On 25 June 2022, Australia, Japan, New Zealand, the United Kingdom and the United States introduced a new mechanism supporting Pacific priorities: the Partners in the Blue Pacific.²⁶²⁸ This initiative encourages greater engagement inclusively, expanded opportunities and thus will help to facilitate development in the Pacific region.

On 26 June 2022, the UK, alongside the other G7 members, pledged to “raise USD600 billion in private and public funds for developing countries” and alleviate food insecurity and soaring energy prices during the meeting in the Bavarian Alps.²⁶²⁹

On 25 July 2022, the Home Office and Secretary of State for the Home Department Priti Patel awarded an additional GBP50 million to the Safer Streets Fund, which addresses violence against women and girls as well as “making the streets safer.”²⁶³⁰ The funding for this initiative now totals GBP120 million and has been awarded to more than 100 projects across the UK, with funding going to the police and authorities, transport police, community groups that are eligible to receive funding, and into public services like increased CCTV and streetlights.

On 29 July 2022, the Department for Business, Energy and Industrial Strategy announced GBP54 million in funding to go towards the enabling use of clean energy in 28,000 homes across the UK.²⁶³¹ These funds will be distributed among four innovative heat network projects that intend to distribute heat from a renewable source. In particular, GBP28 million will fund two network projects in London, GBP17 million will go to a project in Bedfordshire and GBP9 million will go to a project in Woking. The funding is coming from the GBP320 million set aside for the Heat Networks Investment project whose aim is to create decarbonised heat networks across England and Wales.

On 29 July 2022, the Department for Work and Pensions announced the total amount of aid from the first wave of Household Support Fund grants given to support families in England with energy, food and other essentials totalling at GBP8.9 million.²⁶³² The household support fund has given out GBP400 million in the first six months of operations and is projected to supply GBP1.262 billion in England and GBP238 million in Scotland, Wales and Northern Ireland.

On 2 August 2022, the United Kingdom announced GBP12 million for the testing and implementation of government projects that utilize new approaches to deep rooted systemic issues, which will be facilitated by the Evaluation Task Force (ETF).²⁶³³ The ETF has spent GBP47.9 billion across 162 projects already, and the new projects being funded include GBP933,000 spent on testing wastewater in prisons for drug traces, GBP200,000 in one-time payments to homeless youth ageing out of the system and GBP1.7 million towards the College of Police for tackling violence against women.

On 3 August 2022, the Department for Levelling Up, Housing and Communities announced that GBP6 million would be allocated to support vulnerable tenants through improving quality of housing and increased enforcement of regulations.²⁶³⁴ The GBP6 million comes from the GBP20 million Supported Housing Improvement Programme designed to increase quality and regularity of habitability inspections in supported housing. Additionally, this will create an increase in supported housing which provides support to those who have experienced mental health issues, homelessness or domestic abuse.

On 4 August 2022, the Department for Business, Energy and Industrial Strategy announced the allocation of GBP37 million from the GBP1 billion Net Zero Innovation Portfolio towards innovative biomass initiatives.²⁶³⁵ GBP32 million is going towards the funding of 12 projects, which are designed to increase the UK biomass production, and the remaining GBP5 million is being shared among 22 projects to develop hydrogen creation technologies from biomass. Projects include the breeding of biomass-specific grass variants, seaweed farming and harvesting techniques and the development of an app enabling farmers to make biomass choices for their given area.

On 5 August 2022, the Department for Environment, Food and Rural Affairs and the Forestry Commission unveiled a new climate investment of GBP44.2 million that will plant trees across England.²⁶³⁶ The investment will see approximately 2,300 hectares of trees absorbing an estimated 600,000 tonnes of carbon dioxide by 2050 and is set to create more green jobs within forestry, aiding in diversifying the economic impact across England.

On 11 August 2022, the Department for Levelling Up, Housing and Communities announced a GBP8 million in funding to repair vital bridges and transportation infrastructure with the intentions of boosting local industries and tourism.²⁶³⁷ In addition to improving infrastructure, this funding is expected to boost skilled jobs in the area and improve quality of life for the residents.

On 15 August 2022, the Treasury and Northern Ireland Executive Ministers announced a joint taskforce to determine the rollout of the GBP400 Energy Support Scheme.²⁶³⁸ This support scheme is intended to aid constituents in Northern Ireland who are struggling with rising energy prices.

On 18 August 2022, the Department for Environment, Food and Rural Affairs and the National Highways Agency announced a series of actions focused on improvement of air quality all under the

and housing for tenants in Social Housing through adding the ability of tenants to “scrutinize” landlord choices.²⁶⁵¹ TSMs will also include information on repairs, safety checks and general complaints.

On 22 September 2022, Health and Social Care Secretary and Deputy Prime Minister Thérèse Coffey announced the Our plan for patients program, which will inject GBP500 million of additional funding into adult social care to “help people get out of hospitals and into social care support.”²⁶⁵²

On 23 September 2022, the Department for Business, Energy and Industrial Strategy announced GBP49.4 million government funding to “help British industry end their reliance on fossil fuels and reduce energy costs.”²⁶⁵³

On 29 September 2022, the UK launched a GBP60 million clean maritime competition to mark World Maritime Day.²⁶⁵⁴ The program will run from April 2023 to March 2025 and help innovative companies and scientists make emission-free maritime a reality.

The United Kingdom has taken strong actions towards all the SDGs with actions being completed in all four of the dimensions of recovery and progress. They have introduced many programs, policies and have invested in everything from education reform and recovery to environmental policies. Additionally, the UK has reduced barriers to employment and health care through providing inclusive and equity forward policies.

Thus, the United Kingdom receives a score of +1.

Analyst: Anna Clark

United States: +1

The United States has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 2 November 2021, the United States, with the European Union and 103 other partners, launched the Global Methane Pledge.²⁶⁵⁵ This initiative includes over 70 per cent of the global economy and will limit global warming to 1.5°C by reducing methane emissions.

On 7 December 2021, Department of Agriculture Secretary Vilsack announced that the Department will be allocating USD800 million for biofuel producers and the renewable fuel market.²⁶⁷⁷ Funds are meant as economic relief for markets impacted by the COVID-19 pandemic.

On 8 December 2021, President Biden issued the Executive Order on Catalyzing Clean Energy Industries and Jobs Through Federal Sustainability.²⁶⁷⁸ With the goal to establish a carbon pollution-free electricity sector by 2035 and net-zero emissions by 2050, this Order sets clear goals for the government to reduce greenhouse gas emission, increase energy and water efficiency and reduce waste and pollution.

On 9 December 2021, Department of Agriculture Secretary Vilsack announced the Food Supply Chain Guaranteed Loan Program.²⁶⁷⁹ The Program supports greater opportunities and fair prices for farmers as well as food security by strengthening the food supply chain as part of the American Rescue Plan Act.

On 10 December 2021, Assistant Secretary of Indian Affairs Bryan Newland announced the launch of a new website to support solving missing and murdered cases of Indigenous individuals.²⁶⁸⁰ This website will work as an additional tool to resolve and raise awareness on issues affecting Indigenous communities.

On 16 December 2021, Department of Agriculture Secretary Vilsack announced that the Department is investing USD5.2 billion in critical rural infrastructure.²⁶⁸¹ This investment will improve access to broadband, safe water and power infrastructures to rural communities.

On 21 December 2021, Secretary of State Blinken announced that the United States will be allocating an additional USD580 million from the American Rescue Plan Act to support partner countries by providing vaccines, economic and humanitarian assistance against the COVID-19 pandemic.²⁶⁸²

On 22 December 2021, the US Department of the Treasury's Office of Foreign Assets Control issued three additional General Licenses.²⁶⁸³ The licenses will increase existing credentials for American humanitarian assistance and other provisions to those affected by the crisis in Afghanistan.

On 7 June 2022, the Biden Administration announced additional investments from the American Rescue Plan to expand internet access country-wide.²⁷⁵⁸ Approximately USD10 billion from the Treasury Department will be allocated for local governments for such projects.

On 8 June 2022, Secretary Haaland issued Secretary's Order 3407 which aims to "reduce the procurement, sale and distribution of single-use plastic products and packaging with a goal of phasing out single-use plastic products on Department-managed lands by 2032."²⁷⁵⁹ The Order recognizes plastic waste as a "priority environmental problem" and works to lead green initiatives in government.

On 8 June 2022, President Biden announced the beginning of "nation-to-nation coordination" between the Federal government and Tribes in the Bering Sea over the stewardship of the Northern Bering Sea Climate Resilience Area.²⁷⁶⁰ These efforts seek to promote a "new model for nation-to-nation coordination" in the discussion of sustainability.

On 8 June 2022, President Biden announced the Americas Partnership for Economic Prosperity.²⁷⁶¹ In collaboration with Latin American and Caribbean countries, the plan seeks to deepen international economic cooperation and domestic economic activities that weakened during the COVID-19 pandemic by promoting investments, strengthening supply chains and create sustainable jobs.

On 8 June 2022, the Biden Administration led Latin American and Caribbean countries to adopt the Action Plan on Health and Resilience in the Americas.²⁷⁶² The plan looks to help partner countries "prevent, prepare for, and respond to future pandemic threats and other public health emergencies while also expanding the equitable delivery of healthcare and public health services to remote, vulnerable, and marginalized populations." The United States will continue to promote vaccinations in these countries while sharing information on the new variants.

On 9 June 2022, the US Department of Health and Human Services facilitated the fifth Operation Fly Formula to deliver infant formulas from Germany to Texas which included 110,000 pounds of Nestlé NAN formula which is approximately 1.6 million 8-ounce bottles.²⁷⁶³

On 9 June 2022, President Biden announced USD331 million for humanitarian assistance, food security assistance and disaster risk reduction assistance at the Summit of the Americas in Los Angeles.²⁷⁶⁴ This funding aims to address rising food costs in the Western Hemisphere.

On 10 June 2022, the USDA announced its intent to develop a pilot program, utilizing up to USD65 million in American Rescue Plan funding, to strengthen the food supply chain, reduce irregular migration and improve working conditions for both domestic and foreign farmworkers.²⁷⁶⁵

On 13 June 2022, the US Environmental Protection Agency announced USD6.5 billion in total funding through the Agency's Water Infrastructure Finance and Innovation Act (WIFIA) program and the State Infrastructure Financing Authority WIFIA program to support USD13 billion in water infrastructure projects, while creating more than 40,000 jobs.²⁷⁶⁶

On 13 June 2022, the United States affirmed, along with Argentina, Brazil, Canada and Mexico, the vital role each country plays as agricultural exporters to strengthen global food security.²⁷⁶⁷ The countries agreed to cooperate to improve sustainable production and maintain affordable food prices.

On 13 June 2022, Congress passed the Ocean Shipping Reform Act that will help “lower costs for American retailers, farmers and consumers” by allowing the Federal Maritime Commission to investigate conducts of ocean carriers to incentivize economical actions.²⁷⁶⁸

On 15 June 2022, President Biden signed the Executive Order on Advancing Equality for Lesbian, Gay, Bisexual, Transgender, Queer and Intersex Individuals.²⁷⁶⁹ Federal policies will reflect the commitment to address legislative attacks on LGBTQI+ individuals by expanding available resources and anti-discriminatory education.

On 15 June 2022, the US Environmental Protection Agency announced USD1 billion to address perfluoroalkyl and polyfluoroalkyl substances in drinking water and other emerging contaminants in

drinking water, specifically in small or disadvantaged communities.²⁷⁷⁰ The investment aims to strengthen public health protections with infrastructure funding to help communities provide clean water.

On 17 June, the US launched the Talent Pipeline Challenge to fill high quality jobs that will help rebuild domestic infrastructure and supply chains and encourage economic recovery and growth.²⁷⁷¹ This initiative encourages employers, education and training providers, states, local, Tribal and territorial governments as well as philanthropic organizations to make tangible commitments that support equitable workforce development in three critical infrastructure sectors: Broadband, Construction, and “Electrification” (EV Charging Infrastructure and Battery Manufacturing).

On 17 June 2022, Vice President Harris announced a USD50 billion investment to support the amelioration of lead in paint and pipes, as well as reaffirmed the Administration’s commitment to remove all lead pipes within 10 years through the Lead Pipe and Paint Action Plan.²⁷⁷² The funding will support public education on the issue, as well as supporting local governments in facilitating testing and the removal of lead pipes.

On 25 June 2022, Australia, Japan, New Zealand, the United Kingdom and the United States introduced a new mechanism supporting Pacific priorities: the Partners in the Blue Pacific.²⁷⁷³ This initiative encourages greater engagement inclusively, expanded opportunities and thus will help to facilitate development in the Pacific region.

On 26 June 2022, the US, alongside the other G7 members, pledged to “raise USD600 billion in private and public funds for developing countries” and alleviate food insecurity and soaring energy prices during the meeting in the Bavarian Alps.²⁷⁷⁴

On 14 July 2022, President Biden approved the Minnesota Disaster Declaration.²⁷⁷⁵ This will make federal funding available for local organizations to respond to damages caused by the severe storms and flooding that occurred from 22 April 2022 to 15 June 2022.

On 25 July 2022, President Biden approved the US Virgin Islands Emergency Declaration.²⁷⁷⁶ This will make federal assistance available to respond to water shortages and other health impacts caused by the ongoing sargassum seagrass influx.

On 3 August 2022, President Biden signed the Executive Order on Securing Access to Reproductive and Other Healthcare Services.²⁷⁷⁷ Federal policies will reflect the commitment to support abortion as a legitimate healthcare service by recognizing the “devastating implications for women’s health and public health more broadly” that the overturning of *Roe v. Wade* signified.

On 9 August 2022, President Biden signed the CHIPS and Science Act.²⁷⁷⁸ This legislation will establish an International Technology Security and Innovation Fund worth total USD100 million to support semiconductor supply chains and develop secure telecommunications networks to advance national and economic security.

On 11 August 2022, Health and Human Services Secretary Xavier Becerra allowed the FDA to increase the number of Monkeypox vaccines.²⁷⁷⁹ The addition will raise vaccines by up to fivefold.

On 15 August 2022, the United States sanctioned key Liberian officials for their involvement in ongoing political corruption in the country.²⁷⁸⁰ These sanctions are reflective of the United States’ commitment on countering corruption globally.

On 24 August 2022, President Biden announced a “targeted debt relief to address the financial harms of the pandemic.”²⁷⁸¹ The Department of Education will cancel up to USD10,000 in student debt if their income is less than USD125,000 and federal student loan repayments will be paused until 31 December 2022.

On 25 August 2022, President Biden ordered the implementation of the CHIPS Act of 2022.²⁷⁸² The Act incentivizes “semiconductor research, development and manufacturing” by investing in the sector to “restore and advance” semiconductor research and products.

On 26 September 2022, the US announced USD457.5 million in civilian security assistance to “enhance the efforts of Ukrainian law enforcement and criminal justice agencies to improve their operational capacity and save lives.”²⁷⁹⁵

Though the United States remains split on the matter of women’s health and reproductive rights as well as gun reform, it took strong actions to support a sustainable, inclusive and resilient recovery domestically with an increased focus on rebuilding supply chains in the manufacturing and agriculture sector and supporting Indigenous and rural communities by extending financial, material and strategic aid to eligible communities and SMEs. The United States also supported sustainability and inclusivity globally by extending funds and humanitarian aid to partner countries affected by the COVID-19 pandemic, natural disasters and political conflicts in addition to leading multiple green initiative projects abroad.

Thus, the United States has received a score of +1.

Analyst: Kate Hu

European Union: +1

The European Union has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 2 November 2021, the European Commission President Ursula von der Leyen and United States President Joe Biden co-hosted a discussion on the margins of the 26th Conference of the Parties to the United Nations Framework Convention on Climate Change.²⁷⁹⁶ The meeting focused on infrastructure initiatives that are in line with Sustainable Development Goals and the Paris Agreement. President von der Leyen, alongside President Biden and United Kingdom Prime Minister Boris Johnson, endorsed five key principles for infrastructure development: climate resilience, inclusive partnerships, well maintained financing and construction, mobilization of capital to meet net-zero by 2050 and the construction of sustainable jobs that boost economic recovery. The goal is to ensure economic growth and development through sustainable and equitable means.

On 2 November 2021, the European Union, the United States and partners launched the ‘Global Methane Plan.’²⁷⁹⁷ This initiative aims to reduce global and methane emissions and maintain the goal of limiting global warming to 1.5°C.

On 2 November 2021, the European Union, Germany, France, South Africa, the United Kingdom and the United States announced a ‘Just Energy Transition Partnership’ to support South Africa’s effort towards decarbonization.²⁷⁹⁸ The goal of this partnership is to reduce emissions rates and support climate action.

On 9 November 2021, the European Commission pledged EU100 million for the ‘Adaptation Fund’ at COP26.²⁷⁹⁹ This contribution aims to support climate adaptation objectives and support countries and populations most vulnerable to climate change.

On 10 November 2021, the Commissioner for International Partnerships Jutta Urpilainen participated in the Global Education Meeting “Invest now for the recovery and the futures of education.”²⁸⁰⁰ The European Union committed to increasing its contribution, providing an estimated EU6 billion by 2027. This funding will contribute to improving access to education worldwide and enable socio-economic change.

On 11 November 2021, Members of the European Parliament from the Employment and Social Affairs Committee voted in support of implementing minimum requirements to ensure minimum wage employment can provide a decent standard of living and to protect workers’ rights to collective bargaining.²⁸⁰¹ The goal is to reduce poverty and protect workers’ rights through this draft law.

On 24 November 2021, the European Commission launched the 2022 European Semester cycle of economic policy coordination.²⁸⁰² The 2021 ‘Annual Sustainable Growth Survey’ (ASGS) proposed an agenda for 2022 that promotes a sustainable and fair recovery and strengthens the EU’s economy’s resilience. It outlines the ‘Recovery and Resilience Facility’ as being a large proponent of the upcoming cycle. The ASGS also outlines how Sustainable Development Goals will be integrated into the European Semester, subsequently working to improve the fulfillment of SDGs across Member States.

On 25 November 2021, the European Commission approved an investment package of over EU290 million to fund over 132 environment and climate change programs under the ‘LIFE programme.’²⁸⁰³ This funding will amount to a total investment of EU562 million towards the programs, which will be implemented in almost every Member State. These projects work toward achieving the goals of climate-neutrality on the continent by 2050, the recovery of Europe’s biodiversity and a green recovery from the COVID-19 pandemic.

On 2 December 2021, the European Commission disbursed EU1.8 billion for Romania in pre-financing under the Recovery and Resilience Facility.²⁸⁰⁴ These funds will be used to begin the implementation of the investment and reform measures in Romania’s recovery and resilience plan.

On 3 December 2021, the European Commission endorsed a positive preliminary assessment of Spain's request for EU10 billion disbursement in grants under the Recovery and Resilience Facility.²⁸⁰⁵ This assessment is an important step in the implementation of the Facility.

On 17 December 2021, the European Union endorsed the Addis Tax Initiative (ATI) Declaration 2025 and became a member of the ATI.²⁸⁰⁶ This endorsement reaffirms the EU's commitment to just and effective mobilization of domestic revenue in efforts to address inequity and promote sustainable development.

On 14 January 2022, the European Commission published a proposal for a 'Council of Recommendation on learning for environmental sustainability.'²⁸⁰⁷ This proposal aims to promote and support understanding and skills on climate change, the environment and sustainability within Member States, all education providers and non-government organizations.

On 18 January 2022, the European Union launched seven projects to protect health, education and livelihood in Afghanistan and five projects to address forced displacement and migration, cumulatively funded by EU268.3 million.²⁸⁰⁸ The goal of these projects is to support the basic needs of those in Afghanistan, particularly vulnerable populations.

On 26 January 2022, the European Commission endorsed a positive preliminary assessment of France's request for EU7.4 billion disbursement in grants under the Recovery and Resilience Facility.²⁸⁰⁹ These grants would be used to finance reforms in public finance, mobility, housing, unemployment insurance, skills and health. Other areas of investment are the energy renovation of buildings, decarbonization, green vehicles, youth employment and education.

On 7 February 2022, the European Union and UNICEF, in collaboration with Eni, launched a partnership project with the Basra Governorate to ameliorate water quality in Basra City for 850,000 people, including more than 160,000 children.²⁸¹⁰ This project works to support a climate-resilient environment by providing safe and sustainable drinking water to vulnerable populations. This project also aims to create sustainable and green jobs within Basra. The goal is to address water scarcity and salinization in Iraq, while creating sustainable solutions through strong partnerships and strengthening communities.

On 28 February 2022, the European Commission endorsed a positive preliminary assessment of Italy's request for EU21 billion disbursement, EU10 billion in grants and EU11 billion in loans under the

Recovery and Resilience Facility.²⁸¹¹ These funds would be used to finance reforms in public administration, justice, post-secondary education and strengthen the autonomy of individuals with disabilities.

On 28 February 2022, the European Commission endorsed a positive preliminary assessment of Greece's request for EU3.6 billion disbursement, EU1.7 billion in grants and nearly EU1.9 billion in loans under the Recovery and Resilience Facility.²⁸¹² These funds would be used to finance reforms and investments in energy efficiency, electric mobility, waste management, labour market, healthcare and public transportation.

On 1 March 2022, the European Commission adopted its first annual report on the implementation of the Recovery and Resilience Facility (RRF).²⁸¹³ The RRF is providing up to EU723.8 billion in grants and loans to Member States to financially support investments and reforms which promote a strong recovery from the COVID-19 pandemic.

On 23 March 2022, the European Commission announced it would be actively engaging in eight global Coalitions for Action.²⁸¹⁴ The eight coalitions are: 'Food is never waste,' 'Health Diets from Sustainable Food Systems for Children & all,' 'School Meals Coalition,' 'Aquatic and Blue Foods,' 'Argo-ecology,' 'Zero Hunger,' 'Fighting food crises along the Humanitarian-Development-Peace nexus' and 'Sustainable Productivity Growth.' These coalitions work to assist partner countries to transform food systems and to internationally support the Farm to Fork strategy.

On 25 March 2022, the European Commission endorsed a positive preliminary assessment of Portugal's request for EU1.16 billion, EU553.44 million in grants and EU609 in loans under the Recovery and Resilience Facility.²⁸¹⁵ These funds would be used to finance reforms in health, social housing, social services, investment and innovation, bio-economy, renewable gases, public finances and public administration.

On 29 March 2022, the European Commission endorsed a positive preliminary assessment of Sweden's request for EU3.3 billion in grants under the Recovery and Resilience Facility.²⁸¹⁶ These funds would be used to finance green and digital transitions, job creation as well as strengthen economic and social resilience.

On 1 April 2022, the European Commission signed grant agreements amounting to EU1.1 billion to fund seven large-scale projects through the EU's Emissions Trading System.²⁸¹⁷ The goal of these projects is to reduce emissions by over 76 metric tonnes of carbon dioxide equivalent (CO₂eq) during their first 10 years of operation. These projects will take place in Belgium, Sweden, Finland, Spain, Italy and France.

On 4 April 2022, Commissioner Jutta Urpilainen addressed the General Assembly of the Sahel Alliance in Madrid to discuss poor access to food and water, specifically highlighting how this issue is exacerbated by Russia's war on Ukraine.²⁸¹⁸ The Commissioner reaffirmed the European Union's commitment to supporting its partners and maintaining strong partnerships.

On 5 April 2022, the European Commission proposed two regulations to control fluorinated greenhouse gases (F-gases) and ozone depleting substances (ODS), which aim to limit rising global temperatures within the range outlined in the Paris Agreement.²⁸¹⁹ The F-gas regulation proposal aims to prevent 40 million tons of carbon dioxide emissions by 2030 while the ODS proposal aims to prevent the equivalent of 180 million tons of CO₂ and 30,000 tons of ozone depleting potential emissions by 2050.

On 6 April 2022, Commissioner Urpilainen and Commissioner Lenarčič participated in a forum organized by the European Union, the OECD's Sahel and West Africa Club, and the Global Network Against Food Crises on Food Security and Nutrition in the Sahel and West Africa Region.²⁸²⁰ This forum discusses effective solutions to food insecurity in the region through awareness and support from international partners.

On 7 April 2022, the European Commission raised an additional EU6 billion in NextGenerationEU funds with its second NextGenerationEU green bond syndication.²⁸²¹ The proceeds accumulated from this deal will support Europe's green transformation through providing financing sustainable investments to Member States' resilient and sustainable recovery plans.

On 7 April 2022, the European Commission endorsed a positive assessment of Bulgaria's recovery and resilience plan, which requested EU6.3 billion in grants under the Recovery and Resilience Facility.²⁸²² These funds would be used to decarbonize the energy sector, triple power generation from renewable sources by 2026 and reduce greenhouse gas emissions in the power sector by 40 per cent by 2025. This

plan also promotes water management, biodiversity conservation and restoration and to support the digital transition.

On 10 May 2022, the European Commission and the European Investment Bank (EIB) signed a guarantee agreement stating that the European Commission will support up to EU26.7 billion of EIB operations to promote public investments over the next seven years.²⁸²³ This guarantee agreement aims to improve sustainable energy, digital and transportation infrastructure, health and education. This guarantee agreement will also support investments in the Western Balkans, the Southern and Eastern Neighbourhood regions, as well as Ukraine's post-war recovery.

On 10 May 2022, the European Commission adopted an amendment to the Horizon Europe Work Programme of 2021-2022 by increasing its budget by approximately EU562 million to support 'EU Missions' towards innovative solutions to health, environmental sustainability and digital challenges.²⁸²⁴ The goal of these programs is to implement and support innovative and sustainable solutions to issues within Europe and beyond.

On 23 May 2022, the European Commission released its Spring Package, which aims to provide Member States with financial support to promote a resilient, green and sustainable recovery from the COVID-19 pandemic and Russia's ongoing invasion of Ukraine.²⁸²⁵

On 1 June 2022, the European Commission endorsed Poland's recovery and resilience plan, which requested EU23.9 billion in grants and EU11.5 billion in loans under the Recovery and Resilience Facility.²⁸²⁶ These funds would be used to decarbonize Poland's economy, increase renewable energies such as offshore windfarms and support the digital transition.

On 7 June 2022, the European Commission proposed an annual EU budget of EUR185.6 billion for 2023, to be complemented by an estimated EUR113.9 billion in grants under NextGenerationEU.²⁸²⁷ This budget will continue to mobilise significant investments to boost Europe's strategic autonomy, the ongoing economic recovery, safeguard sustainability and create jobs while allowing the Commission to continue to prioritise green and digital investments while addressing pressing needs arising from recent and current crises.

On 26 June 2022, the EU, alongside the other G7 members, pledged to "raise USD600 billion in private and public funds for developing countries" and alleviate food insecurity and soaring energy prices during the meeting in the Bavarian Alps.²⁸²⁸

On 27 June 2022, the European Commission endorsed a positive preliminary assessment of Spain's recovery and resilience plan, which requests its second payment of EUR12 billion in grants under the Recovery and Resilience Facility.²⁸²⁹

On 27 June 2022, the European Commission endorsed a positive preliminary assessment of Slovakia's recovery and resilience plan, which requests EUR398.7 million in grants under the Recovery and Resilience Facility.²⁸³⁰

On 29 July 2022, the European Commission endorsed a positive preliminary assessment of Latvia's recovery and resilience plan, which requests EUR201 million in grants under the Recovery and Resilience Facility.²⁸³¹

On 1 August 2022, the European Commission disbursed EUR500 million of the EUR1 billion macro-financial assistance operation for Ukraine.²⁸³² This disbursement aims to address Ukraine's immediate financial needs, as well as to support macroeconomic stability and resilience.

On 5 August 2022, the European Union reached the benchmark of successfully coordinating 1,000 medical evacuations of Ukrainian patients through the EU Civil Protection Mechanism and relocating these patients to hospitals across Europe to receive specialized healthcare.²⁸³³ This effort aims to relieve overwhelmed hospitals and ensure patients are receiving adequate care.

On 9 August 2022, the European Commission and Moderna reached an agreement to better meet Member States' needs for COVID-19 vaccines for the remainder of summer into the winter period.²⁸³⁴ This agreement ensures Member States have timely access to vaccines for vaccination campaigns and to support global partners, while also ensuring Member States may choose to receive adapted vaccines under the current contract should they receive marketing authorization.

On 11 August 2022, the EU reached the benchmark of coordinating the delivery of 66,224 tonnes of in-kind assistance to Ukraine.²⁸³⁵ This assistance included 180 ambulances, 125 fire-fighting vehicles, 300 power generators, 35 heavy machinery vehicles, 300 power generators and four pontoon bridges. The goal is to provide Ukraine with humanitarian support in response to Russia's ongoing military aggression.

On 24 August 2022, the Cohesion Policy will provide Croatia with EUR9 billion from 2021 to 2027 through its Partnership Agreement with the European Commission.²⁸³⁶ These funds will be utilized to promote economic, social and territorial cohesion. These funds will also be used to reduce regional economic disparities and to improve training and employment opportunities. These funds will also support the development of the Croatian economy.

On 5 September 2022, the European Commission approved the disbursement of EUR155.7 million in grants to Sweden through the Just Transition Fund Program.²⁸³⁷ These funds will be utilized to support Sweden's efforts to achieve climate neutrality by 2040 while ensuring an equitable and inclusive transition.

On 5 September 2022, the European Commission approved a measure to support Greece under the Recovery and Resilience Facility with an estimated budget of EUR341 million to support the development of electrical storage facilities.²⁸³⁸ The goal of this measure is to ensure a smooth transition within the Greek electrical system toward renewable energies, as well as to contribute to the EU's goals relating to the EU Green Deal.

On 7 September 2022, the European Commission registered two European Citizens Initiatives: 'Every European house equipped with 1 kW photovoltaic and 0.6 kW wind turbines using EU funding through the municipalities alone' and 'Protect the EU's Rural Heritage, Food Security and Supply'.²⁸³⁹ The goal of these initiatives is to create the necessary infrastructure for renewable energy within houses and educate the general population on the benefits of green energy.

On 7 September 2022, the European Commission presented the European Care Strategy, accompanied by two recommendations for Member States on the revision of the Barcelona benchmarks on childhood education and care and access to affordable and quality long-term care.²⁸⁴⁰ The goal of the strategy is to provide accessible and quality care services across the European Union and to ameliorate present conditions for both care receivers and caretakers in all settings.

On 7 September 2022, the European Commission proposed an additional EUR5 billion in macro-financial assistance (MFA) loans to Ukraine which are the second element of the MFA package to provide up to EUR9 billion.²⁸⁴¹ This proposal aims to help Ukraine address its financial needs as a result of Russia's aggression.

On 8 September 2022, the European Commission gave an endorsement of the Netherlands' EUR4.7 billion recovery and resilience plan under the Recovery and Resilience Facility.²⁸⁴²

On 12 September 2022, the European Cohesion Policy granted Slovenia with EUR3.26 billion in funding between 2021 to 2027 to support the development of a sustainable economy.²⁸⁴³ These funds will be used to increase economic innovation and competitiveness, as well as to support Slovenia's green and digital transformation.

On 13 September 2022, the European Commission issued EUR12 billion in a dual tranche transaction under the NextGenerationEU program.²⁸⁴⁴ These funds will be used to support Europe's pandemic recovery and to support Member States under the Recovery and Resilience Facility and other EU programs.

On 15 September 2022, the European Commission endorsed a positive preliminary assessment of Romania's recovery and resilience plan, which requests EUR1.8 billion in grants and EUR800 million in loans under the Recovery and Resilience Facility.²⁸⁴⁵

On 16 September 2022, the European Cohesion Policy granted Malta with EUR817 million in funding between 2021 to 2027 to support the development of a sustainable economy.²⁸⁴⁶ These funds will be used to increase economic innovation and competitiveness, as well as to support Malta's green and digital transformation.

On 20 September 2022, the European Cohesion Policy granted Ireland with EUR1.4 billion in funding between 2021 to 2027 to support the development of a sustainable economy.²⁸⁴⁷ These funds will be used to increase economic innovation and competitiveness, as well as to enable the digital and green transformation and to invest in social inclusion and employment.

On 21 September 2022, the European Commission approved public support funds of up to EU5 billion provided by 13 Member States.²⁸⁴⁸ This project is entitled "IPCEI Hy2Use" and aims to support the hydrogen value chain through the construction of hydrogen infrastructure and the development of sustainable technology through hydrogen integration into multiple sectors. The goal of this initiative is to boost hydrogen energy and subsequently lower dependency on natural gases.

²⁸⁴⁸ State Aid: Commission approves up to €5.2 billion of public support by thirteen Member States for the second Important Project of Common European Interest in the hydrogen value chain, European Commission (Brussels) 21 September 2022. Access Date: 21 September 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_22_5676

On 26 September 2022, the European Commission announced that Czechia will receive EUR1.64 billion in EU grants to “support the country’s efforts to phase out coal-fired power by 2033 and ensure a fair transition to climate neutrality” under the Just Transition Fund Programme.²⁸⁴⁹

On 27 September 2022, the European Commission announced the approval of three measures to support electricity production from renewable energy sources in Germany. The additional measures aim to supplement the German Renewable Energy Act and²⁸⁵⁰ contribute to achieving Germany’s environmental targets, as well as the EU’s strategic objectives relating to the European Green Deal.

On 27 September 2022, the European Commission approved the second disbursement of EUR21 billion to Italy under the Recovery and Resilience Facility.²⁸⁵¹

On 28 September 2022, the European Commission encouraged Member States to “modernise their minimum income schemes as part of the ongoing pledge to reduce poverty and social exclusion in Europe” which will make the schemes more effective, lift people out of poverty and promote the labour market integration of those who are able to work.²⁸⁵²

On 29 September 2022, the European Commission took legal action against Belgium, Denmark, Estonia, Ireland, France, Croatia, Latvia, Poland, Portugal, Slovenia and Finland as they have not communicated the measures necessary to ensure the full transposition of the Single-Use Plastics Directive under the European Green Deal.²⁸⁵³

On 30 September 2022, the European Commission approved a temporary EUR450 million German measure to “enable five lignite-fired power plants to be on stand-by and ready to be activated to the extent needed in the event of natural gas shortages.”²⁸⁵⁴

The European Union has taken strong action to support a sustainable and inclusive recovery through allocating funds to address poverty, access to education, and the displacement of migrants. The European Union has also taken weaker action to support a sustainable and inclusive recovery through attending a meeting focused on sustainable infrastructure initiatives and endorsing principles that promote an inclusive and sustainable recovery.

Thus, the European Union has received a score of +1.

Background

In 2015, the United Nations adopted its “Sustainable Development Goals,” of which, the eradication of hunger is Goal 2.²⁸⁵⁵ This Sustainable Development Goal (SDG), “Zero Hunger,” aims to ensure access to safe, nutritious and sufficient food for all people all year round, as well as to eradicate all forms of malnutrition.²⁸⁵⁶ The Food and Agriculture Organization of the United Nations (FAO) has identified synergies between efforts to reduce poverty and malnutrition.²⁸⁵⁷ It has highlighted the transformation of food systems as an important instrument to resolve both crises. However, with its current trajectory, it is unlikely that the world will meet Zero Hunger by 2030.²⁸⁵⁸

²⁸⁵⁸ Goal 2: Zero Hunger, Sustainability Goals, United Nations (New York) n.d. Access Date: 12 December 2021. <https://www.un.org/sustainabledevelopment/hunger/>

Conflict, climate change, along with slowdowns and downturns in the economy further challenge the achievement of food sustainability, especially in areas with high levels of inequality.²⁸⁵⁹ The outbreak and prevalence of the COVID-19 pandemic made these endeavours even harder. This critical status quo thus highlights the greater need of providing sufficient nutrition for all individuals and achieving food security for the entire population. The FAO reported that approximately 770 million people were undernourished in 2020, which was about 160 million more than in 2014.²⁸⁶⁰ Among all countries it surveyed, 90 per cent reported that the COVID-19 pandemic changed their coverage of essential nutrition services. Evidently, the COVID-19 pandemic has drastically increased malnutrition rates around the world, thereby making it an important issue to address at the 2021 G20 Rome Summit.

The G20 first identified food sustainability as a key element to resolving malnutrition and poverty during its 2008 Washington Summit after noticing a spike in global food prices induced by the financial crisis.²⁸⁶¹ Food security and access to food were first discussed in detail at the G20's 2009 Pittsburgh Summit after the establishment of the L'Aquila Food Security Initiative (AFSI) by the G8 at its 2009 L'Aquila Summit to improve long-term food security.²⁸⁶² During this summit, G20 members committed to increase and improve food access to poorer countries.²⁸⁶³ Additionally, they called upon the World Bank to develop new trust funds to support the AFSI and to increase agricultural assistance to low-income countries. G20 members then called for the full implementation of the AFSI and the application of all its principles during the 2010 Toronto Summit.²⁸⁶⁴

At the 2010 Seoul Summit, G20 leaders committed to increase food availability and agricultural productivity. The Multi-Year Action Plan on Development was also released during this summit. A section of the Multi-Year Action Plan is devoted to laying out methods to increase investment and financial support for sustainable agricultural development.²⁸⁶⁵

At the 2011 Cannes Summit, the Action Plan on Food Price Volatility and Agriculture was presented after being initially introduced in June that year. The plan laid out objectives regarding agricultural production, productivity, and food price volatility, thus promoting food security, sustainable economic growth through agricultural production, and international cooperation regarding food and agriculture issues.²⁸⁶⁶

G20 leaders explicitly addressed the issue of chronic malnutrition in relation to hunger and food security during the 2012 Los Cabos Summit. G20 leaders stated their commitment to proceed with efforts laid out in various plans, platforms, and initiatives regarding food and agriculture. These include but are not restricted to the Tropical Agriculture Platform, the research initiatives for wheat, rice and

corn, the Rapid Response Forum, the Global Agriculture and Food Security Program. Specific support and calls for involvement for the Scaling Up Nutrition movement was given.²⁸⁶⁷ The Scaling Up Nutrition movement works to eliminate malnutrition in all its forms by encouraging global action and investment to improve maternal and child nutrition.²⁸⁶⁸

At the 2013 St. Petersburg Summit, G20 leaders continued to acknowledge the importance of food security and nutrition in their discussions. The seminar “Food Security through Social Safety Nets and Risk Management” and the second G20 Meeting of Agricultural Chief Scientists also took place at this summit with the intention of exchanging practices and addressing issues surrounding food security, malnutrition, and the agricultural sector.²⁸⁶⁹

At the 2014 Brisbane Summit, the G20 Food Security and Nutrition Framework was introduced. The FSN was created to aid in “lifting investment in food systems, raising productivity to expand food supply, and increasing incomes and quality jobs.”²⁸⁷⁰

During the 2015 Antalya Summit, G20 leaders prioritized and encouraged work around food security, poverty, rural development, and agriculture issues. It was at this summit where the G20 Action Plan on Food Security and Sustainable Food Systems was endorsed. This plan was released to promote and increase the commitments of G20 leaders regarding global food security, nutrition, and the sustainable production, consumption, and selling of food.²⁸⁷¹

At the 2016 Hangzhou Summit, G20 Leaders affirmed their commitment to prioritize food security, nutrition, sustainable agricultural growth, and rural development to implement the 2030 Agenda for Sustainable Development. G20 Leaders at this summit also supported increasing efforts by the agricultural scientific and private sectors and welcomed the opening of the First G20 Agricultural Entrepreneurs Forum.²⁸⁷²

At the 2017 Hamburg Summit, G20 leaders continued to stress the importance of achieving food security. As a result, G20 leaders committed to increase their support for sustainable growth of agricultural productivity to ensure food security and nutrition and to further rural development sustainably. G20 leaders also promoted the implementation of the Principles for Responsible Investment in Agriculture and Food Systems (CFS-RAI) and the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests in the Context of National Food Security (VGGT) to encourage responsible investment in agriculture and the rural economies.²⁸⁷³

At the 2018 Buenos Aires Summit, the G20 reaffirmed their commitment to confront challenges surrounding food security, but with a focus on eradicating hunger and malnutrition in all forms. G20 leaders committed to devote their focus on tackling malnutrition in the form of childhood obesity “through national, community-based and collaborative multi-stakeholder approaches.” They also

promoted and encouraged the sharing of agricultural practices, initiatives to reduce food loss and waste, dynamism in rural areas, and sustainable agriculture.²⁸⁷⁴ Food loss reduction and malnutrition eradication initiatives were also promoted at the 2019 Osaka Summit during the Agriculture ministers' meeting.²⁸⁷⁵

At the 2020 Riyadh Summit, the G20 became even more strongly committed to tackling food security and nutrition issues as the COVID-19 pandemic exacerbated such matters.²⁸⁷⁶ Agriculture and Water Ministers at the summit called for increases in responsible investment in agriculture and food systems. Such increases would help those suffering from food insecurity and malnutrition, notably after the COVID-19 pandemic aggravated food insecurity as a result of disruptions throughout global food supply chains.²⁸⁷⁷

Commitment Features

The G20 commitment is to 1) foster sustainable and resilient food systems and agriculture innovation, as well as 2) increase access to finance through responsible investment in agriculture and food systems.²⁸⁷⁸ By taking these measures, G20 members hope to end hunger and malnutrition, eradicate poverty and ensure sustainability.

“To foster” means to encourage the development of something.²⁸⁷⁹

According to FAO, “food systems” consist of subsystems (including but not limited to farming, waste management, input supply, etc.) that interact with other systems (including but not limited to energy, trade, health, etc.) crucial for realizing the societies' functions.²⁸⁸⁰

“Sustainable and resilient food systems” refer to food systems that ensure a sufficient supply of acceptable and accessible food for all, namely deliver food nutrition and security, 1) in ways that the economic, social and environmental bases to generate food security and nutrition for future generations are not compromised and 2) can withstand and recover from disruptions.²⁸⁸¹ Thus, relevant actions may help increase the productivity, sustainability and resiliency of food systems by strengthening global, regional and local food value chains alongside international food trade.²⁸⁸²

“Hunger,” or chronic undernourishment, is an uncomfortable or painful physical sensation due to insufficient consumption of dietary energy.²⁸⁸³ FAO uses the Prevalence of Undernourishment (PoU)

²⁸⁸² G20 Rome Leaders' Declaration, G20 Information Centre (Toronto) 31 October 2021. Access Date: 12 December 2021. <http://www.g20.utoronto.ca/2021/211031-declaration.html>

²⁸⁸³ Hunger and Food Insecurity, FAO (Rome) n.d. Access Date: 12 December 2021. <https://www.fao.org/hunger/en>

as a traditional indicator to monitor hunger based on data on food availability, food consumption and energy needs. The Food Insecurity Experience Scale (FIES) estimates the percentage of a country's population facing difficulties in accessing enough safe and nutritious food. This indicator thus shows the prevalence of moderate or severe food insecurity in the population.

“Malnutrition,” in all its forms, includes undernutrition (wasting, stunting, underweight), inadequate vitamins or minerals, overweight, obesity, and resulting diet-related noncommunicable diseases.²⁸⁸⁴ These symptoms are not limited to the poor and disproportionately threatens women during pregnancy and childbirth.²⁸⁸⁵

“Poverty” is understood as the lack of, or the inability to achieve, a socially acceptable standard of living.²⁸⁸⁶ The World Bank defines “extreme poverty” as living on less than USD1.9 per person per day.²⁸⁸⁷ Moreover, “sustainability” in agriculture demands meeting the needs of present and future generations while ensuring social and economic equity.²⁸⁸⁸

“Agriculture innovation” is the process whereby individuals or organizations bring new or existing products, processes or ways of organization into use for the first time in a specific context, to increase effectiveness, competitiveness and resilience with the goal of solving a problem in agriculture.²⁸⁸⁹ Innovations in agriculture exist across all dimensions of the production cycle along the entire value train: from crop, forestry, fishery or livestock production to the management of inputs to market access. These progresses from productions to policies can drive socio-economic growth, ensure food and nutrition security, alleviate poverty and improve resilience to climate change and other disruptions, thereby helping to achieve the SDGs.

“To increase” means to add to the size, amount and/or intensity of something.²⁸⁹⁰

“Access to finance” refers to actors’ ability to obtain funds through various financial products and services.²⁸⁹¹ In the agricultural sector, they often take the forms of direct finance, value-chain finance, infrastructure finance and financing for Research and Development (R&D) in agri-food systems and agri-businesses.²⁸⁹² For example, these forms of finance can include credit, savings, payments, insurance and other risk-management products.²⁸⁹³

²⁸⁹³ Access to Rural Finance, FAO (Rome) n.d. Access Date: 12 December 2021. <https://www.fao.org/policy-support/policy-themes/access-to-finance/en/>

Increased financial access enables access to inputs, working capital, purchases and aggregation of products, extension of processing lines and acquisition of new equipment.²⁸⁹⁴ Increased financial access in agriculture can manifest through improved availability of loans, larger amount of loans, longer duration allowed for interest repayments, less rate of interest applied towards repayment and other forms of better terms on financial services offered to actors in the agriculture sector based on recognitions of specific challenges they face, such as the seasonal nature of agricultural activities.

“Responsible investment” in agriculture and food systems refers to the creation of productive assets and capital formation, which may comprise physical, human or intangible capital, oriented to support the realization of food security, nutrition and sustainable development, through manners that respect, protect and promote human rights.²⁸⁹⁵ Relevant actions would emphasize the vital role of smallholders (including family farmers), the empowerment of women and rural areas.

This commitment covers a wide range of activities in food and agriculture, constituting the breadth component of this compliance analysis. To fulfill every aspect of this commitment, G20 members have to 1) encourage innovative developments in agricultural technologies and policies to improve the productivity, sustainability and resiliency of food systems across the globe, as well as 2) improve access of funds for actors in the agricultural sector with attention to the protection and promotion of human rights along the way. An action that addresses both dimensions would have more breadth than another action that only addresses some of the aforementioned elements.

Meanwhile, this commitment also has a depth component for evaluating the strength of actions taken by G20 members. On the one hand, an action that brings structural reform beneficial for agri-food systems and agri-businesses in the long term would have more depth than another action that merely remedies damages to the agricultural sector induced by the COVID-19 pandemic.

On the other hand, a G20 member must take significant action on both the domestic and international levels for full compliance. If a G20 member only takes partial action on one or both levels, it would receive a status of partial compliance. Partial actions can include verbal reaffirmation of the commitment or attendance of relevant meetings. For strong actions, a G20 member would have to initiate a new program, implement a new policy or pass a new regulation to advance promised efforts towards strengthening agri-food systems and agri-businesses.

To achieve full compliance, G20 members must take concrete actions in three or four of the following: 1) foster sustainable food systems, 2) foster resilient food systems, 3) foster agriculture innovation and 4) increase access to finance through responsible investment in agriculture and food systems. The first three dimensions might include efforts to encourage developments, especially innovations, within the agri-food systems. These progresses, from production technologies to policy designs, can occur in agricultural value-chains at national, regional and global levels, as well as in international food trade.²⁸⁹⁶ Meanwhile, the latter dimension entails efforts to increase the availability of funds for actors across the agricultural sector with explicit considerations for human rights. Efforts in this regard would increase the amount and variety of financial instruments at the disposal of farmers and small agricultural entrepreneurs, actors along the agricultural value chain, rural infrastructure, in addition to research and

²⁸⁹⁶ Innovation in Agriculture and Food Systems for Achieving SDGs, FAO Regional Conference for the Near East, FAO (Muscat) 2-4 March 2020. Access Date: 12 December 2021. <https://www.fao.org/3/nc249en/nc249en.pdf>

development.²⁸⁹⁷ These efforts would pay attention to the specific circumstances these relevant actors face to ease their financial burdens, thereby assisting them to overcome numerous challenges caused by lack of access to finance.²⁸⁹⁸

Partial compliance indicates that G20 member's progress in advancing food sustainability to end hunger and malnutrition and eradicate poverty through one or two of the following approaches: by 1) cultivating sustainable food systems, 2) cultivating resilient food systems, 3) promoting of agriculture innovation or by 4) improving access to finance through responsible investment in agriculture and food systems.

For a score of non-compliance in this commitment, the G20 member has completed none of the criteria identified above.

Scoring Guidelines

-1	G20 member has NOT taken any actions to foster sustainable and resilient food systems and agriculture innovation, and does not increase access to finance through responsible investment in agriculture and food systems.
0	G20 member has taken actions in one or two of the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation OR increase access to finance through responsible investment in agriculture and food systems.
+1	G20 member has taken actions in three or four of the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation OR increase access to finance through responsible investment in agriculture and food systems.

*Compliance Director: Wenny (Yiyao) Jin
Lead Analyst: Thérèse Perucho*

Argentina: +1

Argentina has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 10 November 2021, Minister of Agriculture Julián Domínguez chaired a meeting with the Rural Society of Mar del Plata to call for the development of a sustainable agro-bioindustrial model to compete with the growing global demand for food.²⁸⁹⁹ Minister Domínguez affirmed that the federal government aims to “certify the traceability and quality of the food [it produces].”

On 17 November 2021, the Ministry of Agriculture declared the launch of the National Program for Sustainable Agriculture Development (PRONADACS).²⁹⁰⁰ Undersecretary of Fisheries and

Agriculture Carlos Liberman expressed that aquaculture production represents “a source of healthy and accessible food, with the capacity to contribute to food security.”

On 29 November 2021, Minister Domínguez attended the opening of the country’s first agro-ecological butcher shop.²⁹⁰¹ Minister Domínguez stated the federal government’s support for initiatives that “resist the ups and downs of agricultural production, with fresh and local food of safe and nutritional quality.”

On 10 December 2021, Minister Domínguez organized a conference at the National Institute of Agricultural Technology, during which he collaborated with Secretary for Food, Bioeconomy and Regional Development Marcelo Alós.²⁹⁰² Secretary Alós declared that President Alberto Fernández’s administration is prepared to “face the challenges of sustainability and food security at a global level.”

On 20 December 2021, Minister Domínguez met with Chief of the Cabinet of Ministers Juan Manzur to confirm that agreements had been reached to guarantee the price of wheat and corn to combat global food price inflation.²⁹⁰³

On 23 December 2021, the Ministry of Agriculture confirmed that Argentine producers had achieved the highest wheat production in national history, reaching 22.1 million tonnes.²⁹⁰⁴ Minister of Agriculture Julián Domínguez stated that “these record levels [are achieved] in a sustainable manner, massively incorporating Good Agricultural Practices, biotechnology and the entire knowledge economy offered by the biotechnological and Agtech ecosystem.”

On 15 January 2022, Minister Domínguez visited the regions affected by drought, meeting with provincial governments to “update the emergency fund, a historic need and request from producers.”²⁹⁰⁵ He remarked that “it is necessary [to also] have irrigation instruments for small and medium-sized producers.”

On 26 January 2022, Chief of the Cabinet of Ministers Juan Manzur met with several ministers to discuss the implementation of 21 irrigation projects in the country.²⁹⁰⁶ Deputy Chief of Staff Jorge

Neme declared that “the purpose of the meeting was to analyze the core of a public investment policy that allows the increase in agri-food production.”

On 1 February 2022, the Ministry of Agriculture released a credit line of ARS100 billion in service to those in the meat, milk and by-products industries to promote “sustainable production, improve productivity and productive competitiveness and promote investment and employment.”²⁹⁰⁷

On 2 February 2022, Chief Manzur announced an ARS800 million credit line for small and medium-sized agricultural producers of the province of Entre Ríos to assist in the recovery from the past season’s drought.²⁹⁰⁸ The financing line allows local grain, meat and dairy producers to request up to ARS5 million in credit with no interest rate during the first year.

On 3 February 2022, Chief Manzur signed agreements with Minister of Public Works Gabriel Katopodis to launch a drinking water program that would supply water for 25,000 inhabitants.²⁹⁰⁹

On 23 March 2022, the Ministry of Agriculture participated in a virtual seminar of the United Nations Food and Agriculture Organization, during which the ministry emphasized their recent creation of the National Directorate of Agroecology (DNA).²⁹¹⁰ Secretary of Agriculture Matías Lestani stated that the DNA’s purpose is to “continue working together in the development of public policies that underpin this way of generating healthy food, which is done in a sustainable manner.”

On 30 March 2022, Minister Domínguez agreed to increase cooperation between Argentina and Paraguay concerning the development of biotechnology and good agricultural and livestock practices, making the technological developments of the ministry accessible to its Paraguayan counterpart.²⁹¹¹ Minister Domínguez stressed that “food security and sustainability are absolute priorities for [their] countries.”

