID-19, the ministers emphasized their commitment to timely and equitable vaccines towards a shared regional recovery through being a part of the COVAX Facility (headed by Indonesia).⁸¹³⁹ The Ministers also discussed limited medical equipment a health worker as well as misinformation and disinformation around the pandemic and the vaccines.⁸¹⁴⁰

Indonesia has partially complied with its commitment to share timely, transparent, and standardized data or information by discussing information regarding the safety and collection of the vaccines as well as participating in roundtables to further technological innovations in health but has failed to consistently share timely, transparent and standardized data.

Thus, Indonesia receives a score of 0.

Analyst: Shereen Marouf Mourad

Italy: +1

Italy has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 1 December 2020, Minister of Foreign Affairs and International Cooperation Luigi Di Maio participated in the 23rd European Union-Association of Southeast Asian Nations Ministerial Meeting, where he shared that Italy's response to the pandemic was based on the concepts of people, planet, and prosperity. The Minister emphasized that these concepts would bring prosperity through a better distribution of opportunities.⁸¹⁴¹

On 7 December 2020, Vice Minister of Foreign Affairs and International Cooperation Emanuela Del Re attended the 12th call for the Ministerial Coordination Group on COVID-19, where she shared how Italy was confronting the second wave of the coronavirus by prioritizing citizens' health while maintaining the national economy, and also by taking precautions. The Vice Minister also emphasized the importance of a coordinated multilateral, global response to mitigate pandemic impacts.⁸¹⁴²

On 15 December 2020, health ministers from Italy, Germany, France, Belgium, Luxembourg, the Netherlands, Spain and Switzerland met to share and coordinate vaccination strategies in the effort

to curb the spread of COVID-19.⁸¹⁴³ They pledged to share information regarding their respective vaccination campaigns to promote transparency and implement any successful measures.⁸¹⁴⁴ The government officials led this initiative in an effort to facilitate cross-border travel for workers and do combat disinformation concerning COVID-19.⁸¹⁴⁵

On 16 December 2020, Minister Di Maio attended the European Union-Latin American and Caribbean Countries dialogue and shared that a commitment to a multilateral response and promotion of health as a public asset, like Italy has been advocating for, will be key to overcoming the COVID-19 pandemic.⁸¹⁴⁶

On 8 February 2021, Vice Minister of Foreign Affairs Marina Sereni announced at the T20 Inception Conference that action towards COVID-19 response should be based on the three pillars of: people, planet, and prosperity. This affirmed Italy's practices towards their response to the pandemic on a national and international level, recognizing the need for equity and sustainability.⁸¹⁴⁷

On 25 and 26 March 2021, Italy hosted a two-day group health meeting among G20 members. This meeting was to affirm coordination among G20 members and to share data and ideas. A professor at the Sapienza University of Rome, Moreno Di Marco, noted correlation between the pandemic and environmental health. Additionally, there were presentations held regarding preparedness and antimicrobial resistance.⁸¹⁴⁸ The meeting detailed using technology to gauge risk and spread of zoonotic diseases, and potentially applying a vaccination campaign on animals to prevent zoonosis.⁸¹⁴⁹

On 13 April 2021, the Vice Minister of Foreign Affairs and the Chief Executive Officer of the Coalition for Epidemic Preparedness discussed COVID-19 vaccine development. Both officials discussed establishing a database for all information relating to COVID-19 in order to develop a vaccine that could potentially combat all coronaviruses. This idea was brought up given the rise of new COVID-19 variants.⁸¹⁵⁰

On 20 April 2021, the Italian Medicines Agency, in joint with the ruling of the European Medicines Agency, reported that the Johnson & Johnson vaccination was best used for peoples 60 years and older. Additionally, both agencies reported low risk of contracting thrombosis from the Johnson & Johnson vaccine.⁸¹⁵¹

On 6 May 2021, Italy announced its support for the India and South Africa proposal to temporary eliminate intellectual property rights on vaccines. The argument for the temporary elimination of intellectual property rights on vaccines is that “rules requiring countries to protect patents and other forms of intellectual property are an obstacle to increasing the production of vaccines and other products needed to tackle the pandemic.”⁸¹⁵²

On 12 May 2021, Vice Minister Sereni attended the Facilitation Council of the Access to COVID-19 Tools Accelerator and suggested increasing global vaccine production, promoting international cooperation, and fostering the development of production capabilities to ensure the demand for tests, treatments, and vaccines to create more equity in vaccine distribution.⁸¹⁵³

On 17 May 2021, Carabinieri Command for the Protection of Health issued a safety notice over cases of dietary supplements containing Sildenafil, a pharmaceutical unsuited for dietary supplements, being sold online through the European Commission’s Rapid Alert System for Food and Feed. It is a tool used by countries within the European Union to share information and alerts with each other.⁸¹⁵⁴

On 21 May 2021, a G20 Global Health Summit was held in Rome. The meeting concluded with the signing of “The Rome Declaration” by the Italian Prime Minister and the President of the European Commission.⁸¹⁵⁵ The declaration reaffirmed Italy’s commitment to sharing information with other member states, highlighted the need to invest more funds into health workers, research; and distributing and diversifying COVID-19 vaccinations.⁸¹⁵⁶

On 10 July 2021, a G20 conference was held in Venice, with one of the topics concerning the movement of peoples within Europe with the presence of the Delta COVID-19 variant.⁸¹⁵⁷ Economy Minister Daniele Franco stated that any policies to restrict the movement of people should be avoided. In addition, there were conversations about sharing and delivering vaccinations to lower-

income countries who struggle to gain access to vaccines. Italian representatives stated that this issue will be discussed further in a future G20 summit in October.⁸¹⁵⁸

On 26 July 2021, Deputy Minister of Foreign Affairs and International Cooperation Benedetto Della Vedova attended a conference in North Macedonia which covered the importance of cooperation between European countries in order to combat issues such as the COVID-19 pandemic.⁸¹⁵⁹

On 26 July 2021, Deputy Minister Manlio Di Stefano met with Georgian Foreign Minister Teimuraz Janjalia to discuss bilateral topics such as the current COVID-19 pandemic and resolving the economic repercussions that arose from the COVID-19 pandemic.⁸¹⁶⁰

On 5 August 2021, Italy hosted a G20 Ministerial Meeting emphasizing the need for countries to digitalize information and coordination. The meeting concluded that the pandemic has increased usage and the need for digitalization among countries.⁸¹⁶¹

On 6 August 2021, Italy signed a joint declaration with the G20 Ministers of Research, the Organization for Economic Co-operation and Development and the United Nations Educational, Scientific, and Cultural Organization.⁵ The declaration acknowledged how digitalization can be used by countries in overcoming the COVID-19 pandemic and accelerating recovery.⁸¹⁶²

On 5 and 6 September 2021, Italy hosted the G20 Health Ministers' Meeting in Rome, with the topics mainly concerning the COVID-19 pandemic. A declaration was formed detailing the goals of the G20 and actions needed to accelerate post-pandemic recovery and to build response systems for future pandemics.⁸¹⁶³

Italy has fully complied with its commitment by hosting and actively attending international conferences discussing resolutions for problems exacerbated by the pandemic. Italy has also shared timely, transparent and standardized data by coordinating in conjunction with the European Medicines Agency, over the safety of the Johnson & Johnson vaccine and by sharing laboratories for vaccine analysis, displaying Italy's participation in coordinating with other countries.

Thus, Italy receives a score of +1.

Japan: +1

Japan has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 26 November 2020, Minister for Foreign Affairs Toshimitsu Motegi shared Japan's response to developing and ensuring fair access to COVID-19 vaccines with Norwegian Minister of Foreign Affairs Ine Marie Eriksen Søreide.⁸¹⁶⁴

On 27 November 2020, Minister Motegi and Swiss Head for Foreign Affairs Ignazio Cassis discussed the importance of fair access to COVID-19 vaccines and medications, as well as reforms for the WHO due to the coronavirus.⁸¹⁶⁵

On 17 December 2020, Minister Motegi and United States State Secretary Mike Pompeo shared their respective countries' response to the COVID-19 pandemic, demonstrating an exchange of information through communication.⁸¹⁶⁶

On 18 December 2020, Japan participated in the 14th regular multilateral teleconference with the US, Australia, Korea, New Zealand and Vietnam. The participants "exchanged views on facilitating regional cooperation on COVID-19 response, developing and distributing vaccines, resuming economic activities, and facilitating international travel."⁸¹⁶⁷

On 19 February 2021, Japan attended the third Quadrilateral Foreign Ministers' Meeting with Australia, India and the US. The participants pledged to deepen cooperation on the response to the COVID-19 pandemic, as well as cyber and critical technologies to countering disinformation.⁸¹⁶⁸

On 18 March 2021, the Health Sciences Council expert committee meeting announced their plan to include people with severe mental illnesses or disabilities in the COVID-19 vaccination priority list. The council stressed to the public that this decision comes from research showing that people with mental illnesses or disabilities carry a higher risk of death from COVID-19.⁸¹⁶⁹

On 29 March 2021, the Ministry of Foreign Affairs received the final report of a research project on preventing and responding to outbreaks and spread of infectious diseases on cruise ships, sharing best practices and framework for the international community. The Ministry commissioned the reports after the outbreak and spread of COVID-19 on cruise ships in 2020.⁸¹⁷⁰

information, including conducting studies to find the origin of COVID-19 – an example of a best practice.⁸¹⁷⁸

On 23 July 2021, Minister Motegi and WHO Director-General Adhanom called to explain strategies in responding to global health challenges. Minister Motegi emphasized the need to conduct further and more thorough studies regarding the origin of COVID-19, and that there should be no geographical vacuum in responding to global health crises.⁸¹⁷⁹

On 4 August 2021, Minister Motegi met with Antigua and Barbuda Minister for Foreign Affairs Everly Paul Chet Greene to discuss the need for cooperation in international issues such as COVID-19 countermeasures.⁸¹⁸⁰

Japan has fully complied with its commitment to continually share timely, transparent and standardized data and information as outlined by the International Health Regulations through sharing updates on collaborative research processes and emphasizing the need to cooperate to overcome global health crises including COVID-19.

Thus, Japan receives a score of +1.

Analysts: Shanice Burton and Ingrid Wong

Korea: +1

Korea has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 24 November 2020, Korea hosted the 2020 Korea-Latin America and the Caribbean Future Cooperation Forum. Members from the Ministry of Health and Welfare, Ministry of Foreign Affairs, the Korea Drug Development Fund, the Korea Disease Control and Prevention Agency, the International Vaccine Institute, the Korea International Cooperation Agency, and officials of four Latin American countries were in attendance. Topics of the forum included how Korea and Latin America would officialise their cooperation in health, medical, and disease control and prevention, and how they would ensure the fair distribution of treatments and vaccines.⁸¹⁸¹

On 26 November 2020, foreign affairs and health officials from Mexico, Indonesia, Korea, Turkey and Australia (MIKTA) met to discuss ways to strengthen the global health system and co-operation and collaboration, among the five MIKTA countries, specifically regarding how to overcome the current pandemic and preventing others.⁸¹⁸²

On 30 November 2020, the Ministry of Foreign Affairs held the second Korea-Middle East (United Arab Emirates [UAE]) Public Health Cooperation Conference. The importance of collaboration

among the countries was stressed, as well as the opportunity for Korea's health industry to share its advanced technology, quarantine capabilities and public health regulations with the UAE.⁸¹⁸³

On 3 December 2020, the Ministry of Trade, Industry and Energy and the Ministry of Food and Drug Safety announced that the International Organization for Standardization (ISO) adopted the Korean method of COVID-19 screening. Korea discussed the method with ISO members and a special Korean committee developed a plan for the standardization of their screening method to submit to the ISO.⁸¹⁸⁴

On 5 December 2020, Minister of Foreign Affairs Kyung-wha Kang attended the 16th Manama Dialogue's First Plenary Session on "Global Governance in the wake of the Covid-19 Pandemic," where she shared that advanced technology, trust, and cooperation were the most important factors to overcome the pandemic and in sharing accurate information, demonstrating best practices.⁸¹⁸⁵

On 9 December 2020, a convention in Seoul was opened to share the results of Korea's international cooperation. The convention gathered representatives from 150 organizations, including government ministries, publicly funded think tanks, and distinguished figures from around the world. The topics covered included explanations of Korea's quarantine system, medical treatment, and health care.⁸¹⁸⁶

On 18 December 2020, Vice Minister of Foreign Affairs Jong-kun Choi participated in the 14th regular multilateral teleconference with the US, Japan, Australia, New Zealand and Vietnam. Korea explained that although Korea's COVID-19 cases were rising, the country was able to respond to the pandemic effectively through the "3T (Testing, Tracing, and Treatment) strategy," alongside social distancing reinforcement and conducting more diagnostic tests.⁸¹⁸⁷ Furthermore, the participants "exchanged views on facilitating regional cooperation on COVID-19 response, developing and distributing vaccines, resuming economic activities, and facilitating international travel."⁸¹⁸⁸

On 29 December 2020, the Ministry of Foreign Affairs held a virtual meeting among countries in the region with the goal to establish the "Northeast Asia Cooperation Initiative for Infectious Disease Control and Public Health." This collaborative initiative was held to strengthen the capacity for joint response among regional countries and implement material and technology exchanges, to assist with the response to regional and transboundary health security crises.⁸¹⁸⁹

On 15 February 2021, the World Health Organization (WHO) approved the Korean version of the Oxford-AstraZeneca vaccine produced by the pharmaceutical company SK Bioscience. Due to this

approval and collaboration, Korea was able to utilize the data and information it had consolidated surrounding COVID-19 to contribute to the distribution of more AstraZeneca vaccines soon.⁸¹⁹⁰

On 17 March 2021, the Ministry of Foreign Affairs and the Ministry of Science and Information and Communications Technology opened the 2021 Korea- Latin America and the Caribbean Digital Cooperation Forum, with high profile officials from all participating countries in attendance. A goal of the Digital Cooperation Forum was for all the countries to collaborate on the sharing of data and information in the categories of medicine, technology, health and medical services. This was in an effort to strengthen cooperation between Korea and Latin America.⁸¹⁹¹

On 18 March 2021, Korea Health Industry Development Institution and the Ministry of Health and Welfare held the 11th Global Healthcare and Medical Tourism Conference. The event consisted of briefing sessions, academic conferences, seminars, business conferences, and public relations events. This conference was a way for the Korean government to analyze global healthcare trends and demonstrate Korean healthcare research, data, policies, and technology.⁸¹⁹²

On 23 March 2021, Korea announced it was boosting cooperation with Costa Rica to improve the strength of Korea's ties with Latin America. Korea and Costa Rica plan to work together on projects to establish access to vaccines and medical supplies for both countries. This will be done by Korea and Costa Rica collaborating in sharing data and research that will help further the development of health care and pharmaceuticals.⁸¹⁹³

On 30 March 2021, Korea issued a joint statement alongside the UK, Canada, Czechia, Denmark, Estonia, Israel, Japan, Latvia, Lithuania, Norway, Japan, Slovenia, and the US on the WHO's COVID-19 origins study. The statement underlined the commitment of the governments to working with the WHO on data and information sharing regarding the start and spread of the COVID-19 pandemic. Furthermore, they stated that "With all data in hand, the international community may independently assess COVID-19 origins, learn valuable lessons from this pandemic, and prevent future devastating consequences from outbreaks of disease...We will work collaboratively and with the WHO to strengthen capacity, improve global health security, and inspire public confidence and trust in the world's ability to detect, prepare for, and respond to future outbreaks."⁸¹⁹⁴

On 31 March 2021, the Ministry of Foreign Affairs hosted the "High-level symposium on Korea's leadership on global health in the COVID-19 era and beyond" with the Global Fund to Fight AIDS, Tuberculosis and Malaria. At the symposium, Korea shared best practices in responding to the COVID-19 pandemic, which included effective pandemic response policy, public participation, and innovative technologies.⁸¹⁹⁵

On 4 and 5 May 2021, Minister of Foreign Affairs Eui-yong Chung attended the G7 Foreign and Development Ministers' meeting and shared Korea's experience in responding to the COVID-19

pandemic. Chung urged the necessity of international cooperation to ensure equity in vaccine distribution.⁸¹⁹⁶

On 22 May 2021, Korea and the United States pledged to strengthen the alliance between the two countries and work towards addressing critical issues of importance to the Indo-Pacific region and the world. This alliance will include expanding cooperation between the two countries regarding COVID-19 response, global health, health research, and health security.⁸¹⁹⁷

On 11 June 2021, Health Minister Kwon Deok-cheol participated in the G7 Health Ministers' Meeting. The Health Ministers discussed measures to overcome COVID-19 and prepare for future pandemics. Minister Kwon proposed developing a globally collaborative pandemic surveillance system based on digital technology, suggesting that Korea can contribute to advancing the world's pandemic response capacity, by specifically sharing their digital technology and the research and data that is used to develop and implement such technology.⁸¹⁹⁸

On 5 August 2021, President Moon Jae-in announced during the first meeting of a private-public joint committee created to establish Korea as a global vaccine hub that Korea will work to strengthen the global cooperation system regarding vaccine technology, research, and distribution. President Moon said this will be done by working closely with the United States to ensure that the global vaccine partnership, that was agreed upon during the Korea-US summit, leads to significant results. This will be done by expanding Korea's vaccine partnerships with the United Kingdom, Germany, and other countries. Communication and cooperation with global vaccine research institutes, manufacturing companies, and international organizations such as the World Health Organization will also be improved.⁸¹⁹⁹

On 17 August 2021, President Moon held a summit with Kazakh President Kassym-Jomart Tokayev to discuss strengthening bilateral cooperation and expanding the strategic partnerships between the two countries. Improving cooperation in the health care and medical sector, exchanging medical personnel and knowledge, and partaking in joint efforts in the prevention, management and response to infectious diseases are all elements that will be worked on to expand the collaboration between the two countries.⁸²⁰⁰

On 2-3 September 2021, the National Institute of Food and Drug Safety Evaluation hosted a joint conference with the Drug Information Association. The conference aimed to strengthen international competitiveness and collaboration. The conference included domestic and foreign

industry experts and regulators to share COVID-19 vaccine development information, strategies for developing innovative drugs in Korea to enter foreign markets, and regulatory trends.⁸²⁰¹

On 25 August 2021, President Moon hosted a summit with President Ivan Duque Marquez of Colombia on the development of bilateral relations, cooperation in the post-COVID-19 era, and collaboration on global and regional issues. The talks covered improving cooperation in areas such as sharing information on the prevention and response to contagious diseases and strengthening cooperation in health care and medicine.⁸²⁰²

Korea has fully complied with its commitment to continually share timely, transparent and standardized data and information. Korea has demonstrated significant leadership in collaborating globally to share best practices to develop health technology. Through the transparent and timely sharing and collaboration of health information, Korea has fully complied with this commitment, while being a leading actor in combating the current COVID-19 pandemic.

Thus, Korea receives a score of +1.

Analyst: Hannah Story-Korman

Mexico: +1

Mexico has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 26 November 2020, health and foreign affairs officials from Mexico, Indonesia, Korea, Turkey and Australia (MIKTA) met to discuss ways to strengthen the global health system and co-operation and collaboration, among the five MIKTA countries, specifically regarding how to overcome the current pandemic and preventing others.⁸²⁰³

On 7 January 2021, Deputy Health Minister Hugo Lopez-Gatell and Foreign Ministry official Efrain Guadarrama discussed COVID-19 vaccine experiences with Argentine President Alberto Fernandez. Mexico and Argentina signed an agreement to produce and distribute the Oxford-AstraZeneca vaccine, which is currently produced in Argentina.⁸²⁰⁴

On 15 April 2021, Mexico hosted a virtual meeting on Technological Development of the Community of Latin American and Caribbean States vaccines against COVID-19, bringing together the eight research centers in the region that develop the most advanced vaccines. The participants discussed

“strengthening capacities for the production and distribution of vaccines and medicines in the region” and the importance of investing in research and development to stay ahead of the virus.⁸²⁰⁵

On 19 April 2021, Foreign Minister Marcelo Ebrard promoted the economic and health integration between members of the Community of Latin American and Caribbean States as well as the Economic Commission for Latin America and the Caribbean to further promote health in the region. Moreover, Minister Ebrard announced that cooperation has led to Mexico and Argentina to coproduce AstraZeneca vaccinations as well as create a network of vaccine projects throughout Central and South America.⁸²⁰⁶

On 28 April 2021, Minister Ebrard met with the Russian Minister of Foreign Affairs Sergei Lavrov. Minister Ebrard reported to Lavrov on the success of the Sputnik V vaccine on the Mexican population, which was developed in Russia. Moreover, both officials plan to register an updated version of the Sputnik V – Sputnik Light – for the Mexican population.⁸²⁰⁷

On 30 April 2021, Minister Ebrard met with the Spanish Minister of Foreign Affairs to review and compare both countries’ COVID-19 measures and progress. Minister Ebrard thanked Spain for their assistance in distributing vaccinations and reaffirmed the importance of coordination and communication between Mexico and Spain.⁸²⁰⁸

On 1 June 2021, Minister Ebrard gave details on how AstraZeneca vaccinations were produced in Latin America. The process revealed how Mexico coordinates with Argentina to produce the vaccine, with Argentina mainly producing the vaccine itself and Mexico distributing it. Moreover, Minister Ebrard also revealed plans to attend the meeting for ministers of the Central American Integration System where vaccination distribution will be discussed.⁸²⁰⁹

On 2 June 2021, Minister Ebrard met with United States Secretary of State Antony Blinken in Costa Rica. They discussed and affirmed their goals to cooperate in distributing COVID-19 vaccinations equitably and universally throughout the North American region to combat the pandemic.⁸²¹⁰ Mexico explained how inequitable distribution is exacerbated and caused by higher-income countries mass-purchasing and hoarding many of the vaccines.⁸²¹¹

On 10 June 2021, Deputy Minister of Foreign Affairs Carmen Moreno Toscano met with Italian Deputy Minister Benedetto Della Vedova. Key discussions in the meeting were largely about the COVID-19 pandemic, with maintaining universal accessibility to vaccinations a highlight in the

meeting. In addition, the two ministers discussed G20 affairs, especially since the G20 is currently under the Italian presidency.⁸²¹²

On 1 July 2021, Minister Ebrard signed a Joint Declaration with the French Minister for Europe and Foreign Affairs Jean-Yves Le Drian which reaffirmed both countries' commitment to cooperate and coordinate with each other in general and underscored the importance of making access to COVID-19 vaccinations universal for developing countries. In addition, they both highlighted both countries' efforts and plans to prevent zoonotic diseases as well as post-pandemic recovery.⁸²¹³

On 29 July 2021, Minister Ebrard met with American Senator Ben Hueso to discuss COVID-19 vaccinations. Ebrard and Hueso exchanged and compared vaccination rates for the Mexican province of Baja California and the American state of California respectively – two territories that border each other. This data was shared as a supplement for a discussion on potentially re-opening borders.⁸²¹⁴

On 5 August 2021, Undersecretary of Foreign Affairs Carmen Moreno attended a virtual conference with the Slovenian State Secretary Stanislav Rascan. Both representatives discussed coordination for post-pandemic recovery between the two countries.⁸²¹⁵

On 9 August 2021, Minister Ebrard delivered a proposal to the other G20 members regarding emergency use of COVID-19 vaccines. Ebrard argued that all countries should formally recognize and refrain from imposing restrictions on any World Health Organization authorized vaccines as it could stifle world pandemic recovery.⁸²¹⁶

On 17 August 2021, Mexico hosted a Community of Latin American and Caribbean States meeting. One of the main points of the meeting was emphasizing the importance of international cooperation in mitigating the economic consequences from the COVID-19 pandemic.⁸²¹⁷

of Economy Tatiana Clouthier and American Secretary Gina Raimondo both discussed and shared ideas in making HLED a bilateral platform which will improve post-pandemic recovery.⁸²¹⁸

Mexico has fully complied with its commitment to continually share timely, transparent and standardized data and information by consistently convening with representatives from other countries in order to discuss matters concerned with the pandemic.

Thus, Mexico receives a score of +1.

Analyst: Phoebe Han

Russia: 0

Russia has partially complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 24 November 2020, the Russian Direct Investment Fund, which is the national sovereign wealth fund, published standardized data and information on the efficacy of the COVID-19 vaccine with a reported a 95 per cent efficacy of the Sputnik V vaccine on the 42nd day following first injection.⁸²¹⁹

On 12 December 2020, Russia's Federal State Statistic Service reported that the official total death toll from the virus is 57,000. However, on 28 December 2020, Russia's Federal State Statistic Service reported that the number of deaths from all causes recorded between January 2020 and November 2020 was 229,700 higher than in 2019. At a press conference on the same day of 28 December, Russia's deputy prime minister admitted that "more that 81 per cent of increase in mortality over this period is due to COVID-19" which would put the number of deaths at 186,000 – almost triple of what was originally reported.⁸²²⁰

On 5 February 2021, Russia attended the Eurasian Intergovernmental Council Meeting with Armenia, Belarus, Kazakhstan, Kyrgyzstan, Cuba, Moldova and Uzbekistan. Russia promoted the use of the Travelling Without COVID-19 pilot project, encouraging the expansion beyond Armenia, Belarus and Russia.⁸²²¹

On 8 February 2021, there was a discrepancy recorded between statistics of COVID-19 related deaths stated by the Russia's Ministry of Health and Russia's Federal State Statistic Service (Rosstat). Specifically, the health ministry has been reporting a much lower death toll than Rosstat. While the Ministry of Health reported a total death toll of 78,687 from the beginning of the pandemic up to February 2021, Rosstat reported a total of 162,429 COVID-19 related deaths for 2020 alone.⁸²²²

On 9 February 2021, Russia met with Tajikistan for its 17th Intergovernmental Commission on Economic Cooperation. Russia promoted the Travelling Without COVID-19 application and offered Tajikistan the opportunity to take part. Furthermore, Russia agreed to visit Tajikistan to assess the

situation and “prepare a report for the emergency response centre on preventing the import and spread of the coronavirus infection in Russia.”⁸²²³ The Travelling Without COVID-19 mobile app allows users to store the results of their tests and QR codes and “is designed for those with a negative result in a coronavirus test while crossing the Russian state border at a number of checkpoint” to help Eurasian Economic Union “citizens move between countries while ensuring compliance with the current requirements.”⁸²²⁴

On 28 April 2021, Russia met with Kazakhstan to discuss the bilateral relationship. Among other topics, they discussed the joint COVID-19 response efforts, as well as the joint production of the Sputnik V vaccine at the Karaganda Pharmaceutical Factory in Kazakhstan.⁸²²⁵

On 30 April 2021, Prime Minister Mikhail Mishustin spoke at the Eurasian Intergovernmental Council. Prime Minister Mishustin stated that “We need joint systemic measures that will make it possible to contain the infection. As we have repeatedly noted, the user-friendly and reliable mobile app called Travelling without COVID-19 has already been launched. Negative COVID-19 test results are uploaded from certified laboratories. Our citizens can therefore show these test results when entering any specific country. So far, Armenia, Belarus, Kyrgyzstan and Russia are actively involved in the project. We hope that Kazakhstan will join us soon. It is important to expand the app by including vaccination data. I believe that its wide-scale use will make it possible to more quickly resume the safe passenger traffic that our citizens need.”⁸²²⁶

On 12 May 2021, Russia met with Turkey to discuss strengthening their cooperation on all fronts. Russia invited Turkey to use the Russian supported, Eurasian Economic Union created Travelling without COVID-19 digital platform pilot program. The program will allow citizens of participating states to enter Russia in a simplified and streamlined way, ensuring safety of public travel.⁸²²⁷

On 24 July 2021, the Ministry of Health updated its recommendations on vaccinations, in particular, stating that Sputnik V can be used without restrictions by all cancer patients who complete their course of treatment.⁸²²⁸

On 9 September 2021, President Vladimir Putin attended the 8th BRICS Summit in New Delhi. The leaders at the Summit emphasized the importance of global vaccine equity and support the establishment of a BRICS Integrated Early Warning System to prevent mass infectious disease risks

for identifying future pandemics.⁸²²⁹ The need for this system was based on satisfaction within intra-BRICS cooperation throughout the pandemic.⁸²³⁰

Russia has partially complied with its commitment to continually share timely, transparent and standardized data and information. Russia has been sharing monthly data on COVID-19 outbreaks and data on the efficacy of the Sputnik V vaccine. However, occasional discrepancies have been recorded between Russian healthcare information sources thus putting the reliability of some of the data shared under question.

Thus, Russia receives a score of 0.

Analyst: Arina Mnatsakanyan

Saudi Arabia: 0

Saudi Arabia has partially complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 14 December 2020, Foreign Minister Faisal bin Farhan Al Saud and South African Minister of International Relations and Cooperation Naledi Pandor engaged in bilateral discussions, including their respective countries' response to the COVID-19 pandemic.⁸²³¹ Saudi Arabia has partially complied with its commitment through its communications with South Africa to share experiences in the face of the COVID-19 pandemic, but has not taken substantial action to share timely, transparent and standardized data and information.

Thus, Saudi Arabia receives a score of 0.

Analyst: Dre Daley

South Africa: +1

South Africa has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 3 December 2020, President Cyril Ramaphosa shared effective policy approaches at the United Nations General Assembly that have helped South Africa delay transmission of COVID-19 and prepared health facilities, including emergency relief measures for individuals, households, and companies. President Ramaphosa also reaffirmed the importance of UN member states in working with the World Health Organization to ensure equity in vaccine access.⁸²³²

On 14 December 2020, Minister of International Relations and Cooperation Naledi Pandor and Saudi Arabian Foreign Minister Faisal bin Farhan Al Saud engaged in bilateral discussions, including their respective countries' response to the COVID-19 pandemic, with South Africa specifically sharing a response from health and economic perspectives.^{8233,8234}

On 12 January 2021, Minister Pandor and Algerian Minister of Foreign Affairs Sabri Boukadoum exchanged experiences of the COVID-19 pandemic in Africa and efforts to ensure an effective and efficient response in the continent and also at the national level.⁸²³⁵

On 27 January 2021, President Ramaphosa shared that South Africa was able to ensure social distancing by promoting public health measures based on individual behaviour and regulatory strategies, such as lockdowns, at the African Coronavirus COVID-19 Vaccine Financing and Deployment Strategy Webinar.⁸²³⁶

On 24 February 2021, the Department of Health announced that the South African government has been working with local scientists from the KwaZulu-Natal Research Informatics and Sequencing Programme (KRISP). KRISP discovered that the 501Y.V2 variant of the SARS-CoV-2 coronavirus has higher efficacy to infect humans, which affects the vaccination process as the variant continues to spread.⁸²³⁷

On 28 May 2021, President Ramphosa and French President Emmanuel Macron held a Joint Communiqué and exchanged views on impacts of the COVID-19 pandemic, concluding that the increase of global vaccine production and accessibility to vaccines is necessary to combat the pandemic.⁸²³⁸

On 1 June 2021, the BRICS Ministers of Foreign Affairs/International Relations met to discuss intra-BRICS cooperation and collaboration. They expressed concern over public health and impacts of the COVID-19 pandemic and emphasized the value of bilateral and multilateral cooperation to combat the pandemic. This included better international preparedness to combat the pandemic, such as better mobilization of political support, necessary financial resources, strengthening local production, technology transfers, and equitable and affordable access to medicines, vaccines, medical equipment, diagnostics and therapeutics.⁸²³⁹

On 23 June 2021, President Ramphosa attended the Extraordinary Summit of the Heads of State and Government of the Southern African Development Community (SADC) and urged SADC member states and the international community to support a temporary waiver on the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), which is a proposal to allow more countries to produce the COVID-19 vaccine for a more efficient response.⁸²⁴⁰

On 29 June 2021, Minister Pandor emphasized accessibility to affordable vaccines as one of the most important priorities in combatting the COVID-19 pandemic at G20 meetings in Italy.⁸²⁴¹

On 13 and 14 July 2021, Minister Pandor attended the Mid-Term Ministerial Conference of the Non-Aligned Movement stressed the need for the movement to support India and South Africa's temporary waiver proposal on provisions of the TRIPS.⁸²⁴² The Non-Aligned Movement also emphasized the need for the international community to collaborate and produce a collective policy to overcome global challenges and mitigate impacts, including the COVID-19 crisis.⁸²⁴³

On 9 September 2021, President Ramphosa attended the 8th BRICS Summit in New Delhi. The leaders at the Summit emphasized the importance of global vaccine equity and support the establishment of a BRICS Integrated Early Warning System to prevent mass infectious disease risks for identifying future pandemics.⁸²⁴⁴ The need for this system was based on satisfaction within intra-BRICS cooperation throughout the pandemic.⁸²⁴⁵

South Africa has fully complied with its commitment to continually share timely, transparent and standardized data and information. South Africa has taken steps to continually share timely, transparent, and standardized data and information through sharing COVID-19 experiences in bilateral discussions with other countries and debunking false facts with evidence.

Thus, South Africa receives a score of +1.

Turkey: +1

Turkey has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 26 November 2020, foreign affairs and health ministers of Mexico, Indonesia, Korea, Turkey and Australia (MIKTA) met to discuss ways to strengthen the global health system and co-operation and collaboration, among the five MIKTA countries, specifically regarding how to overcome the current pandemic and preventing others.⁸²⁴⁶

On 23 March 2021, Head of Health Institutes of Turkey Erhan Akdogan, stated that Turkey currently assists six coronavirus vaccine development research programs. The vaccine studies being implemented in Turkey are published and shared in scientific research studies about the vaccine programs.⁸²⁴⁷

On 6 May 2021, Turkey announced the second inactive vaccine developed by Turkey had been added to the World Health Organization's (WHO's) list of vaccines in development. The director of the Scientific and Technological Research Council of Turkey underlined that being added to the WHO's list demonstrates the transparency of the data produced by the project. Furthermore, the director stated that Turkey's COVID-19 Turkey Platform is currently working on seven vaccines.⁸²⁴⁸

On 24 May 2021, Minister of Health Fahrettin Koca attended the 74th World Health Assembly and stressed the significance of international solidarity in responded to health crises. The importance of international compliance was emphasized and Turkey's vaccination efforts for health-care workers were discussed.⁸²⁴⁹

On 25 May 2021, MIKTA [Mexico, Indonesia, the Republic of Korea, Turkey and Australia] released a statement which discussed the importance of transparent and accountable multilateral institutions to respond effectively to novel disease outbreaks and pandemics.⁸²⁵⁰

On 16 June 2021, Minister Koca held dialogue with World Health Organization Regional Director for Europe Dr. Hans Kluge where Turkey's international collaboration to support the vaccination campaign was emphasized and vaccination efforts to respond to the pandemic were discussed.⁸²⁵¹

Turkey has taken steps to achieve compliance to the continued sharing of timely, transparent and standardized information by creating vaccine agreements with other countries and has shared data with the WHO with regards to its inactive vaccine development.

Thus, Turkey receives a score of +1.

United Kingdom: +1

The United Kingdom has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 14 December 2020, the Ministry of Health in partnership with the UK organized a virtual seminar discussing vaccine distribution strategy and combating misinformation regarding COVID-19.⁸²⁵² It was the third in a series of joint events between Argentina and the UK within the Latin American and Caribbean region. Seth Berkley, CEO of GAVI, the Vaccine Alliance, spoke at the seminar to share information on the progress of COVAX, the global initiative to ensure fair and equitable access to COVID-19 vaccines.⁸²⁵³

On 20 December 2020, the World Health Organization (WHO) revealed that the United Kingdom has been sharing information about the new variant of the COVID-19 virus. The UK has conducted ongoing research about the new mutation and has been sharing the results of its studies. Prime Minister Boris Johnson revealed to the WHO that the mutated virus is 70 per cent more transmissible.⁸²⁵⁴

On 23 December 2020, Public Health England (PHE) confirmed that lateral flow devices used in mass testing are able to detect the new COVID-19 variant. A rapid evaluation with five lateral flow devices was undertaken to test whether the lateral flow devices currently in use in the UK are able to detect the new VUI 202012/01 variant. The experiment found each lateral flow device successfully detected the samples of the new variant.⁸²⁵⁵

On 26 January 2021, the UK announced it would “offer its world-leading genomics expertise to identify new variants of the virus that causes COVID-19 to countries who do not have the resources to do so.” “Countries will be offered UK capacity to analyse new strains of the virus through the launch of the New Variant Assessment Platform which will be led by [PHE] working with [National Health Service] Test and Trace and academic partners as well as the World Health Organization’s SARS-CoV-2 Global Laboratory Working Group.”⁸²⁵⁶

On 5 February 2021, the UK published data from the UK’s independent medicine regular on the routine safety monitoring and analysis of the approved COVID-19 vaccines. The report found that the vaccines meet strict regulatory standards and are very safe. The data demonstrated that there was “an overall reporting rate of 3 in 1,000 doses of vaccine administered from 9 December 2020 to 24 January 2021.”⁸²⁵⁷

On 22 February 2021, UK officials published an executive summary report sharing their response to COVID-19. The report outlines how the UK will continue to respond to the pandemic, the roadmap

for lifting lockdown measures, the vaccine strategy, the success of the vaccination rollout, and more.⁸²⁵⁸

On 22 February 2021, PHE published the first independent analysis in the UK on the Pfizer-BioNTech vaccine efficacy. The report found that the Pfizer-BioNTech vaccine provides a 70 per cent reduction in risk of catching COVID-19 after one dose, rising to 85 per cent after a second dose. The Head of Immunisation at PHE stated “This is strong evidence that the Pfizer-BioNTech vaccine is stopping people from getting infected, while also protecting cases against hospitalisation and death. We will see much more data over the coming weeks and months but we should be very encouraged by these initial findings.”⁸²⁵⁹ Furthermore, the PHE is monitoring the AstraZeneca and announced a report will be published in good time.⁸²⁶⁰

On 16 March 2021, the Minister for the Deployment of Vaccines against COVID-19 met with the Minister of Health for Argentina to discuss experiences developing and distributing the COVID-19 vaccine.⁸²⁶¹ The ministers exchanged experiences regarding postponing second doses to ensure as many people as possible are vaccinated and prioritizing by age, risk and activity.⁸²⁶² Furthermore, the UK Minister “announced that they will share more information about vaccines and the results of their strategy with Argentina in April, when they obtain more data on efficacy and safety, since they will begin to vaccinate people over 50 years of age.”⁸²⁶³

On 25 March 2021, PHE published an analysis on the impact of the COVID-19 vaccination program on preventing death and infection from SARS-CoV-2. The report found that from 8 December 2020 to end of January 2021, 4 million vaccine doses were administered to adults aged 70 and over which has prevented 6,100 deaths. PHE Head of Immunisation said “We have shown previously that the COVID-19 vaccinations are hugely effective at stopping people from getting the infection. This new analysis calculates how many lives they have saved in the first few months of the vaccine programme, and with every additional day more lives have and will be saved. The vaccines have an excellent safety record and I would encourage anyone who is offered a vaccine to take it as soon as possible. While the vaccines have a striking impact on mortality, we don’t yet know how much these vaccines will reduce the risk of you passing COVID-19 onto others. Even if you have been vaccinated, it is really

important that you continue to act like you have the virus, practise good hand hygiene and stay at home.”⁸²⁶⁴

On 30 March 2021, the UK issued a joint statement alongside Australia, Canada, Czechia, Denmark, Estonia, Israel, Japan, Latvia, Lithuania, Norway, Korea, Slovenia, and the US on the WHO COVID-19 origins study. The statement underlined the commitment of the governments to working with the WHO on data and information sharing regarding the start and spread of the COVID-19 pandemic. Furthermore, they stated that “With all data in hand, the international community may independently assess COVID-19 origins, learn valuable lessons from this pandemic, and prevent future devastating consequences from outbreaks of disease...We will work collaboratively and with the WHO to strengthen capacity, improve global health security, and inspire public confidence and trust in the world’s ability to detect, prepare for, and respond to future outbreaks.”⁸²⁶⁵

On 18 April 2021, the UK announced that a joint hygiene campaign between UK Aid and Unilever has reached 1 billion people. One aspect of the campaign is to “run information campaigns across TV, radio and social media in 37 countries to increase understanding of the benefits of handwashing with soap regularly and disinfecting surfaces to prevent the spread of COVID-19.”⁸²⁶⁶

On 28 April 2021, PHE published a study on household transmission of COVID-19. The study found that one dose of a COVID-19 vaccine reduced household transmission by up to half.⁸²⁶⁷

On 4 May 2021, the UK published its fourth round of the Schools Infection Survey to study the infections of COVID-19 in schools. The latest report found that there was a significant reduction in those testing positive for COVID-19 in schools, indicating “the importance of public health measures in schools for reducing transmission” and showing that “risk of transmission in schools is low.”⁸²⁶⁸

On 10 May 2021, the UK published an analysis on the impacts of the COVID-19 in protecting against death and hospitalization from COVID-19. The analysis found that those who get a single dose of the AstraZeneca vaccine have 80 per cent lower risk of death from COVID-19 than those who do not get vaccinated. The report also found that protection against death from the Pfizer-BioNTech vaccine was 97 per cent after two doses, up from 8- per cent after one dose.⁸²⁶⁹

On 11 May 2021, UK Ambassador to the World Trade Organization (WTO) Simon Manley spoke at the WTO General Council. Ambassador Manley stated “A balanced and effective intellectual property regime has proved invaluable in this crisis, as in others, in supporting innovation and supporting collaboration, as well as ensuring the results of that innovation, including safe and effective diagnostics, vaccines and therapeutics can reach those who need them. The UK stands ready to engage in further evidence-based discussions and is committed to finding solutions to these

issues. Meanwhile, we are delighted to see the WTO bringing together key stakeholders to look carefully at all the relevant trade, health and intellectual property elements so that we can support the development, production, and equitable access to these vaccines. We salute the role played by the Director General in this regard.”⁸²⁷⁰

On 14 May 2021, the PHE published its analysis on the impact of the COVID-19 vaccination program on deaths and hospitalizations. The analysis indicated that in England up to the end of April the vaccine program prevented 11,700 deaths in those 60 and older and at least 33,000 hospitalizations in those 65 and older. The PHE stated that “There is now clear and increasing evidence that vaccines help to reduce transmission, therefore it is likely that an even higher number of deaths and hospitalisations have been prevented by the vaccination programme.”⁸²⁷¹

On 15 May 2021, the UK announced it would host the world’s first Global Vaccine Confidence Summit on 2 June 2021. The purpose of the summit will be to “look at innovative solutions to tackle misinformation and support confidence in life-saving COVID-19 vaccines around the world.”⁸²⁷²

On 26 August 2021, the government announced it would ease its data-sharing rules following its departure from the European Union last year.⁸²⁷³ The new agreement will relax privacy laws and will transfer greater data internationally.⁸²⁷⁴ A more transparent data-sharing system will allow for improved technological and scientific research in light of the COVID-19 pandemic.⁸²⁷⁵ The government aims to publicly share data from x-rays images to aid researchers in their efforts to find a solution.⁸²⁷⁶

The United Kingdom has taken significant steps for the continued sharing of timely, transparent and standardized data and information by constantly publishing reports on the efficacy and impacts of the Pfizer-BioNTech and AstraZeneca vaccines. Furthermore, the United Kingdom has worked with other countries to share data and information, as well as exchange experiences during the COVID-19 pandemic.

Thus, the United Kingdom receives a score of +1.

United States: +1

The United States has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 18 December 2020, the US participated in the 14th regular multilateral teleconference with Australia, Japan, Korea, New Zealand and Vietnam. The participants “exchanged views on facilitating regional cooperation on COVID-19 response, developing and distributing vaccines, resuming economic activities, and facilitating international travel.”⁸²⁷⁷

On 15 January 2021, the US announced it would be “sharing new information concerning the activities inside China’s government laboratories in 2019” with the World Health Organization (WHO), in light of WHO investigative team’s arrival in China.⁸²⁷⁸

On 20 January 2021, the Integrated Health Services Agency, led by Management Sciences for Health, with support from the United States Agency for International Development through the United States Government’s Malaria Initiative, provided financial and technical support to Benin’s health zones when COVID-19 began to hit Benin. The goal of this initiative was to ensure that Benin had continued access to malaria interventions and essential health services throughout the pandemic.⁸²⁷⁹

On 20 January 2021, the United States sent a letter to the United Nations Secretary-General Antonio Guterres to inform of the President’s decision to reverse the withdrawal of the country from the WHO. This decision ensures that the United States will be able to continue to support global vaccination, research, and development for tests, treatments and vaccines.⁸²⁸⁰

On 21 January 2021, the United States Congress enacted the Global Health Security Act of 2021. This bill directed the president to form a Global Health Security Agenda Interagency Review Council to implement the Global Health Security Agenda. This review council will implement the Global Health Security Agenda, an international initiative to address global infectious disease threats.⁸²⁸¹

On 11 February 2021, the United States Congress passed the Robust International Response to Pandemic Act. This act outlined how the United States would aid in the international response to a pandemic. This document is aimed at outlining how wealthier countries will provide aid to developing countries through implementing protocols and transparency mechanisms to ensure allocations are used for public good.⁸²⁸²

On 19 February 2021, the US participated in the 3rd Quadrilateral Foreign Ministers' Meeting with Japan, India and Australia. The participants pledged to deepen cooperation on the response to the COVID-19 pandemic, as well as cyber and critical technologies to countering disinformation.⁸²⁸³

On 30 March 2021, the US issued a joint statement alongside Australia, Canada, Czechia, Denmark, Estonia, Israel, Japan, Latvia, Lithuania, Norway, Korea, Slovenia, and the US on the WHO COVID-19 origins study. The statement underlined the commitment of the governments to working with the WHO on data and information sharing regarding the start and spread of the COVID-19 pandemic. Furthermore, they stated that “With all data in hand, the international community may independently assess COVID-19 origins, learn valuable lessons from this pandemic, and prevent future devastating consequences from outbreaks of disease...We will work collaboratively and with the WHO to strengthen capacity, improve global health security, and inspire public confidence and trust in the world’s ability to detect, prepare for, and respond to future outbreaks.”⁸²⁸⁴

On 2 April 2021, the planning of the President’s Emergency Plan for Aids Relief (PEPFAR) Country/Regional Operation Plan 2021 resumed. PEPFAR is committed to supporting every PEPFAR country and region by ensuring transparent, data-driven and collaborative plans. By collaborating with partners and communities around the globe, PEPFAR will ensure there is no disruption in HIV services to PEPFAR-supported countries.⁸²⁸⁵

On 5 May 2021, the US announced it would “support the temporary waiver of intellectual property on COVID-19 vaccines...and work with the private sector and other partners to expand vaccine manufacturing and distribution.”⁸²⁸⁶

On 16 March 2021, Secretary of State Anthony Blinken and Japanese Minister for Foreign Affairs Toshimitsu Motegi reaffirmed the importance of the United States-Japan alliance during Secretary Blinken’s visit to Tokyo. Specifically, they discussed how the United States and Japan will closely collaborate and respond to the COVID-19 pandemic to further assist global partners in the fight against the pandemic. Both countries will strongly support the multilateral efforts of the World Health Organization, the Global Alliance for Vaccines and Immunizations, and COVAX, while seeking greater opportunities for joint health security cooperation for the Indo-Pacific region.⁸²⁸⁷

On 20 May 2021, the Congress introduced the “Global Pandemic Prevention and Biosecurity Act” which will establish a global task force to conduct and share research regarding zoonotic diseases. This global task force will work towards supporting improved community health, sustainable agriculture, the safety of livestock, and forest management while supporting foreign governments to

reduce the risk of zoonotic spillover events between animals and humans through sharing research and data from United States health models.⁸²⁸⁸

On 11 June 2021, the United States and the G7 members developed a plan to “Defeat the COVID-19 Pandemic in 2022 and Prevent the Next Pandemic.” This plan outlines the steps for ending the COVID-19 pandemic in 2022, in addition to planning steps to prevent the possibility of the next pandemic. These steps include working internationally develop a global health security financing mechanism and to transform disease surveillance and early warning through collaboratively researching and establishing a global disease surveillance network, internationally.⁸²⁸⁹

On 27 July 2021, Secretary of State Blinken travelled to New Delhi, India to reaffirm the United States’ commitment to strengthening the partnership and cooperation between the two countries. The two countries made plans to improve their collaboration on a range of issues, including international and national health and combatting the COVID-19 pandemic. This will ensure the sharing of health information and research between the two countries.⁸²⁹⁰

The United States has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information through the consistent sharing of data and information in relation to the COVID-19 pandemic.

Thus, the United States receives a score of +1.

Analyst: Hannah Story-Korman

European Union: +1

The European Union has fully complied with its commitment to the continued sharing of timely, transparent, and standardized data and information.

On 7 December 2020, the European Centre for Disease Prevention and Control (ECDC) partnered with the Africa Centres for Disease Control and Prevention (Africa CDC), which marked the beginning of the EU’s four-year project: “EU for health and security in Africa: ECDC for Africa CDC.”⁸²⁹¹ The project came into effect on 1 January 2021. Cooperation between the EU and the Africa CDC serves to bolster both Europe and Africa’s respective global health responses in the event of future crises. Through the sharing of health information and data, both the ECDC and Africa CDC are working to bolster their “surveillance of infectious diseases, data sharing, and early detection of threats” in order to build up their preparedness for other global health emergencies.⁸²⁹²

The project is funded through the European Development Fund, with the ECDC contributing EUR9 million, as well as a EUR1 million grant to the Africa CDC.⁸²⁹³

On 14 December 2020, the European Commission launched the Re-open EU app, which provides regular, comprehensive and continual updates on COVID-19 related issues and other health and safety measures in EU member countries.⁸²⁹⁴ The free app offers information in all 24 official EU languages and shares data collected by the ECDC.⁸²⁹⁵

On 23 December 2020, the European Commission released an impact assessment concerning the establishment of a European Health Data Space. It is part of a broader EU “Data Strategy” initiative, allowing governments, public authorities and other sectors to access centralized data and facilitate data sharing across the EU. This initiative focuses on the accessibility and sharing of health data in order to improve national healthcare efforts.⁸²⁹⁶

On 1 January 2021, the EU and UK’s Trade and Cooperation Agreement went into effect, following the UK’s formal exit from the EU. This agreement included several provisions pertaining to information sharing, particularly during times of serious cross-border health risks, such as the COVID-19 pandemic. In such an event, the UK and EU are able to exchange health information and data as well as coordinate public health responses. The agreement also allows for collaboration between the UK and the ECDC to share relevant scientific information.⁸²⁹⁷

On 20 January 2021, the EU and the Pan American Health Organization/World Health Organization (PAHO/WHO) donated computer and electronic equipment to Belize. The equipment will be used for better data and information collection, which then can be shared with other countries and the PAHO/WHO.⁸²⁹⁸

On 19 March 2021, the ECDC and WHO/Europe launched the first joint COVID-19 weekly bulletin, compiling COVID-19 surveillance and vaccination data. This cooperative effort between ECDC and WHO/Europe publicizes case, death, vaccination and hospitalization data from individual countries in a centralized manner.⁸²⁹⁹

On 26 March 2021, the EU4Health program came into force, in an effort to support the EU's COVID-19 recovery and pandemic preparedness plans.⁸³⁰⁰ EU4Health provides unprecedented funding to EU member governments, health organizations as well as non-governmental organizations for the 2021-2027 period.⁸³⁰¹ The program seeks to promote collaboration between member states concerning both prevention and response to healthcare crises. EU4Health allows the EU to monitor health threats and share information gathered through this surveillance with member states.⁸³⁰² It also seeks to stimulate the digital transformation of health systems in order to facilitate cross-border flows of information and data.⁸³⁰³ In total, the program aims to invest EUR5.1 billion to promote secure data access and sharing and prevent another global crisis like the COVID-19 pandemic.⁸³⁰⁴

On 30 March 2021, President of the European Council Charles Michel joined other global leaders in calling for an international treaty on pandemic prevention and preparedness. Such a treaty would allow for equitable and universal access to healthcare related solutions, information and data by enhancing global cooperation.⁸³⁰⁵

On 6 May 2021, the EU announced its support for the India and South Africa proposal to temporarily eliminate intellectual property rights on vaccines. The argument for the temporary elimination of intellectual property rights on vaccines is that “rules requiring countries to protect patents and other forms of intellectual property are an obstacle to increasing the production of vaccines and other products needed to tackle the pandemic.”⁸³⁰⁶

On 22 June 2021, the European Parliament and Council reached a provisional agreement that strengthens the health technology assessment cooperation among 27 member states.⁸³⁰⁷ The new regulation is said to allow national healthcare providers to make evidence-based decisions and offer better care thanks to the availability of innovative health technologies.⁸³⁰⁸

On 29 June 2021, the European Commission adopted a Recommendation which seeks to facilitate cross-border electronic health record exchange.⁸³⁰⁹ This Recommendation would allow for secure

access to health data, regardless of which EU country citizens find themselves in, thereby advancing digital healthcare cooperation in Europe.⁸³¹⁰

On 23 July 2021, the European Council reached an agreement to draft proposals that might help strengthen the role of the European Centre for Disease Prevention and Control (ECDC) as well as amend an EU law on cross-border health threats.⁸³¹¹ These changes to both the ECDC and the existing law would allow for a coordinated response to new communicable diseases like COVID-19.⁸³¹²

On 6 September 2021, European Commissioner for Health and Food Safety Stella Kyriakides reaffirmed the importance of the One Health approach among member countries and stressed the importance of global coordination, the sharing of information through strengthening research and faster detection.⁸³¹³ She also claimed that the European Health Emergency Preparedness and Response Authority would provide an improved health security structure for the EU, which would address the weakness brought to light by the COVID-19 pandemic and emphasize data and information sharing as medical countermeasures.⁸³¹⁴

The European Union has fully complied with this commitment and taken steps to promote the continued sharing of timely, transparent, and standardized data and information by implementing new initiatives such as the EU4Health program and the establishment of the EHDS to better prepare countries' global health responses. The EU has also partnered with actors such as Africa CDC and WHO Europe to promote this timely and continue sharing of data and information amongst member countries and abroad.

Thus, the European Union receives a score of +1.

16. Health: Vaccine Distribution

“We will spare no effort to ensure their [vaccines] affordable and equitable access for all people, consistent with members’ commitments to incentivize innovation. In this regard, we fully support all collaborative efforts, especially the Access to COVID-19 Tools Accelerator (ACT-A) initiative and its COVAX facility, and the voluntary licensing of intellectual property.”

Background

G20 leaders made their first commitments on health in Brisbane in 2014 in response to the outbreak of Ebola virus in Guinea, Liberia and Sierra Leone. They approved a joint statement on Ebola threat and pledged to “do what is necessary to ensure the international effort can extinguish the outbreak” and urged the World Bank Group and International Monetary Fund to “continue their strong support for the affected countries.”^{8315,8316} The G20 members pledged to fully implement the World Health Organization’s (WHO) International Health Regulations (IHR) addressing “longer-term systemic issues and gaps in capability, preparedness and response capacity that expose the global economy to the impacts of infectious disease.”⁸³¹⁷

Under Germany’s G20 presidency in 2017, G20 health ministers met for the first time. They acknowledged the role of the IHR and agreed to act “accordingly with our obligations under the IHR

⁸³¹⁶ G20 Leaders’ Brisbane Statement on Ebola, G20 Information Centre (Toronto) 15 November 2014. Access Date:29 May 2021. <http://www.g20.utoronto.ca/2014/2014-1115-ebola.html>

⁸³¹⁷ G20 Leaders’ Brisbane Statement on Ebola, G20 Information Centre (Toronto) 15 November 2014. Access Date:29 May 2021. <http://www.g20.utoronto.ca/2014/2014-1115-ebola.html>

and support the leadership and coordination of WHO in the event of health crises of international concern.”⁸³¹⁸ G20 members agreed to “strengthen the national and, where applicable, regional monitoring and surveillance of both antimicrobial resistance and the consumption of antibiotics”⁸³¹⁹ within their own jurisdictions. At the Hamburg Summit the G20 leaders discussed antimicrobial resistance (AMR), acknowledged its “growing threat to public health and economic growth”⁸³²⁰ and pledged to “strengthen public awareness, infection prevention and control and improve the understanding of the issue of antimicrobials in the environment.”⁸³²¹

In 2018 at Buenos Aires the G20 leaders once again acknowledged “the need for further multi-sectoral action to reduce the spread of AMR”⁸³²² and extended the health-related agenda of the G20 by pledging to “tackle malnutrition, with a special focus on childhood overweight and obesity, through national, community-based and collaborative multi-stakeholder approaches.”⁸³²³ In addition, the G20 leaders draw attention to provision of “better health care” and agreed to “improve [health care] quality and affordability to move towards Universal Health Coverage.”⁸³²⁴

In 2019 at Osaka G20 leaders reaffirmed the need for stronger health systems providing cost-effective and evidence-based intervention to achieve better access to health care and to improve its quality and affordability to move towards universal health coverage (UHC), in line with their national contexts and priorities.⁸³²⁵ They also promised to continue to strengthen core capacities required by IHR for preventing, detecting and responding to public health emergencies, recognized the WHO’s critical role, and committed to ending HIV/AIDS, tuberculosis and malaria.⁸³²⁶

In 2020 COVID-19 outbreak became the most important issue for G20 cooperation. In their statement made at Extraordinary G20 Leaders’ Summit on 26 March 2020, members pledged to “take all necessary health measures and seek to ensure adequate financing to contain the pandemic and protect people, especially the most vulnerable.”⁸³²⁷ They promised to “share timely and transparent information; exchange epidemiological and clinical data; share materials necessary for research and development; and strengthen health systems globally, including through supporting the

full implementation of the WHO International Health Regulations (IHR 2005).”⁸³²⁸ Leaders committed to further strengthen the WHO’s mandate in coordinating the international fight against the pandemic and work together and with stakeholders to close the financing gap in the WHO Strategic Preparedness and Response Plan. They also promised “to strengthen national, regional, and global capacities to respond to potential infectious disease outbreaks by substantially increasing our epidemic preparedness spending.”⁸³²⁹ G20 leaders pledged to work together to increase research and development funding for vaccines and medicines, leverage digital technologies, and strengthen scientific international cooperation.⁸³³⁰

In November 2020 G20 leaders adopted Riyadh Summit Declaration. In it they committed to advancing global pandemic preparedness, prevention, detection, and response and reaffirmed commitment to full compliance with the International Health Regulations (IHR 2005).⁸³³¹ They also promised to spare no effort to ensure affordable and equitable access to vaccines for all people, consistent with members’ commitments to incentivize innovation and supported all collaborative efforts, especially the Access to COVID-19 Tools Accelerator (ACT-A) initiative and its COVAX facility, and the voluntary licensing of intellectual property.⁸³³²

Commitment Features

G20 leaders made a commitment to ensure vaccines affordable and equitable access for all people, consistent with members’ commitments to incentivize innovation and supported all collaborative efforts, especially the Access to COVID-19 Tools Accelerator (ACT-A) initiative and its COVAX facility, and the voluntary licensing of intellectual property.

The commitment has two part: ensure equitable and affordable access for all people inside the country and taking actions at international level to support others.

Domestic Actions

G20 members should ensure universal access to vaccines for its population. For this country-wide vaccination programs should be launched, the supply of vaccines ensured either by developing, producing and distributing own vaccines or purchasing existing ones.

International Actions

G20 should take actions to support global efforts to ensure access to vaccines. This can be done by supporting Access to COVID-19 Tools Accelerator (ACT-A) initiative (through financing, collaboration, personnel development, exchange of best practices) and specifically COVAX facility.

Its goal is to help end the acute phase of the global pandemic by the end of 2021 by providing access to at least 2 billion doses of safe and effective COVID-19 vaccines to the most vulnerable in all participating economies.

Scoring Guidelines

| | |
|----|---------------------------------------------------------------------------------------------------------------------------------|
| -1 | G20 member did not take any actions to ensure affordable and equitable access to vaccines |
| 0 | G20 member took measures to ensure access to vaccines on domestic level but no actions on international level were taken |
| +1 | G20 member took measures to ensure access to vaccines both on national level and through international actions and partnerships |

*Compliance Director: Alexander Ignatov
Lead Analyst: Irina Popova*

Argentina: 0

Argentina has partially complied with the commitment to ensure affordable and equitable access to vaccines.

On 28 March 2021, Argentina received its first 218,000 doses of COVID-19 vaccines through the COVAX Facility. The shipment of AstraZeneca/Oxford vaccines, made by SK Bioscience of Korea, arrived at Ministro Pistarini International Airport in Ezeiza, Buenos Aires.⁸³³³

On 31 March 2021, Chief of the Private Office of the Foreign Ministry Guillermo Justo Chaves met with European Union ambassador to Argentina Aude Maio-Coliche. They agreed on enhancing cooperation and multilateralism to encourage a more equitable supply of vaccine doses among countries, as well as sharing of experiences and knowledge regarding COVID-19. They also agreed that, in a context of the global vaccine shortage and the demand to speed up the vaccination process, the vaccine must be a universal public good. Thus, greater cooperation between countries and decisive action to enhance multilateralism are key. They also discussed the possibility of laboratories granting countries licenses for vaccine manufacturing and the idea proposed by President Alberto Fernández and French President Emmanuel Macron that patents be waived in that regard.⁸³³⁴

On 21 April 2021, at the 27th Ibero-American Summit of Heads of State and Government Andorra 2020, held under the motto “Innovation for Sustainable Development – 2030 Goals: Ibero-America Faces Coronavirus Challenge,” President Fernández called on the region’s countries to act “jointly in solidarity” in order to “guarantee equitable production and distribution of vaccines,” and to find innovative mechanisms to facilitate access to external financing for middle-income countries.⁸³³⁵

On 6 May 2021, at the General Council of the World Trade Organization (WTO), Argentina ratified its view that COVID-19 vaccines must be universal public goods so that all countries have equitable access to them and to medical innovations developed to fight the pandemic. Argentina endorsed the proposal by South Africa and India at the WTO Council for Trade-Related Aspects of Intellectual

⁸³³⁴ Argentina and EU agree on need for fairer and more equitable global distribution of vaccines, Government of Argentina (Buenos Aires) 31 March 2021. Access Date: 11 May 2021. <https://cancilleria.gob.ar/en/announcements/news/argentina-and-eu-agree-need-fairer-and-more-equitable-global-distribution>

⁸³³⁵ Alberto Fernández urges equitable production and distribution of Covid-19 vaccines, Government of Argentina (Buenos Aires) 21 April 2021. Access Date: 11 May 2021. <https://cancilleria.gob.ar/en/announcements/news/alberto-fernandez-urges-equitable-production-and-distribution-covid-19-vaccines>

Property Rights to suspend intellectual property rights for medical products, including vaccines, that are necessary for the prevention and treatment of COVID-19.⁸³³⁶

During the compliance period Argentina took actions to provide access to vaccines domestically and expressed readiness and support for international action, but no concrete actions to promote access to vaccines internationally were registered yet.

Thus, Argentina receives a score of 0.

Analyst: Irina Popova

Australia: +1

Australia has fully complied with the commitment to ensure affordable and equitable access to vaccines.

On 30 November 2020, the Australian government provided more than AUD4 million for research into COVID-19 and the country's response to the pandemic. The funding will support the development of rapid response digital health infrastructure and strategies to improve community engagement and responsiveness to pandemic information.⁸³³⁷

On 22 December 2020, the Australian government provided AUD172.5 million for the Medical Research Future Fund. The funding focuses on areas of unmet need or potential for transforming health care and its outcomes.⁸³³⁸

On 4 January 2021, the Australian government provided AUD10.1 million for clinical trials related to COVID-19. The funding will support six promising Australian innovations, including two "next generation" vaccines and customised 3D-printed face guards.⁸³³⁹

On 25 January 2021, the Pfizer/BioNTech COVID-19 vaccine was provisionally approved by the Australian government for use in Australia. This means that Pfizer's vaccine will be provided for free to all Australian residents.⁸³⁴⁰

On 29 January 2021, the campaign to encourage Australians to get their free COVID-19 vaccines started. The campaign will run across a variety of mediums, including television, radio, press, digital, social, mobile, search and out of home.⁸³⁴¹

On 2 February 2021, Prime Minister Scott Morrison announced AUD1.9 billion to go towards the COVID-19 vaccine rollout. The funding will help hospitals, general practitioners and pharmacies on the frontline deliver vaccinations to everyone in Australia.⁸³⁴²

⁸³³⁶ Argentina reiterates that vaccine patents must be waived, Government of Argentina (Buenos Aires) 6 May 2021. Access Date: 11 May 2021. <https://cancilleria.gob.ar/en/announcements/news/argentina-reiterates-vaccine-patents-must-be-waived>.

On 22 February 2021, COVID-19 vaccinations began in Australia. The first people to receive the vaccines will be priority groups who are at a higher risk of COVID-19. The government also launched the COVID-19 vaccine eligibility checker to help people find more information about during which phase they would be able to receive the vaccine.⁸³⁴³

On 26 February 2021, the Australian Government announced it would invest AUD100 million into the development of new technologies to improve the diagnosis and treatment of stroke, epilepsy and lung disease, including COVID-19.⁸³⁴⁴

On 12 March 2021, Australia announced it has contributed AUD80 million to the COVAX Facility that has started rolling out the first round of doses of COVID-19 vaccines to Australia's Pacific and Southeast Asian neighbours (Fiji, Cambodia, Indonesia, Philippines, etc.).⁸³⁴⁵

On 13 March 2021, Australia, along with the United States, Japan and India, pledged to provide up to one billion vaccine doses to developing countries by the end of 2022 through financing vehicles that allow a substantial increase in production capacity in India.⁸³⁴⁶

On 17 March 2021, Australia announced that it has agreed to partner with Papua New Guinea on a support package which will include the supply of 8,000 AstraZeneca COVID-19 vaccines, the Australian Government will also make a formal request to AstraZeneca and the European Authorities for one million doses of Australia's contracted supplies to gift to Papua New Guinea. Australia will also provide new targeted support.⁸³⁴⁷

On 10 April 2021, Australia announced that it will supply at least 10,000 AstraZeneca COVID-19 (manufactured in Australia) doses per week to the neighbouring countries. Australia will also continue to support the Government of Papua New Guinea in its immediate response to its outbreak, helping to vaccinate frontline healthcare and other essential workers.⁸³⁴⁸

On 14 April 2021, it was announced that an Australian Medical Assistance Team (AUSMAT), comprising a senior epidemiologist and health support officer arrived in Timor-Leste. The team will assist public health needs assessments.⁸³⁴⁹

On 7 July 2021, Australia announced health support to Indonesia. The package includes AUD12 million for oxygen-related and other medical equipment, including 1000 ventilators, up to 700 oxygen

concentrators, more than 170 oxygen cylinders and a range of consumables and other medical supplies, over 40,000 rapid-antigen test kits and 2.5 million AstraZeneca vaccine doses in 2021.⁸³⁵⁰

On 14 July 2021, Australia announced further support to Vietnam's national vaccine rollout by providing 1.5 million AstraZeneca COVID-19 vaccine doses in 2021. These doses will complement Australia's existing AUD40 million package through which we are working in partnership with Vietnam on its COVID-19 vaccine rollout.⁸³⁵¹

On 20 August 2021, Prime Minister Scott Morrison announced, that the COVID-19 Pfizer vaccines would be available starting from 30 August 2021 for people aged between 16 and 39.⁸³⁵²

On 27 August 2021, the Australian Technical Advisory Group on Immunisation issued a recommendation to include "all individuals from 12 years of age" in the national COVID-19 vaccination efforts.⁸³⁵³

On 14 September 2021, the Department of Health announced the launch of the COVID-19 vaccination for children aged 12 and older.⁸³⁵⁴

Australia has taken actions to ensure access to vaccines on domestic level and on international level.

Thus, Australia receives a score of +1.

Analysts: Anastasiya Kirillova and Andrei Sakharov

Brazil: 0

Brazil has partially complied with the commitment to ensure affordable and equitable access to vaccines.

On 6 February 2021, the Ministry of Foreign Affairs and the Ministry of Health announced the arrival of the first batch of active pharmaceutical ingredients for the AstraZeneca vaccine against COVID-19 in Brazil. Originating in China, the batch with about 90 liters of the ingredients will allow the production of 2.8 million doses of vaccine in the national territory. The vaccines to be produced in Bio-Manguinhos/Fiocruz will be distributed under the National Immunization Program.⁸³⁵⁵

On 9 February 2021, the National Health Surveillance Agency decided that vaccines purchased by the Ministry of Health through COVAX are exempted from the requirement for registration and temporary authorization for emergency use.⁸³⁵⁶

On 21 March 2021, Brazil received 1,022,400 doses of COVID-19 vaccine through COVAX, a global effort by the Coalition for Epidemic Preparedness Innovations, the Global Alliance for Vaccines and Immunization, the United Nations Children’s Fund, the World Health Organization, and the Pan American Health Organization (PAHO). The PAHO Revolving Fund, responsible for the procurement of vaccines against COVID-19 for the countries in the Americas, via the COVAX Mechanism, sent to Brazil the 1,022,400 doses of the AstraZeneca/Oxford vaccine – manufactured by SK Bioscience in Korea. The vaccines will be distributed according to the Brazilian Vaccination Plan.⁸³⁵⁷

On 30 April 2021, the National Health Surveillance Agency approved the production of the active pharmaceutical ingredient of the COVID-19 vaccine within the scope of technology transfer from AstraZeneca to the Instituto de Tecnologia em Immunobiologicos Bio-Manguinhos, from the Oswaldo Cruz Foundation.⁸³⁵⁸

On 7 May 2021, Brazilian government welcomed the willingness of the United States to negotiate, within the scope of the World Trade Organization (WTO), a multilateral solution that contributes to the fight against COVID-19, as well as to intensify its efforts – together with the private sector and other interested parties – to increase the production and distribution of inputs and vaccines globally. Brazil stated that it shares the objective to provide safe and efficient vaccines to as many people as possible in the shortest possible time. The Brazilian government promised deepen, with flexibility, pragmatism and responsibility, consultations with all its international partners, as well as with the private sector, to develop the multilateral understandings necessary for the rapid and safe production and distribution of vaccines. In particular, Brazil will discuss, in greater depth, with the United States, its new position and its practical implications for facilitating ample and urgent access to vaccines and medicines in the fight against COVID-19. At the WTO, Brazil promised to continue to work with Director-General Ngozi Okonjo-Iweala and with all the members to build a consensual and cooperative solution that will make it possible to accelerate the production and dissemination of vaccines against COVID-19 in the smallest possible term.⁸³⁵⁹

During the compliance period Brazil took actions to provide access to vaccines domestically and expressed readiness and support for international action, but no concrete actions to promote access to vaccines internationally were registered yet.

Thus, Brazil receives a score of 0.

Canada: +1

Canada has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 14 December 2020, Minister of International Development Karina Gould announced the country's contribution of CAD230 million to procure COVID-19 treatments through the Access to COVID-19 Tools Accelerator (ACT-A), and CAD255 million as additional support for the ACT-A for the effective deployment of medical solutions against COVID-19 in developing and vulnerable countries. The latter contribution included an investment in the development of a mechanism to equitably reallocate vaccine doses through COVAX.⁸³⁶⁰

On 19 April 2020, the Government of Canada presented the Budget 2021.⁸³⁶¹ The budget provides for a CAD59.2 million investment into the University of Saskatchewan's Vaccine and Infectious Disease Organization (VIDO) to help it develop and manufacture bio-solutions such as vaccines and therapeutics. This builds on previous investments in VIDO, totaling CAD46 million, to accelerate the development of its COVID-19 vaccine candidate, support research and enhance its vaccine manufacturing facilities.⁸³⁶²

On 23 April 2021, Minister of Public Services and Procurement Anita Anand announced that Canada has secured COVID-19 vaccines from Pfizer for 2022 and 2023, with options to extend into 2024. The agreement guarantees access to 65 million doses of Pfizer-BioNTech's COVID-19 vaccine, with access to up to 120 million more if all options are exercised.⁸³⁶³

On 29 April 2021, Minister of Health Patty Hajdu announced an investment of CAD2.25 million through the Immunization Partnership Fund for two projects to support national vaccination efforts. The projects include the University of Alberta's "ScienceUpFirst" and the University of Toronto's CARD (C-Comfort, A-Ask, R-Relax, D-Distract) System. These projects aim to ensure access to information on vaccination, as well as equip healthcare providers and Canadians with strategies to manage pain and fear during vaccination.⁸³⁶⁴

On 14 July 2021, Deputy Prime Minister Chrystia Freeland announced the payment of CAD5 billion to the provinces and territories to support vaccination campaigns. The payments were to be distributed on per capita basis.⁸³⁶⁵

On 12 August 2021, Minister Gould and Minister of Public Services and Procurement Anita Anand, announced the donation of up to 10 million doses of the Janssen COVID-19 vaccine to other countries through the COVID-19 Vaccine Global Access Facility.⁸³⁶⁶

Canada has taken measures to ensure access to vaccines both on national level and through international actions and partnerships.

Thus, Canada receives a score of +1.

Analyst: Andrei Sakharov

China: 0

China has partially complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 21 December 2020, China started the construction of a COVID-19 vaccine production facility which is expected to produce 120 million doses per year in its first phase. The production operation is due to begin in eight months.⁸³⁶⁷

On 31 December 2020, it was announced that China had granted conditional marketing authorization for its first self-developed COVID-19 vaccine. It was also announced that the vaccines would be provided completely free of charge to all people of China.⁸³⁶⁸

On 2 March 2021, the Chinese government assisted the Iraqi government with the delivery of the new COVID-19 vaccine to Baghdad. That was the first batch of the new COVID-19 vaccines received in Iraq after the outbreak.⁸³⁶⁹

On 12 March 2021, Premier of the State Council Li Keqiang announced that the main goals for China in 2021 is to prevent COVID-19 cases and to work on speeding up vaccination.⁸³⁷⁰

On 6 April 2021, China began offering free COVID-19 vaccines to residents of Hong Kong and Macao who are Chinese nationals and are living on the Chinese mainland. It was also mentioned that they will also be entitled to the same treatment and reimbursement policies as mainland residents if they have adverse reactions after inoculation.⁸³⁷¹

http://english.www.gov.cn/statecouncil/ministries/202104/08/content_WS606e3eb1c6d0719374afc2d3.html

On 11 April 2021, the Chinese government delivered the second batch of the COVID-19 vaccines to Iraq.⁸³⁷²

On 14 April 2021, it was announced that at the end of March the Chinese government has contributed RMB24 billion (approximately USD3.67 billion) to ensure the smooth rollout of COVID-19 vaccines. The funds were provided to vaccine buyers who then paid vaccine manufacturers in advance to help guarantee their operations.⁸³⁷³

On 5 August 2021, President Xi Jinping announced that China will provide two billion COVID-19 vaccine doses to the world throughout 2021 and contribute USD100 million to the COVID-19 Vaccine Global Access (COVAX) facility.⁸³⁷⁴

China has taken action to ensure access to vaccines on domestic level but no actions on international level have been founded.

Thus, China receives a score of 0.

Analysts: Anastasiya Kirillova and Adnrey Shelepov

France: +1

France has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 18 February 2021, it was reported that France pledged to donate 5 per cent of its secured Covid-19 vaccine supplies to poorer countries through COVAX, and called other developed countries to follow suit, and donate from 3-5 percent of their stocks to developing countries.⁸³⁷⁵

On 15 April 2021, France welcomed the finalization of a new agreement between COVAX and Team Europe on the provision of doses, which will ensure the first French and European donations via COVAX can materialize shortly.⁸³⁷⁶

On 19 February 2021, it was announced that the EU pledged to double its contribution to COVAX to EUR1 billion to ensure safe and effective vaccines for low- and middle-income countries.⁸³⁷⁷ On the same date, the G7 leaders issued a joint statement after a virtual summit pledged to intensify co-operation on COVID-19 and increase their contribution to the COVAX vaccine-sharing initiative to total USD7.5 billion.

On 4 January 2021, France announced the government's pledge to accelerate vaccination campaigns starting with elderly people and health professionals, while recognizing criticism of delays due to logistical reasons.⁸³⁷⁸

By 23 March 2021, France had rolled out around 8.8 million doses. President Emmanuel Macron pledged to increase vaccination pace, offer vaccines to all people over 70 years old and open 35 mass vaccination centers across the country.⁸³⁷⁹ That pledge had taken form already in April 2021, when France reached its 10 million inoculations target a week earlier than expected, while daily vaccination after opening first mass vaccination centers exceeded 510,000 doses on 9 April 2021.⁸³⁸⁰

On 2 May 2021, it was reported that France would send within a month to India 28 tons of medical supplies, including eight large oxygen generation plants, as part of its "solidarity mission" to help the country in its fight against a devastating second wave of the coronavirus pandemic.⁸³⁸¹

On 28 May 2021, speaking at a joint news conference with South African President Cyril Ramaphosa in Pretoria, Macron stated that France would invest in boosting the production of COVID-19 vaccines in Africa, to help close a gap in the availability of the shots between African and Western nations. France plans to deliver 30 million COVID-19 vaccine doses to Africa by year-end, part of a total of more than 100 million doses that the European Union plans to deliver to Africa this year.⁸³⁸²

On 4 August 2021, it was reported that France has pledged to provide 200,000 doses of coronavirus vaccines to Armenia to support its government's vaccination campaign that has made slow progress so far.⁸³⁸³

On 30 August 2021, the French presidency said that France will send 10 million doses of COVID-19 vaccines to Africa over the next three months. The vaccines were to be allocated and distributed through the African Union's Vaccine Acquisition Trust (AVAT) and Covax. AVAT is a means of enabling group purchases of vaccines by AU members to help them meet at least 50 percent of their needs.⁸³⁸⁴

On 14 September 2021, Viet Nam received 672,000 doses of Astra Zeneca COVID-19 vaccine donated by the Government of France through the COVAX Facility.⁸³⁸⁵

France has taken numerous important steps to contribute to affordable and equitable vaccine distribution both domestically and internationally.

Thus, France receives a score of +1.

Analyst: Pavel Doronin

Germany: +1

Germany has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 8 February 2021, the Federal Ministry of Health, in consultation with the Federal Ministry for Economic Affairs and Energy, issued the ordinance on the entitlement to vaccination against the SARS-CoV-2 coronavirus. It provides for the entitlement to vaccinations, vaccine surveillance procedures, partial financing of costs of vaccination centers, relevant evaluation measures and other aspects regulating access to COVID-19 vaccines within Germany.⁸³⁸⁶

On 19 February 2021, Chancellor Angela Merkel announced an additional EUR1.5 billion for measures to fight COVID-19. Of that, EUR1 billion is for Gavi, the Vaccine Alliance and its Access to COVID-19 Tools Accelerator. The rest of the funds is intended to strengthen the World Health Organization and research on vaccines, in particular with regard to mutations.⁸³⁸⁷

On 7 July 2021, Germany announced it would donate at least 500,000 doses of the AstraZeneca vaccine to ensure access for poorer countries. Around 80 per cent of the donated vaccines will be given via COVAX, with another 20 per cent given directly to countries in the Western Balkans and members of the EU's Eastern Partnership – Georgia, Moldova and Ukraine – and Namibia.⁸³⁸⁸

On 29 September 2021, the Foreign Office announced it would provide up to 100 million doses of COVID-19 vaccine to industrialising and developing countries, with most of them being made available through COVAX.⁸³⁸⁹

Germany has taken measures to ensure access to vaccines both at national level and through international actions and partnerships.

India: 0

India has partially complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 29 November 2020, India provided another grant to the Department of Biotechnology for Research & Development of Indian COVID-19 vaccines. The important objectives of the fund will be accelerating pre-clinical& clinical development; licensure of COVID-19 vaccine candidates that are currently in clinical stages or ready to enter clinical stage of development, establishing clinical trial sites, and strengthening the existing immunoassay laboratories, central laboratories and suitable facilities for animal studies, production facilities and other testing facilities to support COVID-19 vaccine development.⁸³⁹⁰

On 16 January 2021, India launched the pan-India rollout of COVID-19 vaccination drive, the world's largest vaccination program covering the entire length and breadth of the country. A total of 3,006 session sites participated in the launch. During this phase, priority groups and health care workers were to be vaccinated.⁸³⁹¹ Moreover, a 24/7 call center has been established for addressing the queries related to COVID-19 pandemic and the vaccine rollout.⁸³⁹²

On 13 March 2021, India, along with the United States, Australia and Japan, pledged to provide up to one billion vaccine doses to developing countries by the end of 2022 through financing vehicles that allow a substantial increase in production capacity in India.⁸³⁹³

On 1 April 2021, the Government of India decided to operationalize both public and private sector COVID-19 Vaccination Centers on all days of April. It has also decided that from 1 April the COVID-19 vaccination of people above the age of 45 will start.⁸³⁹⁴

India has taken actions to ensure access to vaccines on domestic level but no actions on international level were taken.

Thus, India receives a score of 0.

On 21 December 2020, it was reported that Indonesia received the first shipment of China's Sinovac vaccine, which was under consideration by authorities for emergency use.⁸³⁹⁵ It was further reported, that Indonesia's vaccination strategy differed from most of the countries with prioritized front-line health workers, police and military and then – working age population (18-59 years old) so that the problem of asymptomatic transmission among the working-age population was solved. The ultimate goal of the government is to inoculate 181.5 million Indonesians by the end of 2020.⁸³⁹⁶

On 8 April 2021, it was reported that Indonesia had already received by that moment 56 million doses of Sinovac vaccine and was in talks with China to secure additional 90-100 million doses to substitute lagging deliveries of the AstraZeneca vaccine.⁸³⁹⁷ It was further reported that Indonesia would receive additional vaccine doses both from China (10 to 15 million doses in April and May 2021), and via COVAX (two shipments of 3.8 million doses of the AstraZeneca vaccines).⁸³⁹⁸

On 9 July 2021, it was reported that Indonesia received desperately needed supplies of oxygen and protective equipment from neighbouring Singapore.⁸³⁹⁹

On 24 July 2021, Switzerland is helping Indonesia to fight the COVID-19 pandemic. Swiss Humanitarian Aid sent 600 oxygen concentrators to Jakarta on Saturday, with a total value of nearly CHF1 million.⁸⁴⁰⁰

On 9 August 2021, it was reported that a shipment of medical equipment and medicines donated by Turkey to Indonesia for battling the COVID-19 pandemic arrived at Soekarno-Hatta International Airport. Indonesia's Ministry of Foreign Affairs said in a statement that the medical aid consisted of 50 sets of ventilators and 600,000 boxes of medicine.⁸⁴⁰¹

Indonesia has taken action to ensure domestic vaccination rollout is executed smoothly and efficiently. However, it has not taken sufficient action internationally.

Thus, Indonesia receives a score of 0.

Korea: +1

Korea has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 25 February 2021, Korea has initiated a nation-wide vaccination campaign. The campaign is based on vaccine batches produced by AstraZeneca. The government plans to immunize at least 10 million high-risk people by July 2021.⁸⁴²³

On 11 March 2021, the Disease Control and Prevention Agency approved usage of AstraZeneca vaccine for elderly population that had been prohibited due to lack of clinical data.⁸⁴²⁴

On 27 April 2021, Korea announced its intention to provide India with medical equipment. South Korea would send oxygen concentrators, COVID-19 diagnostic kits and other supplies to help the South Asian country in its fight against the coronavirus infection.⁸⁴²⁵

On 12 May 2021, the Government of Korea amended the national vaccination plan for the Q2 2021. According to the amended plan, vaccination would cover the 60-64 age group; people under 30 would receive the Pfizer-made vaccine.⁸⁴²⁶

On 12 May 2021, Korea and New Zealand held an intra-ministerial videocall. The parties discussed issues related to bilateral cooperation including coordination to ensure equitable access to vaccines under the COVAX Facility.⁸⁴²⁷

On 17 May 2021, Korea announced its intention to import 835,000 doses of AstraZeneca Vaccine through COVAX scheme for domestic use.⁸⁴²⁸

Mexico has partially complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 3 January 2021, it was announced that Mexico plans to import about 870,000 doses of AstraZeneca’s COVID-19 vaccine from India in February, as well as producing it locally.⁸⁴³¹

On 4 February 2021, as President pro tempore of the Community Latin American and Caribbean States (CELAC), the Government of Mexico took part in a ministerial meeting on “Promoting equitable access to COVID-19 tools in Latin America and the Caribbean through the ACT-Accelerator (ACT-A).” The World Health Organization (WHO) participated in and supported the meeting. The goal of the meeting was to strengthen the region’s communication with the WHO, and to learn first-hand the achievements of the ACT-A, a partnership launched by WHO in April 2020. The participants also discussed current challenges and how to advance regional cooperation to meet the goals of the ACT-A, without leaving anyone behind. The ACT-A has driven global cooperation to develop effective vaccines, identify treatments and other tools to fight COVID-19 effectively, including the COVID-19 Global Vaccine Alliance (COVAX) facility.⁸⁴³²

On 24 February 2021, the Government of Mexico received a first shipment of 200,000 doses of the Sputnik V COVID-19 vaccine produced in Russia by the Gamaleya National Research Center of

Russia: +1

Russia has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 26 December 2020, the Ministry of Health approved the Sputnik V vaccine for treatment of patients older than 60. The vaccine proved its safety and more than 90 per cent efficiency and thus might be used to protect vulnerable population amid pandemic.⁸⁴³⁵

On 29 December 2020, Russia has delivered the first batch of Sputnik V vaccine to Belarus. Russian vaccine is said to be the primary component of Belarus-wide vaccination campaign.⁸⁴³⁶

On 10 February 2021, Russia and Iran discussed issues of bilateral cooperation in health sphere. The meeting's agenda included treatment of COVID-19 infection along with plans to start production of Sputnik V vaccine in Iran.⁸⁴³⁷

On 20 February 2021, the Ministry of Health approved the third Russian-made vaccine against COVID-19. KoviVak vaccine has proved its efficiency during the pre-launch testing; however, further testing would be conducted after the formal approval.⁸⁴³⁸

On 15 April 2021, the Direct Investment Fund reached an agreement with Korean GL Rapha and ISU ABXIS on production of Sputnik V vaccine for export. On Korea's side, six other companies besides GL Rapha and ISU ABXIS would join the agreement.⁸⁴³⁹

On 22 April 2021, more appointments for vaccination were made available in the cities of Riyadh and Jeddah per request from the citizens.⁸⁴⁴⁶

On 12 July 2021, King Salman bin Abdulaziz Al Saud directed the King Salman Humanitarian Aid and Relief Centre (KSrelief) to provide Tunisia with vaccines, medical and protective equipment and supplies to help the country deal with the ongoing effects of the COVID-19 pandemic. The medical support package included one million doses of COVID-19 vaccine, 190 ventilators, 319 oxygen concentrators, 150 hospital beds, 50 vital-sign monitoring devices, 4 million medical masks, 500,000 medical gloves, 180 pulse oximeters, 25 intravenous drug pumps, 9 defibrillators, 15 video laryngoscopes, and 5 electrocardiographs (ECGs).⁸⁴⁴⁷ The first batch of AstraZeneca vaccine (608,000 doses) arrived in Tunisia to help the country fight the COVID-19 pandemic on 26 August 2021.⁸⁴⁴⁸

On 25 July 2021, it was reported that Saudi Arabia would deliver medical aid which includes one million doses of vaccines and various medical supplies and equipment to beef up Malaysia's war against the COVID-19 pandemic. KSrelief adviser at the Royal Court and supervisor general Dr Abdullah Abdulaziz Al Rabeeah said the aid will include one million doses of Covid-19 vaccines, medical devices, care and treatment devices, preventive supplies and other medical needs.⁸⁴⁴⁹

On 10 August 2021, KSrelief delivered USD500,000 worth pandemic prevention medical aid and equipment to Vietnam to help the country combat the COVID-19 virus. This assistance was provided as part of the Kingdom's ongoing commitment to alleviating the suffering of people in need globally, particularly during the ongoing COVID-19 crisis.⁸⁴⁵⁰

On 21 August 2021, Saudi Arabia pledged to donate oxygen cylinders and oxygen generators to Tunisia. Saudi Arabia would also secure containers to deliver 200 tons of liquid oxygen to the country to facilitate its response to COVID-19 pandemic.⁸⁴⁵¹

On 2 September 2021, KSrelief delivered a variety of medical aid items to Mali to combat the COVID-19 virus there. This aid is strong evidence of the deep ties between the two countries and delivered the appreciation of Mali's government to Saudi Arabia, represented by KSrelief, for the aid.⁸⁴⁵²

Turkey: +1

Turkey has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 11 January 2021, the start of the COVID-19 vaccination campaign in Turkey was announced following the agreement to purchase 50 million doses of Sinovac's CoronaVac vaccine and delivery of initial 3 million doses, as well as agreement to procure 4.5 million doses of the vaccine developed by Pfizer and BioNTech, with an option to procure 30 million more doses later.⁸⁴⁶¹

On 17 March 2021, Turkey pledged to donate 30,000 coronavirus vaccines to Bosnia and Herzegovina as an outcome of the two countries' summit;⁸⁴⁶² further, on 17 April 2021, Ankara had already sent two shipments of 10,000 vaccines to Bosnia in line with the above agreement.⁸⁴⁶³

On 4 April 2021, Turkey ranked sixth globally in terms of administered COVID-19 vaccines (16.6 million doses, 9.5 million people to that date had received their first doses, while second doses had been given to over 7.13 million) following the U.S., China, India, the U.K. and Brazil.⁸⁴⁶⁴ Having concluded the first stage of vaccination rollout (critical front-line health care staff, people over the age of 65, elderly and disabled adults living in crowded places and those living at nursing homes), on 19 April 2021 Turkey started the second stage with turning to vaccinate the population aged 55 and older.⁸⁴⁶⁵

On 9 April 2021, it was reported that the studies for Turkey's seven vaccine candidates had progressed, with three of them in the human trial stage.⁸⁴⁶⁶

On 14 April 2021, it was reported that Turkey had delivered its donation of 150,000 Covid-19 vaccine doses to Libya.⁸⁴⁶⁷

On 21 April 2021, it was reported that the first batch of vaccines allocated through COVAX facility (53,800 AstraZeneca doses) had been delivered to Syria's Idlib region with Turkey's assistance.⁸⁴⁶⁸

On 26 April 2021, it was reported that Turkey's pharmaceutical firm Viscoran İlaç would mass-produce Russia's Sputnik V vaccine at its plants, with manufacturing to be launched within months; in addition to production agreements, licensing processes, as well as storage and distribution matters, the execution of some clinical studies on the product would also be part of cooperation between Russia and Turkey.⁸⁴⁶⁹

On 25 June 2021, the Turkish Cooperation and Coordination Agency (TIKA) provided medical supplies including masks, disinfectants, and protective coveralls to the Ministry of Health of Eswatini, as part of Turkey's assistance activities in the fight against the COVID-19 pandemic. As part of these projects, TIKA has provided Eswatini with modern sewing machines for mask production; delivered 2000 bottles of disinfectants, 200,000 gloves, and 2,000 N95 masks to 3 hospitals and clinics in the most impoverished regions;⁸⁴⁷⁰

On 15 July 2021, a consignment of medical aid from Turkey to fight the coronavirus arrived in Tunisia. Aid includes 50,000 vaccines delivered via Turkish Air Force cargo plane.⁸⁴⁷¹

On 9 August 2021, a shipment of medical equipment and medicines donated by the Turkish government to Indonesia for battling COVID-19 arrived at Soekarno-Hatta International Airport Sunday evening. The Ministry of Foreign Affairs said in a statement that the medical aid consisted of 50 sets of ventilators and 600,000 boxes of medicine.⁸⁴⁷²

On 31 August 2021, TIKA delivered 50 oxygen concentrators to Algeria to combat COVID-19 as the number of cases were increasing. TIKA had previously provided 5 tonnes of hygiene products, 12 tonnes of food, 130,000 masks, and 2,500 coveralls to Algeria during the COVID-19 pandemic.⁸⁴⁷³

Turkey has taken a number of important steps to contribute to affordable and equitable access to vaccines both domestically and internationally.

Thus, Turkey receives a score of +1.

Analyst: Pavel Doronin

United Kingdom: +1

The United Kingdom has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 15 December 2020, the UK government published the Spending Review 2020. The document made available GBP6 billion in total to research and procure COVID-19 vaccines.⁸⁴⁷⁵

On 3 March 2021, the details of the new UK budget were published. An extra GBP1.65 billion will be spent on the COVID-19 vaccination roll-out in England. GBP28 million were allocated to increase the UK's capacity for vaccine testing, support for clinical trials and improve the UK's ability to rapidly acquire samples of new variants of COVID-19. GBP22 million will be spent on a study to test the effectiveness of combinations of different COVID-19 vaccines. This will also fund the world's first study assessing the effectiveness of a third dose of vaccine to improve the response against current and future variants of COVID-19. A further GBP5 million on top of a previous GBP9 million will be invested to create a 'library' of vaccines that will work against Covid-19 variants for possible rapid response deployment.⁸⁴⁷⁶

On 10 March 2021, Foreign Secretary Dominic Raab announced that the UK had helped to raise USD1 billion for the coronavirus COVAX Advance Market Commitment through match-funding other donors, which combined with the GBP548 million of UK aid pledged can help distribute one billion doses of coronavirus vaccines to 92 developing countries in 2021.⁸⁴⁷⁷

On 11 June 2021 Prime Minister Boris Johnson announced the UK would donate 100 million surplus COVID-19 vaccines to other countries within a year. 80 million vaccines will go through COVAX and 20 million will be donated bilaterally. 5 million of these will be donated by the end of September 2021 and 30 million – by the end of 2021.⁸⁴⁷⁸

The United Kingdom has taken measures to ensure access to vaccines both at national level and through international actions and partnerships.

United States: +1

The United States has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 21 January 2021, President Joseph Biden issued the National Strategy for the COVID-19 Response and Pandemic Preparedness. Among the goals set by the initiative were: “to mount a safe, effective, and comprehensive vaccination campaign;” “mitigate spread through expanding masking, testing, data, treatments, health care workforce, and clear public health standards;” and “restore U.S. leadership globally and build better preparedness for future threats.”⁸⁴⁷⁹

On 19 February 2021, President Biden announced the United States’ intention to provide USD4 billion, with the initial transfer of USD2 billion, to Gavi, the Vaccine Alliance, supporting the Gavi COVAX Advance Market Commitment to provide COVID-19 vaccines to 92 low- and middle-income countries.⁸⁴⁸⁰

On 13 March 2021, the US, along with Japan, Australia and India, pledged to provide up to one billion vaccine doses to developing countries by the end of 2022 through financing vehicles that allow a substantial increase in production capacity in India.⁸⁴⁸¹

On 4 May 2021, President Biden announced the interim results of the national vaccination campaign. According to his speech, by May 2021 almost 150 million US nationals had been partially vaccinated, and further 105 million – fully vaccinated. He also announced the targets for the second phase of the campaign: vaccinating children between 12 and 15 years if age; increasing the convenience of vaccination; and encouraging public confidence in vaccines.⁸⁴⁸²

On 5 May 2021, the Agency for International Development Administrator Samantha Power stated that the US was “exploring both multilateral and bilateral approaches to share” “up to 60 million doses of AstraZeneca vaccines with partner countries.”⁸⁴⁸³

On 23 August 2021, the Food and Drug Administration approved the first COVID-19 vaccine - the Pfizer-BioNTech COVID-19 Vaccine, designating it as Comirnaty.⁸⁴⁸⁴

European Union: +1

The European Union has fully complied with the commitment to ensure affordable and equitable access to the COVID-19 vaccines.

On 25 November 2020, the European Commission signed the Advanced Purchase Agreement with Moderna providing for the initial purchase of 80 million doses of COVID-19 vaccine on behalf of all EU Member States, plus an option to request up to a further 80 million doses.⁸⁴⁸⁵

On 15 December 2020, the Commission decided to purchase 80 million additional doses of the Moderna COVID-19 vaccine.⁸⁴⁸⁶

On 15 December 2020, the European Investment Bank agreed EUR400 million of financing to support the participation of low- and middle-income economies in COVAX Advance Market Commitment.⁸⁴⁸⁷

On 19 January 2021, the European Commission adopted a Communication calling on member states to speed up the roll out of vaccines across the EU. According to this document, by the end of March 2021, at least 80 per cent of people over the age of 80, and 80 percent of health and social care professionals in every EU member state should have get vaccinated. By summer 2021, member states should have vaccinated a minimum of 70 per cent of the entire adult population.⁸⁴⁸⁸

On 4 February 2021, the European Commission set up a taskforce under the authority of the Commissioner for the Internal Market Thierry Breton, in cooperation with the Commissioner for Health and Food Safety Stella Kyriakides. The Task Force aims to ramp up production capacity for vaccines, acting as a one-stop-shop for manufacturers in need of support, and to identify and address bottlenecks in terms of capacity and supply chain.⁸⁴⁸⁹

On 17 February 2021, the European Commission approved a second contract with Moderna, which provides for an additional purchase of 300 million doses (150 million in 2021 and an option to purchase an additional 150 million in 2022) on behalf of all EU member states.⁸⁴⁹⁰

https://ec.europa.eu/commission/presscorner/detail/en/IP_21_655

On 19 February 2021, President of the European Commission Ursula von der Leyen announced EUR100 million in humanitarian assistance to support the rollout of vaccination campaigns in Africa, which are spearheaded by the Africa Centers for Disease Control and Prevention. The funding will, among others, contribute to ensuring the cold chains, roll-out registration programs, training of medical and support staff as well as logistics.⁸⁴⁹¹

On 19 February 2021, the EU announced an additional EUR500 million for the COVAX Facility, thus doubling its contribution to this global initiative.⁸⁴⁹²

On 10 March 2021, the European Commission reached an agreement with BioNTech-Pfizer for the supply of 4 million more doses of COVID-19 vaccines for member states to tackle coronavirus hotspots and to facilitate free movement across borders. These doses come on top of the schedule of deliveries previously agreed between member states and BioNTech-Pfizer.⁸⁴⁹³

On 21 May 2021, President of the European Commission Ursula von der Leyen announced a Team Europe initiative on manufacturing and access to vaccines, medicines and health technologies in Africa. The initiative will help create an enabling environment for local manufacturing in. It will be backed by EUR1 billion from the EU budget and the European development finance institutions such as the European Investment Bank. On 22 July 2021, President von der Leyen announced the commitment of the Team Europe to deliver at least 200 million doses to low- and middle-income countries by the end of 2021. Most of these doses will be delivered through COVAX.⁸⁴⁹⁴

The European Union has taken measures to ensure access to vaccines both at national level and through international actions and partnerships.

Thus, the European Union receives a score of +1.

Background

G20 leaders first addressed the issue surrounding energy security and climate change in its inaugural Washington Summit in 2008 amid rising concerns over global warming.⁸⁴⁹⁵ The commitment is further emphasized and elaborated at the 2009 Pittsburgh Summit, where G20 leaders committed to “phase out and rationalize over the medium term inefficient fossil fuel subsidies while providing targeted support for the poorest.”⁸⁴⁹⁶ Since then, this statement has been reiterated in every subsequent summit, highlighting the importance of inefficient energy reduction, clean energy development as well as the need to provide necessary support for developing and underdeveloped countries.

At the 2009 Pittsburgh Summit, G20 leaders included the work of finance and energy ministers in delivering “implementation strategies and timeline for acting” to assist the rationalization and

⁸⁴⁹⁶ G20 Leaders Statement: The Pittsburgh Summit, G20 Information Centre (Toronto) 25 September 2009. Access Date: 25 February 2021. <http://www.g20.utoronto.ca/2009/2009communique0925.html>

phasing-out over inefficient fossil fuel subsidies.⁸⁴⁹⁷ Furthermore, G20 leaders called attention to assisting low-income countries in bringing clean, affordable energy replacement through programs such as the “Scaling Up Renewable Energy Program.”⁸⁴⁹⁸

At the 2010 Toronto Summit, G20 leaders incorporated reports on energy subsidies from the International Energy Agency (IEA), Organization of the Petroleum Exporting Countries (OPEC), Organisation for Economic Co-operation and Development (OECD) as well as the World Bank in monitoring inefficient fossil fuel subsidies reduction.⁸⁴⁹⁹

At the 2010 Seoul Summit, G20 leaders reaffirmed their commitment to implement strategies to rationalize and reduce the use of inefficient fossil fuel subsidies.⁸⁵⁰⁰ At the subsequent 2011 Cannes Summit, G20 Leaders highlighted the importance of improving the functioning of the energy market as part of their strategy to reduce inefficient fossil fuel subsidies.⁸⁵⁰¹ The leaders continued to welcome joint reports from the IEA, OPEC, OECD and the World Bank on fossil fuels and other forms of energy measurements.

During the 2013 Petersburg Summit, G20 leaders highlighted the importance of “providing those in need with essential energy services.”⁸⁵⁰² The statement underscored the importance of forming an inclusive global environment surrounding energy transformation where necessary to ensure help is provided for low-income countries.

At the 2015 Antalya Summit, G20 leaders reaffirmed the goal of “below 2°C” as stated in the Lima Call for Action.⁸⁵⁰³ The Summit encouraged all G20 members to submit their Intended Nationally Determined Contributions (INDCs) to the United Nations Framework Convention on Climate Change in preparation for the upcoming Paris Conference.⁸⁵⁰⁴ The subsequent 2016 Hangzhou Summit further encouraged G20 members to participate in “voluntary peer review process” as a way of monitoring fossil emissions.⁸⁵⁰⁵ Furthermore, G20 leaders adopted the Action Plan on the 2030 Agenda for Sustainable Development.⁸⁵⁰⁶

The 2017 Hamburg Summit took note of the United States of America’s decision to withdraw from the Paris Agreement while reiterating the significance of international cooperation as a way to achieve

the deployment of clean and renewable energy.⁸⁵⁰⁷ The subsequent 2018 Buenos Aires Summit reiterated the United States' decision to withdraw from the Paris Agreement while affirming its commitment to “economic growth and energy access and security, utilizing all energy sources and technologies, while protecting the environment.”⁸⁵⁰⁸

At the subsequent 2019 Osaka Summit, the “3E+S” (Energy Security, Economic Efficiency, and Environment + Safety) energy transformation program is highlighted.⁸⁵⁰⁹ Furthermore, G20 leaders recognized the role of international cooperation in relation to “energy access, affordability and energy efficiency, and energy storage,” while reaffirming the commitment to rationalize and phase out inefficient fossil fuel subsidies.⁸⁵¹⁰

At the 2020 Riyadh Summit, G20 leaders recapitulated the goal of providing affordable, reliable and clean energy for all “in accordance with national circumstances” such as access to clean cooking and electricity.⁸⁵¹¹ Furthermore, G20 leaders acknowledged the importance of maintaining an undisrupted energy market while welcoming “recommendations of the Energy Focus Group (EFG), as endorsed by the Energy Ministers party to the EFG, to rebalance the energy markets and continue short and long-term investments.”⁸⁵¹²

Commitment Features

To define the key terms of this commitment, reaffirm is understood as “affirm again” while affirm is defined as “to assert strongly, state as fact, confirm or ratify a judgment.”⁸⁵¹³ To reaffirm the commitment requires the G20 members to continue rationalizing and phasing-out inefficient fossil fuels subsidies, while providing targeted support to the poorest.

“Rationalization” is understood to be facilitated by various factors. To achieve the goal of “medium term rationalization,” the G20 member must fulfill one of the requirements including “(i) identify and quantify all fossil fuel consumer subsidies and one type of fossil fuel producer subsidies; (ii) use a range of economic models to project the impacts of reform in each country across the economy, households, businesses, the energy sector and the environment, including an assessment of the strengths and weaknesses of the models themselves; and (iii) assess the capacity of existing social protection systems in each country to mitigate the impacts of fossil fuel subsidy reforms.”⁸⁵¹⁴

“Phasing-out” refers “to bring or come to an end, one stage at a time.”⁸⁵¹⁵ Therefore, to achieve the goal of phasing out on medium term rationalization G20 members are required to take positive actions that will result in a statistically significant reduction of fossil fuel production and

⁸⁵¹⁵ Compliance Coding Manual for International Commitments, G7 and G20 Research Groups (Toronto) 12 November 2020. Access Date: 26 February 2021. http://www.g7.utoronto.ca/compliance/Compliance_Coding_Manual_2020.pdf

consumption. “Inefficient” refers to “not producing the effect intended or desired.”⁸⁵¹⁶ This includes fossil fuel subsidies that result in the reduction of energy security and undermine efforts in fighting climate change.

G20 members have not agreed on the criteria for “inefficient fossil fuel subsidies,” as “fossil fuel consumption subsidies are unique in every country and are subject to energy policies designed to adhere to a set of priorities and needs specific to each country.”⁸⁵¹⁷ As such, each G20 member has adopted their own definition of what inefficient fossil fuel subsidies are. Since the commitment at the 2009 Pittsburgh Summit, several G20 members have engaged in the voluntary peer review process on the reform of inefficient fossil fuel subsidies. As of March 2021, China, Germany, Indonesia, Italy, Mexico and the United States have published their peer reviews, while Canada and Argentina are undergoing their own.^{8518,8519}

“Subsidy” refers to “financial aid given by the government to individuals or groups.”⁸⁵²⁰ Fossil fuel subsidy is understood as “a form of financial assistance paid to fossil fuel producers or consumers.”⁸⁵²¹ This includes any financial support or monetary fund given to large fossil fuel companies, oil companies as well as natural gas companies.