On 31 March 2022, the Ministry of Agriculture announced the expansion of the use of the Argentine Bioproduct Seal to include bio-inputs.²⁹¹² The seal allows consumers to identify biomaterials,

bioproducts and bio-inputs produced with renewable raw materials, aiming to create an exclusively sustainable production chain.

On 7 April 2022, the Ministry of Agriculture hosted a conference of Argentine and Brazilian fishing business executives to encourage the expansion of the fishing and aquaculture sectors between the two countries.²⁹¹³ Minister of Agriculture Julián Domínguez remarked that they “are working to enhance the capacities of [their] producers, generate more value and contribute to global food security.”

On 13 April 2022, Minister Domínguez and Brazilian ambassador Reinaldo José De Almedia Salgado expressed their interest to pursue a common initiative in agricultural sustainability and the expansion of their agro-biotechnology exports in the global market.²⁹¹⁴

On 24 April 2022, Minister Domínguez agreed to formulate a strategic mission with Israel to improve sustainable practices of irrigation, food certification and biotechnology.²⁹¹⁵ The meeting of the two ministries emphasized the “need to prioritize innovation and knowledge as the main tools in the face of common challenges faced by producers around the world in the face of climate change.”

On 3 May 2022, Minister Domínguez commenced the implementation of the Argentine Livestock Plan, seeking to increase domestic meat production by 600,000 tons by 2030.²⁹¹⁶ In a meeting with provincial agricultural representatives, Minister Domínguez stated that they “have to lead the vision of development of Argentine livestock in a sustainable manner.”

On 27 May 2022, Governments of Argentina and Mexico held a bilateral meeting aimed at increasing the exchange of various crops and meats, as well as agricultural equipment, machinery and technology.²⁹¹⁷ Foods discussed in relation to exports included Bovine and Pork meat, grains such as rice and beans, as well as fruits like citrus and apple. Argentina’s delegation, headed by Minister of Foreign Affairs, International Trade and Worship Santiago Cafiero, and the Mexican delegation, led by Minister of Agriculture and Rural Development Víctor Villalobos Arámbula, emphasized the importance of fertile Latin America in this current era of fear over food insecurity.

On 6 June 2022, Minister Domínguez, Governor Gerardo Zamora, Governor Jorge Capitanich, along with director of the World Bank for Argentina, Paraguay and Uruguay Jordan Schwartz, launched the

AGRO XXI program.²⁹¹⁸ A total of ARS550 million contributed by the World Bank, the Government of Argentina and the private sector will be put towards the economic recovery of agri-food systems, specifically through climate-friendly practices, further improving the agro-bioindustrial development of Argentina.

On 9 June 2022, General Director of the General Directorate of Sectoral and Special Programs and Projects (DIPROSE) Gervasio Bozzano presented the Program for the Promotion of Resilient and Sustainable Agrifood Systems for Family Farming (PROSAF).²⁹¹⁹ The ARS33.1 million that has been put towards PROSAF will be used to promote sustainable and inclusive agricultural production and marketing systems, specifically for indigenous, family and peasant farmers.

On 10 June 2022, Government of Argentina released a statement alongside the governments of Brazil, Canada, Mexico and the United States regarding the role of agricultural exports for food security.²⁹²⁰ Among the commitments made include a dedication to maximize agricultural production and promote humanitarian efforts through ensuring food security.

On 14 June 2022, the Ministry of Agriculture joined the Delegation of the European Union to ratify Argentina's commitment to combating climate change and ensuring food security.²⁹²¹ Undersecretary for Political Coordination Ariel Martínez informed the delegation of Argentina's efforts, stating that "our priority is the adaptation and sustainable intensification of production; we are environmental creditors."

On 23 June 2022, General Directorate of Sectoral and Special Programs and Projects (DIPROSE) approved funding for fourteen research projects across eleven provinces with a focus on improvements in productivity and environment regarding agricultural and livestock endeavours.²⁹²² The total funding amounts to USD1.96 million within the Comprehensive Management Program for Risks in the Rural Agroindustrial System (GIRSAR). The programs "seek to contribute to food security in a context of changing climate [... through] adapting and building resilience to climate change."

On 25 June 2022, Minister Domínguez joined G7 countries in the "Uniting for Global Food Security" virtual conference to illustrate Argentina's commitment to food security.²⁹²³ Minister Domínguez informed G7 representatives of the importance of joint public-private initiatives regarding direct seeding, sustainable earth management and biotechnological advancement."

On 30 June 2022, Minister Domínguez met with his Brazilian counterpart, Minister of Agriculture, Livestock and Supply Marcos Montes Cordeiro, to affirm their mutual commitment and cooperation

in global food security.²⁹²⁴ Minister Domínguez stated that the two countries “have shared destinies” and pledged to launch scientific studies between both countries to aid in the predictability of future agricultural patterns.

On 5 July 2022, Minister Domínguez announced an expansion of ARS20 billion in subsidized financing to the Center for Poultry Processing Companies and the Argentine Chamber of Poultry Producers.²⁹²⁵ The action serves to increase Argentina’s agricultural and food trade surplus; Minister of Productive Development, Daniel Scioli, remarked that the plan is grounded “in an international context in which the world is looking for the food we can produce.”

On 11 July 2022, the Ministry of Agriculture launched a joint cooperation project with Germany to promote innovation in the sustainable agricultural sector.²⁹²⁶ The project has three components: crafting an institutional framework for agricultural innovation, promoting the AgTech sector and facilitating the exchange of scientific and agricultural research data. Undersecretary for Political Coordination, Ariel Martínez, stated that “food safety is a top priority for us and new technologies are part of the solution.”

On 14 July 2022, the Ministry of Agriculture met with the United Nations Food and Agriculture Organization to review achievements under the National Directorate of Aquaculture in Argentina, as well as to discuss opportunities for continued domestic expansion of sustainable aquaculture practices.²⁹²⁷ The agencies expressed their interest to further consolidate national and international knowledge transfer networks.

On 21 July 2022, the Undersecretary of Fisheries and Aquaculture of the Nation announced an initiative to promote the local development of sustainable aquaculture through a fund of approximately ARS22 million.²⁹²⁸ Investing in the amelioration of the El Mollar fish farm and the consolidation of a local knowledge transfer system, this initiative aims at strengthening local capacity. The announcement represents the first stage of a national aquaculture development strategy under the supervision of the National Directorate of Aquaculture.

On 10 August 2022, the Ministry of Agriculture and the National Ministry of Economy agreed on a Work Plan to fight the vinicultural plague caused by the *Lobesia botrana* pest, also called “the vine moth.”²⁹²⁹

²⁹²⁹ The National Government allocated \$945 million to combat the plague that attacks the vine in Mendoza and San Juan, Ministry of Agriculture, Livestock and Fisheries (Buenos Aires) 10 August 2022. Translation provided by Google Translate. Access Date: 25 August 2022.

https://www.magyp.gob.ar/sitio/areas/prensa/index.php?accion=noticia&id_info=220810163138

The Plan allocates ARS945 million to implement phytosanitary resistance measures as well as long-term sustainable strategies in the regions of San Juan and Mendoza to prevent further pest outbreaks.

On 20 September 2022, the Secretary of Agriculture, Livestock and Fisheries of the Nation announced the commercial release of the first vaccine against the Bovine Leukosis Virus.²⁹³⁰ The vaccine's genetic modification successfully reduces both the strength of contagion and tumor development in cattle. More than eighty per cent of cattle farms of dairy farms across the Americas, Europe and Asia have been directly affected by the disease.

On 25 October 2022, Minister of Economy Sergio Massa and Secretary of Agriculture, Livestock and Fisheries of the Nation, Juan José Bahillo announced the Productive Advance Program to provide financial assistance, which equals to around 40% of the capital investment in seeds and fertilizers.²⁹³¹ This program will benefit over 19,500 producers and encourage them to plant more soybeans and corn. Strengthening and adding value to the small, medium and regional networks of agricultural production will mitigate risks and damages due to droughts.

Argentina has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by seeking new domestic improvements, resilient agricultural systems by funding drought protection initiatives, agriculture innovation by developing biotechnology and increased access to finance through responsible investment in agriculture by enhancing the productivity and competitiveness of meat, milk and by-products industries along with the AGRO XXI and PROSAF programs.

Thus, Argentina receives a score of +1.

Brazil: +1

Brazil has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 25 November 2021, the Brazil-China Forum on Biotechnology, Agriculture and Sustainability took place.²⁹⁴⁸ Secretary of Innovation, Sustainable Development and Irrigation of the Brazilian Ministry of Agriculture Fernando Camargo as well as Chinese Ambassador to Brazil Yang Wanming participated in the discussion with many agriculture experts from the two countries. They emphasized cooperation through germplasm development, low-carbon and smart agriculture, in addition to green finance.

On 7 April 2022, Minister of Agriculture, Livestock and Supply Marcos Montes Cordeiro hosted a bilateral conference with Argentinian Minister of Agriculture, Livestock and Fisheries Julián Domínguez and fishing business executives to encourage the expansion of the fishing and aquaculture sectors between the two countries.²⁹⁴⁹ Through these efforts, they hoped to “enhance the capacities of [their] producers, generate more value and contribute to global food security.”

On 13 April 2022, Brazilian ambassador Reinaldo José De Almedia Salgado and Argentinian Minister of Agriculture Julián Domínguez expressed their interest to pursue a common initiative in agricultural sustainability.²⁹⁵⁰ Meanwhile, they hoped to expand their agro-biotechnology exports in the global market.

On 6 May 2022, Brazilian Ministry of Agriculture, Livestock and Supply along with the Government of Japan jointly signed onto the Collaborative Development of Digital and Precision Agriculture to

Strengthen the Innovation Ecosystem and the Sustainability of the Brazilian Agro partnership project.²⁹⁵¹ This project encourages the development of sustainable agro-industrial technologies, plans to advance productivity and environmental sustainability within agricultural systems and will improve the profitability of the agricultural sector between Japan and Brazil.

On 2 June 2022, Normative Instruction No. 21 was published in the Government of Brazil's Official Gazette of the Union. Normative Instruction No. 21 introduces new standards for the integrated production of grapes in processing (PIUP) that will come into effect on 1 July 2022.²⁹⁵² The 13 standards topics within the PIUP aim to achieve many different goals, including the reduction of the environmental impact of grape processing and avoiding the unnecessary use of inputs. Enforcing the PIUP standards will help Brazil's grape harvesting and processing systems to be more financially and environmentally sustainable.

On 6 June 2022, Minister of Agriculture, Livestock and Supply Marcos Montes Cordeiro presented the National Program for Decarbonizing Agricultural Chains.²⁹⁵³ The program encourages the use of sustainable technologies for agricultural production to reduce the greenhouse gas emissions resulting from agricultural chains and products.

On 10 June 2022, Government of Brazil released a statement alongside the governments of Argentina, Canada, Mexico and the United States regarding the role of agricultural exports for food security.²⁹⁵⁴ Among the commitments made include a dedication to maximize agricultural production and promote humanitarian efforts through ensuring food security.

On 30 June 2022, Minister of Agriculture, Livestock and Supply Marcos Montes Cordeiro met with Minister of Agriculture, Livestock and Fisheries Julián Domínguez from Argentina to affirm their mutual commitment and cooperation in global food security.²⁹⁵⁵ The two countries pledged to launch joint scientific studies to help enhance the predictability of future agricultural patterns.

On 24 October 2022, Minister Marcos Montes participated in the meeting of the Superior Council of Agribusiness at the Federation of Industries of the State of São Paulo, which discussed potential measures, including encouraging “small and medium urban investors to [participate in] agribusiness,” to increase private financing for agriculture.²⁹⁵⁶ The Securities and Exchange Commission also

participated in this meeting, highlighting the potential contribution of capital market in building “green and digital” agrifood systems in Brazil.

Brazil has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agricultural innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by enhancing harvesting and processing systems to be more financially and environmentally sustainable, resilient food systems by enforcing new standards, agriculture innovation by encouraging the development of sustainable agro-industrial technologies and increased access to finance through responsible investment in agriculture and food systems by cooperating with partners overseas to facilitate agricultural trades.

Thus, Brazil receives a score of +1.

Analyst: Tisya Raina

Canada: +1

Canada has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 15 November 2021, the fourth meeting of the EU-Canada Comprehensive Economic Trade Agreement took place virtually, alongside the Canada-European Union Agriculture Dialogue.²⁹⁵⁷ This meeting featured “a commitment to maintain a positive collaborative approach” and considered several agri-food products important in bilateral trade to promote the resilience of regional food systems.

On 6 December 2021, Global Affairs Canada and Minister of International Development and Minister responsible for the Pacific Economic Development Agency of Canada, Harjit S. Sajjan, announced a contribution to Canadian Foodgrains Bank (CFGB) of CAD75 million over the next 3 years.²⁹⁵⁸ CFGB operates globally and this effort intends to ease COVID-19 related food insecurity.

On 7 December 2021, Global Affairs Canada and Minister Sajjan announced a contribution of CAD195 million to various organizations globally.²⁹⁵⁹ The report noted that this funding was in part pledged a year prior with the Nutrition for Growth Year of Action, which in total promised CAD520 million.

were CAD10 million towards the Generating Revenue for Nutrition Ghana (GROWING) through the International Potato Center.

On 28 June 2022, Government of Canada released a statement on Global Food Security alongside other G7 members.²⁹⁹² Several commitments are made by the member states (including Canada) among which is a joint pledge of USD4.5 billion. Prime Minister Trudeau also pledged a total of CAD151.7 million towards relief in Ukraine, including CAD75 million dedicated to various humanitarian efforts including food assistance.²⁹⁹³

On 1 July 2022, Canada, along with the United Kingdom and the United States, launched the Illegal, Unreported and Unregulated Fishing Action Alliance.²⁹⁹⁴ The Alliance aims to increase ambition and momentum to fight against illegal, unreported and unregulated fishing. The Alliance and partnership are a pledge to take urgent action in improving the monitoring, control and surveillance of fisheries and increasing transparency in fishing fleets and seafood markets. This Alliance aims to be beneficial for fishermen in Canada, the United States and the United Kingdom by providing a safe and sustainable source of fishery products.

On 5 August 2022, Member of Parliament Terry Sheehan announced a contribution from the Federal Economic Development Agency for Northern Ontario.²⁹⁹⁵ This money aims at supporting the growth and diversification of “the agri-food sector and strengthen food supply chains in the Algoma district.”

On 15 August 2022, Minister Vandal announced an investment of CAD143.4 million over the next two years allocated to the expansion of the Nutrition North Canada program.²⁹⁹⁶ This includes CAD36 million for the Harvesters Support Grant, CAD60.9 million to create the Community Food Programs Fund, as well as CAD1.5 million towards research to continue exploring solutions to food security for the local community. Additionally, Minister Vandal also announced an investment of CAD383,000 towards food access for Indigenous and Northern communities, utilizing the Northern Isolated Community Initiatives Fund. Specifically, this effort was directed at revitalizing the Mackenzie Delta reindeer herd, which serves as a sustainable source of food for many communities rooted in the history of the region.

On 17 August 2022, Agriculture and Agri-Food Canada announced an allocation of over CAD1 million to 10 new projects under the Canada-British Columbia Agri-Innovation Program.²⁹⁹⁷ Among the significant contributions are efforts to increase sustainability in agricultural practices. For example, Dicklands Farms FLP in Chilliwack would receive CAD165,000 for designing more sustainable dairy farming technologies.

On 6 October 2022, Minister of Agriculture and Agri-Food Marie-Claude Bibeau announced an investment towards the Prairie Oat Growers Association to support new research trials to enhance understanding of the role which oats can play in disease prevention.²⁹⁹⁸ This funding of up to CAD106,000 aims at producing findings to create market opportunities for oat producers in Canada.

On 31 October 2022, Minister of Agriculture and Agri-Food Marie-Claude Bibeau announced an investment of almost CAD1 million through the Canadian Agricultural Strategic Priorities Program towards the Association des médecins vétérinaires praticiens du Québec.²⁹⁹⁹ This initiative aims at developing new digital tools to predict and reduce risks of metabolic diseases in dairy cows.

Canada has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by funding disease control, resilient food systems by investing in risk assessment and emergency response, agriculture innovation by promoting genetic services for animals and increased access to finance through responsible investment in agriculture and food systems by facilitating trade with agri-food products overseas.

Thus, Canada receives a score of +1.

On 30 November 2021, in Ministry of Higher Education and Research in Egypt, Institute of Agricultural Resources and Agricultural Zoning of the Chinese Academy of Agricultural Sciences signed a memorandum of cooperation with Egyptian National Remote Sensing Space Science Administration.³⁰⁰¹ The memorandum of cooperation is referred as “Sino-Egyptian Agricultural Green Development Joint Experiment.” Deputy Minister of the Ministry of Higher Education Yasser Rifat said that he is optimistic about the development of agricultural modernization through the construction of the Egypt-China Agriculture Green Development Joint Laboratory.

On 12 January 2022, Chinese Academy of Agricultural Sciences (CAAS) released a five-year development plan on agricultural science and technology innovation to increase food sustainability and security.³⁰⁰² The plan aims to improve grain yield, self-sufficiency, utilization rate of irrigation water and reduce dependence on crop imports. President of CAAS Wu Kongming called for efforts to achieve agricultural innovation focused on seeds, cultivated land, agricultural machinery and biosafety.

On 20 January 2022, official with the Ministry of Agricultural and Rural Affairs Xie Jianmin announced the release of the Rural Development and the country’s endeavour to ensure food security, consolidate poverty alleviation and promote ecological agriculture, making food systems more environmentally efficient and beneficial to people living in rural areas.³⁰⁰³ Associate vice-president of International Fund for Agricultural Development strategy and knowledge department Jyotsna Puri highlighted the significance of the rural food chain and promised investments and policy changes to make adequate and nutritious food more accessible.

On 9 February 2022, Ministry of Agriculture and Rural Affairs issued the “Guiding Opinions on Promoting the Construction of Ecological Farms” and announced the plan to construct 1,000 national-level ecological farms by 2025.³⁰⁰⁴ The document proposes four main goals: construction of an ecological agricultural monitoring system, cultivation of ecological agricultural market entities, promotion of new ecological agricultural technology models and exploration of a set of ecological agricultural support policies.³⁰⁰⁵ The document affirms the ecological farms’ importance and contribution to the “three products and one standard” in agricultural production by improving China’s agricultural quality and competitiveness.

On 22 February 2022, director of the Office of the Central Leading Group for Rural Work and Minister of Agriculture and Rural Affairs Tang Renjian gave a comprehensive interpretation of the newly-issued “Opinions of the Central Committee of the Communist Party of China and the State Council on Doing a Good Job in Comprehensively Promoting the Key Work of Rural Revitalization in 2022,” also known

France has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 4 and 5 November 2021, Minister of Agriculture and Food Julien Denormandie announced the launching of a new Seeding and plants plan at the Global Conference on Green Development of Seed Industries.³⁰¹⁰ The new plan is built around four working axes: diversity of varieties and species, high-quality food that is respectful of the environment, participatory initiatives and use of new techniques and scientific expertise serving public authorities and society.

On 11 November 2021, Minister of Higher Education, Research and Innovation Frédérique Vidal, Minister of Agriculture and Food Julien Denormandie and Deputy Minister of Industry Agnès Pannier-Runacher announced that France would dedicate EUR877 million over the next 5 years to develop innovative solutions in service of the resiliency and competitiveness of the agricultural sector and agribusiness and to conceptualize and deploy solutions for more sustainable and healthy eating.³⁰¹¹

On 15 November 2021, Government of France contributed EUR25.5 million to fund the operations of the World Food Programme in Afghanistan.³⁰¹² This funding aims to provide school meals for 188,000 children in over 420 Afghani schools, as well as to enhance nutrition services for 106 thousand children alongside 54,000 at-risk pregnant and breastfeeding women.

On 12 December 2021, the French Technical Center for the Preservation of Farm Produce, the Ministry of Agriculture and Food, and the French Federation of the Preserved Foods Industry signed a new performance and objectives contract which states the Center's goals for the next four years.³⁰¹³ The contract is built around five strategic axes, including supporting the agribusinesses in their ecological and energetic transition and ensuring food safety and quality.

On 21 December 2021, the French government announced that it was going to extend its 2018 suspension of goods containing the E171 additive to another year, starting 1 January 2022.³⁰¹⁴ As a

reminder, on 6 May 2021 the European Food Safety Authority had stated that the E171 could no longer be considered safe due to its damaging properties for consumers' genetic material.³⁰¹⁵

On 5 January 2022, the French Ministry of Agriculture and Food announced that it was recruiting public veterinary health inspectors to, among other duties, conceptualize, execute and assess public policies on matters of food security and quality.³⁰¹⁶

On 12 January 2021, the Ministry of Agriculture and Food together with the Chambers of Agriculture launched "fraiselocal.fr," a new platform enabling consumers to find local food producers close to home.³⁰¹⁷

On 27 January 2022, the French government announced that starting 1 March 2022, the food service industry will have to abide by a new labelling system disclosing the country of origin of meats served in restaurants and other catering businesses.³⁰¹⁸ Labels will also need to disclose the condition of the meat being served (fresh, refrigerated, frozen or deep-frozen). This decree seeks to address consumer expectations pertaining to food transparency and traceability, and for consumers to be able to make better-informed choices when it comes to their food consumption habits.

On 31 January 2022, Minister of Agriculture and Food Julien Denormandie brought together the French pork industry and agricultural banks to create a roadmap to support the pork industry as it faces several crises such as the African swine fever affecting feral pigs in Europe or inflation on agricultural raw materials used for pet food.³⁰¹⁹

On 1 February 2022, Prime Minister Jean Castex concluded the agricultural Varenne on water and adaptation to climate change together with Minister of Agriculture and Food Julien Denormandie and Secretary of State in charge of biodiversity Bérange Abba.³⁰²⁰ Castex's intervention was preceded by a presentation on the progress made by three working groups tasked by President Emmanuel Macron in May 2021 to create an operational roadmap on matters of water management and adaptation to climate change.

On 7 February 2022, Minister Denormandie met with other European Union members to discuss climate-friendly agriculture and forestry models.³⁰²¹ At this meeting, France brought forward its approach to make use of a carbon diagnosis scheme and low-carbon fuel.

On 21 February 2022, Minister Denormandie announced that France will ban the importing and selling of meats and produce made with animals having received antibiotics.³⁰²² Starting on 22 April 2022, French importers will thus be required to collect certificates of compliance from their suppliers.

On 28 February 2022, Minister Denormandie and Industry Deputy Minister Agnès Pannier-Runacher signed an agrifood system strategic agreement, together with representatives from French agrifood businesses and labor unions³⁰²³. The goal of this agreement is to encourage the expansion of France's agrifood industries in order to promote competition, sustainability and job creation.

On 3 March 2022, Director General of Food Bruno Ferreira and Deputy Director General of Health Grégory Emery signed a voluntary collective agreement to reduce salt content in bread by 10 per cent in the next four years.³⁰²⁴ Signed with actors from the bakery industry as part of the 2019-2023 National Food and Nutrition Plan, the goal of the agreement is to lower salt content in various types of bread in stores and bakeries in order to promote better diets.

On 11 March 2022, the G7 agricultural ministers, including delegation from France, met in Berlin.³⁰²⁵ They discussed global concerns regarding food insecurity and agriculture. One of the most prominently discussed issues were the facilitation of harvest in affected areas in the Ukraine due to their ongoing food crisis, in an effort to provide access to “sufficient, safe, affordable and nutritious food.”

On 23 March 2022, the Ministry of Agriculture and Food announced a plan to engage the mobilization of fallowland in France in order to increase production.³⁰²⁶ The decision was made in light of Russia's invasion of Ukraine and its resulting tensions on the markets. The goal is to contribute to the securing of French and European supplies towards both human and animal food as well as global food stability.

On 24 March 2022, President Emmanuel Macron announced the launch of an international initiative called the Food & Agriculture Resilience Mission (FARM), together with members of the G7, the European Union and the African Union.³⁰²⁷ FARM seeks to prevent negative consequences of Russia's

invasion of Ukraine with regards to global food safety. The initiative rests upon three pillars: a commercial pillar to appease tensions on agricultural markets, a solidarity pillar to support Ukrainian agricultural capabilities, and a production pillar to sustainably strengthen the agricultural capabilities of countries most affected by the conflict.

On 27 May 2022, French Prime Minister Elisabeth Borne announced at EUR400 million in financial aid to French farmers affected by a drought and water shortages.³⁰²⁸ The financial aid will help farmers specifically with purchasing animal feed.

On 30 May 2022, Minister of Agriculture and Food Sovereignty Marc Fesneau launched a financial aid system to help farmers purchase animal feed.³⁰²⁹ The war in Ukraine alongside a drought in France has made it difficult for farmers to acquire raw agricultural materials which are used to feed animals. The first part of this financial aid system is worth EUR308.5 million and can possibly benefit more than 100,000 farmers.

On 6 June 2022, the 7th France-Japan Agricultural Policy Working Group was held in France.³⁰³⁰ At this session, representatives from both Japan and France reaffirmed the importance of sustainable food systems.

On 22 June 2022, Minister Fesneau announced the launch of a “flash mission” to evaluate the damage caused by hail in the agricultural sector.³⁰³¹ This two-week mission aims to better understand the impact of hail on agricultural production and to find practical solutions to support the future needs of farmers in response to these intense climatic phenomena.

On 1 July 2022, Ministry of Agriculture and Food Sovereignty published a decree stipulating that agricultural and agrifood businesses deemed to be “large consumers” of gas and electricity are now eligible for special aid aimed at supporting their competitiveness.³⁰³² This aid was part of the country’s resilience plan to help agricultural and agrifood businesses with their production.

On 12 July 2022, Government of France announced that it would craft an action plan to reduce or cut out the use of nitrated additives in all food products when possible, and so as quickly as possible.³⁰³³ This decision was in response to scientific findings on the risks associated with the consumption of nitrites/nitrates presented earlier that day by the French Agency for Food, Environmental and Occupational Health and Safety (ANSES).

On 18 July 2022, Minister Fesneau announced the extension of a program launched previously in 2021, aimed at supporting school canteens located in small towns across the country.³⁰³⁴ This program provides support in prioritizing durable and quality products, reducing food waste and ensuring that each student has access to a healthy meal every day.

On 22 August 2022, Minister Fesneau, based on results from monitoring drought situations worldwide, announced new measures regarding the heatwaves affecting the agricultural sector: among those are the strengthening of certain indemnities and adjustments in the use of registered designations of origin.³⁰³⁵

On 31 August 2022, the European Commission officially approved France's National Strategic Plan on its upcoming collective agricultural policy which seeks to provide support to agricultural projects.³⁰³⁶ This decision makes France one of the first seven member countries to receive this approval.

On 12 September 2022, Higher Education and Research Minister Sylvie Retailleau, Agriculture and Food Sovereignty Minister Marc Fesneau and Secretary General for Investments Bruno Bonnell launched a challenge called "Ferments of the Future."³⁰³⁷ Having received EUR48.3 million in funding from the Government of France, the project seeks to promote natural fermenting techniques to accelerate the agricultural and food revolution, all the while promoting healthy, durable and traceable diets.

On 26 September 2022, Ministry of Agriculture and Food Sovereignty announced details of its budget of nearly EUR6 billion for the year of 2023.³⁰³⁸ This budget aims to support the income of farmers and agricultural transformation towards agroecology, ensure health security of national agri-food systems through the maintenance of capacity in surveillance, prevention and crisis management, as well as training young generations to innovate and adapt to climate change.

France has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by facilitating ecological and energetic transitions, resilient food systems by enhancing food security, agriculture innovation by encouraging the incorporation of new techniques and increased access to finance through responsible investment in agriculture by enhancing coordination between consumers and local food producers.

Thus, France receives a score of +1.

Germany: +1

Germany has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 14 December 2021, Minister of Food and Agriculture Julia Klöckner negotiated a significant reduction in herring fishing quotas in the North Sea, allowing for a recovery of herring stocks in the western Baltic Sea.³⁰³⁹ Federal Fisheries Minister Cem Özdemir celebrated the sustainable policy change, stating “our fishermen only have long-term prospects if fish stocks are able to grow back and regenerate.”

On 21 January 2022, newly appointed Minister of Food and Agriculture Cem Özdemir announced a EUR816 million agriculture investment package destined to select businesses who contribute to sustainable agriculture through modern machines or structural innovations.³⁰⁴⁰ This investment package will help to increase modern and sustainable agricultural production.

On 25 January 2022, Development Minister Svenja Schulze met with Head of the World Food Programme David Beasley in which they outlined their two agencies’ cooperation in combating hunger.³⁰⁴¹ Specifically, the Ministry for International Cooperation and Development provided EUR476 million to strengthen hunger resilience in the Sahel, the Horn of Africa, Central Africa, and the Middle East and North Africa region.

On 28 January 2022, Minister Özdemir hosted the 14th Berlin Conference of Agriculture Ministers within the Global Forum for Food and Agriculture.³⁰⁴² The conference resulted in a joint declaration that recognized the importance of healthy soil for food security. Minister Özdemir declared that “healthy soil is our ally in the fight against world hunger...we must act now — and we must act together globally.”

On 31 January 2022, Minister Özdemir announced a EUR2.9 million funding package to four companies specializing in agricultural innovation.³⁰⁴³ Minister Özdemir stated “Tablets, robots and satellite-supported navigation systems not only make the industry more resource-efficient, but also make it an attractive professional field.”

On 21 February 2022, Minister Özdemir announced the advancement of the implementation of the Common Agricultural Policy (CAP) of the European Union, particularly concerning organic farming

practices.³⁰⁴⁴ The CAP allocates EUR30 billion to Germany from 2023 to 2027, which will be allocated to sustainable agriculture development, water resource protection and organic farming.

On 11 March 2022, the G7 agricultural ministers, including delegation from Germany, met in Berlin.³⁰⁴⁵ They discussed global concerns regarding food insecurity and agriculture. One of the most prominently discussed issues were the facilitation of harvest in affected areas in the Ukraine due to their ongoing food crisis, in an effort to provide access to “sufficient, safe, affordable and nutritious food.”

On 21 March 2022, Parliamentary State Secretary of the Ministry for Economic Cooperation and Development Jochen Flasbarth participated in the commencement event of the World Water Forum in Senegal, expressing Germany’s commitment to ensuring Sustainable Development Goal 6 through its implementation of water and sanitation projects in more than 50 countries.³⁰⁴⁶

On 23 March 2022, Minister Özdemir hosted a meeting with the Future Commission of Agriculture to discuss the impact of the invasion of Ukraine on agricultural sustainability goals.³⁰⁴⁷ In the session, Minister Özdemir affirmed Germany’s commitment to facilitating a transition to a sustainable and resilient food system.

On 25 March 2022, the Ministry of Food and Agriculture announced funding for two new research projects aimed to innovate reliable soil use in the agricultural adaptation to the climate crisis.³⁰⁴⁸

On 20 April 2022, Minister of Development Svenja Schulze expressed her desire to create an alliance to ensure global food security in the wake of the invasion of Ukraine.³⁰⁴⁹ The German government will submit the proposal to the World Bank Conference in Washington, DC in the following week.

On 25 April 2022, Minister Schulze pledged EUR10 million in World Food Programme funds to Lebanon in a state trip to Beirut.³⁰⁵⁰ Minister Schulze reiterated Germany’s commitment to establish an international alliance for global food security.

On 26 April 2022, Minister Özdemir hosted the commencement of the Anuga FoodTec trade fair in Cologne.³⁰⁵¹ Minister Özdemir called for a surge in agricultural innovation to generate “a change towards closed cycles and sustainable production.”

On 3 May 2022, the Parliamentary State Secretary of the Ministry of Food and Agriculture Manuela Rottmann met with fellow state secretaries at Klein & Groß daycare center in Brandenburg to discuss healthy and sustainable nutrition for children.³⁰⁵² Secretary Rottmann urged daycare centers around the country to ensure they are implementing the ecological and sustainable quality standards of the German Society for Nutrition.

On 9 May 2022, the Ministry of Food and Agriculture announced the possibility for small- and medium-sized agricultural enterprises to apply for low-interest liquidity guarantee loans to finance additional capital and expenses generated from the Ukrainian agricultural shortage.³⁰⁵³

On 10 May 2022, Parliamentary State Secretary of the Ministry for Economic Cooperation and Development Jochen Flasbarth led Germany’s delegation to the 15th World Soil Conference in Côte d’Ivoire.³⁰⁵⁴ Secretary Flasbarth expressed Germany’s interest in removing legal barriers to sustainable land use and to secure land rights for the preservation of fertile soils.

On 12 May 2022, Minister of Food and Agriculture Cem Özdemir addressed the celebration of the first International Plant Health Day, stressing the Ministry’s commitment to supporting research and development for protecting plant health in the face of climate change and the globalization of trade.³⁰⁵⁵

On 20 May 2022, Minister of Food and Agriculture Cem Özdemir spoke on World Bee Day regarding Germany’s commitments to food security through bee species protection.³⁰⁵⁶ Minister Özdemir announced the creation of the Joint Task Force of Improvement of Agricultural Structures and Coastal Protection (GAK), through which companies can receive funding for establishing flowering areas for bees and other pollinating insects. The Ministry also expressed goals to further reduce the use of pesticides and increase the national share of organic farming to 30 per cent.

On 23 May 2022, Minister Özdemir highlighted the importance of addressing the global food security crisis alongside the ongoing mass extinction and the climate crisis.³⁰⁵⁷ Minister Özdemir said that “it is

not the measures for climate protection and species protection that threaten food security, but the climate crisis and the extinction of species themselves.”

On 7 June 2022, German Federal Ministry of Food and Agriculture proposed plans to make animal husbandry labelling mandatory.³⁰⁵⁸ The Animal Husbandry Labelling Act would make it mandatory for certain food products to have labels with information about the farming method of the animals that are sold to the consumer as food. This act hopes to encourage more sustainable and ethical animal farming practices by producers.

On 24 June 2022, Government of Germany hosted the Ministerial Conference “Uniting for Global Food Security.”³⁰⁵⁹ Minister for Foreign Affairs Annalena Baerbock, Minister for Economic Cooperation and Development Svenja Schulze and Minister of Food and Agriculture Cem Özdemir represented the government and hosted the event.³⁰⁶⁰ Discussions highlighted collaboration across institutions and regions to enhance food security worldwide.

On 29 June 2022, Ministry of Food and Agriculture launched a virtual kick-off event to increase communal participation in the development of Germany’s 2023 nutrition strategy.³⁰⁶¹ At the event, Minister of Food and Agriculture Cem Özdemir expressed the government’s desire to encourage citizens to eat well as a fundamental step in the sustainable food transition.

On 8 July 2022, Minister Özdemir praised the efforts of the Standards and Trade Development Facility (STDF) in plant protection, food security and animal health.³⁰⁶² He announced EUR150,000 in funding to the international organization, stating that the development of sustainable food systems in the Global South is essential to global food security.

On 11 July 2022, Ministry of Food and Agriculture started a cooperation project with the Ministry of Agriculture, Livestock and Fisheries of Argentina to promote innovation in the sustainable agricultural sector.³⁰⁶³ This project has three components: crafting an institutional framework for agricultural innovation, promoting the AgTech sector and facilitating the exchange of scientific and agricultural research data.

On 22 July 2022, Minister Özdemir announced his support for the European Commission’s decision to suspend the Common Agricultural Policy’s scheduled crop rotation to ensure a viable amount of wheat for the coming agricultural seasons, at the expense of soil health.³⁰⁶⁴ Minister Özdemir remarked

that the decision illustrates that “sustainability and food security are two sides of the same coin,” urging that European Union members should use the following year to improve domestic harvest procedures.

On 26 July 2022, Minister Özdemir announced a project to reduce the use of peat in commercial horticulture by 2030.³⁰⁶⁵ The project aims to fund research to develop less carbon-heavy alternatives and create initiatives to encourage gardening companies to transition to such alternative materials.

On 16 August 2022, Ministry of Food and Agriculture increased the maximum available aid for fisheries suffering from the economic fallout of the war in Ukraine and heightened operating costs in the North and Baltic Seas.³⁰⁶⁶ This initiative allows fisheries to receive up to EUR75,000 in subsidies, without application.

On 12 September 2022, Ministry of Food and Agriculture announced the preparation of a ban on the domestic production and exportation of a selection of dangerous pesticides that are currently banned for use in the European Union.³⁰⁶⁷ The bill will take the form of the Plant Protection Act and is due to be drafted by the end of the year.

On 20 September 2022, Chancellor Olaf Scholz attended the UN World Summit on Food Security.³⁰⁶⁸ At this meeting, discussions addressed various issues related to global food security with other leaders, including representatives from Japan and the United States.

Germany has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by expanding research on healthy soil practices, resilient food systems by negotiating fishing quotas in the North Sea, agriculture innovation through its domestic sponsoring packages for start-ups and increased access to finance through foreign investment in developing food systems.

Thus, Germany receives a score of +1.

September 2022. Access Date: 23 September 2022. https://www.mofa.go.jp/ecm/rs/page6e_000303.html

On 24 May 2022, an initiative for climate change was announced by the “Quad countries:” Japan, India, Australia and the United States.³⁰⁶⁹ This initiative in part addresses promoting sustainable agricultural endeavors as well as promoting food security.

India has partially complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by studying clean energy and resilient food systems by collaborating with partners overseas. However, its lack of progress in promoting innovative technology and increasing access to finance through responsible investment in agriculture and food systems equates a partial compliance with its commitment.

Thus, India receives a score of 0.³⁰⁷⁰

Indonesia: +1

Indonesia has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 11 January 2022, Minister of Agriculture Syahrul Yasin Limpo announced the IP 400 Planting Acceleration Program which ensures sustainable and resilient food supplies under climate change anomalies.³⁰⁷¹ SYL explained the plan as a modern method of four planting times a year to achieve and strengthen rice self-sufficiency. Regent of Klaten Sri Mulanyi supported the program and projected a 1000 ha’ IP 400 rice-covering in 2022. Director General of Food Crops Suwandi added that the program includes a replacement of outside seeding with culik, dapog or tray system, agricultural mechanization, reduction of chemical fertilizers, the updated cropping pattern, rotation of water usage on agricultural activities and implementation of integrated farming towards zero waste.

On 25 January 2022, the Government of Indonesia received Australian Minister for Agriculture and Northern Australia David Littleproud on a visit to strengthen regional partnership in agricultural trade and relations.³⁰⁷² Three days later, the two countries signed the Indonesia-Australia Memorandum of Understanding on Agricultural Cooperation, which aims to “facilitate mutually beneficial trade” and contains taskforces focusing on “livestock and animal products, crop and plant products, modern

systems and processes, as well as agriculture research and education” to help build resilient food systems and promote agriculture innovation.³⁰⁷³

On 25 January 2022, Minister Limpo proposed the ToT smart farming plan across the country to increase competence of agricultural human resources to boost productivity, high-value agricultural production and increase crop yields in quantity and quality.³⁰⁷⁴ Head of the Agricultural Human Resources Extension and Development Agency Dedi Nursyamsi mentioned that smart farming is an adaptive response to future’s population growth and land shrinkage due to technological development.³⁰⁷⁵ The plan includes the use of bio-technology products such as balanced fertilization, agricultural automation and high-yielding varieties to make Indonesia’s agricultural production more effective and sustainable.

On 27 January 2022, Minister Limpo concluded his meeting with Minister of Agriculture and Water for Northern Australia David Littleproud. The Minister announced that Indonesia’s cooperation with Australia will involve economic collaboration in the strengthening of the livestock and animal products sub sector.³⁰⁷⁶ He indicated three significant commitments of this cooperation: availability and stabilization of the meat supply and importation in Indonesia, agricultural investment from both countries, and education and work opportunities of young farmers to maintain a balance in agricultural production.

On 27 January 2022, Minister Limpo announced the goal of creating a sustainable and resilient agriculture system in dealing with different crises such as poverty and hunger.³⁰⁷⁷ He stressed food security as one of Indonesia’s main focuses in the future and said that: “The G20 presidential working group on agriculture must identify three main issues, namely building a resilient and sustainable food system, promoting an open food trade and thirdly encouraging innovative agricultural businesses through digital agriculture.” As emphasized in the speech, the agricultural working group will conduct research on ways to develop a sustainable agricultural system in using modern methods. Minister Limpo expressed his optimism towards new agricultural innovations, institutions and breakthroughs with the help of the working group.³⁰⁷⁸

On 31 January 2022, Minister Limpo announced the implementation of the 2022 Agricultural Development policy which includes five programs: Quality Food Availability, Access and Consumption Programs, Industrial Value Added and Competitiveness Program, Science and Technology Research and Innovation Program, Vocational Education and Training Programs and

Manage Support Program.³⁰⁷⁹ The Minister explained that these programs will be funded and facilitated through KUR funds in the agricultural sector to ensure a boost in food production, agricultural competitiveness and performance.

On 30 March 2022, Secretary General of the Ministry of Agriculture Kasdi Subagyo emphasized the significance of open access to world food and agripreneurship innovation through digital agriculture at the G20 deputy agriculture meeting.³⁰⁸⁰ Subagyo explained his use of the term “open access” as “no borders from any country which led to an interchange and share of production with countries that lack.” Subagyo also indicated the goal to anticipate and adapt to global warming by sustainable cropping patterns and developing agriculture.

On 23 May 2022, Director of Plantation Seeds, Directorate General of Plantations, Ministry of Agriculture M. Saleh Mokhtar announced the progress of seed DNA tests on plantation plants.³⁰⁸¹ According to Mokhtar, the seed DNA test will provide planters with superior seeds for crops, smoothen the planting process and increase the rate of success in harvesting plantation crops. With an umbrella of new regulations and laws, Mokhtar expressed his hopes for the project’s positive benefits that smallholders of agricultural lands will receive.

On 30 May 2022, Inspector General of the Ministry of Agriculture Jan Samuel Maringka demanded his staff to strengthen national agricultural development guarding through the synergy of the government’s internal supervisory apparatus (APIP) with law enforcement officers (APH).³⁰⁸² According to Maringka, although the agricultural sector has become strategic and can support the national economy positively, the strengthening has to be carried out to realize food sovereignty through timely, quality and targeted control functions. Maringka proposes a strengthening plan to build synergy between APIP and APH to create a secured, advanced and independent modern agricultural development with refocused supervision. Maringka also indicated that the refocus is not only limited to a budget but also on faster performance and a more accurate reporting system to fight against the pandemic and climate change.

On 8 June 2022, Indonesian Ministry of Agriculture encouraged the digitalization of the agricultural sector to help bolster food security at the 20th Focal Point for Cooperation in the Agriculture and Food Security Information System (AFSIS) session.³⁰⁸³ Head of the Indonesian AFSIS Delegation, Anna Astrid, explained how Indonesia adopted information and communication technologies that are useful in agricultural development, further increasing the capabilities of farmers.

On 12 June 2022, Minister of Trade Muhammad Lutfi met with representatives from other member states in Geneva, Switzerland for the 12th biennial WTO ministerial meeting.³⁰⁸⁴ Minister Lutfi emphasized the importance of addressing problems associated with food security and recalled the country's commitment towards the Public Stockholding for Food Security Purposes and Special Safeguard Mechanism.

On 26 July 2022, Minister of Agriculture Syahrul Yasin Limpo addressed three priority issues to be discussed in the G20 meeting held between 27 and 28 July 2022.³⁰⁸⁵ Minister Limpo highlighted the joint commitment of the G20 members to promote sustainability and resilience of the food system worldwide. The second issue was to develop an “open, fair, predictable and transparent agricultural trade system” to make food more affordable. The third issue was the “development of innovative agripreneurials through the digitalization of agriculture” to better support farmers, especially those living in the rural areas.

On 31 August 2022, Minister of Agriculture Syahrul Yasin Limpo announced the implementation of a new agricultural strategy to address various problems induced by the global food crisis.³⁰⁸⁶ The three main strategies featured the enhancement of “production capacity for commodities that control inflation,” the development of import substitutes and the increase of exports.

Indonesia has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agricultural innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by investing in green agricultural projects, resilient food systems by promoting flexible agricultural production, agriculture innovation by adjusting planting time and seed distribution and increase access to finance through responsible investment in agriculture and food systems by supporting smallholders of agricultural land.

Thus, Indonesia receives a score of +1.

On 4 November 2021, Minister of Agriculture Stefano Patuanelli announced a EUR300 million package for the recovery of the olive industry in Apulia following a Xylella bacterial outbreak.³⁰⁸⁷ The package directly allocated EUR120 million in income support to agricultural enterprises and EUR25 million to the diversification of Xylella-resistant crops in the region.

On 18 November 2021, the Ministry of Agriculture activated the Innovation Solutions in the Fish Sector online portal.³⁰⁸⁸ The new initiative aims to promote knowledge sharing of innovative practices among the aquaculture and fishing communities.

On 23 November 2021, Minister Patuanelli granted EUR30 million to the olive industry, with the intention of modernization and investment in new plants.³⁰⁸⁹ Priority funding is allocated to areas in need of improvements in irrigation management.

On 16 December 2021, the Ministry of Agriculture announced a EUR10 million package to support the pig sector, with EUR6 million guaranteed to improve livestock sustainability.³⁰⁹⁰ The ministry allocated a further EUR10 million to entrepreneurial and research activities within the beekeeping, hemp and nuts sector.

On 30 December 2021, the Italian government released a EUR2 billion package for agricultural enhancement, focused on risk management and the fortification of fishing, agricultural and aquaculture supply chains.³⁰⁹¹ Minister of Agriculture Stefano Patuanelli stated the package aims to advance Italy's "ecological, environmental and social transition."

On 7 January 2022, the Ministry of Agriculture announced the National Strategic Plan for the implementation of the Common Agricultural Policy of the European Union, with the objective of boosting sustainable competitiveness and innovation in the agricultural sector.³⁰⁹² The comprehensive plan includes EUR10 billion to support sustainable agricultural activity among farmers and a further EUR4.3 billion for organic farming and microbial resistance.

On 11 February 2022, Minister Patuanelli attended the National Conference on Risk Management in Agriculture to discuss the vulnerability of Italian farmers to climatic events.³⁰⁹³ Minister Patuanelli

announced that EUR700 million would be allocated to financially secure farmers in the agri-food industry during the sustainable transition.

On 11 March 2022, Minister Patuanelli participated in the G7 Agricultural Summit to address global challenges to food security resulting from the invasion of Ukraine.³⁰⁹⁴ Minister Patuanelli expressed his support for a global assessment of countries most vulnerable to food shortages and for cooperation through the World Food Programme and the United Nations Food and Agriculture Organization to address the challenge.

On 16 March 2022, Minister Patuanelli announced EUR20 million in funding for the fish and aquaculture sectors, as well as the approval of the Agricultural Risk Management Plan for 2022.³⁰⁹⁵ The plan includes financial resources to form a safety net around Italian farmers from catastrophic agricultural events.

On 29 April 2022, the Ministry of Agriculture reached a financial accord with the Italian regional governments on a support strategy for agricultural enterprises and initiatives.³⁰⁹⁶ The decree's goal is to "promote the biological and ecological conversion of the agri-food sector, develop integration between the players in the supply chain and ensure positive effects on the local economy."

On 4 May 2022, Minister Patuanelli attended the MacFrut 2022 Conference in Rimini to discuss challenges in global security, calling for European unity in tackling the agricultural crisis.³⁰⁹⁷ Minister Patuanelli called for sustainable agricultural policies and particular focus on food access in the poorest regions of the planet.

On 6 May 2022, the Ministry of Agriculture announced a EUR180 million loan package for small- and medium-sized agricultural, fisheries and aquaculture enterprises to ease the burden of the Ukrainian food crisis on domestic farmers.³⁰⁹⁸

On 10 May 2022, Minister Patuanelli participated in a joint-enterprise conference on organic agriculture and spoke on the Italian government's commitment to increase the presence of organic products in the supply chain.³⁰⁹⁹ Minister Patuanelli further expressed Italy's commitment to adhering to the Common Agricultural Policy of the European Union.

On 14 May 2022, Minister Patuanelli joined international counterparts at the G7 Agricultural Ministerial Meeting.³¹⁰⁰ Minister Patuanelli announced EUR5 million in funding to the United Nations Food and Agriculture Organization to support global agricultural and food systems, as well as Ukraine's agricultural system.

On 14 May 2022, Minister of Foreign Affairs Luigi di Maio participated in the G7 Foreign Ministers Meeting and collaboratively affirmed Italy's commitment to global food security.³¹⁰¹ The joint communiqué addressed support for Ukraine's agricultural sector, the global transition to sustainable agriculture and food practices in line with Agenda 2030 for Sustainable Development, and for knowledge sharing among global communities to encourage best sustainable practices in agriculture.

On 18 May 2022, Minister Di Maio announced a EUR5 million grant towards the FAO Food Coalition.³¹⁰² This is in addition to EUR 10 million already allocated to this platform.

On 15 June 2022, Minister Patuanelli signed a decree directing EUR500 million to the logistic development in aquaculture, fishing and agri-food sectors.³¹⁰³ The funding aims to support "business investments for the transition to more modern and sustainable forms of production." Forty per cent of the public spending will be directed to agriculture-intensive rural regions in the South.

On 1 July 2022, Minister Patuanelli announced an allocation of EUR144 million to extraordinary aid to the Italian livestock industry, having suffered significant indirect damage from the Russian invasion of Ukraine.³¹⁰⁴ In addition to this measure, the Ministry plans to issue a further EUR80 million to support livestock producers in the face of inflation in the cost of raw materials to be examined in the next State session.

On 3 August 2022, Ministry of Agriculture issued an inter-ministerial decree to support the sustainable transition of the livestock sector, aligning with the European Commission's Farm to Fork and Biodiversity 2030 Strategies.³¹⁰⁵ The plan specifically targets the development of a sustainable breeding model, the improvement of animal welfare and the reduction of antimicrobial resistance.

On 30 August 2022, Minister Patuanelli announced EUR150 million to improve agri-food logistics in Italian ports.³¹⁰⁶ The funds will support the reduction of environmental costs and emissions and the

and environmental sustainability within agricultural systems and will improve the profitability of both agricultural sectors.

On 15 May 2022, Prime Minister Kishida attended a press conference regarding his recent visit to the Okinawa Prefecture of Japan.³¹¹⁸ In this press conference, he mentions several issues including child poverty and how the region is affected by the American military presence, vowing to listen to the needs of the people. As poverty is connected to food security, this is an issue that falls under the scope of this commitment.

On 20 May 2022, the government allowed for an Emergency Grant of USD3 million to Sri Lanka.³¹¹⁹ This money would be used to provide access to food and medicine services to Sri Lanka through UNICEF and World Food Programme.

On 24 May 2022, an initiative for climate change was announced by the “Quad countries:” Japan, India, Australia and the United States.³¹²⁰ This initiative in part addresses promoting sustainable agricultural endeavors as well as promoting food security. Through this initiative, Japan announced JPY50 billion to be allocated towards water-related issues.

On 25 May 2022, Vice-Minister of Finance for International Affairs Kanda Masato announced a contribution of USD20 million towards the African Development Bank and African Development Fund.³¹²¹ The report addresses numerous concerns regarding food insecurity that have been worsened by the COVID-19 pandemic and is designed to improve access to food and healthcare.

On 31 May 2022, Prime Minister Kishida pledged USD6 million to Ukraine, as well as access to food and healthcare supplies.³¹²² This was a show of support from the Government of Japan, as well as a show of desire to promote access to food in the region throughout the conflict.

On 31 May 2022, the government released an article through Kizuna, their official magazine, about Japan’s work promoting the use of Artificial Intelligence (AI) in various facets of life, notably agriculture.³¹²³ This “AI Strategy,” which was announced in April, led the national government to set forth the Public/Private R&D Investment Strategic Expansion Program. One such effort highlighted has been from the National Agriculture and Food Research Organization, which developed a project to utilize artificial intelligence in order to eliminate agricultural pests.

On 6 June 2022, the 7th Japan-France Agricultural Policy Working Group was held in France.³¹²⁴ At this session, representatives from both Japan and France reaffirmed the importance of sustainable food systems.

On 12 June 2022, State Minister of Economy, Trade and Industry (METI) Hosoda Kenichi, State Minister of Agriculture, Forestry and Fisheries Takebe Arata, and Parliamentary Vice-Minister for Foreign Affairs Miyake Shingo, met with representatives from other member states in Geneva, Switzerland for the 12th biennial WTO ministerial meeting.³¹²⁵ Discussions highlighted issues related to food security.

On 17 June 2022, Prime Minister Kishida made a video message addressing several key issues at the Major Economies Forum on Energy and Climate Leaders Meeting.³¹²⁶ Among the commitments made broadly addressed the Government of Japan's commitment to food security, specifically addressing a decrease in chemical fertilizer use.

On 24 June 2022, Minister for Foreign Affairs Hayashi Yoshimasa attended a meeting hosted by the Government of Germany to promote food security.³¹²⁷ Minister Hayashi made several statements regarding global humanitarian and food concerns and the role of Japan in extending efforts in these areas.

On 5 July 2022, Government of Japan pledged approximately USD200 million towards relief of food insecurity globally.³¹²⁸ This aid will primarily be allocated to countries in Africa and the Middle East, as well as Ukraine. This effort is explicitly stated to be in line with their G7 commitments.

On 20 July 2022, Ministry of Foreign Affairs released a statement on the basic position on fisheries, outlining the importance of marine life in maintaining sustainable food systems.³¹²⁹ The report outlines the legality of Japanese fishery management as well as the role of the international community.

On 26 August 2022, Minister Hayashi attended the 8th Tokyo International Conference on African Development (TICAD 8).³¹³⁰ While there he had meetings with the foreign ministers of Gabon, Niger and Mauritius, discussing strengthening food security in Africa, among other topics.

On 27 August 2022, Prime Minister Kishida held a video conference with President of the Republic of Senegal Macky Sall.³¹³¹ Prime Minister Kishida stated various areas of cooperation between Japan

and Senegal, including fishery, and conveyed Japan's intention to continue contributing to the strengthening of food security in Africa.

On 20 September 2022, Prime Minister Kishida made a speech at the 77th session of the United Nations General Assembly.³¹³² Among the issues addressed were issues of global food security and the role that the Government of Japan will play, and has been playing, in furthering this goal. Specifically, he cites the revision of the Development Cooperation Charter to more align with this and other goals.

On 20 September 2022, Foreign Minister Hayashi attended the UN World Summit on Food Security.³¹³³ At this meeting, the Minister discussed various issues of global food security with other leaders, including representatives from Germany and the United States.

Japan has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by exploring ways to contribute to the global nutrition system, resilient food systems by promoting food security and agriculture innovation through initiatives featuring technological advancements. Meanwhile, more work is needed to increase access to finance through responsible investment in agriculture.

Thus, Japan receives a score of +1.

On 11 May 2022, the MAFRA announced that Korea plans to provide USD13 million worth of humanitarian aid for Syrian refugees and two neighboring countries, including food and water.³¹³⁶

On 3 June 2022, Ministry of Foreign Affairs of the Republic of Korea contributed USD3 million to the United Nations World Food Programme, specifically dedicated to the UN Flash Appeal for Ukraine and the Ukrainian refugee response plan in Moldova.³¹³⁷ Approximately USD2 million dollars of this donation would administer towards food and cash assistance.

On 30 June 2022, Ministry of Agriculture, Food and Rural Affairs implemented its “Agri-food Voucher Pilot Project,” which seeks to strengthen low-income people’s access to nourishing food, improve nutritional adequacy and improve access to agricultural products like fruits, vegetables and meat.³¹³⁸

On 29 July 2022, Ministry of Agriculture, Food and Rural Affairs announced a new food service industry plan aimed at making the country become a leader in the global food industry.³¹³⁹ Among some goals outlined in this plan are for the local food industry to work in collaboration with agricultural businesses and to support small food businesses.

On 12 August 2022, Ministry of Agriculture, Food and Rural Affairs announced that it would be partnering with the Korea Rural Community Corporation and the Agriculture, Forestry and Fisheries Credit Guarantee Fund to make it easier for young farmers to secure farmland by issuing guarantees for out-of-pocket expenses.³¹⁴⁰

On 12 September 2022, the World Food Programme announced that the Republic of Korea had provided USD1 million to its resilience-building efforts in Iraq.³¹⁴¹ The contribution will support the implementation of resilience-building activities seeking to improve sustainable agricultural production and food security in Iraq.

On 16 September 2022, the World Food Programme announced that the Republic of Korea had made a USD700,000 contribution to support its in-kind food assistance and school meal programmes in Lebanon.³¹⁴²

Mexico has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 7 December 2021, Minister of Agriculture and Rural Development Víctor Villalobos Arámbula pledged to expand the “Fertilizers for well-being” program and strengthen the guaranteed prices program in Nayarit.³¹⁴³ That state, which produces many important and lucrative crops, will have its agricultural productivity encouraged by funding from Mexico’s Development Bank. The minister highlighted that work is being done on the consolidation of the “Agromatrix” for the Development Plan of the Agri-food Sector of Nayarit, which intends to boost the territorial development of agricultural and aquacultural fishing chains, as well as fortify the link with different institutions in that sector. To encourage these developments, the President of Mexico has promised free fertilizer to the region’s farmers and support from all three levels of government, in addition to direct support for the fishermen of Nayarit.

On 28 December 2021, Diconsa, a government owned chain of stores selling basic goods distributed 22,000 food packages to 405 localities in Oaxaca State at the request of the National Institution for Indigenous Peoples.³¹⁴⁴ These packages included oil, rice, sugar and other essential and nutritious ingredients and aim to adequately feed many members of a disadvantaged group.

On 2 January 2022, Food Security Mexico (Segalmex) set up a system to guarantee a “food basket” consisting of various essential ingredients and items to Mexicans in the most vulnerable societal groups.³¹⁴⁵ This consists of those with great economic and social difficulties, including those living in poverty, Indigenous Mexicans, Afro-Mexicans and seniors. Through the Program of Rural Supply (PAR), Diconsa supply stores will be set up in areas where adequate supply does not exist. Furthermore, the target populations, who are said to consist of at least 15 per cent of the population, will be aided by electronic terminals to assist with financial services and receiving remittances. Deals will also be conducted with the three levels of government to ensure the resilience and sustainability of the program.

On 20 January 2022, the Ministry of Agriculture and Rural Development established Nopal Fodder nurseries in Zacatecas state.³¹⁴⁶ This type of fodder requires less water, making it environmentally beneficial and easier to grow in large quantities. Therefore, farmers can feed their cattle more frequently and effectively increase the number of their livestock. This innovation will be funded with USD93,000 and is part of the Strategic Project for the Establishment of Nurseries for the Multiplication of Cladodes of Nopal Forage in Arid Zones of Mexico, which will be implemented in the states of Chihuahua, Sonora, Zacatecas and the Lagunera Region.

On 4 February 2022, Minister Arámbula and his American counterpart discussed bilateral cooperation, particularly regarding expanding their respective agri-food sectors.³¹⁴⁷ The meeting stressed the importance of solidifying ties and using technology to ensure the highest production quality, in coordination with economic and environmental needs. One action taken to demonstrate what the ministers hope to be a permanent and resilient relationship is the trade of Mexican avocados and American strawberries.

On 26 April 2022, the Ministry of Agriculture and Rural Development and Palestine's Special Delegation signed a statement of intent for technical cooperation and cultivating food in arid areas.³¹⁴⁸ There will be a transfer of advanced technology for the sustainable maintenance of soil and water resources with the goal of improving food security. Mexico aims to contribute the knowledge it gained from dealing with challenges faced by farmers in dry Northeastern Mexico to help solve the same issues facing Palestinian agriculturalists.

On 29 April 2022, the government of the state of Guanajuato and the Ministry of Agriculture and Rural Development revealed plans to combat diseases and pests that impact strawberries.³¹⁴⁹ To this end, the National Service for Agrifood Health, Safety and Quality (SENSICA) will conduct studies regarding the types of pests, fungi and infections that impact the growth of strawberries and other small fruits grown in the region.

On 30 April 2022, the Ministry of Agriculture and Rural Development announced that over 329,000 farmers in Guerrero State had benefitted from its program to distribute fertilizer for the fourth year in a row.³¹⁵⁰ Almost half of all farmers who benefitted were women, and 30.8 per cent of beneficiaries resided in areas with indigenous populations.

On 11 May 2022, Minister Arámbula and Ambassador to Haiti Alberto Camarena Ávalos jointly announced a cooperation plan with Haiti.³¹⁵¹ Measures such as sending specialists over to conduct studies on soil and sending agricultural machinery are part of the plan to improve food security in Haiti. The partnership will expand the cultivation of local fruits and vegetables, increasing sustainability throughout rural Haiti.

On 13 May 2022, Minister Arámbula announced a plan to train 14,000 agronomists to restore parts of the Mexican countryside.³¹⁵² The program intends to ensure food security and the well-being of rural families. Most trainees contributing to this restoration project are educated in rural and agricultural development.

On 27 May 2022, Mexico and Argentina held a bilateral meeting aimed at increasing the exchange of various crops and meats, as well as agricultural equipment, machinery and technology.³¹⁵³ Foods discussed in relation to exports included Bovine and Pork meat, grains such as rice and beans, as well as fruits like citrus and apple. The Mexican delegation, led by Minister of Agriculture and Rural Development Víctor Villalobos Arámbula and Argentina's delegation, headed by Minister of Foreign Affairs, International Trade and Worship Santiago Cafiero, emphasized the importance of fertile Latin America in this current era of fear over food insecurity.

On 27 May 2022, the Ministry of Agriculture and Rural Development declared eight municipalities in the states of Michoacán, Nayarit and Guerrero as Avocado Borer Free Zones.³¹⁵⁴ The absence of these pests, of which three varieties are present in Mexico, will ensure that small and medium farmers can freely grow and trade their crops. This recognition is valid for 24 months.

On 30 May 2022, the Ministry of Agriculture and Rural Development began distributing free fertilizer in Chiapas, Morelo and Tlaxcala states as part of the “Fertilizers for Wellbeing” program.³¹⁵⁵ It also increased quantities distributed in numerous states, such as Guerrero, where distributions increased by 64 per cent, reaching 212,488 farmers. Increases of up to 83 per cent in fertilizer delivered have been observed in Northern Mexico.

On 7 June 2022, Secretary of Agriculture and Rural Development Víctor Villalobos Arámbula and Secretary of Economy Tatiana Clouthier Carrillo inaugurated the National Forum on Food Security

and Climate Change.³¹⁵⁶ Its aim is to gather experts in fields relevant to food security and ensure the population of Mexico is well fed despite the recent conflict in Eastern Europe.

On 10 June 2022, Government of Mexico released a statement alongside the governments of Argentina, Brazil, Canada and the United States regarding the role of agricultural exports for food security.³¹⁵⁷ Among the commitments made include a dedication to maximize agricultural production and promote humanitarian efforts through ensuring food security.

On 12 June 2022, Secretary of Agriculture and Rural Development Víctor Villalobos Arámbula announced the preparation of a National Livestock Plan in tandem with the National Confederation of Livestock Organizations.³¹⁵⁸ The main goals of this plan include ensuring affordable meat prices in Mexico, furthering health and safety measures regarding livestock and expanding livestock export markets.

On 20 July 2022, Secretary of Agriculture Victor Villalobos Arámbula met with various government officials to plan the drafting of legislation to protect pollinators, such as bees and hummingbirds.³¹⁵⁹ The FAO estimates that 87 per cent of the crops around the world need pollinating creatures to grow.

On 18 August 2022, Government of Mexico took various measures to mitigate the effects of a drought in the states of Chihuahua, San Luís Potosí, Durango, Sonora and Tamaulipas.³¹⁶⁰ Ministry of Agriculture and Rural Development introduced crops with low water requirements across 238,322 hectares of land. These crops include Nopal, sorghum and oats. Another program, featured a team of technicians supported by the Mexican Air Force, releases silver iodide molecules onto clouds to promote precipitation. Additionally, soil conservation practices have been promoted to make soil usage more efficient.

On 28 August 2022, Mexican Food Security (Seglamex) opened new “lecherías” (dairy stalls) across the country.³¹⁶¹ The program now provides nutritious milk to around five million Mexicans. Those eligible are typically in need of dairy, such as adolescents, the elderly and pregnant/lactating women. The program aims to make sure both rural and urban Mexicans have access to milk for a cheap price of USD0.55 for a two-litre container.

On 9 September 2022, Government of Mexico announced that the country's free fertilizer program would advance to include more than 94 per cent of eligible farmers in the 9 states considered.³¹⁶² This comes with the delivery of 255,510 tons of input. The program targets small-time farmers in marginalized states and aims to help vulnerable groups; 46 per cent of recipients are women, and 30 per cent of the input went to farmers in communities with indigenous populations. In the future, the Mexican states aim to increase the number of beneficiaries to at least 700 thousand via the production and import of ammonium nitrate fertilizer.

On 13 September 2022, Minister of Agriculture Victor Villalobos Arámbula and South African ambassador to Mexico Dennis Thokozani met to discuss ways to form resilient global food systems in the face of recent challenges, such as rising global prices and unprecedented climate change.³¹⁶³ Particularly, both countries aim to fight desertification and will increase the exchange of technology and agri-food products to combat this issue.

On 20 September 2022, Secretary of Agriculture and Rural Development Victor Villalobos Arámbula met with Moroccan ambassador to Mexico Abdelfattah Lebbar to discuss bilateral agricultural cooperation.³¹⁶⁴ The stated goal of the meeting was to increase sustainability and innovation between the two countries, thereby increasing output and food security in Mexico and Morocco. Meetings will be held with Mexican producers to increase sales of Mexican agricultural and dairy products to Morocco, while Mexico will seek to acquire ammonium fertilizer from Morocco.

Mexico has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by distributing free fertilizers to farmers, resilient food systems by gathering experts to study food security and climate change, agriculture innovation by encouraging collaboration with both nearby and overseas partners and increased access to finance through responsible investment in agriculture and food systems by supporting small and medium farmers to grow and trade their production.

Thus, Mexico receives a score of +1.

On 9 November 2021, Russia donated 118 tonnes of fortified vegetable oil to the Lao People's Democratic Republic as one of Russia's contributions to the World Food Programme (WFP).³¹⁶⁵

On 18 December 2021, 36 tonnes of Russian humanitarian aid, consisting of food products and medications, was delivered to Kabul.³¹⁶⁶

On 10 February 2022, Russia transferred 193.5 tonnes of humanitarian aid to the government of Djibouti at the WFP regional logistics hub there as part of Russia's voluntary RUB2 million targeted contributions to the WFP fund for 2022.³¹⁶⁷

Russia has partially complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by funding WFP and sustainable food systems by donating overseas. However, its lack of progress in promoting agriculture innovation and increasing access to finance through responsible investment in agriculture and food systems equates a partial compliance with its commitment.

Thus, Russia receives a score of 0.

Analyst: Mohammad Rasoul Kailani

Saudi Arabia: +1

Saudi Arabia has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 1 December 2021, Saudi Arabia's Minister of Environment, Water and Agriculture signed a cooperation agreement with the Executive Secretary of the United Nations Convention to Combat Desertification to reduce land degradation and conserve terrestrial habitats.³¹⁶⁸ Saudi Arabia will assist by providing funds for the initiative to meet its goals. This also includes supporting biodiversity conservation, building resilience to and mitigating the effects of climate change and drought, as well as contributing to food security and providing incomes and jobs to local citizens. The agreement is a part of the wider G20 initiative to halt land degradation.

On 14 January 2022, the Saudi Agricultural Development Fund held a virtual meeting with wheat farmers from across the Kingdom to discuss agricultural development.³¹⁶⁹ To accelerate the agricultural development of wheat farming, the Agricultural Fund has organized a mechanism wherein licensed wheat farmers may receive up to USD106,000 in government funding. Wheat farming has been

particularly targeted for its value to food sustainability; it feeds many people and its cultivation does not consume as much water as other crops.

On 25 January 2022, a spokesperson for the Saudi Agricultural Fund declared that it expects to distribute around USD800 million in this calendar year, up from USD533 million in 2021.³¹⁷⁰ The spokesperson stated the funds will go to various endeavours, including greenhouse projects, poultry and fish farming, as well as financing the Saudi program to support rural development. Additionally, the fund will finance supply chains and operate using modern technologies. Other projects such as food factories and marketing will also be subsidized. The funding will also support rural agricultural development, finance agricultural investment projects abroad and technology to rationalize consumption of water and electricity, thereby increasing production. This falls in line with Saudi Arabia's "Vision 2030" to increase self-sustainability.

On 31 January 2022, the Saudi Minister of Environment, Water and Agriculture signed a memorandum of understanding with the Iraqi Minister of Agriculture, along with different government officials from both countries.³¹⁷¹ They pledged to cooperate in various areas, including increasing livestock, fisheries and agriculture with the aim of increasing food security in the two Middle Eastern nations. These endeavours to solidify food sustainability will involve much monetary cooperation and the strengthening of Iraqi-Saudi trade.

On 2 February 2022, the Saudi Ministry of Environment, Water and Agriculture invited companies, foundations and corporations that have experience in harvest value chain development to participate in an initiative to do research and provide guidance to expand the harvesting of crops in Jizan Province.³¹⁷²

On 9 February 2022, Saudi Arabia's Minister of Environment, Water and Agriculture visited the Eastern Province to monitor the progress of the various environmental projects there and ensure their resiliency.³¹⁷³ These include the agricultural project in the Abu Ma'an area and the agricultural project on the outskirts of Dammam. The stated goal of the visit was to ensure that the region is well-vegetated, in line with the country's goals for Vision 2030.

On 7 March 2022, Saudi Arabia and New Zealand struck up agreements in The Eighth Session of the Saudi-New Zealand Joint Ministerial Committee.³¹⁷⁴ The Saudi delegation was headed by The Minister of Environment, Water and Agriculture, Abdul Rahman bin Abdul Mohsen Al Fadhli, while New Zealand's delegation was headed by Minister of Commerce and Export Growth, Damien O'Connor.

The countries agreed to cooperate on food security and ensuring quality of food products, amongst other areas, and will set up through diplomatic channels to ensure commitment to the stated goals.

On 28 March 2022, the Saudi-Nigerien joint committee held its first session in Riyadh.³¹⁷⁵ The Saudi Delegation was headed by the undersecretary of the Ministry of Environment, Water and Agriculture, Abdulaziz Bin Marahib Al Shibani, while Niger's delegation was headed by the His Excellency the Secretary-General of the Ministry of Foreign Affairs and Cooperation of the Republic of Niger, Ado El Haj Abdo. The two countries pledged to cooperate on many issues, including agriculture and the environment.

On 18 April 2022, Saudi Arabia announced its first smart farm project.³¹⁷⁶ Multinational companies will cooperate with the Saudi supermarket chain Tamimi Markets in order to build it. Smart Farms require far less water to grow vast amounts of produce, an important innovation considering Saudi Arabia's arid climate. Saudi Arabia's "Vision 2030" involves weaning off food imports as the population grows, leading for a push towards locally grown food.

On 25 April 2022, Saudi Arabia's Ministry of Environment, Water and Agriculture announced four investment opportunities for agriculture and livestock in the Qassim, Makkah and Jizan provinces.³¹⁷⁷ In Jizan, two projects will assist farmers in breeding, raising and fattening sheep. In Makkah governorate, plans for a large veterinary hospital are underway, and in Qassim governorate, the government is funding the construction of greenhouses. These endeavors across the country have been declared with the intent of helping Saudi Arabia achieve food security.

On 29 April 2022, the King Salman Humanitarian Aid and Relief Center, one of Saudi Arabia's official aid agencies, contributed to its current project in Yemen via the delivery of Ramadan food parcels.³¹⁷⁸ 112 tons of food baskets were delivered in Ma'arib governorate, while 159 tons were delivered to Al Mahrah governorate. The donations are a part of the "Saudi Ramadan Eta'am initiative" which aims to benefit 900,000 people in 19 countries via the donation of 156,993 food parcels.

On 26 May 2022, Saudi Arabia concluded its participation at the World Economic Forum in Davos, Switzerland.³¹⁷⁹ The forum touched on several major political, healthcare and environmental issues affecting the world at the moment. The Saudi delegation has signed three important agreements, the third of which seeks the implementation of food systems, security stability and smart farms.

On 29 May 2022, the International Exhibition and Forum and Afforestation Technologies, inaugurated by the Saudi Minister of Environment, Water and Agriculture, kicked off in Riyadh.³¹⁸⁰ The goal of the conference is to maintain food security and combat desertification, particularly in the Middle East.

Over 90 speakers from 20 countries and organizations around the world will engage in 20 dialogue sessions and workshops discussing more than 50 scientific papers.

On 5 July 2022, Saudi Arabia announced the distribution of USD5.32 billion to alleviate the effects of rising global food prices.³¹⁸¹ These funds have been allocated to various social security programs, and a significant portion has been assigned to small-scale farmers and livestock herders to be able to weather the crisis. The various programs and funding have been set up to ensure that an efficient and resilient food system is running.

On 31 July 2022, Saudi Arabia dedicated USD27.93 billion for domestic water projects across five years.³¹⁸² The funding will be spread out across 1,355 projects, thereby increasing agricultural output and sustainability in the country while protecting the environment.

On 21 August 2022, Saudi Arabia initiated the “its time has come” program, with its goal being to educate the local population about local produce and the benefits of consuming these foods during the season.³¹⁸³ The increase in fruits grown in Saudi Arabia and the efforts to become domestically self-sufficient are a part of Vision 2030. Last year, 900,000 tons of seasonal fruits were produced for the local market. The country is completely self-dependent on the production of figs, watermelon and dates.

On 26 August 2022, Saudi Minister of Agriculture Abdul Rahman bin Mohsen Al-Fadhli and Malaysian Minister of Agriculture and Food Industries Ronald Kiandee agreed to increase technological and commercial cooperation in food security.³¹⁸⁴ The two delegations compared areas in which each country has a comparative advantage to maximize economic benefits as both Malaysia and Saudi Arabia aim to become self-sufficient.

On 25 September 2022, the National Cooperation Council signed agreements with various Saudi companies to ensure fair financial practices, marketing of Saudi products abroad and more effective methods of distribution.³¹⁸⁵ Deputy Minister of Environment, Water and Agriculture Mansour bin Hilal Al-Mushaiti, observed these meetings with the goal of having Saudi farmers market their products across the world to reinforce global food systems.

Saudi Arabia has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. systems by increasing collaboration overseas, agriculture innovation by investing in smart farm projects and increased access to finance through responsible investment in agriculture and food systems by encouraging monetary cooperation.

Thus, Saudi Arabia receives a score of +1.

Analyst: Mohammad Rasoul Kailani

South Africa: 0

South Africa has partially complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 30 November 2021, the Department of Agriculture, Land Reform and Rural Development opened the second phase of the Presidential Employment Stimulus.³¹⁸⁶ This second phase addresses unemployment for subsistence farmers. The opening of this second phase aims to make farming more sustainable and improve the standard of living for farmers producing at a smaller scale.

On 27 May 2022, Minister of Agriculture, Land Reform and Rural Development Thoko Didiza announced the carrying out of a part of the Departmental Farmer Support Programme to assist farmers maximize agricultural production and maintain their supply.³¹⁸⁷ This aims to ensure food security and help the country's economy grow.

On 21 July 2022, South Africa signed an Intergovernmental Cooperation Agreement with Cuba, aimed at increasing the exchange of information regarding plant and animal health.³¹⁸⁸ With increased knowledge about pest prevention and better research and training, both countries aim to improve food production.

On 5 August 2022, Minister of Trade, Industry and Competition announced the suspension of the imposition of Anti-Dumping Duties on poultry from 5 countries for 12 months.³¹⁸⁹ This aims to contain the rise in food prices and ensure food security for people.

On 13 September 2022, South African ambassador to Mexico Dennis Thokozani met with Mexican Minister of Agriculture Victor Villalobos Arámbula to discuss ways to form resilient global food systems given recent challenges, such as rising global prices and unprecedented climate change.³¹⁹⁰

Turkey: +1

Turkey has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 3 March 2022, the government relaxed import requirements for agricultural shipments coming in from Ukraine.³¹⁹¹ Oilseed, grain and sunflower oil import certificate and license requirements were removed. This action provides the country with security as they approach potential depletion of their current stocks. This action also works towards creating a more sustainable food system in the country, while the Russia-Ukraine conflict continues to affect the agricultural imports into the country.

On 10 March 2022, the Ministry of Agriculture and Forestry temporarily banned the exports of certain agricultural goods to stabilize their domestic goods conditions and mitigate inflation.³¹⁹² These products include select cooking oils, oilseeds, margarine, lentils and dry beans. This action and temporary ban are an effort on the member's part to create and maintain a stable food system.

On 11 March 2022, Minister of Agriculture and Forestry Vahit Kirişci committed payments of TRY116 million for agricultural development and farmer support.³¹⁹³ The funding will be going towards the production of wheat, barley, rye, oats and triticale products. Producers will be paid a total of TRY116 per hectare, with diesel fuel, fertilizer and certified seeds. The initial agricultural support budget for 2022 has been increased from TRY25.8 billion to TRY3.2 billion.

On 22 March 2022, Turkey inaugurated 325 water-related facilities across the country.³¹⁹⁴ These facilities will better preserve and effectively use the water supply across 70 provinces. The Government of Turkey has invested TRY4.6 billion in the projects, which will contribute towards the country's

economy and create agricultural jobs for approximately 325,000 people. This action is a crucial part for the country's ability to create efficient irrigation.

On 28 March 2022, Deputy of the Nationalist Movement Party Saffet Sancakli, announced the increase in minimum wage, pensions and decreased borrowing costs for farmers starting July 2022.³¹⁹⁵ According to Saffet Sancakli, President Recep Tayyip Erdoğan, has signed a decree and declared that Turkey will pay 75 per cent of the debts of their farmers. These changes are in response to the growing inflation and cost of living in the country. This action fosters sustainable food systems and provides access to finance for farmers.

On 28 March 2022, President Erdoğan announced reductions on value-added tax on staple foods and commodities of the country.³¹⁹⁶ President Erdoğan announced an 87.5 per cent decrease, from 8 per cent to now a 1 per cent value-added tax. Along with the staple foods, the value-added tax has been lowered to 1 per cent on all certified seeds and saplings. There will also be a 55 per cent decrease in electricity usage for residential and agricultural irrigation. The government also created a task force dedicated to inspecting prices along with a mobile app in order to help citizens find cheaper products. This announcement fosters growth and creates a sustainable food system in the country in the wake of inflation.

On 2 April 2022, President Erdoğan announced the Ministry of Agriculture and Forestry Meat and Dairy Institution will make payments of TRY2,500 per cattle slaughtered, sold or made in the month of April.³¹⁹⁷ This decision was placed in effect in order to contribute towards food sustainability in the livestock sector, to protect breeders and consumers, regulate the market, and prevent mass price fluctuations in the country.

On 8 April 2022, Minister Kirişci announced the transfer of funds up to TRY150 million to farmers across the country.³¹⁹⁸ The funding will be directed towards paying for cereals, legumes and grain corn. Beekeeping support will also be provided within the scope of rural development support.

On 15 April 2022, Minister Kirişci announced a scope of agricultural support payments of TRY3 billion 582 million.³¹⁹⁹ The initiative attempts to provide farmers and producers with security. The support payments were provided for field-based additional input, diesel and fertilizer support, animal gene and resource support.

On 29 April 2022, Ministry of Agriculture and Forestry committed to providing TRY156 million to breeders in 7 different fields.³²⁰⁰ These fields include beehive support, pine honey compensation support, queen breeding support, plant quarantine, certified seed usage support and heifer purchase support. These support structures provide farmers and breeders with financial support to secure and accelerate their fields. Providing beekeepers with investments secures the future for the country's vegetation as they are an integral part in the production of agriculture.

On 13 May 2022, the Ministry of Agriculture and Forestry committed to make support payments of TRY3.2 billion to farmers and growers in six different fields.³²⁰¹ Majority of the support is provided to oilseed plants and solid organic fertilizer. The remainder of the funding was provided to certified seed production, cereals-legumes grain and corn support, and animal gene resources.

On 17 May 2022, the Ministry of Agriculture and Forestry distributed 500,000 seedlings to farmers in the province of Ankara.³²⁰² Of the seedlings provided, 160,000 were tomatoes, 170,000 peppers and 170,000 cucumbers. Domestic production has been made a priority by the Turkey government as it seeks to create sustainable and resilient food systems.

On 27 May 2022, the Ministry of Agriculture and Forestry provided TRY1 billion 44 million in support of the country's breeders.³²⁰³ The funding was distributed to small cattle breeding, fattening male cattle support, herd management support, animal diseases compensation, oilseed plants support, angora goat support and meat market regulation support. These sectors are integral to the agricultural sector. Through providing breeders with financial support, the country provides responsible investment in agriculture and food systems.

On 1 June 2022, the Ministries of Agriculture and Forestry and the Ministry of National Education co-signed the Vocational and Technical Education Cooperation Protocol.³²⁰⁴ The cooperation protocol introduces and trains students about the agriculture and food sectors. This partnership denotes the importance Turkey holds in domestic agricultural production and works towards the commitment to create sustainable food systems.

On 6 June 2022, Minister Kirişçi announced a 6-item package related to food security at the Food Security Crisis Mediterranean Ministerial Dialogue.³²⁰⁵ The 6-item package includes programs to

bolster food security, food assistance for refugees and funding for seed and other agricultural technical expertise.

On 30 June 2022, Minister of Agriculture and Forestry Vahit Kirişci announced the increase in purchase prices of the Turkish Grain Board.³²⁰⁶ The purchase price of wheat will be increased to TRY400 per ton, and TRY200 for barley. Producers will be paid TRY1000 per ton of wheat and TRY500 per ton of barley. This increase in prices will be beneficial for producers who need new purchases.

On 1 July 2022, the Ministry of Agriculture and Forestry transferred support payments of TRY741 million to Turkish farmers under the scope of agricultural support payments.³²⁰⁷ TRY346 million out of the payment was under the scope of Herd Growth and Renewal. TRY283 million was provided for Raw Milk support, TRY26 million under the scope of Agricultural Extension and Consultancy support, and TRY24 million was provided under the Animal Diseases Compensation support system. Under the scope of Grain Oil Support, TRY24 million was deposited, while TRY17 million was deposited under the scope of Rural Development investment support plans. TRY12 million was provided under the scope of cereals, legumes and grain support. TRY6 million has been provided under the scope of Animal Gene Resources support. The Expert Hands Project support funded TRY4 million out of the sum payment. TRY1 million was provided within the scope of the Rehabilitation of Traditional Olive Gardens support, and TRY1 million was provided under the scope of Area Based Yield Loss. Under the scope of Small Scale Fishermen Damages, TL921,000 was provided. Within the scope of Organic Beekeeping support, TRY827,865 was deposited. These support systems will provide Turkish farmers and producers with financial security.

On 7 July 2022, Minister of Agriculture and Forestry Dr. Vahit Kirişci announced the transfer of TRY833.6 million in agricultural support.³²⁰⁸ TRY759 was provided in the support of raw milk producers, and TRY39 has been provided under Rural Development Investments. Additionally, TRY25 million was allocated for bovine disease compensation. TRY8 million was funded towards the Expert Hands Project Support, and TRY1 million was distributed towards animal gene resources.

On 8 July 2022, the Ministry of Agriculture and Forestry deposited TRY182 million into the accounts of their farmers across the country.³²⁰⁹ The deposit covers multiple support systems; TRY71 million within the scope of Good Agricultural Practices support; TRY38 million within the scope of Rural Development support; TRY9 million within the scope of Oilseed Plants support; TRY7 million within the scope of Research and Development Project support; TRY5 million within the scope of Expert Hands Project support. These support structures provide those in the agricultural industry with financial support to secure and accelerate their produce.

On 22 August 2022, the Ministry of Agriculture and Forestry announced the establishment of the Department of Supply Security.³²¹⁶ The department will ensure supply security in response to growing concerns such as pandemics and climate change. The introduction of this department will prioritize protectionist and self-sufficient agricultural practices. Under this department, the Supply Security Tracking System will monitor and analyze the necessary methodologies and data to then take necessary measures to maintain food security.

On 24 August 2022, Minister Kirişci announced the expansion in the support provided under the Agriculture and Rural Development Support Institution.³²¹⁷ This increase in scope also has increased the amount of national contribution in the program budget. The program will now support applicants with scores between 30 and 65, supporting over 7,000 projects. The program has increased their funding to TRY10 billion. The program and the government investments will be directed towards sectors such as craftsmanship, renewable energy, rural tourism and aquaculture. Milk producers have been the high recipients of support under this program.

On 16 September 2022, Ministry of Agriculture and Forestry announced the agricultural support payments of TRY55 million directly in farmers accounts.³²¹⁸ TRY23.5 million was provided for certified seed use. TRY31.2 million was provided under the scope of animal diseases compensation.

On 18 September 2022, Minister Kirişci announced the doubling of financial support for certified seeds.³²¹⁹ The Ministry of Agriculture and Forestry has provided TRY24 of certified seed support for every decare of wheat, barley, oats, rye, paddy and triticale. This figure would be increased to TRY50 in 2023.

On 19 September 2022, Minister Kirişci, along with the Ministry of Environment and Urbanization, announced the Livestock Area Stables Project.³²²⁰ The project includes 314 barns and 3 veterinary buildings, which will receive an investment of TRY1 billion.

On 19 September 2022, the Special Provincial Administration opened the Agricultural Park Project.³²²¹ TRY17.5 million was spent on the project, with 140 pieces of machinery equipment made available to farmers. The Project also includes the introduction of the Farmer Training Centre, which will provide farmers with practical training in the field, demonstration of how to use products and theoretical

information provided by experts. The park has 1000 square metres of land that will hold 4 greenhouses of 250 square metres on 40 acres of land. The park will grow cereals, industrial plants, forage plants, vegetables and fruits.

Turkey has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by strengthening domestic agricultural production, resilient food systems by designing programs to bolster food security, agriculture innovation by envisioning future vegetation and increased access to finance through responsible investment in agriculture and food systems by funding breeders in different fields.

Thus, Turkey receives a score of +1.

Analyst: Zackery Martins

United Kingdom: +1

United Kingdom has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 14 December 2021, the government published a paper outlining their plan to strengthen the wider systems needed to end preventable deaths, reducing malnutrition through safe, healthier and sustainable food systems.³²²² The United Kingdom in this paper highlights how it plans to focus on four key pillars of action: Strong Health Systems, Human Rights, Gender and Equality, Healthier Lives and Safe Environments, Research, Technology and Innovation. This particular paper and its framework outlined highlight two key features discussed within the commitment relating to fostering sustainable and resilient food systems and agriculture innovation. The paper also touches on another key element of the commitment witnessed through the increase to finance and responsible investment.

On 17 December 2021, the United Kingdom and Australia signed a new free-trade agreement expected to increase trade by 53 per cent.³²²³ This agreement means that Australian farmers will have improved access to over 65 million UK consumers, thereby strengthening bilateral trade in agricultural products.³²²⁴

On 27 December 2021, the Department for Environment, Food & Rural Affairs opened the UK Seafood Fund.³²²⁵ The GBP100 million fund will support the long-term future and provide sustainability for UK fisheries and the seafood sector. The fund is dedicated for reform, modernization and innovation in the field. These aspects aim to create an environmentally sustainable fishing industry.

On 6 January 2022, Secretary of State for Environment, Food and Rural Affairs George Eustice announced a Countryside Stewardship Scheme payment rate raise.³²²⁶ The 30 per cent increase will work toward providing farmers with financial compensation. The actions taken by MP Eustice specifically aid countryside environment and agriculture initiatives while contributing towards habitat restoration, specializing align with another section of the commitment relating to financing responsible investment.³²²⁷

On 17 January 2022, Agriculture Minister Edwin Poots participated in the 76th Oxford Farming Conference reaffirming the governments' commitment towards viable, profitable and environmentally sustainable agri-food industry in Northern Ireland.³²²⁸ The conference this year focused on encouraging more environmentally responsible agricultural practices, supporting rural communities, and promoting public goods through its theme of "Routes to Resilience."

On 27 January 2022, Secretary Eustice launched the United Kingdom Agriculture Partnership to address common challenges facing agriculture and environment and technology to boost food production.³²²⁹ The United Kingdom Agriculture Partnership will share the United Kingdom-wide best practices relating to water quality across the agriculture sector, the role of agri-tech and to reduce pollution and carbon emissions in the sector. This announcement includes key features that are included in the commitment specifically relating to Responsible Investment and agriculture innovation to end hunger and malnutrition.

On 1 February 2022, the Department for Environment, Food and Rural Affairs introduced the funding for Landscape Recovery.³²³⁰ The funding will provide support for large, long-term landscape and ecosystem restoration projects. These projects can include the respiration of wilder landscapes, the creation and plantation of woodlands, and the support of peatlands and salt marches. The recipients of the funding will receive funding for up to 2 years to deliver the project and help secure private funding for long-term delivery. Farmers and farm tenants are eligible to apply, along with foresters, charities and collaborative groups. The Government of the United Kingdom is providing farmers and other agricultural and land actors in the country with opportunities to create innovative projects.

On 8 February 2022, the United Kingdom introduced and opened the application period for the Lump Sum Exit Scheme.³²³¹ The payment scheme provides lump sum payments for farmers in the UK who wish to retire or leave the farming industry. In return of the payment, farmers are expected to sell, rent their land or surrender tenancy to create new opportunities in their place for other farmers wishing to

enter and expand their business.³²³² This action provides support for both old and new farmers, working towards their commitment to create responsible agricultural systems through investments.

On 18 February 2022, the Department for Environment, Food and Rural Affairs, Office of the Secretary of State for Scotland, Lord Offord of Garvel and MP Victoria Prentis delivered GBP1.4 million to projects supporting sustainable fishing and fisheries science.³²³³ The projects being funded will support the UK's fishing industry to be more productive and sustainable.

On 9 March 2022, the Department for Environment, Food & Rural Affairs along with the Rural Payments Agency introduced funding for farmers to improve and manage their land in a sustainable way.³²³⁴ Under the Sustainable Farming Incentive, the funding will provide farmers with the opportunity to build better storage of water and carbon, reduce levels of sediment, nutrients and chemical pollution in water, reduce greenhouse gas emissions, create better biodiversity, reduce risk of flooding, erosion and run-off and to restore peatlands. This action provides financial support for those in the agricultural industry, and will effectively provide farmers with environmentally sustainable methods of growth.

On 11 March 2022, the G7 agricultural ministers, including delegation from United Kingdom, met in Berlin.³²³⁵ They discussed global concerns regarding food insecurity and agriculture. One of the most prominently discussed issues were the facilitation of harvest in affected areas in the Ukraine due to their ongoing food crisis, in an effort to provide access to “sufficient, safe, affordable and nutritious food.”

On 25 May 2022, the Department for Environment, Food & Rural Affairs introduced the Genetic Technology Bill to accelerate and support the development of innovative technologies in growing more resistant, nutritious and productive crops.³²³⁶ The legislation removes unnecessary barriers to research gene editing technologies. This Bill enables the development and marketing of precision bred agriculture and livestock. The new breeding technologies will provide farmers and producers assistance in developing plant varieties and animals to create secure and sustainable food systems.

On 9 June 2022, Secretary Eustice announced grants up to GBP300,000 for farmers.³²³⁷ These grants aim to help farmers to purchase new equipment and to diversify their crops, thus encouraging further agricultural production and innovation.

On 13 June 2022, the Secretary of State for Environment, Food and Rural Affairs George Eustice presented the Government Food Strategy at the House of Commons.³²³⁸ The strategy focused on

increasing domestic output of produce to boost security in the UK. The strategy will support farmers and aid protect food suppliers against future economic shocks by safeguarding food security. The farming industry will receive an investment of GBP270 million in innovation projects until 2029 to increase productivity and profitability. Of the GBP270, GBP24 million will be used to support sea-food research and innovation, as part of the UK Seafood Fund. Through the introduction and utilization of new technologies and innovations, the UK will see an increase in domestic produce. The Strategy also extended the Seasonal Workers Visa Route to the poultry sector. This will provide security in the agriculture and farming industry and lower the costs of produce for consumers. Support for farmers will also help increase and create security within the industry.

On 30 June 2022, Department for Environment, Food & Rural Affairs and Rural Payment Agency opened the Sustainable Farming Incentive.³²³⁹ The scheme is open to all farmers who are already receiving the Basic Payment Scheme payments. The Incentive is the first of three new environmental land management schemes introduced under the Agricultural Transition Plan. These schemes will ensure food security through investments in healthy soil, water and biodiverse ecosystems.

On 30 June 2022, Environment Secretary George Eustice announced further funding for research projects to boost farmers' businesses and help improve the environmental impact of farming.³²⁴⁰ GBP12.5 million from the Farming Innovation Programme will be used for research and development focused on sustainable farm-based proteins. The funding is available for farmers, growers, businesses and academics to collaborate on projects seeking to improve the efficiency and sustainability of farm-based protein production. This will be pivotal in boosting domestic production and providing the UK with sustainable food.

On 1 July 2022, the United Kingdom, along with the United States and Canada, launched the Illegal, Unreported and Unregulated Fishing Action Alliance.³²⁴¹ The Alliance aims to increase ambition and momentum to fight against illegal, unreported and unregulated fishing. The Alliance and partnership are a pledge to take urgent action in improving the monitoring, control and surveillance of fisheries and increasing transparency in fishing fleets and seafood markets. This Alliance will prove beneficial for fishermen in the United Kingdom, the United States and Canada by providing a safe and sustainable source of fishery products.

On 17 August 2022, the Department for Environment, Food and Rural Affairs announced their support for farmers who are being impacted by ongoing dry weather.³²⁴² These support measures include easement on the rules in agri-environment scheme agreements, making it easier to provide vital food for livestock. These new rules and regulations will aid in increasing access to bedding, fodder, grazing or forage to limit its environmental impacts.

On 22 August 2022, the Department for Environment, Food & Rural Affairs, UK Research and Innovation, along with Farming Innovation Steve Double announced the Farming Innovation

Programme.³²⁴³ The program will fund projects for farmers and growers to help grow food production, encourage sustainable practices and increase productivity. The Programme introduces GBP16.5 million of funding to accelerate innovative technologies in agriculture and horticulture. The Programme aims to introduce new ideas and collaborations across the industry to address long-term challenges.

The United Kingdom has fully complied with its commitment foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by investing in large scale land-restoration projects, resilient food systems by introducing farmers with environmentally sustainable methods to grow agricultural products, agricultural innovation by promoting innovative land recovery techniques and increased access to finance through responsible investment in agriculture and food systems by funding farmers to improve and manage their land in a sustainable way.

Thus, the United Kingdom receives a score of +1.

Analyst: Zackery Martins

United States: +1

United States has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

On 3 November 2021, Secretary of Agriculture Secretary Tom Vilsack and European Union Commissioner for Agriculture Janusz Wojciechowski issued a statement announcing a transatlantic collaboration platform aimed at tackling sustainable agriculture and climate change related problems.³²⁴⁴ This collaboration will help with reducing poverty and hunger, as well as encouraging agricultural innovation for sustainable production.

On 6 December 2021, the United States Department of Agriculture (USDA) announced the Local Food Purchase Assistance Cooperative Agreement Program (LFPA).³²⁴⁵ With a USD400 million fund, the program aims to assist emergency food purchases with an emphasis on local products. Purchases are required to be from historically discriminated against farmers and ranchers.

On 6 December 2021, the USDA announced the availability of USD50 million in funds for the Build Back Better Food System Transformation Initiative.³²⁴⁶ With this funding, the initiative, aimed at increasing support of food banks and local organizations so they can reliably serve their communities, is endeavoring to expand their reach to rural, tribal and other underserved areas.

On 9 December 2021, Secretary Vilsack announced the Food Supply Chain Guaranteed Loan Program.³²⁴⁷ The program makes USD1 billion available in loan guarantees for food supply chain infrastructure. It aims to support farmers, increase access to healthier food, and eliminate congestion in the food supply chain.

On 16 December 2021, Secretary Vilsack announced a USD5.2 billion investment aimed at improving rural infrastructure and access to clean water in rural areas and Puerto Rico.³²⁴⁸ 46 states and Puerto Rico have all been allocated funds targeted at water supply, food infrastructure, and power infrastructure.

On 4 February 2022, Secretary Vilsack and Secretaries of Agriculture and Rural Development in Mexico Víctor Villalobos Arámbula discussed bilateral cooperation to expand the two countries' respective agri-food sectors.³²⁴⁹ The meeting emphasized collaborations and the use of innovative technology to enable the highest production quality that meet economic and environmental needs.

On 1 March 2022, Secretary Vilsack announced supplemental funding for the Local Agriculture Market Program (LAMP).³²⁵⁰ The program will receive USD130 million in supplemental funding. LAMP aims to encourage competition and generate more and better markets for local and regional food producers.

On 11 March 2022, the G7 agricultural ministers, including delegation from United States, met in Berlin.³²⁵¹ They discussed global concerns regarding food insecurity and agriculture. One of the most prominently discussed issues were the facilitation of harvest in affected areas in the Ukraine due to their ongoing food crisis, in an effort to provide access to “sufficient, safe, affordable and nutritious food.”

On 24 May 2022, an initiative for climate change was announced by the “Quad countries:” Japan, India, Australia and the United States.³²⁵² This initiative in part addresses promoting sustainable agricultural endeavors as well as promoting food security.

On 3 June 2022, the USDA announced the release of USD43.1 million for grants and cooperative agreements, and 6 urban county committees to help USDA programs reach urban producers.³²⁵³ The

grants will be used to expand compost and food waste reduction initiatives, as well as to support the development of innovative urban agriculture production projects. FSA Administrator Zach Ducheneaux expressed that the 6 new urban county committees “will work to encourage and promote urban agriculture and address areas such as food and program access, community engagement and food security.”

On 10 June 2022, the USDA stated that they would develop a pilot program project in collaboration with the other federal agencies to address labor shortages in agriculture, improve working conditions for agricultural workers and address the elevated levels of irregular migration in the US.³²⁵⁴ Up to USD65 million will be invested into this pilot program.

On 10 June 2022, Government of the United States released a statement alongside the governments of Argentina, Brazil, Canada and Mexico regarding the role of agricultural exports for food security.³²⁵⁵ Among the commitments made include a dedication to maximize agricultural production and promote humanitarian efforts through ensuring food security.

On 1 July 2022, the United States, along with the United Kingdom and Canada, launched the Illegal, Unreported and Unregulated Fishing Action Alliance.³²⁵⁶ The Alliance aims to increase ambition and momentum to fight against illegal, unreported and unregulated fishing. The Alliance and partnership are a pledge to take urgent action in improving the monitoring, control and surveillance of fisheries and increasing transparency in fishing fleets and seafood markets. This Alliance aims to be beneficial for fishermen in the United States, the United Kingdom and Canada by providing a safe and sustainable source of fishery products.

On 14 September 2022, USDA Secretary Tom Vilsack announced that the Biden-Harris Administration is investing up to USD2.8 billion in 70 selected projects as a part of the Partnerships for Climate-Smart Commodities funding opportunity.³²⁵⁷ Such projects have many aims, including the funding of technical and financial aid to agricultural producers to implement climate-smart production practices.

On 20 September 2022, Secretary of State Antony Blinken attended the UN World Summit on Food Security.³²⁵⁸ At this meeting, discussions addressed various issues of global food security with other leaders, including representatives from Germany and Japan.

On 27 September 2022, USDA Secretary Tom Vilsack announced that the Biden-Harris Administration is creating USD500 million in grants to increase American-made fertilizer

production.³²⁵⁹ Vilsack stated that these grants will help foster a “resilient, secure and sustainable economy” by increasing fertilizer outputs in the United States. These grants are a part of the United States’ effort to promote competition in agricultural markets.

On 1 October 2022, Charge d’Affaires of the United States Embassy in Santo Domingo Robert W. Thomas announced that the US government will provide USD3 million dollars to finance a project to aid farmers in the Dominican Republic with reducing the use of fertilizers, increasing product output and encouraging the use of biofertilizers to improve climate-resilient agricultural practices.³²⁶⁰

On 26 October 2022, the USDA announced an investment of USD14.2 million in 52 grants to promote urban agriculture and innovation production.³²⁶¹ This funding aims to improve access to nutritious foods, as well as enhance awareness about climate change and address its effects in urban regions.

The United States has fully complied with its commitment to foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agriculture innovation and increase access to finance through responsible investment in agriculture and food systems. problems.³²⁶³ This collaboration with aid with reducing poverty and hunger, as well as encouraging agricultural innovation for sustainable production.

On 15 November 2021, the fourth meeting of the EU-Canada Comprehensive Economic Trade Agreement (CETA) took place virtually, alongside the Canada-European Union Agriculture Dialogue.³²⁶⁴ This meeting featured “a commitment to maintain a positive collaborative approach” and considered several agri-food products important in bilateral trade to promote the resilience of regional food systems.

On 26 November 2021, European Union lawmakers finalized reforms for the Common Agricultural Policy which will provide aid to farmers, to help deal with fluctuations in the food markets and guarantee food security.³²⁶⁵ These new reforms will ensure that 25 per cent of direct payments are dedicated to environmental and climate measures. The reforms will also provide EUR270 billion to farmers.

On 7 December 2021, the European Union Commission announced a pledge of EUR2.5 billion to reduce all forms of malnutrition in the European Union, which includes humanitarian assistance to cover immediate needs and support to tackle the underlying causes of malnutrition.³²⁶⁶ The pledge will guarantee food security and induce transformations for longer-term secure food systems.

On 21 January 2022, the EU announced new rules on veterinary medicines that allow farmers to have larger access to a wider range of options for preventing livestock diseases.³²⁶⁷ This will ensure better health and productivity for livestock, ensuring better food supply and profitability for farmers.

On 21 February 2022, Agricultural Ministers of the Council of the EU held a debate on the proposal from the European Union Commission for a regulation on deforestation-free products.³²⁶⁸ The goal for this will be to reduce the European Union’s impact on deforestation and allow for sustainable production.

On 23 March 2022, the EU presented a food security strategy consisting of short-term and medium-term actions to further food security and support farmers.³²⁶⁹ These actions will aid people in the context of rising food prices and input costs resulted from a surge in commodity prices, furthered by Russia’s invasion of Ukraine.

On 3 May 2022, the EU's action plan for organic agriculture was adopted by the European Parliament.³²⁷⁰ The action plan aims to improve organic farming for climate change mitigation, biodiversity and soil protection.

On 30 June 2022, the European Union and New Zealand concluded negotiations for an agricultural Trade Agreement designed to increase economic opportunities for both parties.³²⁷¹ The agreement aims to better guarantee sustainability in agriculture; an important goal for both entities.

On 21 July 2022, the European Union released a document announcing the loosening of sanctions on Russia, which helps tackle the ongoing food security crisis resulting from the Russian invasion of Ukraine.³²⁷² This is because Russian banks will now have better access to agricultural products, including fertilizers.

On 22 July 2022, the European Commission proposed a short-term derogation from agricultural rules, aimed at maximizing the European Union's production capacity for food products.³²⁷³ The anticipated food production increase will help combat the ongoing global food crisis and increase food security.

On 11 August 2022, the Office of the European Union Representative (West Bank and Gaza Strip) announced the decision of the European Union to contribute EUR2.6 million to farmers in the Gaza Strip.³²⁷⁴ This is aimed at supporting the Palestinian Authority's programme "Private Sector Reconstruction Gaza - Agriculture" to ensure food security and agricultural progress around the world.

On 26 August 2022, the European Bank for Reconstruction and Development, owned partly by the European Union, announced support for more than half the risk of a USD8 million loan to Ukraine.³²⁷⁵ This loan aims to boost agricultural and food production in the country.

The European Union has fully complied with its commitment foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment. It has taken actions in all the following categories: to foster sustainable food systems, resilient food systems, agricultural innovation and increase access to finance through responsible investment in agriculture and food systems. It has addressed sustainable food systems by reducing unsustainable processes, resilient food systems by responding to crises, agriculture innovation by promoting collaboration and increased access to finance through responsible investment in agriculture and food systems by allocating funds to farmers.

Thus, the European Union receives a score of +1.

13. Health: Vaccines

“To help advance toward the global goals of vaccinating at least 40 per cent of the population in all countries by the end of 2021 and 70 per cent by mid - 2022, as recommended by the World Health Organization (WHO)’s global vaccination strategy, we will take steps to help boost the supply of vaccines and essential medical products and inputs in developing countries and remove relevant supply and financing constraints.”