The term “wasteful” is understood as “not being careful about the amount of resources used for something.” In the context of this commitment, it refers to the utilization of fossil fuels despite the threat they pose to the environment, creating intense carbon emissions that ultimately exacerbate climate change.⁸⁵²² The term “providing” is understood as “to supply or make available (something wanted or needed).”⁸⁵²³

The term “target” is understood as commitments referring to “a set goal, percentage or numerical allocation” and “support” is understood as “the action, or act of providing aid, assistance, or backing up an initiative, or entity.”⁸⁵²⁴ Therefore, to provide targeted support means that the G20 member is required to take actions that will result in a statistically significant change in areas such as investments in green development, infrastructure, and cooking practices. The “poorest” refer to the demographic of low-income people who are lacking in income, such as the working poor, or those living in poverty and extreme poverty. This relates to low-income people and those living in poverty in every country: the poorest people in their own societies. Those who are the poorest in any country are “lacking enough resources to provide the necessities of life – food, clean water, shelter and clothing. But in today’s world, that can be extended to include access to health care, education and even

⁸⁵²⁴ Compliance Coding Manual for International Commitments, G7 and G20 Research Groups (Toronto) 12 November 2020. Access Date: 26 February 2021. http://www.g7.utoronto.ca/compliance/Compliance_Coding_Manual_2020.pdf

transportation.”⁸⁵²⁵ With regards to this commitment, the G20 member must specifically take into consideration the struggles of the poorest people of the population when phasing out inefficient fossil fuel subsidies as it can disproportionately impact them. Therefore, the rationalization and phasing out of inefficient fossil fuel subsidies must occur in parallel to mitigating policies that ensure affordable energy access.⁸⁵²⁶

In order to achieve full compliance, G20 members must take strong actions on the rationalization and phasing-out of inefficient fossil fuel subsidies while providing the poorest people of the population with adequate support. For full compliance, a G20 member would have to implement policies or pass laws that address inefficient fossil fuel subsidies while implementing policies or passing laws that also ensure affordable energy access. If a G20 member takes action on medium term rationalization and phasing-out of inefficient fossil fuel subsidies that encourage wasteful consumption, as per the specific G20 members definition, without taking steps to ensure that those actions do not negatively impact the poorest, it would only be considered partial compliance. If a G20 member takes concrete steps and implements policies that increase affordable energy access and providing support for the poorest without addressing inefficient fossil fuel subsidies, it would also be considered partial compliance. Furthermore, if a G20 member only takes actions in the form of verbal statements or attending meetings to discuss the matter on both components, it would still only be partial compliance.

Scoring Guidelines

| | |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| -1 | G20 member fails to take action on the rationalization and phasing-out of inefficient fossil fuel subsidies NOR does it provide sufficient support for the poorest. |
| 0 | G20 member takes action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies OR provide sufficient support for the poorest. |
| +1 | G20 member takes action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies AND provide sufficient support for the poorest. |

*Compliance Director: Gabriella Shiyuan Zhao
Lead Analyst: Charlie Zeng*

Argentina: -1

Argentina has failed to comply with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

Australia has not taken any actions to promote the rationalization and phasing-out of inefficient fossil fuel subsidies nor provided sufficient support for the poorest.

Thus, Argentina receives a score of -1.⁸⁵²⁷

Analyst: Gabriella Shiyuan Zhao

Australia: 0

Australia has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

⁸⁵²⁵ What is poverty? It's not as simple as you think, World Vision (Uxbridge) 4 March 2021. Access Date: 26 March 2021. <https://www.worldvision.ca/stories/child-sponsorship/what-is-poverty>

⁸⁵²⁶ Update on recent progress in reform of inefficient fossil fuel subsidies that encourage wasteful consumption, Organisation for Economic Co-operation and Development(Tokyo) 19 April 2019. ⁸⁵²⁷ This non-compliance was determined after searching the following websites: <https://www.argentina.gob.ar/>, <https://www.argentina.gob.ar/ciencia>, <https://www.argentina.gob.ar/ambiente>

On 11 May 2021, the 2021-22 Australian Budget announced a series of initiatives worth AUD1.8 billion that aim to “boost jobs, reduce emissions, and support affordable and reliable energy.” Of this, AUD24.9 million will be used to assist gas generators in becoming hydrogen-ready, AUD1.2 billion will be used for emissions reductions, including AUD639 million for low emissions international technology partnerships, AUD275.5 million to support the development of four clean hydrogen export hubs, and AUD263.7 million for carbon capture technologies.⁸⁵²⁸

On 20 September 2021, Prime Minister Morrison and the Ministry for Industry, Energy and Emissions Reduction announced AUD150 million for a further two locations under the Clean Hydrogen Industrial Hubs program to enable the rollout of hydrogen hubs across seven priority regional sites. The goal is to accelerate the “commercial deployment of priority low emissions technologies such as hydrogen so they reach cost parity with higher emissions alternatives [as it is] critical to Australia’s technology led approach to reducing emissions.”⁸⁵²⁹ Australia has taken some actions to promote the rationalization and phasing-out of inefficient fossil fuel subsidies but has not provided sufficient support for the poorest.

Thus, Australia receives a score of 0.

Analyst: Omar Danaf

Brazil: 0

Brazil has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 9 December 2020, Brazil submitted its Nationally Determined Contribution (NDC) for the Paris Climate Agreement to the United Nations Framework Convention on Climate Change.⁸⁵³⁰ Brazil has reaffirmed its commitment to reduce total greenhouse gas emissions by 37 per cent in 2025 and now aims to also reduce its emissions by 43 per cent by 2030, with an additional objective of reaching carbon neutrality by 2060.

On 22-23 April 2021, Brazil participated in the US-hosted Leaders Summit on Climate to discuss climate issues faced by the world. During the summit, the Brazilian government pledged to achieve net-zero economy by 2050, end illegal deforestation by 2030, and double its funding for deforestation enforcement.⁸⁵³¹ The government suggests that it will pursue decarbonization efforts through preventing deforestation. Further, it will promote resilience to subnational and non-state actors on its green recovery plans.

Brazil has taken actions against rationalizing and phasing-out fossil fuel subsidies through its NDC and membership in the MEF, however, it has failed to take any action to provide sufficient support for the poorest.

Thus, Brazil receives a score of 0.

Analyst: Julia Gavieta

Canada: +1

Canada has fully complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 11 January 2021, International Development Minister Karina Gould announced a contribution of up to CAD55 million to the UN Land Degradation Neutrality Fund which would include private sector investments in support of sustainable land management practices and land restoration projects in developing countries.⁸⁵³²

On 12 February 2021, Environment and Climate Change Minister Jonathan Wilkinson published the results of Canada's review of its regulatory program for light-duty vehicles.⁸⁵³³ The analysis determined that more stringent fuel-efficiency standards for future models would provide net benefits of CAD2.5 billion and contribute to Canada's emissions reductions targets.⁸⁵³⁴

On 4 March 2021, Minister Wilkinson represented Canada at the first Powering Past Coal Alliance Global Summit, with participants representing various countries, cities, and private-sector entities.⁸⁵³⁵ The summit encouraged continued effort in reducing coal consumption, with Minister Wilkinson noting that the phase-out of coal power must place coal workers and communities "at the centre of the clean-energy transition."⁸⁵³⁶

On 5 March 2021, Minister Wilkinson announced plans for a Federal Greenhouse Gas Offset System which would incentivize regulated industries to reduce greenhouse gas emissions by introducing carbon credits.⁸⁵³⁷ Companies can sell credits by taking actions to reduce emissions, while facilities

which exceed emission limits can compensate by purchasing credits, thus encouraging market-based solutions to lowering greenhouse gas emissions.⁸⁵³⁸

On 17 March 2021, Minister Gould and the Minister of Small Business, Export Promotion and International Trade, Mary Ng, concluded the first Canada-Africa Clean Growth Symposium, which included an announcement of CAD132.9 million to establish the Canada-Africa Development Bank Climate Fund.⁸⁵³⁹ There were 35 African countries that participated in the symposium, which aims to provide private capital investment in support of clean growth in Africa.⁸⁵⁴⁰

On 18 March 2021, Natural Resources Minister Seamus O'Regan Jr. announced investment totalling CAD100,000 to raise awareness of zero-emission vehicles, as part of a broader initiative which includes the development of charging technologies and financial incentives up to CAD5,000 through tax write-offs for Canadians and businesses purchasing such vehicles.⁸⁵⁴¹

On 21 May 2021, Minister Wilkinson attended the G7 environment ministers meeting.⁸⁵⁴² At this meeting, G7 members issued a communiqué, in which they agreed to “phase out new direct government support for carbon-intensive international fossil fuel energy” and “commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021.”⁸⁵⁴³ Additionally, Canada promoted its new Nationally Determined Contribution, where it intends to phase-out “unabated coal-fired electricity” and its “Powering Past Coal Alliance” with the UK.⁸⁵⁴⁴

On 27 May 2021, Minister of Innovation, Science and Industry François-Philippe Champagne announced an investment of CAD44.3 million for 11 Canadian “cleantech” companies, which will support the development of new technologies that reduce greenhouse gas emissions and limit the environmental impact of energy production.⁸⁵⁴⁵

On 31 May 2021, Minister Champagne announced a roadmap for reducing carbon emissions in Canada's cement and concrete industries through new research and investment to reach net-zero by 2050.⁸⁵⁴⁶

On 8 June 2021, Minister Champagne announced an investment of CAD15 million for the Nova Bus Transformation Project, which will support the modernization of public transport by promoting all-electric and battery-powered buses.⁸⁵⁴⁷

On 9 June 2021, Minister Champagne announced a memorandum of understanding signed by both the Government of Canada and Invest Alberta with the company Air Products Canada Ltd., which will support the company's development of clean hydrogen fuel technology.⁸⁵⁴⁸

On 29 June 2021, Minister Champagne announced a CAD20 million investment in ELYSIS, a venture which will develop technologies that, once implemented, can reduce the carbon emissions of Canada's aluminum-smelting industry by nearly 7 million tonnes annually.⁸⁵⁴⁹

On 7 July 2021, Minister Champagne announced a CAD25 million investment in Svante Inc., a company which develops carbon-capture technology for industrial and energy-producing sites.⁸⁵⁵⁰ The investment aims to help Canada work towards a sustainable economic recovery.

On 12 July 2021, Minister Wilkinson submitted Canada's Nationally Determined Contribution to the United Nations, which commits Canada to reduce its GHG emission by 40 to 45 per cent below 2005 levels by 2030 and is enshrined under law.⁸⁵⁵¹ The commitment reiterates the importance of reducing carbon emissions and affirms Canada's goal of a sustainable economy.

On 11 August 2021, Minister Champagne announced a CAD19.1 million investment in six Canadian cleantech companies which develop innovative low-emissions technologies.⁸⁵⁵²

On 12 August 2021, Minister Wilkinson announced a federal investment of CAD340 million to support Indigenous-led nature conservation over five years, with new and existing initiatives to conserve and protect land, parks, and waters in Indigenous communities.⁸⁵⁵³

Canada has encouraged private sector innovation towards green technology through financial incentives and regulations which aim to phase-out domestic fossil fuel consumption. Canada has also provided investment towards clean growth in developing countries.

Thus, Canada receives a score of +1.

Analyst: Jonathan Ku

China: +1

China has fully complied with the commitment to take national action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for poorest countries.

On 18 January 2021, Chinese state-owned firms China National Offshore Oil Corp (CNOOC) and State Power Investment Corp released a timeline of attaining carbon neutrality which aligns with the government's aim to achieve carbon neutrality for the nation by the year 2060. CNOOC announced the establishment of a new research facility in which the firm could plot its course toward carbon neutrality. Likewise, State Power Investment Corp revealed that 56.09 per cent of its energy use in 2020 originated from green energy sources, with a 5.52 per cent improvement from 2019.⁸⁵⁵⁴

On 25 February 2021, the State Council released a guideline which urged a faster transition into a low-carbon and green economy. The document reaffirmed the need for increased efficiency in the nation's use of resources, emphasized the preservation of the environment, and recognized the importance of regulating the emission of greenhouse gasses.⁸⁵⁵⁵

On 9 March 2021, Chen Yulu, the Vice-Governor of the People's Bank of China (PBOC), the nation's central bank, announced that the PBOC will help finance environmentally sustainable projects in its allocation of subsidies to economic and social development initiatives.⁸⁵⁵⁶ Moreover, Chen emphasized the need for further international collaboration in the support of green financing

initiatives to ensure that each country can meet its stated objectives in reducing net carbon emissions.⁸⁵⁵⁷

On 21 April 2021, Vice-Minister of Commerce Qian Kemung declared that China will seek to encourage the pursuit and development of green and low-carbon energy sources in markets within regions participating in the Belt and Road Initiative. Qian announced that Chinese corporations will be urged to employ environmentally sustainable technology in planning and organizing infrastructure initiatives in the Belt and Road Region, and that the Chinese state will further encourage the use of sustainable development methods within the countries situated within Belt and Road Initiative.⁸⁵⁵⁸

On 18 May 2021, the spokesperson for China's National Development and Reform Commission Jin Xiandong affirmed current progress towards the creation of a strategic blueprint which would observe China's emissions peaking in 2030.⁸⁵⁵⁹ Furthermore, Jin pointed to ongoing studies that would improve low-carbon technologies and strengthen the nation's carbon sink capacity.⁸⁵⁶⁰

On 27 May 2021, Vice-Premier Han Zheng emphasized the need for the Chinese state to meet its carbon emission goals of peaking emissions by 2030 and achieving neutrality by 2060.⁸⁵⁶¹ Vice Premier Han further stressed the need to aid and oversee regional governments and key industries in devising the blueprints of action plans.⁸⁵⁶² In pointing to the importance of international collaboration, Vice Premier Han urged greater cooperation and solidarity from other nations in the transition into green and low-carbon infrastructures.⁸⁵⁶³

On 3 June 2021, the China Electricity Council announced that the nation's installed capacity of non-fossil fuel will increase to 1.12 billion kilowatts by the end of 2021.⁸⁵⁶⁴ The Council also revealed its projections that the installed capacity of non-fossil fuel energy sources will surpass that of coal counterparts by the end of 2021.⁸⁵⁶⁵ Moreover, Zou Ji, the president of Energy Foundation China, stated that the nation's pledge to reduce its dependence on coal as the primary source of energy will result in the decline of coal as an energy source following peak use during the 14th Five-Year Plan period from 2021 to 2025.⁸⁵⁶⁶

On 24 July 2021, Vice-Finance Minister Zou Jiayi announced that 4,156 green low-carbon projects following the project-private-partnership model had been ratified in China by the end of June.⁸⁵⁶⁷ Highlighting a total cost of 4.1 trillion yuan, Minister Zou affirmed the Ministry of Finance's commitment to ameliorate China's fiscal and tax policy systems to reach the nation's carbon neutrality objectives.⁸⁵⁶⁸

Through the management of its central bank and state enterprises to promote the use of green and low-carbon technology domestically and within the Belt and Road region, China has taken national action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provided sufficient support for poorest countries.

Thus, China receives a score of +1.

France: 0

France has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provided sufficient support for the poorest.

On 29 December 2020, the French Government passed its Finance Act for 2021. It aims to put an end to export guarantees linked to exploration or exploitation of liquid hydrocarbons permits. In the Finance Act, it is stated that: "As from 1 January 2025, the State guarantee provided for in this article cannot be granted to cover loans granted to foreign buyers with a view to exporting goods and services in the framework of operations having for object the exploration of deposits or the exploitation of liquid hydrocarbons within the framework of permits corresponding to deposits not yet exploited. No later than 1 January 2035, the State guarantee provided for in this article may not be granted to cover loans granted to foreign buyers with a view to exporting goods and services in the context of operations having for the purpose of exploration of deposits or the exploitation of gaseous hydrocarbons within the framework of permits corresponding to deposits not yet exploited."⁸⁵⁶⁹

On 21 May 2021, Minister of the Environment Barbara Pompili attended the G7 environment ministers meeting.⁸⁵⁷⁰ At this meeting, G7 members issued a communiqué, in which they agreed to "phase out new direct government support for carbon-intensive international fossil fuel energy" and "commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021."⁸⁵⁷¹

On 11 June 2021, President Emmanuel Macron and his fellow G7 leaders met in Cornwall, England and committed to net zero by 2050.⁸⁵⁷² Towards this goal, they have agreed to halving their collective

emissions until 2030 and increasing their climate finance by 2025.⁸⁵⁷³ During the meeting, they recognized coal generation as “the single biggest cause of greenhouse gas emissions” and committed to rapidly advance their technology and policies away from unabated coal capacity.⁸⁵⁷⁴ The G7 have all committed to ending “new direct government support for unabated international thermal coal power generation” by the end of this year.⁸⁵⁷⁵ This commitment to end international funding of coal generation is part of their existing commitment to eliminate “inefficient fossil fuel subsidies by 2025.”⁸⁵⁷⁶ Additionally, they agreed to contribute up to USD2 billion in the upcoming year to Accelerating the Coal Transition and Integrating Renewable Energy programs that will decrease fossil fuel usage.⁸⁵⁷⁷

France has taken some action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and providing sufficient support for the poorest. However, France has only taken partial action.

Thus, France receives a score of 0.

Analyst: Julia Garieta

Germany: +1

Germany has fully complied with its commitment to phase out inefficient fossil fuel subsidies while providing targeted support for the poorest.

On 17 December 2020, the Environment Council of the EU, chaired by German Environment Minister Svenja Schulze, agreed to raise its 2030 target for greenhouse gas reduction from 40 per cent to 55 per cent. The new Nationally Determined Contribution “sets an example internationally which establishes a credible and prudent path to climate neutrality in 2050,” Minister Schulze said.⁸⁵⁷⁸

On 25 January 2021, Chancellor Angela Merkel pledged an additional EUR220 million toward enhanced support for the least developed countries’ efforts to adapt to climate change at the Climate Adaptation Summit. The fund aims to provide protection against natural disasters for the poorest countries and invest in adaptive measures.⁸⁵⁷⁹

https://www.bmz.de/en/press/aktuelleMeldungen/2021/januar/210125_pm_03_Global-Climate-Adaptation-Summit_-German-y-increases-support-for-adaptation-to-climate-change-in-particularly-vulnerable-countries/index.html

On 3 February 2021, the German government increased the greenhouse gas reduction quota for fuels from 6 per cent to 22 per cent by 2030. The new provisions add incentives for more renewable energy in the transport sector, while restricting biofuels from palm oil.⁸⁵⁸⁰

On 11 March 2021, the Federal Ministry for the Environment, Nature Conservation and Nuclear Safety released its 12-point plan to complete its nuclear phase-out.⁸⁵⁸¹ As part of its plan, it intends to: “(1) Close the nuclear supply facilities in Lingen and Gronau, (2) Accelerate the expansion of renewable energy so that wind and solar power replace nuclear and coal power more quickly, (3) Determined progress on the disposal of high-level nuclear waste with the highest possible level of safety, (4) provide more information and enable more public participation, (5) Close ranks with countries critical of nuclear power, (6) Safety Risk of Ageing Nuclear Power Plants: Call against lifetime extensions and call for participation, (7) No public money for nuclear power plants in the EU and beyond, (8) Nuclear power plants close to borders – strengthen bilateral commissions, (9) Continue radiological emergency preparedness at a high level against the German phase-out and improve international networking, (10) Work internationally for high safety standards, (11) Improve nuclear civil liability – damage prevention and victim protection are our priority, and (12) Retain competence and introduce solid facts in the international nuclear debate and with regard to new reactor concepts.”⁸⁵⁸²

On 21 May 2021, Minister Schulze attended the G7 environment ministers meeting.⁸⁵⁸³ At this meeting, G7 members issued a communiqué, in which they agreed to “phase out new direct government support for carbon-intensive international fossil fuel energy” and “commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021.”⁸⁵⁸⁴

Germany has taken actions to phase out inefficient fossil fuel subsidies that encourage wasteful consumption, while providing targeted support for the poorest.

Thus, Germany receives a score of +1.

Analyst: Matthew Barrett

India: 0

India has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 8 April 2021, Prime Minister Narendra Modi stated at the India-Seychelles High Level Virtual Event that the country will be “handing over a One Mega Watt solar power plant in Seychelles built

with India's assistance."⁸⁵⁸⁵ The assistance aims to help Seychelles transition from using inefficient fossil fuel energy to green and cleaner energy.

India has not taken any actions to promote the rationalization and phasing-out of inefficient fossil fuel subsidies, however, it has set to provide sufficient support for the poorest.

Thus, India receives a score of 0.

Analyst: Gabriella Shiyuan Zhao

Indonesia: +1

Indonesia has fully complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 16 December 2020, Minister for Foreign Affairs Retno Marsudi signed the Grant Agreements for Solomon Island, Timor Leste, and Fiji. The grants were given to the three countries in the Pacific region for COVID-19 mitigation. Additionally, Minister Marsudi mentioned that Indonesia and the three Pacific countries which were given grants have developed mutually beneficial cooperation in many fields including development and the economy.⁸⁵⁸⁶

On 15 January 2021, Director General of New, Renewable Energy and Energy Conservation (NREEC) Dadan Kusdiana announced that IDR1,167.8 billion has been allocated to build NREEC infrastructure. NREEC infrastructure involves the implementation of many renewable energy resources, such as the installation of 22,000 solar public lights, the construction of 23 solar power systems, and the revitalization of 8 units of renewable energy infrastructure.⁸⁵⁸⁷

On 19 March 2021, Minister of Energy and Mineral Resources Arifin Tasrif restated the Indonesian government's commitment to encourage the transition towards renewable energy resources. Tasrif mentioned Indonesia's target of reducing emissions by 314 million tons of carbon dioxide in 2030. The Indonesian government plans to reach this goal through various projects such as the building of a large-scale solar power plant starting in 2021 to 2030.⁸⁵⁸⁸

On 15 April 2021, the Director General of the New, Renewable Energy and Energy Conservation (NREEC) Dadan Kusdiana announced that solar rooftop photovoltaic (PV) systems are being promoted to accelerate Indonesia's 23 per cent target of renewables in their energy mix by the year 2025. Director General Kusdiana hopes that the additional installations of rooftop PV systems can reduce 3.2 million tons of CO2 emissions.⁸⁵⁸⁹

On 4 June 2021, Director General of Electricity of the Ministry of Energy and Mineral Resources Rida Mulyana announced that the Ministry of Energy and Mineral Resources will increase the share

⁸⁵⁸⁹ Indonesia to Invest More in Solar Energy, Ministry of Energy and Mineral Resources (Jakarta) 15 April 2021. Access Date: 29 April 2021. <https://www.esdm.go.id/en/media-center/news-archives/indonesia-to-invest-more-in-solar-energy>

of New, Renewable Energy (NRE) based power plants to 48 per cent.⁸⁵⁹⁰ This is an 18 per cent increase from Indonesia's 2019-2028 draft electricity procurement plan. Mulyana stated that the NRE share increase was implemented to make the state's draft electricity procurement plan "greener."⁸⁵⁹¹

On 18 August 2021, Minister of Energy and Mineral Resources Arifin Tasrif launched a pilot project that focuses on converting fuel motors in motorcycles to electric ones.⁸⁵⁹² This is a component of Indonesia's Battery-Based Electric Motor Vehicle (KBLBB) program.⁸⁵⁹³ The KBLBB program has the potential to reduce fuel consumption by 6 million kiloliters per year and reduce greenhouse gas emissions by 7.23 million tons.⁸⁵⁹⁴ The pilot project is expected to result in a reduction of CO₂ emissions.⁸⁵⁹⁵

On 9 September 2021, Secretary of the Directorate General of Electricity under the Ministry of Energy and Mineral Resources Munir Ahmad, announced the addition of Electric Charging Infrastructure (IPL) to Indonesia's KBLBB program.⁸⁵⁹⁶ The 240 electric charging infrastructure units consist of 166 general and private electric vehicle charging stations along with 74 general electric vehicle battery exchange stations. The Electric Charging Infrastructure was implemented with the intention of bolstering electric car usage.⁸⁵⁹⁷

Through its commitments to transition to renewable energy along with grants given to poorer Pacific countries, Indonesia has both promoted the rationalization and phasing-out of inefficient fossil fuel subsidies and provided sufficient support for poorest countries.

Thus, Indonesia receives a score of +1.

Italy: +1

Italy has fully complied with the commitment to take national action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for poorest countries.

On 16 December 2020, the Official Gazette of the Italian Republic posted a decree which implemented provisions that allow the promotion of sustainable school transport. Through this program, the Ministry of Ecological Transition can give funding to municipalities across Italy to help cover the costs of making school transportation vehicles more sustainable and electric.⁸⁵⁹⁸ The implementation of the program helps to promote the use of green vehicles across the country.⁸⁵⁹⁹

On 15 March 2021, cargo consisting of 12 tonnes of humanitarian goods, relief materials and food aid from Italy landed in South Sudan. The goods were provided specifically by the Italian Cooperation and civil society organisations. This assistance is to help the Sudanese people who were affected by the country's food and health crisis, along with those who were displaced by floods in the country.⁸⁶⁰⁰

On 12 April 2021, the Ministry of Ecological Transition approved a list of projects eligible for funding under the Reti intelligenti public notice. The Reti intelligenti public notice works to improve infrastructure concerning the distribution of electricity in Italy, thus creating a smart electrical grid aims to help increase the share of energy needs covered by renewable sources.⁸⁶⁰¹

On 16 April 2021, the Italian Cooperation under the Italian Ministry of Foreign Affairs along with the Italian Red Cross sent eight tons of medical material to the Tigray region of Ethiopia. The medical materials sent will be used to help the Ethiopian Red Cross in support of the population affected by the humanitarian crisis in Tigray.⁸⁶⁰²

On 30 April 2021, the Ministry of Sustainable Infrastructure and Mobility announced that EUR62 billion would be designated for interventions on infrastructures, mobility, and sustainable logistics found within Italy's National Recovery and Resilience Plan (Pnrr). The EUR62 billion will be put towards different projects in the country relating to economic, social, and environmental sustainability. Some of the projects under the Pnrr, such as the renewal of trains, buses, and ships, will help to reduce emissions and thus will aid with the phasing-out of inefficient fossil fuel subsidies.⁸⁶⁰³

On 21 May 2021, Minister of the Environment Roberto Cingolani attended the G7 environment ministers meeting.⁸⁶⁰⁴ At this meeting, G7 members issued a communiqué, in which they agreed to “phase out new direct government support for carbon-intensive international fossil fuel energy” and “commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021.”⁸⁶⁰⁵

On 5 June 2021, the Ministry of Ecological Transition announced that EUR2.20 billion of the Pnrr will be used to build new plants for energy communities and self-consumption.⁸⁶⁰⁶ Through this, an increase in the production of renewable energy will be achieved by building small to medium-sized energy production plants mainly for residential use.⁸⁶⁰⁷ This project is expected to be achieved over the next five years.⁸⁶⁰⁸

On 4 August 2021, the Ministry of Ecological Transition and the Ministry of Sustainable Infrastructures approved guidelines for the preparation and implementation of home-work travel plans.⁸⁶⁰⁹ The preparation and implementation of home-work travel plans contributes to sustainable mobility initiatives by rationalizing and reducing systematic home-work trips.⁸⁶¹⁰ It also works to distribute public transport services more effectively, thus promoting public transportation usage.⁸⁶¹¹

On 18 August 2021, by the request of Vice Minister of Foreign Affairs and International Cooperation Marina Sereni, the Italian Cooperation made an emergency contribution of EUR500,000 to the International Federation of Red Cross and Red Crescent Societies.⁸⁶¹² The contribution was made to help with relief operations in Haiti after the 14 August earthquake.⁸⁶¹³

Japan: 0

Japan has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 4 December 2020, Prime Minister Yoshihide Suga pledged JPY2 trillion to promote ecological businesses and innovation, as a part of his goal of reaching carbon neutrality by 2050.⁸⁶¹⁴ According to the Ministry of Economy, Trade and Industry's January 2021 "Overview of Japan's Green Growth Strategy Through Achieving Carbon Neutrality in 2050," the Green Innovation Fund will provide the promised JPY2 trillion for 10 years to "simulate 15 trillion yen" worth of private research, green development, and investment.⁸⁶¹⁵

On 25 December 2020, the Ministry of Economy, Trade and Industry composed an industrial policy, "Green Growth Strategy Through Achieving Carbon Neutrality," that aims to initiate positive economic growth alongside environmental protection. The Green Growth Strategy involves collaboration with multiple ministries and agencies to discuss goals and explicate challenges in areas such as "budgets, taxes, regulation reforms and standardization, and international collaboration."⁸⁶¹⁶

On 19 February 2021, the Ministry of Economy, Trade and Industry formed the Committee on the Green Innovation Project to manage and operate the Green Innovation Fund.⁸⁶¹⁷ Later on 12 March 2021, they created the Basic Policies for the Green Innovation Fund. The Basic Policies are meant to "continuously support companies and other organizations for the coming ten years" as they tackle research and development, and social implementations.⁸⁶¹⁸

On 5 March 2021, the Ministry of Economy, Trade and Industry and Ministry of Land, Infrastructure, Transport, and Tourism constructed the "Study Group on Automobile Policies for Carbon Neutrality" that will interview industrial actors within the automobile-relevant industries, which will revise action plans.⁸⁶¹⁹

On 21 May 2021, Minister of the Environment Shinjiro Koizumi attended the G7 environment ministers meeting.⁸⁶²⁰ At this meeting, G7 members issued a communiqué, in which they agreed to

⁸⁶²⁰ Climate change: G7 ministers agree new steps against fossil fuels, BBC (London) 21 May 2021. Access Date: 22 May 2021. <https://www.bbc.com/news/science-environment-57203400>

“phase out new direct government support for carbon-intensive international fossil fuel energy” and “commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021.”⁸⁶²¹

On 31 May 2021, the Ministry of Economy, Trade and Industry announced their plan to open a new trading market for renewable energy in November to lower carbon emissions.⁸⁶²² The Ministry emphasized that the market would reduce prices for purchasing renewable energy certificates for companies to decarbonize and become “renewable-energy-based” businesses more easily.⁸⁶²³

On 5 June 2021, Japan Times reported that the Japanese Ministry of Land, Infrastructure, Transport and Tourism is considering increasing hydroelectric power generation to replace carbon-based energies and reduce greenhouse gas emissions.⁸⁶²⁴ Currently, the ministry discovered that eight of its 128 multipurpose dams can be equipped with hydroelectric equipment to generate energy.⁸⁶²⁵

On 19 June 2021, the Environment Ministry plans to include new prices for the new grant system to help local governments decarbonize in accordance with Japan’s local climate action plans.⁸⁶²⁶ The central government aimed to set up this grant program to provide continuous and comprehensive assistance to local governments until Japan reaches its ultimate goal of carbon neutrality by 2050.⁸⁶²⁷

On 7 July 2021, Japan sought to increase its solar power generation to reduce fossil fuels usage.⁸⁶²⁸ The country aims to have 108 gigawatts of solar capacity by 2030, which is 1.7 times higher than any national target.⁸⁶²⁹ The Environment Ministry reports several strategies: solar panels on 50 per cent of government and municipal buildings; boosting solar usage for corporate buildings and parking garages; and providing 4 gigawatts for public lands and 1,000 cities.⁸⁶³⁰ The government plans to invest in cheaper solar panel installations so they can operate in intervals over farmlands to maintain constant crop growth.⁸⁶³¹

Japan has taken steps to promote the rationalization and phasing-out inefficient fossil fuel subsidies. Multiple governmental ministries aimed to invest in hydroelectricity, ammonia power, and the renewable energy market to replace carbon-based energies. Japan is also committed to composing a local climate action plan to support local decarbonization. However, Japan has not taken actions to provide support for the poorest countries.

Korea: +1

Korea has fully complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 2 December 2020, Environment Minister Cho Myung-rae announced that the national budget for 2021 would include KRW11.171 trillion for the ministry, up 17 per cent from last year, in order to propel Green New Deal (GND) initiatives.⁸⁶³² KRW1.47 billion of the budget fund for GND initiatives was announced for the hydrogen procurement project in the form of subsidies to hydrogen charging station operators which had deficits in 2020, and a 70 per cent subsidy on hydrogen gas procurement.⁸⁶³³ The budget aims to promote the transition from fossil fuels to green energy.

On 17 December 2020, the Ministry of Foreign Affairs joined with the Association of Southeast Asian Nations (ASEAN) to establish high-level dialogue in the area of climate change cooperation between the two parties.⁸⁶³⁴ Korea and ASEAN agreed to hold their first Dialogue on Environment and Climate Change in 2021, in order to strengthen cooperation in air pollution, marine pollution, forestry, and carbon mitigation and adaptation.⁸⁶³⁵

On 17 December 2020, Director-General for Climate Change, Energy, Environment and Scientific Affairs Chung Keyong attended a virtual signing ceremony in which Korea contributed USD1 million for the UN Multi-Partner Trust Fund in response to the environmental disaster in the Aral Sea region.⁸⁶³⁶

On 28 January 2021, Environment Minister Han Jeoung Ae announced plans to reduce carbon consumption in transportation by promoting the production of 136,000 carbon-neutral electric and hydrogen vehicles in 2021, in addition to 179,000 such vehicles produced at the end of 2020.⁸⁶³⁷

Minister Han also announced a plan to distribute carbon-neutral electric buses and trucks, along with funding of KRW200 million in subsidies for a hydrogen truck development pilot project.⁸⁶³⁸

On 2 March 2021, Minister Han announced the Action Plan 2021 which would guide the country in implementing its 2050 Carbon Neutrality Strategy by organizing working groups and using research institutes to identify carbon reduction opportunities and communicate plans with civil society and industry.⁸⁶³⁹ Strategies include the promotion and innovation of emission-free vehicles, creating carbon sinks, and supporting the transition towards renewable energy sources.⁸⁶⁴⁰

On 31 May 2021, the Korean Ambassador to Vietnam Park Noh-wan and the Natural Resources and Environment Minister of Vietnam signed the Framework Agreement for Cooperation on Climate Change between the two countries.⁸⁶⁴¹ This Agreement allows for bilateral cooperation on reducing greenhouse gas emissions under the Paris Agreement and will establish a Joint Working Group on Climate Change Cooperation to facilitate its implementation.⁸⁶⁴²

On 5 July 2021, the Ministry of Foreign Affairs, jointly with the Rural Development Administration, dispatched a delegation to Colombia, Costa Rica, and Guatemala, for the purposes of increasing cooperation on digital and eco-friendly agricultural technologies and improving climate change resilience in Latin America and the Caribbean.⁸⁶⁴³

On 2 September 2021, Minister Han announced that the Framework Act on Carbon Neutrality and Green Growth, which legislates achieving carbon neutrality by 2050, was passed by the National Assembly on 31 August and is set for proclamation in September.⁸⁶⁴⁴

Korea has made investments into renewable energy and technologies within its GND project and has introduced new subsidy plans which aim to reduce the consumption of fossil fuels for its domestic

Mexico has failed to comply with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

Mexico has not taken any actions to promote the rationalization and phasing-out of inefficient fossil fuel subsidies nor provided sufficient support for the poorest.

Thus, Mexico receives a score of -1.⁸⁶⁴⁵

Analyst: Darwin Gumba

Russia: 0

Russia has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 12 April 2021, Minister of Energy Alexander Novak stated during the final meeting of the collegium of the Ministry of Energy, that decreasing cross-subsidization of energy consumption was a government's objective for 2021.⁸⁶⁴⁶ This priority is stipulated in the new draft Strategy for the development of the power grid complex until 2035,⁸⁶⁴⁷ currently under open review by the Ministry of Energy and public stakeholders. As of late May 2021, the last meeting of the Public council under the Russian Ministry of Energy, which hosted a discussion on the draft Strategy, took place on 2 April 2021. The participants also noted that the adoption and implementation of the Strategy were among the Ministry's goals for 2021.⁸⁶⁴⁸

On 20 April 2021, Deputy Minister of Energy of Russia Pavel Snikkars addressed the State Duma's Committee on Energy, stating that the Energy Ministry was finalizing the draft strategy for the development of the power grid complex until 2035.⁸⁶⁴⁹ The draft strategy provides for the gradual rationalization and decrease of energy sector cross-subsidization. The paragraph 3.4.1 of the document explicitly states that energy sector cross-subsidization "does not ensure social justice, because in fact the amount of the subsidy is directly proportional to electricity consumption. Thus, the wealthiest household receives a much larger amount of social assistance than a lower-income household." The paragraph 4.3.2 of the Strategy sets the goal of gradual phase-out of cross-

⁸⁶⁴⁵ This non-compliance was determined after searching the following websites: <https://www.gob.mx/sre/en>, <https://www.gob.mx/semarnat>

Saudi Arabia: 0

Saudi Arabia has partially complied with the commitment to take national action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for poorest countries.

On 27 January 2021, Energy Minister Prince Abdulaziz bin Salman announced Saudi Arabia’s intention to become a pioneer in hydrogen energy production, aiming to curb its economic reliance on fossil fuel production and allow Saudi Arabia to become a global leader in renewable energy.⁸⁶⁵¹

On 28 January 2021, the General Authority of Meteorology and Environmental Protection entered into force new environmental regulations aimed at establishing “stricter emission limits” as well as modernizing energy production to decrease fossil fuel emissions, reforming state oil production.⁸⁶⁵²

On 29 March 2021, Saudi Arabia announced its “Green Project initiative” aimed to fight climate change by limiting inefficient fossil usage and significantly increasing the Kingdom’s investments in renewable energy.⁸⁶⁵³ The Saudi Press Agency states that this was in response to the Kingdom’s “presidency of the G20 summit” in 2020, making the initiative a direct response to the Saudi commitment to phase out inefficient fossil fuel usage.⁸⁶⁵⁴

On 23 April 2021, Saudi Arabia was party to a joint statement announcing the establishment of a Net-Zero Producers Forum, which will attempt to help member states become net zero carbon emitters by 2050.⁸⁶⁵⁵

On 28 April 2021, the National Portal for Governmental Services highlighted Saudi Arabia’s dedication to phasing out inefficient fossil fuel usage, represented by the government’s Vision 2030

South Africa: 0

South Africa has partially complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 17 December 2020, President Cyril Ramaphosa appointed members to the Presidential Climate Change Coordinating Commission. It was formed to coordinate “the just transition towards a low-carbon, inclusive, climate change resilient economy and society.”⁸⁶⁵⁷

On 10 March 2021, the Department of Environment, Forestry and Fisheries published the Renewable Energy Development Zones to expand South Africa’s energy mix. They are intended for strategic gas transmission pipeline infrastructure, and large-scale wind and solar photovoltaic energy facilities, as the country transitions away from coal energy.⁸⁶⁵⁸

On 11 March 2021, Deputy President David Mabuza announced that Cabinet had approved the submission of the Gas Amendment Bill of 2020 to Parliament. This bill will allow for scaling up of gas exploration, in order to “mitigate the decrease in coal production and use.”⁸⁶⁵⁹

On 30 March 2021, Minister of Forestry, Fisheries and the Environment Barbara Creecy launched an updated draft Nationally Determined Contribution (NDC) with a range up to an additional 28 per cent reduction of emissions from previous 2015 targets. The finalized NDC will be tabled with Cabinet for approval in advance of COP26 in November.⁸⁶⁶⁰

On 22 April 2021, President Ramaphosa announced that South Africa’s emissions will begin to decline in 2025, shifting the downturn ahead a decade from the previous commitment of a carbon emissions plateau until 2035.⁸⁶⁶¹

Turkey: +1

Turkey has fully complied with the commitment to take national action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for poorest countries.

On 13 March 2021, the Energy and Natural Resources Minister Fatih Donmez reported that the country received 709 applications for 74 upcoming mini solar Renewable Energy Resource Zone (YEKA) tenders. The YEKA tenders are a component of Turkey's plan to supply 65 per cent of its energy needs from domestic and renewable sources by 2023. The Minister stated that "the mini YEKA scheme will start a new era in renewable energy as it will attract more small and medium-sized investors to the sector."⁸⁶⁶²

On 23 March 2021, the Energy and Natural Resources Minister Fatih Donmez declared that Turkey intends to increase its installed power in solar energy by 10,000 megawatts in the following 10 years by conducting a minimum of 1,000 megawatts of solar YEKA tenders each year. This was stated during the annual meeting of Turkey's Renewable Energy Investors Association. YEKA tenders are a component of Turkey's goal towards self-sufficiency in energy resources.⁸⁶⁶³

On 3 May 2021, Foreign Minister Mevlüt Çavuşoğlu announced that Turkish companies would be returning to Libya to continue the development of the country.⁸⁶⁶⁴ This was stated during a visit by Minister Çavuşoğlu to Libya where strategic partnerships and bilateral relations between the two states were discussed.⁸⁶⁶⁵ The discussion surrounding such bilateral relationship reiterated the importance of international cooperation to reduce carbon emissions.⁸⁶⁶⁶

On 11 June 2021, Minister Donmez announced that the first phase of the Karapinar Solar Power Plant, Turkey's largest solar plant, had been finalized.⁸⁶⁶⁷ This followed installation of solar panels totaling 271 megawatts of capacity at the plant. Construction of the plant is attributed to the first YEKA tender known as YEKA GES-1.⁸⁶⁶⁸ The finalization of the first phase reflects the country's commitment in promoting clean and sustainable energy.⁸⁶⁶⁹

United Kingdom: +1

The United Kingdom has fully complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 4 December 2020, Prime Minister Boris Johnson announced a new nationally determined contribution targeted to reduce greenhouse gas emissions by 68 per cent by 2030, relative to 1990 levels. This goal will be supported by the Prime Minister's Ten Point Plan for a green industrial revolution, which aims to produce 250, 000 jobs by 2030.⁸⁶⁷²

On 12 December 2020, Prime Minister Johnson announced that the UK will end direct government support for the fossil fuel energy sector overseas. The new policy will complement the North Sea Transition Deal, promoting areas like Teesside and Aberdeen as “global hubs for wind energy, carbon capture and other clean technologies of the future.” The UK also announced a GBP10 million commitment to a Green Recovery Initiative, designed to support developing countries by incorporating renewable solutions into pandemic recovery efforts. Between 2021 and 2026, the UK has dedicated GBP11.6 billion to International Climate Finance.⁸⁶⁷³

On 12 April 2021, the UK dedicated GBP2.7 million to the Rapid Response Facility, an initiative designed to provide technical assistance to developing countries. COP26 President Alok Sharma said the RRF “will play a key role in supporting countries to make real and clear progress in their transition from coal to clean power, ahead of COP26.”⁸⁶⁷⁴

On 20 April 2021, Prime Minister Johnson announced a new world-leading emission reduction target of 78 per cent by 2035, which will be enshrined in law by the end of June 2021. Additionally, the

sixth Carbon Budget will now account for international aviation and shipping emissions, enhancing the consistency of emissions reports.⁸⁶⁷⁵

On 21 May 2021, the UK hosted the G7 environment ministers meeting.⁸⁶⁷⁶ At this meeting, G7 members issued a communique, in which they agreed to “phase out new direct government support for carbon-intensive international fossil fuel energy” and “commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021.”⁸⁶⁷⁷

On 30 June 2021, Energy and Climate Change Minister Anne-Marie Trevelyan announced that the UK will no longer use coal to generate electricity after 1 October 2024.⁸⁶⁷⁸ This new target shifts the deadline to end unabated coal-fired electricity generation forward by a year, in line with the UK’s pledge to decarbonize the power sector.⁸⁶⁷⁹

On 14 July 2021, the UK Government announced a new commitment of GBP8.8 million towards global energy transitions.⁸⁶⁸⁰ GBP5 million will support the South East Asia Energy Transition Programme and GBP3.8 million, channelled through the World Bank’s Energy Sector Management Assistance Programme, will reinforce South Africa’s clean energy transition.⁸⁶⁸¹

Through its plan to cut support for fossil fuel energy development overseas and its technical assistance to development countries, the UK has taken steps in promoting the phasing out fossil fuel subsidies both internationally and domestically, while pledging financial support for the poorest.

Thus, the United Kingdom receives a score of +1.

Analyst: Matthew Barrett

United States: +1

The United States has fully complied with the commitment to take national action to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for poorest countries.

On 27 January 2021, President Joe Biden signed into effect an executive order concerning the global climate crisis, with the intent of facilitating a “clean energy transition” that greatly decreases

America's usage of "carbon-intensive" fossil fuels.⁸⁶⁸² The announcement reiterated the importance of climate issues and encouraged the promotion of clean and sustainable energy transition.⁸⁶⁸³

On 19 February 2021, the United States officially rejoined the Paris Climate Accord, signifying their commitment to decreasing fossil fuel emissions and pursuing green energy alternatives.⁸⁶⁸⁴ This signifies a shift from the previous American administration's stance on phasing out fossil fuel usage, making the US a leader within the international community concerning fossil fuel reductions.⁸⁶⁸⁵

On 31 March 2021, President Biden outlined a USD2 trillion public infrastructure plan, planning to decrease oil, gas, and coal usage by drastically increasing the amount of renewable energy sources to power U.S. homes.⁸⁶⁸⁶ President Biden's plan aimed to limit inefficient fossil fuel usage while funding a transition to green energy.⁸⁶⁸⁷

On 23 April 2021, the United States hosted a Leaders Summit on the Climate, bringing together heads of governmental agencies and leaders of international climate-based organizations to further the international dialogue about shifting to green energy and decreasing fossil fuel usage.⁸⁶⁸⁸ The summit reflected the United States' commitment to proactively take actions towards a transition into using green and sustainable energies.⁸⁶⁸⁹

On 21 May 2021, the US attended the G7 environment ministers meeting.⁸⁶⁹⁰ At this meeting, G7 members issued a communiqué, in which they agreed to "phase out new direct government support for carbon-intensive international fossil fuel energy" and "commit to take concrete steps towards an absolute end to new direct government support for unabated international thermal coal power generation by end of 2021."⁸⁶⁹¹

The United States has taken significant actions and made collaborative commitments to rationalize and phase-out inefficient fossil fuel subsidies that encourage wasteful consumption, while providing targeted support for poorest countries.

Thus, the United States receives a score of +1.

Analyst: Omar Danaf

European Union: +1

The European Union has fully complied with its commitment to promote the rationalization and phasing-out of inefficient fossil fuel subsidies and provide sufficient support for the poorest.

On 10 December 2020, EU leaders gathered in Brussels to declare their goal to cut greenhouse gases by 55 per cent in 2030, rather than the previously agreed 40 per cent.⁸⁶⁹² In order for this reduced carbon footprint to be met, the EU has reaffirmed their commitment to their blueprint drafted in September of 2020, which says that a minimum of 30 per cent of the EU's EUR1.8 trillion budget would be allocated towards climate efforts.⁸⁶⁹³

On 17 December 2020, the Environment Council of the EU, chaired by German Environment Minister Svenja Schulze, agreed to raise its 2030 target for greenhouse gas reduction from 40 per cent to 55 per cent. The new Nationally Determined Contribution “sets an example internationally which establishes a credible and prudent path to climate neutrality in 2050,” Minister Schulze said.⁸⁶⁹⁴

On 30 December 2020, EU foreign ministers declared in a meeting that they will commence a global phase out of fossil fuels within their continent and promote similar efforts in developing nations.⁸⁶⁹⁵ As written in the draft statement, “the EU will ensure that its trade policy and its trade agreements are consistent with its climate ambition.”⁸⁶⁹⁶ Furthermore, the EU acknowledges its role as a leading body in the effort to reduce global carbon emissions. It has vocalized its intentions to join other wealthy, industrialized nations in contributing USD100 billion per year towards climate action in developing nations.⁸⁶⁹⁷ In spite of such declarations, countries like France were found to have exaggerated its contribution by USD104 million, stating that USD93 million went to climate efforts in the Philippines when, in reality, only five per cent was allotted. On Monday's meeting, EU foreign ministers reviewed their environmental diplomatic relations with developing nations to ensure greater accuracy of the declared amounts sent to the third world.⁸⁶⁹⁸

Background

The accumulation of plastics and microplastics in the world’s oceans pose a significant environmental, health, and economic threat to marine and coastal ecology and biodiversity.⁸⁷¹¹ The large-scale production of plastics and the ongoing trends of rapid population growth, urbanization, and increased resource consumption have contributed to the issue of marine plastic litter.⁸⁷¹² According to the World Economic Forum, without concrete and sustained action, the world’s oceans will contain more plastic than fish by 2050.⁸⁷¹³ Thus, protecting the global marine environment through actions to reduce and prevent the effects of plastics and microplastics has received increasing attention at G20 summits.

⁸⁷¹³ More Plastics than Fish in the Ocean by 2050: Report Offers Blueprint for Change, World Economic Forum (Cologne) 19 January 2016. Access Date: 21 February 2021. <https://www.weforum.org/press/2016/01/more-plastic-than-fish-in-the-ocean-by-2050-report-offers-blueprint-for-change/>

The G20 first recognized marine environmental protection as a distinct commitment area at the 2011 Cannes Summit.⁸⁷¹⁴ While safeguarding the marine environment had been mentioned at the Toronto and Seoul Summits, this summit was the first to offer a more serious consideration of the issue. G20 members committed to preventing marine accidents and those relating to offshore oil and gas exploration and development activities.⁸⁷¹⁵ They further called upon the Global Marine Environment Protection working group to report on the progress made on the commitment area the following year and committed to discuss marine environmental protection with relevant international organizations and stakeholders.⁸⁷¹⁶

At the 2012 Los Cabos Summit, G20 leaders welcomed “the establishment of a Global Marine Environment Protection Best Practices Sharing Mechanism website and look forward to its launch in accordance with the Cannes mandate.”⁸⁷¹⁷ The following year, G20 leaders stated “We appreciate the progress achieved since the establishment of the G20 Global Marine Environment Protection (GMEP) Initiative and welcome the launch of the GMEP Initiative website as a key element of the GMEP Mechanism for the voluntary exchange of national best practices to protect the marine environment, in particular to prevent accidents related to offshore oil and gas exploration and development, as well as marine transportation, and to deal with their consequences. We encourage participants to make full use of the website and share relevant information under the auspices of the G20 in cooperation with relevant international organizations in accordance with the GMEP mandates.”⁸⁷¹⁸ The marine environment was not mentioned at the 2014 Brisbane, 2015 Antalya or 2016 Hangzhou Summits.

At the 2017 Hamburg Summit, G20 members recognized the need to reduce and prevent marine litter for the preservation of human health and marine and coastal ecosystems.⁸⁷¹⁹ To display their commitment to marine environmental protection, the G20 members launched the G20 Marine Litter Action Plan to “prevent and reduce marine litter of all kinds, including from single-use plastics and micro-plastics.”⁸⁷²⁰ Additionally, the summit emphasized the importance of knowledge exchange and dissemination on marine plastic prevention and reduction amongst G20 members.⁸⁷²¹

At the 2019 Osaka Summit, G20 members committed to taking “national actions for the prevention and significant reduction of discharges of plastic litter and microplastics to the oceans” thereby affirming the Osaka Blue Ocean Vision.⁸⁷²²

At the 2020 Riyadh Summit, the Saudi presidency prioritized safeguarding the planet and signalled a strong commitment to the issues of sustainable development, ocean preservation, and the reduction of food loss and waste.⁸⁷²³ Saudi Arabia built on the Japanese G20 presidency and advanced discussions on marine ecosystem preservation.⁸⁷²⁴ The commitment made by G20 leaders to reaffirm the Osaka Blue Vision highlights the growing importance and urgency of collective environmental protection.

Commitment Features

At the 2020 Riyadh Summit, G20 members reaffirmed their commitment to the Osaka Blue Ocean Vision.⁸⁷²⁵ The Osaka Blue Ocean Vision “aims to reduce additional pollution by marine plastic litter to zero by 2050 through a comprehensive life-cycle approach that includes reducing the discharge of mismanaged plastic litter by improved waste management and innovative solutions while recognising the important role of plastics for society.”⁸⁷²⁶ In this commitment, there are four requirements: 1) to reduce marine plastic litter, 2) to reduce microplastic waste, 3) to prevent marine plastic litter and 4) to prevent microplastic waste.