Background

The World Health Organization (WHO) classified COVID-19 as a disease caused by the new coronavirus SARS-CoV-2, which had first been reported in Wuhan, China at the end of 2019.³²⁷⁶ Among those who contract the virus, about 80 per cent recover from the disease, while the remaining 20 per cent become seriously ill and require hospitalization. Alongside social distancing, wearing a mask and practicing good hygiene, countries around the world have developed vaccines to minimize the spread and severity of the disease if contracted. COVID-19 Vaccines Global Access (COVAX) is the vaccines pillar of the Access to COVID-19 Tools (ACT) Accelerator, which has been used to accelerate the development, production and equitable access to COVID-19 tests, treatments and vaccines.³²⁷⁷

³²⁷⁶ Coronavirus disease (COVID-19), World Health Organization (Geneva) 12 October 2020. Access Date: 29 November 2021. <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/question-and-answers-hub/q-a-detail/coronavirus-disease-covid-19>

³²⁷⁷ COVAX: Working for global equitable access to COVID-19 vaccines, World Health Organization (Geneva) n.d. Access Date: 29 November 2021. <https://www.who.int/initiatives/act-accelerator/covax>

Delivering and administering COVID-19 vaccines is fundamental to minimizing the spread and preventing further loss of life as a result of the coronavirus pandemic. COVID-19 vaccines have undergone extraordinary rapid development and immunization is underway in countries around the world.³²⁷⁸ The demand for vaccine doses has continued to rise as cases continue to surge around the world but distribution remains highly skewed in favour of high-income countries.

At the 2020 Riyadh Virtual Summit, the issue of the COVID-19 pandemic was one of the primary topics of discussion and many commitments related to COVID-19 and health were made. The G20 leaders committed to coordinating, as well as acting alongside international organizations, in any way deemed necessary to alleviate the impact of the pandemic and putting forward a coordinated set of policies to protect people and safeguard the global economy.³²⁷⁹ The G20 leaders commit to take all necessary health measures and seek to ensure adequate financing to contain the pandemic and protect people, especially the most vulnerable.³²⁸⁰ The leaders will share timely and transparent information, exchange epidemiological and clinical data, share materials necessary for research and development, and strengthen health systems globally, including through supporting the full implementation of the WHO International Health Regulations (IHR 2005).

The G20 leaders pledge to support and commit to further strengthening the WHO's mandate in coordinating the international fight against the pandemic, including the protection of front-line health workers and the delivery of medical supplies.³²⁸¹ To safeguard the future, the G20 leaders commit to strengthening the national, regional, and global capacities to respond to potential infectious disease outbreaks by increasing the epidemic preparedness spending to enhance the protection of everyone affected by infectious diseases.

The G20 leaders commit to do whatever it takes and to use all available policy tools to minimize the economy and social damage from the pandemic, restore global growth, maintain market stability, and strengthen resilience.³²⁸² The leaders are injecting over USD5 trillion into the global economy as part of a targeted fiscal policy, economic measures, and guarantee schemes to counteract the social, economic, and financial impacts of the pandemic. Furthermore, the G20 leaders will work with the front-line international organizations to deploy financial packages and strengthen financial safety nets.

Commitment Features

By “global goal,” this commitment refers to the World Health Organization’s (WHO) “Strategy to Achieve Global Covid-19 Vaccination by mid-2022.”³²⁸³ To “advance toward” can be understood as

³²⁷⁸ Access to COVID-19 vaccines: Global Approaches in a Global Crisis, Organisation for Economic Co-operation and Development (Paris) 18 March 2021. ³²⁸² Extraordinary G20 Leaders’ Summit: Statement on COVID-19 (Riyadh) 26 March 2020. Access Date: 29 November 2021. <http://www.g20.utoronto.ca/2020/2020-g20-statement-0326.html>

³²⁸³ Strategy to Achieve Global Covid-19 Vaccination by mid-2022, World Health Organization (Geneva) n.d. Access Date: 7 December 2021. https://cdn.who.int/media/docs/default-source/immunization/covid-19/strategy-to-achieve-global-covid-19-vaccination-by-mid-2022.pdf?sfvrsn=5a68433c_5

“to make progress” in achieving such goals, which concern the need to substantially increase population immunity in developing countries, lowering the risk of new variants.³²⁸⁴

To “help” is understood to mean providing what is useful or necessary to achieve an end.³²⁸⁵

To “boost” is understood as “to increase something.”³²⁸⁶

Therefore, to “take steps to help boost” is understood to mean undertaking and implementing measures that increase the resources necessary to achieve a particular end. In the context of this commitment, measures to substantially increase the vaccination rate of the population can be divided into three key areas: 1) actions to increase the supply of vaccines; 2) efforts to increase the supply of essential medical products and inputs; 3) actions to develop a more equitable and universal COVID-19 response by removing existing financial constraints. It must also be noted that the aforementioned areas are all in relation to the inequitable burdens faced by low and middle-income countries. Hence, actions in any of the three key categories must entail providing support for developing countries.

“Supply” is understood as a stock of a resource.³²⁸⁷ Therefore, “the supply of vaccines” is understood as the amount of safe, affordable, quality and effective COVID-19 vaccines available for use. Actions that aim to increase the supply of vaccines in developing countries include donating surplus vaccines, supporting and building on collaborative efforts such as supporting the Access to COVID-19 Tools Accelerator (ACT-A) initiative (through financing, collaboration, personnel development, exchange of best practices) and specifically the COVAX facility.

“Essential medical products and inputs” is understood as the basic equipment and goods required for satisfying the health care needs for a rapid and effective COVID-19 response.³²⁸⁸ Actions by G20 members in this area include providing pulse oximeters, patient monitors, test kits, emergency health kits, ultrasound and CT scanners, oxygen therapy supplies, and personal protective equipment (PPE) to countries in need. Other tools that increase testing capacity, early detection of the disease, and support the hospitalization and clinical management of COVID-19 cases are also under this category.

“Remove” is understood as “to take something away.”³²⁸⁹

“Relevant” is understood as something suitable for or connected to a particular purpose.³²⁹⁰ The particular purpose of the G20 members’ commitment is to work towards achieving high vaccination rates.³²⁹¹ In accordance, supply and financing constraints will be removed when their existence creates a barrier to achieving the aforementioned end.

³²⁸⁹ Remove, Cambridge Dictionary (Cambridge) n.d. Access Date: 7 December 2021.

<https://dictionary.cambridge.org/pt/dicionario/ingles/remove>

³²⁹⁰ Relevant, Cambridge Dictionary (Cambridge) n.d. Access Date: 7 December 2021.

<https://dictionary.cambridge.org/pt/dicionario/ingles/relevant>

³²⁹¹ Strategy to Achieve Global Covid-19 Vaccination by mid-2022, World Health Organization (Geneva) n.d. Access Date: 7 December 2021. https://cdn.who.int/media/docs/default-source/immunization/covid-19/strategy-to-achieve-global-covid-19-vaccination-by-mid-2022.pdf?sfvrsn=5a68433c_5

“Constraints” are understood as having a limited ability to take particular action due to internal or external impediments.³²⁹² In this commitment, “[removing] relevant supply and financing constraints” means G20 members will address internal and external factors that diminish low and middle-income countries’ preparedness to finance health responses to COVID-19.³²⁹³ Actions that aim to remove the constraints include removing tariffs on essential goods (free cross-border flows of raw materials, vaccines, medical equipment, etc.); making the production of vaccines more widely possible; sponsoring, signing or ratifying international treaties; and providing international financial support (directly and/or through international institutions).

For full compliance (+1), G20 members must take strong actions in the three key areas of boosting supply of vaccines, boosting supply of essential medical products and inputs and removing constraints to vaccines, all in view of supporting developing countries. If a G20 member increases supply without removing or supporting the removal of constraints, it would only be considered partial compliance. If a G20 member implements further constraints for access to vaccines, even if they remove constraints and increase supply of both vaccines and medical equipment, it would still only be considered partial compliance. For a score of partial compliance (0), the G20 member has taken concrete actions to support developing countries in one or two of the key commitment areas of increasing the supply of vaccines, increasing the supply of medical equipment, and removing constraints.

A G20 member must take strong action in all three areas for full compliance. Strong action in terms of increasing supply of vaccines could include donating vaccines or financial assistance to developing countries or donating vaccines or financial assistance to COVAX. Strong action for increasing supply of medical equipment could include donating, purchasing or distributing medical equipment or investing in the manufacturing and production of essential medical products and inputs. Strong action for removing constraints could include removing or lessening tariffs on essential medical equipment and vaccines; supporting the production of vaccines more widely across the world; working with other countries or international organizations to ensure equitable access to vaccines. Partial action would be considered reiterating the commitment, making statements or speeches recognizing the need for increasing supply and/or removing constraints to vaccines or attending meetings where the subject matter is discussed. Both national and international actions count towards compliance as some G20 members are developing countries. However, national actions in developed G20 members’ countries would not count as compliance as this commitment is focused on increasing vaccination rates in developing countries.

Scoring Guidelines

-1	1. The G20 member does NOT take action in ANY of the three key commitment areas.
0	2. The G20 member has taken concrete actions to support ONE or TWO of the key commitment areas of increasing supply of vaccines, increasing supply of medical equipment, and removing constraints.
+1	3. The G20 member has taken action in ALL three key commitment areas of increasing supply of vaccines, increasing supply of medical equipment, AND removing constraints.

Argentina: 0

Argentina has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 11 November 2021, Argentina announced that 450,000 doses of the AstraZeneca vaccine would be sent to Mozambique.³²⁹⁴ Argentina also announced that it offered vaccines to other countries and received favourable responses from Vietnam, Nicaragua, the Philippines, Angola, the Organization of Eastern Caribbean States, and Barbados.

On 22 November 2021, Argentina announced that a donation of one million doses of the AstraZeneca vaccine was organized jointly by the Ministry of Health and the Foreign Ministry.³²⁹⁵ Minister of Health Carla Vizzoti and Foreign Minister Santiago Cafiero stated that Argentina offered 500,000 doses to Vietnam, 18,000 doses for St. Lucia, 11,000 doses for Grenada, 11,000 doses for St. Vincent and the Grenadines, and 2,000 doses for Dominica.

On 24 November 2021, Argentina donated 500,000 doses of the AstraZeneca vaccine to Vietnam.³²⁹⁶ These donations are the result of Argentina's offer to ensure "the stock of doses necessary to complete the distribution of vaccines for the entire target population."

On 28 November 2021, Argentina donated 450,000 doses of the AstraZeneca vaccine to Mozambique.³²⁹⁷

On 29 November 2021, Argentina donated 350,000 doses of the AstraZeneca vaccine to Angola.³²⁹⁸ This action is part of Argentina's pledge to reduce the effects of the global pandemic by assisting countries that are in urgent need of access to vaccines.

On 1 December 2021, Argentina donated 11,000 doses of the AstraZeneca vaccine to Saint Vincent and the Grenadines.³²⁹⁹

On 4 December 2021, Argentina donated 30,000 doses of the AstraZeneca vaccine to Barbados.³³⁰⁰

³²⁹⁹ Argentina Donates 11,000 doses of AstraZeneca vaccines to SVG, Ministry of Health, Wellness and the Environment (Kingstown) 1 December 2021. Access Date: 14 June 2022. <http://health.gov.vc/health/index.php/news/1938-argentina-donates-11-000-doses-of-astrazeneca-vaccines-to-svg>

³³⁰⁰ Argentina Donates COVID-19 Vaccines to Barbados, Government Information Service (Bridgetown) 4 December 2021. Access Date: 15 June 2022. <https://gisbarbados.gov.bb/blog/argentina-donates-covid-19-vaccines-to-barbados/>

On 6 December 2021, Argentina donated 400,000 doses of the AstraZeneca vaccine to Kenya.³³⁰¹ The vaccines are part of Argentina's pledge to reduce the effects of the COVID-19 pandemic by working within the framework of the international reciprocity and solidarity strategy aimed at equitable access to vaccines.

On 16 December 2021, Argentina announced that the Ministry of Health and the Foreign Ministry would organize the transfer of one million doses of the AstraZeneca vaccine to Bolivia on 20 December 2021.³³⁰²

On 20 December 2021, Argentina donated one million doses of the AstraZeneca vaccine to Bolivia.³³⁰³

On 23 December 2021, Argentina donated 500,000 doses of the AstraZeneca vaccine to the Philippines.³³⁰⁴

On 12 January 2022, Argentina donated 1 million doses of the AstraZeneca vaccine to Egypt.³³⁰⁵

On 3 October 2022, the national ministry of Health announced that it distributed over 108000 doses of Covid-19 vaccine to several districts. The supply included doses of Moderna and Pfizer.³³⁰⁶

Argentina has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and remove relevant supply and financing constraints. Argentina has taken action to boost the supply of vaccines in view of supporting developing countries. However, it has not taken concrete action to boost the supply of essential medical products and inputs, or to remove financial constraints.

Thus, Argentina receives a score of 0.

Analyst: Charran Auguste

Australia: +1

Australia has fully complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 10 November 2021, Foreign Minister Marise Payne announced that Australia would share 7.5 million additional COVID-19 vaccine doses with Indonesia.³³⁰⁷

On 10 November 2021, Minister Payne announced Australia's expanding commitment of 2.7 million additional doses to Vietnam.³³⁰⁸ Additionally, a new AUD60 million vaccine access package was announced for Vietnam, funded by both a bilateral Australia-Vietnam development program and the Quad Vaccine Partnership.

On 16 November 2021, Lieutenant General John Frewen of Australia's COVID-19 task force announced that mRNA vaccines like Pfizer and Moderna would henceforth be included in the country's donation program to developing countries, made possible by a surplus at home.³³⁰⁹

On 6 January 2022, the Australian Aid governmental branch partnered with the World Bank on a study of the factors driving vaccine hesitancy in the Philippines. The document included policy recommendations such as simplifying messages and emphasizing social benefits as some of the methods to reduce hesitancy in the country.³³¹⁰

On 23 January 2022, Minister Payne, Defense Minister Peter Dutton, and Minister for International Development and the Pacific Zed Seselja jointly announced the delivery of a 19-ton package to the Solomon Islands to combat a COVID-19 outbreak, which included 100 oxygen concentrators and 11 country kits containing personal protective equipment, medical supplies, & equipment.³³¹¹ In addition to this immediate assistance, the Australian Government is also organizing a second delivery containing the following medical equipment: a new GeneXpert machine, COVID-19 test processing appliances, a mobile cool room and a back-up incinerator for waste management.

On 29 January 2022, 37,800 AstraZeneca vaccines were delivered to the Solomon Islands on a Royal Australian Air Force (RAAF) cargo flight in response to a continued outbreak in the country.³³¹² Also part of this flight was an eight-person Australian Medical Assistance Team.

On 11 February 2022, Minister Payne announced an additional AUD1.1 billion in funding to the official development assistance program as a means of accelerating the country's donations to meet its 60 million doses goal, with 21 million having then been met by that point.³³¹³

On 14 February 2022, two C-27J cargo planes from the RAAF were sent with supply delivery of 15 cubic meter “brick” packages containing PPE for health workers, oxygen equipment, medication, and food aid to the Solomon Islands to further assist with the ongoing COVID-19 outbreak in that country.³³¹⁴

On 14 February 2022, Minister Payne announced a new AUD375 million investment for a second five-year phase of the Health Security Initiative for the Indo-Region.³³¹⁵ Although historically involved in research on malaria and tropical diseases, Minister Payne emphasized the importance of the initiative’s resources in facilitating COVID-19 surveillance and research, and expressed optimism about the initiative’s capacity to do so in the future.

On 14 February 2022, the Commonwealth Scientific and Industrial Research Organization announced a breakthrough in developing a crystalline material that could preserve vaccines at stable temperatures in the hotter climates of some developing countries.³³¹⁶

On 9 March 2022, the Australian Government announced the commitment of AUD100 million to the Coalition for Epidemic Preparedness, a move that CEO Mark Purcell of the Australian Council for International Development described as contributing “towards powering the global effort to accelerate the end of the current COVID-19 pandemic, and will also help facilitate more equitable access to life-saving vaccines, particularly in developing countries with remote populations.”³³¹⁷

On 1 April 2022, Minister Payne and Minister for International Development and the Pacific Zed Seselja announced the extension of the Solomons International Assistance Force from Australia until December 2023, with AUD22 million being provided as financial aid to the Solomon Islands government.³³¹⁸

On 1 April 2022, Minister Payne, Minister Seselja, and Minister for Health and Aged Care Greg Hunt jointly announced an additional AUD85 million and 10 million vaccine doses to the COVAX Advanced Market Commitment sharing scheme.³³¹⁹

On 9 April 2022, Minister Payne and Minister Seselja announced a new AUD16 million aid package to Tonga to support the nation’s ongoing recovery from the volcanic eruption in January. This aid package

includes 54,990 COVID-19 vaccines meant to reinforce Tongan public health authorities during the crisis.³³²⁰

On 17 June 2022, Minister for Foreign Affairs Penny Wong announced that, in continuation of Australia's previous commitment to COVID-19 relief to the Solomon Islands since January 2022, 200,000 pediatric doses of COVID-19 vaccine would be delivered to the Solomon Islands to facilitate a back-to-school vaccination drive for children ages five to eleven.³³²¹

On 1 September 2022, Minister Wong announced in a joint press conference with Adalzija Magno, Timor-Leste's Minister of Foreign Affairs and Cooperation, that Australia would provide an additional AUD20 million from the COVID-19 response package to Timor-Leste.³³²² The aid will provide budget assistance to the Government of Timor-Leste and its various programs, such as the National Program for Village Development program.

On 13 September 2022, the Australian government, in collaboration with the United Nations International Children's Emergency Fund, delivered 452,790 doses of the Pfizer-BioNTech COVID-19 vaccine to Thailand.³³²³ First Secretary of the Australian Embassy to Thailand David Braun oversaw the handover ceremony in Bangkok, building upon AUD2.8 million in vaccine delivery and technical aid that Australia had provided previously to Thailand.

On 20 September 2022, Australia donated 2,400 Astrazeneca vaccine doses to Saint Vincent and the Grenadines.³³²⁴

On 21 September 2022, Australia donated 12,000 Astrazeneca vaccine doses to Belize.³³²⁵

Altogether, Australia has been active in increasing the supply of COVID-19 vaccines and medical supplies in developing countries, as well as in contributing to the removal of existing financial constraints imposed on those same countries.

Thus, Australia receives a score of +1.

Brazil: 0

Brazil has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 20 December 2021, the Ministry of Health pledged to donate 10 million COVID-19 vaccines to low-income countries through the COVAX Facility consortium alongside the World Health Organization. Health Minister Marcelo Queiroga stated that the 10 million doses are an initial offer, and that there is a possibility of donations reaching up to 30 million vaccines.³³²⁶ The countries that will receive such donations will be defined by the Ministry of Health in partnership with the Ministry of Foreign Affairs. Possible areas include Latin American, Caribbean and African countries.

On 23 December 2021, the Ministry of Health announced that Brazil will donate 500,000 COVID-19 vaccine doses to Paraguay.³³²⁷ This action is part of international humanitarian cooperation measures to tackle the pandemic and ensure broader access to vaccines.

On 22 February 2022, the federally run Oswaldo Cruz Foundation delivered “the first batch of domestically produced AstraZeneca vaccines following a technology transfer deal signed in 2021.”³³²⁸ The government stated that the domestic production will accelerate the immunization campaign and has ordered 45 million doses produced domestically for 2022, with the first delivery containing 550,000 jabs.³³²⁹

On 22 March 2022, Brazil, along with other BRICS members - Russia, India, China, and South Africa - launched the BRICS Vaccine Research and Development Centre.³³³⁰ The purpose of the initiative is to strengthen vaccine cooperation and “ensure the accessibility and affordability of vaccines in developing countries through their equitable distribution as global public goods.”

On 8 April 2022, the Ministry of Health announced that in order to reinforce Brazil’s commitment with vaccine equity, the country will donate USD86.7 million, through the COVAX-AMC consortium, for the distribution of COVID-19 vaccines.³³³¹

On 4 May 2022, Brazil, the Pan American Health Organization, and the World Health Organization (WHO) shared experiences to improve diagnosis and genomic surveillance of the COVID-19 virus.³³³²

On 24 May 2022, Minister of Health Marcelo Queiroga defended equitable access to vaccines and stressed that his country dedicated "65 million doses and 85 million dollars to support WHO's efforts to expand global vaccination coverage against COVID-19."³³³³

On 1 November 2022, the Ministry of Health announced that it in partnership with Oxford University will open a new unit in Brazil to research vaccines, production and medicines.³³³⁴

Brazil has taken action regarding its commitment to boost the supply of vaccines and has also taken initiative in removing relevant supply and financing constraints. However, the G20 member has not taken actions in regards to increasing the supply of essential medical products and inputs in developing countries.

Thus, Brazil receives a score of 0.

Analyst: Yasna Khajeh-Hosseini

Canada: 0

Canada has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 3 November 2021, Canada announced that it would match the full donation of CAD9,675,928 donated by individual Canadians to the #GiveAVax Fund through UNICEF Canada.³³³⁵ The total of CAD19,351,857 of donations and matches will cover the costs of vaccinating over 3.8 million people around the world. This includes the per-person cost to transport vaccines to destination countries, keep vaccines viable by protecting the cold chain during the journey and train health care workers to effectively administer the vaccines and safely dispose of needles and waste.

On 21 November 2021, the United Nations Children's Fund announced that the Ministry of Health of Uganda has confirmed the reception of 1,904,140 doses of the Moderna COVID-19 vaccine donated by the Canadian Government and shipped via the COVAX facility.³³³⁶

On 11 February 2022, the Government of Canada announced that over 13.3 million surplus vaccine doses have been delivered through the COVAX Facility.³³³⁷ Canada has also shared 762,080 AstraZeneca doses through direct, bilateral arrangements with countries in Latin America and the Caribbean.

On 16 February 2022, Canada donated 433,300 Moderna vaccines to Uganda.³³³⁸

On 22 February 2022, Canada donated 100,000 Astrazeneca vaccine doses to Jamaica.³³³⁹

On 14 March 2022, Canada donated 309,600 Astrazeneca doses to Ghana.³³⁴⁰

On 25 March 2022, Canada donated 21,600 Astrazeneca vaccines to Madagascar.³³⁴¹

On 6 April 2022, the Government of Canada announced that over another 14.2 million surplus vaccine doses have been delivered through the COVAX Facility.³³⁴² Canada has previously donated 13.3 million surplus vaccines to the COVAX Facility.

On 7 April 2022, the World Health Organization confirmed that the Canadian government has donated CAD 15.167 million to the Access to COVID-19 Tools Accelerator in the 2021-2022 quarter to deploy tests, treatments and vaccines the world needs to fight against the COVID-19 pandemic.³³⁴³

On 8 April 2022, the Prime Minister Justin Trudeau announced Canada will provide an additional CAD220 million funding to support COVID-19 vaccination in lower income countries.³³⁴⁴

On 19 May 2022, G7 health ministers met in Berlin to discuss and address global health challenges, especially related to COVID-19 and reacting to future pandemics. One of the key results of the meeting included the initiation of the G7-Pact for Pandemic Readiness: “a global network of health experts, aims to strengthen and align efforts for worldwide pandemic readiness. It will work in close cooperation with the World Health Organization (WHO).”³³⁴⁵ In the meeting, G7 members also agreed to increase their mandatory contributions to the WHO by 50 per cent in the long term. Additionally, G7 Health Ministers discussed the important issue of vaccine equity in a joint session with G7 Development Ministers.

On 24 May 2022, Canada donated 302,400 Janssen vaccines to Liberia.³³⁴⁶

On 1 February 2022, Minister for Economic Cooperation and Development Svenja Schulze announced that Germany plans to support South Africa, Ghana, Rwanda, and Senegal to produce COVID-19 vaccines domestically.³⁴²⁹

On 17 February 2022, on behalf of the Federal Ministry for Economic Cooperation and Development, the Development Bank KfW signed a loan agreement for EUR250 million with the multilateral African Export-Import Bank.³⁴³⁰ The loan will support the Bank's COVID-19 intervention programme, and specifically its financing for the production, acquisition and distribution of vaccines and medical supplies.

On 24 February 2022, Germany donated “electronic devices and other information, educational, and communication (IEC) materials” to Bangsamoro in order to combat the high hesitancy rate of vaccination in the region.³⁴³¹

On 1 March 2022, Germany pledged USD1.2 billion to the ACT-A. This made Germany the first country to meet its “fair share” of the ACT-Accelerator's 2021/22 budget.³⁴³²

On 11 March 2022, Gavi, the Vaccine Alliance announced that Germany will co-host this year's COVAX AMC Summit on 8 April 2022.³⁴³³ The summit will aim to raise USD5.2 billion in funding for COVAX, including USD3.8 billion in funding from sovereign and private donors for low-and middle-income countries.

On 8 April 2022, Germany pledged EUR400 million to COVAX at Gavi's ‘Break COVID Now’ Summit in order “to ensure that developing countries then have quick and equal access to new vaccines” and “additional 224 million euros for vaccine logistics in the partner countries of German development cooperation.”³⁴³⁴

On 13 May 2022, the G7 Foreign Ministers endorsed the G7 Foreign Ministers' Action Plan on COVID-19.³⁴³⁵ The Action Plan focuses on jointly addressing gaps in the global COVID-19 response, such as vaccine distribution, vaccination campaigns, including in critical “last mile” contexts, as well as increasing sustainable local and regional production of vaccines. This effort aligns to the WHO Global Vaccination Strategy and the commitment taken by G20 at the Leaders' Summit in Rome in October 2021.

³⁴³⁵ G7 Foreign Ministers' Action Plan on COVID-19, Federal Foreign Office (Berlin) 13 May 2022. Access Date: 29 August 2022. <https://www.auswaertiges-amt.de/en/newsroom/news/-/2531238>

On 19 May 2022, Germany donated 1,296,000 doses to Zambia. The donation is part of a larger donation of 2,570,400 doses, also supported by Italy, with 1,267,200 doses, and Croatia, with 7,200 doses.³⁴³⁶

On 19 May 2022, G7 health ministers met in Berlin to discuss and address global health challenges, especially related to COVID-19 and reacting to future pandemics. One of the key results of the meeting included the initiation of the G7-Pact for Pandemic Readiness: “a global network of health experts, aims to strengthen and align efforts for worldwide pandemic readiness. It will work in close cooperation with the World Health Organization (WHO).”³⁴³⁷ In the meeting, G7 members also agreed to increase their mandatory contributions to the WHO by 50 per cent in the long term. Additionally, G7 Health Ministers discussed the important issue of vaccine equity in a joint session with G7 Development Ministers.

On 23 June 2022, the first mRNA vaccine production facility opened in Kigali, Rwanda.³⁴³⁸ The facility will produce COVID-19 vaccines developed by the German company BioNTech; Germany will also provide training and other support for the facility.

On 29 June 2022, Germany, in collaboration with the United Nations International Children's Emergency Fund (UNICEF), handed over pandemic-related personal protective equipment (PPE) valued at USD500,000 to the Ministry of Health and Sanitation of Sierra Leone.³⁴³⁹ The PPE donation is intended to ensure availability of healthcare services in Sierra Leone by protecting healthcare workers from COVID-19.

On 17 August 2022, a statement jointly issued by the WHO, Germany, France, Rwanda, Senegal and South Africa outlined multilateral efforts concerning the sharing of technology with African countries as an equitable pandemic response strategy.³⁴⁴⁰ The statement mentioned Germany's partnership with several African countries for vaccine development and production.

On 31 August 2022, the Federal Foreign Office allocated USD3.9 million through UNICEF to the vaccination program in Senegal.³⁴⁴¹ The funding is intended to increase delivery of vaccination, improve storage and management of the vaccines, and support generating demand for vaccination

among the Senegalese population through engaging traditional and community leaders, young people and media.

On 29 September 2022, the Ministry for Economic Cooperation and Development together with the Ministry of Health announced a pledge of EUR69 million to the World Bank Pandemic Preparedness Fund.³⁴⁴²

On 4 November 2022, the German Chancellor Olaf Scholz announced an agreement with China which would allow expatriates in China use German BioNTech vaccine.³⁴⁴³ The shots will be made readily available.

Germany has taken action in all three areas of the commitment. The G20 member increased the supply of vaccines, essential medical products and inputs in developing countries. It has also taken initiative to remove supply and financing constraints in low-income areas.

Thus, Germany receives a score of +1.

Analysts: Samantha Moura Novais de Quadros and Christina (Wing Gi) Tse

India: +1

India has fully complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 13 November 2021, an octocopter drone developed by India's National Aerospace Laboratories successfully completed the delivery of 50 vials of COVID-19 vaccines and syringes to the Haragadde primary health care in remote Karnataka State.³⁴⁴⁴ Head researcher for UAVs Dr. P V Satyanaraya Murthy heralded the successful mission as a proof-of-concept for future vaccine delivery to rural and hard-to-reach areas.

On 27 November 2021, India donated 698,500 doses of COVID-19 vaccines to Tajikistan as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁴⁵

On 28 November 2021, India donated 725,500 doses of COVID-19 vaccines to Nepal as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁴⁶

On 30 November 2021, India delivered 972,000 doses of COVID-19 vaccines to Nepal as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁴⁷

On 1 June 2022, Union Health Secretary Shri Rajesh Bhushan announced the start of the “HarGharDastak campaign 2.0” across all of India’s states and union territories.³⁴⁸² The initiative is a COVID-19 vaccination drive running from the first of June to the end of July 2022, and places specific emphasis both on getting booster doses to persons aged 60+ and full vaccination for children aged 12-14.

On 8 June 2022, the Union Cabinet chaired by Prime Minister Modi approved a memorandum of understanding between India and the International AIDS Vaccine Initiative to jointly contribute towards the development of new biomedical technologies to treat COVID-19 among other infectious diseases.³⁴⁸³

On 14 June 2022, the Union Cabinet chaired by Prime Minister Modi approved a memorandum of association for the Technology Transfer Facility in Colombo, Sri Lanka.³⁴⁸⁴ This approval followed an initial agreement by India at the 5th Bay of Bengal initiative for Multi-Sectoral Technical and Economic Cooperation (BIMSTEC) Summit in March 2022, and will allow all BIMSTEC member states to share and transfer technologies related to biotech, pharmaceutical, and health among others.

On 13 July 2022, researchers from the Indian Institute of Science, with support from the Indian Department of Science and Technology, reported the development of a new design of synthetic peptides which clump SARS-CoV-2 viral particles together to reduce viral load.³⁴⁸⁵ This technology could potentially be developed into a peptide-based antiviral treatment to supplement the efficacy of COVID-19 vaccines against new strains.

On 14 July 2022, Union Health Secretary Shri Rajesh Bhushan chaired a virtual meeting of State/UT Health Secretaries to announce the commencement of a 75-day long vaccination drive aimed at providing free Precaution Doses to adults (ages 18 and above), in an effort to combat lower uptake among these vulnerable groups (8 per cent among adults 18 and above and 27 per cent among adults 60 and above).³⁴⁸⁶

On 14 July 2022, India donated 108,000 doses of COVID-19 vaccines to the Ivory Coast as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁸⁷

On 24 July 2022, India donated 162,000 doses of COVID-19 vaccines to Mauritania as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁸⁸

³⁴⁸⁸ Vaccine Supply, Ministry of External Affairs (New Delhi) 25 August 2022. Access Date: 2 October 2022. <https://www.mea.gov.in/vaccine-supply.htm>

On 28 July 2022, India donated 18,000 doses of COVID-19 vaccines to Nigeria as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁸⁹

On 14 August 2022, India delivered 2,750,000 doses of COVID-19 vaccines to Bangladesh as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁹⁰

On 15 August 2022, India delivered 2,740,000 doses of COVID-19 vaccines to Bangladesh as part of its Vaccine Maitri donation initiative and as part of the COVAX vaccine sharing scheme.³⁴⁹¹

Altogether, India has demonstrated tangible action and development to increase vaccine supply, medical product supply, and remove financial constraints nationally and in developing countries.

Thus, India receives a score of +1.

Analyst: Tyler Fu

Indonesia: 0

Indonesia has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 12 January 2022, Indonesia began the rollout of its booster vaccine program.³⁴⁹² The program allowed for vulnerable groups such as the elderly and immunocompromised individuals to receive their doses first, prior to other groups being eligible. Moreover, President Joko Widodo announced that all doses will be free, in turn, removing any financial barriers or constraints.

On 11 March 2022, Gavi, the Vaccine Alliance announced that Indonesia, along with the United States, Germany, Belize, and Senegal will co-host the Second Global COVID-19 Virtual Summit on 8 April 2022.³⁴⁹³ The summit will aim to raise USD5.2 billion in funding for COVAX, including USD3.8 billion in funding from sovereign and private donors for low-and middle-income countries.³⁴⁹⁴

On 12 May 2022, a statement was released by the White House, in conjunction with other COVID-19 Summit partners, namely Indonesia.³⁴⁹⁵ In the statement, Indonesia announced that it will provide USD5 million to Coalition for Epidemic Preparedness Innovations for the period of 2022-2026. The country also stated that it “will continue accelerating vaccination efforts to achieve the WHO [World

Health Organization] vaccination goal of 70 [per cent of the world's] population, including for the 189 million people of Indonesia by June 2022, while ensuring equitable access to vaccines across income and age groups, and those most at risk.” In the framework of ACT-A, Indonesia also stated that it “will continue to accelerate global equitable access to vaccines, therapeutics, diagnostics, and PPE [personal protective equipment],” and that “through multilateral cooperation, seeks political and financial support for developing countries.”

On 8 June 2022, Minister for Foreign Affairs Retno Marsudi chaired the COVAX meeting alongside the Canadian Minister of International Development and the Ethiopian Minister of Health. Minister Marsudi called for the integration of COVID-19 vaccination into other health initiatives.³⁴⁹⁶ He also stressed the importance of COVAX and multi-stakeholder solidarity in achieving equal access to health solutions, especially in developing countries.

On 23 July 2022, Indonesia began the rollout of the fourth dose of the COVID-19 vaccine for its population.³⁴⁹⁷ Vulnerable groups such as elderly, healthcare workers, and individuals with comorbidity are being offered the vaccine first, prior to offering it to other groups.

On 4 November 2022, Indonesia approved its home-grown vaccine Inavac for emergency use.³⁴⁹⁸

Indonesia has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints. The country has taken action to increase the supply of vaccines and remove financial constraints. However, the G20 member has not organized initiatives to increase the supply of essential medical products and inputs.

Thus, Indonesia receives a score of 0.

On 19 May 2022, Italy donated 1,267,200 vaccine doses to Zambia.³⁵⁰⁷ The donation is part of a larger donation of 2,570,400 doses, also supported by Germany, with 1,296,000 doses, and Croatia, with 7200 doses.

On 19 May 2022, G7 health ministers met in Berlin to discuss and address global health challenges, especially related to COVID-19 and reacting to future pandemics. One of the key results of the meeting included the initiation of the G7-Pact for Pandemic Readiness: “a global network of health experts, aims to strengthen and align efforts for worldwide pandemic readiness. It will work in close cooperation with the World Health Organization (WHO).”³⁵⁰⁸ In the meeting, G7 members also agreed to increase their mandatory contributions to the WHO by 50 per cent in the long term. Additionally, G7 Health Ministers discussed the important issue of vaccine equity in a joint session with G7 Development Ministers.

On 21 July 2022, the United Nations Headquarters welcomed Permanent Representative of Italy to the United Nations Maurizio Massari as the new vice president of the Economic and Social Council of the United Nations.³⁵⁰⁹ Ambassador Massari declared that facilitating equitable global vaccine access remains a priority of Italy.

On 10 August 2022, Italy announced that it will allocate USD216 million to multilateral health initiatives.³⁵¹⁰ USD108 million will be used for the World Bank-led Financial Intermediary Fund for prevention and preparation for future pandemics, while another USD108 will be distributed to Gavi to increase vaccine access in low- and middle-income countries.

On 31 August 2022, Italy donated 154,620 doses of COVID-19 vaccines to Tunisia.³⁵¹¹

Italy has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints. Although it has taken action to increase the supply of vaccines and remove financing constraints, it has not taken action to increase the supply of essential medical products and inputs.

Therefore, Italy receives a score of 0.

On 25 May 2022, Japan signed a USD29 million loan agreement with Bhutan to support the country's COVID-19 response.³⁵²⁷ The loan will be used to provide budgetary support for the government of Bhutan and strengthen economic resilience and environmental stability.

On 26 May 2022, Prime Minister Fumio Kishida gave a speech at 27th International Conference on The Future of Asia.³⁵²⁸ He revealed that Japan has pledged USD50 Million to develop a secretariat for the Association of Southeast Asian Nations (ASEAN) Center for Public Health Emergencies and Emerging Diseases in Thailand.

On 19 July 2022, Minister Yoshimasa co-hosted the COVID-19 Global Action Plan Foreign Ministerial Meeting with the Secretary of State of the United States Antony Blinken.³⁵²⁹ The meeting was also attended by the Director General of the World Health Organization Dr. Tedros Adhanom. Their directives included: Bolstering Supply Chain Resilience, Addressing Information Gaps, Supporting Health Care Workers, Ensuring Acute Non-Vaccine Interventions, Strengthening the Global Health Security Architecture.

On 10 August 2022, the Japan Center for International Exchange launched the Hiroshima G7 Global Health Task Force in preparation for the G7 Summit.³⁵³⁰ The task force will address three specific topics including "resilient, equitable, and sustainable universal health coverage" as well as "global health architecture development."³⁵³¹

On 16 September 2022, Japan, in collaboration with the United Nations International Children's Emergency Fund (UNICEF), pledged JYP1.4 billion to support the Digital Health System Support Project for Infectious Disease Control in Africa.³⁵³² As a result, UNICEF will provide an "immunization management system to respond to public health threats in seven African countries: Tunisia, Uganda, Congo, DRC [Democratic Republic of the Congo], Benin, Malawi, and South Sudan."³⁵³³

³⁵³³ Japan provides US\$10 million for vaccine data management systems in 7 African countries, Donortracker (Herzogenrath) 16 September 2022. Access Date: 9 October 2022. <https://donortracker.org/policy-upDates/japan-provides-us10-million-vaccine-data-management-systems-7-african-countries>

On 26 September 2022, Japan signed a JYP3 billion grant agreement with Bhutan to support the construction of a Royal Centre for Infectious Diseases and provide necessary medical equipment.³⁵³⁴ The intention is to improve Bhutan's ability to respond to future outbreaks of infectious diseases.

On 26 September 2022, Japan established the Global Health Strategy Division, a new office under the International Cooperation Bureau. The objective is to "establish a global health architecture that contributes to health security, strengthen prevention, preparedness, and response to health crises including pandemics, and promote universal health."³⁵³⁵

Japan has taken action in all three areas of the commitment: it has increased the supply of vaccines, increased the supply of essential medical products and inputs, and it has removed financial constraints in developing countries.

Thus, Japan receives a score of +1.

Analyst: Vlada Taitis

Korea: +1

Korea has fully complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 8 November 2021, at the 32nd Asia-Pacific Economic Cooperation Ministerial Meeting, Korea and other nations discussed a plan to combat the COVID-19 pandemic.³⁵³⁶ The leaders planned to increase trade facilitation to increase the vaccine distribution across the world.

On 22 December 2021, Korea pledged to donate KRW15 million to aid with vaccinations in Africa.³⁵³⁷

On 10 February 2022, a meeting was held between Deputy Minister of Health and Welfare Lee Kangho with the United States' Assistant Secretary of Health and Human Services Loyce Pace as part of the KORUS Global Vaccine Partnership Expert Group.³⁵³⁸ During this meeting, the topic of vaccine distribution and research expansion into the Indo-Pacific region was discussed.

On 16 May 2022, Korea offered to provide North Korea with medical supplies, vaccinations, medical face masks and medicines in response to their recent COVID-19 outbreak in an effort to assist them with public health needs.³⁵³⁹

On 12 May 2022, the second Global COVID-19 Summit took place.³⁵⁴⁰ At the Summit, Korea said it will provide USD300 Million to the Global Collaboration to Accelerate the Development, Production and Equitable Access to New COVID-19 diagnostics, therapeutics and vaccines (ACT-A) from 2023-2025.

On 6 June 2022, Vice Minister of Foreign Affairs Lee Dohoon held a discussion with vice-ministers of the United States, Australia, India, Japan, New Zealand, and Vietnam on COVID-19 response and the Indo-Pacific Economic Framework. Vice Minister Lee recalled South Korea's pledge to provide USD300 million to develop and produce vaccines and promote fair access.³⁵⁴¹

On 16 June 2022, the Ministry of Health and Welfare (MOHW) hosted the K-Global Vaccine Hub Strategy Briefing in Seoul.³⁵⁴² The MOHW introduced the World Bio Summit, to be held in October, and their Global Training Hub for Biomanufacturing, an initiative to help low and middle income countries build their local vaccine manufacturing capacity. There were 20 Diplomats from over 18 embassies present: South Africa, Laos, Morocco, Vietnam, Brazil, Brunei, Senegal, Serbia, Sweden, Algeria, El Salvador, United Kingdom, European Union, Kenya, Colombia, Pakistan, France, Philippines. Furthermore, the MOHW announced the work that they did with the International Vaccine Institute to conduct introductory courses for the recipients of the WHO mRNA technology, Bangladesh, Senegal, Egypt, Kenya, Nigeria, Vietnam, and Argentina.

On 4 July 2022, Korea donated 40,000 Moderna vaccines to Guyana.³⁵⁴³

On 17 July 2022, Korea, as the World Health Organization's global Biomanufacturing Workforce Training Hub, began training vaccine production personnel from 25 low and middle income countries.³⁵⁴⁴

On 20 July 2022, Korea provided 500,000 Moderna vaccines to Guatemala and 105,000 BioNTech/Pfizer vaccines to Bosnia and Herzegovina.³⁵⁴⁵

On 16 August 2022, the Ministry of Foreign Affairs and MOHW signed a memorandum of understanding with the Bill and Melinda Gates Foundation with the purpose of "[strengthening cooperation for international health security and health equality."³⁵⁴⁶ Items mentioned in the document were: expanding partnerships with initiatives such as the Global Fund, Coalition for Epidemic Preparedness Innovations, the Vaccine Alliance; and encouraging joint research as well as development of vaccines to address health inequality.

On 21 September 2022, President Yoon Suk-yeol announced that Korea is "further expanding [their] contribution to strengthening the global health system" including a commitment of USD30 million to the World Bank's Financial Intermediation Fund and USD300 million to the ACT-A initiative.³⁵⁴⁷

On 28 October 2022, the 2nd Vice-Minister for Health and Welfare attended the 7th G20 Health Ministers' Meeting held in Bali where he took part in discussions on building resilience for the global health system.³⁵⁴⁸ He also reiterated Korea's commitment towards the WHO Global Training Hub for Biomanufacturing, meant to help increase vaccine production capacities in low- and middle-income countries.

Korea has taken action in all three areas of the commitment: it has increased the supply of vaccines, increased the supply of essential medical products and inputs, and it has removed financial constraints in developing countries.

Thus, Korea receives a score of +1.

Analyst: Vlada Taitis

Mexico: 0

Mexico has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 14 January 2022, Mexico donated a supply of coronavirus vaccines to Jamaica.³⁵⁴⁹

On 18 February 2022, Mexico announced that it delivered 2,000 doses of the AstraZeneca vaccine to Dominica, and 10,000 doses of the AstraZeneca vaccine to Saint Vincent and the Grenadines.³⁵⁵⁰

Mexico has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and remove relevant supply and financing constraints. Mexico has taken action to boost the supply of vaccines in view of supporting developing countries. However, Mexico has not taken concrete action to boost the supply of essential medical products and inputs, or to remove constraints to vaccines.

Russia: 0

Russia has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 25 January 2022, the Embassy of Russia in Havana, Cuba announced through Twitter that Russia had donated more than 83 tons of medical supplies which includes medicines, multipurpose protective suits and injection syringes to Cuba by 31 December 2022 to assist Cuba with the COVID-19 pandemic.³⁵⁵¹

On 22 February 2022, President of Azerbaijan Ilham Aliyev confirmed that Russia had provided special COVID-19 test kits and had sent medical teams to Azerbaijan to assist with the COVID-19 pandemic.³⁵⁵²

On 24 February 2022, Prime Minister Mikhail Mishustin confirmed that Russia had provided test kits to Kyrgyzstan in a meeting with the Chairman of the Cabinet of Ministers of Kyrgyzstan Akylbek Japarov.³⁵⁵³

On 22 March 2022, Russia, along with other BRICS members – Brazil, India, China, and South Africa – launched the BRICS Vaccine Research and Development Centre.³⁵⁵⁴ The purpose of the initiative is to strengthen vaccine cooperation and “ensure the accessibility and affordability of vaccines in developing countries through their equitable distribution as global public goods.”

Russia has taken action in increasing the supply of essential medical products and vaccines. However, it has not taken action in removing relevant financing constraints.

Thus, Russia receives a score of 0.

On 1 November 2021, Saudi Arabia pledged USD500 million in support of the global response to COVID-19.³⁵⁵⁵

On 9 November 2021, Bangladesh received 1.5 million doses of the AstraZeneca vaccine from Saudi Arabia.³⁵⁵⁶

On 7 April 2022, Saudi Arabia pledged to provide USD2 billion in economic support for the Central Bank of Yemen.³⁵⁵⁷ This pledge seeks to assist vaccine delivery in order to vaccinate ten percent of Yemenis against COVID-19.

On 12 May 2022, in a statement by the White House, it was revealed that Saudi Arabia provided USD2.8 million to the World Health Organization in 2022 “to provide logistical support for vaccine delivery in order to vaccinate ten percent of Yemenis.”³⁵⁵⁸

On 19 May 2022, Saudi Arabia donated USD1.5 million to support “the development of health facilities in Marawi City, Province of Lanao del Sur, in particular the installation of medical equipment and training of medical personnel.” There was also an “in-kind donation worth USD 1.7 million in the form of medical and personal protective equipment such as surgical sterile gowns, non-sterile surgical gowns, KN95 masks, surgical masks, and nitrile gloves, in addition to 53 ventilators, which arrived a few weeks ago and have been partially distributed to their identified recipients, [...] to support the response measures of the Philippine Government against COVID-19.”³⁵⁵⁹

On 21 May 2022, the Philippines formally welcomed Saudi Arabia’s donation of USD3.2 million in humanitarian and financial aid for the rehabilitation of Marawi City and the country’s COVID-19 response.³⁵⁶⁰ Included in the donation are medical and preventative equipment and supplies which include surgical sterile gowns, non-sterile surgical gowns, KN95 masks, surgical masks, nitrile gloves, and 53 ventilators.

On 23 May 2022, Saudi Arabia announced it had provided more than USD770 million to the COVAX manufacturing facility to accelerate the production of vaccines.³⁵⁶¹

Turkey: 0

Turkey has partially complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 18 December 2021, President Recep Tayyip Erdoğan announced in the third Turkey-Africa Partnership Summit that Turkey will donate 2.5 million doses of COVID-19 vaccines to the African continent.³⁵⁶⁸

On 18 December 2021, President Erdoğan announced, on the second day of the Turkey-Africa Partnership Summit, that Turkey will send 15 million Covid-19 vaccine doses to Africa.³⁵⁶⁹

On 20 February 2022, Turkey delivered 100,000 doses of COVID-19 vaccines to the Democratic Republic of Congo (DRC).³⁵⁷⁰ President Erdoğan also pledged to donate 1.1 million additional doses: 1 million of Sinovac and 100,000 doses of the Turkovac vaccine.

On 22 March 2022, Turkey donated 290,400 doses of the Sinovac vaccine to Somalia.³⁵⁷¹ This action is part of Turkey's donation program of 15 million vaccine doses to Africa.

As of 20 April 2022, Turkey has donated more than 6.3 million doses to 19 countries, including Bosnia and Herzegovina, Montenegro, Kyrgyzstan, North Macedonia, Libya, Moldova, Uzbekistan, Senegal, Tunisia, Turkmenistan and Burkina Faso (within the scope of the grant made on behalf of the Organization of Turkic States), Democratic Republic of Congo, Benin, Niger, Somalia, Tanzania, Mali and Sierra Leone.³⁵⁷²

Turkey has taken action towards increasing the supply of vaccines. However, it has not taken action towards increasing the supply of essential medical products and inputs, as well as decreasing financial constraints.

United Kingdom: +1

The United Kingdom has fully complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 9 November 2021, the UK updated its COVID-19 Response: Autumn and Winter Plan 2021.³⁵⁷³ The report acknowledged that the UK was working to support communities with lower rates of COVID-19 vaccines, as well as to increase the supply of essential medical products such as therapeutics and antivirals. The report also stated that the UK has donated 10.3 million doses of the COVID-19 vaccine bilaterally or through COVAX.

On 16 December 2021, the UK delivered 321,000 AstraZeneca vaccines to Vietnam through COVAX.³⁵⁷⁴

On 23 December 2021, the UK donated four million doses of the AstraZeneca vaccine to Bangladesh.³⁵⁷⁵

On 30 December 2021, the UK announced GBP105 million to help vulnerable countries combat COVID-19, particularly in Africa. The funding “will help millions of people by supporting measures to reduce transmission, scale-up testing, and boost oxygen supplies.”³⁵⁷⁶

On 25 January 2022, the UK donated 2 million doses of the AstraZeneca COVID-19 vaccine to Vietnam.³⁵⁷⁷

On 23 February 2022, the United Kingdom donated one million AstraZeneca vaccine doses to Bangladesh.³⁵⁷⁸

Access Date: 7 October 2022. <https://www.gov.uk/government/news/uk-donates-1-million-more-doses-of-oxford-astrazeneca-vaccine-to-bangladesh#full-publication-upDate-history>

On 2 March 2022, the UK donated 1 million doses of the AstraZeneca COVID-19 vaccine to Bangladesh.³⁵⁷⁹

On 14 April 2022, COVAX received a GBP200 million donation from the UK's MedAccess and Open Society's Soros Economic Development Fund.³⁵⁸⁰

On 19 May 2022, G7 health ministers met in Berlin to discuss and address global health challenges, especially related to COVID-19 and reacting to future pandemics. One of the key results of the meeting included the initiation of the G7-Pact for Pandemic Readiness: "a global network of health experts, aims to strengthen and align efforts for worldwide pandemic readiness. It will work in close cooperation with the World Health Organization (WHO)."³⁵⁸¹ In the meeting, G7 members also agreed to increase their mandatory contributions to the WHO by 50 per cent in the long term. Additionally, G7 Health Ministers discussed the important issue of vaccine equity in a joint session with G7 Development Ministers.

On 6 June 2022, the UK announced it had donated 82.7 million COVID-19 vaccines, making 100 million available.³⁵⁸²

On 26 June 2022, Prime Minister Boris Johnson announced that the UK will provide GBP25 million to the World Bank's new Financial Intermediary Fund (FIF) for pandemic prevention, preparedness, and response. The FIF "will provide funding to countries whose healthcare systems are dangerously unprepared for the challenges caused by large outbreaks of infectious diseases."³⁵⁸³

On 27 August 2022, the Security Agency published a letter stating that the Department of Health and Social Care will develop projects to "support low and middle-income countries in building capacity to prevent, detect and respond to health threats."³⁵⁸⁴

The United Kingdom has taken action towards increasing the supply of vaccines and removing financial constraints. The United Kingdom has also taken actions towards increasing the supply of essential medical products and inputs.

Thus, the United Kingdom receives a score of +1.

United States: +1

The United States has fully complied with its commitment to help boost the supply of vaccines and essential medical products and inputs in developing countries and to remove relevant supply and financing constraints.