Marine plastic litter is any human-created plastic, “a synthetic organic polymer made from petroleum” discarded or disposed of in the environment, sea, ocean, or coastlines.⁸⁷²⁷ Plastic litter can come in different shapes or sizes, but plastic pieces less than 5 mm in length are called microplastics.⁸⁷²⁸ There are two categories of microplastics: 1) primary, which are released directly as small particles in the environment and 2) secondary, which originate from degraded larger pieces of plastic litter.⁸⁷²⁹ Examples of materials and products defined as plastic litter include plastic bags, plastic straws, single-use beverage cups, plastic water bottles and caps, plastic packaging, and microbeads, etc.

The “life-cycle approach” to waste management considers the environmental impact (emissions and resource consumption) of a product through its lifetime.⁸⁷³⁰ The life cycle of a product starts from its natural extraction to material processing, its manufacturing, distribution, and use, and ends with its re-use, recycling, energy recovery, and disposal.⁸⁷³¹

The word “reduce” means to “diminish in size, amount, extent, or number.”⁸⁷³² The word “additional” is understood as a preventative measure meaning “more than is usual or expected,” whereby “prevent” means “to keep from happening or existing.”^{8733,8734} Therefore, G20 members are

required to take action to lessen the current amount of plastic litter in the oceans and to stop the release of plastic litter into the oceans.

G20 members can take domestic (or in the case of the EU, supranational) and international action to achieve compliance. Domestic actions refer to federal or national government-level initiatives undertaken by G20 members. Examples of domestic action include, but are not limited to, legislation that improves methods of waste management, the national reduction or prohibition of single-use plastics and microbeads, private sector partnerships to reduce the output of plastic litter and improving water filtration and wastewater treatment systems to reduce or remove microfibers.⁸⁷³⁵ International action refers to efforts undertaken by G20 members at the international or global level. Examples of international action include, but are not limited to, international cooperation with other members or states to improve national technical capacities, waste generation and littering and the promotion of sustainable consumption, engagement in information-sharing and scientific knowledge production on best practices through the G20 Resource Efficiency Dialogue, and international private sector engagement for the advancement of resource-efficient business models and environmentally sound product design.⁸⁷³⁶ Actions can also be partial or strong actions. If a G20 member gives verbal declarations of support towards the implementation of preventative/reduction strategies, organizes ocean clean ups or initiates environmental campaigns on marine plastic litter and microplastic waste, it would only be considered partial action. For strong action, a G20 member would have to engage in strong domestic or international actions listed above.

For full compliance, a G20 member must take domestic and international action to reduce and prevent both marine plastic litter and microplastic waste. Therefore, a G20 member would have to take domestic and international action to reduce marine plastic litter, reduce microplastic waste, prevent marine plastic litter and prevent microplastic waste. If a G20 member only takes action, domestically and/or internationally, to reduce or prevent marine plastic litter and/or microplastic waste, it would still be considered partial compliance. Actions that do not result in the reduction or prevention of additional pollution by marine plastic litter and microplastic waste will receive a negative score.

Scoring Guidelines

| | |
|----|---------------------------------------------------------------------------------------------------------------------------------------------|
| -1 | The G20 member takes no action to reduce NOR prevent marine plastic litter and microplastic waste. |
| 0 | The G20 member takes action to EITHER reduce OR prevent marine plastic litter AND/OR microplastic waste. |
| +1 | The G20 member takes actions both domestically and internationally to both reduce AND prevent marine plastic litter AND microplastic waste. |

Argentina: +1

Argentina has fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

⁸⁷³⁶ About Us, Ministry of the Environment (Tokyo) n.d. Access Date: 21 February 2021. <https://g20mpl.org/about>

On 30 November 2020, Argentina banned the production, importation, and marketing of cosmetic and care products containing microbeads.⁸⁷³⁷ According to the regulation, the cosmetic industry and companies have two years to adapt and exhaust their current stock.⁸⁷³⁸

On 8 April 2021, Argentina and 29 other countries signed on to a new United Nations-backed initiative, the GloLitter Partnerships Project, to prevent and reduce marine litter from the maritime transport and fisheries sectors.⁸⁷³⁹ The initiative is led by the Food and Agriculture Organization of the United Nations in tandem with the International Maritime Organization and funding from Norway through the Norwegian Agency for Development Cooperation.⁸⁷⁴⁰

On 1 September 2021, representatives from the Government of Argentina attended the Ministerial Conference on Marine Litter and Plastic Pollution, hosted by the Governments of Germany, Ecuador, Vietnam, and Ghana.⁸⁷⁴¹ Argentina supported the creation of a Global Agreement on Marine Litter and Plastic Pollution.⁸⁷⁴²

Argentina has taken domestic action through the ban on microbeads in cosmetic and care products and supported international efforts to reduce and prevent additional pollution from marine plastic litter and microplastic waste.

Thus, Argentina receives a score of +1.

Analyst: Kate Haberl

Australia: +1

Australia has fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 15 December 2020, Australia passed the Recycling and Waste Reduction Act 2020, the first national waste reduction plan.⁸⁷⁴³ The legislation has the objectives of reducing the “impact on human and environmental health of products” and to “develop a circular economy that maximizes the continued use of products and waste material over their life cycle and accounts for their environmental impacts.”⁸⁷⁴⁴ This legislation serves to encourage the prevention of marine plastic

litter by “regulating the export of waste material to promote its management in an environmentally sound way.”⁸⁷⁴⁵

On 17 February 2021, Australia joined the Global Oceans Alliance. The Alliance’s goal is to protect at least 30 per cent of the world’s oceans marine protected areas and marine conservation measures by 2030.⁸⁷⁴⁶ Additionally, Australia pledged AUD67.4 million to protect Australia’s oceans and marine ecosystems, AUD14.8 million to reduce the impacts of ghost nets and plastic litter, and AUD28.3 million to enhance marine parks.⁸⁷⁴⁷

On 4 March 2021, the Department of Agriculture, Water, and the Environment reaffirmed its commitment to the Pacific Ocean Litter Project.⁸⁷⁴⁸ This project works in tandem with Pacific island states to adopt single-use plastic bans, promote ocean cleanup plans, and raise “consumer awareness, support and motivation for reducing the use of single-use plastics.”⁸⁷⁴⁹ The Australian government has committed to investing a total of AUD16 million through 2025 to support this project.⁸⁷⁵⁰ Further, the federal government committed support to “coordinated global action to address marine plastic” with the United Nations.⁸⁷⁵¹

On 4 March 2021, Environment Minister Sussan Ley unveiled the National Plastics Plan 2021, which works to “fast-track the phase-out of particularly problematic plastic materials.”⁸⁷⁵² The plan affirms that by 1 July 2021, unsorted mixed plastic exports will be banned. Unprocessed single polymer plastic exports will be banned by 1 July 2022.⁸⁷⁵³ Minister Ley stated that the plan serves to encourage Australians to change the way they “produce, consume and recycle plastic.”⁸⁷⁵⁴

On 23 April 2021, the Australian government invested an additional AUD100 million towards the management of ocean and coastal environments and global emissions reduction.⁸⁷⁵⁵ The investment

aims to cut emissions to create cleaner beaches, improve fish stocks, and offer better protection and assistance for marine animals and indigenous communities reliant on oceans for their livelihoods.⁸⁷⁵⁶

On 2 May 2021, the Australian government announced an investment of AUD14.8 million towards Parks Australia's efforts to track and identify sources of ghost nets and ensure their removal from bodies of water.⁸⁷⁵⁷ The funding will get invested in initiatives that address ghost nets and marine debris litter, such as data collection and new technology.⁸⁷⁵⁸

On 11 May 2021, the Australian government unveiled its 2021-2022 budget, which includes funding for oceans, recycling, biodiversity, and climate resilience.⁸⁷⁵⁹ The budget sets aside AUD5 million to support small and medium-sized businesses to adopt the Australian Recycling Label and an additional AUD5.9 million for investments in industry-led stewardship schemes to reduce waste and increase resource recovery.⁸⁷⁶⁰ The budget further includes a new AUD100.1 million Oceans Leadership Package, which aims to restore blue carbon ecosystems, expand Australia's marine park network to protect 45 per cent of Australian waters, and protect marine species.⁸⁷⁶¹

On 18 May 2021, Minister Ley and Assistant Minister for Waste Reduction and Environmental Management Trevor Evans announced eight new projects worth AUD111 million towards building and modernizing infrastructure.⁸⁷⁶² The projects include a wastepaper and cardboard recycling plant in the northern suburbs of Adelaide, a material resource facility in the southern suburbs, and a glass processing plant outside of Gawler.⁸⁷⁶³

On 24 May 2021, the Australian government released the Recycling and Waste Reduction (Export Plastic) Rules 2021.⁸⁷⁶⁴ The rules come into effect on 1 July 2021 and implement regulations such as requiring licences that cover waste plastic, export declarations for the waste plastics.⁸⁷⁶⁵

On 1 July 2021, the Department of Industry, Science, Energy, and Resources promoted the annual "plastic free July" initiative by the Plastic Free Foundation LTD.⁸⁷⁶⁶ This initiative is designed to help

individuals decrease their single-use plastic usage, and promote habits that will overall prevent more plastic use and disposal.⁸⁷⁶⁷

Australia has taken domestic actions and supported international efforts to reduce and prevent additional pollution from marine plastic litter and microplastic waste through its 2021-2022 budget, National Plastics Plan 2021 and Recycling and Waste Reduction Act 2020.

Thus, Australia receives a score of +1.

Analysts: Matthew Brubacher and Sarah Weiner

Brazil: 0

Brazil has partially complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 8 April 2021, Brazil and 29 other countries signed on to a new UN-backed initiative, the GloLitter Partnerships Project, to prevent and reduce marine litter from the maritime transport and fisheries sectors.⁸⁷⁶⁸ The initiative is led by the Food and Agriculture Organization of the United Nations in tandem with the International Maritime Organization and funding from Norway through the Norwegian Agency for Development Cooperation.⁸⁷⁶⁹

On 1 September 2021, representatives from the Government of Brazil attended the Ministerial Conference on Marine Litter and Plastic Pollution, hosted by the Governments of Germany, Ecuador, Vietnam, and Ghana.⁸⁷⁷⁰ Brazil did not support the creation of a Global Agreement on Marine Litter and Plastic Pollution but supported further discussions.⁸⁷⁷¹

Brazil has taken partial action by supporting international efforts to reduce and prevent additional pollution by marine plastic litter. However, it has not taken domestic action to reduce or prevent marine plastic litter or microplastic waste.

Thus, Brazil receives a score of 0.

Analyst: Kate Haberl

<https://enb.iisd.org/ocean/conference-marine-litter-and-plastic-pollution/summary>

On 9 December 2020, Canada concluded a public consultation period on a proposed integrated management approach to plastic products to prevent waste and pollution, initiated by a paper on the subject published in October 2020. The purpose of this initiative is to provide “the basis for the developed of an integrated management approach to plastics, including proposed actions across the value chain to achieve zero plastic waste (including a ban on plastic checkout bags, straws, stir sticks, six-pack rings, cutlery, and food ware made from hard-to-recycle plastics), as well as systemic improvements to recover and recycle plastic,” with regulations expected to be finalized by the end of 2021. This work directly stems from Canada’s adoption of the Ocean Plastics Charter in June 2018.⁸⁷⁷²

On 5 March 2021, Minister of Environment and Climate Change Jonathan Wilkinson announced four winners of the Canadian Plastics Innovation Challenges.⁸⁷⁷³ These small and medium companies, Magemi Mining Inc., CACITH Inc., Met-Tech Inc., and Singular Solutions In., will receive up to CAD150,000 to develop solutions to address plastic waste.⁸⁷⁷⁴ The Canadian Plastics Innovation Challenges are a part of the innovative Solutions Canada program and support Canada’s commitment to plastic waste reduction.⁸⁷⁷⁵

On 31 March 2021, Canada’s Parliamentary Committee passed a bill banning the export of non-recyclable plastic waste from Canada to foreign countries.⁸⁷⁷⁶ Bill C-204, sponsored by Member of Parliament Scot Davidson, was adopted by the environmental committee in a 6-5 vote.⁸⁷⁷⁷ The committee also approved an amendment requiring the Canadian government to implement the bill within 12 months of receiving royal assent.⁸⁷⁷⁸

On 9 April 2021, the Parliamentary Secretary to the Minister of Public Safety Joël Lightbound announced a CAD1 million investment to BOSK Bioproducts Inc.⁸⁷⁷⁹ The investment is a part of the second phase of the Bioplastics Challenge, aimed to help small businesses reduce pollution by

⁸⁷⁸⁷ Government of Canada builds on success under the Ghost Gear Fund with second call for proposals, Newswire (Ottawa) 10 June 2021. Access Date: 8 September 2021. <https://www.newswire.ca/news-releases/government-of-canada-builds-on-success-under-the-ghost-gear-fund-with-second-call-for-proposals-880241940.html>

Canada created the Ghost Gear Fund in 2020 to limit the contribution of lost, abandoned, and discarded fishing gear as one of the largest causes of marine pollution.⁸⁷⁸⁸ In 2020, the fund helped remove 63 tonnes of gear from Canadian waters.⁸⁷⁸⁹

On 14 June 2021, during the 18th EU-Canada summit, Canada and the EU announced that they will step up cooperation and multilateral action on the circular economy, the efficient use of natural resources and the adequate management of chemicals and waste.⁸⁷⁹⁰ In particular, Canada and the EU will work towards a new global treaty on plastics, including efforts to fight ocean plastic pollution. In this regard, they launched an Ocean Partnership Forum under the EU-Canada Ocean Partnership Declaration.⁸⁷⁹¹

Canada has taken domestic action through public and private sector partnerships to reduce the output of plastic waste and has taken international bilateral action to fight ocean plastic pollution.

Thus, Canada receives a score of +1.

Analysts: Luisa Cortat Simonetti Goncalves

China: +1

China has fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 27 November 2020, the Ministry of Ecology and Environment, through a video conference, highlighted the importance of the 14th Five-Year Plan for key river basins and the marine ecological environment.⁸⁷⁹² According to the consultation suggestions, provincial ecological and environmental departments would further fulfil their primary responsibilities and provide technical guidance and supervision to protect the marine environment.⁸⁷⁹³

On 1 December 2020, the Ministry of Commerce issued the Measures on the Use and Recycling of Disposable Plastic Products in the Commercial Field (Test) to encourage and guide the commercial field to reduce the use and actively recycle plastic bags and other disposable plastic products.⁸⁷⁹⁴ The measures aim to promote recyclable, easy to recycle and biodegradable alternatives, thereby reducing

per local conditions.⁸⁸⁰⁴ Additionally, they promote the prevention and treatment of plastic pollution throughout the supply chain.⁸⁸⁰⁵

On 31 August 2021, the Ministry of Ecology and Environment held a regular monthly press conference to emphasize the importance of the reduction of marine plastic litter.⁸⁸⁰⁶ The Ministry highlighted four measures, including managing the source of plastic production, strengthening public education, and participation in marine plastic litter prevention, and facilitating the prevention and control of marine plastic litter by coastal local governments, including the marine litter plastic in the overall planning of special actions for pollution prevention and control.⁸⁸⁰⁷

China has taken domestic actions and promoted bi-lateral and international efforts to reduce and prevent additional pollution from marine plastic litter and microplastic waste.

Thus, China receives a score of +1.

Analyst: Tianyang (Victoria) Wang

France: +1

France has fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 1 January 2021, France enacted several measures as part of its anti-waste law to reduce plastic waste and single-use plastics in the country.⁸⁸⁰⁸ In particular, the enacted measures banned the distribution of plastic bottles in public and commercial facilities and professional premises, the use and production of plastic confetti and expandable polystyrene containers and the production and use of single-use plastics.⁸⁸⁰⁹ Additionally, supermarkets in the country are now obligated to provide sorting containers to encourage recycling.⁸⁸¹⁰ Further, France outlined future commitments: amongst them, effective 1 January 2022, public facilities must have at least one drinking water fountain on site, press publications will have to be expedited without plastic wrapping, toys distributed to children as part of menus will have to be plastic-free, and the State will no longer purchase single-use plastic

Indonesia: –1

Indonesia has not complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

Indonesia has not taken any actions or made any collaborative commitments both domestically and internationally to reduce or prevent additional pollution by marine plastic litter and microplastic waste as articulated by the Osaka Blue Ocean Vision.

Thus, Indonesia receives a score of –1.⁸⁸⁴⁴

Italy: -1

Italy has not complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 30 December 2020, Italy published the budget law, which postponed the entry into force of the plastic tax from 1 January 2021 to 1 July 2021 (article 1084).⁸⁸⁴⁵ The plastic tax established the charge of EUR0.45 per kilogram of single-use plastic produced from virgin feedstock (i.e., not recycled).⁸⁸⁴⁶

Although Italy has the intention to support the reduction and prevention of additional pollution by marine plastic litter, Italy has yet to implement any concrete national actions or support international efforts concerning this commitment.

Thus, Italy receives a score of -1.⁸⁸⁴⁷

Japan: +1

Japan has fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 18 January 2021, Foreign Minister Toshimitsu Motegi gave a speech at the 204th session of the Diet and said that “Japan will accelerate its efforts to achieve the Sustainable Development Goals and tackle global issues by making active and strategic use of Official Development Assistance. In particular, actively working on solving marine plastic litter issues to achieve the Sustainable Development Goals.”⁸⁸⁴⁸

In January 2021, the Ministry of the Environment released its initiatives to achieve carbon neutrality by 2050 and reiterated the Ministry’s resolution to promote measures to tackle marine plastic pollution in Japan and abroad.⁸⁸⁴⁹

On 19 January 2021, the Ministry of Economic, Trade and Industry and the Ministry of the Environment jointly compiled the Disclosure and Engagement Guidance to Accelerate Sustainable Finance for a Circular Economy.⁸⁸⁵⁰ The purpose of the guidance was to improve Japanese companies’ ability to promote a circular economy over the medium or long term and enhance the resource circulation for plastics waste.⁸⁸⁵¹

On 4 February 2021, Japan and China, during the 12th round of high-level consultations on maritime affairs, agreed to cooperate on the prevention and control of marine plastic waste.⁸⁸⁵²

On 16 February 2021, Japan and India announced their intent to collaborate on the reduction of marine litter through scientific and regional-level data sharing.⁸⁸⁵³ This collaboration got announced during the Indo-Japan online seminar “Marine Plastic Prevention and Management.”⁸⁸⁵⁴

On 20 August 2021, the Ministry of Foreign Affairs launched the “Marine Initiative” toward the realization of the Osaka Blue Ocean Vision, which aims to reduce additional pollution by marine plastic litter to zero by 2050.⁸⁸⁵⁵ The “Marine Initiative” includes three concrete policy measures to advance effective actions to combat marine plastic litter at a global scale.⁸⁸⁵⁶ The policy measures are 1) international Cooperation, including bilateral ODA and assistance through international organizations; 2) international operations by Japanese companies, NGOs, and local governments; and 3) dissemination and sharing of best practices.⁸⁸⁵⁷

Japan has verbally reaffirmed its commitment and encouraged bilateral and international cooperation to reduce additional pollution by marine plastic litter. Furthermore, it has launched the “Marine Initiative” for the realization of the Osaka Blue Ocean Vision.

Thus, Japan has received a score of +1.

Analyst: Tianyang (Victoria) Wang

Korea: +1

Korea has fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 27 May 2021, the Korean International Cooperation Agency and the United States Agency for International Development to implement joint development projects in the Philippines.⁸⁸⁵⁸ The Climate Resilient Cities project aims to strengthen the country's resilience to climate change and address marine plastic pollution through marine litter management initiatives.⁸⁸⁵⁹

On 1 February 2021, Turkey announced that it is working to institute a credit rebate to citizens for recycling beverages and other containers.⁸⁸⁹⁹

Turkey has partially complied with its commitment by working on an initiative that will give a credit rebate for recycling, which will support the reduction and prevention of additional pollution by marine plastic litter. However, Turkey has not taken concrete action on this commitment.

Thus, Turkey receives a score of 0.

Analyst: Vlada Taitis

United Kingdom: +1

The United Kingdom fully complied with its commitment to reduce and prevent additional pollution by marine plastic litter.

On 7 December 2020, the UK and India launched the UK-India Marine Litter Twin Cities project, an initiative conceptualized by India's Ministry of Earth Sciences and the UK Science and Innovation Network.⁸⁹⁰⁰ Through the project, three coastal port cities in India are to be twinned with three coastal towns in the UK.⁸⁹⁰¹ The project aims to promote bilateral engagement between scientists, innovators and policymakers in the twinned cities and strengthen best practices for managing marine litter.⁸⁹⁰²

On 18 March 2021, the Department for Environment, Food and Rural Affairs released plans for a new Waste Prevention Programme for England.⁸⁹⁰³ This program sets out how the UK and industry can minimize waste and its impact on the environment across seven key sectors, including packaging, plastics, and single-use items.⁸⁹⁰⁴ The plan will be open for stakeholder consultation until 10 June 2021.⁸⁹⁰⁵

On 22 March 2021, the UK published an updated Marine Strategy Part Two. This update outlines the monitoring programs that will be used to provide the evidence for the 2024 assessment of progress towards Good Environmental Status within the UK Marine Strategy area.⁸⁹⁰⁶

On 6 April 2021, the UK opened the Fisheries and Seafood Scheme for applications. The scheme will provide GBP6.1 million over 12 months to support the seafood sector, coastal communities and the marine environment. It will work with the fishing industry to reduce emissions and provide environmental improvements.⁸⁹⁰⁷

On 30 April 2021, Parliamentary Under-Secretary of State at the Department for Environment, Food and Rural Affairs Rebecca Pow announced that the charge for plastic bags in all UK retail stores would be doubled to GBP0.10, starting on 21 May 2021.⁸⁹⁰⁸ This is a delay from the Department for Environment, Food & Rural Affairs' original plan to implement the change in April 2021.⁸⁹⁰⁹

On 14 June 2021, at the UK hosted G7 Summit, Prime Minister Boris Johnson launched the GBP500 million Blue Planet Fund. The Blue Planet Fund “aims to support developing countries to protect the marine environment and reduce poverty, and seeks outcomes in biodiversity, climate change, marine pollution and sustainable seafood. Specifically, the fund aims to: improve marine biodiversity and support livelihoods by protecting and enhancing marine ecosystems, improve resilience, adaptation to and Prime Minister Launches GBP500m Blue Planet Fund mitigation of climate change, reduce marine pollution through action on land-based and sea-based sources, and ensure that seafood is produced and distributed in ways which support healthy ecosystems. The Fund is managed by the Department for Environment, Food & Rural Affairs and the Foreign, Commonwealth and Development Office, and will run for at least 5 years.”⁸⁹¹⁰

The United Kingdom has fully complied with its commitment by reducing and preventing additional pollution in India, has announced a new initiative to minimize waste and has implemented a higher charge for plastic bags. Furthermore, through the UK's Presidency of the G7, the Blue Planet Fund was launched which supports developing countries to improve the health of the marine environment, including by eliminating plastic litter.

Thus, the United Kingdom receives a score of +1.

Background

According to the United Nations, “the impacts of climate change are global in scope and unprecedented in scale,”⁸⁹³² threatening food production, the availability of resources, and economic development. For several decades, international organs such as the UN have begun referring to the rising climate and depletion of resources as a point of significant concern. The first earth conference was hosted by the UN in Stockholm, Sweden in 1972, introducing recommendations for international environmental action.⁸⁹³³ In more recent years, these recommendations have evolved into further commitments, namely the 2015 Paris Agreement. Accordingly, the G20 members have addressed climate change in some capacity at every summit held since the inaugural summit in 2008.⁸⁹³⁴ Accounting for nearly 80 per cent of global emissions, the G20 member states have a

⁸⁹³⁴ Declaration of the Summit on Financial Markets and the World Economy, G20 Research Group (Washington) 15 November 2008. Access Date: 26 February 2021. <http://www.g20.utoronto.ca/2008/2008declaration1115.html>

significant role to play in collective actions aimed at addressing climate change and its effects.⁸⁹³⁵ Additionally, bold action on climate change has the potential to produce USD26 trillion in economic benefits, as is cited by the UN.⁸⁹³⁶ Meaning, addressing climate change is and will continue to be a pressing issue for the G20, as their primary goal is to promote “international financial stability.”⁸⁹³⁷

The topic of climate change was addressed at the G20 inaugural summit, the 2008 Washington, D.C. Summit. G20 members acknowledged climate change as a “critical challenge” that needed to be addressed; however, failed to provide further specificity indicating the instruments to do so.⁸⁹³⁸ Nor did they identify a specific goal to meet in this topic area.

At the 2009 London Summit, the G20 members reaffirmed their “commitment to address the threat of irreversible climate change, based on the principle of common but differentiated responsibilities, and to reach agreement at the UN Climate Change conference in Copenhagen in December 2009” in their single commitment dedicated towards climate change.⁸⁹³⁹ This marked the first time climate change was addressed in a commitment while referencing specific and measurable goals outlined in the 2009 UN Climate Change Agreement.

At the 2009 Pittsburgh Summit, the G20 members dedicated a significant portion of the conference to consider energy security and climate change, marking the first time the members recognized climate change as a multi-faceted issue with multiple factors. In the leaders’ statement, they addressed specific issues concerning climate change, including “inefficient fossil fuel subsidies [that] encourage wasteful consumption, distort markets, impede investment in clean energy sources and undermine efforts to deal with climate change.”⁸⁹⁴⁰ Members also identified specific steps to address climate change, including “increasing clean and renewable energy supplies, improving energy efficiency, and promoting conservation.”⁸⁹⁴¹

At the 2010 Toronto Summit, the G20 members reaffirmed their previous commitments to addressing climate change but failed to make any further commitments on the topic.⁸⁹⁴² The commitments on climate change at this summit also lack further specificity.

At the 2010 Seoul Summit, the G20 members reaffirmed their commitment to fight climate change. More specifically, they made a commitment to “rationalize and phase-out over the medium-term inefficient fossil fuel subsidies; mitigate excessive fossil fuel price volatility; safeguard the global marine environment; and combat the challenges of global climate change.”⁸⁹⁴³

⁸⁹³⁵ Lagging in climate action, G20 nations have huge opportunities to increase ambition, United Nations (New York) 21 September 2019. Access Date: 26 February 2021. <https://www.unep.org/news-and-stories/press-release/lagging-climate-action-g20-nations-have-huge-opportunities-increase>

At the 2011 Cannes Summit, the G20 members identified the fight against climate change as a main priority. Specifically, there was a significant focus placed on financing initiatives addressing climate change, primarily supporting “climate-related investments in developing countries” and “assist[ing] developing countries to mitigate and adapt to the impact of climate change.”⁸⁹⁴⁴ Additionally, G20 members committed to “fostering clean energy, green growth and sustainable development [through] promot[ing] low-carbon development strategies.”⁸⁹⁴⁵

At the 2012 Los Cabos Summit, the G20 members acknowledged the significant impact of climate change on the world economy and reaffirmed their commitment to fight climate change. They committed to take action to fulfill their Rio+20 and the United Nations Framework Convention on Climate Change agreements, the Green Climate Fund, implementation of Cancun and Durban outcomes and achieving greater outcomes at COP-18. Additionally, they recognized the importance of adapting agriculture to climate change, namely through “improving the efficiency of water and soil use in a sustainable manner.”⁸⁹⁴⁶

At the 2013 St. Petersburg Summit, the G20 members reaffirmed their commitment to the fight against climate change and committed to the full implementation of the United Nations Framework Convention on Climate Change outcomes, as well as the Green Climate Fund.⁸⁹⁴⁷ In this, they specified their commitment to adhering to the Kyoto protocol for accounting and reporting emissions, marking the first direct reference to the role of CO₂ emissions in addressing climate change.⁸⁹⁴⁸

At the 2014 Brisbane Summit, the G20 members reaffirmed their commitment to the United Nations Framework Convention on Climate Change’s outcomes, as well as to the Green Climate Fund.⁸⁹⁴⁹ Additionally, they committed to “an Action Plan for Voluntary Collaboration on Energy Efficiency, including new work on the efficiency and emissions performance of vehicles, particularly heavy-duty vehicles; networked devices; buildings; industrial processes; and electricity generation; as well as work on financing for energy efficiency.”⁸⁹⁵⁰

At the 2015 Antalya Summit, the G20 members identified climate change as “one of the greatest challenges of our time” and committed to the below 2°C goal in the Lima Call for Action, as well as the commitments made in the “ambitious agreement in Paris.”⁸⁹⁵¹ Additionally, members emphasized

the importance of “improving energy efficiency, increasing investments in clean energy technologies and supporting related research and development activities.”⁸⁹⁵²

At the 2016 Hangzhou Summit, the G20 members reaffirmed their commitment to the Paris Agreement and the Green Climate Fund, specifically “in providing means of implementation including financial resources to assist developing countries with respect to both mitigation and adaptation actions in line with Paris outcomes.”⁸⁹⁵³ Additionally, members restated their commitment to “to building well-functioning, open, competitive, efficient, stable and transparent energy markets, fostering more effective and inclusive global energy architecture to better reflect the changing realities of the world’s energy landscape, and shaping an affordable, reliable, sustainable and low greenhouse gas (GHG) emissions energy future while utilizing energy sources and technologies.”⁸⁹⁵⁴

At the 2017 Hamburg Summit, the G20 members recognized that “a strong economy and a healthy planet are mutually reinforcing”⁸⁹⁵⁵ and reaffirmed their commitment to reducing greenhouse gas emissions. Members also acknowledged the importance of a collaborative effort in keeping in line with the 2030 Agenda for Sustainable Development, identifying “energy security as one of the guiding principles for the transformation of our energy systems.”⁸⁹⁵⁶ The decision of the United States to withdraw from the Paris Climate Change Agreement was noted, and the leaders of the other G20 members acknowledged the irreversibility of the agreement.

At the 2018 Buenos Aires Summit, the G20 members “recognize[d] the importance of comprehensive adaptation strategies, including investment in infrastructure that is resilient to extreme weather events and disasters,” noting the global warming of 1.5 degrees.⁸⁹⁵⁷ Members also reaffirmed the importance of “energy security, sustainability, resilience, efficiency, affordability and stability” in achieving the broader goal of reduced emissions.⁸⁹⁵⁸

From 15-16 June 2019, G20 Energy and Environment Ministers met for the first time. They stated that “We, the G20 Environment Ministers, recognize that improving resource efficiency through policies and approaches, such as circular economy, sustainable materials management, the 3Rs (reduce, reuse, recycle) and waste to value, supports our belief that economic growth and environmental protection can and should go hand-in-hand, contributing to the Sustainable Development Goals” and “We recognize the economic and environmental benefits of resource efficiency and circular economy policies in their potential to reduce all types of emissions, and look forward to pursuing these benefits.”⁸⁹⁵⁹

At the 2019 Osaka Summit, the G20 members recognized the “urgent need for addressing complex and pressing global issues and challenges including climate change; resource efficiency; air, land, freshwater and marine pollution; biodiversity loss; sustainable consumption and production; urban

environmental quality; and other environmental issues.”⁸⁹⁶⁰ Key areas of focus on this topic were reducing emissions and fostering resilient development. In regard to resource efficiency, the G20 leaders also emphasized that “We recognize that improving resource efficiency through policies and approaches, such as circular economy, sustainable materials management, the 3Rs (reduce, reuse, recycle) and waste to value, contributes to the SDGs, as well as to addressing a wide range of environmental challenges, enhancing competitiveness and economic growth, managing resources sustainably, and creating jobs.”⁸⁹⁶¹

On 28 September 2020, G20 Energy Ministers met virtually, dedicating an entire section of the communiqué to the “Circular Carbon Economy for Cleaner and More Sustainable Energy Systems.” G20 Energy Ministers stated “we endorse the Circular Carbon Economy (CCE) Platform and its “4Rs” framework (Reduce, Reuse, Recycle and Remove) while acknowledging...and recognizing the key importance of reducing greenhouse gas emissions, taking into account system efficiency and national circumstances, including its specific resources endowment and its political, economic, environmental, social, and risk-informed development contexts, noting:

- “Reduce: Lower GHG [greenhouse gas] emissions by utilizing technologies and innovations such as renewable energy and nuclear energy, improving energy productivity and efficiency, and better managing energy supply and consumption. Recognizing the vital role that:
 - “Energy efficiency plays an important role in reducing overall energy demand, avoiding energy waste and increasing energy productivity. We acknowledge the achievements of the G20 cooperation on Energy Efficiency and will encourage future international collaboration to fully utilize the potential energy efficiency;
 - “Renewables, such as wind, solar, hydro, geothermal, marine/ocean, bioenergy and biofuels, are important for providing clean energy systems;
 - “Nuclear plays, in providing clean energy, for those who opt to use it, as well as in enhancing energy security. We note the importance of addressing challenges including decommissioning and final disposal of radioactive waste issues;
- “Reuse: Convert emissions into useful industrial feedstock by deploying Carbon Capture and Utilization (CCU), including Emissions to Value (E2V) and Carbon Recycling (CR). Noting the potential of CCU as an advanced and cleaner technology that can help mitigate the impacts of emissions by capturing and reusing them;
- “Recycle: Neutralize carbon emissions through natural processes and decomposition, including through the use of renewable sources of energy such as biofuels, bioenergy and energy carriers such as methanol, ammonia, and urea representing the natural cycle and the recycling; and
- “Remove: Remove emissions from the atmosphere as well as from heavy industries and facilities through Carbon Capture and Storage (natural and geological) and Direct Air Capture.”⁸⁹⁶²

At the 2020 Riyadh Summit, the G20 members identified “preventing environmental degradation, conserving, sustainably using and restoring biodiversity, preserving our oceans, promoting clean air and clean water, responding to natural disasters and extreme weather events, and tackling climate

⁸⁹⁶⁰ G20 Osaka Leaders’ Declaration, G20 Information Centre (Toronto) 29 June 2019. Access Date: 26 February 2021. <http://www.g20.utoronto.ca/2019/2019-g20-osaka-leaders-declaration.html>

⁸⁹⁶² G20 Energy Ministers Communiqué, G20 Information Centre (Toronto) 28 September 2020. Access Date: 26 March 2021. <http://www.g20.utoronto.ca/2020/2020-g20-energy-0928.html>

change” as being among the most “pressing issues of our time.”⁸⁹⁶³ They also reaffirmed the importance of international cooperation in addressing climate change, in accordance with the UNFCCC and the Paris Agreement.

Commitment Features

On 21 November 2020, G20 leaders adopted the present commitment at a virtual summit hosted by Riyadh, Saudi Arabia. The commitment reads as the following: “We endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.” This was the first time the G20 leaders used the phrase “circular carbon economy.”

To “endorse” is understood as “to make a public statement of your approval or support for something or someone.”⁸⁹⁶⁴ This verb constitutes a weak politically binding commitment, meaning, this term signifies a firm commitment but is a weak catalyst for compliance.⁸⁹⁶⁵ The definition of this term indicates that actions surrounding this commitment are likely to be more political in nature, rather than policy centered. Actions compliant with this commitment include, but are not limited to, allocating funding towards renewable energy, implementing a more effective waste system, and taking steps towards reducing carbon emissions.

The “circular carbon economy” (CCE), as defined by the G20 in their Riyadh communiqué is a “voluntary, holistic, integrated, inclusive, pragmatic, and complementary approach to promote economic growth while enhancing environmental stewardship through managing emissions in all sectors including, but not limited to, energy, industry, mobility, and food.”⁸⁹⁶⁶ Similarly, the CCE guide defines the CCE as “an integrated and inclusive approach to transitioning toward more comprehensive, resilient, sustainable, and climate-friendly energy systems that support and enable sustainable development. CCE enables countries to take advantage of all technologies, forms of energy, and mitigation opportunities according to resource availability, economics, and national circumstances.”⁸⁹⁶⁷ The CCE Platform incorporates the 4Rs “while acknowledging and recognizing the key importance of reducing greenhouse gas emissions, taking into account system efficiency and national circumstances, including its specific resources endowment and its political, economic, environmental, social and risk-informed development contexts.”⁸⁹⁶⁸

The CCE “builds on the principles of circular economy and applies them to managing carbon emissions: to reduce the carbon that must be managed in the first place, to reuse carbon as an input to create feedstocks and fuels, to recycle carbon through the natural carbon cycle with bioenergy, and, unique to circular carbon economy, to remove excess carbon and store it.”⁸⁹⁶⁹ To “reduce” refers to carbon reductions and energy efficiency, non-bio renewables, and nuclear electricity. To “reuse” refers to converting CO₂ into fuels, chemicals and building materials, including synthetic

⁸⁹⁶⁸ G20 Energy Ministers Communiqué, G20 Information Centre (Toronto) 28 September 2020. Access Date: 26 March 2021. <http://www.g20.utoronto.ca/2020/2020-g20-energy-0928.html>

⁸⁹⁶⁹ Guide to the Circular Carbon Economy, King Abdullah Petroleum Studies and Research Centre (Riyadh) August 2020. Access Date: 26 March 2021. <https://www.cceguide.org/guide/>

hydrocarbon fuels. To “recycle” refers to using bioenergy as fuel and feedstock or to generate electricity.⁸⁹⁷⁰ To “remove” refers to carbon capture and storage,⁸⁹⁷¹ which involves “the capture of [CO₂] from fuel combustion or industrial processes, the transport of this CO₂ via ship or pipeline, and either its use as a resource to create valuable products or services or its permanent storage deep underground in geological formations.”⁸⁹⁷² Furthermore, the CCE incorporates the use of hydrogen as “a highly versatile fuel that can help decarbonize hard-to-abate sectors where other low carbon alternatives are not an option (such as transport, industrial applications or buildings) while serving to store energy from renewable generation and assist in balancing its variability.”⁸⁹⁷³ Enabling policies that support the CCE are overcoming barriers to financing the carbon capture, utilization and storage (“remove”) and accelerating innovation.⁸⁹⁷⁴

The term “efficiency” is to be understood as “the good use of time and energy in a way that does not waste any.”⁸⁹⁷⁵ In this context, system efficiency indicates an understanding that policies in accordance with this commitment should be balanced with maintaining the efficiency of existing systems and when possible, should enhance the efficiency of these systems. Examples of systems to be considered include transportation systems, financial systems, and food production systems. These definitions indicate that this commitment takes into account the use of energy and emphasizes policies that reduce energy waste within systems. In cases where a complete shift in policy would disrupt the efficiency of an existing system, policies that commit to transitioning to a CCE will be considered.

In this context, “national circumstance” is to be understood as the consideration of the varying resources available to different G20 members. Meaning, policies in accordance with this compliance will vary between members and should utilize the resources available on a case-by-case basis. For example, members with little access to water as a source of renewable energy due to geographical reasons would be expected to employ other forms of venerable energy. The phrase “national circumstances” also takes into account each member state’s share of global CO₂ emissions when assessing policies aimed at reducing emissions.

To achieve full compliance (+1), G20 members must take actions in all 4Rs, including in the hydrogen or enabling policies aspect of the CCE. These actions must be strong actions where a G20 member takes concrete action on at least three of the 4Rs and partial action on the final of the 4Rs, as well as either hydrogen or enabling policies. Concrete actions include implementing policies, changing or drafting laws, initiating or implementing a new program or project, or contributing technical or financial assistance to an existing program or project. If a G20 member takes concrete action in all 4Rs, without specifically targeting the hydrogen or enabling practices, it would still be considered full compliance.

For partial compliance (0), a G20 member would take strong action in two three of the 4Rs without taking into consideration hydrogen or enabling policies.

<https://dictionary.cambridge.org/dictionary/english/efficiency>

If a G20 member only takes partial action, such as reaffirmation of the commitment or attending a meeting, on one or two of the 4Rs, it would be non-compliance (-1). Similarly, if a G20 member takes no action, it would be considered non-compliance.

Scoring Guidelines

| | |
|----|-------------------------------------------------------------------------------------------------------------------------------------|
| -1 | G20 member does not take strong action on any of the 4Rs. |
| 0 | G20 member takes strong action in TWO or THREE of the 4Rs, without taking into consideration hydrogen or enabling policies. |
| +1 | G20 member takes strong action on THREE or FOUR of the 4Rs, while also taking into consideration hydrogen AND/OR enabling policies. |

Argentina: +1

Argentina has fully complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 1 December 2020, the Ministry of Environment and Sustainable Development introduced a working instruction that hopes to promote a Sustainable Public Administration. This methodology was developed to analyze the level of sustainability in areas including: “energy management; water management, waste management; maintenance, order and cleanliness; rationalization of the use of paper and implementation of the electronic process; sustainable shopping; sustainable mobility and telework; surfaces and green spaces, among others.”⁸⁹⁷⁶

On 2 December 2020, the Ministry of Environment and Sustainable Development announced it would implement a biodigester in the Bolivian Community Fruit and Vegetable Concentrator Market in Buenos Aires. The goal is to reduce organic waste and use the process of biodigestion to generate electricity.⁸⁹⁷⁷

On 12 December 2020, President Alberto Fernández announced Argentina’s goal of reducing greenhouse emissions by 25.7 per cent and reaching carbon neutrality by 2050 at the Climate Ambition Summit.⁸⁹⁷⁸ The President stated: “Argentina reaffirms its commitment to the Paris Agreement and adopts climate change as a State policy.”⁸⁹⁷⁹ It was also announced that Argentina

⁸⁹⁷⁶ Cabandié and Montero headed the first meeting of the Internal Control Committee of the Ministry of the Environment, Ministry of Environment and Sustainable Development (Buenos Aires) 1 December 2020. ⁸⁹⁷⁹ Argentina announced its new commitment in the fight against climate change, Ministry of Environment and Sustainable Development (Buenos Aires) 12 December 2020. Access Date: 12 March 2021.

<https://www.argentina.gob.ar/noticias/argentina-anuncio-su-nuevo-compromiso-en-la-lucha-contra-el-cambio-climatico>

would start preparing its National Plan for Adaptation and Mitigation to Climate Change and involve the participation of actors from public and private sectors.⁸⁹⁸⁰

On 14 December 2020, Minister of Environment and Sustainable Development Juan Cabandié presented the new Nationally Determined Contribution to the year 2030.⁸⁹⁸¹ It seeks to reaffirm Argentina's commitment to climate action. Through committing to delivering this commitment to the United Nations Framework Convention on Climate Change at the end of the year. Additionally, President Fernández announced that Argentina has identified carbon neutrality as the goal for 2050.

On 16 December 2020, Minister Cabandié announced the Ministry of Environment and Sustainable Development's contributions of ARS367 million to Santiago del Estero.⁸⁹⁸² Of the ARS367 million allocated to the city, ARS6.9 million will be used for renovation works, to be carried out through work cooperatives in the area, with the inclusion of recycled materials for urban furniture. Another ARS80 million is allocated for the purchase of machinery aimed at optimizing the management of urban solid waste and enhancing its classification, and separation. The remaining ARS280 million will be used for the national environmental portfolio through the Bosques Nativos y Comunidad project which will incorporate a variety of initiatives, namely forest regeneration, improved wood-burning stoves, and rainwater collection roofs.

On 17 December 2020, Ambassador of Portugal in Argentina José Ludovice and Minister Cabandié reaffirmed their commitment to continue two collaborative environmental and sustainable development projects. One of the projects, called "Program of systematization and online monitoring of the circular economy," aims to solicit statistical information to better understand urban solid waste and reinforce the circular economy.⁸⁹⁸³

On 30 December 2020, Minister Cabandié signed agreements for six projects under the Comprehensive Common House Plan, investing a total of ARS33 million.⁸⁹⁸⁴ The Common House Program aims to promote sustainability and environmentalism, with particular commitment to the circular economy. The six projects are described as the following: the remodeling of the sustainable public space in Plaza Eva Perón, located in Puerto Iguazú, Misiones province; the improvement and development of the sustainable plaza Campanas del Rosario, located in the town of Fray Mamerto Esquiú in the province of Catamarca; the creation of the Villa Pehuena Environmental Park, in the province of Neuquén; the construction of a shed that will allow urban solid waste treatment tasks in

El Pingo, Entre Ríos; and finally, the construction of a municipal nursery in Alto Río Senguer and the enhancement of the urban nature reserve located in Cholila, both located in Chubut.⁸⁹⁸⁵

On 30 December 2020, Minister Cabandié stated that the Ministry of Environment and Sustainable Development is making deliveries in 60 municipalities throughout Argentina to provide better infrastructure and equipment for waste management workers, investing a total of ARS60 million. The goal is to make improvements within local waste management systems across Argentina.⁸⁹⁸⁶

On 31 December 2020, the Ministry of Environment and Sustainable Development published the Second Contribution Determined at the National Level, which outlines Argentina's commitment to Paris Agreement objectives. This Second Contribution aims to improve adaptations to climate change and promote sustainable development in accordance with the Paris Agreement. In these objectives, Argentina commits to limiting gas emissions to 26 per cent lower than the goal identified in 2016.⁸⁹⁸⁷

On 22 January 2021, the Ministry of Environment and Sustainable Development deposited its ratification instrument of the Escazú Agreement before the Secretary-General of the United Nations on behalf of the Argentine Government. The Agreement, signed by 24 countries in Latin American and the Caribbean, outlines protocols for protecting the environment and points to Argentina's commitment to sustainability.⁸⁹⁸⁸

On 26 January 2021, the Ministry of Environment and Sustainable Development signed an agreement with the municipality of Escobar and the Asociación Civil Colectividad Boliviana de Escobar to install a biodigester in the region's Fruit and Vegetable Market. The biodigester will generate clean electricity from the organic waste and also produce natural biofertilizer.⁸⁹⁸⁹

On 5 February 2021, the Ministers of Environment of Chile and Argentina announced a collaborative initiative to share good practices for the implementation of climate action. The goal is to uphold the Paris Agreement by sharing resources and working with other Latin American and Caribbean countries.⁸⁹⁹⁰

On 22 February 2021, the Ministry of Environment and Sustainable Development announced it will implement a biogas plant in the Gualaguaychú Ecopark of Entre Ríos. The plant will reduce greenhouse gas emissions while converting the biogas into electrical energy.⁸⁹⁹¹

On 22 February 2021, Minister Cabandié announced that the Ministry of Environment and Sustainable Development tripled all provincial budgets towards the preservation of forest basins. The increased budget will encourage provinces to work to protect native forests. Additionally, a donation of ARS82 million was made to the Green Climate Fund for the next six years.⁸⁹⁹²

On 1 March 2021, President Fernández highlighted Argentina's commitment to climate sustainability, the circular economy, protection of native forests and the creation of new protected areas. The President stated, "We are absolutely committed to the principles established in the Paris Agreement." The President then announced Argentina's commitment to active policy promotion of the circular economy to "eradicate open-air dumps, improve the final disposal of urban solid waste and the working conditions of urban waste collectors."⁸⁹⁹³

On 16 March 2021, Minister Cabandié and Head of the Ministry of Agrarian Development of Buenos Aires Javier Rodríguez signed an agreement establishing collaboration between the two organizations. The agreement aims to "encourage innovative proposals that incorporate environmental criteria in order to design and implement specific programs, plans and projects at the local level for sustainable development in the provincial territory."⁸⁹⁹⁴

On 25 March 2021, the Ministry of Environment and Sustainable Development signed a financial and technical collaborative protocol with the Environmental Fund of the Ministry of Environment and Climate Action of Portugal.⁸⁹⁹⁵ The Ministry of Environment and Sustainable Development will receive EUR200,000 as a result.⁸⁹⁹⁶ The protocol will finance two initiatives: a national platform to monitor the progress of the management of urban solid waste, as well as comprehensive waste management in coastal areas.⁸⁹⁹⁷ The goal of the protocol is to strengthen cooperation on education

for sustainable development, waste management, and circular economy.⁸⁹⁹⁸ This commitment aims to increase awareness surrounding recycling and waste management.⁸⁹⁹⁹

On 30 March 2021, the Chief of the Cabinet of Ministers Santiago Cafiero and the Minister of Economy Martín Guzmán signed a modification of the 2021 National Budget raising the budget of the Ministry of Environment and Sustainable Development to more than ARS11.33 million, 300 per cent more than the 2020 budget.⁹⁰⁰⁰ Also, the Inter-American Development Bank loan financing Argentina's Comprehensive Urban Solid Waste Management Program increased by ARS1.937 million and will go towards the eradication of open pit garbage dumps and optimizing urban solid waste disposal.⁹⁰⁰¹ These budgetary increases will provide more resources for the Ministry of Environment and Sustainable Development and "reaffirms [Argentina's] commitment to environmental policy," said Minister Cabanié.⁹⁰⁰²

On 10 April 2021, President Fernández and the Ministry of Environment and Sustainable Development launched a forest fire prevention campaign, aiming to raise awareness about the importance of protecting native forests.⁹⁰⁰³ The Ministry of Environment and Sustainable Development recognized the necessity of the country's forests and reported that most forest fires are the result of recreational fires, fires used to burn waste and clearing of the land for livestock or urbanization.⁹⁰⁰⁴ The campaign works towards preserving Argentina's forests, which serve as important carbon sinks.

On 22 April 2021, President Fernández renewed Argentina's commitment to the Paris Agreement while vowing to increase climate ambitions during the Leaders Summit on Climate hosted by President Joseph Biden of the United States.⁹⁰⁰⁵ President Fernández announced that Argentina is committed to ensuring 30 per cent of the national energy matrix is developed using renewable energy

and promoting energy efficient measures in transportation and construction industries.⁹⁰⁰⁶ These measures focus on encouraging and increasing the use of renewable energy to lower the country's emissions.

On 1 May 2021, the Ministry of Environment and Sustainable Development announced it will launch a virtual course on the comprehensive management of electrical and electronic equipment waste.⁹⁰⁰⁷ The course is aiming to strengthen Argentina's initiatives by improving regional environmental management of persistent organic pollutants in electrical and electronic equipment waste.⁹⁰⁰⁸ The goal is to reduce potential emissions that can come from electrical waste and work towards a circular economy.⁹⁰⁰⁹

On 8 May 2021, the Ministry of Environment and Sustainable Development announced the creation of Argentina's largest national park, located in the province of Córdoba.⁹⁰¹⁰ The park is designed to conserve and expand hectares of protected areas to preserve biodiversity and promote sustainability.⁹⁰¹¹ The region of the national park has ecosystems that can control floods, replenish groundwater, retain sediments and nutrients, purify water, and regulate the regional climate.⁹⁰¹²

On 8 June 2021, the Ministry of Environment and Sustainable Development, the Secretary of Environmental Control and Monitoring and the head of the United Nations Development Program in Argentina signed a memorandum of understanding to establish a cooperation framework.⁹⁰¹³ This framework is focused on strengthening pollution monitoring and control systems, increasing climate action efforts such as air quality monitoring, including citizens in the development of public policies

and supporting national and regional efforts to accelerate the achievement of the 2030 Agenda and the Sustainable Development Goals.⁹⁰¹⁴

On 24 June 2021, Minister Cabandié signed an agreement with the Ministry of Energy to invest ARS375 million to supply renewable energy to the buildings of nine national parks.⁹⁰¹⁵ 53 photovoltaic systems will be introduced to protected areas in Neuquén; Quebrada del Condorito, from Córdoba; Islands of Santa Fe, of Santa Fe; El Palmar, from Entre Ríos; Talampaya, from La Rioja; Aconquija, from Tucumán; Los Cardones, from Salta; Calilegua, from Jujuy; and Copo, from Santiago del Estero.⁹⁰¹⁶ These measures focus on encouraging and increasing the use of renewable energy to lower the member's emissions.⁹⁰¹⁷

On 5 July 2021, the Ministry of Environment and Sustainable Development launched the National Program for the Prevention of Environmental Risk, which encourages public policies that seek to inspect and prevent environmental pollution.⁹⁰¹⁸ This initiative aims to strengthen technical-administrative capacities of environmental authorities and recognize problems at the interjurisdictional and provincial level in terms of environmental policy.⁹⁰¹⁹ The goals are to develop a platform for an internal control panel that systematizes environmental data and create a map illustrating environmental risks at the national level.⁹⁰²⁰

Argentina has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove). It has complied with its commitment to “recycle” and “reuse” carbon emissions through the implementation of a biogas plant and plans to install a biodigester. It has also complied with its commitment to reducing carbon emissions by establishing more ambitious emissions reduction goals and increasing Argentina's use of renewable energy-efficient sources. Argentina has also supported initiatives to remove carbon

emissions through its investments in educational campaigns and activities towards forest protection. However, it falls short on its commitment to hydrogen and related enabling policies.

Thus, Argentina receives a score of +1.