On 3 November 2021, the US delivered 100,000 Moderna vaccines to Haiti via COVAX.³⁵⁸⁵

On 21 November 2021, the US directly delivered 2,187,300 AstraZeneca vaccines to Brazil.³⁵⁸⁶

On 24 November 2021, the US directly delivered two million Moderna vaccines to Guatemala.³⁵⁸⁷

On 6 December 2021, the USAID announced a new Global Vaccine Access (Global VAX) initiative to improve international coordination to overcome access barriers to vaccination, with a priority on scaling up support to sub-Saharan Africa. This initiative includes USD400 million to improve vaccine delivery, support in-country manufacturing and additional funding for the USAID's Rapid Response Surge Support.³⁵⁸⁸

On 11 December 2021, the US directly delivered an additional 2 million doses of the Moderna vaccine to Guatemala.³⁵⁸⁹

On 16 December 2021, the US delivered 999,180 doses of the Pfizer vaccine to Bolivia via COVAX.³⁵⁹⁰

On 11 January 2022, the US delivered 39,800 doses of the Pfizer vaccine to Haiti via COVAX.³⁵⁹¹

On 24 January 2022, the US delivered 1,368,900 doses of the Pfizer vaccine to Kenya as well as 100,620 doses of the Pfizer vaccine and 504,000 doses of the Johnson & Johnson (Janssen) vaccine to Mauritania.³⁵⁹²

On 27 January 2022, Vice President Kamala Harris announced during her visit to Honduras that the United States would donate several hundred thousand additional vaccine doses to the country.³⁵⁹³ So far, Washington has sent 3.9 million vaccines to the Central American nation.

On 18 May 2022, according to the ACT-Accelerator, U.S. complementary donations included USD500 million to GAVI, the Vaccine Alliance.³⁵⁹⁴ Additionally, they donated USD400 million to GlobalVAX.

On 24 November 2021, USAID donated USD14.8 million to COVID development in Guatemala.³⁵⁹⁵ The United States Government donated 6.5 million doses of vaccines to Guatemala and 940,000 syringes were supplied. Through donations, USAID helped train healthcare providers as well as medical equipment. USAID donated 50 ventilators and 70 oxygen concentrators.

On 18 January 2022, USAID provided nearly USD50 million to Honduras to help with COVID relief.³⁵⁹⁶ The United States government donated over 3.5 million vaccine doses. These donations make up approximately 40% of the total vaccines administered in the country. USAID provided USD41,800 worth of personal protective equipment (PPE), as well as masks. USAID also provided 12 hospitals, 32 triage centers, and three laboratories with medical supplies which totalled to be USD1.6 million. 44 vital sign monitors, 282 stethoscopes, 130 beds, 58 computers, and almost 11,000 gallons of hand sanitizer. USAID also provided 100,000 PCR tests.

On 3 January 2022, the United States government donated 2.2 million doses of WHO approved vaccines to Zambia.³⁵⁹⁷

On 8 February 2022, 88,920 doses of Pfizer arrived in Haiti from the United States.³⁵⁹⁸

On 16 February 2022, a shipment of 1,310,400 doses of Pfizer vaccine arrived in Bolivia.³⁵⁹⁹

On 16 March 2022, a shipment of 349,830 doses of Pfizer vaccine arrived in Honduras.³⁶⁰⁰

On 21 March 2022, 398,970 doses of Pfizer vaccine arrived in Jamaica.³⁶⁰¹

On 7 April 2022, the US donated 7,877,610 COVID doses to South Africa.³⁶⁰²

On 8 July 2022, the United States National Institutes of Health and Afrigen Biologics Ltd announced a partnership to develop mRNA vaccines.³⁶¹² The partnership aims to increase the knowledge and skills needed to produce mRNA vaccines in low and middle income countries.

On 10 July 2022, 33,600 doses of paediatric Pfizer vaccine were donated to Bhutan.³⁶¹³

On 14 July 2022, 12,000 doses of Pfizer vaccine were donated to Guyana through the COVAX mechanism.³⁶¹⁴

On 19 July 2022, the Secretary of State of the United States Antony Blinken co-hosted the COVID-19 Global Action Plan Foreign Ministerial Meeting with Japan.³⁶¹⁵ The meeting was also attended by the Director General of the World Health Organization Dr. Tedros Adhanom. Their directives included: Bolstering Supply Chain Resilience, Addressing Information Gaps, Supporting Health Care Workers, Ensuring Acute Non-Vaccine Interventions, Strengthening the Global Health Security Architecture.

On 23 July 2022, the United States donated 62 million doses of vaccines to Latin America.³⁶¹⁶

On 29 July 2022, the US Senate Democrat on the Senate Appropriations Committee released the funding bill for 2023 fiscal year, which includes USD5 billion for global COVID-19 response.³⁶¹⁷

The United States has acted in all three commitment areas. They have donated vaccine doses to countries in Latin America and Africa. They have provided developing countries with medical equipment such as PPE, PCR tests and ventilators. Lastly, the U.S. has donated to GlobalVAX, GAVI, as well as COVAX.

Thus, the United States receives a score of +1.

³⁶²⁴ EU and WHO donate new batch of medical equipment for Georgia's COVID-19 response, World Health Organization (Brussels) 10 February 2022. Access Date: 20 May 2022. <https://www.who.int/europe/news/item/10-02-2022-eu-and-who-donate-new-batch-of-medical-equipment-for-georgia-s-covid-19-response>

On 29 March 2022, the European Commission's Directorate-General for European Civil Protection and Humanitarian Aid Operations pledged EUR16 million to help the World Health Organization boost COVID-19 vaccination campaigns and increase coverage in 15 African countries.³⁶²⁵

On 19 May 2022, G7 health ministers met in Berlin to discuss and address global health challenges, especially related to COVID-19 and reacting to future pandemics. One of the key results of the meeting included the initiation of the G7-Pact for Pandemic Readiness: “a global network of health experts, aims to strengthen and align efforts for worldwide pandemic readiness. It will work in close cooperation with the World Health Organization (WHO).”³⁶²⁶ In the meeting, G7 members also agreed to increase their mandatory contributions to the WHO by 50 per cent in the long term. Additionally, G7 Health Ministers discussed the important issue of vaccine equity in a joint session with G7 Development Ministers.

On 2 June 2022, the EIB provided EUR75 million to the Institut Pasteur de Dakar to finance the construction of a new vaccine manufacturing facility in Dakar, Senegal.³⁶²⁷

On 8 June 2022, the European Investment Bank, in close cooperation with the European Union, announced that it will support large-scale investment by South Africa's vaccine manufacturer Biovac in order to increase development and manufacturing of vaccines to "enable a quicker response to future pandemics."³⁶²⁸

On 11 July 2022, the European Union and the World Health Organization contributed essential medicines, consumables and medical equipment to Timor-Leste hospitals.³⁶²⁹ The medical products supplied include pulse oximeters, nasal oxygen cannulas, portable ventilators, non-invasive ventilator machines, oxygen concentrators, surgery sets, catheters, antibiotics, anesthetics and other essential medicines.

The European Union has taken action towards increasing the supply of vaccines, removing financial constraints and towards increasing the supply of medical products.

Thus, the European Union receives a score of +1.

Background

On 1 December 2021, the Food and Agriculture Organization of the United Nations (FAO), the World Organisation for Animal Health (OIE), the World Health Organization (WHO) and the United Nations Environment Programme (UNEP) adopted the definition of One Health as proposed by the One Health High Level Expert Panel (OHHLEP) to be an interdisciplinary concept that “recognizes the health of humans, domestic and wild animals, plants, and the wider environment (including ecosystems) are closely linked and inter-dependent.”³⁶³⁰ While One Health has only explicitly been on the G20 agenda since 2017, it has shaped multilateral discourse on health for far longer, especially under Sustainable Development Goal 3 (SDG3) which promotes Health Systems and Funding.³⁶³¹ The G20 has highlighted the importance of safeguarding against health crises and strengthening health systems ever since the 2014 Ebola outbreak in West Africa.³⁶³² To achieve the goal of combating health

risks from the human-animal-environment interface and pursuing the fight against antimicrobial resistance (AMR), the G20 supports the work of international organisations like the Tripartite (FAO, OIE, WHO) and UNEP.³⁶³³

The 2009 Pittsburgh Summit marked the first time that the G20 highlighted the “responsibility to invest in people by providing...health care” in their agenda for pursuing sustainable economic activity.³⁶³⁴ In light of the financial crisis of 2008, this summit established health as a “critical core spending” area and “fundamental” to the functioning of a prosperous economy.

At the 2010 Toronto Summit, G20 leaders committed to “strengthen social safety nets” by investing in “public health care and pension plans.”³⁶³⁵ This move would build upon “The Framework for Strong, Sustainable and Balanced Growth” that had been established at the 2009 Pittsburgh Summit and support the growth of emerging economies.³⁶³⁶

At the 2013 St. Petersburg Summit, G20 leaders pledged to “improve rapid and effective responses to the outbreak of new diseases that threaten human life and disrupt economic activity” as part of the commitment towards “Promoting Development For All.”³⁶³⁷ To support this goal, G20 members advocated the need for countries to strengthen compliance with the WHO’s International Health Regulations (IHR).

The 2014 Brisbane Summit was significant for the G20’s pledge to fight AMR, in response to the Ebola outbreak in Guinea, Liberia and Sierra Leone. In the G20 Leaders’ Brisbane Statement on Ebola, they agreed to mobilise resources to strengthen global emergency response systems in combating outbreaks of infectious diseases. Underscoring the importance of international cooperation in implementing global health standards as enshrined in the IHR, G20 members also promised to “work through bilateral, regional and multilateral channels, and in partnership with non-governmental stakeholders.”³⁶³⁸ Improving workplace health and safety was also highlighted as a priority at this summit.³⁶³⁹

At the 2016 Hangzhou Summit, G20 leaders decided to further research efforts in their fight against AMR by developing “ways to prevent and mitigate resistance, and unlock research and development into new and existing antimicrobials from a G20 value-added perspective.”³⁶⁴⁰ As G20 members called on the WHO, FAO, OIE, and OECD to report back in 2017 with the findings, this move represents

a situation where the G20 recognised an emerging global threat but left it as an actionable agenda item for future summits.

The 2017 Hamburg Summit marks the first time that the G20 recognised the importance of implementing the “One Health approach” to tackle the spread of AMR in humans, animals, and the environment.³⁶⁴¹ Taking the issue forward, G20 members promised to advocate for “the prudent use of antibiotics in all sectors” and “strengthen public awareness on the issue of antimicrobials in the environment.”³⁶⁴² Moreover, in the G20 Action Plan on Marine Litter, G20 members addressed the link between reducing marine litter to “preserve human health and marine and coastal ecosystems”; this plan reflected the increasing importance of environmental challenges and their effect on human health.³⁶⁴³ Thus, this summit gave a platform to the “One Health approach” and emphasised the interconnectedness of all three health components in furthering SDG3.

At the 2018 Buenos Aires Summit, G20 leaders promoted the work of the WHO and other international actors in developing an action plan to aid the implementation of health-related aspects of SDGs by 2030.³⁶⁴⁴ While not explicitly mentioning the One Health approach, this commitment shows that international support for advances in health was on the G20 agenda.

At the 2019 Osaka Summit, G20 leaders acknowledged the UN Secretary-General’s report on AMR as well as the research conducted by AMR Research and Development (R&D) Hub as products of the One Health approach in their framework for tackling AMR. G20 members also encouraged “all stakeholders including international organizations to act and coordinate on those items relevant to their missions that contribute to global efforts to combat AMR.”³⁶⁴⁵ This summit represents how G20 members reallocated stewardship of antimicrobials to effective actors.

At the 2021 Rome Summit, G20 leaders committed to “pursue a One Health approach to global, regional, national and local levels.”³⁶⁴⁶ They established a G20 Joint Finance-Health Task Force which would open up opportunities for dialogue on safeguarding against health crises, and report back on its findings by early 2022 “to ensure adequate and sustained financing for pandemic prevention, preparedness and response (PPR).”³⁶⁴⁷ G20 members also emphasised the central role of SDG3, specifically Universal Health Coverage (UHC), in shaping multilateral efforts to “address risks emerging from the human-animal-environment interface, particularly the emergence of zoonotic diseases.”³⁶⁴⁸ Finally, G20 members pledged to “encourage the implementation of Ecosystem-based

Approaches” in efforts to call attention to the environmental health component of the One Health approach.³⁶⁴⁹

Commitment Features

To define the key terms in this commitment, “integrate” refers to “combine two or more things in order to become more effective”³⁶⁵⁰ or “to incorporate into a larger unit.”³⁶⁵¹ In the context of this commitment, “integrate” means to incorporate the One Health approach into existing and future policies and decision-making processes that aim to strengthen global health systems.

“Implementation” is defined as “the process of making something active or effective.”³⁶⁵² In context of this commitment, “implementation” can be interpreted to mean taking steps forward in the near future; it should not be interpreted to mean only prolonged or delayed actions.³⁶⁵³

The concept of “One-Health” refers to “an integrated, unifying approach that aims to sustainably balance and optimize the health of people, animals and ecosystems.”³⁶⁵⁴ Thus, the “One Health approach” refers to the way it “mobilizes multiple sectors, disciplines and communities at varying levels of society to work together to foster well-being and tackle threats to health and ecosystems, while addressing the collective need for clean water, energy and air, safe and nutritious food, taking action on climate change, and contributing to sustainable development.”

G20 leaders committed to integrate the implementation of a One Health approach through two pillars of cooperation: relevant policies and decision-making processes. The term “policies” is defined as “high-level overall plans embracing the general goal and acceptable procedures especially of a governmental body.”³⁶⁵⁵ In the context of this commitment, “policies” is understood to mean health-related plans endorsed by national, bilateral and international actors. “Decision-making” is defined as “the act or process of deciding something especially with a group of people.”³⁶⁵⁶ The term “processes” refers to “a series of actions that produce something or that lead to a particular result.”³⁶⁵⁷ Thus, in the context of this commitment, the term “decision-making processes” can be understood to mean the processes of collaborating with national and international actors to improve health systems.

This commitment requires taking action in all three components of the One Health approach: human health, animal health, environmental health. Some key priority areas include, but are not limited to, food safety, sustainable agriculture, food safety, antimicrobial resistance (AMR), nutrition, animal and

plant health, fisheries and livelihoods,³⁶⁵⁸ the control of zoonoses (diseases that can spread between animals and humans, such as flu, rabies and Rift Valley Fever).³⁶⁵⁹

Full compliance, or a score of +1, is awarded to G20 members who demonstrate action in integrating the implementation of all three components of the One Health approach in relevant policies and decision-making processes. A G20 member must take action in all three components, each in both relevant policies and decision-making processes, for full compliance. Examples of strong actions regarding policies include, but are not limited to: ensuring consistency across the standard-setting activities of the three organizations (intergovernmental standards of the OIE, IHR of the WHO, international food standards of the Codex Alimentarius),³⁶⁶⁰ promoting food safety at international levels, reinforcing veterinary and plant health infrastructure and safe food and animal production practices from farm to table, financing capacities of food and agriculture sectors to combat and minimize the risks of AMR,³⁶⁶¹ scaling up the implementation of Ecosystem-based Approaches.³⁶⁶² Examples of strong actions regarding decision-making processes include, but are not limited to: engaging with countries to reinforce national and regional human health, animal health and food safety services; developing capacities at regional, national and local levels for surveillance and rapid response to emerging infectious diseases and zoonotic diseases; promoting coordinated research and development to achieve a common understanding of the highest priority zoonotic diseases;³⁶⁶³ and understanding risk factors for disease spillover from wildlife to domestic animals and humans.³⁶⁶⁴ Strong national action could include drafting and implementing new laws or policies; signing and/or ratifying international agreements; or launching new initiatives or programs that aim to integrate One Health into relevant policies and decision-making processes. Both international and national actions count towards compliance.

Examples of weak action for both pillars of cooperation include attendance at international conferences and verbal reaffirmations in support of the One Health approach without taking any concrete action, sharing innovation and best practices to support integrating the implementation of the components of One Health. As well, if a G20 member makes a statement on future intentions to integrate the implementation of any of the components of One Health without implementing that intention before the compliance cycle is over, it would be considered an example of weak action.

Partial compliance, or a score of -1, is awarded to members who either take weak action in integrating the implementation of all three components of the One Health approach in relevant policies and/or decision-making processes; or take strong action in integrating the implementation of one or two components in either relevant policies or decision-making processes. If a G20 member takes action in all three components but action for each component is in either relevant policies or decision-making processes, it would still be considered partial compliance.

Non-compliance, or a score of -1, is awarded to members who do not demonstrate action to integrate the implementation of the three components of the One Health approach in relevant policies and decision-making processes.

Scoring Guidelines

-1	The G20 member did NOT integrate the implementation of the three of the components of the One Health approach in relevant policies NOR in decision-making processes.
0	The G20 member somewhat took action to integrate the implementation of the three key components of the One Health approach in relevant polices OR decision-making processes.
+1	The G20 member took strong action to integrate the implementation of the three key components of the One Health approach in BOTH relevant policies AND decision-making processes.

*Compliance Director: Saarah Khan
Lead Analyst: Tammy Cheng*

Argentina: +1

Argentina has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Argentina signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse deforestation.³⁶⁶⁵ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 2 February 2022, the Ministry of Health authorized the administering of the COVID-19 booster dose to adolescents aged from 12 to 17.³⁶⁶⁶ The goal of this authorization was to prolong the protective effect of the initial COVID-19 vaccination scheme against the current epidemiological situation.

On 15 February 2022, the Ministry of Health and the Pan-American Health Organization (PAHO) organized the Second International Seminar on Food and Nutrition in Primary Health Care.³⁶⁶⁷ The goal of this seminar was to endorse recommendations from the World Health Organization (WHO) and provisions of the UN Decade of Action for Nutrition's Work Plan in relation to the universal coverage of nutrition in health systems.

On 17 February 2022, the Ministry of Environment and Sustainable Development, through its National Directorate for Environmental Education and Citizen Participation, held two training sessions on environmental education in the towns of Trevelin and Lago Puelo in the province of

Chubut.³⁶⁶⁸ The goal of the training sessions was to increase public awareness about agroecology, composting and gender and the environment.

On 17 February 2022, Minister of the Environment and Sustainable Development Juan Cabandié and President of the Federal Council for the Environment (COFEMA) and Secretary of the Environment of La Rioja Santiago Azulay inaugurated the 43rd Extraordinary Assembly on Prevention of Fire and Wetlands at San Luis.³⁶⁶⁹ The goal of this meeting was to establish an administrative protocol for forest fire prevention to protect biodiversity.

On 22 February 2022, Minister of Health Carla Vizzotti, Chief of Staff Sonia Tarragona and Coordinator of the Appropriate Use of Antimicrobials Laura Barcelona met with specialists from the National Institute for Health and Care Excellence in London to discuss accessibility to higher-priced medicines and shared risk mechanisms for both governments.³⁶⁷⁰ The goal of this collaboration was to strengthen decision-making processes in healthcare systems for both countries.

On 9 March 2022, Minister Vizzotti and Chief of Staff Tarragona started the Health Systems Global Southern Cone Pre-Regional Conference.³⁶⁷¹ The conference aimed to bring together experts and government officials to address the challenges of health systems.

On 15 March 2022, Foreign Minister Santiago Cafier met with the United Arab Emirates' Minister of Foreign Affairs and International Cooperation Sheikh Abdullah bin Zayed to discuss cooperation in food, agriculture and energy.³⁶⁷² Notably, they talked about diversifying the energy sector by looking at wind energy, solar energy and green hydrogen.

On 1 April 2022, scientists from the National Institute for Fisheries Research and Development Nadia Marina Alves and Julieta Rodriguez embarked on the "One Ocean" expedition from Ushuaia, Argentina to Cape Horn, Chile.³⁶⁷³ The goal of their expedition was to visit different ports and share knowledge about the crucial role of the oceans for sustainable development.

On 23 May 2022, Minister Vizzotti attended the WHO's 75th World Health Assembly in Geneva, Switzerland under the theme "Health for Peace, Peace for Health."³⁶⁷⁴ Minister Vizzotti stated that it was important to strengthen regional capacities for the production of critical inputs like vaccines in ending the pandemic.

On 3 June 2022, Minister Vizzotti met with Brazil's Secretary of Health Surveillance Arnaldo Medeiros and Ministers of Health from Paraguay, Chile, Uruguay, Peru and Bolivia to analyze the developing situation of monkeypox in the region and evaluate policies to improve medicines and vaccines for treatment.³⁶⁷⁵

On 20 June 2022, Minister Vizzotti met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁶⁷⁶

On 30 June 2022, Minister of Agriculture, Livestock and Fisheries Julián Domínguez met with Brazil's Minister of Agriculture, Livestock and Supply Marcos Montes Cordeiro to pledge their joint commitment to global food security.³⁶⁷⁷ Minister Domínguez emphasized the importance of implementing sustainable practices in the agri-food sector as Argentina and Brazil comprise 10 per cent of the global food supply.

On 1 August 2022, Director of Response to HIV, Sexually Transmitted Infections, Hepatitis and Tuberculosis Mariana Ceriotto and the Director of Epidemiology Carlos Giovacchini relayed plans for improved diagnosis and treatment methods for the control of perinatal infections due to HIV, Syphilis and Hepatitis B in accordance with the EMTCT-Plus framework provided by the PAHO.³⁶⁷⁸ The goal of this action was to reduce and eventually eliminate mother-to-child transmission of disease.

On 4 August 2022, Minister Vizzotti initiated a vaccination plan against COVID-19 for children ages six months to three years.³⁶⁷⁹ Minister Vizzotti emphasized the importance for the youngest section of Argentina's population to be vaccinated in their efforts towards curbing the effects of COVID-19.

On 23 August 2022, Minister Vizzotti announced an investment of more than ARS1,690 million in the National Vaccination Campaign against Measles, Rubella, Mumps and Poliomyelitis. The goal of this campaign is to supply 2.3 million children nationwide with the triple viral and polio vaccines.³⁶⁸⁰

Argentina has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Argentina has sought to improve accessibility to universal healthcare, stay up to date on protocols involving zoonotic diseases like the monkeypox virus and collaborate with international actors like the PAHO, WHO and COFEMA to improve human, animal and environmental health.

Thus, Argentina receives a score of +1.

Analysts: Mehr Yawar, Saarah Khan and Chi Zhang

Australia: +1

Australia has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Australia signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse deforestation.³⁶⁸¹ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 16 November 2021, Australia provided AUD10 million to establish the Healthy Environments And Lives (HEAL) Network to “provide national and international leadership in environmental change and health research.”³⁶⁸² HEAL network partners committed more than AUD6 million in cash, AUD8 million in kind and AUD10 million provided through the National Health and Medical Research Council Special Initiative in Human Health and Environmental Change. The goal of the HEAL network was “to protect the health of the Australian community and build a resilient and responsive health system, based on strong engagement and co-design with federal and state governments, the public health and healthcare sectors, charities, communities, business and industry.”³⁶⁸³

On 17 November 2021, the Department of Agriculture, Water and Environment granted almost AUD500,000 to Food Standards Australia New Zealand to create an international food safety forum.³⁶⁸⁴ The goal of this forum was to identify areas where different countries can collaborate

together on food safety projects that promote science and risk-based approaches consistent with international standards.

On 18 November 2021, Minister for Health and Aged Care Greg Hunt affirmed the commitment “to actively monitor the threat of microbes becoming resistant to antimicrobial treatment— known as antimicrobial resistance (AMR).”³⁶⁸⁵ The goal of this statement was to bolster the creation of a One Health antimicrobial resistance surveillance system that would provide a holistic view of AMR, human health, animal health, agriculture, food and the environment.

On 6 December 2021, Chief Veterinary Officer Mark Schipp travelled to Fiji to strengthen ties with notable Fijian agricultural, animal health and veterinary representatives as part of the Department of Agriculture, Water and the Environment’s Pacific Engagement Program for biosecurity and animal health.³⁶⁸⁶ The goal of this program was to safeguard animal health across the Pacific region by strengthening key multilateral organizations that support reinforcing biosecurity systems of the Pacific community.

On 8 December 2021, Australia collaborated with Pacific Island countries to ensure the continuation of tuna fishery sustainability at the 18th annual meeting of Western and Central Pacific Fisheries Commission (WCPFC).³⁶⁸⁷ The goal of this multilateral collaboration was to ensure the sustainability of global fisheries.

On 12 December 2021, Australia published the National Preventive Health Strategy 2021-2030 to “assist in prevention of diseases, reducing risk factors and keeping people healthy and well.”³⁶⁸⁸ The goal of this strategy was to ensure good health for all, achieve health equity for priority populations and increase preventive health investment.

On 16 December 2021, Australia and the UK Department for International Trade published a chapter of the UK-Australia Free Trade Agreement (FTA) that specifically announced cooperation in the environment and AMR.³⁶⁸⁹ The goal of the FTA is to enhance bilateral work in biosecurity and animal welfare.

On 3 January 2022, Minister for Agriculture and Northern Australia David Littleproud announced an investment of AUD8.4 million over the next four years to prevent, detect and mitigate the impacts of emerging animal diseases and pandemic potential.³⁶⁹⁰ The goal of this initiative was to support wildlife health and early warning capabilities in partnership with Wildlife Health Australia (WHA).

On 28 January 2022, Prime Minister Scott Morrison announced an investment of AUD1 billion towards protecting the Great Barrier Reef over nine years, while supporting 64,000 Queenslanders and their jobs.³⁶⁹¹ The goal of this investment was to support scientists, farmers and Traditional Owners, advance latest marine science and reduce erosion and pollutants.

On 29 January 2022, Australia pledged AUD50 million over the next four years to protect koalas and their habitat.³⁶⁹² The goal of this pledge was to fund habitat restoration, support koala treatment and care training and expand research into the animal's health.

On 25 February 2022, Chief Veterinary Officer Schipp declared that the biosecurity system was continuing to protect against lumpy skin disease which affects cattle and water buffalo and threatens live animal trade.³⁶⁹³ The goal of this action was to raise awareness of this threat within Australia's livestock industry, associated industries, state and territory agricultural departments and farming groups.

On 4 March 2022, Acting Chief Medical Officer Sonya Bennett declared the unfolding situation concerning the Japanese encephalitis virus (JEV) as a Communicable Disease Incident of National Significance after consulting the Australian Health Protection Principal Committee.³⁶⁹⁴ The goal of this declaration was to support the states and territories in educating the communities about JEV, its symptoms, taking appropriate precautions and distributing vaccines to at-risk communities.

On 11 March 2022, Australia invested AUD2.1 billion to combat COVID-19 and influenza in the 2022 winter season.³⁶⁹⁵ The goal of the investment was to support first responders and strengthen the resilience of healthcare systems.

On 15 March 2022, Australia pledged to provide more than AUD35.9 million in funding to severely flood-impacted communities in its eastern regions.³⁶⁹⁶ The goal of this pledge was to ensure the continuity of primary health care and mental health services for flood-impacted Australians and especially those in the worst-hit communities.

On 21 March 2022, Chief Plant Protection Officer Gabrielle Vivian-Smith and Director of Pacific Engagement and International Plant Health Sophie Peterson travelled to Fiji as a part of the Pacific Engagement Program to strengthen partnerships with Fijian health plant representatives.³⁶⁹⁷ The goal

of the program was to build and strengthen regional biosecurity in the Pacific and enhance regional plant health networks to support national biosecurity and protection from plant pests.

On 22 March 2022, Prime Minister Morrison invested AUD63 million to support science and research infrastructure to help protect the Great Barrier Reef and support the businesses and jobs that rely on it.³⁶⁹⁸ The goal of this investment was to support the critical science and research conducted by the Australian Institute of Marine Science that helps Australia manage threats to the health of the Great Barrier Reef.

On 31 March 2022, the Department of Agriculture, Water and Environment signed an agreement with Charles Sturt University to establish a new Biosecurity Training Centre to replace the previous decentralized training arrangements.³⁶⁹⁹ Head of the Biosecurity Group in the Department and Chair of the National Biosecurity Committee Deputy Secretary Andrew Tongue stated that the new centre aims to deliver specialized training for staff to operate and respond to increasing biosecurity risks in challenging and changing environments.

On 8 April 2022, the Department of Agriculture, Water and the Environment and the Pacific Community (SPC) Land Resources Division (LRD) signed a cooperative agreement to strengthen animal health and livestock production systems.³⁷⁰⁰ Director of the SPC LRD Karen Mapusua said “this new partnership will further boost SPC’s ongoing efforts to [operationalize] a One Health approach in the Pacific.” The goal of this cooperative agreement was to strengthen disease surveillance and enhance emergency response capacity in upholding current animal disease status and prevent introducing new diseases in the Pacific region.

On 8 April 2022, Australia pledged AUD85 million in funding toward the Gavi COVAX initiative at the Break COVID Now Summit co-hosted by Germany, Indonesia, Ghana, Senegal and Gavi which is the Vaccine Alliance.³⁷⁰¹ The goal of this investment was to ensure equitable global access to COVID-19 vaccines.

On 21 April 2022, Deputy Secretary Tongue announced an increase in interceptions of Khapra beetle, which is a highly invasive pest, as hitchhiker pests in sea containers.³⁷⁰² As the Khapra beetle threatens Australia’s grain industry and contaminated products pose human health risks, the goal of this announcement was to implement new import regulations.

On 20 May 2022, Acting Chief Medical Officer Bennett announced that the National Incident Centre was monitoring the outbreak of international cases of the monkeypox virus which is a viral zoonotic

disease.³⁷⁰³ This announcement aims to alert Australians about the monkeypox virus, transmission, symptoms and treatments.

On 31 May 2022, Chief Veterinary Officer Schipp and Deputy Chief Veterinary Officer Beth Cookson met with officials from Indonesia's Ministry of Agriculture to discuss the recent detection of the contagious viral animal foot-and-mouth disease (FMD).³⁷⁰⁴ The goal of their meeting was to strengthen bilateral cooperation with Indonesia by sharing knowledge on animal health and biosecurity in combatting and containing the FMD outbreak.

On 7 June 2022, Deputy Secretary of the Department of Agriculture, Water and the Environment David Hazlehurst attended the World Health Organization (WHO) webinar for World Food Safety Day.³⁷⁰⁵ He emphasized that Australia strongly contributes to the development of international food safety standards through its partnership with Codex Alimentarius Commission (Codex) which is the international body for setting food standards.

On 20 June 2022, Minister for Health and Aged Care Mark Butler met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁷⁰⁶ Minister Butler emphasised the commitment to invest in the domestic vaccine production capacity and work with the Indo-Pacific region to strengthen health security.

On 21 June 2022, Secretary of the Department of Agriculture, Water and the Environment and Director of Biosecurity Andrew Metcalfe announced the installment of a holographic display of high-risk food products at Brisbane International Airport as part of a new biosecurity initiative.³⁷⁰⁷

On 1 July 2022, Deputy Secretary Hazlehurst met with representatives from New Zealand, Fiji and Vanuatu to discuss food safety trends and future collaboration opportunities.³⁷⁰⁸ Deputy Secretary Hazlehurst also collaborated with the visiting representatives during the 82nd session of the Executive Committee of Codex to contribute to consumer food safety standards.

On 4 July 2022, Deputy Secretary Metcalfe initiated the new training program at the new Department of Agriculture, Fisheries and Forestry Biosecurity Training Centre in collaboration with Charles Sturt University.³⁷⁰⁹ The aim of the program is to “provide new starters to biosecurity with the foundational knowledge and skills essential for their roles [in] managing biosecurity threats.”

response to the spread of animal diseases, especially FMD and African swine flu (ASF).³⁷¹⁰ Officers seized and investigated pork products that tested positive for FMD and ASF.

On 28 July 2022, Chief Medical Officer Paul Kelly declared monkeypox (MPX) as a communicable disease incident of national significance following the WHO's designation of MPX as a public health emergency of international concern.³⁷¹¹ Chief Medical Officer Kelly also announced the involvement of the National Incident Centre to provide enhanced national coordination to assist states and territories in effectively managing the outbreaks within respective jurisdictions.

On 15 August 2022, the Office of the Chief Veterinary Officer supported the Global Agriculture Leadership Initiative by giving four staff members the greenlight to work overseas at international organizations like the Food and Agriculture Organization.³⁷¹² The aim of this move was to strengthen international standards around animal health, welfare, biosecurity, food safety and AMR.

On 22 August 2022, Australia pledged to spend AUD5 million over the year to boost national biosecurity capabilities.³⁷¹³ Deputy Secretary of Biosecurity and Compliance at the Department of Agriculture, Fisheries and Forestry Chris Locke announced that 24 projects including examining the potential of artificial intelligence to identify high-risk and hitch-hiker pests and the development of a portable dangerous-vapour detection tool would be funded to test pioneering scientific approaches and technologies in combatting biosecurity risks.

On 22 August 2022, the Department of Climate Change, Environment, Energy and Water and the Department of Industry, Science and Resources co-hosted the 31st Korea-Australia Joint Committee on Energy and Mineral Resources with Korea's Ministry of Trade, Industry and Energy.³⁷¹⁴ The goal of the meeting was to cover critical minerals for clean energy expansion, energy supply chain resilience, hydrogen power and carbon capture, utilization and storage.

On 8 September 2022, Australia met the other MIKTA countries of Mexico, Indonesia, Korea and Turkey to address the impact of COVID-19.³⁷¹⁵ The goal of this meeting was to create a 21-point statement as a pledge to better maneuver through the present and any future global health emergencies.

technology to combat the illegal smuggling of wildlife through mail and traveller luggage pathways.³⁷¹⁶ The three departments aim to continue their collaborative work to detect illegal wildlife trafficking at borders.

Australia has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Australia has pursued bilateral actions such as its partnership with Fiji for the Pacific Engagement Program, its FTA with the UK to support agricultural exporters and its meeting with Indonesia to contain the FMD outbreak. Australia has also contributed towards international projects like establishing the global HEAL network, promising the creation of an international food safety forum, partnering with Codex, pledging money towards the Gavi COVAX initiative, attending the WCPFC and working with the WHA to integrate One Health in existing policies.

Thus, Australia receives a score of +1.

Analyst: Kaithyn Zhaoyue Wang

Brazil: +1

Brazil has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Brazil signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse deforestation.³⁷¹⁷ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 23 November 2021, Ambassador of Brazil to India Andre Aranha Correa do Lago held a meeting with India's Minister of Fisheries, Animal Husbandry and Dairying Parshottam Rupala.³⁷¹⁸ The goal of this meeting was to discuss cooperation in the Animal Husbandry and Dairy Sector and India's export of bovine embryos.

On 1 December 2021, the Health Regulatory Agency (ANVISA) approved the first HIV treatment that will combine two different substances in a single pill.³⁷¹⁹ The goal of this action was to provide ease of access to a daily immunity treatment that was previously not available.

On 10 December 2021, the Forest Service successfully implemented the Brazilian Forest Code which analyzed the data of more than 180,000 processes.³⁷²⁰ The goal of this action was to easily verify data declared in the national registry in an automated way thus enabling rural producers who have a deficit of vegetation to start the environmental regularization of their properties.

On 12 December 2021, the Ministry of Health granted BRL9.1 million to five specialized rehabilitation centers in the state of Sao Paulo.³⁷²¹ The goal of this grant was to provide comprehensive and free care to children with congenital Zika syndrome through the Unified Health System.

On 21 February 2022, Secretary of Innovation, Sustainable Development and Irrigation Fernando Camargo attended the first high-level government meeting of the Agriculture Innovation Mission for Climate held in Dubai, United Arab Emirates.³⁷²² Secretary Camargo stated that Brazilian agriculture would continue to increase its productivity while emphasising the decarbonization of food production chains.

On 17 March 2022, the Ministry of Health published a report on challenges for public health in each of the capitals of the 26 Brazilian states and the federal district.³⁷²³ The Ministry of Health also prepared several publications in which it outlined how a regular practice of at least 150 minutes of physical activity per week can help decrease the risk of contracting chronic non-communicable diseases.

On 23 March 2022, the Ministry of Health held the first National Exhibition of Experiences in the Use of the Epidemic Intelligence for Open Source (EIOS) platform.³⁷²⁴ The EIOS tool helps in the digital detection of rumors of public health interest. The goal of the exhibition was to bring together new and existing initiatives, networks and systems to create a unified One Health approach to early detection, verification and assessment of public health threats.

On 28 March 2022, experts from the public University of Sao Paulo launched the One Health Brazilian Resistance platform which was designed to store data on multi-resistance bacteria with genomic, epidemiological and phenotypic information.³⁷²⁵ The goal of developing the platform was to control and monitor the spread of bacteria that the World Health Organization (WHO) had classified to be of “critical priority.”

On 8 April 2022, Brazil pledged USD86.7 million in funding toward the Gavi COVAX initiative at the Break COVID Now Summit co-hosted by Germany, Indonesia, Ghana, Senegal and Gavi which is the

Vaccine Alliance.³⁷²⁶ The goal of this investment was to ensure equitable global access to COVID-19 vaccines.

On 11 April 2022, the Ministry of Health announced that they would train primary healthcare professionals on facilitating the early identification of mental disorders.³⁷²⁷ In partnership with the Albert Einstein Hospital through the WHO's "Mental Health Gap Action Program," the training will teach healthcare workers how to identify related symptoms of mental distress like anxiety, depression, psychotic episodes, suicidal ideation, agitation and aggression crises.

On 10 May 2022, Minister of Health Marcelo Queiroga and China's Minister Ma Xiaowei attended a video meeting to deepen bilateral and multilateral health cooperation.³⁷²⁸ During the conference, the two ministers talked about strengthening communication and coordination in multilateral domains and promoting enhanced bilateral health cooperation.

On 10 May 2022, Minister of Agriculture, Livestock and Supply Marcos Montes Cordeiro met with Egypt's Deputy Minister of Agriculture Moustafa El Sayeed to discuss food security issues.³⁷²⁹ During the meeting, the state-owned Brazilian Agricultural Research Corporation signed a Memorandum of Understanding with Egypt's state-owned Agriculture Research Center to exchange technologies in genetics, sanitation and climate change and preserve the health and safety of animals and plants for the next five years.

On 23 May 2022, Minister Queiroga attended the WHO's 75th World Health Assembly in Geneva, Switzerland under the theme "Health for Peace, Peace for Health."³⁷³⁰ Minister Queiroga highlighted the actions Brazil had taken to strengthen access to health by investing more than USD110 million to triple surveillance capacity and expand specialised services.

On 3 June 2022, Secretary of Health Surveillance Arnaldo Medeiros met with Argentina's Minister of Health Carla Vizzotti and Ministers of Health from Paraguay, Chile, Uruguay, Peru and Bolivia to analyze the developing situation of monkeypox in the region and evaluate policies to improve medicines and vaccines for treatment.³⁷³¹

On 20 June 2022, Minister Queiroga met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic

like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁷³²

On 30 June 2022, Minister Cordeiro met with Argentina's Minister of Agriculture, Livestock and Fisheries Julián Domínguez to pledge their joint commitment to global food security.³⁷³³ Minister Cordeiro emphasized the importance of implementing sustainable practices in the agri-food sector as Brazil and Argentina comprise 10 per cent of the global food supply.

On 11 August 2022, the Ministry of Health and National Supplementary Health Agency published a report on proposals to optimize additional health care services.³⁷³⁴ The aim of this initiative was to promote greater quality and choice of health plans for the 49 million beneficiaries.

On 26 October 2022, Ministry of Agriculture, Livestock and Supply announced the schedule for the second stage national vaccination campaign for foot-and-mouth disease, which will last throughout November.³⁷³⁵ Vaccination will take place in ten states for animals under 24 months old.

On 3 November 2022, Ministry of Health announced the inclusion of the Transcatheter Aortic Valve Impact (ITVA), used in the treatment of severe aortic stenosis, in the Table of Procedure, Medicines, Orthoses, Prostheses and Special Materials of the Unified Health System.³⁷³⁶ The investment totals over BRL50 million and aims at helping about five per cent of the population over 75 years of age.

Brazil has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Brazil has demonstrated its dedication to maintaining the healthcare system through ANVISA's funding of rehab centers and treatment for viruses, by training primary health professionals and by promoting the use of the EIOS tool. Additionally, Brazil has also taken many initiatives to implement a One Health approach in decision-making processes with the first meeting of the Agriculture Innovation Mission for Climate and the meetings with China and Egypt.

Thus, Brazil receives a score of +1.

Analyst: Shuaib Chauhan

Canada: +1

Canada has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Prime Minister Justin Trudeau advocated for an increase in global ambition and action to reduce pollution and create new opportunities for workers at the 26th United Nations Climate Change Conference of the Parties (COP26).³⁷³⁷ Canada committed to provide CAD55 million over three years for The Consultative Group on International Agricultural Research to research and transform systems to promote gender equality, create new jobs and livelihoods and deliver global climate and environmental benefits while strengthening food security and ending hunger.

On 2 November 2021, Canada signed the Glasgow Leaders' Declaration on Forests and Land Use at COP26 to stop and reverse deforestation.³⁷³⁸ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 9 November 2021, Minister of Environment and Climate Change Steven Guilbeault announced a CAD10 million investment over five years towards the Climate Clean Air Coalition (CCAC) Trust Fund.³⁷³⁹ The goal of the CCAC fund was to reduce short-lived climate pollutants to fight climate change and protect human health and to “integrate national climate and clean air strategies to reduce the emissions of short-lived climate pollutants across key sectors.”

On 8 December 2021, Minister Guilbeault announced that 105 species at risk conservation projects for 2021-2022 will be funded by more than CAD5.4 million through the Habitat Stewardship Program and the Aboriginal Fund for Species at Risk.³⁷⁴⁰ The goal of this investment was to conserve and restore nature and combat climate change to reduce biodiversity loss.

On 9 December 2021, Minister of Health Jean-Yves Duclos announced an investment of CAD13.7 million in 89 new COVID-19 research projects across Canada.³⁷⁴¹ The research projects include 70 projects focused on understanding impacts of COVID-19 on children, youth and families and 19 projects focused on promoting vaccine confidence and encouraging vaccination among groups with low vaccination rates. The goal of this action was to “provide evidence to help governments, communities, and health care providers” for future pandemic management.

On 14 January 2022, Minister Duclos announced the creation of the Centre for Research on Pandemic Preparedness and Health Emergencies, housed by the Canadian Institutes of Health Research

(CIHR).³⁷⁴² The goal of this centre was to collaborate with other federal departments and agencies, and domestic and international stakeholders and “mobilize knowledge to prevent, prepare for, respond to, and recover from existing and future pandemics and public health emergencies.”

On 19 January 2022, Parliamentary Secretary to the Minister of Agriculture and Agri-Food Francis Drouin and the Saskatchewan Agriculture Minister David Marit announced a CAD5.1 million fund towards new research projects related to livestock and forage in 2022.³⁷⁴³ The goal of this funding was to support 28 projects through Saskatchewan’s Agriculture Development Fund to research subjects such as “the potential of native and tame forage species to enhance carbon sequestration, expanded methods for reproduction diagnostics and improved control and treatments with respect to animal health.”

On 28 January 2022, Canada joined the Sustainable Productivity Growth for Food Security and Resource Conservation (SPG) coalition.³⁷⁴⁴ The goal of the coalition was to take a holistic approach towards developing strategies focused on accelerating the transition to more sustainable food systems through agricultural productivity growth that optimizes sustainability across social, economic and environmental dimensions.

On 17 February 2022, Minister of Agriculture and Agri-Food Marie-Claude Bibeau pledged up to CAD1.5 million for Outcast Foods Inc. to expand their level of food waste reduction that upcycles surplus and unsaleable fruits and vegetables into dried, plant-based powders and solid food ingredients.³⁷⁴⁵ The goal of this funding was to strengthen sustainable food production processes and enhance local food infrastructure to lessen food waste.

On 4 March 2022, Minister Duclos, Minister of Mental Health and Addictions Carolyn Bennett and Minister for Women and Gender Equality and Youth Marci Ien announced the investment of CAD26.3 million in 69 new COVID-19 research projects.³⁷⁴⁶ The goal of this investment was to support a more equitable pandemic recovery for all Canadians but especially for the disproportionately impacted Canadians.

On 11 March 2022, Chief Veterinary Officer Mary Jane Ireland and the US’ Chief Veterinary Officer Rosemary Sifford launched a new protocol to guide the cross-border transit of animals in emergency situations called the Emergency Transit Policy for Regulated Animals.³⁷⁴⁷ The goal of this policy was to make it easier to evacuate animals during natural disasters.

On 23 March 2022, the CIHR and its partners announced their support for two new research initiatives that align with the UN Research Roadmap.³⁷⁴⁸ The first investment is worth CAD20 million towards Women RISE which is led by the International Development Research Centre for an equitable COVID-19 recovery. The second investment is worth CAD24 million towards the New Frontiers in Research Fund 2022. The initiatives aim to support global recovery from the COVID-19 pandemic.

On 6 April 2022, Minister Bibeau and Manitoba Agriculture Minister Derek Johnson announced an investment of CAD2.2 million to modernize Manitoba's Animal Health Laboratory Information Management System.³⁷⁴⁹ The goal of this investment was to strengthen Manitoba's animal disease surveillance program, improve overall diagnostic service delivery in agriculture and enhance capacity to diagnose animal diseases.

On 8 April 2022, Canada pledged CAD220 million in funding toward the Gavi COVAX initiative at the Break COVID Now Summit co-hosted by Germany, Indonesia, Ghana, Senegal and Gavi which is the Vaccine Alliance.³⁷⁵⁰ The goal of this investment was to ensure equitable global access to COVID-19 vaccines.

On 11 April 2022, Minister of Housing and Diversity and Inclusion Ahmed Hussen added CAD470 million to the On-Farm Climate Action Fund.³⁷⁵¹ On 22 February 2022, Minister Bibeau and Parliamentary Secretary Drouin had pledged up to CAD187.2 million for 12 recipient organizations to deliver the On-Farm Climate Action Fund across Canada.³⁷⁵² The goal of the fund was to support farmers in areas like cover-cropping, nitrogen management and rotational grazing and assist domestic producers in meeting national emissions reduction targets, improving resilience to climate change and strengthening agricultural competitiveness.

On 25 April 2022, Minister Duclos announced a CAD6.7 million investment fund for a new pediatric COVID-19 research platform called the Pediatric Outcome Improvement through Coordination of Research Networks (POPCORN).³⁷⁵³ POPCORN will support 16 research sites in pediatric hospitals across Canada and "facilitate the sharing of COVID-19 information between these sites to ensure a coordinated research response." This action aims to mobilize research organizations to provide the latest evidence to national and global decision-makers.

On 27 April 2022, Minister Bibeau invested up to CAD1.9 million to help the Canadian Food Innovation Network develop a digital food innovation hub.³⁷⁵⁴ The goal of this project was to collaborate with the individual components of the national food ecosystem and create an interactive online community by developing and utilizing digital technology.

On 5 May 2022, Minister Guilbeault pledged CAD2.8 million to SaskPower from the Low Carbon Economy Fund to support its Northern First Nations Home Retrofit Program.³⁷⁵⁵ The program aims to reduce energy costs for Northern First Nations communities by retrofitting homes with improved insulation, upgraded pipes and LED light installation. This action aims to continue to fulfill Canada's commitment to combating climate change and building a strong clean economy.

On 13 May 2022, Minister Bibeau met with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.³⁷⁵⁶ The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

On 19 May 2022, Minister Duclos met with other G7 Health Ministers in Berlin to discuss the integration of One Health within existing systems.³⁷⁵⁷ The G7 ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization (WHO).

On 23 May 2022, Minister Duclos attended the WHO's 75th World Health Assembly in Geneva, Switzerland under the theme "Health for Peace, Peace for Health."³⁷⁵⁸ Minister Duclos supported the idea of a new multilateral instrument aimed at ensuring better emergency preparedness.

On 24 May 2022, Minister Duclos announced that there are "many actions underway to identify and contain the spread of monkeypox in Canada" and that they are prepared to respond to emerging public health events and take precautions to prevent the introduction and spread of communicable diseases.³⁷⁵⁹ This statement aims to reflect on Canada's ongoing efforts to address the emergence of new monkeypox cases.

On 24 May 2022, Minister Bibeau invested over CAD15.2 million under the Agricultural Clean Technology (ACT) Program to support the adoption of clean technologies for 47 projects throughout

³⁷⁵⁹ Statement from the Minister of Health on Canada's Response to Monkeypox, Public Health Agency of Canada (Ottawa) 24 May 2022. Access Date: 11 June 2022. <https://www.canada.ca/en/public-health/news/2022/05/statement-from-the-minister-of-health-on-canadas-response-to-monkeypox.html>

Canada.³⁷⁶⁰ The goal of this investment was to reduce greenhouse gas emissions through advancing research and innovation, increasing the number of farmers adopting beneficial management practices and facilitating their access to clean technologies.

On 30 May 2022, Minister Bibeau and Minister Marit pledged CAD3.2 million in funding for research on carbon sequestration in perennial forage and pastures.³⁷⁶¹ The project is co-funded by the Saskatchewan Cattlemen's Association and jointly undertaken by Angela Bedard-Haughn of the University of Saskatchewan and Cameron Carlyle of the University of Alberta over the next five years. The goal of this project was to advance research to address the complex challenges faced by the agricultural and agri-food sectors.

On 1 June 2022, Minister of Natural Resources Jonathan Wilkinson launched the first phase of the Regional Energy and Resource Tables as part of “the commitment to work with provinces, territories and other partners to take advantage of the unprecedented economic opportunities presented by a low-carbon future.”³⁷⁶² This initial phase of engagement will focus on British Columbia, Manitoba and Newfoundland and Labrador and prepare the provinces to seize the opportunities enabled by a low-carbon future. The initiative aims to take advantage of the economic opportunities fostered by a low-carbon future.

On 2 June 2022, Minister Guilbeault and India's Minister of Environment, Forest and Climate Change Bhupender Yadav signed a Memorandum of Understanding (MOU) to increase bilateral cooperation on climate action and environmental protection and conservation.³⁷⁶³ The goal of this MOU was to work more closely with India to support the collective interests of shifting to a zero-plastic waste future.

On 6 June 2022, Parliamentary Secretary to the Minister of Innovation, Science and Industry Andy Fillmore announced the CIHR's investment of CAD1.5 million towards three projects in Nova Scotia.³⁷⁶⁴ The goal of this investment was to fund the study of the wider health impacts of COVID-19 on children with complex health needs and equity-deserving communities as part of the ongoing investments in research to support the national COVID-19 response.

On 9 June 2022, Minister Bibeau participated in the annual Group Export Agri-Food Québec-Canada meeting and pledged up to CAD2,731,384 over two years to help exporters increase the volume and

On 18 July 2022, Minister Bibeau announced 28 additional projects under the ACT program and pledged more than CAD8.7 million to adopt clean technology across Canada.³⁷⁷¹ The expanded program aims to reduce greenhouse gas emissions by 0.8 megatons per year and drive changes needed to achieve a low-carbon economy.

On 3 August 2022, Minister Bibeau pledged over CAD1.8 million under the AgriAssurance Program to assist Bioindustrial Innovation Canada.³⁷⁷² This pledge aims to support Bioindustrial Innovations Canada in advancing quality standards to accelerate the growth of the agriculture sector's bioeconomy.

On 8 August 2022, Minister Bibeau announced up to CAD3 million under the AgriAssurance Program to three national organizations to enhance animal welfare and tracking.³⁷⁷³ The aim of this investment was to improve capacities for implementing best agricultural practices to improve animal welfare.

On 15 August 2022, Minister Bibeau and Member of Parliament Kody Blois announced an investment of CAD8.5 million under the On-Farm Climate Action Fund for Perennia Food and Agriculture Inc. to support farmers across Nova Scotia, Newfoundland and Labrador.³⁷⁷⁴ The goal of this investment was to help farmers adopt sustainable farming practices to build climate change resilience.

On 26 August 2022, Minister Bibeau announced an investment of CAD45.3 million to enhance the preparedness and prevention efforts against African swine fever.³⁷⁷⁵

On 6 September 2022, Parliamentary Secretary Drouin announced an investment of more than CAD1.4 million to support SixRing Inc.'s low-energy biomass conversion process that converts agricultural wastes into renewable fuels and sustainable materials.³⁷⁷⁶ This investment aims to advance clean technology that can improve the bottom line for farmers while lowering greenhouse gas emissions.

Canada has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Canada has pursued actions on an international level like the climate pledge at COP26, the investment towards the CCAC Trust Fund, joining the SPG coalition and working with WHO Health Ministers of the Americas as well as collaborating with G20 ministers to implement a One Health approach in decision-making processes. Canada has also implemented a One Health approach in policies as seen with its creation of the Centre

for Research on Pandemic Preparedness and Health Emergencies, the funding of COVID-19 research projects and the establishment of national resources like POPCORN and ACT.

Thus, Canada receives a score of +1.

Analyst: Kaitlyn Zhaoyue Wang

China: +1

China has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, China signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse deforestation.³⁷⁷⁷ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 5 November 2021, Vice Minister of Agriculture and Rural Affairs Ma Youxiang delivered a keynote speech in Shanghai at the Cooperation for Development: Global Agricultural Trade and Rural Revitalization which is a parallel session under the fourth Hongqiao International Economic Forum.³⁷⁷⁸ The goal of the agriculture-focused parallel session was to provide a “platform for the political community, academia, and industry” from domestic and abroad to exchange knowledge on “promoting global agricultural trade and rural revitalization in China.”

On 26 November 2021, Minister of the National Health Commission Ma Xiaowei and the UK's Secretary of State for Health Sajid Javid attended a video conference to strengthen China-UK health collaboration.³⁷⁷⁹ During the conference, Minister Ma and Secretary Javid exchanged in-depth knowledge on issues such as COVID-19 prevention and control, diagnosis, treatment and testing, vaccine research and development and global health security.

On 2 December 2021, Chief Veterinary Officer Li Jinxiang announced the commitment to address key issues in researching the Classical Swine Fever (CSF) and African Swine Fever (ASF) and developing eradication strategies for CSF and control measures for ASF at the 2021 International Symposium on CSF.³⁷⁸⁰ In response to the COVID-19 pandemic, the World Organization for Animal Health (OIE), the Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) committed to furthering cooperation. Chief Veterinary Officer Li additionally noted that this cooperation implemented the One Health concept regarding health threats to human beings, animals, plants, the environment and provided new perspectives for controlling global major animal diseases.

On 8 December 2021, Vice Minister Ma pledged to cooperate with the Pacific Island Countries (PICs) to forge a closer relationship based on equality and mutual benefit in four ways at the First China-PICs

Forum on Fishery Cooperation in Guangzhou, Guangdong.³⁷⁸¹ Firstly, by improving mechanisms such as establishing a multilateral intergovernmental consultation mechanism on fisheries. Secondly, by jointly combating illegal, unreported and unregulated fishing and leveraging the South-South Cooperation Trust Fund with the FAO. Thirdly, by enhancing cooperation in aquacultural technology, fishery facilities and equipment and aquatic products processing. Lastly, by promoting market access and free trade and investment in PICs concerning fishing, fishing harbour construction, fishing boat repair and building and cold chain logistics.

On 13 December 2021, Vice Premier Sun Chunlan pledged to further efforts in strengthening international health cooperation and making a more significant contribution in promoting global health equity. Vice Premier Sun said “the Chinese government has always given top priority to the safety of people’s lives and health, ensuring the health and safety of about one-sixth of the world’s population, and the medical and health system has withstood the test of COVID-19.”³⁷⁸² The goal of this statement was to support the health systems of developing countries to promote global health equity and “build a community of common health for humanity.”

On 14 January 2022, the Ministry of Agriculture and Rural Affairs and the FAO signed the General Agreement on Phase III of the China-FAO South-South Cooperation Trust Fund.³⁷⁸³ Under this agreement, China pledged to donate an additional USD50 million to the FAO to accelerate the implementation of the UN 2030 Agenda for Sustainable Development and promote development in developing countries.

On 15 February 2022, Chief Epidemiologist at the Chinese Center for Disease Control and Prevention Wu Zunyou discussed the utilization of teams to study necessary improvements in national COVID-19 prevention and control measures.³⁷⁸⁴ The goal of this initiative was to control the spread of the epidemic.

On 10 March 2022, Vice Minister Ma attended the Ministerial Session of the 36th FAO Asia and Pacific Regional Conference and discussed China’s position on priority development areas of safeguarding food security in Asia and the Pacific region.³⁷⁸⁵ During the conference, Vice Minister Ma presented three proposals to work towards this goal: by prioritizing the development of agriculture and rural affairs and actively supporting the Global Development Initiative, by adhering to green agricultural development and by strengthening regional coordination and conducting cooperation to prevent animal and plant diseases.

On 13 April 2022, the Ministry of Agriculture and Rural Affairs committed to ensuring the production of spring farming and agricultural supplies to meet consumer demands amidst the domestic resurgence of COVID-19.³⁷⁸⁶ The Ministry strived to prevent and control pests and diseases during the spring

farming season whilst ensuring a steady supply of agricultural machinery parts and transportation of farm produce.

On 20 April 2022, China and Russia held the 30th Meeting of the Mixed Committee on Fisheries Cooperation.³⁷⁸⁷ The goal of this cooperative meeting was to talk about collaborative fishing protocols and agreements, discuss mutual interests, review bilateral cooperation and identify necessary measures to crack down on the illegal trade of aquatic produce.

On 27 April 2022, Vice Minister Ma and Cambodia's Secretary of State for the Ministry of Agriculture, Forestry and Fisheries Hean Vanhan co-chaired the second meeting of the China-Cambodia Steering Committee on Agricultural Cooperation.³⁷⁸⁸ During the conference, the two ministers exchanged agricultural knowledge, deepened bilateral cooperation and signed a Memorandum of Understanding to promote cooperation in the banana industry.

On 1 May 2022, China implemented the annual summer fishing ban in the seas in the north, south and east regions to conserve marine fishery.³⁷⁸⁹ Covering the Bohai Sea, the Yellow Sea, the East China Sea and the northern areas of the South China Sea, this fishing ban aims to promote sustainable marine fishery development and improve marine ecology.

On 10 May 2022, Chief Veterinary Officer Li delivered a keynote speech at FAO's Asia-Pacific Regional Launch Event of the Global Action on Green Development of Special Agricultural Products: One Country One Priority Product.³⁷⁹⁰ The goal of this action was to collaborate at a multilateral level to improve the efficiency, inclusivity, resiliency and sustainability of agri-food systems by boosting the green development of respective special agro-products.

On 10 May 2022, Minister Ma and Brazil's Minister of Health Marcelo Queiroga attended a video meeting to deepen bilateral and multilateral health cooperation.³⁷⁹¹ During the conference, the two ministers talked about strengthening communication and coordination in multilateral domains and promoting enhanced bilateral health cooperation.

On 18 May 2022, China and Vietnam jointly held fishery release activities in the Beibu Gulf in Beihai, China, and Halong, Vietnam.³⁷⁹² Vice Minister Ma and Vietnam's Deputy Minister of Agriculture and Rural Development Phung Duc Tien underlined the importance of fish release and restocking, law enforcement of fishery and fisheries emergency response.

On 22 May 2022, Minister Ma attended the 75th World Health Assembly and delivered a speech via video conference on the theme of "Health For Peace, Peace For Health."³⁷⁹³ The goal of this event

was to cooperate with the international community to facilitate the construction of a global community of health and show continuous support for WHO in promoting fair access to COVID-19 vaccinations.

On 25 May 2022, the Ministry of Agriculture and Rural Affairs launched the first voluntary fishing moratorium covering international waters in the northern Indian Ocean.³⁷⁹⁴ All distant-water fishing vessels will suspend operations in targeted waters during the moratorium period.

On 20 June 2022, Minister Ma met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁷⁹⁵

On 28 June 2022, Minister Ma met with US Ambassador to China Nicholas Burns to exchange views on bilateral health communication and cooperation.³⁷⁹⁶ The goal of the meeting was to exchange COVID-19 prevention and control policies and scientific measures while enhancing Sino-US diplomatic relations.

On 29 July 2022, Vice Minister Ma and Korea's Vice Minister of Oceans and Fisheries Song Sang-Keun attended the 4th China-ROK Joint Fish release held simultaneously in Yantai, China and Mokpo, Jeollanam-do, Korea.³⁷⁹⁷ The release of over two million fish fry of various aquatic species such as black rockfish, small yellow croakers, gazami crabs and green fin horse-faced filefish into the Yellow Sea celebrated the 30th anniversary of the establishment of China-ROK diplomatic relations. The goal of this event was to strengthen bilateral cooperation in marine ecological conservation and the rehabilitation of marine fishery resources.

On 17 August 2022, China allocated RMB300 million towards relief funds to assist agricultural production in regions affected by floods, droughts and typhoons.³⁷⁹⁸ The fund aimed to “subsidize the purchase of seeds, seedlings, fertilizers, pesticides and other materials needed by the disaster-stricken areas, as well as for the restoration of agricultural production facilities.”

On 19 August 2022, the Ministry of Agriculture and Rural Affairs sent agricultural experts to Phnom Penh, Cambodia for a 60-day assistance mission regarding agricultural development planning.³⁷⁹⁹ The goal of the dispatch mission was for China to support Cambodia in formulating their national modern agriculture development plan and strengthen bilateral cooperation in processing agricultural products as part of the Belt and Road Forum for International Cooperation.

action was to strengthen global cooperation to promote innovative development, stabilize global agricultural supply chains and promote sustainable agricultural development.

On 9 September 2022, Deputy Director-General of the Foreign Economic Cooperation Center of the Ministry of Agriculture and Rural Affairs Li Zhiping and Deputy Director of the Department of International Cooperation of Ministry of Agriculture and Rural Affairs Wei Zhenglin hosted Germany's Deputy Director of the Department of International Cooperation and World Food Affairs of the Federal Ministry of Food and Agriculture Cornelia Berns at the Kickoff Meeting for Phase III Project of the Sino-German Agricultural Centred.³⁸⁰¹ The goal of this meeting was to enhance Sino-German agricultural cooperation.

On 12 September 2022, the Ministry of Agriculture and Rural Affairs, the Chinese Academy of Agricultural Sciences and the Consultative Group on International Agricultural Research co-hosted the Second International Wheat Congress.³⁸⁰² The goal of this congress was for wheat scientists to cooperate and develop strategies for the effective use of wheat genetic resources and increase wheat productivity by promoting genetic resource propagation.

On 15 September 2022, Chief Livestock Officer Zhang Tianzuo attended the 2022 Shanghai Cooperation Organization Modern Agriculture Development Roundtable co-sponsored by the People's Government of Shaanxi Province and the Shanghai Cooperation Organization.³⁸⁰³ Chief Livestock Officer Zhang emphasized the importance of strengthening exchanges in agricultural technology while accelerating global poverty reduction and economic and social progress.

China has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Their level of compliance is demonstrated through their efforts to strengthen international health cooperation by working with the FAO, OIE, WHO and G20 Health Ministers, discussing key health issues at the Cooperation for Development: Global Agricultural Trade and Rural Revitalization conference, collaborating with the PICs on fishery and strengthening bilateral relations with the UK and Brazil on COVID-19 prevention and control techniques.

Thus, China receives a score of +1.

and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 5 November 2021, France ordered a “poultry lockdown” whereby farmers had to keep poultry flocks indoors amid a “rising infection rate” of bird flu.³⁸⁰⁵ The goal of this measure was to protect poultry farms from the spread of infection.

On 18 November 2021, the Senate voted to adopt a new animal welfare law aimed to fight against animal malpractice and the treatment of animals as “toys” or “consumable goods.”³⁸⁰⁶ The law included a gradual ban on the use of animals in dolphinariums and circuses, a ban on selling cats and dogs on advertisement websites and pet farms and the requirement for pet owners to sign an animal responsibility certificate.

On 2 January 2022, France’s ban on the use of plastics to package most fruits and vegetables came into effect.³⁸⁰⁷ The goal of this legislation is to discourage the use of single use plastic and eliminate about “1 billion items of plastic waste a year.”

On 9 February 2022, France signed a EUR50 million contribution agreement with the World Health Organization (WHO) in support of the Response Connector and ACT-Accelerator Health Systems to help strengthen health systems and combat the COVID-19 pandemic.³⁸⁰⁸

On 11 February 2022, President Emmanuel Macron initiated the One Ocean Summit in the port city of Brest to discuss protecting the planet’s oceans from overfishing and plastic pollution.³⁸⁰⁹ President Macron stated that “France met its coalition commitments by extending protected areas in the French Southern and Antarctic Territories.” The goal of this summit was to recognize the transboundary aspects of plastic pollution and initiate new commitments towards the protection of the oceans.

On 22 February 2022, France adopted a law banning imports of meat from animals treated with growth antibiotics.³⁸¹⁰ While the ban will be effective from 22 April 2022 onwards, the goal of this action is to combat antimicrobial resistance (AMR) in the poultry market.

On 7 March 2022, France hosted the One Health ministerial conference on AMR in Paris as part of its EU Presidency duties.³⁸¹¹ The conference brought together important European and international

organizations to discuss the progress of the EU in issues like infection prevention, proper use of antibiotics and development of common indicators.

On 11 March 2022, France and the WHO assembled for their annual strategic discussion in Geneva, Switzerland.³⁸¹² France pledged to help strengthen the global architecture by accelerating access to health technologies, increasing the COVID-19 rollout internationally and addressing the growing prevalence of mental health issues globally.

On 12 April 2022, Minister for Europe and Foreign Affairs Jean-Yves Le Drian, Minister for Agriculture and Food Julien Denormandie and EU Commissioner for Crisis Management Janez Lenarčič travelled to Rome to meet with Italy's Minister of Foreign Affairs and International Cooperation Luigi Di Maio and discuss food security in light of Russia's invasion of Ukraine.³⁸¹³ Also in attendance were the leaders of the World Food Programme (WFP), the Food and Agriculture Organization of the United Nations (FAO), the International Fund for Agricultural Development (IFAD) and the Committee on World Food Security (CFS).

On 13 May 2022, Minister Denormandie met with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.³⁸¹⁴ The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

On 19 May 2022, Minister of Health and Prevention Brigitte Bourguignon met with other G7 Health Ministers in Berlin to discuss the integration of One Health within existing systems.³⁸¹⁵ The G7 ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization.

On 25 May 2022, France supported a project to improve the nutrition of children under five in Lao's northernmost province of Phongsaly with an investment of EUR500,000.³⁸¹⁶ In collaboration with the WFP and UN International Children's Emergency Fund (UNICEF), France aims to support the health and development of children most affected by malnutrition and meet Sustainable Development Goal 2.

On 20 June 2022, Minister Bourguignon met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁸¹⁷

On 31 July 2022, France established the new Health Risk Monitoring and Anticipation Committee to work on the challenges of preventing health crises and their effects.³⁸¹⁸ The goal of this committee is to guide the decisions of public authorities through advisory and consultation.

On 8 September 2022, the Ministry of Health hosted academic actors, professional organizations and representatives of public authorities to an interdisciplinary symposium on sepsis.³⁸¹⁹ The aim of this symposium was to bring together different actors to collaborate on an important aspect of public health care.

France has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. France adopted new legislation and policies that promoted human health, animal health and environmental health like the ban on the use of plastics and the animal welfare law. On an international level, France abided by its multilateral commitments at COP26 and the One Ocean Summit to protect the environment. France also supported the work of G20 ministers, WHO, WFP, FAO, FIDA, CFS and UNICEF in bolstering health infrastructure against the threats of AMR, mental illnesses and zoonoses and ensuring the safety and security of food supplies to the most vulnerable groups.

Thus, France receives a score of +1.

Analysts: Saarah Khan and Kyra Menezes

Germany: +1

Germany has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Germany signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties (COP26) to stop and reverse deforestation.³⁸²⁰ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 3 November 2021, Germany committed to donating 175 million vaccine doses to the COVAX facility, a global coalition dedicated to the proliferation and global distribution of COVID-19 vaccines.³⁸²¹ Germany additionally pledged its support for facilitating independent vaccine procurement infrastructure and capacities in Africa.

On 9 November 2021, Germany established a sustainable energy partnership with Nigeria as part of its strategy to reach climate neutrality by 2045.³⁸²² The goal of this coalition was to transition away from fossil fuel dependence on renewable energy, while capitalizing on new industry opportunities and developing sustainable infrastructure.

On 2 December 2021, the Federal Ministry for the Environment, Nature Conservation Building and Nuclear Safety published its Sustainable Development Report which would integrate national environmental policy with the UN 2030 Agenda.³⁸²³ The report aimed to phase out coal for a cleaner energy system and implement the Climate Protection Act thereby achieving Sustainable Development Goals 7 and 13.

On 8 December 2021, the Federal Ministry of Food and Agriculture published the Control Programme for Feed 2022 to 2026 thereby replacing the Control Programme for Feed for 2017 to 2021.³⁸²⁴ The goal of this action is to plan and prepare risk analysis reports on product control to strengthen feed security as the basis of food security and animal health.

On 11 December 2021, Germany declared its support for the Food and Agriculture Organization of the United Nations (FAO)'s project to mitigate food insecurity in Myanmar.³⁸²⁵ The goal of this project was to stabilize food supply chains in the wake of crises induced by COVID-19 and civil conflict while protecting the livelihoods of vulnerable farming households.

On 29 January 2022, Germany signed and endorsed the Kigali Declaration against Neglected Tropical Diseases which outlines policies for international cooperation in fighting the spread of tropical diseases.³⁸²⁶ Germany additionally committed EUR10 million to the World Organization for Animal Health (OIE) for addressing rabies outbreaks in Namibia and Cameroon.

On 17 February 2022, Germany contributed EUR20 million to an FAO initiative for tackling food crises in the Horn of Africa.³⁸²⁷ The funding aims to provide emergency relief in response to acute food shortages and drought in the region and it will aid severely affected farmers and herders.

On 8 April 2022, Germany co-hosted the Break COVID Now Summit with Ghana, Indonesia, Senegal and Gavi which is the Vaccine Alliance.³⁸²⁸ Germany pledged EUR400 million in funding toward the Gavi COVAX initiative which sought to ensure equitable global access to COVID-19 vaccines.

On 25 April 2022, Germany pledged EUR10 million in funding to support the UN World Food Program (WFP) initiative to address food insecurity in Lebanon.³⁸²⁹ The goal of this funding was to develop sustainable food security infrastructure and mitigate the acute effects of food supply shortages in Lebanon.

On 26 April 2022, Germany inaugurated the Helmholtz Institute for One Health (HIOH) in Greifswald.³⁸³⁰ The HIOH is dedicated to researching emerging pathogens, monitoring human and animal health and tracking the evolution and transmission of zoonotic pathogens. This institute aims to research the emergence and progression of antibiotic- and vaccine-resistant pathogens to prevent the outbreak of future public health crises.

On 2 May 2022, Federal Minister for Environment, Nature Conservation, Nuclear Safety and Consumer Protection Steffi Lemke and India's Minister of Environment, Forest and Climate Change Bhupender Yadav jointly signed a declaration of intent on forest landscape restoration.³⁸³¹ The goal of this declaration was to advance support in areas of conservation and restoration and expand Indo-German cooperation against climate change.

On 2 May 2022, Federal Minister for Economic Affairs and Climate Action Robert Habeck and India's Minister for Power and New and Renewable Energy Raj Kumar Singh jointly signed a declaration of intent on the Indo-German Hydrogen Task Force.³⁸³² The purpose of this task force was to ensure that India and Germany are able to achieve the common goals of decarbonizing their economies, developing a national green hydrogen economy and reducing emissions.

On 13 May 2022, Federal Minister for Food and Agriculture Cem Özdemir hosted a meeting with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.³⁸³³ The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization.

On 19 May 2022, Federal Minister of Economic Cooperation and Development Svenja Schulze and World Bank Group President David Malpass jointly launched the Global Alliance for Food Security (GAFS).³⁸³⁵ GAFS aims to promote multilateral coordination in responding to food shortages and crises around the globe and support vulnerable nations in cultivating robust and resilient food management and supply systems.

On 20 June 2022, Minister Lauterbach met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁸³⁶

On 24 June 2022, Germany hosted the Uniting for Global Food Security international ministerial conference during which member states discussed ongoing efforts to alleviate the global food security crisis, with focus on providing aid to the most affected countries.³⁸³⁷ Federal Foreign Minister Annalena Baerbock committed to investing EUR2.8 billion in humanitarian partners in 2022, including the WFP in Afghanistan and the Sahel and the UN Relief and Works Agency in the Gaza Strip.

On 19 August 2022, Germany contributed an additional EUR3 million to the WFP to support food relief efforts in the Gaza Strip.³⁸³⁸ The donation was to be distributed among Palestinians in the form of electronic food vouchers, allowing them to purchase fresh food items.

On 8 September 2022, Development Minister Svenja Schulze pledged EUR1.3 billion towards the Global Fund to Fight AIDS, Tuberculosis and Malaria.³⁸³⁹ The aim of this fund is to eliminate the spread of AIDS, tuberculosis and malaria by 2030 and improve global health infrastructure, pandemic preparedness and the equality of access to medical countermeasures.

On 9 September 2022, Deputy Director of the Department of International Cooperation and World Food Affairs of the Federal Ministry of Food and Agriculture Cornelia Berns was hosted by China's Deputy Director-General of the Foreign Economic Cooperation Center of the Ministry of Agriculture and Rural Affairs Li Zhiping and Deputy Director of the Department of International Cooperation of Ministry of Agriculture and Rural Affairs Wei Zhenglin at the Kickoff Meeting for Phase III Project

of the Sino-German Agricultural Centre.³⁸⁴⁰ The goal of this meeting was to enhance Sino-German agricultural cooperation.

Germany has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. On a domestic level, Germany has strengthened its environmental policy and established the HIOH so as to bolster health systems and research on infectious diseases. Germany has taken strong action towards improving food security by aiding communities suffering from malnutrition in Myanmar, Somalia, the Horn of Africa and Lebanon and collaborating with international actors like the FAO, WFP and G7 Agriculture Ministers to mobilize resources like the GAFFS. Germany has demonstrated a strong presence in the international community with its actions to enable resilient capacities in the global health system by protecting communities in developing countries from infectious and tropical diseases. It has also worked extensively to reduce deforestation as per its commitment at COP26, as seen by its involvement with India.

Thus, Germany receives a score of +1.

Analyst: Tamara Saadi

India: +1

India has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 22 November 2021, the Project Elephant Division at the Ministry of Environment, Forest and Climate Change and the Elephant Cell at the Wildlife Institute of India organized a workshop to enhance capacities in “controlling illegal killing, trade and other crimes on elephants.”³⁸⁴¹ The goal of this workshop was to promote the health of elephants and to regulate their treatment.

On 23 November 2021, Minister of Fisheries, Animal Husbandry and Dairying Parshottam Rupala held a meeting with Ambassador of Brazil to India Andre Aranha Correa do Lago.³⁸⁴² The goal of this meeting was to discuss cooperation in the Animal Husbandry and Dairy Sector and the export of bovine embryos.

On 23 November 2021, the Department of Animal Husbandry and Dairying and the Food and Agriculture Organization of the United Nations organized a national stakeholder workshop on the National Action Plan to combat antimicrobial resistance (AMR).³⁸⁴³

On 9 January 2022, the Ministry of Health and Family Welfare published a revised version of its discharge policy for COVID-19.³⁸⁴⁴ The goal of this revision was to better align national healthcare

protocol with the COVID-19 clinical management protocol, guidelines for home isolation of mild COVID-19 cases and advisory on COVID-19 testing.

On 9 January 2022, the Ministry of Health and Family Welfare published a revised version of its advisory for managing healthcare workers in COVID and non-COVID areas of healthcare facilities.³⁸⁴⁵ The goal of this revision was to ensure that healthcare workers take proper precautions while working in hospitals and clinics.

On 20 January 2022, the Ministry of Health and Family Welfare published a revised version of its comprehensive guidelines for management of COVID-19 in children and adolescents aged 18 years and below.³⁸⁴⁶ The updated guidelines have added several treatment recommendations as well as a new post-COVID section.

On 14 February 2022, the Ministry of New and Renewable Energy proposed the Framework for Promotion of Decentralized Renewable Energy Livelihood Applications.³⁸⁴⁷ The goal of this framework was to adhere to the commitments made by Prime Minister Narendra Modi at the 26th United Nations Climate Change Conference of the Parties by facilitating the widespread adoption of decentralized renewable energy-based livelihood applications.

On 17 February 2022, the Ministry of Power defined and framed the stipulations of the Green Hydrogen Policy.³⁸⁴⁸ This policy aims to aid the transition from fossil fuels to green hydrogen or green ammonia as energy carriers and as chemical stock for different sectors.

On 23 March 2022, the Ministry of Health and Family Welfare published guidelines for the COVID-19 vaccination of children in the 12-14 age group.³⁸⁴⁹

On 2 May 2022, Minister of Environment, Forest and Climate Change Bhupender Yadav and Germany's Minister for Environment, Nature Conservation, Nuclear Safety and Consumer Protection Steffi Lemke jointly signed a declaration of intent on forest landscape restoration.³⁸⁵⁰ The goal of this declaration was to advance support in areas of conservation and restoration and expand Indo-German cooperation against climate change.

On 2 May 2022, Minister for Power and New and Renewable Energy Raj Kumar Singh and Germany's Minister for Economic Affairs and Climate Change Robert Habeck jointly signed a declaration of intent on the Indo-German Hydrogen Task Force.³⁸⁵¹ The purpose of this task force was to ensure

that India and Germany are able to achieve the common goals of decarbonizing their economies, developing a national green hydrogen economy and reducing emissions.

On 12 May 2022, the Ministry of Agriculture and Farmers Welfare and the UN Development Programme (UNDP) signed a Memorandum of Understanding (MOU).³⁸⁵² The goal of this MOU was to initiate a strategic partnership on agriculture, crop insurance and credit where the UNDP would support the farmers' credit card which is a modified interest subvention scheme.

On 18 May 2022, the Cabinet of the Ministry of Petroleum and Natural Gas approved amendments to the National Policy on Biofuels-2018.³⁸⁵³ Some of the amendments included advancing the ethanol blending target of 20 per cent in petrol to 2025-26 from 2030 and promoting the production of biofuels in the country. The goal of these amendments was to attract and foster developments of indigenous technologies to make India energy-independent by 2047.

On 19 May 2022, Minister for Health and Family Welfare Mansukh Mandaviya addressed new initiatives like 'bi-directional testing' of tuberculosis with COVID-19, use of artificial intelligence and digital tools and decentralizing tuberculosis services at the 35th Stop Tuberculosis Partnership Board Meeting.³⁸⁵⁴ The goal of these initiatives was to advance the eradication of tuberculosis.

On 31 May 2022, the Ministry of Health and Family Welfare issued guidelines on the management of the monkeypox virus.³⁸⁵⁵ The goal of these guidelines was to respond to the increasing reports of monkeypox cases in non-endemic countries as part of a risk-based and proactive approach to managing monkeypox.

On 2 June 2022, Minister Yadav and Canada's Minister of Environment and Climate Change Steven Guilbeault signed an MOU to increase bilateral cooperation on climate action and environmental protection and conservation.³⁸⁵⁶ The goal of this MOU was to work more closely with Canada to support the collective interests of shifting to a zero-plastic waste future.

On 5 June 2022, Minister of State for New and Renewable Energy Bhagwant Khuba launched the Pan-India Rooftop Solar Awareness Campaign.³⁸⁵⁷ The goal of this campaign was to encourage citizens to contribute toward addressing global warming and climate change and help the Ministry of New and Renewable Energy achieve its target of 500 gigawatts of non-fossil energy by 2030.

On 20 June 2022, Minister Mandaviya met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic

³⁸⁵² Ministry of Agriculture and Farmers Welfare signs MoU with UNDP for strategic partnership on Agriculture, Crop Insurance and Credit (New Delhi) 12 May 2022. Access Date: 9 June 2022. <https://pib.gov.in/PressReleasePage.aspx?PRID=1824812>

like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁸⁵⁸

On 8 August 2022, India implemented the AMRUT 2.0 program 2022-2027.³⁸⁵⁹ The objective of this program was to provide universal water supply coverage through functional household tap connections in all statutory towns.

On 25 August 2022, Union Minister for Jal Shakti (Water) Gajendra Singh Shekhawat met Bangladesh's State Minister for Water Resources Zaheed Farooque for the 38th Meeting of Ministerial Level of the Joint Rivers Commission of India and Bangladesh.³⁸⁶⁰ The two ministers aimed to discuss the framework for sharing water resources from their common rivers.

India has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. India took strong steps to develop cleaner forms of energy like biofuels and green hydrogen albeit in partnership with Germany. India worked to prevent and eradicate infectious diseases like monkeypox and tuberculosis and address the threat of AMR alongside G20 Health Ministers. India also collaborated with Canada to support its policy on environmental conservation.

Thus, India receives a score of +1.

Lamandau Wildlife Sanctuary.³⁸⁶³ The goal of this action was to emphasise the protection of an area that is symbolic to Indonesian wildlife.

On 24 December 2021, Head of the Cooperation Bureau of the Ministry of Energy and Mineral Resources Agung Pribadi announced that they would continue to advocate for the national adoption of emission reduction targets towards net zero emission in 2060 by supporting the decarbonisation of the business activities of mining companies.³⁸⁶⁴ The goal of this action was to work towards a greater use of renewable and sustainable energy sources.

On 27 January 2022, Minister of Agriculture Syahrul Yasin Limpo inaugurated the Agriculture Working Group of the State Agricultural Working Group in 2022.³⁸⁶⁵ The goal of the group was to balance production and trade to secure food resources for all. On this occasion, Minister Limpo also officially accepted the leadership relay of the G20 Country Agricultural Working Group.

On 6 February 2022, Minister Limpo visited the IP400 rice fields in Bialo which currently cover an area of 250 hectares and will spread to 2,000 hectares.³⁸⁶⁶ The goal of this measure was to encourage the productivity, production and welfare of farmers with advanced modern farming which optimizes the use of natural resources.

On 7 February 2022, Minister Limpo encouraged the community of Macanang Village and others to use their fields as productive agricultural land.³⁸⁶⁷ The goal of this action was to promote sustainable farming practices.

On 22 March 2022, Minister Bakar welcomed the delegation of G20 member countries at the opening ceremony of the Plenary G20 Environment Deputies Meeting and Climate Sustainability Working Group.³⁸⁶⁸ Minister Bakar stated that Indonesia's G20 presidency would capture pressing topics on global processes and developments to provide concrete actions. The goal of this action was to achieve medium and long-term targets for reducing emissions especially in diverse and unique ecosystems.

On 7 April 2022, the Ministry of Health collaborated with Japan to open an international nursing class at the Health Polytechnic via the Directorate General of Health Workforce.³⁸⁶⁹ Nurses who want to work in Japan are currently being trained under the Indonesia Japan Economic Partnership Agreement.

This initiative aims to eliminate the requirement of two years on-site clinical experience and allow Indonesian nurses to take part in nursing educational programs immediately.

On 8 April 2022, Indonesia co-hosted the Break COVID Now Summit with Germany, Ghana, Senegal and Gavi, the Vaccine Alliance.³⁸⁷⁰ The goal of this summit was to secure further funding toward the Gavi COVAX initiative which aims to ensure equitable global access to COVID-19 vaccines.

On 22 April 2022, Indonesia banned the export of palm oil to control the increasing domestic prices of cooking oil.³⁸⁷¹ President Widodo stated that this move was meant to make cooking oil more affordable to the average household in Indonesia.

On 26 April 2022, the Ministry of Environment and Forestry issued a circular letter to Minister Bakar regarding the role of local governments in reducing waste generation.³⁸⁷² The ministry also provided assistance in the form of facilities and infrastructure for segregated waste bins and encouraged people to consciously reduce waste during the Eid holiday period.

On 10 May 2022, the Ministry of Health issued guidelines on how to prevent thalassemia which is a hereditary disease by early detection.³⁸⁷³ The guidelines promoted early screening in families with thalassemia patients and encouraged related ministries to improve cooperation in overcoming health problems.

On 14 May 2022, Minister Bakar praised Bali as a model of landscape management and commended it as an example of actualization of sustainable development and the implementation of the Paris Agreement.³⁸⁷⁴

On 31 May 2022, officials from the Ministry of Agriculture met with Australia's Chief Veterinary Officer Mark Schipp and Deputy Chief Veterinary Officer Beth Cookson to discuss the recent detection of the contagious viral animal foot-and-mouth disease (FMD).³⁸⁷⁵ The goal of their meeting was to strengthen bilateral cooperation with Australia by sharing knowledge on animal health and biosecurity in combatting and containing the FMD outbreak.

On 8 June 2022, Deputy Minister of Health Dante Saksono Harbuwono stated that One Health was a key concept in preventing the outbreak and transfer of diseases from animals to humans at the One Health Event in Lombok.³⁸⁷⁶

On 20 June 2022, Minister of Health Budi Gunadi Sadikin hosted the G20 Health Ministers in a conference to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁸⁷⁷

On 8 September 2022, Indonesia met the other MIKTA countries of Mexico, Korea, Turkey and Australia to address the impact of COVID-19.³⁸⁷⁸ The goal of this meeting was to create a 21-point statement as a pledge to better maneuver through the present and any future global health emergencies.

On 21 September 2022, Minister Sadikin stated that their “efforts at the G20 are aimed at building a more resilient Indonesian health security system” which would eventually “strengthen the global healthcare system” at a World Economic Forum meeting in New York.³⁸⁷⁹ Minister Sadikin emphasised the development of research centers for the development of drugs, vaccines and diagnostic tools.

Indonesia has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Indonesia took action to protect its environment and biodiversity on a domestic level by strengthening conservation efforts at SML, working towards emission reduction targets and maintaining the sustainability of agricultural practices that it had committed to at COP26. Indonesia also collaborated with national actors to ensure food security while addressing rising costs of food prices in the country. Indonesia has also been collaborating with international actors like Australia, Germany and Japan to strengthen health systems.

Thus, Indonesia receives a score of +1.

2023 to help the automotive industry with their ecological transition towards cleaner fuels as part of the NRRP to fight climate change.

On 12 April 2022, Minister of Foreign Affairs and International Cooperation Luigi Di Maio met with France's Minister for Europe and Foreign Affairs Jean-Yves Le Drian, Minister for Agriculture and Food Julien Denormandie and EU Commissioner for Crisis Management Janez Lenarčič to discuss food security in light of Russia's invasion of Ukraine.³⁸⁸⁸ Also in attendance were the leaders of the World Food Programme, the Food and Agriculture Organization of the United Nations, the International Fund for Agricultural Development and the Committee on World Food Security.

On 5 May 2022, the Council of Ministers approved in preliminary examination 10 legislative decrees to adapt and connect national legislation to current EU law on the prevention and control of animal diseases that are transmissible to animals or humans.³⁸⁸⁹ The goal of this legislation is to standardise the treatment of the relationship between animal health and public health.

On 5 May 2022, the Council of Ministers approved in preliminary examination 10 legislative decrees implementing EU regulations on trade, import and conservation of wild and exotic animals and training for animal operators and professionals.³⁸⁹⁰ The decree introduces rules relating to the guiding principles for wild and exotic animals held in captivity and pets, particularly the provisions for the keepers of such specimens.

On 13 May 2022, Minister of Agricultural, Food and Forestry Policies Stefano Patuanelli met with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.³⁸⁹¹ The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

On 19 May 2022, Minister of Health Roberto Speranza met with other G7 Health Ministers in Berlin to discuss the integration of One Health within existing systems.³⁸⁹² The G7 ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization (WHO).

On 20 June 2022, Minister Speranza met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁸⁹³

On 29 June 2022, Italy announced that all 45 milestones and targets in the NRRP for the first six months of 2022 were achieved on time.³⁸⁹⁴ The NRRP focuses efforts on environment, sustainability and socio-economic stabilization.

On 4 July 2022, Prime Minister Draghi travelled to Canazei, Trento to visit the newly established Civil Protection Operations Centre which is responsible for coordinating search and rescue efforts after the glacier collapse on Marmolada mountain.³⁸⁹⁵

On 8 September 2022, Prime Minister Draghi met with Slovakia's Prime Minister Eduard Heger to discuss the ongoing energy crisis and the EU's initiatives to address the crisis.³⁸⁹⁶

On 9 September 2022, Prime Minister Draghi attended a video conference with US President Joe Biden and EU and NATO leaders to discuss the current sanctions on Russia and subsequent efforts to provide sustainable and affordable energy supplies for Europe.³⁸⁹⁷ The meeting also reaffirmed the agreement to unblock Ukraine ports to fight the global food crisis.

On 21 September 2022, Prime Minister Draghi announced an aid decree was approved the previous week to provide funds to help relieve the pressure of high energy costs due to Russia's invasion of Ukraine.³⁸⁹⁸ This initiative aims to provide support for organizations that provide social and healthcare services to people with disabilities.

Italy has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Italy pursued actions to improve animal health by integrating EU regulations with existing national policies, to promote food safety and security amongst G7 ministers and other international actors and to protect biodiversity and implement a more sustainable environmental infrastructure that it had committed to at COP26. Italy also collaborated with G20 ministers and the WHO to support a more equitable global health system.

Thus, Italy receives a score of +1.

Analyst: Sifan Wang

Japan: +1

Japan has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

information pertaining to drug resistance and AMR by displaying videos on public transportation and posting on social media.³⁸⁹⁹ The goal of this action was to raise AMR awareness.

On 2 November 2021, Japan signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties (COP26) to stop and reverse deforestation.³⁹⁰⁰ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 8 November 2021, the Ministry of Environment announced the selection of 19 projects for the Equipment Renewal Subsidy Project under the Support for High-Installations for Facilities with Targets program (SHIFT) through which they subsidize certain projects which reduce carbon dioxide emissions by introducing environmentally-friendly equipment.³⁹⁰¹ The goal of the SHIFT program is to provide leading examples of decarbonisation practices at factories and workplaces and contribute towards medium and long-term emission reduction targets.

On 10 November 2021, the Ministry of Environment and the US Office of Special Presidential Envoy for Climate announced the launch of the Global Subnational Zero Carbon Promotion Initiative at COP26.³⁹⁰² The goal of this bilateral initiative is to promote global action to “recognize, support, and accelerate subnational climate action in developing countries, particularly in Indo-Pacific countries.”³⁹⁰³

On 11 November 2021, the Ministry of Environment held an event at COP26 called “Circular Economy x Carbon Neutrality” where countries, international organizations and global companies discussed strategies to promote the circular economy.³⁹⁰⁴ The goal of this event was to promote the idea that a transition to a circular economy is necessary to achieve carbon neutrality.

On 7 December 2021, Japan hosted the Tokyo Nutrition for Growth (N4G) Summit which is an international conference aimed at promoting global efforts to address nutrition-related challenges.³⁹⁰⁵ The summit discussed five main aspects of nutrition: health, food, resilience, data and financing. The goal of this N4G summit was to better equip countries to tackle malnutrition.

On 22 March 2022, Japan announced the establishment of the Strategic Centre of Biomedical Advanced Vaccine Research and Development for Preparedness and Responses which is a new vaccine

On 15 July 2022, Minister Yamaguchi delivered a speech on “circular economy solutions to address” plastic pollution and shared efforts at curbing the issue including the “Osaka Blue Ocean Vision” at a side event of the UN High-Level Political Forum.³⁹¹³ The goal of this address was to reiterate Japan’s commitment, collaboration and leadership to ending plastic pollution in oceans.

On 28 August 2022, Japan and the African Development Bank announced a USD5 billion financial cooperation under the fifth phase of the Enhanced Private Sector Assistance for Africa initiative (EPSA) from 2023 to 2025.³⁹¹⁴ Under EPSA 5, agriculture and nutrition are a priority area given the importance of food security. The goal of this action was to promote cooperation between Japan and Africa to tackle social and economic challenges.

On 2 September 2022, Minister of the Environment Nishimura Akihiro and US’ Administrator of the Environmental Protection Agency Michael Regan met in Tokyo for a high-level bilateral dialogue and released a joint statement on continued bilateral environmental cooperation.³⁹¹⁵ The goal of this dialogue was to discuss accomplishments including climate investments from the US Inflation Reduction Act and discuss priorities for continued cooperation on environmental protection.

On 5 September 2022, the Ministry of Agriculture, Forestry, and Fisheries and the Asian Development Bank signed a memorandum of cooperation to promote sustainable and resilient agri-food systems in Asia and the Pacific.³⁹¹⁶ The goal of this move was to build more resilient food systems to ensure food security in the region through innovative and sustainable practices and technologies such as digital tools and pest control methods.

Japan has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Japan took strong action to pursue the protection of human health and environmental health in its national policies as seen with its initiation of the AMR Countermeasure Promotion Month and moving ahead with the SHIFT program. Japan also collaborated with important international actors like the WHO and G20 Health Ministers and participated in important summits like COP26 and N4G where it introduced measures that balanced the health of people, animals and ecosystems.

Thus, Japan receives a score of +1.

On 2 November 2021, Korea signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties (COP26) to stop and reverse deforestation.³⁹¹⁷ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 10 November 2021, Minister of Trade, Industry and Energy Moon Sung-wook met with US Secretary of Energy Jennifer Granholm and agreed to launch the energy policy dialogue which is a ministerial talk aimed at strengthening partnership in the energy sector.³⁹¹⁸ The goal of this initiative was to decarbonize the economy and achieve a sustainable clean energy future.

On 22 November 2021, the Ministry of Oceans and Fisheries launched the "Oceans and Fisheries Climate Change Response Task Force," consisting of a wide range of private-sector experts from all fields of marine and fisheries.³⁹¹⁹ The goal of assembling this team was to build an integrated multi-perspective response approach to climate change and its impacts on the oceans.

On 1 December 2021, Minister of Health and Welfare Kwon Deok-cheol published a plan in collaboration with the Central Disaster Management Headquarters to ensure the stable operation of the pandemic response system centred on at-home self-isolation care.³⁹²⁰ This plan was intended to reinforce the healthcare infrastructure, provide necessary resources for local governments and allow emergency on-site inspections.

On 9 December 2021, Minister Kwon worked to complete early COVID-19 booster vaccination for workers and residents of nursing facilities.³⁹²¹ The goal of this initiative was to ensure that the front-line workers who came in contact with vulnerable residents were better protected against COVID-19.

On 10 December 2021, Korea launched the Carbon Neutrality Vision and Strategy for Industry and Energy which is a strategy to achieve carbon neutrality in the energy and industry sectors that account for over 70 per cent of total carbon emissions.³⁹²² Korea pledged support with tax, finance and regulatory innovation for firms and promoted industrial projects focused on carbon-neutral technologies, environment-friendly infrastructure and green engineering. The goal of this initiative was to eliminate coal power generation by 2050 and achieve carbon-free energy with renewables and hydrogen.

On 17 December 2021, the Ministry of Oceans and Fisheries announced that it has drawn up the 2050 Carbon Neutrality Roadmap to establish the future direction of the marine and fisheries sector.³⁹²³ Some of the sectors outlined in the roadmap include shipping, fisheries and fishing villages, marine energy and blue carbon.

On 28 December 2021, the Ministry of Oceans and Fisheries launched the 2022 Ministry of Oceans and Fisheries Work Plan.³⁹²⁴ This report aimed to activate the coastal economy by accelerating the vitalization of fishing communities, supporting the sustainable innovation and growth of the fishery industry, enhancing the foundation for marine tourism and promoting port reconstruction.

On 11 January 2022, the Ministry of Agriculture, Food and Rural Affairs pledged KRW40.9 billion to support the research and development of eco-friendly technologies and energy such as hydrogen and electricity to replace agricultural machinery using internal combustion engines.³⁹²⁵

On 24 January 2022, the Ministry of Oceans and Fisheries and the International Maritime Organization (IMO) hosted a five day global capacity-building training program for the reduction of greenhouse gases.³⁹²⁶ The goal of this training was to guide developing states on greenhouse gas reduction for Korea to fulfill its responsibility within the IMO Council and to contribute to global carbon neutrality efforts.

On 26 January 2022, the Ministry of Environment of the Republic of Korea signed an agreement with Gurye County, Seochon County, the Association of Bears in Captivity and four civic groups to end bear bile farming starting from 2026.³⁹²⁷ This agreement aims to prohibit keeping bears in captivity starting 1 January 2026, ensure the health and safety of bears until they are transferred to sanctuaries and protect the bears from illegal propagation.

On 7 February 2022, the Ministry of Agriculture, Food and Rural Affairs announced its plan to build the foundation for a sustainable livestock environment, manage breeds for low-carbon livestock production and ensure the proper treatment of livestock manure.³⁹²⁸ The goal of this plan was to reduce greenhouse gases in the livestock industry, especially methane.

On 2 March 2022, Minister Kwon collaborated with the Central Disaster Management Headquarters to allot 26 additional hub hospitals dedicated to pediatric COVID-19 patients.³⁹²⁹ The goal of this initiative was to ensure safe treatment of both COVID-19 and non-COVID-19 pediatric inpatients and outpatients.

On 8 March 2022, Minister Kwon worked with the Central Disaster Management Headquarters to produce and distribute guidelines on medical care for paediatric patients with COVID-19.³⁹³⁰ The purpose of these guidelines was to ensure seamless contact-free patient care at community hospitals and clinics and to help parents and caregivers effectively deal with increasing rates of pediatric infection.

On 31 March 2022, the Ministry of Environment signed a memorandum of understanding with the Korean Association of Animal Industry and 11 raccoon-owning exotic animal cafes on the “raccoon registration pilot program.”³⁹³¹ The agreement details the partnership between the private and public sectors to protect and manage raccoons because they are a non-native species that can threaten ecosystems by spreading zoonotic diseases.

On 8 April 2022, the Central Disaster Control Headquarters for African swine fever announced that it would devise and implement strengthened measures to control African swine fever in the spring season.³⁹³² The purpose of these measures was to mitigate the risks of this outbreak in pig farms where the fever broke out among wild boars and which see hikers during the spring.

On 21 April 2022, Minister Moon held a Clean Hydrogen Conference to discuss domestic hydrogen production and the challenges companies face in the implementation of hydrogen utilization.³⁹³³ The goal of this conference was to promote carbon neutrality.

On 25 April 2022, the Ministry of Environment published the Climate Action 1.5 app.³⁹³⁴ The goal of this app was to act as a net-zero rewards program and encourage users to reduce their emissions to earn points-based rewards.

On 9 May 2022, Minister of Environment Han Jeoung Ae and President of the National Institute of Biological Resources Suh Min-hwan announced plans to develop guidelines for green space

management.³⁹³⁵ The purpose of these guidelines is for local governments and concerned authorities to manage green spaces such as tree-lined streets and walking trails while improving biodiversity.

On 13 May 2022, Korea purchased an order for 1.009 million additional doses of oral COVID-19 pills for a total volume of 2.071 million doses.³⁹³⁶ The goal of this initiative was to prepare for the transition of COVID-19 treatment to the general medical system.

On 13 May 2022, Korea announced that starting from 16 May 2022 oral COVID-19 pills would be available by prescription to those with weakened immune systems and those aged 60 or above.³⁹³⁷ In addition, those aged 12 or above would be able to receive Paxlovid by prescription and those 18 or above would be able to receive Lagevrio with underlying symptoms.

On 25 May 2022, Second Vice Minister of Trade, Industry and Energy Park Il-Joon attended the 2022 Global Hydrogen Industrial Association Alliance Forum where he introduced Korea's plan to ensure a balanced development of the production, distribution and utilization elements of the hydrogen cycle.³⁹³⁸ Vice Minister Park explained other plans: to construct large-scale hydrogen production facilities for energy sources so that hydrogen can be “diversified across solar, wind, nuclear and natural gas power”, to prepare fully equipped hydrogen carrier vessels for handover and storage, to set global qualification standards for clean hydrogen, to expand the supply of hydrogen cars and multi-fueling stations and to implement “technological development and demonstration of hydrogen and ammonia power generation.” The goal of this forum was to build a hydrogen industry ecosystem on a global scale.

On 27 May 2022, Minister of Environment Han Wha-jin announced plans to take measures to prevent nitrogen and phosphorus from flowing into the water system to account for algal blooms in June and manage water quality.³⁹³⁹ The goal of this plan is to ensure the safety of drinking water.

On 29 May 2022, Minister Han announced that the National Assembly passed 14 environmental bills including the Framework Act on Environmental Policy and the Sewerage Act.³⁹⁴⁰ These bills aim to help mitigate the effects of climate change.

On 31 May 2022, the Central Disaster and Safety Countermeasures Headquarters published a plan for the gradual adjustment of at-home treatment for individuals with COVID-19.³⁹⁴¹ The plan entailed

some revisions to the classification of intensive and general management groups, maintained 24-hour response and guidance and expanded face-to-face medical consultation and care.

On 3 June 2022, the Central Disaster and Safety Countermeasures Headquarters discussed a report from the Central Disease Control Headquarters about the results of the COVID-19 mental health survey and the psychological COVID-19 support plan for a recovery to a new normal³⁹⁴² They concluded that psychological support measures to help the public recover to a new normal life will be prepared and implemented. The goal of implementing these measures was to assist individuals suffering from depression, suicidal thoughts, anxiety, and post-traumatic stress disorder through a community-centred approach that focuses on vulnerable persons while diversifying psychological services, reinforcing follow-up management for the public and increasing awareness of mental health services.

On 12 June 2022, the National Institute of Environmental Research organized training courses on environmental satellites with the UN Economic and Social Commission for Asia and the Pacific.³⁹⁴³ The training courses would be organized around “Building the Pan-Asia Partnership for Geospatial Air Quality information.”

On 20 June 2022, Minister Kwon met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁹⁴⁴

On 21 June 2022, the Ministry of Environment announced its plan to produce energy from wastewater treatment plants and water filtration plants and expand biogas and hydropower.³⁹⁴⁵ The goal of this plan was to “double the renewable energy generation by utilizing biogas, floating solar farms, and small hydropower generation at the environmental facilities such as wastewater treatment plants, water filtration plants, and dams.”

On 28 June 2022, the Minister of Trade, Industry and Energy Lee Chang-yang met Czech Republic’s Industry and Trade Minister Jozef Sikela to discuss cooperation in nuclear energy and other areas.³⁹⁴⁶ The goal of these meetings was to achieve global market penetration, early commercialization and the production-transport-utilization of hydrogen.

On 5 July 2022, Korea laid out new energy policy goals and directions through a process of deliberation and resolution in its 30th Cabinet meeting.³⁹⁴⁷ These policy goals aim to better accomplish carbon neutral projects and see the expansion of nuclear power.

On 12 July 2022, the Korea Environmental Industry and Technology Institute, an affiliate of the Ministry of Environment, signed a Memorandum of Understanding with the Central American Bank for Economic Integration for environmental cooperation.³⁹⁴⁸

On 20 July 2022, Second Vice Minister Park presided over the Hydrogen Economy Investment Stimulation Conference.³⁹⁴⁹ The goal of this conference was to share new hydrogen economy policies and “gather opinions from private equity firms to bolster hydrogen industry competitiveness by providing a strong energy system through climate change response.”

On 27 July 2022, the Ministry of Health and Welfare announced its Strategy for Bio-Health Industry Innovation for Pandemic Preparation and Global Leadership.³⁹⁵⁰ The goal of this strategy is to promote biohealth investments to remain prepared for pandemics, provide bio-health regulatory reform, create advanced bio-health infrastructure and enable stronger biohealth global cooperation.

On 29 July 2022, Vice Minister of Oceans and Fisheries Song Sang-Keun and China’s Vice Minister of Agriculture and Rural Affairs Ma Youxiang attended the 4th China-ROK Joint Fish release held simultaneously in Mokpo, Jeollanam-do, Korea and Yantai, China.³⁹⁵¹ The release of over two million fish fry of various aquatic species such as back rockfish, small yellow croakers, gazami crabs and green fin horse-faced filefish into the Yellow Sea celebrated the 30th anniversary of the establishment of China-ROK diplomatic relations. The goal of this event was to strengthen bilateral cooperation in marine ecological conservation and the rehabilitation of marine fishery resources.

On 2 August 2022, 2050 Carbon Neutrality and Green Growth Commission Secretary General Lee Jung-won chaired the 1st International Emissions Reduction Council.³⁹⁵² The goals of this council follow the Enforcement Decree of the Framework Act on Carbon Neutrality to review and revise matters concerning international emissions reduction projects.

On 16 August 2022, Minister Han convened the first council meeting to advance the emissions trading scheme.³⁹⁵³ The purpose of this meeting was to discuss ways to improve the greenhouse gas emissions trading scheme to achieve the goal of attaining carbon neutrality.

On 18 August 2022, Minister Lee presided over a session of the Nuclear Energy Exports Strategy Committee.³⁹⁵⁴ The goal of this session was to review comprehensive nuclear energy exports strategies, develop key policies for building global competitiveness.

On 22 August 2022, the Ministry of Trade, Industry and Energy co-hosted the 31st Korea-Australia Joint Committee on Energy and Mineral Resources with Australia's Department of Climate Change, Environment, Energy and Water and Department of Industry, Science and Resources.³⁹⁵⁵ The goal of the meeting was to cover critical minerals for clean energy expansion, energy supply chain resilience, hydrogen power and carbon capture, utilization and storage.