Analyst: Amanda Wang

Australia: +1

Australia has fully complied with its commitment endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 18 December 2020, Australia announced it will fund a feasibility study into turning a former underground coal mine into pumped hydro energy storage, contributing AUD4.16 million to the AUD13.04 million project. If feasible, the site could supply an additional 600 megawatts of renewable energy to the grid. If the trial and study are successful, it could result in repurposing other retired coal sites into producing renewable energy.⁹⁰²¹

On 30 December 2020, Australia submitted a new climate pledge to the United Nations, stating it will “meet and beat” the 2030 targets of reducing greenhouse gas emissions by 26 to 28 per cent below the country’s 2005 emission levels. The report states Australia’s reduction funds have been effective and delivered 60 million tons of abatement. The report includes the anticipated investment of AUD18 billion over the period to 2030. The package also includes an additional AUD2 billion for a Climate Solutions Fund to continue investment in low-cost abatement through the Emissions Reduction Fund and to support the adoption of new and emerging low emissions technologies inaccessible sectors.⁹⁰²²

On 17 February 2021, Australia’s Entrepreneurs’ Programme financed research and projects to motivate environmental action through seven grants.⁹⁰²³ The Sea Forest Grant which will cultivate a special seaweed to reduce livestock emission by more than 99 per cent has been granted AUD1 million.⁹⁰²⁴ UPowr, a company that offers end to end service for household solar and battery installations have received an AUD493,746 grant. Monsoon Aquatics has been granted AUD304,058 to commercialize its coral reproduction process to rebuild reefs.⁹⁰²⁵

On 25 February 2021, Australia, through the Clean Energy Finance Corporation, finalized their AUD160 million investment in Neoen’s Victorian Big Battery to support the integration of renewable energy into the grid. The battery will secure the state of Victoria’s energy grid while

reducing carbon emissions. This project will play a large part in helping Victoria reach its target of 50 per cent of energy being used from renewable sources.⁹⁰²⁶

On 4 March 2021, Australia launched the National Plastics Plan.⁹⁰²⁷ The plan is set to combat different plastics, on different fronts. Plastics on beaches will be banned. The plan aims to work with the industry to phase out fragmentable plastics by 2022.⁹⁰²⁸ Polyvinyl chloride packaging labels will be phased out by the end of 2022. Expanded polystyrene from loose packaging fills and moulded packaging in consumer packaging will be phased out by July 2022. Ending polystyrene packaging for takeaway containers and phasing in microplastic filters in washing machines by the end of 2022.⁹⁰²⁹ The Australian Recycling Label will be on at least 80 per cent of supermarket products by 2023 and 100 per cent of packaging will be reusable, recyclable or compostable by 2025 while also introducing an AUD20 million investment to create a waste data visualization platform.⁹⁰³⁰

On 19 March 2021, Australia signed on as a member of the Gglobal Adaptation Action Coalition. Australia has announced its commitment to practical climate adaptation strategies, with on-ground support for vulnerable communities. Australia's membership in the coalition builds on Prime Minister Scott Morrison's commitment to global climate action. The Ministry for Environment stated that Australia is committed to building partnerships that drive adaptation to protect and grow our economies, communities and the environment. At the conference, Australia also noted that the country is working on climate resilience and adaptation strategy.⁹⁰³¹

On 18 April 2021, the Australian government, in collaboration with the state of South Australia, signed an AUD1.1 billion deal to finance measures aimed at making energy more affordable and to help curb carbon emissions.⁹⁰³² This money will be used in areas such as carbon storage, implementing electric vehicles, hydrogen and other projects with the aim to reduce emissions.⁹⁰³³

On 21 April 2021, Prime Minister Morrison pledged to spend AUD417 million on hydrogen and carbon capture.⁹⁰³⁴ He stated that it is essential for Australia to position itself in a state where industries are supported while also contributing to lower emissions.⁹⁰³⁵ The funding is part of the

government's economic blueprint for 2022's fiscal year, and is yet to receive Parliament approval.⁹⁰³⁶ This expenditure is part of the government's pledge to spend AUS18 billion over the next 10 years to meet climate goals.⁹⁰³⁷

On 22 April 2021, Prime Minister Morrison announced AUD565.8 million to back low emissions international technology partnerships and initiatives by co-funding research and demonstration projects.⁹⁰³⁸

On 23 April 2021, the Australian government announced a AUS100 million initiative to protect the Australian oceans.⁹⁰³⁹ This ocean and coastal management will contribute to the reduction of Australia's emissions. The investment will target blue carbon systems involving seagrass and mangroves to draw carbon out of the atmosphere.⁹⁰⁴⁰

On 4 May 2021, Australia awarded AUD103 million to back three green hydrogen projects.⁹⁰⁴¹ This commitment increases previous funding by around 50 per cent.⁹⁰⁴² The federal government is seeking to speed up the commercial production of gas using renewable resources to reduce carbon emissions, not only in Australia, but also internationally.⁹⁰⁴³

On 11 May 2021, the Australian government released their budget for 2021-22, which includes significant climate initiatives and funding.⁹⁰⁴⁴ The budget provides over AUD480 million in new funding for the environment, with AUD100 million specifically for protecting oceans. AUD1.6 billion will be used to fund technologies, including hydrogen and energy storage.⁹⁰⁴⁵ Furthermore, AUD1.8 billion will go towards boosting jobs, reducing emissions and supporting affordable and reliable energy. Of this, AUD1.2 billion will be used for emissions reductions, including AUD639 million for low emissions international technology partnerships, AUD275.5 million to support the development of four clean hydrogen export hubs, AUD263.7 million for carbon capture

technologies, and AUD59.6 million to support new agricultural feed technologies to reduce livestock emissions.⁹⁰⁴⁶

On 10 June 2021, Australia and Singapore partnered to accelerate the deployment of low-emissions technologies. Each country will commit up to AUD10 million over the span of five years, to fund an industry-led pilot and demonstration projects.⁹⁰⁴⁷ The initiative will trial the use of clean hydrogen, clean ammonia and other hydrogen derivatives in shipping and port operations.⁹⁰⁴⁸ This commitment will work towards introducing low emission industries to the nation.⁹⁰⁴⁹

On 30 July 2021, the Morrison government announced the expansion of the functions of the Australian Renewable Energy Agency, to support new technologies which will reduce carbon emissions.⁹⁰⁵⁰ The investment will include exploring emerging technologies for clean hydrogen, energy storage, low carbon materials, and carbon capture and storage.⁹⁰⁵¹ The additional funding of AUD192.5 million will go towards electric vehicle charging infrastructure, lowering emissions in Australia's heavy vehicle fleets, and supporting large energy-consuming businesses to identify opportunities to adopt new technologies.⁹⁰⁵²

On 14 July 2021, Prime Minister Morrison announced AUD2 million in an initiative to support decarbonisation in industry supply chains across hard-to-abate sectors including iron, steel, alumina, aluminium, liquefied natural gas, other metals including lithium and copper and chemicals such as plastics and fertilisers.⁹⁰⁵³

On 20 September 2021, Australia announced the Clean Hydrogen Industrial Hubs program, investing AUD464 million in hydrogen hubs as part of its AUD1.2 billion commitment towards building a hydrogen industry to lower emissions and create more jobs.⁹⁰⁵⁴

Australia has taken actions to address three out of the four Rs framework (Reduce, Reuse, Recycle, Remove) and endorse the Circular Carbon Economy platform, partially complying with its commitment. By introducing the National Plastics Plan, the Australian government has fulfilled its commitment towards recycling. Through the study funded towards reusing former underground coal mines, Australia has complied with the reuse commitment. Australia has taken many actions towards reducing their carbon emissions, including the implementation of the Big Battery in Victoria which will reduce the state's emissions, and be a source for renewable energy. Further, Australia has taken into consideration hydrogen policies through the investment into hydrogen carbon capture.

Thus, Australia receives a score of +1.

Analyst: Surabhi Pradhan

Brazil: 0

Brazil has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 24 February 2021, the Ministry of Economy announced the signing of an agreement between the Securities and Exchange Commission (CVM) and the Inter-American Development Bank (IDB), to produce “solutions to strengthen the capital market and the sustainable development of the country.”⁹⁰⁵⁵ The four-year agreement aims for “cooperation between institutions to promote green finance and a favorable environment for fintechs” and consolidating the “partnership between CVM and IDB in favor of the Financial Innovation Laboratory [LAB].”⁹⁰⁵⁶ The LAB will collaborate with the IDB projects titled “Green Finance Program for Latin America and the Caribbean to Mobilize Private Investment in Mitigation Actions and Sustainable and Low Carbon Business Models through National Development Banks” and “Support for the Development of Institutional Frameworks, Policies and Regulations of Fintech in Latin America and the Caribbean.”⁹⁰⁵⁷

On 14 April 2021, President Jair Bolsonaro signed a decree to include nine national parks in the Investment Partnership Program.⁹⁰⁵⁸ This was done with the goal of promoting and improving efforts to conserve and protect the environment in these regions.⁹⁰⁵⁹

On 20 April 2021, the National Energy Policy Council approved the resolution to institute the Fuel of the Future program.⁹⁰⁶⁰ This program was developed with the primary goal of transitioning Brazil into alternative forms of energy such as low carbon fuels and biofuels, thus decarbonizing the use of energy.⁹⁰⁶¹ The program will also propose measures for the development of technology to capture and store carbon dioxide, either through the production of biofuels or blue hydrogen.⁹⁰⁶²

On 29 April 2021, the Foreign Finance Commission of the Ministry of Economy approved USD767.10 million for 10 projects, some of which will be allocated towards the environment and the prevention of floods.⁹⁰⁶³ More specifically, USD40 million will be allocated towards water security and increased resilience to extreme weather events.⁹⁰⁶⁴

On 3 to 14 May 2021, the Ministry of Mines and Energy participated in a mission to develop a technical cooperation project in the hydrogen area called H2 Brazil.⁹⁰⁶⁵ The goal of this project is to support the implementation of a hydrogen program in Brazil as well as subsidies for energy planning and regulation.⁹⁰⁶⁶ This will be done through disseminating information about hydrogen and promoting innovation to support the optimization of pilot projects on an industrial scale.⁹⁰⁶⁷

On 31 May 2021, the Ministry of Mines and Energy announced that Brazil would invest BRL400 billion into its energy matrix over the next 10 years.⁹⁰⁶⁸ The announcement was made at the Brazil 2021 Investment Forum, and has the goal of increasing the amount of renewable energy in the energy matrix, which is already made up of 85 per cent renewable energy.⁹⁰⁶⁹

On 14 June 2021, the Ministry of the Environment signed a cooperation agreement with a variety of associations under the Zero Waste program.⁹⁰⁷⁰ The goal of the agreement is to boost the energy recovery of solid waste by incentivizing investment in the field. This agreement is said to allow for the closure of dumps and the reduction of waste disposed in landfills.⁹⁰⁷¹

Brazil has taken actions to address two of the four key commitment areas within the four Rs framework to endorse the CCE platform. Their actions, namely the decision to implement the Fuel for the Future program, addresses the reduce and the remove commitment areas. Further, Brazil has done so while taking into consideration the use of hydrogen policies. Nevertheless, no actions have been taken to reuse or recycle.

Thus, Brazil receives a score of 0.

Canada: +1

Canada has fully complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 11 December 2020, Prime Minister Justin Trudeau announced Canada's strengthened climate plan, A Healthy Environment and a Healthy Economy, funded by a CAD15 billion investment. Included in this plan are steady annual increases to its carbon tax from CAD50 per ton in 2022 to CAD170 per ton by 2030.⁹⁰⁷²

On 14 December 2020, Transport Canada amended the Canadian Aviation Regulations to require air operators flying internationally to offset their share of increased greenhouse gas emissions. The new amendments would allow Canada to fulfil its international climate change obligations and “require Canada's operators to do their part to maintain the annual global net carbon emissions from international aviation at 2020 levels.”⁹⁰⁷³

On 16 December 2020, Canada released its Hydrogen Strategy for Canada. The strategy “seeks to modernize Canada's energy systems by leveraging Canadian expertise – including increased participation from marginalized and underrepresented groups – through building new hydrogen supply and distribution infrastructure and fostering uptake in various end-uses, that will underpin a low-carbon energy ecosystem in the near- and long-term. It will set the foundation to do this over the next five years.” The strategy outlines opportunities, challenges and recommendations.⁹⁰⁷⁴

On 18 December 2020, Canada published the proposed regulations for Clean Fuel Standard, as well as initiated the public consultations for the Clean Fuel Standard which will lead to finalized regulations in late 2021. The proposed Clean Fuel Regulations “would require liquid fossil fuel primary suppliers (i.e. producers and importers) to reduce the carbon intensity of the liquid fossil fuels they produce in and import into Canada from 2016 CI [carbon intensity] levels by 2.4 gCO₂e/MJ in 2022, increasing to 12 gCO₂e/MJ in 2030. The proposed Regulations would also establish a credit market whereby the annual CI reduction requirement could be met via three main categories of credit-creating actions: (1) actions that reduce the CI of the fossil fuel throughout its lifecycle, (2) supplying low-carbon fuels, and (3) specified end-use fuel switching in transportation.”⁹⁰⁷⁵

On 10 February 2021, Prime Minister Trudeau announced CAD14.9 million for green public transit projects over the next eight years. The investments will reduce pollution and will enhance public transit systems and switching them to cleaner electrical power, including supporting the use of zero-emission vehicles and related infrastructure.⁹⁰⁷⁶

On 5 March 2021, the Government of Canada announced a proposal for a greenhouse gas carbon offset program which will “allow municipalities, farmers, Indigenous communities, businesses and others to earn credits for projects that reduce carbon emissions or take them out of the atmosphere.” The offset program will allow participants to earn credits in four different areas including projects that reduce the use of fluorinated refrigerants in refrigeration systems, projects that reduce methane from landfills, initiatives that improve carbon storage management and farming practices that promote carbon sequestration in soils.⁹⁰⁷⁷

On 10 March 2021, the Ministry of Environment and Climate Change and the Ministry of Infrastructure and Communities announced a CAD40.8 million investment into 162 schools in Ontario to become more energy efficient. This will be done through the Climate Action Incentive Fund.

On 16 March 2021, during the international energy transition conference in Berlin, Natural Resources Minister Seamus O’Regan signed a memorandum of understanding with Germany outlining Canada’s commitment to green energy. It focuses on liquified natural gas and green hydrogen, which burns cleanly and can be produced using wind and solar power.

On 22 March 2021, Minister of Agriculture and Agri-food Marie-Claude Bibeau announced CAD4.5 million in funding for five green agriculture projects that will help Canadian farms responsibly manage plastic waste and improve their sustainability.⁹⁰⁷⁸ The projects will help advance organic bioplastics replacing petroleum-based plastics.⁹⁰⁷⁹

On 31 March 2021, Special representative for the Prairies Jim Carr announced CAD2.890 million in funding to the University of Alberta's biojet technology.⁹⁰⁸⁰ This new investment will support the university's Lipid-to-Hydrocarbon technology by developing pathways to generate renewable jet fuel from a range of feedstocks, including waste materials from the restaurant and livestock industries."⁹⁰⁸¹ The goal of the Lipid-to-Hydrocarbon technology is to reduce emissions from the aviation sector by 90 per cent.⁹⁰⁸²

On 1 April 2021, Parliamentary Secretary to the Minister of Natural Resources Marc Serré announced CAD3 million investment to Envoy Energy to install three compressed natural gas stations in Northern Ontario.⁹⁰⁸³ The new stations will allow drivers to switch from diesel to compressed natural gas which produces more than 25 per cent fewer greenhouse gas emissions and can be produced using waste feedstocks.⁹⁰⁸⁴

On 6 April 2021, Minister of Northern Affairs Dan Vandal, announced CAD7.6 million in funding for three clean energy projects in Nunavut.⁹⁰⁸⁵ The projects include an installation of a wind turbine that will decrease the use of diesel fuel by 50 per cent and a hybrid wind, solar and energy storage system.⁹⁰⁸⁶

On 7 April 2021, Minister O'Regan announced a CAD23 million investment to Hydro Ottawa through the Green Municipal Fund which will transform 34 acres of brownfield lands between Ottawa and Gatineau into a carbon-neutral community.⁹⁰⁸⁷ The goal of the project is to eliminate greenhouse gas emissions by using hydroelectricity and waste industrial heat.⁹⁰⁸⁸

production line to create compostable bioplastics made from forest biomass. The bioplastics can be used for food packaging and water bottles, therefore reducing pollution.⁹⁰⁸⁹

On 14 April 2021, Minister of Infrastructure and Communities Catherine McKenna announced the launch of the Green and Inclusive Community Buildings program. It will deliver CAD1.5 billion in funding in the next five years to projects that include reductions of energy waste and installations of energy efficient windows.⁹⁰⁹⁰

On 15 April 2021, Minister O'Regan announced a CAD500,000 investment in Compressed Air Energy Storage technology.⁹⁰⁹¹ The goal of this is to decrease greenhouse gas emissions by transitioning to a cleaner electricity grid.⁹⁰⁹²

On 15 April 2021, Minister of Environment and Climate Change Jonathan Wilkinson announced a CAD1.3 million to support five projects that aim to reduce plastic waste, prevent plastic pollution and support Canada in transitioning to a national circular plastics economy.⁹⁰⁹³ The projects will include recycling personal protective equipment from hospitals, improving the management of compostable products and supporting the development of new standards for bioplastics.⁹⁰⁹⁴

On 16 April 2021, Member of Parliament for Toronto Centre Marci Ien announced CAD3.3million for Noventa Energy Partners to reduce pollution at the Toronto Western hospital.⁹⁰⁹⁵ The project will supply the hospital with clean energy using recovered heat extracted from wastewater and the sewage system. The cumulative greenhouse gas emissions reductions amounts to 169,000 tonnes.⁹⁰⁹⁶

On 16 April 2021, Special Representative Carr announced CAD41.1 million for 11 green infrastructure projects.⁹⁰⁹⁷ The projects include improvements to solid waste management and a new solar power plant. The goal of these projects is to reduce emissions in the Prairies.⁹⁰⁹⁸

On 19 April 2021, Canada tabled Budget 2021. It was the first budget to specifically mention carbon capture, utilization and storage and proposed a tax incentive for these actions through “an investment tax credit invested in [carbon capture, utilization and storage] projects with the goal of reducing emissions by at least 15 megatonnes of Co2 annually. This measure will come into effect in 2022.”⁹⁰⁹⁹

On 22 April 2021, the Department of Finance Canada announced key elements of Budget 2021 that will contribute to creating a healthy environment for Canadians. Budget 2021 includes a CAD17.6 billion investment towards fighting climate change, reducing pollution and developing clean technology.⁹¹⁰⁰ Budget 2021 includes zero-interest loans of up to CAD40,000 for 200,00 households planning to make energy efficient upgrades to their homes. Budget 2021 also proposes an investment of CAD5 billion for seven years in the Net Zero Accelerator which will support companies in reducing their emissions.⁹¹⁰¹

On 22 April 2021, Prime Minister Trudeau announced that Canada will increase its emissions reductions target by 40-45 per cent below 2005 levels by 2030.⁹¹⁰²

On 22 April 2021, Minister of Northern Affairs Daniel Vandal announced CAD40.4 million from budget 2021 to create hydroelectricity and grid interconnection projects in the North. The projects will reduce the reliance on fuels for electricity and heating.⁹¹⁰³

On 5 May 2021, Member of Parliament for Central Nova Scotia, Sean Fraser announced an investment of CAD25,000 for a pilot project to improve St. Martha’s Regional Hospital’s energy efficiency.⁹¹⁰⁴ The project aims to use existing building commissioning to lower electricity and diesel

consumption, thus making the building cleaner. This process optimizes performance and reduces greenhouse gas emissions from existing buildings⁹¹⁰⁵

On 5 May 2021, Minister O'Regan announced CAD1.7 million in funding to expand the Electric Vehicle Charging Network Management System developed by the British Columbia Institute of Technology.⁹¹⁰⁶ This investment will improve Electric Vehicle infrastructure to promote electric cars, thus ultimately supporting the reduction of emissions.⁹¹⁰⁷

On 6 May 2021, Minister of Intergovernmental Affairs Dominic LeBlanc announced an investment of CAD200,000 to support three New Brunswick transport companies in reducing emissions from their heavy-duty vehicle fleets.⁹¹⁰⁸ Together, the companies will save 1,200 tonnes of greenhouse gas emissions annually.⁹¹⁰⁹ This will be done through making energy efficient retrofits to over 200 vehicles and providing fuel-efficient training to more than 320 drivers.⁹¹¹⁰

On 7 May 2021, Natural Resources Canada and the National Research Council of Canada, in partnership with Forschungszentrum Jülich and the Karlsruhe Institute of Technology in Germany, announced the German-Canadian Materials Acceleration centre.⁹¹¹¹ A combined sum of CAD8.8 million is being allocated for the centre over a period of five years.⁹¹¹² The centre will help advance technologies related to clean hydrogen production as well as carbon capture.⁹¹¹³

On 19 May 2021, Minister O'Regan announced CAD4.8 million to support 13 climate action projects in Newfoundland and Labrador.⁹¹¹⁴ The city of St. John's will receive CAD77,900 from the government to increase carbon sequestration with 11.4 hectares of reforestation. This investment will result in decreased pollution by removing carbon from the atmosphere.⁹¹¹⁵

On 19 May 2021, Parliamentary Secretary to the Minister of Northern Affairs Yvonne Jones announced a CAD2.8 million investment to help three, community-led, clean energy projects in Labrador.⁹¹¹⁶ The projects' goal is to reduce reliance on diesel and fossil fuels for heat and power in remote communities.⁹¹¹⁷ All three projects are funded through Natural Resource Canada's Clean Energy for Remote and Rural Communities program and share the goals of building a clear energy future, supporting new economic opportunities, and creating more energy resilient communities.⁹¹¹⁸

On 19 May 2021, Minister of Veterans Affairs and Associate Minister of National Defence Lawrence MacAulay and the president of the Federation of Canadian Municipalities announced an investment of CAD14.1 million for communities in Prince Edward Island and Nova Scotia to decrease greenhouse gas emissions.⁹¹¹⁹ The investment will help finance renewable energy projects and promote energy storage initiatives.⁹¹²⁰

On 19 May 2021, Member of Parliament for Whitby Ryan Turnbull announced a CAD87,000 investment for the town of Whitby, Ontario to lower emissions from 20 municipal buildings.⁹¹²¹ This

will be accomplished through renewable energy retrofits and improved insulation systems.⁹¹²² These new updates will cut emissions by 30 per cent.⁹¹²³

On 27 May 2021, Prime Minister Trudeau announced a new Canada Greener Homes Grant, which will allow 700,000 homeowners to improve the energy efficiency of their houses.⁹¹²⁴ The grant will allow for home improvements such as solar panels, added insulation and updated heating systems to ultimately reduce emissions.⁹¹²⁵

On 27 May 2021, the Government of Canada and Ontario signed a new Canada-Ontario Agreement on Great Lakes Water Quality and Ecosystem Health which will help protect and restore the Great Lakes.⁹¹²⁶ This will be done through preventing toxic algae from growing, improving wastewater and stormwater management, reducing plastic pollution and excess road salt, restoring native species and habitats, and increasing resilience to climate change.⁹¹²⁷

On 3 June 2021, Minister O'Regan announced a CAD2.3 million investment in the Alberta Zero-Emissions Truck Electrification Collaboration project.⁹¹²⁸ The investment will support the installation and testing of a hydrogen fueling station for heavy-duty trucks.⁹¹²⁹ The goal of this is to decarbonize trucks by switching from fuel to hydrogen.⁹¹³⁰

⁹¹⁴⁷ Supporting renewable energy manufacturing in Quebec to create jobs and build a cleaner future, Prime Minister of Canada (Gaspé) 14 July 2021, Access Date: 21 July 2021.

On 19 July 2021, Minister Bibeau, announced an investment of CAD2.6 million to Canadian Forage and Grassland Association to develop a Canadian grassland carbon offset system.⁹¹⁴⁹ This will allow farmers to produce and sell carbon offsets, therefore reducing greenhouse gas emissions.⁹¹⁵⁰ The system will protect 5,000 hectares of Canadian grasslands and will save 10,000 tonnes of carbon dioxide equivalent.⁹¹⁵¹

On 26 July 2021, Minister O'Regan announced CAD220,000 to support four Ontario transit companies in improving their energy efficiency and decreasing their emissions.⁹¹⁵² This federal investment comes from the Natural Resources Canada's Green Freight Assessment Program, which is designed to help Canadian companies reduce their emissions.⁹¹⁵³ With this funding, the four transit companies will be able to purchase new fuel-reducing equipment and make further green retrofits to their fleets.⁹¹⁵⁴ The goal of this is to reduce greenhouse gas emissions by 430 tonnes annually.⁹¹⁵⁵

On 27 July 2021, Parliamentary Secretary to the Minister of Diversity and Inclusion and Youth Adam van Koevorden, on behalf of the Minister of Natural Resources, announced an investment of CAD2.3 million in the Anvil Crawler Development Corporation to install 36 new electric vehicle chargers across Ontario.⁹¹⁵⁶ The funding for the project comes from Natural Resources Canada's Green Infrastructure-Electric Vehicle Infrastructure Demonstration Program which aims to promote

clean energy across Canada.⁹¹⁵⁷ This new project will help promote zero-emission vehicle sales, therefore reducing transportation emissions in the long run.⁹¹⁵⁸

On 28 July 2021, Minister of Seniors Deb Schulte, on behalf of the Minister of Environment and Climate Change, announced an investment of CAD9 million for Conservation Ontario to better conserve and protect lands.⁹¹⁵⁹ The funding comes from the Nature Smart Climate Solutions Fund which is a 10 year fund for projects supporting the restoration of wetlands and grasslands as well as the storage and capture of carbon.⁹¹⁶⁰ The new investment will help fight climate change in Southern Ontario by capturing and storing carbon.⁹¹⁶¹

On 30 July 2021, Minister of Finance Chrystia Freeland announced a federal investment of CAD400 million for ArcelorMittal Dofasco, Canada's largest steel producer.⁹¹⁶² The funding will support the company in phasing out coal-fired steelmaking and transitioning to a hydrogen-ready, direct reduced iron-fed electric arc furnace for the development of steel.⁹¹⁶³ This new low emissions steelmaking technique will benefit many consumer packaging sectors including the automotive and medical sectors.⁹¹⁶⁴ The project will help reduce greenhouse gas emissions by three million tonnes per year by the year 2030.⁹¹⁶⁵

On 3 August 2021, Member of Parliament for West Vancouver–Sunshine Coast–Sea to Sky Country Patrick Weiler announced on behalf of the Minister of Infrastructure and Communities federal funding of CAD1.3 million to upgrade two health care centres in the communities of Lil'wat Nation

Canada has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove). It has complied with its commitment to reduce carbon emissions by investing in renewable energy and improving the energy efficiency of buildings and homes. It has also invested in expanding electric vehicle charging stations, therefore encouraging the transition to electric vehicles. Canada has also complied with its commitment to recycling by promoting the use of bioenergy and investing in recycling projects. It has also complied with its commitment to reuse by investing in carbon capture technologies and storage projects. Additionally, Canada has complied with its commitment to remove carbon emissions by investing in afforestation initiatives. It has also committed to the development of the hydrogen sector, by investing in Hydrogen fueling stations.

Thus, Canada receives a score of +1.

Analyst: Meryem Althani

China: +1

China has fully complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 30 December 2020, the Ministry of Ecology and Environment published an interim regulation on the management of carbon trading, allocating carbon emission allowances to 2,225 companies, for the year 2019-2020. The documents issued a rule stating that companies could use China Certified Emission Reductions, generated within the China Greenhouse Gas Voluntary Emission Reduction Program, but that they can only offset 5 per cent of required permits using such reductions.⁹¹⁸³

On 1 February 2021, China put into effect a set of interim rules aimed at establishing its national emissions trading system. This allows 2,225 power entities with assigned carbon dioxide emission caps to trade their emission quotas. Entities who exceed their emission caps can purchase unused quotas from low emitters. The objective of these rules is to meet the country's goals of peaking in carbon emissions before 2030 and achieving carbon neutrality by 2060.⁹¹⁸⁴

On 22 February 2021, the State Council issued a circular outlining its goal for 2025 that “industry, energy and transportation system will see a noticeable improvement, with the manufacturing, circulation and consumption system featuring green, low-carbon and circular development taking initial shape.”⁹¹⁸⁵ It also stated that by 2035, “the endogenous power for green development will be intensified, the scale of green industry will advance to a new level.”⁹¹⁸⁶

⁹¹⁸³ Nation's carbon trading efforts could serve as model, Government of China (Beijing) 7 January 2021. Access Date: 19 March 2021.

http://english.www.gov.cn/statecouncil/ministries/202101/07/content_WS5ff643dcc6d0f725769435bd.html

⁹¹⁸⁴ New carbon trading rules take effect to strengthen China's green development, Government of China (Beijing) 2 February 2021. Access Date: 19 March 2021.

⁹¹⁸⁶ State Council calls for green, low-carbon and circular development, Government of China (Beijing) 22 February 2021. Access Date: 19 March 2021

http://english.www.gov.cn/policies/latestreleases/202102/22/content_WS6033af98c6d0719374af946b.html

On 23 February 2021, the State Council released a guideline to “accelerate the development of a green and low-carbon circular economic development system.”⁹¹⁸⁷ The policy is aimed at efficient resource usage, strengthening environmental protection and curbing greenhouse gas emissions. The guideline calls for a “marked rise in the scale of green industries, a continued drop in major pollutants, and a slashed carbon emission intensity” by 2025. It adds that by 2035, “energy and resource utilization efficiency in key industries and for key products is expected to reach an internationally-advanced level.” The policy measures it outlines include developing “green and low-carbon production, consumption and circulation systems.”⁹¹⁸⁸

On 22 April 2021, the General Office of the State Council issued a notice on “Effectively Strengthening Reservoir Reinforcement and Operation Management and Protection” during a policy briefing.⁹¹⁸⁹ As part of this notice, it was announced that the Ministry of Water Resources, the National Development and Reform Commission, the Ministry of Finance and other relevant departments will collaborate on a joint task force to work towards better protecting China’s reservoirs.⁹¹⁹⁰ Reservoirs are one of the crucial engineering measures to support the development and utilization of water resources, including flood control, water supply, and power generation⁹¹⁹¹. As hydropower is a useful form of renewable energy, this action contributes towards reducing emissions in China.

On 28 April 2021, Director of the Eco-Environment Enforcement Bureau of the Ministry of Ecology and Environment Cao Liping announced a commitment to focus special law enforcement resources this year on activities that threaten the environment: the disposal of hazardous waste and environmental violations.⁹¹⁹² This will be done with the goal of preserving the environmental rights of Chinese citizens and achieving a better-quality environment.⁹¹⁹³

On 7 July 2021, the National Development and Reform Commission (NDRC) released its development plan for the resource recycling industry as part of China’s 14th Five-Year Plan 2021-2025.⁹¹⁹⁴ This plan will increase the overall recycle rate for resources and reduce the consumption of energy and water per unit of GDP by around 13.5 per cent and 16 per cent respectively, taking into account the approximate 20 per cent increase in resource output rates over 2020 levels.⁹¹⁹⁵ The NDRC aims to accelerate the construction of resource recycle systems in industrial production and will target high-energy consumption sectors such as petrochemicals, coking, cement and printing.⁹¹⁹⁶ The NDRC also plans to improve the low grade re-use of ores and urban waste treatment, stating

⁹¹⁹⁴ China’s resource recycling industry output value to reach 5 trillion yuan by 2025: top economic planner, Global Times (Beijing) 7 July 2021. Access Date: 21 July 2021. <https://www.globaltimes.cn/page/202107/1228039.shtml>

⁹¹⁹⁵ China’s resource recycling industry output value to reach 5 trillion yuan by 2025: top economic planner, Global Times (Beijing) 7 July 2021. Access Date: 21 July 2021. <https://www.globaltimes.cn/page/202107/1228039.shtml>

⁹¹⁹⁶ China’s resource recycling industry output value to reach 5 trillion yuan by 2025: top economic planner, Global Times (Beijing) 7 July 2021. Access Date: 21 July 2021. <https://www.globaltimes.cn/page/202107/1228039.shtml>

that China's utility rate of bulk solid waste will increase to 60 per cent by 2025.⁹¹⁹⁷ Furthermore, the plan aims to develop a "green developmental society with a sophisticated resource recycling system", which will include establishing recycling networks for used materials and trade platforms for used items.⁹¹⁹⁸ The agriculture and electronics sectors will also be covered under this enhanced recycling plan, which will support China's commitment to the Circular Carbon Economy.⁹¹⁹⁹

On 25 August 2021, the Chinese government announced plans to plant 33.33 million hectares of forest and grassland by 2025.⁹²⁰⁰ The repopulation of carbon sinks such as forests and grasslands is conducive to China's commitment to peaking carbon dioxide emissions by 2030 and sequestering carbon for the purpose of achieving carbon neutrality by 2060.⁹²⁰¹

On 26 August 2021, the state-run Power Construction Corporation of China announced a contract with the Iraqi government to build solar power plants in Iraq with a production capacity of 2,000 megawatts.⁹²⁰² The project is conducive to the reduction of carbon emissions through the production of renewable energy sources and will produce up to 750 megawatts of energy as soon as the first phase is complete.⁹²⁰³

China has taken action to address all of the four key commitment areas within the four Rs framework (Reduce, Reuse, Recycle, Remove) of the Circular Carbon Economy and has additionally advanced hydrogen policies. China has complied with its commitment to reduce carbon emissions by increasing sustainable energy production through hydrogen and reservoir-preservation policies. China has also complied with its commitment to reducing emissions by regulating carbon allowances through its national emissions trading system (ETS). China has complied with its commitment to the "Recycle" component by its planned overhaul of industrial recycling in various sectors. Finally, China has complied with its commitment to remove emissions by installing offshore carbon storage facilities as well as its pledge to create and protect forest and grassland carbon sinks.

Thus, China receives a score of +1.

Analysts: Aadi Thulasingham and Karči Aldridge Végi

France: +1

France has fully complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 22 November 2020, the French Development Agency and the International Union for the Conservation of Nature and Natural Resources announced a EUR10 million grant agreement, as part of the ongoing Minka Middle East Initiative, to fund ecologically responsible and economically accessible updates to Jordan's agricultural sector. The project seeks to modernize farms in order to make them more productive and resource efficient, (particularly to reduce water-use).⁹²⁰⁴

On 12 December 2020, France co-hosted the Climate Ambition Summit with the UK and the EU. The summit saw new commitments from 75 world leaders and reaffirmed the global community's commitment to net zero emissions by 2050. At the conference, President Emmanuel Macron noted that the COVID-19 crisis presented an opportunity to accelerate ecological transition and reaffirmed France's commitment to reducing greenhouse gas emissions and to climate financing.⁹²⁰⁵

On 14 December 2020, Minister of Ecological Transition Barbara Pompili, and Minister Delegate to the Minister of the Economy, Finance and Recovery Agnès Pannier-Runacher announced 60 projects that will receive EUR16 million in aid to support the continued recycling of plastics. This funding initiative is part of the circular economy portion of France's COVID-19 economic recovery initiative, France Relance. Propping up these businesses is conducive to France's goal of having 100 per cent recycled plastics by 2025. The funds will be distributed by the French Ecological Transition Agency.⁹²⁰⁶

On 14 December 2020, Prime Minister Jean Castex announced that 4,214 projects were selected to receive funding for renovations of government, public and higher education buildings. The renovations, all of which will be finished by 2023, will improve energy efficiency allowing for a reduction in energy use. The total funding for these projects amounts to EUR2.7 billion.⁹²⁰⁷

On 11 January 2021, Minister Pompili, Minister of the Economy, Finance and Recovery Bruno Le Maire, Minister of Higher Education, Research and Innovation Frédérique Vidal and Minister Agnès Pannier-Runacher announced the formation of the National Hydrogen Council. The council will oversee the development of the French hydrogen sector and the implementation of the national strategy for the development of carbon-free hydrogen. This announcement included a commitment to invest EUR7 billion into this strategy by 2030.⁹²⁰⁸

On 11 January 2021, France co-hosted the One Planet Summit along with the United Nations and the World Bank. The summit discussed the protection of terrestrial and marine ecosystems, agroecology, financing biodiversity and protecting forests.⁹²⁰⁹ At the summit, France, Spain, and Monaco launched the Coalition for an Exemplary Mediterranean in 2030. The coalition intends to

develop a network of protected areas, fight marine pollution, ban single-use plastics and reduce the environmental impact of maritime transport.⁹²¹⁰ France also announced its support for the initiative undertaken by the Great Green Wall to plant 7,000 kilometres of hedgerows by 2022.⁹²¹¹ This initiative is part of a plan to sequester 250 million tonnes of carbon, and restore 100 million hectares of degraded land by 2030.⁹²¹²

On 12 January 2021, the Ministry of Ecological Transition and the Environment and Energy Management Agency announced the #LesBonnesHabitudes awareness campaign. The goal of this campaign is to inform and encourage French citizens to act according to the 3 Rs of individual consumption, reduce, reuse, and recycle, and in doing so contribute towards the development of a circular economy.⁹²¹³

On 28 January 2021, the French Development Agency signed an agreement with the Indian government to support the development of the Surat metro. The project is financed by a EUR250 million loan from the French Development Agency. The goal of the project is to support emission reduction and provide sustainable and easily accessible transportation as the metro will reduce carbon emissions by 40,000 tons and service 400,000 people.⁹²¹⁴

On 28 January 2021, the Ministry of Ecological Transition and the Environment and Energy Management Agency launched the “Springboard for the ecological transition of [small and medium sized enterprises]” initiative, which provides funding to small and medium businesses who are conducting studies on ecological studies or renovating their businesses for improved energy efficiency. A flat rate between EUR5,000 and EUR20,000 depending on the project. This fund is part of France’s COVID-19 recovery program, France Relance, which has dedicated EUR30 billion to matters of ecological transition including promoting the circular economy and reducing greenhouse gas emissions.⁹²¹⁵

On 23 February 2021, Minister Pompili and Secretary of State for Digital Transition and Electronic Communications Cédric O released the digital and environment roadmap, the national strategy on the transition to digital technology and its impact and role in ecological transitions. This national strategy focuses on developing knowledge of the impact of digital technology on the environment, reducing the environmental footprint of digital technology and using digital technology to innovate for the purpose of ecological transition.⁹²¹⁶

On 17 March 2021, Minister Pompili and Minister Delegate in charge of Transport Jean-Baptiste announced a microcredit for low-income purchasers of low-polluting vehicles. EUR1.9 billion has been dedicated to the plan, and eligible recipients can receive up to EUR5,000.⁹²¹⁷

On 7 April 2021, the French Development Agency approved a EUR50 million loan and a EUR500,000 technical assistance grant in order to support Serbia's agenda on climate change and low carbon development in accordance with its commitments under the Paris Agreement.⁹²¹⁸

On 9 April 2021, Secretary of State for Biodiversity Bérangère Abba announced the creation of a new nature reserve "Étangs et Rigoles d'Yveline."⁹²¹⁹ The new reserve will protect 310 hectares of land including the former Saint-Quentin-en-Yvelines reserve. The protection of this land places 308 hectares under strong protection.⁹²²⁰ The new reserve also contains wetlands, valuable carbon sinks, whose inclusion in the protected area is consistent with the government's focus on wetland protection in its 2021-2030 national strategy for protected areas.⁹²²¹

On 19 April 2021, Minister of Agriculture and Food Julien Denormandie, Minister responsible for Housing Emmanuelle Wargon, and Minister Pannier-Runacher signed an amendment to the timber sector strategy contract.⁹²²² This action aims to achieve France's decarbonization goals by promoting construction of wood buildings which will serve as carbon sinks.⁹²²³ To this end, environmental regulations for new buildings will also be modified, promoting the use of mixed materials in buildings.⁹²²⁴

On 22 April 2021, the French Development Agency announced funding for sustainable and green development projects in Montenegro⁹²²⁵. The French Development Agency signed two financing agreements with the Development Fund of Montenegro, in which the French Development Agency will provide a EUR50 million line of credit and EUR400,000 grant for the purpose of promoting and

funding green investment projects undertaken by Montenegrin municipalities and small and medium sized businesses.⁹²²⁶

On 26 April 2021, the Ministry of Ecological Transition published its climate action plan. This action plan will complement France's National Low Carbon Strategy and the National Adaptation Plan for Climate Change in the ministry's policy and decision-making.⁹²²⁷ The plan focuses on mitigation primarily through the reduction of emissions and on adaptation, limiting the effects of climate change on human societies and the environment.⁹²²⁸

On 28 April 2021, France announced the fifth phase of the Energy Saving Certificate scheme.⁹²²⁹ This scheme impacts energy producers, requiring them to undertake actions to improve energy efficiency such as improving company infrastructure or producing energy saving products.⁹²³⁰ This fifth phase sets the target for energy savings at 2,500 terawatt hours with 730 terawatt hours set aside for energy reduction projects on houses with the lowest incomes.⁹²³¹ This fifth phase of the scheme will help France meet its energy reduction goals outlined in the National Low Carbon Strategy (SNBC).⁹²³²

On 29 April 2021, the Ministry of the Economy, Finance and Recovery presented its climate action plan.⁹²³³ The ministry presented an 11-point action plan that will guide its actions in accordance with the SNBC, the National Adaptation Plan for Climate Change and France's commitments under the Paris Agreement.⁹²³⁴

On 30 April 2021, Minister Pompili and Minister Djebbari announced the signing of a contract of objectives and performance with Waterways of France providing additional funding of EUR175

million.⁹²³⁵ The purpose of the contract is to provide funding for diversifying river infrastructure and make transporting goods by river a more viable alternative to road transport.⁹²³⁶ The funding will also enable Waterways of France to modernize France's waterways and provide water management support globally. Modernization measures would include introducing green technology such as hydrogen powered boats as well as the installation of hydroelectric dams and water turbines along waterways.⁹²³⁷

On 17 May 2021, the French government announced an additional EUR350 million in funding to the brownfield fund for the rehabilitation of previously developed, contaminated land for commercial and residential purposes.⁹²³⁸ The purpose of this fund is to provide financial aid to various projects that are seeking to recycle land in order to make more efficient use of urban spaces, control urban sprawl and limit soil artificialization.⁹²³⁹

On 26 May 2021, the French Development Agency signed an agreement to provide the Investment and Development Bank of Vietnam with a EUR100 million line of credit to encourage investment in renewable energy and energy efficiency.⁹²⁴⁰ As part of the agreement, the French Development Agency will also provide the Investment and Development Bank of Vietnam with assistance in transitioning to a green finance model.⁹²⁴¹

On 30 June 2021, director of the French Development Agency in Vietnam Fabrice Richey and vice-president of Vietnam Electricity Nguyen Xuan Nam signed a loan agreement of EUR74.7 million for the purpose of financing an extension of the Ialy hydroelectric power station by 360 megawatts.⁹²⁴² This will enable the station to increase its electricity production without having to increase the flooded area and will help reduce the use of electricity produced by fossil fuels avoiding 68,000 tons of greenhouse gas emissions annually.⁹²⁴³

On 5 July 2021, Minister Pompili and Minister Delegate in charge of Small and Medium Enterprises Alain Griset announced, in partnership with the French Agency for Ecological Transition, the Chamber of Trades and Crafts and the Chamber of Commerce, funding of EUR15 million in order to provide small and medium businesses with diagnostic reports by an advisor from the Chamber of Trades and Crafts or the Chamber of Commerce and Industry.⁹²⁴⁴ These reports outline steps that businesses can take to optimize energy efficiency and resource use, as well as information on funding and training for employees.⁹²⁴⁵ The funding will allow for 35,000 diagnostic reports as well as 10,000 instances of additional support.⁹²⁴⁶

On 7 July 2021, Minister Djebbari signed a commitment outlining plans for green growth of industries that rely on water-borne transportation.⁹²⁴⁷ This includes a commitment to reduce GHG emissions from the sector by 20 per cent within 10 years, which will be achieved in part by introducing electric terminals in quays and through researching and using alternative low-emission engine solutions.⁹²⁴⁸

On 15 July 2021, the Ministry of Ecological Transition announced a decree that gives renewable energy producers the option to request an alternative connection from energy grid operators, allowing renewable energy to be attached to the grid at a lower cost and greater speed than the standard connection.⁹²⁴⁹ The goal of this decree is to simplify the process of connecting renewable energy producers to the electrical grid and accelerate the production and use of renewable energies up to an additional 750 megawatts of additional power by 2030.⁹²⁵⁰

On 20 July 2021, the National Assembly announced the adoption of the Climate and Resilience Bill.⁹²⁵¹ The bill promotes renewable energy and energy efficiency and reduction through stricter housing insulation standards and mandatory energy audits, creating low emission zones in metropolitan areas with more than 150,000 citizens to improve air quality and restrict car traffic by 2024, prohibiting short domestic flights, carbon offsets for all domestic flights by 2024, ending the sale of high emission automobiles by 2030, instituting consumer labels explaining the environmental

impact of products and by requiring large buildings to have solar panels or green roofs installed either upon construction or renovation.⁹²⁵²

On 23 July 2021, Minister Pompili announced the publication of an action plan to reduce the emission of fine particulate pollutants from domestic wood burning by 50 per cent by 2030.⁹²⁵³ The plan includes measures to replace 600,000 appliances by 2025, the creation of an indication of obsolescence rates on new appliances and plans to increase supervision of wood burning in heavily polluted areas as well as the promotion of quality fuel.⁹²⁵⁴

On 28 July 2021, Minister Pompili, Deputy Minister in charge of Housing Emmanuelle Wargon and Deputy Minister in charge of Industry Agnès Pannier-Runacher announced the signing of a six-year commitment charter with key businesses in logistics real estate.⁹²⁵⁵ The goal of the charter is to create warehouses that are more environmentally friendly which will be achieved by installing solar panels on 50 per cent of roof space, encouraging rehabilitation of current wastelands for new warehouse sites, planting greenery and by committing to providing ecological studies of potential warehouse sites by an ecologist before receiving approval to build, all of which are conducive to France's commitment to transition to reusable energy, reuse underutilized land, reduce reliance on carbon emitting energy in buildings and remove carbon through the planting of carbon sinks.⁹²⁵⁶

On 2 August 2021, the French Development Agency announced a EUR50 million loan agreement with ProCredit Bank to finance green projects and small and medium sized businesses in Serbia.⁹²⁵⁷ The purpose of this loan agreement is to encourage sustainable development and continued green financing in Serbia.⁹²⁵⁸

On 30 August 2021, the Transport Innovation Agency announced the launch of the Propulse program which includes a call for innovative projects in sustainable transportation.⁹²⁵⁹ This is

conducive to the government's goals of decarbonizing the nation's vehicles, reducing energy use and ensuring accessible transportation.⁹²⁶⁰

France has fully complied with its commitment to endorse the CCE platform with its 4Rs framework, while also taking into consideration hydrogen and hydrogen enabling policies. It has complied with its commitment to reduce carbon emissions by investing in renewable energy, providing incentives for businesses to take actions to improve energy efficiency and by taking action to prevent waste and unnecessary production of materials. It has also complied with its commitment to reuse and recycle by raising public awareness about waste, the importance of recycling and the energy efficiency of products. Additionally, France has complied with its commitment to remove carbon by promoting the removal of emissions through investment in the conservation and production of carbon sinks. France also announced policies targeted towards hydrogen including the formation of the National Hydrogen Council.

Thus, France receives a score of +1.

Analyst: Karči Aldridge Végi

Germany: +1

Germany has fully complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 4 December 2020, Germany launched a EUR5 million funding program for the production of climate-friendly steel, also known as “green steel,” a s part of a wider industry decarbonization project. The Ministry of Environment intends “to reduce process-related greenhouse gas emissions in energy-intensive industries such as steel, cement, lime, and chemicals” using innovative technologies.⁹²⁶¹

On 12 December 2020, Germany pledged an additional EUR500 million to help developing countries meet their climate targets, agreed upon at the United Nations Climate Summit. Of this investment, EUR50 million is allocated to the Adaptation Fund and EUR100 million to the NAMA facility which helps developing countries cut emissions.⁹²⁶²

On 15 December 2020, the Federal Ministry for Economic Affairs and Energy released its call for funding for CO₂ capture and use in the primary industry. The call aims to “help close technical gaps that currently hinder the use of technologies and processes for CO₂ capture and use on a large scale.” Those eligible to apply include “universities and non-university research institutions as well as regional authorities or public administrations, clubs, associations and foundations.”⁹²⁶³

On 11 January 2021, Chancellor Angela Merkel announced that Germany would join the High Ambition Coalition for Nature and People, making a minimum of 30 per cent of land and sea in

Germany protected areas. The goal is to protect biological diversity, as well as the indigenous communities in these regions. Germany also agreed to support the funding of protecting areas in developing countries and emerging Geconomies through the Legacy Landscapes Fund.⁹²⁶⁴

On 10 March 2021, Germany updated its sustainable development strategy. This update included a broader commitment to promoting and supporting climate action globally, rather than within Germany alone. Additionally, the updated strategy outlines a plan for the quicker implementation of the United Nations Sustainable Development Goals.⁹²⁶⁵

On 24 March 2021, Germany announced their decision to compensate payments to energy companies for residual electricity volumes that can no longer be generated due to the phaseout of nuclear power.⁹²⁶⁶ In return, energy companies will remove any barriers preventing the phaseout of nuclear power.⁹²⁶⁷ The decision to phase out nuclear power will contribute to Germany's climate and renewable energy goals.

On 20 April 2021, Germany and Russia signed a Declaration of Intent. The document stipulated the creation of the High-level working group on sustainable energy and its constituent Sub-group on cooperation in the field of hydrogen energy. The Sub-group's goals include the exchange of experience in studying the technology of hydrogen production, storage, use, and transportation.⁹²⁶⁸

On 27 April 2021, the Ministry of Finance announced the German Recovery plan for the European Commission Regarding Corona Recovery Assistance, which included a significant investment and dedication to climate action and energy transformation.⁹²⁶⁹ The various investments into climate action outlined in this plan amount to roughly EUR28 billion.⁹²⁷⁰

On 12 May 2021, the German government adopted its revised Climate Change Act. It is stated that the "purpose of this law is to protect against the effects of global climate change, the fulfillment of the national climate protection targets as well as the compliance with the European [and to] ensure targets are met." To do this, there will be a focus on carbon sinks to achieve carbon neutrality by 2045 and negative emissions by 2050.⁹²⁷¹

On 28 May 2021, the German Federal Council passed the Act on the Provision of Comprehensive Fast Charging Infrastructure for Pure Battery Electric Vehicles or the "Fast Charging Act" which creates the legal basis for the targeted expansion of a nationwide network of fast charging stations for electric vehicles.⁹²⁷² The goal of the act is to ensure proper infrastructure for the charging of battery-

powered vehicles.⁹²⁷³ Thus, electric vehicles will become more accessible and more accepted, consequently reducing CO2 emissions in the transportation sector.⁹²⁷⁴

On 5 July 2021, the Federal Environment Minister Svenja Schulze, Federal Transport Minister Andreas Scheuer and the president of the German aviation association BDL Peter Gerber signed the PtL Roadmap or market ramp-up of climate friendly electricity-based aviation fuel.⁹²⁷⁵ With this joint roadmap, policy-makers and industry have agreed on the requirements and measures needed to establish and expand production of kerosene from power-to-liquid technologies over the coming years.⁹²⁷⁶ This roadmap will produce 200,000 tonnes of sustainable kerosene for the German aviation industry by 2030, accounting for one third of Germany's current fuel consumption.⁹²⁷⁷

On 15 July 2021, United States President Joe Biden announced the United States-Germany Climate and Energy Partnership, under which the two countries will develop policies for reduced carbon emissions, advance the development and production of renewable energy technologies, including sustainable hydrogen technologies, and increase the production and adoption of electric vehicles.⁹²⁷⁸ They will also provide investments in Central and Eastern Europe for mobilizing sustainable energy, including specific investments supporting Ukraine's energy transformation, efficiency, and security.⁹²⁷⁹

On 29 July 2021, Parliamentary State Secretary at the Federal Ministry of Economics Elisabeth Winkelmeier-Becker announced a funding decision to grant EUR10.9 million to Air Liquide Germany.⁹²⁸⁰ The grant will be used for the construction of a 20 megawatt electrolyzer for the production of green hydrogen in Oberhausen, Germany.⁹²⁸¹ This decision represents the first project

to be funded in Germany under their National Hydrogen Strategy, and will supply a variety of industries with renewable hydrogen.⁹²⁸²

On 2 September 2021, the Federal Minister of Economics Peter Altmaier, the Prime Minister of Rhineland-Palatinate Malu Dreyer, and the Minister of Economic Affairs of Rhineland-Palatinate Daniela Schmitt, announced a joint commitment to provide a grant for a large battery cell factory to be built at the Opel site in Kaiserslautern.⁹²⁸³ The sum of the grant is EUR436.8 million, EUR385.8 of which will come from Germany alone.⁹²⁸⁴ The purpose of this grant is to fund the development of more innovative, sustainable, and efficient batteries for the automotive industry.⁹²⁸⁵

On 3 September 2021, the federal Environment Ministry announced their decision to provide EUR12.6 million to a pilot project for the climate-friendly management of moors.⁹²⁸⁶ The goal of this project is to rewet two previously drained bog areas and establish and test paludiculture as a climate-friendly agricultural use, thus identifying possible solutions for reducing greenhouse gas emissions⁹²⁸⁷. State Secretary for the Environment Jochen Flasbarth was quoted stating, “Moors are not only unique natural landscapes, they are also important for nature and climate protection.”⁹²⁸⁸ Due to environmental mismanagement, these landscapes in Germany are currently releasing large amounts of emissions, which this project will seek to reduce.⁹²⁸⁹

Germany has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove), while also taking into consideration hydrogen and hydrogen enabling policies. Germany has taken actions to address three out of the four Rs framework (Reduce, Reuse, Recycle, Remove), partially complying with its commitment to endorse the Circular Carbon Economy platform. Their actions towards reducing emissions, as well as

India: 0

India has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 22 November 2020, Prime Minister Narendra Modi announced India's aim to "restore 26 million hectares of degraded land by 2030," "encouraging a circular economy."⁹²⁹⁰ This project is aimed at achieving the country's target of producing 175 gigawatts of renewable energy annually by 2022. Prime Minister Modi added that India is "taking a big step ahead by seeking to achieve 450 gigawatts [GW] by 2030."⁹²⁹¹

On 10 March 2021, the Ministry for New and Renewable Energy reported an 419.74 megawatts of renewable energy capacity was added in February 2021, taking the cumulative renewable energy capacity to 92.97 GW as of 28 February 2021.⁹²⁹² The Ministry's report added projects adding 50.15 GW capacity are at different implementation stages and projects adding 27.02 GW of capacity are at different bidding stages.⁹²⁹³ This additional capacity will support India in their transition to renewable energy, and reaffirms their commitment to this goal.