On 29 August 2022, Second Vice Minister of Health and Welfare Lee Ki-il met with Denmark's Minister of Health Magnus Heunicke.³⁹⁵⁶ The goal of this meeting was to discuss response measures to COVID-19 and to speak about bilateral cooperation in significant areas of healthcare such as chronic disease.

On 2 September 2022, the Ministry of Health and Welfare announced the first shipment of the first domestically developed COVID-19 vaccine called SKYCOVIONE.³⁹⁵⁷

On 6 September 2022, the Ministry of Environment and the Organization for Economic Cooperation and Development organized the workshop with the theme Future of Chemical Safety Assessment - Utilization of Non-Animal Testing Data.³⁹⁵⁸ This event was organized to promote alternatives to animal testing for chemical products and to conduct joint research with international organizations and research institutes.

On 8 September 2022, Korea met the other MIKTA countries of Mexico, Indonesia, Turkey and Australia to address the impact of COVID-19.³⁹⁵⁹ The goal of this meeting was to create a 21-point statement as a pledge to better maneuver through the present and any future global health emergencies.

On 16 September 2022, Minister Lee held the 1st Energy Policy Consultation Committee Meeting.³⁹⁶⁰ The goal of this meeting was to gather experts' opinions on global energy supply crisis countermeasures.

On 16 September 2022, Energy Policy Director-General for the Ministry of Trade, Industry and Energy Lee Won-ju attended the 16th East Asia Summit and 19th Association of Southeast Asian Nations Plus Three Energy Ministers' Meeting.³⁹⁶¹ The goal of these meetings was to discuss energy security reinforcement and clean energy expansion.

From 25 to 26 October 2022, Ministry of Health and Welfare hosted the World Bio Summit 2022 alongside the WHO to address topics related to “the Future of Vaccine and Bio-Health.”³⁹⁶² Global leaders and business leaders of from vaccine and biologics companies met to share their experiences during the COVID-19 pandemic and discuss potential international cooperation to deliver “more rapid and equitable” response to infectious diseases in the future.

Korea has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Korea has taken steps to mitigate the effects of climate change through its carbon-neutrality efforts and collaboration with the US, address the ongoing COVID-19 situation and control the spread of zoonotic diseases. It has adhered to commitments made at COP26 by ensuring the protection and conservation of the coastal ecosystem, working with the IMO to reduce greenhouse gases, contributing to animal and biodiversity protection and managing fisheries and green spaces.

Thus, Korea receives a score of +1.

Analyst: Elizaveta Strelnikova

Mexico: 0

Mexico has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Mexico signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse deforestation.³⁹⁶³ The goal of this agreement was to pursue policies enhancing sustainable agriculture

and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 5 April 2022, Secretary of Agriculture and Rural Development Victor Villalobos met with US Secretary of Agriculture Tom Vilsack to discuss sustainable and climate-smart agricultural practices.³⁹⁶⁴ The two ministers announced that they would promote food security by supporting rural producers and their products, help smaller producers and new farmers and tackle climate change by giving farmers access to tools and technologies that would address emerging climate threats.

On 23 May 2022, Undersecretary of Prevention and Health Promotion Hugo López-Gatell attended the WHO's 75th World Health Assembly in Geneva, Switzerland under the theme "Health for Peace, Peace for Health."³⁹⁶⁵ Undersecretary López-Gatell indicated progress was made to transform the national health system according to social determinants.

On 15 June 2022, the National Commission of Natural Protected Areas launched the environmental brigades in Tlaxcala, which will focus on carrying out ecological restoration of forests affected by beetles and pests.³⁹⁶⁶ The restoration activities will take about five months and aim to manage protected natural areas of interest.

On 17 June 2022, the Ministry of Environment and Natural Resources published a national call for proposals and participation in the Recognition of Nature Conservation 2022 project.³⁹⁶⁷ People, institutions and organizations would need to demonstrate evidence of their efforts to preserve and protect the environment over the last three years. The goal of this project was to encourage civic participation in restoring the ecological balance.

On 20 June 2022, Undersecretary López-Gatell met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁹⁶⁸

On 28 June 2022, the Ministry of Environment and Natural Resources highlighted the importance of developing the Voluntary Carbon Market to effectively reduce carbon emissions as per international standards.³⁹⁶⁹ The goal of this project was to mitigate the effects of climate change especially on unprotected populations.

On 14 July 2022, Secretary of the Environment and Natural Resources María Luisa Albores González met with US' Administrator of the Environmental Protection Agency Michael Regan and Canada's Minister of Environment and Climate Change Steven Guilbeault for the 29th Annual Council Session and the Public Forum of the Joint Public Advisory Committee of the Commission for Environmental Cooperation.³⁹⁷⁰ The goal of this program was to promote changes in consumption and attitudes toward climate change in marginalized communities.

On 8 September 2022, the Ministry of the Environment and Natural Resources initiated discussions on the implementation of the Kigali Amendment to the Montreal Protocol concerning the decrease in consumption and production of hydrofluorocarbons.³⁹⁷¹ Undersecretary for Environmental Regulation Alonso Jiménez Reyes outlined that the consumption of hydrofluorocarbons had decreased by 86.3 per cent.

On 8 September 2022, Mexico met the other MIKTA countries of Indonesia, Korea, Turkey and Australia to address the impact of COVID-19.³⁹⁷² The goal of this meeting was to create a 21-point statement as a pledge to better maneuver through the present and any future global health emergencies.

Mexico has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Mexico has sought to improve environmental health by initiating sustainable agricultural production processes with the US, preserving ecologically vulnerable areas and promoting conservation efforts. It has also worked to support its national health system by collaborating with the WHO. However, actions taken have not been strong enough and need to further integrate One Health in its policies and decision-making processes.

Thus, Mexico receives a score of 0.

Analysts: Mehr Yawar, Saarah Khan and Chi Zhang

Russia: 0

Russia has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, Russia signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties (COP26) to stop and reverse deforestation.³⁹⁷³ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 24 November 2021, Minister of Agriculture Dmitry Patrushev attended the second meeting of the Eurasian Economic Union (EAEU)'s Council on Agricultural Policy.³⁹⁷⁴ The meeting focused on the EAEU's sustainable development policies and prospects for the digital transformation of the agricultural sector. The parties also discussed the formation of a unified market for agricultural seeds and the initiative to create a Eurasian commodity distribution network.

On 4 December 2021, the Ministry of Foreign Affairs published the Final Joint communique from the 2021 P5 Conference which highlighted the importance of the Nuclear Non-Proliferation Treaty towards addressing climate change and achieving the Sustainable Development Goals.³⁹⁷⁵ The goal of this action was to promote peaceful uses of nuclear energy towards energy production.

On 13 December 2021, Russia collaborated with South Africa to form virological, epidemiological and clinical research groups and explore the Omicron variant of COVID-19.³⁹⁷⁶ The goal of these groups was to consult on issues like laboratory diagnosis, immunology, virological monitoring, clinical features and treatment of infection.

On 27 January 2022, members of the Duma discussed the implementation of technological development initiatives ("beacon projects") across multiple sectors, including healthcare innovation.³⁹⁷⁷ The panel of government officials discussed the development of a remote health monitoring system for patients with high blood pressure and diabetes using wearables. They identified six regions in the countries as hosts of pilot projects and the projects will commence in cooperation with a technology partner and insurance companies later this year.

On 11 February 2022, Prime Minister Mikhail Mishustin announced that the Duma had earmarked about RUB9 billion in its three-year federal budget to support the development of hydrogen energy.³⁹⁷⁸ This initiative aims to increase the level of environmental security and ensure people's access to clean and reliable energy resources.

On 14 February 2022, Prime Minister Mishustin announced a federal program on environment development and climate change action for the period till 2030.³⁹⁷⁹ The program aims to develop breakthrough technology to manage and minimize climate risks, to direct research and technical potential towards building a base of verified climate and environmental data and to develop knowledge-intensive technology and tools required for conceptually new environmental research. Deputy Prime Minister Viktoria Abramchenko announced the allocation of RUB5.9 billion for implementing the plan over the next three years where priority areas include developing a system to monitor and record data on greenhouse gas flows and the carbon cycle in terrestrial ecosystems of Russia, monitoring systems of key areas of coastal zones and seas and carrying out climate and economic modelling.

³⁹⁷⁹ Meeting with deputy prime ministers, The Russian Government (Moscow) 14 February 2022. Access Date: 15 May 2022. <http://government.ru/en/news/44534/>

On 1 March 2022, Deputy Prime Minister Alexei Overchuk and Kazakhstan's Minister of Trade and Integration Bakhyt Sultanov signed an action plan as part of the Eurasian Intergovernmental Council to implement the "Comprehensive Programme for Economic Cooperations between the Government of Russian Federation and the Government of the Republic of Kazakhstan for 2021 to 2025."³⁹⁸⁰ The action plan aims to further develop the agro-industrial complex and the energy complex and work on environmental protection.

On 14 March 2022, Prime Minister Mishustin announced that the limit under mandatory medical insurance of medical equipment purchase for medical centres was increased from RUB100,000 to RUB1 million.³⁹⁸¹ This decision ensures that hospitals and clinics will be able to update their equipment.

On 21 March 2022, Deputy Prime Minister Abramchenko reported that the Duma adopted 10 regulations to support Russian agribusinesses.³⁹⁸² These measures include allocating an additional RUB2 billion to subsidise the transport of agricultural products to help price level fluctuations and stabilise supplies, providing agribusinesses with the option to extend earlier concessional short-term loans with a maturity date in 2022 for up to one year and to postpone repayment of the principal debt on previously taken concessional loans with a maturity date from 1 March 2022 to 31 May 2022 for up to six months. These measures aim to assist in the cash flow management of Russian agribusinesses.

On 7 April 2022, the Duma allocated a minimum of RUB5 billion to support 32 selection and seed production and three selection and breeding centres to continue support for the Food Security Doctrine.³⁹⁸³ This action aims to support farmers so that they have sufficient funds for ongoing field work.

On 7 April 2022, the Duma invested over RUB8 billion to supply equipment to medical rehabilitation departments.³⁹⁸⁴ This initiative aims to ensure access to medical check-ups and periodic screening examinations.

On 11 April 2022, the Duma contributed an extra RUB35 billion to continue to support hospitals and health care centres operating under the compulsory health insurance system.³⁹⁸⁵ A total of 74 regions will receive the funds.

On 20 April 2022, Russia and China held the 30th Meeting of the Mixed Committee on Fisheries Cooperation.³⁹⁸⁶ The goal of this cooperative meeting was to talk about collaborative fishing protocols and agreements, discuss mutual interests, review bilateral cooperation and identify necessary measures to crack down on the illegal trade of aquatic produce.

³⁹⁸⁶ China, Russia Hold 30th Meeting of Mixed Committee on Fisheries Cooperation, Ministry of Agriculture and Rural Affairs (Beijing) 28 April 2022. Access Date: 17 June 2022. http://english.moa.gov.cn/news_522/202204/t20220428_300848.html

On 21 April 2022, the Duma allocated RUB10 billion to reimburse farmers for grain crop production and sales.³⁹⁸⁷ This initiative represents efforts to improve the investment climate of the Russian agriculture sector.

On 28 April 2022, the Duma expanded the County Doctor and County Paramedic programs.³⁹⁸⁸ Under the program, young doctors would receive a one-time benefit ranging from RUB1 million to RUB1.5 million when joining a rural healthcare institution or working in remote and hard-to-access territories and small cities and paramedics, obstetricians and nurses would receive between RUB500,000 to 750,000 for the same. The Duma earmarked RUB6 billion per year in its three-year budget for payments to specialists under this programme. The goal of this program is to improve human resources in the rural healthcare system and provide better quality and availability of healthcare services.

On 4 May 2022, the Duma announced that it distributed almost RUB9 billion to equip medical rehabilitation units in 157 clinics.³⁹⁸⁹ The rehabilitation services would be free of charge under a compulsory health insurance policy on doctor's orders.

On 4 May 2022, the Duma allocated RUB1 billion to co-finance the construction of a new hospital in the Perm Territory as the infrastructure of an infectious diseases hospital there no longer meets modern standards.³⁹⁹⁰

On 11 May 2022, Prime Minister Mishustin reported that the Duma would be increasing funding for its Lake Baikal project to RUB3.8 billion.³⁹⁹¹ The project focuses on the development of the infrastructure needed to preserve the unique systems of Lake Baikal primarily from polluted wastewater.

On 20 June 2022, Minister of Health Mikhail Murashko met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.³⁹⁹²

On 7 July 2022, Minister Murashko announced a new initiative worth RUB2 billion to provide free medications as prescribed by doctors.³⁹⁹³ The plan includes medical foods for children with serious diseases and disabilities.

On 11 July 2022, the Duma discussed amendments to the state environmental protection program and allocated more than RUB26 billion in funds for regions to build modern waste management infrastructure.³⁹⁹⁴

On 27 July 2022, Russia along with Turkey, Ukraine and the UN signed the Black Sea Grain Initiative in Istanbul to unblock the millions of tonnes of grain that were stuck in Black Sea ports so they could avert a global food crisis.³⁹⁹⁵

On 28 July 2022, the Duma proposed a bill that would allow patients from Moscow, Belgorod and Moscow regions to purchase prescription medicines online.³⁹⁹⁶ This bill would increase the accessibility of medical treatment for low mobility patients and people with chronic diseases.

On 8 August 2022, the Duma proposed the draft resolution for a new approach to financing environmental protection initiatives.³⁹⁹⁷ This new approach calls for all natural resource users and those with environmental violations to contribute to the financing of the removal of accumulated environmental damage and restoration of the natural environment through fines, lawsuits and voluntary indemnification.

On 17 August 2022, Prime Minister Mishustin announced that agricultural enterprises would be able to take out loans to produce agriculture-related raw materials and purchase cold-chain logistics.³⁹⁹⁸ This support aims to help agribusinesses increase production and ensure food security.

On 24 August 2022, the Duma allocated RUB1.5 billion in subsidies towards the separation of domestic wastes.³⁹⁹⁹

On 2 September 2022, the Duma stated that it would continue its commitment to the Clean Country Project by eliminating unauthorized urban landfill sites and sources of accumulated damage and redistributed over RUB9.3 billion to this environmental project.⁴⁰⁰⁰ With over RUB2.7 billion to be extended before the end of the year, the entire fund would allow the elimination of 40 environmentally hazardous sites in 36 cities and completion of the reclamation of hundreds of hectares of land.⁴⁰⁰¹

On 23 September 2022, the Russian Economic Council approved a draft action plan for the Commonwealth of Independent States (CIS) countries to reduce resistance to antimicrobial medications and draft regulations on a central organisation for healthcare evaluation, quality-control technologies and medical treatment financing programmed in CIS member states.⁴⁰⁰² The action plan focuses on improving the cooperation between CIS states on healthcare.

Russia has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Russia has taken strong steps towards implementing a One Health approach in its national policies like pursuing innovation in national healthcare, funding new medical equipment and subsidizing agricultural businesses. However, it has

taken much weaker action in doing the same with its decision-making processes i.e., it signed onto a non-binding anti-deforestation declaration at COP26, attended an EAEU conference on agricultural policy and held a meeting with China on cooperation of their fisheries. None of these commitments were binding on Russian involvement.

Thus, Russia receives a score of 0.

Analyst: Sifan Wang

Saudi Arabia: 0

Saudi Arabia has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 10 November 2021, Minister of Energy Prince Abdulaziz bin Salman Al-Saud defended the role of fossil fuels amidst discussions of climate solutions at the 26th United Nations Climate Change Conference of the Parties (COP26).⁴⁰⁰³

On 15 November 2021, Ambassador to the UK Prince Khalid bin Bandar announced that Saudi Arabia was willing to tackle climate change and global warming at COP26.⁴⁰⁰⁴ He stated that Saudi Arabia had already set 2060 as the target date to achieve net zero carbon emissions as part of the Saudi Green Initiative.

On 31 January 2022, Minister of Environment, Water and Agriculture Abdulrahman bin Abdulmohsen Al-Fadhli and Iraq's Minister of Agriculture Mohammed Karim Al-Khafaji signed a memorandum of understanding (MOU) in the agricultural field.⁴⁰⁰⁵ The goal of the MOU was to strengthen bilateral cooperation in agriculture, livestock and fisheries.

On 17 February 2022, Minister Al-Fadhli and Omani Minister of Agricultural Wealth, Fisheries and Water Resources Saud bin Hamoud Al-Habsi signed an MOU on integrating goals in food and water security in bilateral policies.⁴⁰⁰⁶

On 21 February 2022, Advisor at the Royal Court and Supervisor General of King Salman Humanitarian Aid and Relief Center Abdullah bin Abdulaziz Al Rabeeah and the delegation from the Food and Agriculture Organization (FAO) met in Riyadh to discuss cooperation in food security and early recovery.⁴⁰⁰⁷

On 2 June 2022, Minister Al-Fadhli gave a speech highlighting national and international efforts made to protect the environment in compliance with the UN's Sustainable Development Goals at the

Stockholm+50 Conference.⁴⁰⁰⁸ Minister Al-Fadhli reaffirmed the commitment to confront the challenges of climate change.

On 6 June 2022, Deputy Minister for Water Abdulaziz Al Shaibani participated in the Second International High-Level Conference on “Water for Sustainable Development 2018-2028” in Dushanbe, Tajikistan.⁴⁰⁰⁹ Deputy Minister Al Shaibani talked about having a platform to exchange best water management practices.

On 20 June 2022, Minister of Health Eng. Fahad Al-Jalajel met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.⁴⁰¹⁰

Saudi Arabia has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. While Saudi Arabia has demonstrated actions which employ bilateral cooperation to combat food crises and multilateral cooperation of the FAO and G20 ministers to develop health systems, it has not implemented any policies that implement a One Health approach. Most of Saudi Arabia’s actions consist of attending international conferences and reiterating statements rather than taking decisive action towards the commitment.

Thus, Saudi Arabia receives a score of 0.

Analysts: Saarah Khan and Kyra Menezes

South Africa: +1

South Africa has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 9 November 2021, the Ministry of Forestry, Fisheries and the Environment introduced the National Veld and Forest Fire Amendment Bill.⁴⁰¹¹ Under this bill, “municipalities, state owned enterprises, public entities, or other organs of state which own land must join fire protection associations.” This bill also extends the powers of search, entry, seizure and arrest to peace officers and traditional leaders. The goal of this bill was to prevent and combat wildfires in the veld, mountains and forested areas.

On 13 December 2021, South Africa collaborated with Russia to form virological, epidemiological and clinical research groups and explore the Omicron variant of COVID-19.⁴⁰¹² The goal of these groups was to consult on issues like laboratory diagnosis, immunology, virological monitoring, clinical features and treatment of infection.

On 24 December 2021, the Department of Health announced that individuals older than 18 years of age who have received one dose of the Johnson & Johnson vaccine would be eligible to receive a booster dose after two months.⁴⁰¹³ The goal of this initiative was to prioritize and protect immunocompromised individuals in the ongoing pandemic situation.

On 28 December 2021, the Department of Health announced that individuals over the age of 18 years who have received two doses of the Pfizer vaccine will be eligible to get a booster dose of the Pfizer vaccine after six months.⁴⁰¹⁴

On 17 February 2022, Minister of Health Joe Phaahla and the Deputy Minister of Higher Education and Training Buti Manamela launched the “I Am Ready” campaign for young people.⁴⁰¹⁵ This campaign will take the format of open conversation between leaders, influencers and young people about the vaccine benefits and will address the issue of vaccine hesitancy. The goal of this initiative was to engage in continued collaborative efforts between government and non-governmental organizations to increase immunization.

On 21 February 2022, the Department of Health announced that as of 23 February 2022, the interval between the first and second doses of the Pfizer vaccine will be reduced to 21 days.⁴⁰¹⁶ Individuals will be also eligible to receive a booster dose 90 days after receiving the second dose of the vaccine.

On 21 February 2022, the Department of Health announced that individuals over the age of 18 who have received one dose of the Johnson & Johnson COVID-19 vaccine can receive a booster dose of the same vaccine or a booster dose of the Pfizer vaccine after 60 days.⁴⁰¹⁷

On 21 February 2022, the Department of Health announced that as of 23 February 2022, individuals over the age of 18 years who have received two doses of the Pfizer vaccine will be eligible to receive a booster dose of the same vaccine or a booster dose of the Johnson & Johnson COVID-19 vaccine.⁴⁰¹⁸

On 25 February 2022, the Department of Mineral Resources and Energy launched the National Development Plan which aims to achieve an energy sector by 2030 that would provide efficient and reliable energy service at acceptable rates, be socially equitable and ecologically sustainable.⁴⁰¹⁹ The purpose of this plan was to help mitigate the effects of climate change by introducing sustainable measures in the energy sector.

On 3 March 2022, Minister of Forestry, Fisheries and the Environment Barbara Creecy announced that they would end plastic pollution and move “towards an international legally binding instrument” as per the principles of the Rio Declaration on Environment and Development.⁴⁰²⁰ The purpose of this action was to protect the oceans since they are important for food security, address climate change, improve environmental health and encourage sustainable development.

On 11 March 2022, the Western Cape Department of Agriculture and California’s Department of Food and Agriculture officially signed a memorandum of understanding (MOU) to promote cooperation in agriculture.⁴⁰²¹ The purpose of this MOU was to establish a flexible framework to exchange information on climate-smart approaches to agriculture and enhance the availability of climate-smart agricultural technology.

On 14 March 2022, the Department of Health announced that individuals who have received one booster dose following primary vaccination with the Johnson & Johnson COVID-19 vaccine will be able to receive an additional booster dose 90 days after their first booster dose.⁴⁰²² The goal of this announcement was to encourage more individuals to get a second booster doses of the COVID-19 vaccine.

On 11 April 2022, the Department of Health issued an update to the vaccination schedule for immunocompromised adults.⁴⁰²³ Now, additional doses and booster shots may be given to immunocompromised adults over the age of 18 with the recommendation that additional doses be given between one and three months after the previous dose. The goal of this announcement was to encourage more immunocompromised adults to get booster doses of the COVID-19 vaccine.

On 22 April 2022, President Cyril Ramaphosa met members of the Global Steering Committee of the campaign for nature and welcomed the Global Biodiversity Framework by making it South Africa's goal to protect 30 per cent of the land and 30 per cent of the sea by 2030.⁴⁰²⁴ The goal of this meeting was to prevent biodiversity loss by 2030, mobilize financial resources to ensure protected areas are properly managed and approach biodiversity conservation in a way that integrates and respects indigenous leadership and rights.

On 3 June 2022, Minister Phaahla and US Chargé d'Affaires Heather Merritt announced their partnership towards the US' "Global VAX" effort to contribute to the global goal of vaccinating 70 per cent of every country's population against COVID-19 in 2022.⁴⁰²⁵ The goal of this announcement was to address the ongoing effects of the COVID-19 Pandemic.

On 3 June 2022, the Department of Health launched an application called FindMyJob.co.za that is accessible from any device as supported by the US Agency for International Development.⁴⁰²⁶ The goal of this application was to make it easy for South Africans to locate vaccination sites close to their places of work or residence.

On 20 June 2022, Minister Phaahla met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.⁴⁰²⁷

On 30 June 2022, Deputy Minister of Health Sibongiseni Dhlomo announced the launch of the 2022-2025 Youth HIV Prevention Strategy.⁴⁰²⁸ The goal of this strategy is to raise awareness about HIV, Tuberculosis, Sexually Transmitted Infections and Sexual and Reproductive Health.

On 16 July 2022, Minister Creecy attended the 13th Petersberg Climate Dialogue.⁴⁰²⁹ The goal of this dialogue was to inform the international community on South Africa's progress in advancing its climate objectives since the 26th UN Climate Change Conference.

On 21 July 2022, Minister Creecy announced initiatives for further improving the environmental assessment process for renewable energy projects in South Africa.⁴⁰³⁰ The goal of these measures was to improve the efficiency of the environmental assessment processes to facilitate the development of

Solar Photovoltaic Technology and associated infrastructure in places that have low to medium levels of environmental sensitivity.

On 29 August 2022, Minister Creecy published the revised National Biodiversity Framework 2019-2024.⁴⁰³¹ The purpose of this framework is to establish protected areas and identify priority areas for conservation action. This framework also identifies interventions intended to “accelerate implementation of high-level priorities of the National Biodiversity Strategy and Action Plan” over the course of the next five years.⁴⁰³²

South Africa has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. South Africa has ensured that citizens have access to and are informed about COVID-19 vaccinations and booster doses. South Africa has also collaborated with Russia to understand the virology of the Omicron variant, with California’s Department of Food and Agriculture to initiate sustainable agricultural practices and with the Global Steering Committee of Campaign for Nature to protect environmental health.

Thus, South Africa receives a score of +1.

On 27 July 2022, Turkey along with Russia, Ukraine and the UN signed the Black Sea Grain Initiative in Istanbul to unblock the millions of tonnes of grain that were stuck in Black Sea ports so they could avert a global food crisis.⁴⁰⁵¹

On 8 September 2022, Turkey met the other MIKTA countries of Mexico, Indonesia, Korea and Australia to address the impact of COVID-19.⁴⁰⁵² The goal of this meeting was to create a 21-point statement as a pledge to better maneuver through the present and any future global health emergencies.

Turkey has partially complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. Turkey has demonstrated a strong commitment to integrating the principles of One Health in its decision-making processes by collaborating with international actors like the WHO and ECO on projects like GOARN and SHIFA to tackle the threats of AMR, infectious diseases and food insecurity. However, it has fallen short of implementing those same principles on a national level as it has not taken enough action in introducing policies that integrate a One Health approach.

Thus, Turkey receives a score of 0.

Analyst: Jevan Konyar

United Kingdom: +1

The United Kingdom has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, the UK signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties (COP26) to stop and reverse deforestation.⁴⁰⁵³ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 26 November 2021, Secretary of State for Health Sajid Javid and China's Minister of the National Health Commission Ma Xiaowei attended a video conference to strengthen UK-China health collaboration.⁴⁰⁵⁴ During the conference, Secretary Javid and Minister Ma exchanged in-depth knowledge on issues such as COVID-19 prevention and control, diagnosis, treatment and testing, vaccine research and development and global health security.

On 2 December 2021, Secretary of State for Environment, Food and Rural Affairs George Eustice announced an increase in Countryside Stewardship payment rates beginning in January 2022.⁴⁰⁵⁵ The goal of this action is to incentivize more regenerative farming approaches.

goal of this collaboration was to strengthen decision-making processes in healthcare systems for both countries.

On 9 May 2022, the UK signed a memorandum of understanding (MOU) with Sri Lanka concerning recruitment in healthcare.⁴⁰⁶³ The goal of this MOU was to establish a clear pathway by which Sri Lankan healthcare professionals can find employment in the UK.

On 12 May 2022, Parliamentary Under-Secretary of State for Nature Recovery and the Domestic Environment Rebecca Pow published a statement clarifying certain policy aims related to environmental damage and pollution.⁴⁰⁶⁴ The goal of this statement was to integrate the implementation of the Environment Act which aims to improve air quality, biodiversity and water and resource efficiency.

On 13 May 2022, Minister of State for Farming, Fisheries and Food Victoria Prentis met with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.⁴⁰⁶⁵ The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

On 16 May 2022, the UK released a report outlining amendments to its five year plan to combat AMR.⁴⁰⁶⁶ The goal of the report is to invest in innovations to reduce overreliance on antimicrobials.

On 19 May 2022, Secretary Javid met with other G7 Health Ministers in Berlin to discuss the integration of One Health within existing systems.⁴⁰⁶⁷ The G7 ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization (WHO).

On 19 May 2022, Ambassador to the Organization for Security and Co-operation in Europe Neil Bush highlighted the impact of Russia's invasion of Ukraine on global food security and called on Russia to stop obstructing food exports from Ukraine.⁴⁰⁶⁸

On 27 May 2022, the UK organized a resolution with Argentina at the World Health Assembly (WHA) to improve international cooperation in the field of clinical trials.⁴⁰⁶⁹ The goal of this resolution is to

enhance the capacity of the internal community to respond to emerging infectious disease threats and prevent or tackle future pandemics.

On 27 May 2022, the UK signed an MOU with Sweden outlining areas of cooperation between scientists researching life sciences.⁴⁰⁷⁰ The goal of the MOU was to foster bilateral cooperation in science to tackle mutual issues in biological sciences.

On 20 June 2022, Secretary Javid met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.⁴⁰⁷¹

On 22 August 2022, the UK signed an MOU with Nepal outlining the conditions under which Nepali healthcare workers will be recruited in the UK.⁴⁰⁷² The goal of the MOU was to encourage Nepali healthcare workers to take up employment in the UK and diversify the healthcare system.

On 14 October 2022, Department of Health and Social Care announced an investment of over GBP800 million through the National Institute for Health and Care Research.⁴⁰⁷³ This funding will support research facilities to foster an environment where scientists can explore experimental medicine and where research about patient safety can thrive. Specifically, GBP790 million aims at encouraging breakthroughs in new treatments, while GBP25 million goes to patient safety research, including the reduction of medication error.

The United Kingdom has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. The UK has taken strong steps towards setting standards in public health at the WHA and towards funding ecosystem-focused approaches to environmental health at COP26. Additionally, the UK has voiced interest cooperating to tackle AMR alongside the WHO and G7 and G20 ministers.

Thus, the United Kingdom receives a score of +1.

Analyst: Jevan Konyar

United States: +1

The United States has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, the US signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse

deforestation.⁴⁰⁷⁴ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 2 November 2021, the Centers for Disease Control and Prevention (CDC) issued a media statement on the importance of One Health for COVID-19 and future pandemics in commemoration of the sixth annual One Health Day.⁴⁰⁷⁵

On 10 November 2021, Secretary of Energy Jennifer Granholm and Korea's Minister of Trade, Industry and Energy Moon Sung-wook met and agreed to launch the energy policy dialogue which is a ministerial talk aimed at strengthening partnership in the energy sector.⁴⁰⁷⁶ The goal of this initiative was to decarbonize the economy and achieve a sustainable clean energy future.

On 18 November 2021, Senator Jon Tester introduced legislation to suspend beef imports from Brazil following reports of detected Bovine Spongiform Encephalopathy or Mad Cow Disease.⁴⁰⁷⁷ This action aims to ensure food safety until experts can review and test the commodity.

On 18 November 2021, the Food and Drug Administration (FDA) approved a new drug application for vancomycin hydrochloride to treat infections caused by strains of methicillin-resistant staphylococci.⁴⁰⁷⁸ The goal of the change in drug application is so that it can be used for infections caused by vancomycin-susceptible organisms that are resistant to other antimicrobial drugs.

On 30 November 2021, the Animal and Plant Health Inspection Service (APHIS) of the Department of Agriculture announced it had begun a collaborative effort with several animal health and industry organizations to study antimicrobial use and resistance on commercial swine farms located in the Midwest, specifically focusing on the use and resistance related to animal health and production-related indicators.⁴⁰⁷⁹ The goal of this collaboration is to produce useful research on this “important One Health topic” and to serve as a model for future studies to monitor antimicrobial resistance (AMR) and use.

On 7 December 2021, the CDC announced it had awarded USD22 million to 28 organizations worldwide to combat AMR and other healthcare threats by establishing two new networks: the Global Action in Healthcare Network (GAIHN) and the Global Antimicrobial Resistance Laboratory and Response Network (Global AR Lab & Response Network).⁴⁰⁸⁰ The goal of this investment is to build

programs that focus on the prevention of infections in healthcare through proven infection control, build laboratory capacity to detect antimicrobial-resistant organisms in healthcare, the community and environment and develop new ways to more rapidly detect and respond to threats like AMR and COVID-19.

On 8 December 2021, the APHIS announced it would be awarding more than USD16.3 million to 64 projects focused on the protection of animal health.⁴⁰⁸¹ The funding seeks to support projects concerned with enhancing vaccine distribution plans and animal movement decisions in “high-consequence animal disease outbreaks,” develop point-of-care diagnostic tests for the rapid detection of high-impact animal diseases and improve emergency response capabilities at veterinary diagnostic laboratories part of the National Animal Health Laboratory Network (NAHLN).⁴⁰⁸² This investment aims to protect export markets in rural America and to eliminate foreign animal diseases.

On 23 December 2021, the US announced an investment of USD10 million in the Food and Agriculture Organization (FAO)’s work on responding to threats against human, animal and environmental health.⁴⁰⁸³ The goal of this investment was to strengthen national and international One Health systems through early warning systems, risk assessment and management of emerging animal and plant pests and diseases.

On 27 December 2021, the APHIS announced that it had prepared a pest risk assessment and risk management document on the imports of fresh pomelo fruit from Vietnam into the US, proposing specific phytosanitary measures for fresh pomelo consignments.⁴⁰⁸⁴ The goal of this action was to minimize the risk of plant pests and noxious weeds.

On 6 January 2022, the CDC reported an increase in cases of human rabies linked to bats and urged people to take measures to prevent or lessen their risk of infection with rabies.⁴⁰⁸⁵ The goal is to raise awareness of the risks of rabies from bats.

On 7 February 2022, Secretary of Agriculture Tom Vilsack launched the Department of Agriculture’s Partnership for Climate-Smart Commodities which aims to combat the climate crisis by partnering with agriculture, forestry and rural communities to provide climate solutions.⁴⁰⁸⁶

On 14 February 2022, the APHIS announced that it was seeking zoos, aquariums and wildlife facilities to participate in a SARS-CoV-2 Serology Study to identify animal species potentially susceptible to the

virus.⁴⁰⁸⁷ The goal of the study is articulated in four goals: to further identify species at risk of SARS-CoV-2, determine which species to prioritize for vaccination, investigate antibody responses to vaccination and to develop SARS-CoV-2 mitigation strategies and biosecurity practices.

On 11 March 2022, Chief Veterinary Officer Rosemary Sifford and Canada's Chief Veterinary Officer Mary Jane Ireland launched a new protocol to guide the cross-border transit of animals in emergency situations called the Emergency Transit Policy for Regulated Animals.⁴⁰⁸⁸ The goal of this policy was to make it easier to evacuate animals during natural disasters.

On 11 March 2022, California's Department of Food and Agriculture and Australia's Western Cape Department of Agriculture officially signed a memorandum of understanding (MOU) to promote cooperation in agriculture.⁴⁰⁸⁹ The purpose of this MOU was to establish a flexible framework to exchange information on climate-smart approaches to agriculture and enhance the availability of climate-smart agricultural technology.

On 5 April 2022, Secretary Vilsack met with Mexico's Secretary of Agriculture and Rural Development Victor Villalobos to discuss sustainable and climate-smart agricultural practices.⁴⁰⁹⁰ The two ministers announced that they would promote food security by supporting rural producers and their products, help smaller producers and new farmers and tackle climate change by giving farmers access to tools and technologies that would address emerging climate threats.

On 26 April 2022, the APHIS invited the public to comment on a draft Environmental Assessment (EA) called "Emergency Response for Highly Pathogenic Avian Influenza Outbreaks in Seven States" on the first seven states affected by the highly pathogenic Avian Influenza.⁴⁰⁹¹ The goal of this initiative is to supplement the findings of the EA which evaluates the potential environmental impacts from the proposed action in which the APHIS would collaborate with state and local authorities and affected owners in highly pathogenic avian influenza response activities within the seven states.

On 13 May 2022, Secretary Vilsack met with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.⁴⁰⁹² The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

On 19 May 2022, the US attended a meeting of G7 Health Ministers in Berlin to discuss the integration of One Health within existing systems.⁴⁰⁹³ The G7 ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization (WHO).

On 23 May 2022, Undersecretary for Global Affairs at the Department of Health and Human Services Loyce Pace attended the WHO's 75th World Health Assembly in Geneva, Switzerland under the theme "Health for Peace, Peace for Health."⁴⁰⁹⁴ Undersecretary Pace talked about efforts to expand and train the health workforce, who are mostly women, and strengthen international health regulations amongst global partners.

On 3 June 2022, Chargé d'Affaires Heather Merritt and South Africa's Minister of Health Joe Phaahla announced their partnership towards the "Global VAX" effort to contribute to the global goal of vaccinating 70 per cent of every country's population against COVID-19 in 2022.⁴⁰⁹⁵

On 20 June 2022, Secretary Becerra met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.⁴⁰⁹⁶

On 28 June 2022, Ambassador to China Nicholas Burns met with China's Minister of the National Health Commission Ma Xiaowei to exchange views on bilateral health communication and cooperation.⁴⁰⁹⁷ The goal of the meeting was to exchange COVID-19 prevention and control policies and scientific measures while enhancing Sino-US diplomatic relations.

On 14 July 2022, Administrator of the Environmental Protection Agency Michael Regan met with Canada's Minister of Environment and Climate Change Steven Guilbeault and Mexico's Secretary of the Environment and Natural Resources María Luisa Albores González for the the 29th Annual Council Session and the Public Forum of the Joint Public Advisory Committee of the Commission for Environmental Cooperation.⁴⁰⁹⁸ The goal of this program was to promote changes in consumption and attitudes toward climate change in marginalized communities.

On 28 July 2022, the CDC published a new special report on the impact of COVID-19 on AMR.⁴⁰⁹⁹ The report shows that much of the progress made in the US combating AMR was lost in 2020 largely because of the COVID-19 pandemic and concludes the threat of AMR infections is not only still

present but has worsened in the US. The goal of the report was to provide valuable knowledge to industry stakeholders on AMR.

On 5 August 2022, the APHIS announced it would begin its annual distribution of RABORAL V-RG®, an oral rabies vaccine bait, in areas in the eastern US to prevent the spread of raccoon rabies.⁴¹⁰⁰ This action aims to curb the spread of rabies which is a serious public health concern.

On 11 August 2022, the APHIS added the Kingdom of Lesotho, the Republic of Benin and the Republic of Botswana to the list of regions affected with highly pathogenic avian influenza (HPAI).⁴¹⁰¹ The goal of this announcement is to decrease the transmission of HPAI.

On 8 September 2022, the APHIS announced it would launch an updated web-based dashboard containing information on SARS-CoV-2 variants detected in animals.⁴¹⁰² The goal of the dashboard is to provide useful data as researchers work to better understand and combat SARS-CoV-2 and protect animal and human health, using a One Health approach.

On 14 September 2022, Secretary Vilsack announced that the Department of Agriculture would invest up to USD2.8 billion in 70 select projects under the first pool of the Partnerships for Climate-Smart Commodities funding opportunity.⁴¹⁰³ The goal of the initiative is to expand markets for climate-smart commodities, leverage greenhouse gas benefits of climate-smart commodity production and provide benefits to production agriculture.

On 15 September 2022, the APHIS announced it had recently made final touches on a biosecurity tool funded under the American Rescue Plan Act which seeks to conduct monitoring and surveillance for SARA-CoV-2 in susceptible animals.⁴¹⁰⁴ The goal of the tool is to act as an early warning system and potentially prevent or limit the next zoonotic disease outbreak.

On 15 September 2022, the APHIS confirmed the presence of HPAI in a non-commercial backyard flock in Obion County, Tennessee and said that it was working closely with state animal health officials on a joint incident response.⁴¹⁰⁵

On 15 September 2022, the APHIS announced it was cooperating with Native American agriculture and natural resources organizations to host regional Emergency Preparedness and Response

training.⁴¹⁰⁶ The goal of such workshops is to open a critical dialogue between the APHIS and indigenous peoples about responding to animal or plant health emergencies and give workshop participants technical assistance with development emergency response plans.

The United States has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. National actors like the CDC, FDA and APHIS took strong action to balance the health of humans, animals and ecosystems by combating threats like AMR and COVID-19. The US also helped establish important healthcare systems like the GAIHN, the Global AR Lab & Resistance Framework and NAHLN. The US collaborated with international actors like the WHO, FAO and G20 to address climate challenges and support global health systems.

Thus, the United States receives a score of +1.

Analysts: Saarah Khan and Jonathan Chin Wei

European Union: +1

The European Union has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes.

On 2 November 2021, the European Commission signed the Glasgow Leaders' Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference of the Parties to stop and reverse deforestation.⁴¹⁰⁷ The goal of this agreement was to pursue policies enhancing sustainable agriculture and food security, make sustainability profitable and support smallholders, Indigenous Peoples and local communities who depend on forests for their livelihoods.

On 7 December 2021, the EU committed EUR2.5 billion in funding towards combatting global hunger and food shortages, with targeted support for developing nations in Africa, Asia, the Pacific, South America and the Caribbean.⁴¹⁰⁸ The goal of this contribution is to promote initiatives that strengthen nutrition-relevant sectors including agriculture, water, sanitation and healthcare.

On 22 December 2021, the EU provided EUR15 million in humanitarian aid to address the food crisis in Africa's Sahel region, adding to a previous contribution of EUR54 million.⁴¹⁰⁹ The goal of this funding was to improve access to healthcare and sanitary water supplies, provide treatment for malnourished children and distribute emergency nutritional aid.

⁴¹⁰⁹ Sahel food crisis: EU allocates €15 million in additional humanitarian funding, European Commission (Brussels) 22 December 2021. Access Date: 12 February 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_21_7048

On 28 January 2022, the EU implemented new legislation on the regulation of veterinary medicinal products to inhibit antimicrobial resistance in livestock.⁴¹¹⁰ The goal of this action is to prevent future zoonotic disease outbreaks and public health crises.

On 9 February 2022, the EU committed to donating a minimum of 700 million COVID-19 vaccine doses to underdeveloped nations.⁴¹¹¹ The EU also announced a partnership with countries in Africa to construct robust healthcare infrastructure and aid in the containment of neglected tropical diseases along with HIV and COVID-19. As part of this coalition, the EU committed EUR1 billion towards developing independent pharmaceutical and vaccine proliferation infrastructure.

On 11 February 2022, the EU launched the coalition on Biodiversity Beyond National Jurisdiction (BBNJ) as part of its commitments to promoting ecosystem preservation and combatting climate change.⁴¹¹² The initiative is focused on reducing plastic pollution and addressing marine litter while protecting and restoring marine biodiversity.

On 23 March 2022, the European Commission developed and implemented a comprehensive food security strategy in response to the ongoing Ukraine crisis.⁴¹¹³ The EU provided EUR500 million in funding towards bolstering agriculture, food production and food distribution in Ukraine and further committed to supporting vulnerable food-importing countries in the face of global shortages and price instability.

On 24 March 2022, the EU contributed EUR24.5 million to the World Health Organization (WHO)'s initiative for expanding COVID-19 manufacturing, distribution and accessibility in Africa.⁴¹¹⁴ This funding will facilitate the transfer of mRNA technology across the region and strengthen medical regulatory agencies.

On 6 April 2022, the EU donated EUR554 million to combat the food insecurity and nutrition crises in the Sahel and Lake Chad regions.⁴¹¹⁵ The objectives of this initiative are to provide emergency relief to affected regions and improve underlying food security infrastructure.

On 8 April 2022, the European Commission pledged EUR75 million in funding toward the Gavi COVAX initiative at the Break COVID Now Summit co-hosted by Germany, Indonesia, Ghana, Senegal and Gavi which is the Vaccine Alliance.⁴¹¹⁶ The goal of this investment was to ensure equitable global access to COVID-19 vaccines.

On 12 April 2022, Commissioner for Crisis Management Janez Lenarčič, France's Minister for Europe and Foreign Affairs Jean-Yves Le Drian and Minister for Agriculture and Food Julien Denormandie and travelled to Rome to meet with Italy's Minister of Foreign Affairs and International Cooperation Luigi

Di Maio and discuss food security in light of Russia's invasion of Ukraine.⁴¹¹⁷ Also in attendance were the leaders of the World Food Programme, the Food and Agriculture Organization of the United Nations, the International Fund for Agricultural Development and the Committee on World Food Security.

On 26 April 2022, the European Commission committed to providing EUR633 million in funding towards improving food security in the Horn of Africa, providing emergency humanitarian aid and implementing long-term solutions to ensure food availability and accessibility.⁴¹¹⁸

On 12 May 2022, the European Commission provided EUR400 million in support of COVID-19 vaccine production and distribution in Africa.⁴¹¹⁹ The EU further pledged EUR427 million in funding for the establishment of a Global Pandemic Preparedness Fund which aims to detect and prevent the outbreak and spread of future global health crises.

On 13 May 2022, Commissioner for Agriculture Janusz Qojciechowski met with other G7 Agriculture Ministers in Stuttgart to discuss the consequences of Russia's invasion of Ukraine on global food security and nutrition.⁴¹²⁰ The G7 ministers committed to avoid any restrictions on food exports and continue work on creating a more sustainable and resilient agricultural system.

On 19 May 2022, Commissioner for Health and Food Safety Stella Kyriakides met with other G7 Health Ministers in Berlin to discuss the integration of One Health within existing systems.⁴¹²¹ The G7 ministers committed to a more inclusive and equity-driven pandemic prevention response system as supported by the World Health Organization.

On 20 June 2022, Commissioner Kyriakides met with other G20 Health Ministers to discuss ways to strengthen global health systems and reflect on universal tools that have helped during the pandemic like the Global Initiative on Sharing Avian Influenza Data and the Access to COVID Tools Accelerator.⁴¹²²

On 28 June 2022, the European Commission's Health Emergency Preparedness and Response Authority (HERA) commenced the delivery of monkeypox vaccine doses to member states prioritizing countries most affected by viral monkeypox outbreaks.⁴¹²³ This action was part of an effort to contain and prevent the spread of an emerging public health threat posed by the virus.

On 12 July 2022, Commissioner Kyriakides met with EU representatives in Brussels to identify urgent cross-border health threats and initiate the process of launching prevention, preparedness and monitoring measures to contain potential health crises.⁴¹²⁴

On 15 July 2022, Commissioner Kyriakides convened with Ukraine's Minister of Health Viktor Liashko to sign the EU4Health program agreement.⁴¹²⁵ Ukraine's official ratification of this agreement will allow it to rapidly access EU health funding allocated toward the program – a total budget of EUR5.3 billion until 2027. With this contribution, the EU intends to assist Ukraine in addressing immediate healthcare sector demands and to alleviate some of the pressures placed on its public health system by Russia's invasion.

On 28 July 2022, the European Commission's HERA signed an agreement with GSK pharmaceuticals for the joint acquisition of a pandemic influenza vaccine named Ajupanrix.⁴¹²⁶ The agreement allows signatories to procure up to 85 million vaccine doses in the event of a future influenza pandemic emergency. This agreement is part of the EU's commitment to enhancing medical countermeasures and health security resources.

On 7 September 2022, the European Commission's HERA acquired over 170,000 additional doses of the monkeypox vaccine to be distributed among EU member states in an effort to contain existing outbreaks and prevent further spread of the virus.⁴¹²⁷ This procurement brought the EU's total number of secured vaccine doses to over 330,000.

On 13 September 2022, Commissioner Kyriakides released a joint statement with WHO Regional Director for Europe Hans Henri Kluge reemphasizing the EU's commitment to containing and halting the spread of the monkeypox virus.⁴¹²⁸ The statement outlined four key areas of collaboration between the EU and the WHO: providing guidance and information to health authorities and civil groups, guaranteeing the availability and accessibility of medical countermeasures and supplies, protecting at-risk population groups from stigma and discrimination and bolstering global research efforts into the virus.

On 21 September 2022, the EU pledged to contribute EUR715 million to the Global Fund which is an organization committed to eliminating the spread of AIDS, Tuberculosis, Malaria and COVID-19.⁴¹²⁹ The Fund provides financial aid to low and middle-income countries in order to enhance access to medical equipment and therapeutics, strengthen health infrastructure and improve global health security.

The European Union has fully complied with its commitment to integrate the implementation of a One Health approach in relevant policies and decision-making processes. The EU has demonstrated a

⁴¹²⁹ EU announces historic €715 million for the Global Fund to save millions of lives from AIDS, tuberculosis and malaria, European Commission (New York) 21 September 2022. Access Date: 24 September 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_22_5650

commitment to end food crises as seen with its investments in Africa, the Sahel region and Ukraine to secure food supplies and provide nutrition as well as fight infectious and tropical diseases. The BBNJ is an example of a policy to support environmental health. The EU has also worked with actors like the WHO, G7, G20 and Gavi Vaccine Alliance to support the preparedness and responsiveness of the global health systems.

Thus, the European Union receives a score of +1.

Background

At the 2014 Brisbane Summit G20 leaders made their first commitments on health in response to the outbreak of Ebola virus in Guinea, Liberia and Sierra Leone.⁴¹³⁰ They approved a joint statement on the Ebola threat and pledged to “do what is necessary to ensure the international effort can extinguish the outbreak” and urged the World Bank Group and International Monetary Fund to “continue their strong support for the affected countries.” The G20 members pledged to fully implement the World Health Organization’s (WHO) International Health Regulations (IHR) addressing “longer-term systemic issues and gaps in capability, preparedness and response capacity that expose the global economy to the impacts of infectious disease.”

At the 2017 Hamburg Summit under Germany’s G20 presidency, G20 health ministers met for the first time. They acknowledged the role of the IHR and agreed to act “accordingly with obligations under the IHR and support the leadership and coordination of WHO in the event of health crises of

⁴¹³⁰ G20 Leaders’ Brisbane Statement on Ebola, RANEP (Moscow) 15 November 2014. Access Date: 12 January 2022. <https://www.ranepa.ru/images/media/g20/2014brisbane/G20%20Leaders%E2%80%99%20Brisbane%20Statement%20on%20Ebola.pdf>

international concern.”⁴¹³¹ G20 members agreed to “strengthen the national and, where applicable, regional monitoring and surveillance of both antimicrobial resistance and the consumption of antibiotics” within their own jurisdictions. At the Hamburg Summit the G20 leaders discussed antimicrobial resistance (AMR), acknowledged its “growing threat to public health and economic growth” and pledged to “strengthen public awareness, infection prevention and control and improve the understanding of the issue of antimicrobials in the environment.”⁴¹³²

At the 2018 Buenos Aires Summit the G20 leaders once again acknowledged “the need for further multi-sectoral action to reduce the spread of AMR” and extended the health-related agenda of the G20 by pledging to “tackle malnutrition, with a special focus on childhood overweight and obesity, through national, community-based and collaborative multi-stakeholder approaches.”⁴¹³³ In addition, the G20 leaders draw attention to provision of “better health care” and agreed to “improve [health care] quality and affordability to move towards Universal Health Coverage.”

At the 2019 Osaka Summit, G20 leaders reaffirmed the need for stronger health systems providing cost-effective and evidence-based intervention to achieve better access to health care and to improve its quality and affordability to move towards universal health coverage (UHC), in line with their national contexts and priorities.⁴¹³⁴ They also promised to continue to strengthen core capacities required by IHR for preventing, detecting and responding to public health emergencies, recognized the WHO’s critical role, and committed to ending HIV/AIDS, tuberculosis and malaria.

In 2020 COVID-19 outbreak became the most important issue for G20 cooperation. In their statement made at Extraordinary G20 Leaders’ Summit on 26 March 2020, members pledged to “take all necessary health measures and seek to ensure adequate financing to contain the pandemic and protect people, especially the most vulnerable.”⁴¹³⁵ They promised to “share timely and transparent information; exchange epidemiological and clinical data; share materials necessary for research and development; and strengthen health systems globally, including through supporting the full implementation of the WHO International Health Regulations (IHR 2005).” Leaders committed to further strengthen the WHO’s mandate in coordinating the international fight against the pandemic by working together and with stakeholders to close the financing gap in the WHO Strategic Preparedness and Response Plan. They also promised “to strengthen national, regional, and global capacities to respond to potential infectious disease outbreaks by substantially increasing our epidemic preparedness spending.” G20 leaders pledged to work together to increase research and development funding for vaccines and medicines, leverage digital technologies, and strengthen scientific international cooperation.

At the 2020 Riyadh Summit, G20 leaders committed to advancing global pandemic preparedness, prevention, detection, and response and reaffirmed commitment to full compliance with IHR 2005. They also promised to spare no effort to ensure affordable and equitable access to vaccines for all people, consistent with members’ commitments to incentivize innovation and supported all

collaborative efforts, especially the Access to COVID-19 Tools Accelerator (ACT-A) initiative and its COVAX facility, and the voluntary licensing of intellectual property.⁴¹³⁶

At the 2021 Rome Summit, G20 leaders made a commitment to “pursue our efforts to enhance innovation in digital and other health-related technologies, taking into account the need to protect personal health data.”⁴¹³⁷

Commitment Features

G20 leaders committed to pursue efforts to enhance innovation in digital and other health-related technologies, taking into account the need to protect personal health data. This commitment has two parts: enhancing innovation in digital and other health-related technologies and ensuring personal health data protection.