On 7 April 2021, the cabinet approved the Ministry of New and Renewable Energy's proposal for "implementation of the Production Linked Incentive Scheme "National Programme on High Efficiency Solar PhotoVoltaic Modules" for achieving manufacturing capacity of [GW] scale in high efficiency solar [photovoltaic] PV modules with an outlay of Rs.4,500 crore."⁹²⁹⁴ As the capacity of solar energy largely depends on solar PV cells, this action works towards the goal of transitioning to renewable energy.⁹²⁹⁵

On 15 April 2021, Oil Secretary Tarun Kapoor announced at the "Hydrogen Economy – New Delhi Dialogue" event that India has directed state-run oil and gas companies to establish seven hydrogen

pilot plants by the end of the current financial year.⁹²⁹⁶ This is a significant initiative as part of the Ministry of New and Renewable Energy's commitment to invest USD200 million for promoting hydrogen use over the next five to seven years.⁹²⁹⁷

On 22 April 2021, Prime Minister Modi, addressed the Leaders Summit on Climate 2021, emphasizing the importance of taking action to combat climate change.⁹²⁹⁸ In his address, he reaffirmed India's commitment to achieving its renewable energy target of 450 GW by 2030.⁹²⁹⁹ Further, he announced the launching of the India-US climate and clean energy Agenda 2030 partnership alongside President Joseph Biden of the United States.⁹³⁰⁰

On 29 June 2021, Minister of Power Raj Kumar Singh announced at the BloombergNEF Summit the government's planned new rules to allow companies to purchase renewable electricity from state distributors at weighted average prices, which are called "green tariffs."⁹³⁰¹ The government's regulatory framework also includes easing hurdles for businesses looking to purchase clean power directly from generators and will cut down their waiting periods to get access to the distribution network.⁹³⁰² This set of actions will accelerate clean energy usage in offices and factories and help India realize its 2030 decarbonization goal of expanding its renewable power capacity by nearly five-fold.⁹³⁰³

On 15 August 2021, Prime Minister Modi announced India's National Hydrogen Mission.⁹³⁰⁴ Under this plan, India will aim to become a global hub for green hydrogen production, hydrogen export and renewable energy.⁹³⁰⁵ According to Prime Minister Modi, this initiative will help India in obtaining energy self-reliance by 2047 and will reduce its historic reliance on imported fossil fuels.⁹³⁰⁶

On 9 September 2021, Minister of Petroleum and Natural Gas Hardsheep Singh Puri and United States Secretary of Energy Jennifer Granholm held a meeting where they relaunched the U.S-India

Strategic Clean Energy Partnership.⁹³⁰⁷ With this partnership, India and the United States will deploy technologies for transition to clean energy, for promoting efficient and smart energy building production, and for decarbonizing the energy sectors of India with the production of alternate fuels such as hydrogen.⁹³⁰⁸ The initiative will also advance production of clean energy technologies for reducing consumption of high polluting fuels.⁹³⁰⁹ This partnership will support India's goal of installing 450 gigawatts of renewable energy by 2030.⁹³¹⁰

India has taken actions to address two out of the four Rs framework (Reduce, Reuse, Recycle, Remove) of the Circular Carbon Economy, namely reducing carbon emissions by increasing renewable energy generation and removing emissions by increasing forest cover and hydrogen-enabling policies. Nevertheless, India has not taken actions towards reusing or recycling.

Thus, India receives a score of 0.

Analysts: Aadi Thulasingham and Minabil Iftikhar

Indonesia: 0

Indonesia has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 1 December 2020, Environment and Forestry Minister Siti Nurbaya announced the extension of the Peat Restoration Agency for the following years.⁹³¹¹ The extension implements President Joko Widodo's commitment and efforts for peatland ecosystem recovery.⁹³¹² Rehabilitating the country's peatland will enable the government to meet its emissions commitments, and help avoid forest fires, which have contributed substantially to carbon dioxide and other greenhouse gases entering the atmosphere. The Agency will work to restore five million acres of degraded peatland and mangrove ecosystems across 13 provinces.⁹³¹³

On 22 December 2020, Indonesia launched biodiesel containing 30 per cent palm-based fuel, to reduce the country's fossil fuel imports by IDR63 trillion a year.⁹³¹⁴ Through this program, Indonesia

plans to eventually phase out the use of conventional diesel and replace current oil consumption. The program aims to reach a 50 per cent palm oil blend by 2025.⁹³¹⁵

On 15 March 2021, Indonesia committed to offering tax incentives on electric vehicles.⁹³¹⁶ The tax break provided for hybrid cars will provide Indonesians with more incentive to purchase a low-emissions vehicle. Battery-powered electric vehicles will maintain their zero per cent tax rate, while plug-in-hybrid vehicles will have their five per cent drop to zero per cent.

On 19 March 2021, the Environment and Forestry Ministry Climate Change Management Director General Ruandha Agung Sugardiman acknowledged in a conference, reducing greenhouse gas emissions is a pressing issue, due to the rise in natural disasters.⁹³¹⁷ Director General Sugardiman stated that by 2050, the government will start working toward a net-zero emission, with the hopes of reaching the goal by 2070.⁹³¹⁸ This pledge contributes towards the commitment of reducing carbon emissions in the country.

On April 29 2021, President Widodo tasked the National Energy Council ministers and stakeholders to plan energy policies.⁹³¹⁹ The group has stated that the country will stop both liquefied petroleum gas and fuel imports by 2030.⁹³²⁰ The Council's secretary general Djoko Siswanto has committed to introducing devise strategies to halt the imports, by building or upgrading refineries, converting refineries to biodiesel refineries, and increasing domestic production.⁹³²¹ This action will contribute towards the nation reducing their emissions with the introduction of biodiesel.

On 8 May 2021, Indonesian state-owned electricity monopolist, PT Perusahaan Listrik Negara, pledged to become carbon neutral by 2050, with a plan to phase out fossil power plants, and transition to renewable energy.⁹³²² The president of the company, Zulkifli Zaini said the company was planning to develop new solar and wind power plants.⁹³²³ Under the same commitment, the company also commits to stop building coal plants by 2023.⁹³²⁴ This commitment will work towards reducing the country's emissions.

On 24 May 2021, the state-owned Indonesia Battery Corporation and South Korea's LG announced their plan to build a new battery plant.⁹³²⁵ This battery plant, worth IDR142 trillion will have the capacity of 10 gigawatt hours.⁹³²⁶ This commitment will work towards reducing the nation's carbon emissions, and removing fossil fuelled power sources.

On 14 June 2021, Energy Minister Arifin Tasrif announced that, starting in 2040, only electric motorcycles and scooters will be sold and, starting in 2050, only electric cars will be sold.⁹³²⁷ By 2030, the country hopes to produce 600,000 electric cars and 2.5 million electric motorcycles and scooters.⁹³²⁸ This measure will work towards replacing and removing vehicles powered by combustion engines, further reducing the country's carbon emissions.⁹³²⁹

On 18 June 2021, the Chief Executive Officer of Pertamina, a state-owned oil and natural gas corporation, signed a collaborative and joint study agreement with Japanese companies to review the implementation of carbon capture technologies.⁹³³⁰ This study will work towards reducing carbon emissions with potential reducing carbon emission as much as 300,000 tons of carbon emission per year, from a total of 3 million tons of carbon for 10 years.⁹³³¹

On 30 June 2021, the Indonesian government inaugurated a polyethylene terephthalate bottle-recycling factory.⁹³³² The plant has a production capacity of 25,000 tons per year.⁹³³³ The plant will help the country reduce plastic waste and will strengthen the recycling ecosystem and circular economy.⁹³³⁴

from renewable sources by 2026.⁹³³⁵ This will support the government's plan to reduce greenhouse gas emissions by 29 per cent by 2030 and reach net-zero by 2060.⁹³³⁶

On 23 July 2021, the Energy and Mineral Resources Ministry announced plans to make co-firing of biomass in power stations mandatory in an effort to phase out coal power plants.⁹³³⁷ The co-firing is an intermediate solution as the country works towards determining how to wholly phase out coal plants.⁹³³⁸ The state power company PT Perusahaan Listrik Negara plans to start co-firing at 52 of its biggest coal power plants, which is estimated to replace 9 million tonnes of coal per year with biomass.⁹³³⁹

Indonesia has taken actions to address two out of the four Rs framework (Reduce, Reuse, Recycle, Remove) and endorse the Circular Carbon Economy platform. Indonesia has implemented many policies and actions towards reducing their carbon emissions, including committing to reaching net-zero emissions by 2070. Through their inauguration of a polyethylene terephthalate bottle recycling factory, they have also satisfied the recycling commitment. However, they have not taken into consideration hydrogen or enabling policies, nor have they taken actions towards removing emissions or reusing.

Thus, Indonesia receives a score of 0.

Analyst: Surabhi Pradhan

Italy: 0

Italy has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 10 December 2020, Minister of Environment Sergio Costa signed a decree on the Minimum Environmental Criteria for the industrial washing and rental service of textiles and mattresses.⁹³⁴⁰ This decree is in line with “the objectives of reducing the environmental impact set out in the Action Plan for environmental sustainability and consumption in the public administration adopted in 2008” and contributes to the “reuse” aspect of the four Rs framework through improving the ability to reuse textiles and mattresses.⁹³⁴¹

forest fires, as well as an increase in the severity of punishments for crimes that contribute to the high rates of forest fires.⁹³⁵³

Italy has taken actions to address two out of the four Rs framework and to endorse the CCE platform. This has been done through actions to reuse textiles and mattresses, as well as through efforts to reduce emissions. However, Italy has not taken significant action on removing or recycling, nor has it taken into consideration hydrogen or enabling policies.

Thus, Italy receives a score of 0.

Analyst: Aisha Shafaqat

Japan: 0

Japan has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 4 December 2020, Prime Minister Yoshihida Suga announced that Japan will establish a fund of JPY2 trillion for environmental investment that it “will provide continuing assistance to companies taking up the challenge of ambitious innovations.” Additionally, Japan will develop hydrogen powered airplanes, hydrogen powered cargo ships, and low-cost storage batteries, contributing to the goal of decarbonization⁹³⁵⁴

On 14 December 2020, the Ministry of the Environment announced three projects to be selected for the Joint Crediting Mechanism Model Projects. The projects will introduce solar power systems at factories and universities in Vietnam, Indonesia and Thailand. The purpose of this programme is “to achieve the GHG emission reduction target by the Japanese government.”⁹³⁵⁵

On 25 December 2020, the Ministry of Economy, Trade and Industry formulated a “Green Growth Strategy Through Achieving Carbon Neutrality,” an industrial policy that will support lead the challenging goal of achieving carbon neutrality by 2050. It includes “action plans covering comprehensive policies in areas such as budgets, taxes, regulatory reform, standardization and international collaboration.”⁹³⁵⁶ The strategy is also projected to increase Japan’s electricity demand by 30 to 50 per cent and sets an installation target for offshore wind power of up to 45 gigawatts by 2040.⁹³⁵⁷

On 8 April 2021, State Minister of Economy, Trade and Industry Ejima Kiyoshi signed a Memorandum of Cooperation on hydrogen with the Minister of Energy and Infrastructure of the

United Arab Emirates Suhail Mohamed Al Mazrouei.⁹³⁵⁸ This will facilitate the construction of hydrogen supply chains and the exchange of information between Japan and the United Arab Emirates.⁹³⁵⁹

On 22 April 2021, Prime Minister Suga declared at the Leaders Summit on Climate, that Japan aims to “reduce its greenhouse gas emissions by 46 per cent in fiscal year 2030 from its fiscal year 2013 levels.”⁹³⁶⁰ Suga also announced that to achieve this, Japan is committed to utilizing decarbonized power sources and assisting other countries in decarbonization.⁹³⁶¹

On 28 May 2021, the Ministry of Economy, Trade and Industry, announced the Asia Energy Transition Initiative which aims to promote sustainability and carbon neutrality in Asia.⁹³⁶² To achieve this goal, Japan will present ASEAN countries with a package of concrete support measures based on five pillars: support for the development of energy transition roadmaps; presentation and promotion of the Asian version of the transition finance; USD10 billion financial support for renewable energy, energy efficiency, liquified natural gas and other projects; support for technology development and demonstration using the benefits of the JPY2 trillion fund; and human resource development on decarbonisation technologies and knowledge sharing through the Asia Carbon Capture Utilization and Storage network.⁹³⁶³

On 8 June 2021, the government of Japan announced at the International Atomic Energy Agency board of governors meeting a funding commitment of EUR1 million for the NUTECS plastics project, which stands for NUClear TEChnology, for controlling plastic pollution.⁹³⁶⁴ The project aims to promote nuclear techniques to monitor and reduce marine plastic pollution.⁹³⁶⁵

Japan has taken action to address two of the four key commitment areas within the four Rs framework, partially complying with its commitment to endorsing the CCE platform. It has taken actions on both reducing and removing emissions through policies aimed at growing renewable energy usage and decarbonization. Further, it has done so through employing hydrogen policies. Nevertheless, Japan has not contributed to reusing or recycling.

Thus, Japan receives a score of 0.

Korea: +1

Korea has fully complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

In December 2020, Korea submitted its Carbon Neutrality Strategy 2050 to the United Nations, where it pledged net-zero emissions for 2050. The strategy outlines key steps for a “sustainable and green society,” which include expanding the use of clean energy and clean hydrogen. The strategy also outlines mitigation measures which “will provide an opportunity for sustainable development.” Improving carbon efficiency, deployment of carbon removal technologies, and enhancing carbon sinks are among the planned efforts outlined in the strategy, as is either phasing out coal plants or converting them into liquified natural gas.⁹³⁶⁶

On 24 December 2020, the Ministry of Environment announced its plans for reducing plastic waste through increasing the recycling rate of plastic products.⁹³⁶⁷ The Ministry plans to reduce greenhouse gas emission from plastic by 30 per cent by 2030 through reducing production of plastic and reusing plastic waste for extracting oil. It also announced banning overseas plastic waste from Korea entirely by 2022, replacing petroleum plastics with bioplastics by 2050 and decreasing the usage of plastic containers to 38 per cent from 47 per cent.⁹³⁶⁸

On 21 January 2021, the Ministry of Environment announced its plans for supplying more than 300,000 electric and hydrogen vehicles for reducing pollution and carbon emissions. It has estimated 136,185 pollution-free vehicles with high air quality improvement effects to be supplied by the end of 2021, which will aim to advance plans for carbon neutrality in transportation.⁹³⁶⁹

On 5 February 2021, President Moon Jae-in signed a USD48 billion deal for building the “world’s biggest offshore wind power farm,” “moving more actively towards carbon neutrality, accelerating the transition to eco-friendly energy.”⁹³⁷⁰ As 40 per cent of electricity in Korea is provided by coal, this project is a step towards developing cleaner energy and reducing carbon emissions.⁹³⁷¹

On 2 March 2021, the Ministry of Environment announced its planned initiatives for achieving the 2050 carbon neutrality goal, which includes the transition from combustion vehicles to zero-emission vehicles. According to the strategy, the government will supply zero-emission and eco-friendly vehicles and increase research facilities for their development. The Ministry will “promote transition in all sectors of society and set a foundation to achieve the carbon neutrality goal.”⁹³⁷²

On 31 March 2021, the Technology Innovation Strategy for Carbon Neutrality was established which presented goals and strategies for meeting the carbon neutrality goal of 2050. These include presentation of strategies for the development of carbon neutral technologies like wind and solar power, hydrogen, and bioenergy.⁹³⁷³ These also included planning and promoting large scale carbon emitters for developing low carbon processing methods, funding and accelerating new technologies, and providing tax exemptions for carbon neutral research and development projects to attract more private investments.⁹³⁷⁴

On 22 April 2021, President Moon announced Korea's pledge of ending all public financing for building coal-fired power plants overseas during the Leaders Summit on Climate.⁹³⁷⁵ This action will aim to further reduce emission levels and Korea's reliance on power generated by goal. Korea will also increase the production of renewable energy which will include solar and wind power.⁹³⁷⁶

On 27 April 2021, the Ministry of Trade, Industry and Energy announced the approved amendments to the "Enforcement Decree of the Act on Promotion of Development and Distribution of Environment-friendly Motor Vehicles."⁹³⁷⁷ Under these amendments, public institutions, and private vehicles for the heads of public institutions are required to purchase and use only environment-friendly vehicles which include electric vehicles or hydrogen-fueled vehicles.⁹³⁷⁸

On 25 May 2021, Deputy Prime Minister and Minister of Economy and Finance Hong Nam-ki announced Korea's plan to invest KRW73.4 trillion—3.8 per cent of its GDP—in Green New Deal projects, including renewable energy technologies, green infrastructure, and sustainable mobility.⁹³⁷⁹ The government's public investment scheme will be complemented by a new USD4 billion fund to promote and support large-scale private investments in Green New Deal projects.⁹³⁸⁰ Together, these programs aim to accelerate Korea's transition to a low carbon economy, developing technologies for carbon neutrality and reducing greenhouse gas emissions.⁹³⁸¹

On 28 May 2021, the government of Korea signed a pact with the African Development Bank to invest USD600 million in Africa's energy sector to develop renewable energy and accelerate a transition to clean consumption, with funds to support projects like solar home systems and off-grid solutions.⁹³⁸²

On 14 July 2021, the government of Korea announced the Korean New Deal 2.0, which will expand on the Green New Deal.⁹³⁸³ Under this deal, Korea announced a further investment of USD191 billion for green energy projects, which include increasing hydrogen vehicle use.⁹³⁸⁴ A new category of carbon neutrality was also added, under which investments will be made to develop sectoral carbon reduction programs and measurement systems for emission monitoring.⁹³⁸⁵

On 25 August 2021, the Ministry of Trade, Industry and Energy announced Korea's plans to invest USD1.07 billion to establish five hydrogen clusters across the country.⁹³⁸⁶ This project will facilitate Korea's goal of having 6.2 million hydrogen-powered vehicles on the road by 2040.⁹³⁸⁷ An electrolysis facility will be constructed in the North Jeolla Province cluster, with most of the national solar farms for conversion of water to hydrogen using clean solar-generated electricity.⁹³⁸⁸ Biogases from landfills will be collected for hydrogen production in the Incheon cluster, and a liquid hydrogen plant will be built in the Gangwon Province cluster.⁹³⁸⁹

On 31 August 2021, the National Assembly of Korea passed the Framework Act on Carbon Neutrality and Green Growth, also called the Carbon Neutrality Act.⁹³⁹⁰ According to the bill, the government will be required to cut 35 per cent of gas emissions by 2030.⁹³⁹¹ To meet this goal, industries are required to increase the use of renewable energy.⁹³⁹² To facilitate this change, the

⁹³⁹² Drastic Carbon Neutrality Drive to Hurt Korean Firms (Seoul) 13 September 2021. Access Date: 13 September 2021. https://www.koreatimes.co.kr/www/tech/2021/09/693_315447.html

Ministry of Trade, Industry and Energy announced a funding of KRW6.7 trillion to thirteen carbon-intensive industries for assistance in developing technologies to reduce their carbon emissions.⁹³⁹³

On 9 September 2021, Korea's Industry Ministry announced an investment of USD81.5 million for developing new solutions to reduce carbon emissions in factories and industries.⁹³⁹⁴ These projects will include technologies for carbon capture before being released into the air, their utilization and storage for later use, and technologies for developing solutions for storing carbon dioxide indefinitely.⁹³⁹⁵

Korea has taken actions to address three of the four Rs framework (Reduce, Reuse, Recycle and Remove) and endorse the Circular Carbon Economy platform. It has complied with its commitment to reduce carbon emissions through investing in technologies for renewable energy production like wind, solar and hydrogen. It has complied with its commitment to reuse and reduce through investments and production of electric and hydrogen power and sources. It has complied with its commitment to remove and reduce carbon emissions by limiting investments and reliance on coal-generated power. Further, Korea has demonstrated its commitment to hydrogen policies through investments into hydrogen clusters. However, it has not sufficiently complied with its commitment to recycle.

Thus, Korea receives a score of +1.

Analyst: Minabil Iftikhar

Mexico: 0

Mexico has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 2 February 2021, the Ministry of Energy released the National Electricity System Development Program for the 2020-2034 period. This program outlines a plan to increase the capacity of hydroelectric power generation by 6.8 per cent by 2024. This is done with the goal of achieving 35 per cent clean energy generation by 2024 and 43 per cent by 2030.⁹³⁹⁶ Nevertheless, the plan outlines intent to more natural gas builds after 2024, a non-renewable form of energy.⁹³⁹⁷

On 23 February 2021, the Lower House of Congress passed a bill that would increase state control of the electricity market.⁹³⁹⁸ This bill has been criticized by environmental groups as the bill is seen as

a reversal to Mexico's endeavors in energy transition in the past decade—putting renewable energy supply to the “back of the queue.”⁹³⁹⁹

On 28 May 2021, the board of directors of the North American Development Bank, which is equally governed by both the American and the Mexican Governments, approved three new water projects to expand environmental infrastructure.⁹⁴⁰⁰ The three projects consist of implementing a new water distribution system in El Paso County, Texas, as well as expanding and improving the wastewater collection systems in Doña Ana County, New Mexico and Camargo, Chihuahua.⁹⁴⁰¹ The goals of these projects are to reduce greenhouse gas emissions and the impacts of climate change, as well as support the region in its transition to a green economy by allowing the Bank to invest in more varied environmental projects.⁹⁴⁰²

On 12 August 2021, the Mexican government reached multiple agreements with the Mennonite community in which the Mennonite communities committed to stop all activities that contribute to the deforestation of areas in the Mayan jungle.⁹⁴⁰³ As well, a permanent working table was implemented between the Mexican government and the Mennonite communities to solve any future matters related to deforestation.⁹⁴⁰⁴ The goal of these agreements is to reduce and revert the deforestation that has occurred in the region, as the Mayan forest acts as a carbon sink, thus removing emissions.⁹⁴⁰⁵

Mexico has taken actions to address two of the four Rs framework (Reduce, Reuse, Recycle, Remove) and endorse the Circular Carbon Economy platform. Through a variety of initiatives including investments into water projects, Mexico has taken action to reduce emissions. Further, through agreements to reverse deforestation, Mexico has demonstrated its commitment to removing emissions. Nevertheless, there has been a failure to address the commitment to reuse or recycle. As well, Mexico has not taken into consideration or attempted to employ hydrogen or enabling policies.

Thus, Mexico receives a score of 0.

importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 27 January 2021, Russia presented a project for the processing of batteries. These solutions are aiming at solving issues of battery recycling within the framework of the federal project “Infrastructure for Waste Management of the I-II classes” as part of the national project “Ecology” and were presented by JSC Rusatom Gateway.⁹⁴⁰⁶

On 12 February 2021, Russia finalized amendments to the methodological guidelines aiming at the creation of a national system for accounting for greenhouse gas emissions. The new methodological guidelines make it possible to calculate the absorbing capacity of all-natural ecosystems within the Russian Federation and also determine the methods for accounting for the absorption and emissions of greenhouse gases (CO₂, CH₄, N₂O) by natural ecosystems (forests, steppes, tundra, swamps, freshwater bodies).⁹⁴⁰⁷

On 11 March 2021, Russian state-owned company, Novatek PJSC agreed on tripling the clean output of energy by the end of the decade, which includes installing carbon capture and storage in one of its Arctic fields and exploring hydrogen opportunities.⁹⁴⁰⁸

On 18 March 2021, Russia supported the initiative of the Khanty-Mansi Autonomous Okrug to create carbon polygons, assessing the carbon absorptive capacity of forests and other ecosystems on the territory of the district jointly by specialized federal departments.⁹⁴⁰⁹

On 20 April 2021, the State Duma, the lower chamber of the Russian parliament, approved the law that creates a framework for climate projects in the country, and allows trading carbon units from emissions cuts or absorption.⁹⁴¹⁰ The law also requires companies to report their emission levels to regulators. From 2025, the legally mandated threshold of emissions will be lowered from 150,000 tons to 50,000 tons.⁹⁴¹¹

On 20 April 2021 Russia and German signed a Declaration of Intent. The document stipulated the creation of the High-level working group on sustainable energy and its constituent Sub-group on cooperation in the field of hydrogen energy. The Sub-group’s goals include the exchange of experience in studying the technology of hydrogen production, storage, use, and transportation.⁹⁴¹²

⁹⁴¹² The Ministry of Energy of Russia and the Ministry of Economy and Energy of Germany Signed a Joint Declaration of Intent on Cooperation in the Field of Sustainable Energy, Russian Ministry of Energy (Moscow) 20 April 2021. Access Date: 28 May 2021. <https://minenergo.gov.ru/node/20562>

On 3 August 2021, the Chairman of the Government of the Russian Federation Mikhail Mishustin approved a law to provide subsidies to regions for the purchase of containers for the separate accumulation of municipal solid waste.⁹⁴¹³ This is deemed to be an important step towards a circular economy, where waste becomes the raw material for new products.⁹⁴¹⁴

Russia has taken action to address all four components of the four Rs framework (Reduce, Reuse, Recycle and Remove). Through projects that support green processing of batteries and regulations towards reducing greenhouse gas emissions, Russia has complied with reducing emissions and recycling batteries. The agreements made to proceed with carbon capture and storage projects demonstrate their compliance with removing emissions. Finally, Russia's decision to fund containers for the accumulation of waste shows a commitment to reusing raw materials for new products. Nevertheless, Russia has not taken into consideration hydrogen or enabling policies.

Thus, Russia receives a score of 0.

Analyst: Dimitris Symeonidis

Saudi Arabia: 0

Saudi Arabia has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 16 December 2020, the Ministry of Environment, Water and Agriculture signed a memorandum of cooperation with Japan's Ministry of Environment to strengthen cooperation in the field of environmental protection. It aims to enhance collaboration on environmental protection and preservation and strategic planning and to promote environmental technology studies and capacity-building. It seeks to improve methods and techniques to monitor and control air pollution, develop methods and techniques to treat and dispose of contaminated soil and to reduce noise pollution and control vibration, improve environmental impact assessment procedures through studying the current status and management of waste including chemicals and hazardous waste.⁹⁴¹⁵

On 11 March 2021, the Ministry of Energy signed a memorandum of understanding (MoU) with Germany on the production and exploitation of hydrogen. This memorandum of understanding comes in the context of cooperation between the two countries in the field of hydrogen, in order to enhance development sustainability and prosperity, job opportunities in the two countries, protect the environment, and work to achieve the goals of the Paris Agreement on climate change, especially with regard to reducing emissions.⁹⁴¹⁶

On 3 February 2021, the Ministry of Energy announced the readiness of small solar photovoltaic systems, which allow consumer electricity production from home or work and link it to the public electrical grid distribution systems in the country. These systems include a calculator to determine the economic feasibility of the installation of the energy system of a small solar photovoltaic system, to clarify the estimated costs and to determine the procedures for a secure connection to the network.⁹⁴¹⁷

On 2 December 2020, the Ministry of Energy, in cooperation with King Abdullah University of Science and Technology, inaugurated the university's Circular Carbon Initiative. The ultimate goal of the initiative is to harness the strength of the university's research and innovations, in order to support the circular carbon economy agenda.⁹⁴¹⁸

On 11 January 2021, Saudi Arabia unveiled plans to build an emissions-free city, known as "The Line," powered entirely by clean energy and designed to function without cars or roads. The 170-kilometre belt of "hyper-connected future communities" will be part of the country's Neom urban mega-project—the USD500 billion centrepiece of the Saudi Vision 2030 scheme, which Crown Prince Mohammed bin Salman hopes will drive the kingdom's long-term diversification away from oil.⁹⁴¹⁹

On 28 March 2021, Crown Prince Mohammed bin Salman announced the "Saudi Green Initiative." The initiative will include, among others, planting over 10 billion trees, which, among other functions, will act as carbon sinks, but it will also work to reduce carbon emissions as it will include an ambitious renewable energy program that will generate 50 per cent of Saudi Arabia's energy from renewables by 2030, and several other projects in the field of clean hydrocarbons, estimated to eliminate more than 130 MT of carbon emissions.⁹⁴²⁰

On 24 April 2021, the Ministry of Energy announced that Saudi Arabia would join the US, Canada, Norway and Qatar to establish the net-zero producers' forum, a platform to discuss on finding ways to further support the Paris Convention on Climate Change goals.⁹⁴²¹ In this forum, Saudi Arabia, together the other member states will develop practical strategies to bring emissions to zero neutrality, including limiting methane emissions and promoting the circular carbon economy approach, developing and disseminating clean energy technologies, carbon capture and storage, diversifying sources of income that do not depend on hydrocarbon revenues, and other measures that are compatible with the national conditions of each country.⁹⁴²²

On 19 August 2021, the Ministry of Energy announced that two pieces of land, located in the third industrial city of Jeddah and the industrial city of Rabigh, with an aggregate area of 12 million square metres, have been allocated to the development of two renewable energy plants by the Saudi Authority for Industrial Cities and Technology Zones (MODON).⁹⁴²³ The Ministry in this way plans to diversify its energy mix, including the addition of gas and renewables, with the objective of reducing CO₂ emissions.⁹⁴²⁴

Saudi Arabia has taken actions to address two of the four Rs framework (Reduce, Reuse, Recycle, Remove). Through policies contributing to renewable energy, as well as through investments into carbon sinks, Saudi Arabia has demonstrated a commitment to reducing and removing emissions. Further, with its memorandum of understanding with the German government, there is a demonstrated commitment to hydrogen policies. Nevertheless, there have been no actions contributing to reusing or recycling.

Thus, Saudi Arabia receives a score of 0.

South Africa: 0

South Africa has partially complied with its commitment to endorse the Circular Carbon Economy (CCE) Platform, with its 4Rs framework (Reduce, Reuse, Recycle and Remove), recognizing the key importance and ambition of reducing emissions, taking into account system efficiency and national circumstances.

On 24 November 2020, the Green Economy unit of the Department of Economic Development and Tourism announced a three-year Municipal Energy Resilience Project in collaboration with Western Cape Economic Development and Tourism.⁹⁴²⁵ This project aims to work with the national government to explore how new energy regulations could lead to renewable energy generations within Western Cape.⁹⁴²⁶

On 2 December 2020, South Africa received a USD305,000 World Bank grant to “develop a study on sustainable financial mechanisms for demand-side energy efficiency market.” The beneficiaries of the study, the National Energy Development Institute and the Department of Mineral Resources and Energy, will “identify and develop appropriate financing mechanisms and associated institutional structures for implementing energy efficiency measures at scale, focusing on the public, agriculture and industrial sectors.”⁹⁴²⁷

⁹⁴²⁷ South Africa Receives World Bank Support to Stimulate Demand-Side Energy Efficiency Market, Department of Mineral Resources and Energy. (Cape Town) 02 December 2020. Access date: 20 March 2021. <https://www.dmr.gov.za/news-room/post/1883/south-africa-receives-world-bank-support-to-stimulate-demand-side-energy-efficiency-market>

On 13 December 2020, the Department of Environment, Forest and Fisheries approved the Antarctic and Southern Ocean Strategy. This project aims “for the coordination and implementation of the Antarctic Treaties Act, relating to research, conservation, sustainable resource use and environmental management in support of the African agenda.” The Southern Ocean is a significant sink for heat and carbon dioxide, meaning action towards its preservation will have significant results in reducing and mitigating climate change.⁹⁴²⁸

On 19 January 2021, the Department of Water and Sanitation pledged to strategically intervene to minimize the impact of raw sewer spillage into the Vaal River and waters in the southern Gauteng region. The department promised to improve local infrastructure and “would refurbish the wastewater treatment works and repair reservoirs, pump stations and rising mains.” To support this initiative, Deputy President Mabuza has dedicated R1.8 billion.⁹⁴²⁹

On 17 March 2021, Member of Executive Council David Maynier announced over R48.8 million over the medium term and R20 million in provincial reserves for the Municipal Energy Resilience (MER) Project in the Western Cape.⁹⁴³⁰

South Africa has taken actions to address three out of the four Rs framework, partially complying with its commitment to endorse the CCE platform. This was achieved through policies to reduce emissions through renewable energy, removal of emissions by protecting carbon sinks, and reuse of wastewater treatment works through infrastructure. Nevertheless, South Africa has not taken any actions towards recycling, or towards implementing hydrogen or enabling policies.

Thus, South Africa receives a score of 0.

Turkey: +1

Turkey has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove).

On 23 November 2020, Minister of Energy and Natural Resources Fatih Dönmez announced that Turkey expects to increase its capacity for solar and wind energy. Also, the Minister stated that the production of wind energy surpassed the total production of other renewable resources for the first time in Turkey’s history. The goal is to reduce carbon emissions and invest in clean energy.⁹⁴³¹

On 25 November 2020, Minister Dönmez announced that Turkey would establish a wind turbine and research and development factory in Izmir in line with the Renewable Energy Resource Areas project. The aim is to lead the world in wind energy innovation and increase the use of renewable energy.⁹⁴³²

On 10 December 2020, the Ministry of Energy and Natural Resources committed to increasing electricity generation that uses domestic and renewable energy to 65 per cent of all total installed power by 2023, compared to 50 per cent for the past 2 years. The goal is to increase Turkey's use of domestic and renewable energy.⁹⁴³³

On 10 December 2020, Minister Dönmez announced that Turkey's carbon dioxide emissions will be reduced by 66 million tonnes by 2023. The goal is to lessen Turkey's carbon emissions.⁹⁴³⁴

On 10 December 2020, Minister Dönmez announced that the Ministry of Energy and Natural Resources has implemented the Renewable Energy Resource Areas model that aims to accelerate Turkey's renewable energy investments. The model "requires domestic production, domestic engineers, domestic R&D and innovation in the field of renewable energy," with the goal of supporting energy and export technologies.⁹⁴³⁵

On 10 December 2020, Minister Dönmez announced that the Ministry of Energy and Natural Resources will launch the Renewable Energy Source Guarantee Document in 2021.⁹⁴³⁶ It will certify that a certain proportion of electricity is produced from renewable energy sources. The goal is to provide transparency for consumers and encourage the consumption of renewable electricity.⁹⁴³⁷

On 6 January 2021, Minister Dönmez stated that Turkey increased its solar power capacity from 40 megawatts in 2014 to 6,630 megawatts. The goal is to increase Turkey's use of renewable energy.⁹⁴³⁸

On 17 February 2021, the Ministry of Environment and Urban Planning announced that it strives to conduct projects to combat climate change on national and global levels. The Ministry outlined 541 actions and institutions to collaborate with, including other ministries, local governments and universities. Turkey will also be conducting climate research with the National Climate Change Platform and establishing the National Climate Change Research Center "where we will have our professors, local governments, non-governmental organizations in these scientific researches, and where policies will be determined and followed."⁹⁴³⁹

On 17 February 2021, the Ministry of Environment and Urban Planning highlighted that it aims to increase the recovery rate of waste to 60 per cent by 2035 as part of the Zero Waste Project. The Zero Waste project is expected to expand across Turkey by 2023. The goal is to increase recycling within Turkey.⁹⁴⁴⁰

On 17 February 2021, the Ministry of Environment and Urban Planning also said it will work to install solar energy systems and construct energy-efficient buildings that have strong insulation. The Ministry also announced its aim to reduce fossil fuel usage in its buildings by 25 per cent by 2023. The goal is to reduce carbon emissions through more energy-efficient buildings.⁹⁴⁴¹

On 17 February 2021, the Ministry of Environment and Urban Planning announced its plans to expand protected areas and ecological corridors through the creation of new national gardens across Turkey. The goal is to increase carbon sinks, in line with Turkey's greenhouse gas emissions reduction targets.⁹⁴⁴²

On 10 March 2021, Minister Dönmez announced that the Akkuyu Nuclear Power Plant is commissioned for 2023 where it will generate electricity with zero emission value, which contributes to Turkey's green energy target. The goal is to reduce Turkey's carbon dioxide emissions using more sustainable energy sources.⁹⁴⁴³

On 24 March 2021, the Ministry of Environment and Urbanization announced plans to update the Turkish National Climate Change Strategy and National Climate Action Plan.⁹⁴⁴⁴ The update will include the goal of increasing electricity production from solar energy to 10 gigawatts and from wind energy to 16 gigawatts, along with the implementation of the Emission Trading System for clean energy production.⁹⁴⁴⁵ The Ministry of Environment and Urbanization also stated that by 2023, it will reduce fossil fuel usage in buildings by 25 per cent and ensure that all buildings have an energy identity certificate by 2030.⁹⁴⁴⁶ The goal is to increase the use of renewable energy sources and better manage energy consumption.⁹⁴⁴⁷

On 2 April 2021, Minister Dönmez announced that the Ministry of Energy and Natural Resources aims to achieve 1000 megawatts of installed power within two years at the Karapınar Solar Power Plant that is currently under construction.⁹⁴⁴⁸ This power plant is to be "the world's largest solar power plant," after receiving TRY1.042 billion from the Ministry of Energy and Natural Resources in 2020.⁹⁴⁴⁹ The Ministry plans to invest an additional TRY612 million in the power plant in 2021.⁹⁴⁵⁰

The power plant can increase Turkey's solar power capacity, which is an important renewable energy source for the country.

On 2 April 2021, Minister Dönmez stated that in 2021, the Ministry of Energy and Natural Resources will build Turkey's hydrogen strategy after consulting industry experts and the public.⁹⁴⁵¹ Turkey will continue its intensive research and development on alternative energy sources, especially hydrogen and the potential of mixing hydrogen into the existing natural gas network.⁹⁴⁵² The Turkish Energy, Nuclear and Mining Research Council is conducting studies on hydrogen and transportation manufacturers are considering transforming diesel trains to being hydrogen-powered.⁹⁴⁵³ Minister Dönmez noted 4 key advantages of the transition to hydrogen: the increased use of renewable energy sources; the ability to decarbonize the heat industry; the ability to produce hydrogen from domestic coal; and increased use of boron to store hydrogen.⁹⁴⁵⁴ Minister Dönmez stated that Turkey's goal is to produce hydrogen from renewable sources, also known as "green hydrogen."⁹⁴⁵⁵

On 9 April 2021, the Ministry of Energy and Natural Resources and the Rectorate of Marmara University in Istanbul signed the "Cooperation Protocol for the Development of National and International Projects within the Scope of Energy Efficiency."⁹⁴⁵⁶ The protocol includes developing studies, organizing events and conducting joint projects to promote and increase energy efficiency.⁹⁴⁵⁷ Minister Dönmez stated that the Marmara University campus will be focusing on maintaining zero-waste facilities that operate using renewable energy-efficient sources.⁹⁴⁵⁸ The goal is to reduce energy usage in public buildings by 15 per cent compared to last year.⁹⁴⁵⁹

On 21 April 2021, the Ministry of Energy and Natural Resources announced its goal of producing a yearly minimum of 1000 megawatts of wind power and 1000 megawatts of solar power within the framework of the National Energy and Mining Policy.⁹⁴⁶⁰ Minister Dönmez stated that investments in renewable energy are expected to double in the next five years and electricity using renewable energy is expected to surpass coal electricity in the next five to 10 years.⁹⁴⁶¹ Minister Dönmez noted

⁹⁴⁵⁰ "We aim to reach an installed power of 1000 megawatts in 2 years", The Ministry of Energy and Natural Resources (Ankara) 2 April 2021. Access Date: 27 April 2021. <https://enerji.gov.tr/haber-detay?id=802>

⁹⁴⁶⁰ Mini YEKA competitions in solar energy will start on Monday., The Ministry of Energy and Natural Resources (Ankara) 21 April 2021. Access Date: 27 April 2021. <https://enerji.gov.tr/haber-detay?id=10811>

⁹⁴⁶¹ Mini YEKA competitions in solar energy will start on Monday., The Ministry of Energy and Natural Resources (Ankara) 21 April 2021. Access Date: 27 April 2021. <https://enerji.gov.tr/haber-detay?id=10811>

that legal regulations and incentives such as the European Union's carbon tax will "reinforce the dominance of carbon-free production resources in the coming period."⁹⁴⁶²

On 22 May 2021, the Ministry of Environment and Urbanization announced that it will be creating at least one national garden in every province until 2023.⁹⁴⁶³ The national gardens require the planting of trees, which act as carbon sinks that help remove carbon emissions.⁹⁴⁶⁴

On 24 June 2021, Minister Kurum announced Turkey's plans to expand Zero-Waste and Smart City practices throughout the country.⁹⁴⁶⁵ These practices entail more effective use of resources, protection of nature, making buildings Zero-Waste compatible and expanding smart technologies on a regional and national level.⁹⁴⁶⁶ The goal is to reduce waste in Turkey and use more energy-efficient practices to reduce the country's carbon footprint.⁹⁴⁶⁷ The Ministry aims to implement Zero-Waste across public institutions and buildings including airports, malls and markets by the end of 2023 using regulations to reduce plastic waste and emissions.⁹⁴⁶⁸

Turkey has fully complied with its commitment to endorse the CCE platform with its 4Rs framework. It has complied with its commitment to reduce carbon emissions with its investments in solar, nuclear and wind energy, installation of energy-efficient buildings and the introduction of 3D software to detect sources of air pollution. It has also complied with its commitment to recycle and reduce waste through the Zero Waste Project. Additionally, Turkey has made efforts to remove carbon emissions through the expansion of national gardens and protected ecological areas. Turkey has also committed to research and development on hydrogen and the creation of Turkey's hydrogen strategy to help the country work towards decarbonization and accelerate hydrogen innovation.

Thus, Turkey receives a score of +1.

Analyst: Amanda Wang

United Kingdom: +1

The United Kingdom has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove).

On 25 November 2020, Chancellor of the Exchequer Rishi Sunak announced the government's 2020 Spending Review forecasting government spending for 2021 to 2022.⁹⁴⁶⁹ The government announced, in line with its aims to reduce emissions in the transport sector, GBP1.9 billion in funding for electric vehicle charging infrastructure and consumer incentives. Further, the government will provide GBP1.1 billion to make homes and buildings more energy efficient. The government also announced the allocation of GBP1 billion for a Carbon Capture and Storage Infrastructure Fund as well as GBP92 million to the Nature for Climate Fund to increase tree-planting and peatland restoration, both key sources of carbon sequestration. This funding is conducive to the UK's goal of planting 30,000 hectares of trees a year by 2025.⁹⁴⁷⁰

On 4 December 2020, Prime Minister Boris Johnson announced new emissions targets aiming for a 68 per cent reduction in greenhouse gas emissions by 2030 compared to 1990 levels. This is an increase from the previous commitment of 53 per cent. With this increase the UK commits to reducing emissions at the fastest rate of any major economy.⁹⁴⁷¹

On 5 December 2020, the UK announced increased funding for tree planting measures. The GBP3.9 million in funding includes GBP2.5 million for pilot studies to develop new and efficient methods for planting trees in towns, cities and the countryside. The other GBP1.4 million has been given to the Environment Agency to fund 15 projects that will plant 850,000 trees along rivers. These initiatives contribute towards the government's goal of planting 30,000 hectares of trees per year by 2025.⁹⁴⁷²

On 6 December 2020, the UK launched Trees for Climate, funded by a GBP12.1 million, which will the planting of over 500 hectares of trees. When matured these trees will store 100,000 tons of carbon and will help the government reach its zero net emissions by 2050 target.⁹⁴⁷³

On 10 December 2020, the UK announced nearly GBP40 million in funding to 68 projects that will plant over 800,000 trees and create over 300 hectares of woodland. The funding is part of the Green Recovery Challenge Fund and will help create green industries and sequester carbon.⁹⁴⁷⁴

On 12 December 2020, the UK communicated its Nationally Determined Contribution under the Paris Agreement to the United Nations Framework Convention on Climate Change. The updated contribution plan commits the UK to reducing greenhouse gas emissions by at least 68 per cent of 1990 levels by 2030.⁹⁴⁷⁵

On 12 December 2020, the UK co-convened the Climate Ambition Summit with the United Nations and France.⁹⁴⁷⁶ At the summit, Prime Minister Johnson announced that the UK will end taxpayer support of international fossil fuel projects “as soon as possible” after a period of consultation and before COP26 in November 2021. This will accelerate the transition to green technology and renewable energy and the government will work with the UK oil and gas sector to facilitate the transition to low carbon energy sources.⁹⁴⁷⁷

On 14 December 2020, the UK set out the Energy White Paper, a plan to clean up energy systems. Within this plan includes steps to reduce emissions by 230 million metric tons by shifting away from fossil fuels with a GBP6.7 billion investment. While the timeline of this reduction was not specified, it supports a broader goal of achieving net-zero emissions by 2050. Additionally, this plan establishes a UK emissions trading scheme to come into effect 1 January 2021, to increase ambition on reducing emissions. The plan also includes the decision to invest GBP1 billion into carbon-capture storage in four industrial clusters by 2030 and at least one fully net-zero cluster by 2040. Finally, the plan outlines steps to stimulate the hydrogen economy by working with industry to aim for 5GW of production by 2030, backed up by a new GBP240 million net-zero Hydrogen Fund for low carbon hydrogen production.⁹⁴⁷⁸

On 6 January 2021, Science Minister Amanda Solloway announced an investment of GBP213 million to upgrade the UK’s scientific infrastructure. Some of the funding, although it is unclear how much, will go towards funding wind turbine testing facilities at the University of Plymouth and an X-ray facility at the University of Liverpool which will help scientists understand how carbon dioxide interacts with sandstone rocks aiding the development of improved methods of carbon capture and storage in order to reduce greenhouse gas emissions.⁹⁴⁷⁹

On 27 January 2021, Business Minister Paul Scully announced the investment of GBP42.3 million matched by the aviation industry for a total of GBP84.6 million in three projects seeking to develop green technology in the aviation industry with the goal of powering zero-emission flights by 2023.⁹⁴⁸⁰

On 29 January 2021, the UK announced that it will present legislation regarding the protection of vegetation on bog habitats. The burning of vegetation on blanket bogs is damaging to the habitat and complicates restoration efforts. The UK has 13 per cent of the world’s blanket bogs and they are a natural carbon sink making them crucial to the UK’s emission reduction goals.⁹⁴⁸¹

On 4 February 2021, Energy Minister Anne-Marie Trevelyan announced the latest round of the Energy Entrepreneurs Fund which will provide GBP11 million in funding to small and medium sized

businesses for the development of green technologies that reduce carbon emissions. The fund will support up to 15 projects and is part of the GBP1 billion Net Zero Innovation Portfolio seeking to reduce emissions in line with the UK's 2030 goals.⁹⁴⁸²

On 7 February 2021, the UK announced an investment of GBP40 million to help the UK's most polluting industries cut their carbon emissions. This announcement marks the start of the second funding window for the government's Industrial Energy Transformation Fund which will give between GBP100,000 and GBP14 million to single applicants and will provide a total GBP289 million in funding through to 2024. As a result of these projects, carbon emissions will be reduced by an estimated 2.6 million tons.⁹⁴⁸³

On 15 February 2021, Minister Trevelyan announced the creation of the UK Centre for Greening Finance and Investment funded by a GBP10 million government investment. The Centre, which is set to begin operations in April 2021, has physical hubs in Leeds and London and provides data and analytics to businesses that are looking to consider the impact of their investments and business decisions on the climate and the environment.⁹⁴⁸⁴

On 1 March 2021, the UK introduced updated energy labels which simplify the way energy efficiency is represented on products. The new system raises the standards for each class of energy efficiency (scale of A to G) making it so that few products will receive an A classification (whereas, under the old system, most products were classified as A+, A++ or A+++). The new labels will provide clarification on energy efficiency and incentivize producers to make their products more energy efficient.⁹⁴⁸⁵

On 9 March 2021, the UK announced a GBP92 million investment for the development of green technologies as part of the GBP1 billion Net Zero Innovation Portfolio. GBP68 million of this investment is dedicated to improving storage capacity technology which will improve the reliability of clean energy and accelerate commercialization. GBP20 million will fund floating offshore wind turbines, allowing them to be situated in areas where the water is too deep for them to be embedded in the sea floor or by advancing the development of dynamic high voltage cable systems and moorings. This is in line with the government's commitment to power every home in the country with wind by 2030. The final GBP4 million is dedicated to increasing the production of sustainably sourced biomass.⁹⁴⁸⁶

On 10 March 2021, the UK announced legislation on energy efficiency and "premature obsolescence" standards. Manufacturers of items such as washing machines, fridges and televisions will now have to adhere to stricter energy consumption standards and will also be required to make spare parts

⁹⁴⁸⁶ Over £90 million government funding to power green technologies, Department for Business, Energy & Industrial Strategy (London) 9 March 2021. Access Date: 21 March 2021. <https://www.gov.uk/government/news/over-90-million-government-funding-to-power-green-technologies>

available in order to extend the lifespan of products. The new standards will reduce 8 million tons of carbon emissions and improve the lifespan of certain products by up to 10 years.⁹⁴⁸⁷

On 12 March 2021, the UK launched the Mobilizing Finance for Forests Programme through which it will invest GBP150 million in order to fund sustainable land-use projects and rainforest protection and reforestation projects in Africa, Asia and Latin America. The fund will also attract private financial investment. The funding will help remove 28 million tons of carbon from the atmosphere over the next 15 years. This funding is part of the UK's commitment to provide GBP11.6 billion in international climate financing.⁹⁴⁸⁸

On 12 March 2021, the UK announced that an allocation of GBP2.7 million, as part of the Local Authority Treescapes fund, will go towards planting trees in previously neglected landscapes such as urban centers and beside roads and footpaths. The planting of these trees, particularly in urban areas or along roads, will help with carbon sequestration.⁹⁴⁸⁹

On 15 March 2021, Prime Minister Johnson announced the government's new bus strategy. The strategy, backed by GBP3 billion investment, will deliver 4,000 electric or hydrogen buses providing zero-emission travel. As part of the measures, the government also announced that they will end the sale of new diesel buses and launched a consultation period to determine an appropriate end date.⁹⁴⁹⁰

On 16 March 2021, the UK announced the launch of the Green Fuel, Green Skies competition which will see GBP15 million allocated to the development of facilities capable of turning everyday waste into jet fuel. Companies will bid for a portion of the funding to put towards projects that are seeking to develop technologies to convert household waste, wood and excess electricity into aviation fuel. This fuel is made of recycled materials and also emits up to 70 per cent less than conventional jet fuel.⁹⁴⁹¹

On 17 March 2021, Business and Energy Secretary Kwasi Kwarteng announced the government's new Industrial Decarbonization Strategy which outlines the government's plans for creating a low carbon industrial sector. In line with the strategy, the government announced funding of GBP171 million from the Industrial Decarbonization Challenge to green technology projects for the purpose of aiding the rollout of decarbonization infrastructure (carbon capture, usage and storage and hydrogen). Further funding of GBP932 million in from the Public Sector Decarbonization Scheme will also be directed to reduce carbon emissions from public buildings. The government also announced its intent to introduce new rules on measuring the energy and carbon performance of large commercial and industrial buildings which includes office buildings and factories in England and Wales which could lead to a reduction in annual carbon emissions by over 2 million tons.⁹⁴⁹²

On 18 March 2021, the UK announced the opening of a consultation period for the formation of a new Waste Prevention Programme for England. This programme would guide government and industry action across key sectors including textiles, packaging and plastic (including single-use items) in order to reduce waste and repair and reuse products more efficiently.⁹⁴⁹³

On 19 March 2021, Forestry Minister Lord Frank Zacharias Robin Goldsmith announced GBP120,000 in funding from the Nature for Climate Fund to support the new partnership between the Department for Environment, Food & Rural Affairs (DEFRA) and Forest for Cornwall. DEFRA and Forest for Cornwall will conduct a pilot called National Woodland Creation Partnership to support and increase regional planting.⁹⁴⁹⁴

On 20 March 2021, the UK announced a second wave of funding totaling GBP8.9 million, in order to meet its goal of decarbonizing the UK's distilleries. The production of whiskey was responsible for approximately 530,000 tons of carbon and carbon equivalents in 2018 and the industry grew by 20 per cent in 2019. The generation of heat for the distillation process primarily utilizes fossil fuels and accounts for more than 80 per cent of the industry's fuel consumption, this makes it a prime sector for the introduction of low carbon alternatives. The allotted funding to help accelerate the adaptation of low-carbon technologies is part of the GBP1 billion Net Zero Innovation Portfolio.⁹⁴⁹⁵

On 22 March 2021, the UK announced funding of GBP20 million for a competition for green maritime projects. The goal of the competition is to provide funding for development and testing of new green technologies for sea vessels and port infrastructure such as hydrogen powered vessels and e-charging stations.⁹⁴⁹⁶

On 22 March 2021, Secretary Kwarteng announced GBP54 million in funding for three electric truck and hydrogen-powered bus projects.⁹⁴⁹⁷ The funded projects deal with improving travel range and energy efficiency for electric trucks and the development and manufacturing of low-cost hydrogen fuel cell technology.⁹⁴⁹⁸ These projects are expected to save up to 45 million tonnes of carbon emissions.⁹⁴⁹⁹

On 24 March 2021, the UK announced the North Sea Transition Deal which will aid the oil and gas industry in their transition to net zero emissions.⁹⁵⁰⁰ Through this deal the government will emphasize the use of carbon captures, hydrogen production and offshore wind farming.⁹⁵⁰¹ The deal outlines the government's intention to cut the North Sea's oil and gas industry by 10 per cent based on a 2018 baseline by 2025, rising to 50 per cent by 2030.⁹⁵⁰² The goal is to reach net zero by 2050. To this end, an investment of GBP14 to 16 billion will be allocated to the industry by 2030, with up to GBP10 billion being directed towards hydrogen production and GBP3 billion towards carbon captures and stores. Further, the government is introducing a Climate Compatibility Checkpoint in order to ensure that all licenses awarded to companies are compatible with the UK's emission targets.⁹⁵⁰³

On 24 March 2021, the UK announced that it would end support for overseas fossil fuel sectors on 31 March 2021.⁹⁵⁰⁴ This announcement provides an official end to the support for overseas fossil fuels, which Prime Minister Johnson had announced at the Climate Ambition Summit on 12 December 2020.⁹⁵⁰⁵ In ending support for overseas fossil fuel sectors, the government will no longer fund or promote new crude oil, natural gas or thermal coal projects.⁹⁵⁰⁶

On 27 March 2021, the UK announced an additional GBP300 million in funding to the Green Home Grant voucher scheme.⁹⁵⁰⁷ This increased funding is part of the government's commitment to provide GBP9 billion in funding for improvements to energy efficiency and lower carbon emissions in buildings.⁹⁵⁰⁸ The funds will enable the replacement of gas boilers with low carbon alternatives such as heat pumps and will also allow for houses to receive updated insulation and solar panels.⁹⁵⁰⁹

On 20 April 2021, the UK presented its sixth Carbon Budget in which it committed to reducing the country's carbon emissions by 78 per cent of 1990 levels by 2035, this announcement builds on the

previously announced goal of reducing the UK's carbon emissions by 68 per cent of 1990 levels by 2030.⁹⁵¹⁰ The Carbon Budget will now also track the UK's share of international aviation and shipping, allowing for more accurate and consistent tracking of emissions.⁹⁵¹¹

On 18 May 2021, the UK Government released its England Trees Action Plan, which aims to plant 30,000 hectares of trees per year.⁹⁵¹² The plan will operate with GBP500 million set aside by the Nature for Climate Fund and will create new community forests around England as well as increasing tree cover in cities and towns to help with carbon sequestration.⁹⁵¹³

On 24 May 2021, the UK Government announced a funding package of GBP166.5 million for the development of green technology such as carbon capturing methods, greenhouse gas removal and hydrogen utilization and for the decarbonization of polluting sectors of the economy.⁹⁵¹⁴ GBP60 million will be dedicated towards low carbon hydrogen technology as well as increasing the efficiency of hydrogen energy creation, GBP37.5 million will be dedicated to greenhouse gas removal methods and GBP20 million will be directed towards researching new carbon capture, usage and storage technologies among other initiatives.⁹⁵¹⁵

On 24 May 2021, the UK Environmental Agency released its roadmap for cutting its own carbon emissions by 45 per cent and reaching net zero by 2030.⁹⁵¹⁶ In order to reach this goal the Environmental Agency pledges to use low carbon concrete for flood defences as well as energy-efficient water pumps, and to switch entirely to electric vehicles by 2023.⁹⁵¹⁷

On 28 May 2021, the UK Government announced funding of GBP44 million to reduce carbon emissions in homes and public buildings by creating low carbon heat networks, reducing emissions in areas serviced by the new heat networks by up to 22 per cent and energy costs by up to 15 per cent.⁹⁵¹⁸

On 9 June 2021, the UK Government announced plans to end the sale of hydrogen light bulbs from September 2021 as well as high-energy fluorescent light bulbs by September 2023.⁹⁵¹⁹ Ending the sale of these light bulbs will reduce carbon emissions by 1.26 million tonnes per year.⁹⁵²⁰

On 30 June 2021, Energy Trevelyan announced plans to end the use of coal power by 1 October 2024, a year earlier than previously planned.⁹⁵²¹ The purpose of this is to further accelerate the decarbonisation of the country's energy system.⁹⁵²²

On 19 July 2021, Highways England released its roadmap to net zero carbon emissions on all roads under its purview by 2050.⁹⁵²³ The plan commits to a 75 per cent reduction in carbon emissions compared to 2017 and 2018 levels by 2025 as well as achieving net zero emissions for Highways England corporate emissions by 2030, and maintenance and construction emissions by 2040.⁹⁵²⁴ The plan also commits to planting 3 million trees by 2030 as well as the creation of roadmaps for zero-carbon cement, concrete and asphalt.⁹⁵²⁵

On 21 July 2021, the Department for Environment, Food and Rural Affairs along with England Community Forests and local councils announced the creation of the North East Community Forest.⁹⁵²⁶ This initiative will plant up to 500 hectares of trees by 2025 and has a long term goal to increase canopy cover in England's north east to 30 per cent by 2050.⁹⁵²⁷ The trees will be planted in urban locations as well and will help sequester carbon.⁹⁵²⁸ This initiative contributes towards the government's goal of planting 30,000 hectares of trees per year by 2025 in accordance with the England Trees Action Plan.⁹⁵²⁹

On 27 July 2021, the UK Government announced a funding boost of GBP20 million to accelerate the transition to zero-emission road freight.⁹⁵³⁰ Through this funding, field-testing and feasibility studies will be conducted in order to help facilitate the design and development of cost-effective zero emission heavy goods vehicles.⁹⁵³¹ This includes studying the feasibility of hydrogen fuel cells in heavy goods vehicles and new refuelling infrastructure, and is conducive both to the promotion of hydrogen energy and the reduction of emissions for the transport sector.⁹⁵³²

On 27 July 2021, Foreign Secretary Dominic Raab announced GBP3.6 million in funding from the UK to Kenya in order to accelerate Kenya's climate transition, including projects supporting renewable energy and forest restoration.⁹⁵³³ The UK will also provide GBP34 million for the creation of 10,000 green homes and GBP439,000 toward procuring policy advice and technical assistance for the purpose of developing green manufacturing in Kenya.⁹⁵³⁴

On 2 August 2021, the UK announced an increase of GBP17 million to the funding of the Catchment Sensitive Farming programme over the next three years.⁹⁵³⁵ The increase in funding will allow Natural England to provide this service to 100 per cent of England's farmland, providing farmers with direct consultation with advisors on ways to reduce water and air pollution on their farms.⁹⁵³⁶

On 6 August 2021, the UK announced funding of GBP5 million for the creation of the Climate Services for a Net Zero Resilient World research program.⁹⁵³⁷ In addition to providing data and transformative advice to help meet the government's net zero emissions plan, the program will also engage with local authorities to create local climate action plans in order to help households identify low-cost, low-carbon measures for coping with extreme temperatures and weather events.⁹⁵³⁸ The

program will also provide models on how the UK can reduce carbon emissions globally, informing and building on the UK's current work helping countries develop decarbonization strategies.⁹⁵³⁹

On 17 August 2021, Business and Energy Secretary Kwasi Kwarteng announced the UK's Hydrogen Strategy, which presents the government's plan to meet its hydrogen production target of 5GW electrolyzer capacity by 2030, as well as introducing low carbon hydrogen energy into the UK's energy system.⁹⁵⁴⁰ An increase in low carbon hydrogen energy production will allow for the decarbonization of energy-heavy, polluting industries as well as reducing the overall carbon emissions from the UK's energy consumption, potentially representing 20-35 per cent of the UK's energy consumption by 2050.⁹⁵⁴¹ This is conducive to the UK reaching its goal of net zero carbon emissions by 2050.⁹⁵⁴²

On 17 August 2021, the UK announced GBP105 million in funding to help industries develop low carbon alternatives for industrial fuels, such as hydrogen energy.⁹⁵⁴³ This funding allows industries to research and develop low-carbon energy alternatives which will help reduce carbon emissions, ensuring both the UK and individual industries reach net zero emissions by 2050.⁹⁵⁴⁴

On 2 September 2021, the UK, in cooperation with India, announced a GBP1.2 billion investment in climate-related projects in India between 2022 and 2026, with GBP1 billion of this investment coming from the UK's development finance institution, the CDC Group.⁹⁵⁴⁵ The goal of this investment is to both support adaptation and mitigation to climate change and to encourage private investment in the development of green infrastructure in India.⁹⁵⁴⁶ This will help reduce carbon emissions through the development of greener industries, businesses and infrastructure.⁹⁵⁴⁷

The UK has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove), while also taking into consideration hydrogen and hydrogen enabling policies. It has complied with its commitment to reduce carbon emissions with its investments in renewable energy, green technology and transportation as well as

through consumer awareness initiatives. It has complied with its commitment to reuse and recycle through supporting initiatives to extend product life as well as innovative recycling projects. Additionally, the UK has promoted the removal of carbon emissions through conservation of forests and bogs and the planting of trees as well as through investment in the development and deployment of carbon capturing and storage initiatives. The UK has also enacted policy in support of hydrogen, setting energy production targets for the industry, creating a fund to stimulate the hydrogen economy, including hydrogen projects in the Industrial Decarbonisation Challenge and by promoting transportation infrastructure that uses hydrogen.

Thus, the United Kingdom receives a score of +1.

Analyst: Karči Aldridge Végi

United States: +1

The United States has fully complied with its commitment of endorsing the Circular Carbon Economy platform with its 4 Rs framework (Reduce, Reuse, Recycle, and Remove).

On 27 December 2020, Congress authorized USD35 billion for funding solar, wind and other clean energy and sustainable energy technologies over the next five years. By extending federal tax credits, the bill will incentivize development and construction of clean energy technologies, which also surpasses the total dollar amount of investments for renewable energy in 2020.⁹⁵⁴⁸ The bill outlines extensions of investments to new fuel cells, for waste heat energy recovery and for offshore wind energy development. Tax credits will also be extended for carbon capture, utilization and storage, and for the development of carbon capture facilities under this bill, which will reduce carbon emissions.⁹⁵⁴⁹

On 20 January 2021, the US rejoined the Paris Climate Agreement, aiming to focus on the climate crisis and take quick actions. This is seen as a step towards achieving its net-zero emissions goal by 2050.⁹⁵⁵⁰

On 5 February 2021, the US reintroduced the Growing Renewable Energy and Efficiency Now Act (GREEN Act), which was first introduced in June 2020.⁹⁵⁵¹ This Act is part of President Joseph Biden's "rescue and recovery" plan, which will aim to further enhance developments for clean energy, including solar and wind technologies. The GREEN Act will also include proposals for electric and zero-emission vehicles and modifying the existing limitations on the credits available for electric vehicles. The bill will expand and enhance the use of renewable energy by promoting clean energy technologies and deploying zero-emission vehicles.⁹⁵⁵² Incentives will also be provided through this act for the conservation of energy in homes and buildings.

On 8 March 2021, the Department of Energy announced up to USD52.5 million for university-based training programs of Industrial Assessment Centres, which help the manufacturers and wastewater treatment facilities in reducing their carbon footprint.⁹⁵⁵³ According to the Secretary of Energy, “This new funding is an investment in both the infrastructure and next generation clean energy workforce we need to tackle climate emergency.”⁹⁵⁵⁴

On 10 March 2021, the Department of Energy announced the construction of the Grid Storage Launchpad, which will increase the adaptation of clean energy, and the development of low-duration energy storage. According to the Secretary of Energy, “Developing new grid technologies means we can get more renewable power on the system, support a growing fleet of electric vehicles, make our grid more reliable and resilient and secure our clean energy future.” The Washington State Department of Commerce also announced the allotment of USD8.3 million for any required advanced research and equipment.⁹⁵⁵⁵

On 15 March 2021, the Department of Energy awarded USD2 million to four clean-hydrogen production technologies projects. These projects aim to reduce carbon emissions and create more clean energy sources. As natural gas usage in industrial facilities is the main source of hydrogen production in the US, these projects will use the process of co-gasification as a different way to produce cleaner hydrogen as a clean energy source.⁹⁵⁵⁶

On 8 April 2021, the Department of Energy announced an investment of USD81 million for the development of technologies for producing low cost and low carbon biofuels and for sustainable aviation fuel.⁹⁵⁵⁷ This initiative is a step towards decarbonizing the transportation sector which include heavy duty vehicles like airplanes and ships which are difficult to convert to current electric technologies.⁹⁵⁵⁸ They will further develop technologies for converting waste resources into biofuels and bioproducts for reducing transportation emissions.⁹⁵⁵⁹

On 21 April 2021, Department of Agriculture (USDA) Secretary Tom Vilsack announced investments in projects for increasing climate-smart agriculture.⁹⁵⁶⁰ The open enrolment to the

⁹⁵⁶⁰ USDA Expands and Renews Conservation Reserve Program in Effort to Boost Enrollment and Address Climate Change, U.S Department of Agriculture (Washington) 21 April 2021. Access Date: 28 April 2021. <https://www.fsa.usda.gov/news-room/news-releases/2021/usda-expands-and-renews-conservation-reserve-program-in-effort-to-boost-enrollment-and-address-climate-change>

Conservation Reserve Program was announced allowing up to 4 million new acres, which will allow an increased reduction in nitrogen runoff and sequestering carbon.⁹⁵⁶¹ For increased enrollment and implementation of conservation practices by producers, the USDA announced a further investment of USD140 million for technical assistance.⁹⁵⁶² The Natural Resources Conservation Service will further invest USD330 million in 85 local partnerships for addressing natural resources challenges.⁹⁵⁶³

On 22 April 2021, President Biden announced a new target of reducing 50 to 52 per cent of greenhouse gas pollution from the 2005 levels by the end of 2030.⁹⁵⁶⁴

On 22 April 2021, the US announced seven new clean energy programs for USD200 million for a net-zero energy grid in Asia.⁹⁵⁶⁵ These programs will also aim to support transition to electric vehicles, and reforming of power sectors, which will be a step towards clean energy development and net-zero carbon emissions.⁹⁵⁶⁶

On 22 April 2021, the US announced the cooperation of USAID for supporting programs and initiatives for decarbonization during the Leaders Summit on Climate.⁹⁵⁶⁷ This will include supporting the development of the largest solar-generation project in Southern Africa which is estimated to reduce 6.5 million tons of carbon dioxide annually and replacing coal-generated electricity from South Africa, estimating to remove 1.5 million cars off roads.⁹⁵⁶⁸

On 23 April 2021, the Department of Energy announced a funding of USD109.5 million energy development projects.⁹⁵⁶⁹ These included USD75 million for engineering and installing carbon

capture and storage technologies for power plants and USD19.5 million for the extraction of critical minerals from coal waste streams for manufacturing batteries and other necessary components of electric vehicles and clean energy technology.⁹⁵⁷⁰

On 26 April 2021, the Agency for International Development announced two investments to assist Vietnam in addressing their climate crisis.⁹⁵⁷¹ These projects include investments of USD36 million for the Sustainable Forest Management Project for reducing carbon emission from deforestation and forest degradation and an investment of USD38 million for the Biodiversity Conservation Project for increasing forest quality.⁹⁵⁷² Through the protection of forests and biodiversity, both these projects will aim to reduce greenhouse gas emissions.⁹⁵⁷³

On 27 April 2021, the Department of Energy announced the availability of financial tools which will provide up to USD8.2 billion in loans for improving and modernizing the nation's transmission grid and for increasing access to more reliable and clean power.⁹⁵⁷⁴ These include up to USD5 billion in loans from the Loans Program Office which will support innovative transmission projects including transmissions to connect offshore wind and facilities which are sited alongside rail and highway routes.⁹⁵⁷⁵ They also include up to USD3.25 billion from the Western Area Power Administration's Transmission Infrastructure Program for supporting and facilitative infrastructure projects for the delivery of reliable and clean power in the West.⁹⁵⁷⁶ These initiatives are part of the US' goal of reaching 100 per cent clean energy by 2035 and President Biden's American Job Plan.⁹⁵⁷⁷

On 11 May 2021, the Secretaries of the Interior and Commerce announced the approval of the development of the 800-megawatt Vineyard Wind energy project—the first large-scale offshore wind project in the United States.⁹⁵⁷⁸ This energy project aims to generate 30 gigawatts of energy derived

from offshore wind and provide enough power for 400,000 businesses and homes, moving the United States closer to cleaner energy generation.⁹⁵⁷⁹

On 25 May 2021, Secretary of the Interior Deb Haaland, National Climate Advisor Gina McCarthy, Under Secretary of Defense for Policy Dr. Colin Kahl and Governor of California Gavin Newsom announced an agreement for advancing and developing offshore wind on the country's Pacific coast, aiming to develop up to 4.6 gigawatts of clean energy.⁹⁵⁸⁰ These energy projects are a further step towards developing the United States's clean energy resources.⁹⁵⁸¹

On 24 June 2021, the United States Department of Energy announced funding of USD30 million for 68 projects to accelerate the commercialization of clean energy technologies and resources, with the aim of achieving the United States's net-zero carbon emission goals.⁹⁵⁸²

On 15 July 2021, President Biden announced the United States-Germany Climate and Energy Partnership, under which the two countries will develop policies for reduced carbon emissions, advance the development and production of renewable energy technologies, including sustainable hydrogen technologies, and increase the production and adoption of electric vehicles.⁹⁵⁸³ They will also provide investments in Central and Eastern Europe for mobilizing sustainable energy, including specific investments supporting Ukraine's energy transformation, efficiency, and security.⁹⁵⁸⁴

On 24 June 2021, the United States Department of Energy announced funding of USD30 million for 68 projects to accelerate the commercialization of clean energy technologies and resources, with the aim of achieving the United States' net-zero carbon emission goals.⁹⁵⁸⁵ The projects will range from clean energy and advanced manufacturing, to building efficiency and next-generation materials.⁹⁵⁸⁶

a financing program with USD4 trillion to assist India in meeting its target of deploying 450 gigawatts of renewable energy.⁹⁵⁹⁷

The United States has taken actions to fully address all four Rs framework (Reduce, Reuse, Recycle and Remove) and endorse the Circular Carbon Economy platform. It has complied with its commitment to reduce carbon emissions through investments in the development of renewable energy technology and production, including wind energy, solar energy, and hydrogen and to produce clean and reliable power through initiatives like production of electric vehicles. It has complied with its commitment to remove emissions and recycle through investments in biofuel production and hydrogen technologies, as well as biodiversity and forest protection. It has complied with its commitment to reuse through initiatives of conversion to cleaner energy and energy sources which include electric and hydrogen. It has complied with its commitment to remove emissions through carbon capture and storage technologies.

Thus, the United States receives a score of +1.

Analyst: Minahil Iftikhar

European Union: +1

The European Union has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove).

On 1 December 2020, the European Commission initiated its second call for projects for the Innovation Fund, a funding program that supports low-carbon technological innovations. The program provides financial aid to projects focused in addressing “in renewable energy, energy-intensive industries, including substitute products, energy storage, and carbon capture, use and storage.”⁹⁵⁹⁸ The goal is to support and encourage sustainable technological innovations.⁹⁵⁹⁹

On 8 December 2020, the European Parliament voted that all member states must become climate neutral by 2050. It also increased the EU’s emissions reduction target to 60 per cent by 2030, in accordance with the Paris Agreement, and called for ambitious 2030 and 2040 emissions reduction goals. This sought to reduce emissions by enshrining these objectives in legislation. The European Parliament announced that “the EU and member states must also phase out all direct and indirect fossil fuel subsidies by 31 December 2025.” The goal is to decrease emissions by investing less in fossil fuels.⁹⁶⁰⁰

On 8 December 2020, the European Parliament and the European Council agreed on a provisional deal regarding the future of regional and cohesion funds. The deal says that a significant portion of the European Regional Development Fund will be invested in “smart growth and the green economy.” A minimum of 30 per cent of regional funding will go towards supporting climate action.

⁹⁵⁹⁷ In India, Kerry Pushes for Modi to Set Net-Zero Goals (New Delhi) 13 September 2021. Access Date: 13 September 2021. <https://www.washingtonpost.com/world/2021/09/13/india-climate-emissions-kerry/>

⁹⁵⁹⁸ Second Innovation Fund call for projects: Commission to invest €100 million in innovative small-scale clean technologies, European Commission (Brussels) 1 December 2020. ⁹⁶⁰⁰ EU climate law: MEPs want to increase 2030 emissions reduction target to 60%, European Parliament (Brussels) 8 December 2020. Access Date: 12 March 2021. <https://www.europarl.europa.eu/news/en/press-room/20201002IPR88431/eu-climate-law-meps-want-to-increase-2030-emissions-reduction-target-to-60>

The deal will respect climate, circular economy and biodiversity goals. The goal is to encourage sustainability through economic, social and territorial cohesion.⁹⁶⁰¹

On 15 December 2020, the European Commission adopted an implementing decision regarding annual emission allocations for 2021-2030 under the Effort Sharing Regulation. The Commission Implementing Decision will translate emissions limits “in tons of CO₂ equivalent for each year and Member State along a linear trajectory between 2021 and 2030.” The goal is to reduce emissions through the implementation of a binding emissions target.⁹⁶⁰²

On 16 December 2020, the European Parliament approved a seven-year EU budget ranging from 2021-2027. The budget states that there will be increased tracking to ensure 30 per cent of the EU budget and Next Generation EU expenditures will go towards climate action initiatives, and 7.5 per cent of the yearly budget will support biodiversity objectives. The goal is to increase various actions to combat climate change.⁹⁶⁰³

On 8 January 2021, the European Investment Bank signed a EUR150 million loan to shift a paper mill in Oulu, Finland, from producing printing paper to instead making packaging materials composed of unbleached pulp. The European Investment Bank claims the project has an “important climate change mitigation angle,” because it favours the use of sustainable raw materials over fossil-based materials while generating renewable energy.⁹⁶⁰⁴

On 27 January 2021, the European Parliament adopted policy recommendations from the EU Circular Carbon Economy Plan for a “carbon-neutral, sustainable, toxic-free and fully circular economy by 2050 at the latest.” Members of Parliament highlighted the need for a genuine circular economy through waste prevention and the reduction of energy and resource usage. Members of Parliament endorse the Commission’s focus on ensuring that products placed on the EU market are “durable, reusable, can be easily repaired, are not toxic, can be upgraded and recycled, contain recycled content, and are resource- and energy-efficient.” The goal is to decrease waste through extending the life of products and making them recyclable.⁹⁶⁰⁵

On 5 February 2021, the European Parliament adopted the resolution to implement a World Trade Organization-compatible carbon border adjustment mechanism that would impose a carbon price on certain imports. The goal is to incentivize the EU and non-EU trade industries to lessen their carbon emissions in accordance with the Paris Agreement.⁹⁶⁰⁶

On 10 February 2021, the European Investment Bank approved a EUR600 million package for automotive supplier Valeo to finance its emissions reduction research initiatives. The goal is to support “research and innovation, as well as the transition to a low-carbon, environmentally friendly economy.”⁹⁶⁰⁷

On 11 February 2021, the European Investment Bank invested EUR1.3 billion into Czech Republic for “businesses, regional infrastructure, climate adaptation, the energy transition and sustainable transport.”⁹⁶⁰⁸ Within this investment includes a EUR190 million loan to the Czech Transmission System Operator, partly to increase renewable energy in the electricity network.⁹⁶⁰⁹

On 17 February 2021, the EU increased its funding by 20 per cent, investing EUR121 million in new projects under the LIFE program for the Environment and Climate Action. The goal is to support various climate projects in several member states. This includes an initiative to decarbonize the Mátra Power Plant in Hungary, the restoration of 10,000 hectares of peatlands with high carbon storage capacity in Ireland, and the reduction of plastic waste in Belgium.⁹⁶¹⁰

On 24 February 2021, the European Commission adopted a new EU strategy on Adaptation to Climate Change to “shift the focus from understanding the problem to developing solutions, and to move from planning to implementation.”⁹⁶¹¹ The EU plans to do this by improving its knowledge of climate issues, working on climate risk assessments and propelling adaptation solutions.⁹⁶¹²

On 11 March 2021, the European Investment Bank approved financing to accelerate the transition to clean energy and increase solar and wind power generation. It said it will dedicate EUR688 million with the goal to implement renewable energy across Europe.⁹⁶¹³

On 18 March 2021, the European Investment Bank financed EUR500 million to support sustainable urban investment and EUR375 million towards cutting energy costs and increasing energy efficiency

in public buildings. The goal is “accelerating climate action and sustainable urban investment across Greece.”⁹⁶¹⁴

On 30 March 2021, the European Commission and the International Energy Agency agreed to deepen their collaboration to accelerate efforts to achieve climate neutrality.⁹⁶¹⁵ More specifically, the two organizations also agreed to: cultivate an international net-zero campaign to raise awareness and call other countries to action; collaborate with willing partners to support the development of sustainable energy services and clean technologies in African countries; and expand the net-zero movement through the energy sector.⁹⁶¹⁶

On 23 March 2021, the European Investment Bank granted a consortium consisting of EDF Renewables, Enbridge and a EUR350 million credit line to finance the construction of a wind farm off the coast of Courseulles-sur-Mer, France.⁹⁶¹⁷ The project’s total cost is estimated at EUR2 billion and involves the building of 64 wind turbines.⁹⁶¹⁸ The capacity will be 450 megawatts and will produce enough annual electricity to be used by 630,000 people.⁹⁶¹⁹ The wind turbines are a step towards increasing the EU’s use of more sustainable energy sources.

On 7 April 2021, the European Investment Bank and Portugal signed a memorandum of understanding aimed at fostering cooperation in the development of the hydrogen sector in Portugal.⁹⁶²⁰ The hydrogen sector is expected to play a key role in the decarbonization of Europe and accelerate the use of sustainable energy sources.⁹⁶²¹ This collaboration between the two entities is in line with the European Hydrogen Strategy of 2020, which works towards installing 40 gigawatts of green hydrogen capacity by 2030.⁹⁶²²

On 12 April 2021, the European Investment Bank formally agreed to help Greece in managing up to EUR5 billion in its implementation of the country’s National Recovery and Resilience Plan, known

as “Greece 2.0.”⁹⁶²³ The European Investment Bank’s technical, financial and environmental experts will help ensure the best use of the new grant in Greece.⁹⁶²⁴ A central focus of the plan will be supporting climate action, digital transformation, and green energy transition.⁹⁶²⁵

On 21 April 2021, the European Commission welcomed a provisional agreement on the European Climate Law, working to enshrine the EU’s climate neutrality target into binding legislation and serve to guide future environmental policies for the next 30 years.⁹⁶²⁶ The agreement entails several measures to strengthen the EU’s climate change mitigation efforts, including: greater clarity on emission reductions and removals; plans to make proposals in June 2021 to enhance the EU’s carbon sink through Land Use, Land Use Change and Forestry regulation; a process for establishing a 2040 climate target; plans to publish a greenhouse gas budget for 2030-2050; a commitment to negative emissions following 2050; the creation of the independent European Scientific Advisory Board on Climate Change that will offer scientific advice; stronger adherence to climate neutrality objectives across EU policies; and a commitment to establish sector-specific plans to encourage climate neutrality efforts in various sectors of the economy.⁹⁶²⁷

On 22 April 2021, the European Investment Bank approved EUR3.4 billion of new financing to support sustainable transport and shifts towards renewable energy across the EU, among other social and economic concerns.⁹⁶²⁸ EUR2 billion will be dedicated to increasing renewable energy developments in the form of wind and solar power investments.⁹⁶²⁹ Renewable energy projects include: developments in France and Germany; the scaling up of solar power across Spain; wind power in Ireland; improving energy distribution in Italy; and a photovoltaic plant that is hydrogen and battery powered. EUR700 million will be directed towards sustainable transportation initiatives.⁹⁶³⁰ Projects include increasing renewable energy at airports in Spain; the acquisition of

hydrogen powered trains; the installation of hydrogen refuelling facilities in the Netherlands; and improvements to regional rail services in Germany.⁹⁶³¹

On 27 April 2021, the European Commission published the two-year study titled “Technical Guidance Handbook – setting up and implementing result-based carbon farming mechanisms in the EU,” that explores how to implement carbon farming in the EU.⁹⁶³² This study will serve as a basis for the European Commission’s plans to launch carbon farming initiatives by the end of 2021.⁹⁶³³ The study will act as a guide for public and private actors to increase carbon farming initiatives.⁹⁶³⁴ By the end of 2021, the European Commission plans to establish an action plan to promote carbon farming and create a regulatory framework to certify and verify the authenticity of carbon removals.⁹⁶³⁵ Carbon farming allows for the capture and storage of carbon and contributes to the EU’s climate neutrality objective.

On 27 April 2021, the European Parliament adopted a resolution on operational and technical measures for more environmentally sustainable and efficient maritime transport.⁹⁶³⁶ The resolution is in line with the European Parliament’s calls for emissions reductions, clean ports, and the gradual elimination of heavy fuel oil.⁹⁶³⁷ The European Parliament advocated for adequate funding, research and innovation in clean fuels and technologies to transition the maritime transportation industry to climate neutrality by 2050.⁹⁶³⁸ Members of the European Parliament urged the European Commission to invest in the automation and digitalization of ports and ships, vessel speed optimization, innovation in hydrodynamics and tax exemptions to encourage the use of alternatives to heavy fuels.⁹⁶³⁹

On 29 April 2021, the European Investment Bank and France’s Deposits and Consignments Fund agreed to introduce a new EUR1 billion credit line to support small-scale investments particularly in “energy-efficiency measures for buildings, water supply and sewerage networks, sustainable mobility and clean public transport.”⁹⁶⁴⁰ A minimum of half of the new line will go towards projects dedicated

to mitigating the effects of climate change.⁹⁶⁴¹ These projects will aid the EU in its emissions reduction and climate neutrality goals.

On 29 April 2021, the European Parliament approved a deal on the 2021-2027 program for Environment and Climate Action (LIFE), which includes a total budget of EUR5.4 billion for environmental and climate-related initiatives.⁹⁶⁴² LIFE will become the most ambitious EU-wide environmental and climate program in EU's history.⁹⁶⁴³ The program will work towards building a more “clean, circular, energy-efficient, low-carbon and climate-resilient economy.”⁹⁶⁴⁴ EUR3.9 billion will be directed towards environmental activities and EUR1.9 billion will go towards climate action.⁹⁶⁴⁵

On 2 June 2021, the European Commission and Breakthrough Energy Catalyst announced a new partnership to boost investments of up to EUR820 million between 2022-2026 in clean technologies.⁹⁶⁴⁶ The goal is to support low-carbon industries and enable a net-zero economy that is in line with the Paris Agreement.⁹⁶⁴⁷ This partnership is planned to invest in four sectors critical to the European Green Deal's climate ambitions: green hydrogen; sustainable aviation fuels; long-duration energy storage; and direct air capture.⁹⁶⁴⁸

On 11 June 2021, the Council of the European Union approved conclusions on a renovation wave strategy aiming to create green buildings in line with the EU's 2050 climate neutrality goal.⁹⁶⁴⁹ Member states endorsed the aim of doubling energy-related renovation rates in the EU by 2030 while promoting resource efficiency and circular economy.⁹⁶⁵⁰ The strategy encourages renovations that

emit lower emissions and are energy efficient by replacing carbon intensive heating and cooling technologies.⁹⁶⁵¹

On 11 June 2021, the Council of the European Union agreed on the general approach of the revised Trans-European Networks for Energy Regulation.⁹⁶⁵² The revised regulation includes a new focus on offshore electricity grids, hydrogen infrastructure and smart grids.⁹⁶⁵³ The goal is to help the EU reach its 2050 climate neutrality objectives by modernizing and decarbonizing the EU's cross-border energy infrastructure.⁹⁶⁵⁴

On 17 June 2021, the European Investment Bank approved EUR1.4 billion for financing of renewable energy efforts.⁹⁶⁵⁵ The financing will support large scale solar power projects across Spain, small scale renewable energy generation in Germany, investment in clean energy and energy efficiency in Austria, and geothermal power in East Africa.⁹⁶⁵⁶

On 29 July 2021, the European Investment Bank and Hydrogen Europe, an association representing Europe's hydrogen and fuel cell sector, signed an advisory services agreement.⁹⁶⁵⁷ Under the agreement, the European Investment Bank will provide financing advisory support for Hydrogen Europe's green hydrogen initiatives.⁹⁶⁵⁸ The agreement will help facilitate the introduction of clean hydrogen technologies in the EU.⁹⁶⁵⁹

The European Union has fully complied with its commitment to endorse the Circular Carbon Economy platform with its 4Rs framework (Reduce, Reuse, Recycle and Remove). It has complied with its commitment to reduce carbon emissions with its investments in renewable energy and decarbonization research initiatives, as well as the introduction of binding emissions targets and carbon taxes on imports. It has also complied with its commitment to recycle by supporting initiatives to extend product life and recycling projects. The European Union has also committed to the productive

reusing of emissions through carbon farming and carbon capture and storage projects. Additionally, the European Union has also complied with its commitment to remove carbon emissions by promoting the conservation of biodiversity. The European Union has also committed to the development of the hydrogen sector, as well as hydrogen-powered transportation and refueling facilities.

Thus, the European Union receives a score of +1.

Background

The G20 first addressed the issue of climate change at its inaugural summit in Washington D.C. in 2008.⁹⁶⁶⁰ It is recognized that, “climate change represents an urgent and potentially irreversible threat to human societies and the planet, and thus requires to be urgently addressed by all [countries].”⁹⁶⁶¹ Many commitments made at past G20 summits have either dealt directly with climate change, or have had climate change as an underlying theme. These include commitments relating to clean energy, food and agriculture, among others.

At the London Summit in 2009, G20 members expressed their support for the United Nations Framework Convention on Climate Change (UNFCCC).⁹⁶⁶² This support was reiterated at every G20 summit, including the one in Hamburg in 2017 where leaders reiterated the importance of fulfilling

⁹⁶⁶⁰ Declaration of the Summit on Financial Markets and the World Economy, G20 Information Centre (Toronto) 15 November 2008. Access Date: 28 May 2021. <http://www.g20.utoronto.ca/2008/2008declaration1115.html>

⁹⁶⁶¹ Report of the Conference of the Parties on its Seventeenth Session, Held in Durban from 28 November to 11 December 2011, United Nations Framework Convention on Climate Change (Bonn) 15 March 2012. Access Date: 10 January 2021. <http://unfccc.int/resource/docs/2011/cop17/eng/09a01.pdf>.

⁹⁶⁶² Global Plan for Recovery and Reform, 2009 London Summit, RANEP (Moscow) 2 April 2009. Access Date: 10 January 2021. <https://www.ranepa.ru/images/media/g20/2009london/2009communique0402.pdf>

the UNFCCC commitment by developed countries in providing means of implementation including financial resources to assist developing countries with respect to both mitigation and adaptation actions in line with Paris outcomes and note the Organisation for Economic Co-operation and Development's report "Investing in Climate, Investing in Growth."⁹⁶³

The Paris Agreement was adopted by the participants of the 21st session of the Conference of the Parties (COP) to the UNFCCC on 12 December 2015. The provisions agreed upon by the parties are aimed at keeping the global average temperature below 2°C above pre-industrial level. In addition, the parties pledged to "pursue efforts" to limit the temperature increase to 1.5°C. COP participants also agreed provide national inventory reports on anthropogenic greenhouse gas emissions and provide other information necessary for assessing the implementation progress.⁹⁶⁴ The Agreement entered into force on 4 November 2016 after the threshold of 55 ratifying parties responsible for at least 55 per cent of the world's greenhouse gas emissions had been met. The Agreement has been ratified by 152 states to date.⁹⁶⁵

The United States withdrawal from the Paris Agreement on 1 June 2017 raised concerns over the prospects of the agreement itself and international climate change cooperation in general.⁹⁶⁶ According to the provisions of Article 28 of the document, the termination of the participation of a signatory and ratifying party to the agreement is only possible four years after its entry into force (three years before a country can withdraw and another year before the decision takes effect), that is, on 4 November 2020. Thus, the United States can no longer be considered a signatory of the Paris Agreement and, thus, is not assessed on this commitment's implementation.

Commitment Features

The commitment requires the G20 members to strive for the full implementation of the Paris Agreement. The Agreement stipulates three major goals:

1. Holding the increase in the global average temperature to well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels, recognizing that this would significantly reduce the risks and impacts of climate change;
2. Increasing the ability to adapt to the adverse impacts of climate change and foster climate resilience and low greenhouse gas emissions development, in a manner that does not threaten food production; and
3. Making finance flows consistent with a pathway towards low greenhouse gas emissions and climate-resilient development.⁹⁶⁷

Thus, to fully comply with the commitment the G20 members must take action on all the three main issue areas of the Paris Agreement, that is: to take action aimed at greenhouse gases emissions

reduction; to support climate adaptation and resilience; to mobilize climate finance from a wide variety of sources.

Scoring Guidelines

| | |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| -1 | G20 member does not take action on any of the three main issue areas of the Paris Agreement: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization |
| 0 | G20 member takes action to address one or two of the three main issue areas of the Paris Agreement: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization. |
| +1 | G20 member takes action to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization. |

Compliance Director: Alexander Ignatov

Lead Analyst: Andrei Sakharov

Argentina: +1

Argentina has fully complied with the commitment to implement the Paris Agreement.

On 12 December 2021, President Alberto Fernández announced a new commitment by Argentina to reduce its greenhouse gas emissions by 2030 and to strengthen the adaptation capacities of communities to the consequences of climate change, particularly the most vulnerable, with the aim of promoting integral and sustainable development.⁹⁶⁶⁸

On 8 February 2021, the Chamber of Renewable Energies held a meeting with the Undersecretary of Electric Energy, Federico Basualdo, to advance the joint work of proposals that encourage renewable energies in the country.⁹⁶⁶⁹

On 27 April 2021, the Renewable Energy Project in Rural Markets of the Ministry of Energy defined the companies that will be in charge of the design, construction and initial operation of four photovoltaic and wind mini-grids in the towns of Catua, El Toro and San Juan of Quillaques, in the Susques Department of the Province of Jujuy; and Naupa Huen, in the Province of Río Negro.⁹⁶⁷⁰

On 27 April 2021, the Ministry of Environment and Sustainable Development of the Nation, led by Juan Cabandié, held the second Roundtable of Focal Points of the National Climate Change Cabinet of the year, in which they sought to plan the next steps to achieve the commitments announced by President Alberto Fernández at the Climate Leaders' Summit. At the summit, organized by the United States government, Fernández announced a set of strategic lines of action and the revision of the mitigation goal of the second Nationally Determined Contribution (NDC), to achieve a limitation

⁹⁶⁶⁸ Argentina announced its new commitment in the fight against climate change, Government of Argentina (Buenos Aires) 12 December 2021. Access Date: 12 May 2021. <https://www.argentina.gob.ar/noticias/argentina-anuncio-su-nuevo-compromiso-en-la-lucha-contra-el-cambio-climatico>

⁹⁶⁶⁹ CADER met with the nation's undersecretary of electric power to promote renewable energy, CADER (Buenos Aires) 8 February 2021. Access Date: 12 May 2021. <https://www.cader.org.ar/cader-se-reunio-con-el-subsecretario-de-energia-electrica-de-la-nacion-para-promover-energias-renovables/>

⁹⁶⁷⁰ PERMER: 4 mini-grids of renewable energies will provide electricity to rural localities, Government of Argentina (Buenos Aires) 27 April 2021. Access Date: 12 May 2021. <https://www.argentina.gob.ar/noticias/permer-4-mini-redes-de-energias-renovables-daran-electricidad-localidades-rurales>

of gas emissions. It is 27.7 per cent more ambitious than that presented in the first Argentine NDC in 2016.⁹⁶⁷¹

On 1 July 2021, Argentina's Project for Renewable Energy in Rural Markets called for bids for the design, construction or expansion and initial operation of four renewable energy generating plants that will supply the rural towns of Laguna Blanca, Aguada Guzmán and Colán Conhué, in the province of Río Negro, and El Peñón, in Catamarca.⁹⁶⁷²

On 22 July 2021, Undersecretariat of Electric Energy approved a 50 per cent increase in the amounts of the promotional benefit that encourages the installation of distributed generation equipment from renewable energies. The adaptation of this benefit, which in practice is mainly aimed at small and medium-sized companies and businesses, "occurs within the framework of a growing interest in the renewable distributed generation sector throughout the country."⁹⁶⁷³

On 23 July 2021, it was reported that in the second quarter of 2021, 187.66 MW of installed power from five large-scale projects: three wind farms and two bioenergy plants (one of biogas and one of biomass) were added in Argentina.⁹⁶⁷⁴

On 8 September 2021, the Ministry of Environment and Sustainable Development created the Joint Working Group for the preparation of the Regional Plan for Adaptation to Climate Change of the Paraná River Delta. The plan will have the general objective of defining a territorial development model adapted to the anticipated scenarios of climate change, maintaining the degrees of anthropic intervention at levels compatible with the maintenance of the ecosystem functions and services of wetlands.⁹⁶⁷⁵

During the compliance period, Argentina addressed all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Argentina receives a score of +1.

On 8 December 2020, the government-funded Clean Energy Finance Corporation, on behalf of the Australian government, has committed AUD80 million (approximately USD59 million) in an investment that will be used to assess the likely emissions profile of target companies and the companies that it acquires will be required to implement emissions reduction targets that aim to either eliminate or offset their emissions within a decade.⁹⁶⁷⁶

On 1 March 2021, it was announced that the Australian government opened for application a fund to support carbon capture, use and storage. This new fund offers successful projects a share in up to USD50 million in grants over three years. Businesses, researchers and governments can apply.⁹⁶⁷⁷

On 21 April 2021, it was announced that through 2021-2022 budget Australian government will invest USD539.2 million into clean hydrogen and carbon capture, use and storage projects. This investment is expected to create 2,500 jobs as part of the government's technology-led plan to grow the economy and meet and beat Australia's emissions reduction commitments.⁹⁶⁷⁸

On 22 April 2021, it was announced that through 2021-2022 budget Australian government will invest USD565.8 million into establishing low emissions technology partnerships and initiatives with key trading and strategic partners. The funding will advance and support the goals of Australia's Technology Investment Roadmap in its effort to reduce emissions while supporting economic growth and lowering energy costs.⁹⁶⁷⁹

On 23 April 2021, it was announced that the Australian government will invest USD59.9 million in setting up a high-integrity carbon offset scheme for Australia and countries in the Indo-Pacific region, helping to boost public and private investment in climate action and help Australia and countries in the region meet their international climate change commitments.⁹⁶⁸⁰

On 11 May 2021, the Australian government unveiled the Budget 2021-2022. The development of the new National Climate Resilience and Adaptation Strategy was announced as a part of the government efforts during the budgetary cycle. The new strategy, still (as of September 2021) under development, is to strengthen "national coordination to manage physical climate impacts," such as floods, bushfires, droughts, sea level rise and marine heatwaves. The consultation period for the strategy closed on 6 September 2021.⁹⁶⁸¹

Australia took action to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Australia receives a score of +1.

Analysts: Anastasiya Kirillova and Andrei Sakharov

Brazil: +1

Brazil has fully complied with the commitment to implement the Paris Agreement.

On 15 December 2020, National Bank for Economic and Social Development (BNDES) approved the financing of BRL 191 million for the construction of three photovoltaic plants with 90 megawatts of installed capacity and the generation of sufficient clean and renewable energy to supply 125 thousand homes. The project will be implemented in the municipality of Pedranópolis, in the northwest of São Paulo, and should generate almost 1,400 jobs.⁹⁶⁸²

On 26 January 2021, Brazil launched an online platform where it is possible to view climate change scenarios for the entire national territory, the Climate Projections portal. The unprecedented tool in the country was built to make climate projections accessible, derived from global and regional models, accessible. Through the platform, it is possible to visualize the increase in temperature, the reduction or increase in rainfall, the variation in the number of consecutive hot days, among other aspects related to climate change. Queries can be made through the selection of filters that involve scenarios projected by time horizon, for the next years or decades, or scenarios by level of warming, that is, what should occur in a given region if the global average temperature increases 1, 5 °C, 2 °C or 4°C.⁹⁶⁸³

On 28 January 2021, board of the BNDES approved the creation of the BNDES Program to Encourage the Reduction of CO2 Emissions in the Fuel Sector (BNDES RenovaBio). The program will provide loans to companies that produce biofuels to encourage them to improve energy-environmental efficiency. Those that, during the loan repayment period, reach the CO2 emission reduction targets stipulated by the program will have a reduction in the interest rate.⁹⁶⁸⁴

On 8 February 2021, BNDES approved two loans for the production of biogas in the interior of Goiás and Paraná. Together, they will avoid the emission of 154 tons of polluting gases, equivalent to the planting of 1,076 trees. Credits of USD 13.3 million will be granted to Albioma Codora Energia, the second cogeneration plant of the sugar cane producer group Albioma, in Goiás, and BRL10.1 million to Cooperativa Agroindustrial Consolata (Copacol), of Paraná. Most of the support from BNDES (about 98 per cent of the total directed to the two companies) will be financed by resources from the Climate Fund – Renewable Energies subprogram, which has facilitated conditions for the implementation of such projects.⁹⁶⁸⁵

On 17 February 2021, Foreign Minister Ernesto Araújo and Environment Minister Ricardo Salle held a virtual meeting with the US government's presidential climate envoy John Kerry. On that occasion, possibilities for cooperation and dialogue between Brazil and the US were examined in the area of

⁹⁶⁸⁵ BNDES finances biogas projects in Parana and Gioas, Brazilian Development Bank (Brasilia) 8 February 2021. Access Date: 12 May 2021. <https://www.bndes.gov.br/wps/portal/site/home/imprensa/noticias/conteudo/bndes-financia-projetos-de-biogas-no-parana-e-em-goiais!/ut/p/z1>

climate change and combating deforestation. It was agreed to deepen the bilateral dialogue in the mentioned areas, with a structured process in frequent meetings, in search of sustainable and lasting solutions to common climate challenges.⁹⁶⁸⁶

On 1 April 2021, BNDES created new structure for issuing green, social and sustainable bonds – Sustainability Bond Framework (SBF). The funds to be raised in future operations based on the SBF will be used to finance and refinance new or existing projects in the BNDES portfolio. The project models eligible for the allocation of resources cover six green and three social categories. Green categories include: renewable energy; energy efficiency; sustainable water, wastewater and sanitation management; pollution prevention and control; clean transportation; and environmentally sustainable management of living natural resources and land use. Social categories, in turn, include health; education; and support for micro, small and medium-sized enterprises and microcredit.⁹⁶⁸⁷

On 20 April 2021, National Energy Policy Council (CNPE) proposed the development of guidelines for the National Hydrogen Program. “In view of the difficulties encountered by several countries in reducing their greenhouse gas emissions, hydrogen has gained strength as a resource aimed at the decarbonization of economies. The input carries a high energy density, has versatility in use, does not emit CO₂ and can function as energy storage,” stated Secretary of Energy Planning and Development, Paulo Cesar Magalhães.⁹⁶⁸⁸

On 22 April 2021, CNPE approved a resolution establishing the Combustível do Futuro program, which has as its principle the use of alternative energy sources and the strengthening of national technological development. With the initiative, Brazil takes another step in leading the global energy transition. The program aims to propose measures to increase the use of sustainable and low-carbon fuels, as well as the application of national vehicle technology, with biofuels, with a view to further decarbonizing our transportation matrix.⁹⁶⁸⁹

On 23 April 2021, Brazil joined the initiative “Agriculture Innovation Mission for Climate,” a joint proposal by the United States and the United Arab Emirates to foster innovation, research and development (R&D) in agriculture in the world. Australia, Denmark, United Kingdom, Singapore and Uruguay also participate. The terms of the initiative and the work plan will be defined until the Food Systems Summit, next September, in New York, and are expected to present concrete proposals at the 26th United Nations Framework Convention on Climate Change Conference of the Parties (COP 26), in November 2021. Until COP-26, the new initiative aims to announce a collective increase in global investments in innovation and research and development aimed at resilient agrifood systems that are resistant to climate change. It also intends to outline a structure for the discussion and promotion of priorities, at the national and international levels, which allows amplifying the actions of the initiative’s members. Investments in innovation should increase agricultural productivity, in a sustainable manner and with a consequent reduction in greenhouse gas emissions. It is also essential to ensure that technologies are available to producers at affordable costs,

contributing to rural income and democratizing access to food. By catalyzing global investments in agricultural research, the initiative hopes to be able to globally disseminate fast, efficient and transformative actions based on policies and decisions based on data and science.⁹⁶⁹⁰

On 21 May 2021, it was announced that BNDES will finance the implementation of 14 photovoltaic in the municipality of Janaúba, in the north of Minas Gerais. The project has the capacity to generate 700 Megawatts of clean and renewable energy for the Brazilian electrical system, the equivalent of supplying 933 thousand homes. The project is the largest solar complex under construction in Latin America. In addition, the works for the installation of the plants will generate 1,265 jobs.⁹⁶⁹¹

On 8 September 2021, initiative named PotencializEE was launched in Brazil. The programs goal is to implement energy efficiency measures in small and medium industries in the state of São Paulo through technical support and affordable credit.⁹⁶⁹²

During the compliance period Brazil addressed all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Brazil receives a score of +1.

Analyst: Irina Popova

Canada: +1

Canada has fully complied with the commitment to implement the Paris Agreement.

On 19 April 2020, the Government of Canada presented the Budget 2021. According to the Budget Speech by Deputy Prime Minister and Minister of Finance Chrystia Freeland, the budget is “a plan for green recovery that fights climate change, helps more than 200,000 Canadians make their homes greener, build a net-zero economy by investing in world-leading technologies that make industry cleaner, and helps Canada reach its goal of conserving 25 per cent of our lands and oceans by 2025.”⁹⁶⁹³ Budget 2021 provides for CAD17.6 billion investment in green recovery, providing zero-interest loans to households, wishing to improve their homes’ energy efficiency. The budget proposed a CAD5 billion investment into the Net Zero Accelerator, designed to help businesses efficiently reduce pollution while retaining economic competitiveness. The budget also provides for a CAD1.4 billion investment in Disaster Mitigation and Adaptation Fund, to support projects such as

wildfire mitigation activities, rehabilitation of storm water systems, and restoration of wetlands and shorelines.⁹⁶⁹⁴

On 23 April 2021, Prime Minister Justin Trudeau announced Canada's new Nationally Determined Contribution target. The target was raised from 30 per cent to 40-45 per cent below 2005 levels by 2030.⁹⁶⁹⁵

On 5 May 2021, Canadian Minister of Natural Resources announced project recipients of the Emissions Reduction Fund's Offshore Research, Development and Demonstration program. Sixteen offshore projects will receive a total of CAD24.4 million to accelerate innovation in emissions reduction technology in the Newfoundland and Labrador offshore oil and gas industry. This funding is part of the Government of Canada CAD750 million Emissions Reduction Fund.⁹⁶⁹⁶

On 13 May 2021, the Government of Canada announced the investment of CAD469,973 Service New Brunswick's Energy Management branch to support the implementation of a government-wide energy management and reporting system. The project is to increase awareness on the benefits of improved energy performance and ensure accountability for energy consumption, as well as reduce greenhouse gas emissions and energy costs.⁹⁶⁹⁷

On 13 May 2021, the Government of Canada announced the investment of CAD90,000 for a study that explores power system options to help reduce diesel dependency in Labrador's remote and Indigenous communities. The study is intended to assess the value of bringing more renewable integration to isolated communities in Labrador. The funding is provided through Natural Resources Canada's Clean Energy for Rural and Remote Communities program. This eight-year, CAD220 million program aims to reduce reliance on diesel in rural and remote communities by deploying and demonstrating renewable energy, encouraging energy efficiency and building local skills and capacity. It is part of the broader Investing in Canada Plan, a more than CAD180 billion infrastructure investment over 12 years.⁹⁶⁹⁸

On 7 June 2021, the Department of Finance launched consultations with stakeholders on the Budget 2021 proposal to introduce investment tax credit for capital invested in carbon capture, utilization, and storage projects.⁹⁶⁹⁹

On 5 August 2021, Deputy Prime Minister Freeland and Minister of Environment and Climate Change Jonathan Wilkinson announced the launch of consultations on border carbon adjustment mechanism, as a part of the drive to tackle climate change, as announced in Budget 2021.⁹⁷⁰⁰

Canada took action to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Canada receives a score of +1.

Analyst: Andrei Sakharov

China: +1

China has fully complied with the commitment on implement the Paris Agreement.

On 24 November 2020, the General Office of the State Council released the guidelines on artificial weather-modification work. Among other things, it was mentioned that in order to support and restore the environment and continue sustainable development, the guidelines must be followed, and by 2025, a well-organized and effective weather-modification work system should be formed.⁹⁷⁰¹

On 12 December 2020, President Xi Jinping announced three proposals to improve global climate governance. China will “lower its carbon dioxide emissions per unit of gross domestic product by over 65 per cent from the 2005 level, increase the share of non-fossil fuels in primary energy consumption to around 25 per cent, increase the forest stock volume by 6 billion cubic meters from the 2005 level, and bring its total installed capacity of wind and solar power to over 1.2 billion kilowatts.”⁹⁷⁰²

On 24 December 2020, the Chinese Academy of Sciences announced the establishment of China’s first research center engaged in working on reaching carbon neutrality. The Center will plan research plans and estimate carbon budgets in 2030 and 2060. In the future, the Center will also release the optimal path to reaching carbon neutrality.⁹⁷⁰³

On 31 December 2020, the Ministry of Finance released a notice on “further improving” the system of financial subsidies in order to promote a healthy development of the new energy vehicle industry. It stated that the subsidies will be cut by 10 per cent.⁹⁷⁰⁴

On 12 January 2021, China published a guideline on implementing the new system of forest chiefs. From then on, each province, city or a town would have forest chiefs, who would organize and lead the protection and development of forests and other green resources.⁹⁷⁰⁵

On 15 January 2021, the state-owned enterprise China National Offshore Oil Corporation launched a large carbon neutrality project, stating that it was only the beginning of the company's green transformation. The company has decided to establish several research institutions, and will continue its path to decarbonization.⁹⁷⁰⁶

On 9 February 2021, China issued its first batch of carbon-neutral bonds worth about USD991.74 million. The issuers of the bonds: China Three Gorges Corporation, China Huaneng Group, State Power Investment Corporation Limited, China Southern Power Grid Company, Yalong River Hydropower Development Company and Sichuan Province Airport Group. The bonds will be used to finance carbon-reduction projects.⁹⁷⁰⁷

On 5 March 2021, the draft outline of the 14th Five-Year Plan was announced. According to the plan, China will cut the particulate matter 2.5 concentrations of cities at the prefectural level and above by 10 per cent.⁹⁷⁰⁸ Moreover, China will promote the comprehensive green transformation of the social and economic development.⁹⁷⁰⁹ Also, according to the plan, the autonomous region Inner Mongolia must make breakthroughs in reduction of carbon emissions and energy conservation.⁹⁷¹⁰

China has taken actions to implement the Paris Agreement, addressing all three issue areas outlined in it.

Thus, China receives a score of +1.

On 12 January 2021, Turkey and France teamed up to address the issue of forest adaptation to climate change in a joint initiative financed with a public policy loan and a grant from AFD; 15 joint projects within the initiative were announced for 2021.⁹⁷¹⁴

On 18 January 2021, AFD's MobiliseYourCity initiative for South Asia was announced; the initiative aims to support policy development and facilitate access to increased financing for sustainable urban mobility.⁹⁷¹⁵

On 10 February 2021, AFD, the French Embassy and the European Union Delegation inaugurated the second phase of photovoltaic power station in Bolivia; AFD's loan contribution amounted to EUR60 million; the project expands the supply of non-carbon energy alternatives for Bolivia.⁹⁷¹⁶

On 17 February 2021, the AFD's New Delhi branch signed three project agreements with Indian partners on accessible public transport (EUR250 million credit facility for the development of the Surat Metro, which is expected to create an accessible and sustainable public transport system for about 400,000 people living the rapidly expanding Gujarati port and reduce carbon emissions by 40,000 tons), as well as on a floating solar power system, and sustainable forest management.⁹⁷¹⁷

On 22 February 2021, the AFD pledged a EUR50 million public policy loan to Serbia to complement similar financing put forward by the World Bank, as well as to deploy a technical cooperation program for Serbia, with the goal to help the country apply the climate roadmap nationally and locally to meet its climate commitments under the Paris Agreement.⁹⁷¹⁸

On 16 March 2021, France published its National Low Carbon Strategy describing the country's "ecological and inclusive transition towards carbon neutrality"; the strategy provides guidelines for the transition to a low-carbon economy in the following sectors: buildings, transport, agriculture, forestry and soils, energy production, industry, and waste, and sets five-year carbon budgets until 2033; to achieve carbon neutrality, France's strategy aims to: "Make energy production fully carbon-free by 2050; Halve energy consumption through energy efficiency of installations and "more moderate" lifestyles; Drastically reduce non-energy emissions, including by 38 percent compared to 2015 in the farming sector and by 60 percent compared to 2015 in industrial processes; Increase and safeguard carbon sinks such as soils and forests, and promote carbon capture and storage technologies and products from the bio-economy; and promote measures to combat carbon leakage."⁹⁷¹⁹

⁹⁷¹⁹ France, Switzerland Present Roadmaps to Reach Net Zero by 2050, International Institute for Sustainable Development (Geneva) 16 March 2021. Access Date: 30 April 2021. <https://sdg.iisd.org/news/france-switzerland-present-roadmaps-to-reach-net-zero-by-2050/>

On 18 March 2021, it was reported that France pledged to promote European Union efforts to put a charge on emissions-intensive imports when it takes over the EU's rotating presidency in 2021.⁹⁷²⁰

On 1 April 2021, the AFD launched the Biodiversity Partners Program pilot project to accelerate pro-nature projects led by 30 entrepreneurs and entrepreneurs from eight countries in Southern Africa; the program will provide participants with a broader perspective of biodiversity issues, enable them to integrate these issues into their projects, and provide support in their operational deployment, in order to work to ensure their viability and impacts.⁹⁷²¹

On 4 May 2021, the National Assembly approved a wide-ranging climate change bill that will prevent future airport expansions, prohibit open-air terrace heaters and reduce packaging waste. France aims to cut greenhouse emissions by 40 per cent by 2030 compared to 1990 levels but environmental activists say it is dragging its feet. The legislation would ban the use of gas heaters on the outdoor terraces of cafes and restaurants from April 2022. Supermarkets will have to reduce wasteful packaging to cut plastics use, while goods such as clothing will have to carry an "ecoscore" measuring their impact on the environment. The bill also prohibits the construction of new airports or expanding the capacity of existing airports in one of the world's most-visited countries. Domestic flights on routes served by a train ride of under 2.5 hours will be culled unless they connect to an international flight.⁹⁷²²

On 9 August 2021, France welcomes the first volume of the Sixth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) on the physical aspects of climate change. To limit and stabilize global warming below 2°C or even 1.5°C, the IPCC reaffirms that CO2 emissions must be reduced rapidly and net zero CO2 emissions achieved by around 2050, along with a sharp reduction in emissions of other greenhouse gases.⁹⁷²³

On 8 September 2021, it was stated that France is on the verge of a major shift in its nuclear power policy – not by closing down the reactors that meet 70 per cent of its electricity needs, but by looking at new types of power plant called “small modular reactors” (SMR). EDF, state-owned energy giant, sees SMRs as being for export to let other countries close fossil fuel power stations to cut global warming. Yet they could be an up-to-date addition to the French market, although France aims to cut its nuclear power dependency from 70 per cent to 50 per cent by 2035.⁹⁷²⁴

During the compliance period, France has taken important steps to promote climate change mitigation and adaptation, as well as climate finance mobilization both at home and internationally.

Thus, France it a score of +1.

Germany: +1

Germany has fully complied with the commitment on addressing climate change.

On 1 December 2020, Ministry for the Environment, Nature Conservation and Nuclear Safety and the German Corporation for International Cooperation GmbH launched the second call for proposals under the “IKI Small Grants” scheme, deploying funds provided by the International Climate Initiative (IKI). The scheme aims to support creative ideas that are tailored to local needs and effectively reduce greenhouse gas emissions. IKI Small Grants also promotes projects that enhance local adaptation measures and focus on forest and biodiversity conservation.⁹⁷²⁵

On 4 February 2021, the KfW Development Bank announced further investments in green bonds under mandate of the Ministry for the Environment, Nature Conservation and Nuclear Safety. KfW Group will remain committed to the green bond market as an ambitious investor, thereby contributing to the further development of this market segment. Green bonds are considered by the KfW as an important instrument to mobilize capital for the transition to an environmentally friendly and climate-neutral economy. Since 2015, KfW has built up a portfolio of green bonds which has reached its initial EUR2 billion target and will be further maintained at a level of EUR2-2.5 billion.⁹⁷²⁶

On 5 May 2021, the Government of Germany adopted the first German Sustainable Finance Strategy. The goal of the strategy is to mobilize investments that are urgently needed for climate action and sustainability while also addressing the climate risks that are increasingly relevant to the financial system.⁹⁷²⁷

On 12 May 2021, the German government adopted the revised Climate Change Act. According to the document, Germany is to become climate neutral by 2045 following a clear path to achieve this with binding targets for the 2020s and 2030s. The interim target for 2030, previously 55 per cent, was increased to a 65 per cent greenhouse gas reduction compared to 1990. A new interim reduction target of 88 per cent was set for 2040.⁹⁷²⁸

Germany has taken actions to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Germany receives a score of +1.

On 2 December 2020, India has constituted a high-level inter-ministerial Apex Committee for Implementation of Paris Agreement (AIPA). The purpose of AIPA is to generate a coordinated response on climate change matters that ensures India is on track towards meeting its obligations under the Paris Agreement including its Nationally Determined Contributions.⁹⁷²⁹

On 22 December 2020, the Commission for Air Quality Management in National Capital Region (NCR) and Adjoining Areas reviewed the progress of switching over of Industries operating in Delhi to Piped Natural Gas with the Government of Delhi, GAIL and Indraprastha Gas Limited. 1644 of Industrial Units will switch to the new fuel until 31 January 2021.⁹⁷³⁰

From 31 December 2020 to 15 January 2021, government agencies conducted inspections in the project premises and transportation of materials related to Construction & Demolition activities in the NCR in order to abate dust and air pollution levies.⁹⁷³¹

On 1 February 2021, Finance Minister Nirmala Sitharama announced the launch of a Hydrogen Energy Mission in 2021-22 for generating Hydrogen from green power sources.⁹⁷³²

On 28 July 2021, Ministry of New and Renewable Energy launched Rooftop Solar Programme Phase II For individual households, subsidy upto 40 per cent of the benchmark cost is provided for RTS plants upto 3 kW capacity and 20 per cent for RTS plants of capacity beyond 3 kW and up to 10 kW. For Group Housing Societies/Residential Welfare Associations, the subsidy is limited to 20% of the benchmark cost for RTS plants of capacity up to 500 kW used for supply of power to common facilities.⁹⁷³³

On 7 September 2021, the first India–Japan High Level Policy Dialogue was held. Minister of the Environment of Japan Koizumi Shinjiro mentioned that both countries can strengthen bilateral cooperation through the Joint Credit Mechanism, Coalition for Disaster Resilience Infrastructure and may also explore collaboration in areas endorsed by the G20, especially on climate, environment and energy.⁹⁷³⁴

On 9 September 2021, Minister for Power and New and Renewable Energy Shri R.K Singh met with Danish Minister for Climate, Energy and Utilities Dan Jørgensen. The two ministers launched “Centre of Excellence on Offshore Wind’ as part of the Green Strategic Partnership. This Centre will be centred around four working groups a) spatial planning; b) financial framework conditions; c) supply chain infrastructure; and d) standards and testing. In the initial phases, the Centre of Excellence will focus on the offshore wind sector. In the medium to long term, the vision is that the Centre will broaden to include a wider group of international governments and players, accumulating

experience and best practices on offshore wind and become an international centre for offshore wind and with broader links to new and renewable energy.⁹⁷³⁵

On 13 September 2021, India and the United States of America launched the “Climate Action and Finance Mobilization Dialogue (CAFMD)”. The CAFMD is one of the two tracks of the India-U.S. Climate and Clean Energy Agenda 2030 partnership launched at the Leaders' Summit on Climate in April 2021, by Prime Minister Shri Narendra Modi and US President Mr. Joseph Biden.⁹⁷³⁶

India takes actions on two of the three main issue areas of the Paris Agreement.

Thus, India receives a score of 0.

Analysts: Anastasiya Kirillova and Irina Popova

Indonesia: +1

Indonesia has fully complied with the commitment on climate change.

On 30 March 2021, it was reported that Indonesia was considering legislation and rules to boost development of renewable energy and set a price on carbon to help limit emissions; renewable energy bill is expected to be passed in 2021, while presidential decree on carbon pricing was being finalized at the moment of release.⁹⁷³⁷

On 30 March 2021, it was also announced that the International Energy Agency (IEA) would join the IEA – Indonesia Energy Transition Alliance to support Indonesia’s ambition to undergo energy transition; the Alliance would act as a framework to work together to support policy development, accelerate Indonesia’s energy transition (including power system enhancement, renewables deployment, energy efficiency implementation and the strengthening of energy investment), and mobilize high-level political engagement.⁹⁷³⁸

On 1 April 2021, the Indonesian government reiterated its commitment to address climate change (under the Paris Agreement nationally determined contribution – to cut greenhouse emissions by 29 per cent through its own efforts, and by 41 per cent with the support of the international community by 2030), and willingness to co-chair the UK-led 26th United Nations Climate Change Conference of the Parties’ Forest, Agriculture and Commodity Trade Dialogue.⁹⁷³⁹

On 12 April 2021, Indonesia’s national oil and gas company Pertamina was planning to issue its maiden green bonds within 12 months as a move to secure funds to progress its renewable energy projects, in particular geothermal developments; Pertamina also announced plans to increase the share of its green business in total revenues from current 5 per cent to 10-15 per cent within five years (to operate 10,000 megawatts of renewable energy power projects by 2026 compare to current

figure of 4.146 megawatts), while its subsidiary Pertamina Geothermal Energy prepares for its initial public offering plus a merger of the three Indonesian state-owned geothermal players.⁹⁷⁴⁰

On 20 April 2021, the Ministry of Energy and Mineral Resources announced the country's plans to increase the share of renewable energy in its energy mix through several strategies, including halting imports of fossil fuels and liquified petroleum gas (LPG) by 2030 and expediting solar power projects; in particular, it was mentioned Indonesia aimed to stop imports of fuel oil and LPG by 2030, and to have 24,000 megawatts of installed capacity of environment-friendly electricity by 2025 and increase it to 38 thousand megawatts by 2035 (from current 10,467 megawatts), with solar energy as a "backbone" of the country's national energy source.⁹⁷⁴¹

On 22 April 2021, speaking at the Leaders Summit on Climate, President Joko Widodo stressed the importance of global partnerships, including with the Pacific, in responding to climate change, which require the fulfillment of commitments and support by developed countries for the developing countries; President Widodo further emphasized that Indonesia's upcoming presidency of the G20 would prioritize enhancement of co-operation on climate with its partners including in the Pacific; he also informed the summit that deforestation was at a 20-year low in Indonesia, and that Indonesia was accelerating pilot projects for its goal of achieving net zero emissions in the coming decades, including rehabilitation of 620,000 hectares of mangrove forests (with four times the carbon absorption compared to tropical forests) to be completed in 2024.⁹⁷⁴²

On 24 April 2021, state-owned geothermal developer and operator PT Geo Dipa Energi (Persero) announced having conducted pre-operational trial of the 10 megawatts small scale geothermal power plant in Wonosobo Regency; the project is expected be a pilot for small-scale geothermal power plants deployment in other areas of the country.⁹⁷⁴³

On 5 May 2021, the Green Leadership Program was initiated by the Green Institute in partnership with Ministry of Environment and Forestry to facilitate young people as the nation's next generation to have a social and environmental justice perspective, and empower them with skills to have green perspective, save and preserve environment.⁹⁷⁴⁴

activists say undermines the coal phase-out plan. The mixed message is the latest from a government that still doesn't have a unified policy on a clean energy transition, and which continues to lavish generous subsidies and incentives on coal miners and power plant operators. Energy policy experts say the president needs to publicly weigh in on the issue, including declaring a deadline for Indonesia to achieve net-zero carbon emissions.⁹⁷⁴⁶

On 3 August 2021, Indonesia stated that it will begin work on a 145 megawatt floating solar power project, the largest in Southeast Asia, after state power utility Perusahaan Listrik Negara and Masdar of United Arab Emirates agreed financing for the project on Tuesday.⁹⁷⁴⁷

On 22 July 2021, the government of Indonesia submitted an updated national climate commitment to the United Nations. The plan includes new measures on adaptation and resilience and some new targets in specific sectors, but has the same topline emissions targets submitted in 2016: an unconditional target to reduce greenhouse gas (GHG) emissions 29 per cent below business-as-usual by 2030, or a 41 per cent reduction target contingent on sufficient international financial support. Indonesia also submitted its first long-term strategy to the UNFCCC, which indicates the country plans to peak GHG emissions in 2030 and could reach net-zero GHG emissions by 2060 or sooner.⁹⁷⁴⁸

Indonesia has taken a number of important steps on both climate change mitigation and adaptation, and climate finance mobilization.

Thus, Indonesia receives a score of +1.

Analyst: Pavel Doronin

Italy: +1

Italy has fully complied with the commitment to implement the Paris Agreement.

On 26 March 2021, the Ministry of Ecological Transition published the public notice on the Experimental Program for Urban Reforestation, launching the financing of the program. The initiative's aim is to plant trees, including medium and long cycle tree plantations, and the creation of urban and peri-urban forests, as well as maintenance thereof. EUR18 million were allocated for the year 2021 to finance the project proposals that will be presented by metropolitan cities. Each metropolitan city can present up to a maximum of five projects.⁹⁷⁴⁹

On 31 March 2021, the Ministry of Ecological Transition issued an executive decree approving the funding of the projects under the "Smart Networks" Public Notice issued on 20 December 2019 for the "demarcation" of the power distribution network in Southern Italy, in order to strengthen the electricity distribution infrastructure, and to increase the share of energy needs covered by renewable

sources. The projects' total value is estimated at EUR207 million, out of which EUR120 million are provided by the government.⁹⁷⁵⁰

On 25 April 2021, the Government of Italy presented the National Recovery and Resilience Plan to the Parliament. The Plan is a part of the European Next Generation EU EUR750 billion package, aimed at environmental transition and carbon-neutral recovery from the pandemic-induced crisis. The Italian plan calls for investments of EUR191.5 billion, financed through the Recovery and Resilience Facility. A further 30.6 billion are part of a complementary Fund, financed through the multi-year budget. The total amount of planned investments is EUR222.1 billion. According to the government statement, 27 per cent of the investment under the Plan is dedicated to digitalization, 40 per cent to combating climate change, and more than 10 per cent to combating inequalities and regional disproportions. EUR69.6 billion is devoted to ecological transition goals, such as energy efficiency, lowering greenhouse gas emissions, stimulating renewable energy sources development, as well as building resilient infrastructure and providing more ecologically sustainable transportation options.⁹⁷⁵¹

Italy has taken actions to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Italy receives a score of +1.

Analyst: Andrei Sakharov

Japan: +1

Japan has fully complied with the commitment to implement the Paris Agreement.

On 25 November 2020, it was reported that Japan's and China's Foreign Ministers agreed to establish a climate change dialogue between the two countries following declarations by Tokyo and Beijing to achieve zero carbon emissions by 2050 and 2060 respectively.⁹⁷⁵²

On 25 December 2020, the Ministry of Economy, Trade and Industry (METI) in collaboration with related ministries and agencies formulated a "Green Growth Strategy Through Achieving Carbon Neutrality" as an industrial policy set to lead the challenging goal of achieving carbon neutrality while ensuring a positive cycle of economic growth and the environmental protection; the Green Growth Strategy makes explicit current challenges and future actions by priority field, and formulates action plans covering comprehensive policies in areas such as budgets, taxes, regulation reforms and standardization, and international collaboration.⁹⁷⁵³

power generation system; the project aims to promote and operate renewable energy power generation system that combines renewable energy and thermal power generation.⁹⁷⁵⁴

On 29 January 2021, METI attended the World Trade Organizations' videoconference informal meeting; Japan's inputs at the meeting included the call to start discussions on tariff and non-tariff aspects in order to smoothly disseminate goods and technologies that contribute to decreasing greenhouse gas emissions at a global level.⁹⁷⁵⁵

On 19 February 2021, METI announced the launch of the Committee on the Green Innovation Project as a new body to operate Green Innovation Fund to develop new approaches for achievement of carbon neutrality by 2050.⁹⁷⁵⁶

On 12 March 2021, METI formulated basic policies for the Green Innovation Fund in order to optimize the results of its activities; the fund worth JPY2 trillion is intended to continuously support companies and other organizations for the coming ten years, which show their commitment to challenge such ambitious goals as their business issues ranging from research and development to demonstrations of social effects of implementation of their climate programs.⁹⁷⁵⁷

On 14 March 2021, JICA signed a Record of Discussions with the Government of Bangladesh for the technical cooperation project on developing an integrated energy and power master plan to promote a low or zero carbon transformation of the total energy supply and demand system.⁹⁷⁵⁸

On 18 March 2021, the Green Climate Fund approved the first project proposed by JICA on enhanced climate resilience and reduction of deforestation in critical watersheds in Timor-Leste; the project aims to reduce forest degradation and deforestation and as a result reduce greenhouse gas emissions in Timor-Leste by 4.4 million tons over 20 years.⁹⁷⁵⁹

On 23 March 2021, the Government of Japan worked to set a new, more ambitious carbon emissions reduction goal for 2030 ahead of the June 2021 G7 Summit, as part of its efforts towards achieving net-zero carbon emissions by 2050.⁹⁷⁶⁰

On 25 March 2021, JICA signed a loan agreement for a maximum amount of JPY 10 billion with India's Indian Non-Banking Financial Company and Tata Cleantech Capital Limited to support the

company to offer loans to businesses across India that focus on renewable energy generation, electric vehicles and energy efficiency.⁹⁷⁶¹

On 7 May 2021, METI, jointly with the Financial Services Agency and the Ministry of the Environment, held a “Taskforce on Preparation of the Environment for Transition Finance” and formulated the “Basic Guidelines on Climate Transition Finance” as a handbook for conducting transition financing. The reason for it lies in the necessity to secure financing for industries' transition efforts toward decarbonization in order to achieve carbon neutrality by 2050.⁹⁷⁶²

On 21 May 2021, JICA has signed a facility agreement to provide up to USD25 million for an onshore wind power generation project with a total capacity of 144 MW in Quang Tri Province, Vietnam. This is expected to serve as a model case for private sector wind power generation projects in the renewable energy sector in Vietnam, including those by Japanese and local companies. In addition, the project will contribute to the Initiative on Overseas loan and Investment for ASEAN.⁹⁷⁶³

On 4 June 2021, in order to promote and spread awareness of transition finance METI set up a taskforce to formulate sector-specific roadmaps for the transition to decarbonization. It is expected to start a project to create case examples of good practice by calling for examples of finance that conform to the Basic Guidelines and are deemed to have model qualities.⁹⁷⁶⁴

On 1 July 2021, the Green Climate Fund approved a project proposed by JICA: Building Climate Resilient Safer Islands in the Maldives. This project aims at establishing a climate resilient mechanism for coastal conservation and protection against future disasters, hence, enhancing resilience and the safety of the Maldives.⁹⁷⁶⁵

On 26 July 2021, METI announced revised Roadmap for Carbon Recycling Technologies, a document that aims to accelerate innovation by showing the path for expanding and disseminating Carbon Recycling (technologies whereby CO₂ is used as a fuel or raw material.) Key points in the revision include adding new technological areas (DAC, synthetic fuels) where progress has been made; bringing forward the beginning of widespread adoption of (general purpose) Carbon Recycling products to around 2040; and adding efforts on international cooperation.⁹⁷⁶⁶

On 7 September 2021, METI signed an memorandum of cooperation on Hydrogen, Ammonia, CCS, CCU/Carbon Recycling with Ms. Elena Burmistrova, Deputy Chairman of the Gazprom Management Committee. Gazprom and METI have held 13 joint coordination committee meetings since 2007 as a forum for dialogs and discussions on private projects between Japan and Russia. In addition, the two countries' governments are working on a science and technology cooperation

program (from 2021 to 2023), which focuses on cooperation between Japanese and Russian companies in the science and technology field with special emphasis on hydrogen projects.⁹⁷⁶⁷

On 13 September 2021, it was reported that on 5 October, METI would hold the 2021 Task Force on Climate-related Financial Disclosures Summit online to discuss climate-related financial disclosures. The summit will bring together leaders of world-class industrial and financial organizations to share their insights and recommendations, with a view toward creating a virtuous cycle of economic growth and environmental protection. The aim is to promote further disclosure which forms the basis for appropriate investment decisions.⁹⁷⁶⁸

On 17 September 2021, it was reported that an ASEAN+3 Ministers on Energy Meeting and an East Asia Summit Energy Ministers Meeting were held on September 16. Both meetings were held online. 10 ASEAN countries, several other countries and international organizations participated. The outcomes of the meetings were compiled into respective Joint Ministerial Statements: the participants agreed that in order to ensure a stable and continuous supply of energy for economic growth, their 13 countries must each consider various options and utilise all technologies and fuels. In addition, they agreed that there is not only one way to achieve a low-carbon economy, but several for each country. They also welcomed the second Government-Private Forum on Cleaner Energy Future Initiative for ASEAN (CEFIA) (held in February this year), with many expressing their hopes for even stronger public-private cooperation and further development of its activities. The participants discussed the importance of promoting economic opportunities arising from green growth, sustainable development, energy transitions, and climate change countermeasures in line with global efforts toward implementing the Paris Agreement.⁹⁷⁶⁹

During the compliance period, Japan has taken important steps to promote climate change mitigation and adaptation, as well as climate finance mobilization both at home and internationally.

Thus, Japan receives a score of +1.

Analyst: Pavel Doronin

Korea: +1

Korea has fully complied with the commitment on taking actions on three main issue areas of the Paris Agreement.

On 2 December 2020, the National Assembly of Korea approved extended budgeting for the national Ministry of Environment. 17.1 per cent increase was proposed to establish the foundation for implementing the 2050 carbon neutrality goal, climate crisis flooding response and support for hydrogen fueling stations.⁹⁷⁷⁰

On 30 December 2020, the Ministry of Foreign Affairs submitted the Nationally Determined Contribution (NDC) and its long-term low greenhouse gas Emission Development Strategy

Access Date: 14 May 2021. <https://eng.me.go.kr/eng/web/board/read.do?pagerOffset=10&maxPageItems=10&maxIndexPages=10&searchKey=&searchValue=&menuId=461&orgCd=&boardId=1427370&boardMasterId=522&boardCategoryId=&decorator=>

(LEDS).⁹⁷⁷¹ The NDC includes a pledge to the international community to reduce greenhouse gas emissions by 2030 and presents Korea's target to reduce 24.4 per cent from its national greenhouse gas emissions in 2017. LEDS includes Korea's long-term vision and national strategy for achieving carbon neutrality by 2050.⁹⁷⁷²

On 2 March 2021, the Ministry of Environment presented the 2021 Action Plan to implement the 2050 Carbon Neutrality Strategy. The plan pushes ahead with carbon neutrality in each sector, including expanding renewable energy, providing eco-friendly and autonomous vehicles as well as fueling the transition into a circular economy.⁹⁷⁷³

On 2 September 2021, Korea passed the Carbon Neutrality Act, becoming the 14th country of the world to implement carbon neutrality into law. According to the press-release, the Act specifies procedures of implementing 2050 carbon neutrality vision, detailing the establishment of the carbon neutrality commission and the framework plan. Various policy options for climate impact assessment, climate response fund and just transition are also included in the Act.⁹⁷⁷⁴

Korea takes actions on all the three main issue areas of the Paris Agreement: greenhouse gases emissions reduction; climate adaptation and resilience; climate finance from a wide variety of sources.

Thus, Korea receives a score of +1.

Analyst: Alexander Ignatov

Mexico: +1

Mexico has fully complied with the commitment to implement the Paris Agreement.

On 29 December 2020, Mexico presented its updated Nationally Determined Contribution (NDC) to the Secretariat of the United Nations Framework Convention on Climate Change. In terms of mitigation, Mexico ratified its level of ambition to reduce emissions for both greenhouse gases (-22 per cent) and black carbon, (-51 per cent), by 2030; this with respect to a baseline (business as usual) that takes 2013 as a starting point. With respect to the conditional goals, Mexico committed to reducing its emissions by up to 36 per cent and 70 per cent of black carbon, also by 2030; the latter, depending on the establishment of technology transfer mechanisms, allows a carbon trading price to be defined, technical cooperation to continue and access to affordable financial resources to become available. The adaptation objectives were also expanded to 27 lines of action in five axes: (1) prevention and attention to negative impacts on the human population and in the territory; (2) resilient productive systems and food security; (3) conservation, restoration and sustainable use of biodiversity and ecosystem services; (4) integrated management of water resources with a climate change approach; and (5) protection of strategic infrastructure and tangible cultural heritage. One of

the new multisectoral approaches is blue carbon, which refers to the carbon dioxide removed from the atmosphere by coastal marine ecosystems. The update of Mexico's NDC included a broad process of consultation and social participation.⁹⁷⁷⁵

On 21 January 2021, Energy Transition Law, supported the creation of Fund for Energy Transition and Sustainable Use of Energy (FOTEASE). The FOTEASE is a public policy instrument of the Ministry of Energy whose objective is to implement actions that serve to contribute to the fulfillment of the National Strategy for the Energy Transition and the Sustainable Use of Energy, promoting the use, development and investment of renewable energies and energy efficiency, thereby allowing: "Promote, encourage and disseminate the use and application of clean technologies in all productive activities and for domestic, commercial, industrial and agricultural use; Promote the diversification of primary energy sources, increasing the supply of renewable energy sources; Establish a standardization program for energy efficiency. Promote and disseminate measures for energy efficiency, as well as energy saving; Propose the necessary measures so that the population has access to reliable, timely and easily consulted information in relation to the energy consumption of equipment, devices and vehicles, which require the supply of energy for their operation."⁹⁷⁷⁶

On 4 February 2021, the National Institute of Indigenous Peoples, the Federal Electricity Commission and the authorities of the Santa María del Mar agency, Juchitán de Zaragoza municipality, agreed to put the 450 KW Solar Power Plant into operation of effective power per day, which will allow to supply electricity to the families of this place, who have been without the service for more than 10 years.⁹⁷⁷⁷

On 23 February 2021, Secretary of Foreign Affairs Marcelo Ebrard Casaubon participated in the high-level debate of the Security Council of the United Nations entitled "Climate change: addressing climate-related risks for peace and international security through mitigation and building resilience." The Minister reaffirmed Mexico's commitment to combat climate change as a priority of its international action and agreed with the UN Secretary General that the recovery after the pandemic is an opportunity to rebuild and implement transformative change. He also reiterated Mexico's willingness to work together to find multidimensional and structural solutions to environmental problems, in order to build more egalitarian, sustainable and resilient societies.⁹⁷⁷⁸

On 10 March 2021, the Tool for the Preparation of Programs for Adaptation to Climate Change in Natural Protected Areas was issued by National Commission of Protected Natural Areas. This tool aims to highlight the role of Protected Natural Areas as natural solutions for adaptation.⁹⁷⁷⁹

planning for adaptation to climate change, guide the people involved with interference in the territory and accompany participatory planning processes that facilitate the implementation of measures in the territory.⁹⁷⁸⁰

During the compliance period Mexico addressed all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, Mexico receives a score of +1.

Analyst: Irina Popova

Russia: +1

Russia has fully complied with the commitment on taking actions on three main issue areas of the Paris Agreement.

On 15 December 2020, Minister for Natural Resources and Ecology Alexander Kozlov gave an order to renew the list of methods used to calculate harmful fumes air emissions in energy, industry, oil pumping and processing, and agriculture.⁹⁷⁸¹

On 12 February 2021, the Ministry of Natural Resources and Environment of the Russian Federation issued a ministerial decree on establishment of the nation-wide greenhouse gas emissions recording system. The President had previously ordered to prepare a draft concept of such a system that would facilitate local ecosystems' absorbing capacity estimation.⁹⁷⁸²

On 17 March 2021, the state-owned company "Russian Railways" issued irredeemable "green" bonds worth CHF250 million to purchase electricity-powered passenger locomotives and finance social projects.⁹⁷⁸³

On 21 April 2021, President Vladimir Putin announced a new system designed to properly allocate funding received from businesses conducting environmental-harmful activities. Funding would be dedicated to environment restoration projects. Also, President Putin ordered to lower atmosphere emissions in 12 biggest industrial complexes by 20 per cent by 2024.⁹⁷⁸⁴

On 6 June 2021, the Bank of Russia announced that it would allow issuing of "green" bonds. Issuers would be allowed to mark new bonds as "green" following the recent amendments to the national emission standard. The new national taxonomy follows the international standards and embraces

Saudi Arabia: +1

Saudi Arabia has fully complied with the commitment on climate change.

On 27 January 2021, speaking at the Future Investment Initiative forum in Riyadh, the energy minister claimed that the Kingdom would “be doing more than most European countries by 2030 (to combat climate change),” and reaffirmed Saudi Arabia’s commitment to combat climate change via the framework of the Circular Carbon Economy and to do everything to achieve the Paris Agreement.⁹⁷⁸⁷

On 27 March 2021, the Saudi Green Initiative and the Middle East Green Initiative were announced to be launched soon by Crown Prince Mohammed bin Salman – recognizing Saudi Arabia’s share of responsibility in advancing the fight against the climate crisis as the world’s leading oil producer, in response to significant climate challenges faced by the region, and with the goal “to chart a path for the Kingdom of Saudi Arabia and the region in protecting the planet, by clearly defining an ambitious road map that rallies the region and significantly contributes to achieving global targets in confronting climate change.”⁹⁷⁸⁸ The two initiatives goals include the following: “To plant 10 billion trees in Saudi Arabia and 50 billion across the Middle East region, the equivalent to rehabilitating roughly 200 million hectares of degraded lands, translating into the largest reforestation program in the world (which represents the Kingdom’s contribution of more than 5 percent in achieving the global target to plant 1 trillion trees, and reducing 2.5 per cent of global carbon levels); To reduce carbon emissions by more than 4 per cent of global contributions, through an ambitious renewable energy program that will generate 50 per cent of the Kingdom’s energy from renewables by 2030, and several other projects in the fields of clean hydrocarbon technologies, estimated to eliminate more than 130 MT of carbon emissions; To cut carbon dioxide emissions in the Middle East by 60 per cent; To divert 94 per cent of the Kingdom’s rubbish now going to landfills; To raise the percentage of protected areas to more than 30 per cent of its total land area, representing roughly

600,000 square kilometers, exceeding the current global target of 17 percent, in addition to launching a number of ambitious initiatives to protect Marine and Coastal Environments.”⁹⁷⁸⁹

On 6 April 2021, the National Renewable Energy Program set the target of SR60 billion (USD15.9 billion) worth pipeline of the renewable’s projects for investment; the projects are aimed to increase the generation capacity of renewable energy sources to about 58.7 gigawatts by 2030, of which 40 gigawatts would be from solar generation and 16 gigawatts from wind generation, with the rest coming from other renewable energy sources.⁹⁷⁹⁰

On 9 April 2021, Saudi Arabia inaugurated the Sakaka independent power producer photovoltaic power plant, the first renewable energy project in Saudi Arabia; the plant has an output capacity of 300 megawatts and represents Saudi Arabia’s “first steps to utilize renewable energy;” the opening also witnessed the signing of power purchase agreements for seven other renewable energy projects in a number of regions with 12 Saudi and international companies.⁹⁷⁹¹ It was further reported that Saudi Arabia had plans to launch seven more solar power plants with overall capacity of 3.7 gigawatts.⁹⁷⁹²

On 22 April 2021, speaking at the Leaders Climate Summit King Salman called for global approach to tackling climate change and enhancing the level of international cooperation as the optimal solution to meeting the challenges of climate change; King Salman also updated other Leaders on the Kingdom’s recently launched packages of strategies and regulations on the climate agenda.⁹⁷⁹³

On 24 April 2021, it was reported that Saudi Arabia would join the Net Zero Producers Forum made up of the United States, Norway, Canada and Qatar to discuss the ways in which they can uphold the goals of the Paris Climate Agreement.⁹⁷⁹⁴

On 6 August 2021, it was reported that Minister of Communications and Information Technology Abdullah Alswaha, during his speech to the G20 digital economy ministers’ meeting, said that Saudi Arabia topped the list of leading countries in the digital economy. The Green Saudi Arabia and Green Middle East initiatives, launched by Crown Prince Mohammed bin Salman, are an addition to investment in new environment-friendly industries and markets. According to minister, NEOM City, the largest global platform for innovators, is an ideal example of harmonizing regulation and innovation, to achieve well-being and preserve the environment through the adaptation of technology and innovation.⁹⁷⁹⁵

On 8 August 2021, Saudi Arabia signed power purchase agreements with seven new solar projects that will provide electricity more than 600,000 households.⁹⁷⁹⁶

On 13 August 2021, it was reported that Saudi Arabia plans to appoint an adviser for the next round of solar projects that will be implemented by the Public Investment Fund (PIF). The Ministry of Energy has received bids for the transaction advisory contracts for ten solar photovoltaic schemes. The capacities of the planned projects, as well as the preferred procurement model, have not been disclosed. Saudi Arabia aims to build 27.3GW of renewable energy capacity by 2024 and 58.7GW by 2030. The initial plan entails the Energy Ministry, through the Renewable Energy Project Development Office, overseeing the procurement of 30 per cent of this target – under the National Renewable Energy Program – via a public tendering process. PIF will deliver the remaining 70 per cent through direct negotiations with investors.⁹⁷⁹⁷

Saudi Arabia has taken a number of important actions to foster climate change mitigation, adaptation and mobilization of climate finance.

Thus, Saudi Arabia receives a score of +1.

Analyst: Pavel Doronin

South Africa: +1

South Africa has fully complied with the commitment on taking actions on three main issue areas of the Paris Agreement.

On 3 February 2021, the Development Bank of Southern Africa (DBSA) has launched its first green bond. The EUR200m bond was issued through a private placement with French development finance institution Agence Française de Développement.⁹⁷⁹⁸

On 9 March 2021, the United Kingdom Partnering for Accelerated Climate Transitions and South Africa announced a project portfolio to support South Africa's climate change priorities. The total financing would reach GBP3 million. The selected projects focus on three priority areas of climate change action and greenhouse gas emissions reduction, namely energy transition, low-carbon mobility development and green finance facilitation.⁹⁷⁹⁹

On 20 July 2021, the National Treasury has presented the list of amendments to the 2019 Carbon Tax Act. The Carbon Offsets Regulations set out the eligibility criteria for carbon offset projects, a procedure for taxpayers claiming the carbon offset allowance and administration of the carbon offset system. The carbon offset tax-free allowance assists firms to cost-effectively reduce their emissions and carbon tax liability by up to 10 per cent of their total greenhouse gas (GHG) emissions by investing in low carbon, mitigation projects.⁹⁸⁰⁰

On 2 September 2021, the Department of Public Works and Infrastructure has issued a request for information for the Integrated Renewable Energy and Resource Efficiency Programme to gather ideas and expertise from stakeholders to achieve the Program's goals on energy transition in a stable and effective manner.⁹⁸⁰¹

On 22 September 2021, South Africa has updated the country's Nationally Determined Contribution under the United Nations Framework Convention on Climate Change. The country's NDC target range for 2025, has been updated from its original value of 398-614 Mt CO₂-eq, to a range of 398-510 Mt for 2025.⁹⁸⁰²

South Africa takes actions on all the three main issue areas of the Paris Agreement: greenhouse gases emissions reduction; climate adaptation and resilience; climate finance from a wide variety of sources.

Thus, South Africa receives a score of +1.

Analyst: Alexander Ignatov

Turkey: +1

Turkey has fully complied with the commitment on climate change.

On 17 February 2021, Turkey released details of measures to curb the impact of climate change on Turkey in the Fight Against Climate Change Declaration which came as the result of discussions and the contributions of scientists and nongovernmental organizations to the government's efforts to address climate change; the Declaration includes: "An action plan for an adaptation strategy to climate change, support for environmentally friendly production practices and investments, and the recycling of waste, among other steps; "Action plans for climate-friendly development for all 7 regions of Turkey, smart-city and zero-waste programs, development of energy-efficient, climate-sensitive residential areas; Strategies for sectors affected by climate change most, namely, agriculture, livestock breeding, tourism, renewable energy and industry; Increasing capacities of solar electricity generation to 10 gigawatts and wind generation to 16 gigawatts by 2030, reducing usage of fossil fuels in buildings by 25 percent by 2023; Support for climate-friendly investments and rewards for investing in clean production technologies, greater access for the public and private sectors to international financial resources to boost their capacity in the fight against climate change; Setting up a Climate Change Research Center which will shape policies on the issue and conduct studies, along with a climate change platform where studies and data on climate change will be shared."⁹⁸⁰³

On 22 April 2021, President Recep Tayyip Erdoğan spoke at the virtual Leaders' Summit on Climate and noted the following aspects: Turkey expects a reduction of its greenhouse gas emission up to 21 percent until 2030 within the framework of the nationally determined contribution presented in 2015 (prevention of total 1.92 billion tons of greenhouse gas emissions); Turkey's installed power capacity has a share of 52.3 percent of renewable energy (6th rank in Europe and 13th in the world); Turkey has launched the zero waste project and will increase the recycling rate to 60 percent by 2035; Turkey believes that the burden of the global fight against climate change should be shared equally; Despite not having ratified the Paris Agreement, Turkey still takes much effort to reduce carbon emissions

and boost renewable energies in line with its national plans, while a recent massive economic reform plan launched by the government has prioritized green transformation.⁹⁸⁰⁴

On 31 March 2021, Turkey's fifth largest bank Garanti BBVA announced it would stop financing coal-related activities to encourage sustainable investments and climate action and that the bank's loan portfolio would be cleaned of coal projects by 2040; Garanti BBVA became the first Turkish Bank to take such a decision.⁹⁸⁰⁵

On 13 April 2021, it was reported that Turkey ranked as the fifth-biggest wind power investor in Europe in 2020 with EUR1.6 billion, according to WindEurope's report.⁹⁸⁰⁶

On 17 November 2020, it was reported that within Turkish Cooperation and Coordination Agency's (TIKA) "Breath for the Future" campaign 20,000 trees had been planted across 25 countries.⁹⁸⁰⁷

On 27 January 2021, it was reported that TIKA installed a solar energy system on the campus of Unite Lebanon Youth Project, a non-profit organization carrying out activities for Palestinian and Syrian refugee children as well as Lebanese people in need.⁹⁸⁰⁸

On 9 August 2021, it was stated that the Turkish government is planning to reach a cumulative solar PV capacity of 15 GW by 2027. Around 25 onshore wind power projects are under construction and a further 99 projects are in the process of receiving governmental permits, with total capacity collectively accounting for around 6.77 GW. The country has already achieved its 2023 target of 5 GW solar PV capacity in 2018 and the government is now planning to reach a cumulative solar PV capacity of 15 GW by 2027. Turkey is expected to comfortably meet this target by 2026. The expected renewables growth is supported by the Renewable Energy Law, the government's tool for achieving renewable power targets.⁹⁸⁰⁹

On 27 August 2021, it was announced that by increasing the use of hydrogen, Turkey aims to take a step towards using cleaner resources and thus becoming less dependent on imported energy. This is of great importance as Turkey's energy strategy focuses on local sources of energy. The Minister of Energy and Natural Resources explained the increasing use of hydrogen in various sectors – including renewable energy, heating, and transport – at the Energy Exploration Workshop.⁹⁸¹⁰

On 22 September 2021, President Erdogan announced on Tuesday that Turkey was ready to finally ratify the Paris Agreement on climate change.⁹⁸¹¹

Turkey has taken important steps to promote climate change mitigation, adaptation and climate finance both domestically and internationally.

Thus, Turkey receives a score of +1.

Analyst: Pavel Doronin

United Kingdom: +1

The United Kingdom has fully complied with the commitment on addressing climate change.

On 4 December 2020, Prime Minister Boris Johnson announced a new target to reduce the UK's greenhouse gas emissions by at least 68 per cent by 2030, compared to 1990 levels.⁹⁸¹²

On 25 January 2021, Prime Minister Johnson launched the Adaptation Action Coalition, a new international coalition to tackle the impacts of climate change. Developed by the UK in partnership with Egypt, Bangladesh, Malawi, the Netherlands, Saint Lucia and the United Nations, the new Coalition will work to turn international political commitments made through the UN Call for Action on Adaptation and Resilience into on-the-ground support for vulnerable communities.⁹⁸¹³

On 9 March 2021, the UK Partnering for Accelerated Climate Transitions and South Africa announced projects to support South Africa's climate change priorities. The total financing would reach GBP3 million. The selected projects focus on three priority areas of climate change action and greenhouse gas emissions reduction, namely energy transition, low-carbon mobility development and green finance facilitation.⁹⁸¹⁴

On 12 March 2021, the UK government launched the Mobilising Finance for Forests Programme. The Programme will use a blended finance investment approach to combat deforestation and other environmentally unsustainable land use practices that are contributing to global climate change. The UK will initially allocate up to GBP150 million across five to six investment funds operating in selected tropical forest regions in Africa, Asia and Latin America. The initiative is expected to attract as much as GBP850 million of green private sector investment.⁹⁸¹⁵

The UK has taken action to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

United States: +1

The United States has fully complied with the commitment to implement the Paris Agreement.

On 15 January 2021, the Environmental Protection Agency announced the availability of approximately USD46 million grant funding to implement projects reducing emissions from the existing fleet of older diesel engines. Eligible applicants include regional, state, local or tribal agencies, as well as nonprofit organizations, that provide pollution reduction or educational services to diesel fleet owners or promote air quality and clean transportation.⁹⁸¹⁶

On 20 January 2021, President Joseph Biden signed the instrument of acceptance of the Paris Agreement on behalf of the United States.⁹⁸¹⁷

On 20 January 2021, President Biden signed an Executive Order on Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis. The order directed all executive departments and agencies to review and address the promulgation of Federal regulations and other actions taken by the Trump administration that conflict with the objectives of combating climate change, “and to immediately commence work to confront the climate crisis.”⁹⁸¹⁸

On 27 January 2021, President Biden issued an Executive Order on Tackling the Climate Crisis at Home and Abroad. According to the text of the document the Biden Administration commits to “putting the climate crisis at the center of United States foreign policy and national security,” including through supporting international emissions reductions efforts. The United States additionally plans to develop “climate finance plan, making strategic use of multilateral and bilateral channels and institutions, to assist developing countries in implementing ambitious emissions reduction measures, protecting critical ecosystems, building resilience against the impacts of climate change, and promoting the flow of capital toward climate-aligned investments and away from high-carbon investments.” The order also mandated all Federal agencies to submit a draft action plan describing specific steps to bolster adaptation and increase resilience to the impacts of climate change.⁹⁸¹⁹

On 4 February 2021, President Biden signed an Executive Order on Rebuilding and Enhancing Programs to Resettle Refugees and Planning for the Impact of Climate Change on Migration,

mandating the inter-agency report on climate change and its impact on migration, including forced migration, internal displacement, and planned relocation.⁹⁸²⁰

On 22 April 2021, President Biden announced the new target to achieve a 50-52 per cent reduction from 2005 levels in net greenhouse gas emissions by 2030.⁹⁸²¹

On 7 May 2021, President Biden issued an Executive Order on the Establishment of the Climate Change Support Office. According to the Order, the purpose of the Climate Change Support Office is to “perform the specific project of supporting bilateral and multilateral engagement to advance the United States initiative to address the global climate crisis, led by the Department of State and in coordination with other executive departments and agencies, consistent with Executive Order 14008 of 27 January 2021 (Tackling the Climate Crisis at Home and Abroad).”⁹⁸²²

On 13 May 2021, the Environmental Protection Agency announced the Rhode Island Department of Environmental Management as a recipient of USD300,000 grant to assess contaminated properties under the agency’s Brownfields Program. The funds support under-served and economically disadvantaged communities in assessing and cleaning up abandoned industrial and commercial properties. The Agency distributes 154 grant awards across the United States totaling USD66.5 million in Brownfield’s funding through its Multipurpose, Assessment, and Cleanup Grants program.⁹⁸²³

On 23 September 2021, the Environmental Protection Agency issued a rule establishing a program to phase down domestic production and consumption of hydrofluorocarbons (HFCs) by 85 per cent over the next 15 years. This program is an effort to tackle global warming, as HFCs are potent greenhouse gases and one of the causes for the rise in global temperature.⁹⁸²⁴

The United States took action to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, the United States receives a score of +1.

European Union: +1

The European Union has fully complied with the commitment on addressing climate change.

On 10 December 2020, the EU increased its funding of the Climate Investor One to boost renewable energy in Nigeria, including for the benefit of vulnerable communities. This contribution of EUR10 additional million is channeled through the Dutch Development Bank. According to the European Commission, together with the original commitment of EUR30 million, this top-up has the potential to unlock EUR100 million in renewable energy investments from the private sector.⁹⁸²⁵

On 24 February 2021, the European Commission adopted a new EU Strategy on Adaptation to Climate Change, setting out the pathway to prepare for the unavoidable impacts of climate change. The Strategy provides for actions to build a climate resilient society in the EU by improving knowledge of climate impacts and adaptation solutions; stepping up adaptation planning and climate risk assessments; accelerating adaptation action; and helping to strengthen climate resilience globally.⁹⁸²⁶

On 12 May 2021, the European Commission adopted the EU Action Plan: Towards Zero Pollution for Air, Water and Soil – a key deliverable of the European Green Deal. The Plan outlines a number of flagship initiatives and actions, including those related to greenhouse gas emissions.⁹⁸²⁷

On 14 July 2021, the European Commission adopted a series of legislative proposals setting out how the EU intends to achieve climate neutrality by 2050, including the intermediate target of an at least 55 per cent net reduction in greenhouse gas emissions by 2030. The package proposed to revise several pieces of EU climate legislation, including the EU Emissions Trading System, Effort Sharing Regulation, transport and land use legislation.⁹⁸²⁸

The EU has taken actions to implement the Paris Agreement addressing all three issue areas: greenhouse gases emissions reduction, climate adaptation and resilience, and climate finance mobilization.

Thus, the European Union receives a score of +1.