Part I: Enhancing innovation in digital and other health-related technologies

Health innovation refers to the aims to develop and deliver new or enhanced health policies, systems, products, technologies, services, and delivery methods to improve public health (WHO compendium of innovative health technologies).⁴¹³⁸

Health technology refers to the application of organized knowledge and skills in the form of (medical) devices, medicines, vaccines, procedures, and systems developed to solve a health problem and improve quality of care and/or life (WHO compendium of innovative health technologies).⁴¹³⁹

To comply with the first part of the commitment a G20 member should take action to promote and enhance the usage of innovative technologies in the health sector. Examples of such technologies can be found in the List of most important innovative health technologies in the WHO compendium of innovative health technologies,⁴¹⁴⁰ but are not limited to it.

Examples of actions G20 members can take to comply with this part of the commitment include following actions: building the physical infrastructure; deploying appropriate services and applications; developing a capable health workforce; ensuring a sound legal and regulatory environment; improving governance, policy, standardization and interoperability; promote accountability and justify the investment of funds.⁴¹⁴¹

Part II: Personal health data protection

Personal Data refers to any information relating to an identified or identifiable individual.⁴¹⁴²

⁴¹³⁸ WHO compendium of innovative health technologies for low-resource settings, WHO (Geneva) 31 August 2021. Access Date: 12 January 2022. <https://www.who.int/publications/i/item/9789240032507>

⁴¹³⁹ WHO compendium of innovative health technologies for low-resource settings, WHO (Geneva) 31 August 2021. Access Date: 12 January 2022. <https://www.who.int/publications/i/item/9789240032507>

⁴¹⁴⁰ WHO compendium of innovative health technologies for low-resource settings, WHO (Geneva) 31 August 2021. Access Date: 12 January 2022. <https://www.who.int/publications/i/item/9789240032507>

⁴¹⁴¹ Digital technologies: shaping the future of primary health care, WHO (Geneva) 2018. Access Date: 12 January 2022. <https://www.who.int/docs/default-source/primary-health-care-conference/digital-technologies.pdf>

⁴¹⁴² The protection of personal data in health information systems – principles and processes for public health, WHO (Geneva) 2021. Access Date: 12 January 2022. <https://apps.who.int/iris/bitstream/handle/10665/341374/WHO-EURO-2021-1994-41749-57154-eng.pdf>

Personal health data refers to any information relating to an identified or identifiable individual concerning health.⁴¹⁴³

To comply with the second part of the commitment a G20 member should take actions to ensure personal health data protection. These actions include but are not limited to: defining the specific legal basis for the data processing, considering the use of informed consent as a legal basis, using the vital interest basis only in exceptional cases if the public health intervention is to the direct benefit of data subjects, developing a privacy policy and publishing the policy on the website or via other means, using plain language that is accessible to lay people, working proactively with civil society to communicate data protection concepts and processes.⁴¹⁴⁴ More information on possible actions can be found in WHO’s document “The protection of personal data in health information systems – principles and processes for public health.”

To achieve full compliance, a G20 member should both promote the usage and development of innovations and digital technologies and take actions to ensure personal health data protection. Taking actions on only one part of the commitment will result in a score of partial compliance. If a G20 member fails to take action on any part of the commitment, it receives a score of non-compliance.

Scoring Guidelines

-1	G20 member has failed to take action on digital technology development in the health sector and protection personal health data
0	G20 member took measures to enhance innovation in digital and other health-related technologies OR to ensure personal health data protection
+1	G20 member took measures to BOTH enhance innovation in digital and other health-related technologies AND to ensure personal health data protection

*Compliance director: Alexander Ignatov

Argentina: +1

Argentina has fully complied with the commitment to take actions on digital technology development in the health sector and protection personal health data.

On 8 November 2021, President Alberto Fernandez, participating in the closing event “Argentina 2030: challenges of science and technology,” announced the creation of platform Science X Goals. This program provides an overview of the existing research developed by institutions of the scientific-technological and university system in Argentina, within the framework of the objectives set by the Economic and Social Council.⁴¹⁴⁵

On 15 November 2021, the Inter-Agency Bureau for Research, Development and Production of Vaccines, Treatments, Diagnostics and Other Health Technologies has reaffirmed its commitment to establish a strategic policy framework for the research, development and production of new

technologies that contribute to the diagnosis, treatment and control of COVID-19 coronavirus in the country.⁴¹⁴⁶

On 16 November 2021, Minister of Health Carla Vizzotti unveiled a new mobile application “Salud-ENT.” The application allows health teams to access in a simple and dynamic way to clinical practice guidelines and other key content for the prevention and control of Non-Communicable Diseases (NCDs), and information on their risk factors.⁴¹⁴⁷

On 16 November 2021, the government established a designated ministerial bureau to “formulate public policies contributing to the formulation of national policies aimed at mitigating the effects of COVID-19, promoting scientific and technological production and strengthening the capacity of the productive sector.” The information regarding the new governmental body was published in the Official Gazette, pursuant to resolution 5/2021.⁴¹⁴⁸

On 19 November 2021, on the sidelines of the XLIX Ordinary Meeting of the Ministers of Health of MERCOSUR member countries, the Ministers of Health of Argentina, Brazil, Paraguay and Uruguay signed an agreement to establish “a special Committee to promote regional manufacturing capacity for medicines, immunizers and health technologies.”⁴¹⁴⁹

On 3 December 2021, President Fernandez announced the launch of a digital version of the single disability certificate to “facilitate access to a key tool for empowerment and administrative simplification.”⁴¹⁵⁰

On 6 December 2021, Minister Vizzotti signed a draft ministerial resolution on the creation of an Argentinean network to monitor resistance to pesticides used in public health. The aim is to establish a scientific and technical council to facilitate interaction between the scientific and technical sector and public decision-making bodies.⁴¹⁵¹

On 13 December 2021, the Ministry of Health under the Public Health Sector Support Programme II (PROSEPU II) considered supplying equipment to 15 hospitals in the country and planning future investments in diagnostic equipment and ambulances. The loan is granted within the framework of

cooperation with the Government of Italy to ensure quality health care for the population of Argentina.⁴¹⁵²

On 16 December 2021, the Ministry of Health and Science, Technology and Innovation initiated a series of training courses on digital transformation to promote use of new technologies to provide more accessible and quality health services to the population. During the conference the digital health transformation strategies for inclusion were presented.⁴¹⁵³

On 24 January 2022, Minister Vizotti took part in the opening of the 150th meeting of the Executive Board of the World Health Organization (WHO), stressed the importance of strengthening local and regional production of health products and technologies to prevent inequities in access to medicines, vaccines and essential resources during health emergencies. Argentina together with Brazil and South Africa, presented a draft decision extending to 2030 the implementation of the Global Strategy and Plan of Action on Public Health, Innovation and Intellectual Property.⁴¹⁵⁴

On 24 January 2022, the government unveiled further policy actions designed as to provide connectivity to hard-to-reach Primary Health Care Centers. The advent of the internet service will allow 1822 health centers in 19 jurisdictions to be able to perform teleconsultations. The centers would also be able to integrate with health information systems.⁴¹⁵⁵

On 28 January 2022, President Fernandez led the signing of two projects worth a total of ARS210 million for health and infrastructure with the European Investment Bank.⁴¹⁵⁶

On 23 February 2022, Minister Vizotti has taken virtual part in WHO conference to announce that Synergium Biotech, an Argentinean biopharmaceutical company, has been selected by an international body as the centre for the development of RNA vaccines against COVID-19 for the Americas region.⁴¹⁵⁷

On 28 March 2022, Minister of Science Daniel Filmus announced an investment of ARS575.1 million for equipment, infrastructure works and the incorporation of human resources to increase and strengthen capacities for the provision of strategic technological services, with a counterpart contribution of ARS311.1 million. In addition, Minister Filmus announced the launch of the CANDID#1 vaccine production plant against Argentine hemorrhagic fever.⁴¹⁵⁸

On 30 March 2022, Minister Filmus announced the start of clinical safety trials of the Argentinean “ARVAC Cecilia Grierson” vaccine on humans.⁴¹⁵⁹

On 25 April 2022, President Fernandez launched “Federal Strategy for a Comprehensive Solution to Mental Health Problems,” which will seek to guarantee mental health care and attention at all stages of life, increase the training of human resources in the area, and provide devices for outpatient care and labor insertion. This initiative anticipates an investment of ARS7.7 billion.⁴¹⁶⁰

On 30 April 2022, the Ministry of Health through ministerial resolution 844/2022 created the National Programme of Community Health, with the aim of strengthening the strategy of primary health care as a state policy, guaranteeing universal, equitable and quality access to the entire population.⁴¹⁶¹

On 10 May 2022, the National Ministry of Health established a joint working group with the aim of carrying out epidemiological monitoring and in-depth analysis of suspected cases of severe acute hepatitis of unknown origin in the paediatric population.⁴¹⁶²

On 17 June 2022, Minister Vizotti signed a joint ministerial resolution for the creation of the Permanent Commission of Work and Technical Assistance for the Implementation of the Standards of Public and Private Mental Health Services. The commission aims to work together with the country’s 24 jurisdictions in the development of standards for licensing, supervision, accreditation, certification, monitoring, auditing, oversight and evaluation of public and private mental health services.⁴¹⁶³

On 23 September 2022, delegation from the Ministry of Health participated in an act of delivery of computers that will be used to strengthen the digital health initiatives carried out by the San Luis province. On this occasion, the Ministry of Health of San Luis received 72 new computers, which are part of the 5,189 computers that the National Government is distributing in the 24 jurisdictions, with the aim of updating the equipment and optimizing jurisdictional digital health strategies.⁴¹⁶⁴

Argentina has taken strong actions in both enhancing innovation in digital technologies and personal health data protection. The Government established a strategic policy framework for the research, development and production of new technologies, contributing to the diagnosis, treatment and control of COVID-19 coronavirus. In this regard, Government launches clinical safety trial of Argentine vaccine, inaugurates a series of training courses on digital transformation to promote the use of new technologies to provide more accessible and quality health services to the population. Argentina

Department of Health Analysis and Surveillance of Non-Communicable Diseases (DASNT/SVS/MS).⁴¹⁸⁰

On 22 September 2022, it was announced that the new version of the Notifiable Diseases Information System, called e-SUS Sinan, for the notification and investigation of monkeypox, is now operational. To speed up communication and qualify timely data analysis, the new version of the system was launched as a 100 per cent online platform, with high-performance infrastructure. The platform will contribute to the democratization of information and allow all health professionals to have access to information and make it available to the community.⁴¹⁸¹

Brazil took measures to both enhance innovation in digital and other health-related technologies and to ensure personal health data protection.

Thus, Brazil receives a score of +1.

Analyst: Irina Popova

Canada: 0

Canada has partially complied with the commitment to enhance innovation in digital and other health-related technologies, taking into account the need to protect personal health data.

On 8 November 2021, the Canadian Centre for Occupational Health and Safety (CCOHS) developed a free online course to help different types of organizations located in Canada raise awareness and recognize the importance of psychological health and safety in the workplace. Psychological Health and Safety Awareness online course provides an introduction to mental health in the workplace including an overview of the six categories of psychosocial factors and how they impact the mental health of people.⁴¹⁸²

On 29 November 2021, the CCOHS released two free online courses to help workplace managers and employees prepare for a safe return to work during the COVID-19 pandemic.⁴¹⁸³

On 8 December 2021, the CCOHS launched a free online course designed to help workplaces better understand and respond to the impact of stigma against people who use substances. Substance Use in the Workplace: Addressing Stigma course explains what stigma and discrimination are, how stigma can affect a person's care, how to address concerns without using language or behaviors stigma, and what steps to take to talk to others.⁴¹⁸⁴

On 16 December 2021, Minister of Health Jean-Yves Duclos announced that a Canada-Quebec agreement had been reached for the provision of virtual health services in the context of the COVID-19 pandemic. Thanks to this agreement, Quebec is receiving more than CAD28 million to expand its range of virtual health care services. Quebec will invest the federal funds through two initiatives: a Virtual Ophthalmology Solution which uses artificial intelligence to detect and treat diabetic retinopathy in patients with type 2 diabetes; and a Virtual Care and Services Platform to manage and integrate requests for all types of teleconsultations in Quebec.⁴¹⁸⁵

On 17 December 2021, Minister of Innovation, Science and Industry François-Philippe Champagne announced the launch of the consultation on a policy and licensing framework for spectrum in the 3800 megahertz band to support 5G deployment and promote competition in the wireless market. The licensing of spectrum in the 3800 megahertz band will enable the deployment of new technologies, which will help create new jobs and better products and services for the citizens of Canada. The main purpose of the consultation is to collect and summarize opinions on certain important factors, such as the requirements relating to the freed portions of the spectrum that should be imposed on licensees, the guidelines for the auction framework to support competition within the wireless market and some additional provisions to support Canada's Connectivity Strategy.⁴¹⁸⁶

On 4 March 2021, in an effort to better understand the impact of the COVID-19 pandemic on equity seeking communities Minister Duclos, Minister of Mental Health and Addictions Carolyn Bennett, and Minister for Women and Gender Equality and Youth Marci Ien announced that the government would invest CAD26.3 million in 69 new research projects across the country. These projects will focus on the impact of the pandemic on Indigenous, Black, and racialized communities, as well as children and youth, and people living with HIV, mental illness, and chronic health conditions. For example, Dr. Josephine Etowa at the University of Ottawa will work to strengthen the capacity of health care providers to reduce the impact of COVID-19 on Black communities. Also, Dr. Helen-Maria Vasiliadis at Université de Sherbrooke will study ways to help people living with social anxiety disorder during the pandemic.⁴¹⁸⁷

On 8 March 2022, to address the gendered impacts of COVID-19, the International Development Research Centre, the Institutes of Health Research and the Social Sciences and Humanities Research Council launched Women RISE (Women's health and economic empowerment for a COVID-19 Recovery that is Inclusive, Sustainable and Equitable), a CAD22 million research initiative. Women RISE will support global action-oriented, gender-transformative research on how women's health and their work, whether paid or unpaid, intersect and interact in the preparation for, response to and recovery from COVID-19. Under the initiative, teams of researchers from low- and middle- income

countries and Canada will inform solutions and strategies to improve women's health and socioeconomic well-being throughout the recovery from COVID-19.⁴¹⁸⁸

On 17 March 2022, Minister Duclos announced an investment of CAD16.1 million in funding and in-kind contributions from the Government of Canada and the provincial governments of New Brunswick, Nova Scotia, and Prince Edward Island to support the work of a Maritime hub for patient-oriented research. Known as the Maritime SPOR SUPPORT Unit, it has played an important role building regional capacity in patient-oriented research since 2013.⁴¹⁸⁹

On 31 March 2022, Minister Duclos and Minister Bennett announced an investment of CAD31.1 million over six years for the Health Research Training Platform (HRTTP). The HRTTP consists of 13 unique training programs that bring together researchers from different hospitals and universities, with a view to increase Canada's capacity to conduct research on specific disease areas and health challenges. This will help trainees and early career researchers develop skills that will increase their employability and set them up for success in careers that span academia and beyond. Participants will have access to diverse, high-quality mentors and training that builds their academic and professional development skills, such as in grant writing, project management, science communication, interdisciplinary research, open science, and knowledge mobilization.⁴¹⁹⁰

On 21 April 2022, Minister Bennet announced an investment of CAD2 million for research that will inform policies and interventions to reduce alcohol-related harms in Canada. The government, through the Canadian Institutes of Health Research, and in partnership with the Canadian Cancer Society, would fund 20 research projects that will evaluate policies, programs and practices that regulate alcohol and that have the potential to impact health.⁴¹⁹¹

On 3 May 2022, Parliamentary Secretary to the Minister of Health Adam van Koevorden announced funding of CAD5 million to support a new national research network that will focus on improving the prevention, diagnosis, treatment, and care of heart failure across the country. The network will be grounded in a partnership involving patients and caregivers, health professionals, and health care system experts. In addition to promoting evidence-based care for patients and improving their quality of life, the network will also study ways to better integrate caregivers and technology into the recovery process and expand hospitals' capacity to provide care from start to finish.⁴¹⁹²

On 13 May 2022, Parliamentary Secretary to the Minister of Mental Health, Addictions and Associate Minister of Health and Member of Parliament for Sherbrooke Élisabeth Brière, announced funding of nearly CAD200,000 for two research projects that will be led by researchers at Université de

Sherbrooke. The projects will provide evidence to inform interventions to prevent serious harms related to alcohol use and support Canadians experiencing issues with alcohol use, which is the most commonly used substance in the country. While its consumption is legal and socially acceptable, alcohol use causes significant harm to the health and safety of Canadians and can aggravate societal problems such as homelessness.⁴¹⁹³

On 6 June 2022, Member of Parliament for Halifax and Parliamentary Secretary to the Minister of Innovation, Science and Industry Andy Fillmore, announced, on behalf of Minister Duclos, an investment from the government of CAD1.5 million from the Canadian Institutes of Health Research for three projects in Nova Scotia focused on studying the wider health impacts of the pandemic on children with complex health needs, women who experienced increased violence, and equity-deserving communities.⁴¹⁹⁴

Canada has taken measures to enhance innovation in digital and other health-related technologies, but no action to ensure personal health data protection has been found within the monitoring period.

Thus, Canada receives a score of 0.

Analyst: Nikita Shilikov

China: +1

China has fully complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 1 November 2021, the law on protecting online user data privacy came into force in China. The law states that handling of personal information shall be limited to the minimum scope necessary to achieve the goals of handling data. According to the law, “sensitive personal information refers to the personal information that can easily lead to the infringement of the personal dignity of natural persons or the harm of personal or property safety once leaked or illegally used, including such information as biometrics, religious belief, specific identities, medical health.” Sensitive personal information, including that on health, is subject to additional requirements for processing.⁴¹⁹⁵

On 28 December 2021, China unveiled a development plan for the medical equipment sector during the 14th Five-Year Plan period (2021-2025). The plan will help accelerate the integration of information technology into the medical equipment industry by 2025, create medical robots and digital health platforms. The plan, jointly released by 10 government departments, also details measures to develop medical equipment to support community-based elderly care.⁴¹⁹⁶

France: 0

France has partially complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 15 December 2021, Prime Minister Jean Castex, accompanied by Olivier Véran, Minister for Solidarity and Health, Frédérique Vidal, Minister for Higher Education, Research and Innovation, Agnès Pannier-Runacher, Minister Delegate for Industry, attended the inauguration of the ParisSanté Campus. During this event, Prime Minister Castex set up the monitoring committee, drew up an inventory of the deployment of the measures of the 2030 Health Innovation plan announced by the President of the Republic and inaugurated the ParisSanté Campus intended to increase technological sovereignty and the international influence of France in terms of health. The Prime Minister announced the establishment of a Health Innovation Agency that will provide France with a strategy and objectives to be achieved in the short- and long-term, at the beginning of 2022. It will also act as a one-stop shop for innovators, to speed up the time to market for new products. ParisSanté Campus is a facility for research, training, innovation and entrepreneurship in the field of digital health. This program launched by the President of the Republic on December 4, 2020, supported by France Relance, aims to create a coherent and synergistic set of public and private operators, with the ambition of structuring a dynamic system of research and innovation in digital health.⁴¹⁹⁸

France has taken steps to promote digital innovations in health-related matters, but no action aimed at ensuring better personal health data protection has been found.

Thus, France receives a score of 0.

(Registergesetz) and the Health Data Use Act (Gesundheitsdatennutzungsgesetz); and accelerating the electronic patient record.⁴¹⁹⁹

On 15 July 2022, the German federal government passed the Law on Digital Healthcare (Digitales Versorgungsgesetz, DVG). According to this law, all citizens under public health insurance schemes (about 88 per cent of the German population) can claim to use digital health services and solutions.⁴²⁰⁰

Germany has taken measures both to enhance innovation in digital and other health-related technologies and to ensure personal health data protection.

Thus, Germany receives a score of +1.

Analyst: Andrey Shelepov

India: +1

India has fully complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 16 December 2021, the Joint Parliamentary Committee presented its report on the Personal Data Protection (PDP) Bill 2019 in both Houses of Indian Parliament. The committee highlighted that the PDP Bill should cover both personal and non-personal data till an additional framework is established to distinguish between them. According to the Bill, health data comes under the definition of sensitive personal data, providing greater responsibility on the data fiduciary.⁴²⁰¹

On 26 February 2022, the government approved the national roll-out of the Ayushman Bharat Digital Mission (ABDM) with a budget of INR16 billion for five years. The National Health Authority (NHA) will be the implementing agency of the ABDM. The Mission aims to create a seamless online platform through the provision of a wide-range of data, information and infrastructure services, duly leveraging open, interoperable, standards-based digital systems while ensuring the security, confidentiality and privacy of health-related personal information. Under the ABDM, people will be able to create their ABHA (Ayushman Bharat Health Account) numbers, to which their digital health records can be linked. This will enable creation of longitudinal health records for individuals across various healthcare providers and improve clinical decision-making by healthcare providers. The ABDM will improve equitable access to quality healthcare by encouraging use of technologies such as telemedicine and enabling national portability of health services.⁴²⁰²

Mexico: 0

Mexico has partially complied with the commitment to enhance innovation in digital and other health-related technologies, taking into account the need to protect personal health data.

On 5 March 2022, the establishment of National Center for Health Intelligence was announced. It will contribute to decision-making in health emergencies. The centre will collect and analyze the information on health and epidemiological surveillance. It will provide data on coverage of the network of health units, the percentage of the population served, the human resources available and the needs to be covered.⁴²²¹

On 30 March 2022, Secretary of Foreign Affairs Marcelo Ebrard led a high-level Mexican delegation, in which authorities from the health sector, representatives of educational institutions and businessmen participate. Within the framework of this tour, Mexico and India agreed to give a strategic nature to their bilateral relationship and strengthen their collaboration in the areas of trade, health and technological innovation. In the meeting with the Minister of Science and Technology of India, Jitendra Singh, it was also agreed to create an accelerator fund for scientific cooperation projects, particularly in biotechnology and aerospace. Similarly, in the meeting with the Minister of Health of India, Mansukh Mandaviya, the start of cooperation in terms of digitalization of medical information of the population was agreed.⁴²²²

On 2 June 2022, the National Institute of Rehabilitation (INRLGII) and the Autonomous Metropolitan University Unit Iztapalapa signed the collaboration agreement, which will promote the development of biomedical engineering in areas of research, science, technology, academia, training of human resources and dissemination.⁴²²³

On 19 June 2022, the INRLGII launched in-hospital registration system for tissue and cell transplantation. It will allow evaluating therapeutic impact in transplants of bone, tendons, composite tissue, skin, meniscus, cartilage and others.⁴²²⁴

During the compliance period Mexico took measures to enhance innovation in digital and other health-related technologies, but no actions to ensure personal health data protection have been registered yet.

Thus, Mexico receives a score of 0.

Russia: 0

Russia has partially complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 2 December 2021, the Ministry of Health announced the launch of the “Cifrovye servisy OMS” (Obligatory Medical Insurance Digital Services) project on the Gosuslugi (Government Services) platform. The initiative would provide the applicants with pro-active inform service and patient support. That would minimize in-person visits to medical facilities and ease the overload of medical personnel.⁴²²⁵

On 7 February 2022, the Ministry of Health announced the allocation of RUB600 million (approximately USD7.9 million) to provide extra financial incentives for medical workers fulfilling their responsibilities online. The Ministry plans to onboard 2500 more specialists and thus lower load of medical facilities allowing at least some patients with pneumonia and coronavirus symptoms to stay home.⁴²²⁶

On 22 March 2022, the BRICS Vaccine research center was opened. The opening ceremony was held online. Proposed in 2018, the center is said to promote exchanges and cooperation on vaccine research and development and testing along with mutual recognition of standards and building-up cooperation plans on the matter.⁴²²⁷

Russia has taken steps to promote digital innovations in health-related matters, but no action aimed at ensuring better personal health data protection has been found.

Thus, Russia receives a score of 0.

Analyst: Alexander Ignatov

Saudi Arabia: 0

Saudi Arabia has partially complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 28 December 2021, the Ministry of Health has received a certificate issued by the International Standards Authority (ISO). The ISO certificate shows highest approval of the Ministry’s achievements in incorporating digital innovations in day-to-day operations.⁴²²⁸

On 20 January 2022, Prime Minister Fahad Al-Jalajel held a meeting with businessmen and medical practitioners. The participants discussed plans to improve health services, increase investments in the

program. The ministry would make four calls totally under the groups of “Mobility,” “Health and Chemical Products,” “Digital Transformation,” and “Structural Transformation in Production.”⁴²³²

On 30 September 2021, the Council of Europe Development Bank and the Ministry of Health in Turkey signed two EU grant agreements in total value of euro 80.6 million to support refugee healthcare investments. The grants will finance the construction and/or renovation of migrant health centers and physiotherapy and rehabilitation units in public hospitals as well as the purchase of medical equipment and supplies. The grants will also cover the cost associated with the mobilization of up to 10 specialists who will strengthen the Ministry’s technical capacity to implement the project.⁴²³³

On 18 November 2021, the government announced that it would boost health tourism by means of promoting health infrastructure and digitalization projects. Deputy Minister of Health and Head of the HIMSS Eurasia Congress Şuayip Birinci stated that they are trying to bring Turkey’s hospitals and health institutions above a certain standard in digitalization to enable citizens to receive services more easily.⁴²³⁴

On 17 March 2022, Turkish Cooperation and Coordination Agency (TİKA) renovated and put into service a health center that serves nearly 3,000 people in Ethiopia. TİKA renovated and furnished the health center and provided many pieces of medical equipment such as autoclaves, microscopes, gurneys, examination tables, and centrifuge machines.⁴²³⁵

On 21 March 2022, TİKA renovated the only dialysis center in Sughd Province, which has a population of 2.8 million, in Tajikistan. As part of the project supported by TİKA, the dialysis center in Khujand, the capital of Sughd Province, was renovated and equipped with the necessary tools, state-of-the-art dialysis devices, and a water treatment system.⁴²³⁶

Turkey has taken steps to promote digital innovations into healthcare, however no indication of measures aimed at improving personal health data protection.

Thus, Turkey receives a score of 0.

Analyst: Pavel Doronin

United Kingdom: +1

The United Kingdom has fully complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 8 November 2021, the government has announced about injection nearly GBP250 million to digitize diagnostics care across the National Health Service (NHS) using the latest technology. “Diagnostics services across the NHS will be digitalized using the latest technology to improve the way

⁴²⁴³ Millions of people with rare diseases to benefit from faster diagnosis and better access to treatment, Department of Health and Social Care (London) 28 February 2022. Access Date: 15 March 2022. <https://www.gov.uk/government/news/millions-of-people-with-rare-diseases-to-benefit-from-faster-diagnosis-and-better-access-to-treatment>

On 2 March 2022, the government allocated GBP260 into diagnostics and treatment through new privacy-preserving platforms and clinical research services. This step “will make crucial data more securely and quickly available for research, while offering the highest levels of privacy.”⁴²⁴⁴

On 8 March 2022, the Department of Health and Social Care, the Coalition for Epidemic Preparedness Innovations and industry associations representing vaccine manufacturers have announced Joint statement on delivering the 100 Days Mission to have safe and effective vaccines, therapeutics and diagnostics within 100 days of an epidemic or pandemic threat being identified. The government aims to “deliver a research and development network, to speed up the development and delivery of novel vaccines.”⁴²⁴⁵

On 18 March 2022, the Department of Health and Social Care, the Department for Business, Energy and Industrial Strategy, the Office for Life Sciences in addition to the Welsh Government, The Scottish Government, and Department of Health (Northern Ireland) “Genome UK: shared commitments for UK wide implementation 2022 to 2025.” This initiative is expected to help patients across the UK to benefit from faster cancer diagnosis and innovative new treatments.⁴²⁴⁶

On 14 May 2022, G7 Foreign Ministers endorsed an Action Plan on COVID-19, which includes acceleration efforts to ensure equitable and rapid global distribution of safe, effective, quality-assured and affordable vaccines, vaccinations and supporting a diversified global vaccine production.⁴²⁴⁷

On 29 June, the government published the plan for digital health and social care. It sets out the government’s ambitious vision for transforming health and care with digital technology – which give patients access to quicker and more effective care at their fingertips and will save the health and care systems time and money.⁴²⁴⁸

The United Kingdom has taken strong actions in both enhancing innovation in digital technologies and personal health data protection. The government invested in projects to digitize a wide range of disease, using the latest technology of testing, prevention activities, announced new reforms to recruitment, training and retention of medical staff. In the context of a pandemic COVID-19 UK maintains cyber security of network and information systems, speeds up vaccine development and ensures fair access to these vaccines worldwide

Thus, the United Kingdom receives a score of +1.

United States: +1

The United States has fully complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

From December 2021 to June 2022 the Department of Health and Human Services (HHS) implemented the PandemicX Accelerator a six-month pilot program designed to build and scale technologies with businesses fueled by HHS data and healthcare innovation. It was jointly sponsored by the HHS Office of the Assistant Secretary for Health and the Office of the National Coordinator for Health IT [Information Technology] and managed by MassChallenge HealthTech, a non-profit organization dedicated to supporting innovation and entrepreneurship through collaboration and development. Within the program, 15 teams of entrepreneurs connected their health start-ups with government leaders on HHS priorities like health equity and access to care. Participating start-ups designed and deployed digital solutions for public health with an emphasis on ensuring an equitable COVID-19 response and recovery for all.⁴²⁴⁹

On 17 March 2022, the Department of Health and Human Service's Office for Civil Rights issued industry guidance for Health Insurance Portability and Accountability Act regulated entities to take preventative steps to protect against cyber-attacks.⁴²⁵⁰

The United States has taken measures both to enhance innovation in digital and other health-related technologies and to ensure personal health data protection.

Thus, the US receives a score of +1.

Analyst: Andrey Shelepov

European Union: +1

The European Union has fully complied with the commitment to enhance innovation in digital and other health-related technologies and ensure personal health data protection.

On 15 December 2022, the European Parliament adopted legislative resolution as regards transitional provisions for certain in vitro diagnostic medical devices and deferred application of requirements for in-house devices.⁴²⁵¹ On 26 May new rules on in vitro diagnostic medical devices such as HIV tests, pregnancy tests or COVID-19 tests came into force.⁴²⁵²

On 3 May 2022, the European Commission launched the European Health Data Space (EHDS). It will empower people to control and utilise their health data in their home country or in other Member States; will foster a genuine single market for digital health services and products; it offers a consistent, trustworthy and efficient framework to use health data for research, innovation, policy-making and regulatory activities, while ensuring full compliance with the EU's high data protection standards. The EHDS creates a strong legal framework for the use of health data for research, innovation, public

health, policy-making and regulatory purposes. The EHDS builds further on the General Data Protection Regulation, proposed Data Governance Act, draft Data Act and Directive on Security of Network and Information Systems (NIS Directive).⁴²⁵³

On 13 May 2022, the European Commission and the European Parliament reached an agreement on the Directive on measures for a high common level of cybersecurity across the Union (NIS 2 Directive) proposed by the Commission in December 2020. It covers the healthcare sector, for example by including medical device manufacturers, given the increasing security threats that arose during the COVID-19 pandemic.⁴²⁵⁴ In the provisionally agreed text, organisations that do not comply may be fined up to two per cent of annual revenue, or up to EUR10 million.⁴²⁵⁵

On 22 June 2022, the European Union launched a new European Union – Latin America and Caribbean partnership on local manufacturing of vaccines, medicines and other health technologies, and strengthening health systems resilience. The partnership represents an opportunity to pursue public health goals, stimulate growth and decent jobs in both regions, bring in private sector innovation, facilitate trade, diversify global value chains, and reinforce scientific, diplomatic and human bonds between Europe and Latin America.⁴²⁵⁶

On 23 June 2022, the European Parliament and the Council of the EU reached the political agreement on the Serious Cross-Border Threats to Health Regulation. The Regulation strengthens preparedness and response planning, and sets out the rules for an improved, flexible and integrated surveillance system. It also increases the capacity of the Union and its Member States to do accurate risk assessments and take targeted response actions, including joint procurement of medical countermeasures, such as vaccines and therapeutics.⁴²⁵⁷

On 14 July 2022, the European Commission adopted the proposal for a Regulation on the safety and quality of substances of human origin (SoHO). The Commission tables a comprehensive revision of the existing legislation to ensure safety and quality of blood, tissues, and cells (BTC), updates and reinforces the rules for safety and quality and extends them to other substances of human origin (SoHO), such as human breast milk, which were previously left unregulated at EU level. To improve harmonisation, ensuring a uniform level of protection across the EU and simplifying cross-border

exchange and access of SoHO therapies, the Commission proposes to repeal the Directives and replace them by a single Regulation that will be equally applicable in all Member States.⁴²⁵⁸

On 17 August 2022, the European Investment Bank (EIB) announced providing EUR22 million in financing to Ryvu Therapeutics, a Polish clinical-stage drug discovery and development company focusing on novel small molecule therapies that address unmet medical needs in oncology. The EIB's support will help Ryvu finance its development pipeline of new cancer treatments from discovery through to clinical trials.⁴²⁵⁹

On 1 September 2022 the European Medicines Agency (EMA) has given a positive opinion on the first two variant-adapted COVID-19 booster vaccines: Comirnaty (by BioNTech-Pfizer) and Spikevax (by Moderna). The adapted versions of these vaccines are to be used as booster doses that target the original virus and the Omicron BA.1 sub-variant.⁴²⁶⁰

On 20 September 2022, the European Commission presented the proposal for a Council Recommendation (CR) on Strengthening prevention through early detection: A new approach on cancer screening replacing. This new EU approach, based on the latest available scientific developments and evidence, will support Member States ensuring that 90 per cent of the EU population who qualify for breast, cervical and colorectal cancer screenings are offered such screening by 2025. The new recommendation also expands population-based organised cancer screening to include lung, prostate and, under certain circumstances, gastric cancers.⁴²⁶¹

The European Union has fully complied with its commitment on enhancing innovation in digital and other health-related technologies, applying new COVID-19 vaccines and treatments, reinforcing roles of its medical bodies, and striving for an uninterrupted supply of medicines, vaccines and access to medical care. It also has fully complied its commitments on ensuring personal health data protection launching the EHDS.

Thus, the European Union receives a score of +1.

Background

G20 leaders first adopted a commitment explicitly highlighting the reduced use of coal for energy at the 2011 Cannes Summit, committing to “promote low-carbon development strategies in order to optimize the potential for green growth and ensure sustainable development.”⁴²⁶²

At the 2012 Los Cabos Summit, G20 leaders reiterated the commitment made at the Cannes Summit to foster strategies for low-carbon development. They expressed their support for the findings published by the G20 leaders’ report on cleaner and more energy-efficient capabilities and technologies.⁴²⁶³

At the 2013 St. Petersburg Summit, G20 leaders expressed the need for members to collectively identify further opportunities for investment in low-carbon energy infrastructure.⁴²⁶⁴ Moreover, the G20/OECD High-Level Principles on Long-Term Investment Financing by Institutional Investors,

⁴²⁶⁴ G20 Leaders’ Declaration, G20 Information Centre (Toronto) 6 September 2013. Access Date: 30 November 2021.

<http://www.g20.utoronto.ca/2013/2013-0906-declaration.html>

developed by the OECD Task Force on Institutional Investors and Long-Term Financing, was published at the 2012 summit. The document highlighted the need to invest in low-carbon and renewable energy capabilities as a means to combat the effects of climate change and reduce reliance on non-renewable energy sources.⁴²⁶⁵

At the 2017 Hamburg Summit, G20 leaders encouraged countries using carbon capture, use and storage (CCUS) capabilities to employ research, development and demonstration (RD&D) to further improve carbon capture technologies.⁴²⁶⁶

At the 2019 Osaka Summit, G20 leaders acknowledged the benefits of further investment and research in CCUS technologies, taking note of ongoing progress in “Carbon Recycling” and “Emissions to Value.”⁴²⁶⁷

The 2021 Rome Summit represents the first time G20 leaders have mentioned ending coal financing. Recognizing the “close link” between climate change and energy and the need to reduce emissions in order to reach the Paris temperature goal, G20 members stated: “[They] will cooperate on deployment and dissemination of zero or low carbon emission and renewable technologies, including sustainable bioenergy, to enable a transition towards low-emission power systems. This will also enable those countries that commit to phasing out investment in new unabated coal power generation capacity to do so as soon as possible. We commit to mobilize international public and private finance to support green, inclusive and sustainable energy development and we will put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.”⁴²⁶⁸

Commitment Features

At the 2021 G20 Rome Summit, the leaders committed to “put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.”⁴²⁶⁹

Adjacent to this commitment in the Rome Leaders’ Declaration, the G20 leaders acknowledged the importance of cooperating on the “deployment and dissemination of zero or low carbon emission and renewable technologies, including sustainable bioenergy, to enable a transition towards low-emission power systems,” which will further enable the phasing out of investment in new unabated coal power generation capacity.⁴²⁷⁰

“Commit” is defined as “to do or perform, to pledge or bind (a person or an organization) to a certain course or policy.”⁴²⁷¹ The term connotes a politically binding obligation to change G20 members’ behaviour.

http://www.g7.utoronto.ca/compliance/Compliance_Coding_Manual_2020.pdf

To define the key terms of this commitment, “end” refers to the act of making something finish or stop.⁴²⁷² “Provision” is understood to refer to the act of supplying or giving something that is needed or wanted by a person, company, or organization, making it available for use.⁴²⁷³

“International public finance” is a concept that refers to the transfer or spending of national public revenue abroad.⁴²⁷⁴ It has also been defined as “financial interventions by a nation state, or a multilateral organisation, to secure public policy outcomes outside national boundaries.”⁴²⁷⁵ Examples can include official development assistance (ODA), non-concessional loans, concessional grants, and other forms of financing and financial resources.⁴²⁷⁶ For example, a G20 government would be demonstrating non-compliance with the commitment if it invested in or financed the operations of a new unabated coal plant abroad.

“Abroad” is understood to mean “in or to a foreign country or countries.”⁴²⁷⁷ In this commitment, “abroad” signifies that the pledge refers to G20 support for coal power generation outside their geographic jurisdictions (e.g. investing in coal plants in a developing economy). Thus, actions that fall within the parameters of the commitment must pertain to financial resources administered beyond a G20 member’s domestic territory.

In the context of this commitment, “unabated coal” refers to “the use of coal power that is not mitigated with technologies to reduce carbon dioxide emissions, such as Carbon Capture Utilisation and Storage (CCUS).”⁴²⁷⁸ CCUS technologies seek to reduce emissions by capturing, transporting, or using emissions “as a resource to create valuable products or services or its permanent storage deep underground in geological formations.”⁴²⁷⁹ In simple terms, the scope of this commitment covers the use of coal power that is unmitigated by emission-reducing technologies.

Power generation from unabated coal is a major contributor to global warming, rendering it a challenge that calls for its termination, the deployment of clean power, and a transition to a low-carbon energy future. Unabated coal power generation projects often receive direct or indirect government support, making the present commitment topical in the context of compliance by the G20 as a consortium of the world’s largest economies.

It is important to note that the language of the commitment does not preclude G20 members from providing international public financing to new coal power projects with CCUS technology. Such contributions would not detract from compliance with the commitment. Furthermore, the term “new” in the commitment signals that G20 leaders intended to terminate additional funding to the cause i.e.

⁴²⁷⁹ Carbon capture, utilisation and storage, International Energy Agency (I) 8 November 2021. Access Date: 1 December 2021. <https://www.iea.org/fuels-and-technologies/carbon-capture-utilisation-and-storage>

financing dispersed before the conclusion of the 2021 G20 summit that continues to be used during the compliance cycle (which begins on 1 November 2021) would not compromise the G20 member’s compliance.

In assessing a G20 member’s compliance with the present commitment, the depth dimension (i.e. the strength of actions required to demonstrate compliance) is qualified by the term “commit.” “Commit” is a high binding commitment verb, and it is interpreted to mean that the G20 leaders intended a definitive course of action beyond verbal affirmations or symbolic, political gestures. The scoring of this commitment is also informed by the specific timeline stipulated: “by the end of 2021.”

Full compliance, or a score of +1, necessitates strong policy action to end the G20 member’s provision of international public finance for new unabated coal power generation by the end of 2021. Concrete announcements of financial pledges (or reductions therein) to *no* new financing in this area are required for full compliance.

Partial compliance includes all actions that are less strong than demonstrating full compliance across the commitment. A score of 0 for partial compliance is given to G20 members that take steps to significantly reduce (yet not terminate all) international public financing for new unabated coal power generation by the end of 2021 i.e. continuing such financing in 2022. Alternatively, a score of partial compliance is also assigned to G20 members that end the provision of international public finance for new unabated coal power generation abroad after the end of 2021, but before the beginning of the following G20 leaders’ summit on 30 October 2022.

Non-compliance, denoted by a score of -1, is given to G20 members that take little or no action to reduce their contributions to international public financing for new unabated coal power generation. Actions such as verbal reiterations of support through public statements or participation in international meetings do not evidence compliance with the commitment, which states a pledge to reduce financial contributions to unabated coal power generation. Additionally, a score of -1 is also attributed to G20 members that choose to *increase* such financing during the compliance cycle.

Scoring Guidelines

-1	The G20 member does NOT put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.
0	The G20 member REDUCES the provision of international public finance for new unabated coal power generation abroad by the end of 2021 AND/OR the G20 member puts an end to the provision of international public finance for new unabated coal power generation abroad AFTER the end of 2021.
+1	The G20 member puts an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.

Argentina: -1

Argentina has failed to comply with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.

Argentina has failed to comply with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021. Within the timeframe of the compliance period, Argentina has not taken any action nor made any policy commitments to comply with this commitment.

Thus, Argentina receives a score of -1 .⁴²⁸⁰

Analyst: Emma Yehyun Lee

Australia: -1

Australia has failed to comply with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.

On 22 October 2021, Australia became a participant in the legally non-binding Organisation for Economic Co-operation and Development (OECD) Arrangement on Officially Supported Export Credits and agreed to end support for unabated coal-fired power plants. Article 6 of the Agreement prohibits participants from providing officially supported export credits or tied aid to “new coal-fired electricity generation plants or parts thereof, comprising all components, equipment, materials and services (including the training of personnel) directly required for the construction and commissioning of such power stations” unless certain conditions are met.⁴²⁸¹

On 4 November 2021, the government attempted a bid to stop the Asian Development Bank from instituting a ban on new investments in coal-fired energy generation.⁴²⁸²

Australia has failed to comply with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021. Within the timeframe of the compliance period, Australia has not taken concrete actions to comply with this commitment, except its acquiescence to an international initiative of the OECD, its participation in which has not resulted in domestic legislative action. Furthermore, its stance at the Asian Development Bank runs contrary to the present commitment.

Thus, Australia receives a score of -1 .

Canada: 0

Canada has partially complied with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.

On 22 October 2021, Canada became a participant in the legally non-binding Organisation for Economic Cooperation and Development Arrangement on Officially Supported Export Credits and agreed to end support for unabated coal-fired power plants.⁴²⁸⁴ Article 6 of the Agreement prohibits participants from providing officially supported export credits or tied aid to “new coal-fired electricity generation plants or parts thereof, comprising all components, equipment, materials and services (including the training of personnel) directly required for the construction and commissioning of such power stations” unless certain conditions are met.

On 1 November 2021, Prime Minister Justin Trudeau announced up to CAD1 billion in funding for the Climate Investment Funds Accelerated Coal Transition Investment Program, which aims to help developing countries transition from coal-fired electricity to clean power as “quickly as possible.”⁴²⁸⁵ The funding strives to accelerate the retirement of existing coal mines and power plants while enabling new green energy economic initiatives.

On 4 November 2021, Canada signed the COP26 Statement on International Public Support for the Clean Energy Transition.⁴²⁸⁶ Parties to the statement committed to “end new direct public support for the international unabated fossil fuel energy sector by the end of 2022, except in limited and clearly defined circumstances that are consistent with a 1.5°C warming limit and the goals of the Paris Agreement.”

On 27 May 2022, G7 Climate, Energy and Environment Ministers met in Berlin.⁴²⁸⁷ In their communiqué, the Ministers recognized that “phasing out continued global investment in the unabated fossil fuel sector is essential to keep a limit of 1.5 °C temperature rise within reach” and committed to “end new direct public support for the international unabated fossil fuel energy sector by the end of 2022, except in limited circumstances clearly defined by each country that are consistent with a 1.5 °C warming limit and the goals of the Paris Agreement.”

Canada has partially complied with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021. Canada has taken actions to reaffirm its commitment to end the provision of international public finance for new

Japan: 0

Japan has partially complied with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.

On 22 October 2021, Japan became a participant in the legally non-binding OECD Arrangement on Officially Supported Export Credits and agreed to end support for unabated coal-fired power plants. Article 6 of the Agreement prohibits participants from providing officially supported export credits or tied aid to “new coal-fired electricity generation plants or parts thereof, comprising all components, equipment, materials and services (including the training of personnel) directly required for the construction and commissioning of such power stations” unless certain conditions are met.⁴³⁰⁰

On 5 November 2021, the government pledged PHP 25 million to buy out coal-fired power plants in the Philippines and Indonesia.⁴³⁰¹ As the first grant provided to the Asian Development Bank’s Energy Transition Mechanism, the grant will “provide a blended finance mechanism to incentivize the early retirement of coal-fired power assets” and “invest in the growth and expansion of renewable power.”

On 27 May 2022, G7 Climate, Energy and Environment Ministers met in Berlin. In their communiqué, the Ministers recognized that “phasing out continued global investment in the unabated fossil fuel sector is essential to keep a limit of 1.5 °C temperature rise within reach” and committed to “end new direct public support for the international unabated fossil fuel energy sector by the end of 2022, except in limited circumstances clearly defined by each country that are consistent with a 1.5 °C warming limit and the goals of the Paris Agreement.”⁴³⁰²

On 22 June 2022, the Ministry of Foreign Affairs announced that Japan will stop funding coal power plants in Indonesia and Bangladesh. Deputy Press Secretary Hikariko Ono stated at a press conference in June: “with regard to the ‘Matarbari Ultra Super Critical Coal-Fired Power Project (II)’ in Bangladesh, taking into consideration the trend of international discussions on coal-fired power and after consultation with Bangladesh, Japan has decided not to proceed further as an ODA loan project.” He further stated that the “Government of Indonesia itself has already decided not to implement [the

Indramyu project], and the Government of Japan has also decided not to consider further on support through an ODA loan.”⁴³⁰³

Japan has partially complied with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021. Although it has invested in helping developing countries reduce dependence on coal, Japan has not taken any action nor made any policy commitments to end its provision of international public finance for new unabated coal power generation abroad within the timeframe of the compliance cycle. Additionally, Japan’s acquiescence to international initiatives has not resulted in domestic legislative action.

Thus, Japan receives a score of 0.

phase out coal power.⁴³¹⁴ The UK also launched and co-chaired the Powering Past Coal Alliance, the world's largest alliance on phasing out coal.⁴³¹⁵

On 4 November 2021, the UK signed the COP26 Statement on International Public Support for the Clean Energy Transition. Parties to the statement committed to “end new direct public support for the international unabated fossil fuel energy sector by the end of 2022, except in limited and clearly defined circumstances that are consistent with a 1.5°C warming limit and the goals of the Paris Agreement.”⁴³¹⁶

On 27 May 2022, G7 Climate, Energy and Environment Ministers met in Berlin. In their communiqué, the Ministers recognized that “phasing out continued global investment in the unabated fossil fuel sector is essential to keep a limit of 1.5 °C temperature rise within reach” and committed to “end new direct public support for the international unabated fossil fuel energy sector by the end of 2022, except in limited circumstances clearly defined by each country that are consistent with a 1.5 °C warming limit and the goals of the Paris Agreement.”⁴³¹⁷

The United Kingdom has fully complied with its commitment to put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021. In addition to being the host of COP26 and spearheading various multilateral initiatives, in March of 2021, a policy became effective that states that the UK “will no longer provide new direct financial or promotional support for the fossil fuel energy sector overseas, other than in the limited circumstances outlined in this document, and align its support to enable clean energy exports. This policy applies to any new Official Development Assistance (ODA), investment, financial and trade promotion activity overseas, including support provided by UK Export Finance.”⁴³¹⁸ The limited circumstances are “a) Energy or emissions efficiency, health, safety, social and environmental improvements, or energy market reform; b) Decommissioning of existing fossil fuel energy assets; c) Gas power and directly related infrastructure, and the conditions for doing so; d) Stand-alone generators and Liquid Petroleum Gas for cooking and heating; and e) Carbon Capture and Storage (CCS), or Carbon Capture Usage and Storage (CCUS) projects.”⁴³¹⁹ Therefore, although this action falls outside the compliance cycle, the UK has taken action to end the provision of international public finance for new unabated coal power generation abroad by the end of 2021.

Background

Land degradation is currently one of the world’s most dire problems and must be rapidly and adequately addressed by countries worldwide in order to combat climate change.⁴³³⁰ During the past two centuries, land degradation has accelerated as a result of increased pressures of agricultural and livestock production including overcultivation, overgrazing, forest conversion and other unsustainable agricultural techniques; urbanization; deforestation; and extreme weather events like droughts and coastal surges.⁴³³¹ Land degradation negatively impacts everyone through food insecurity and higher prices, environmental hazards like extreme weather events, and the loss of ecosystem services.⁴³³²

According to the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES), land degradation also significantly contributes to mass human migration and increased

⁴³³² Land Degradation, Global Environment Facility (Washington D.C.) n.d. Access Date: 5 December 2021. <https://www.thegef.org/what-we-do/topics/land-degradation>

conflict.⁴³³³ Over 3.2 billion people around the world are negatively impacted by land degradation, particularly smallholder farmers, the poor and those living in rural areas.⁴³³⁴ Land degradation also exacerbates climate change because “when land is degraded, soil carbon and nitrous oxide is released into the atmosphere.” If the current trend of land degradation along with soil erosion continues, over 90 per cent of the world’s land areas could become degraded by 2050.⁴³³⁵

There is no single universal definition of degraded land as it depends on the context and the country, organization and/or institution investigating land degradation.⁴³³⁶ Definitions of degraded land may change between deserts in Saudi Arabia, rainforests in Brazil and wetlands in the United States. For example, Indonesia’s draft national policy on reducing emissions from deforestation and forest degradation (REDD+) defines land degradation in terms of forest carbon stock degradation and “suggests a threshold of 35 tonnes of carbon per hectare (C/ha) below which development could be considered ‘low carbon.’” In the simplest terms, degraded land can be understood as “land that has lost some degree of its natural productivity due to human-caused processes.” As such, figures of degraded land may vary and global estimates of total degraded land areas range from less than 1 billion hectares to over 6 billion hectares.⁴³³⁷

As of 2019, around 2 billion hectares of land worldwide is degraded with minimal economic or ecological value.⁴³³⁸ The estimated annual cost of ecosystem services lost due to land degradation is between USD6.3 trillion to USD10.6 trillion, which is 10 to 17 per cent of the world’s gross domestic product (GDP). Although these figures are concerning, there are several active global multilateral initiatives aimed at restoring degraded landscapes such as the Bonn Challenge, the New York Declaration on Forests, Initiative 20x20, the African Forest Landscape Restoration Initiative and the United Nations Decade on Ecosystem Restoration.

Efforts to combat land degradation may include “agroecology, conservation measures, agroforestry and integrated animal and crop production systems that promote soil organic matter accumulation and nutrient cycling, ... and measures that enhance soil carbon storage in managed landscapes.”⁴³³⁹ Efforts to create new carbon sinks may include restoring degraded forests, conserving wetlands and other marine ecosystems, and substantially planting and growing new trees.⁴³⁴⁰ Trees should be planted in the “right” places – ideally as part of broader, inclusive ecosystem landscape restoration strategies – and in consultation and collaboration with local communities.”⁴³⁴¹ Recent work by the G20 members

includes the launch of the Global Initiative on Reducing Land Degradation and Enhancing Conservation of Terrestrial Habitats at the 2020 Riyadh Summit.⁴³⁴²

At the 2009 London Summit, G20 leaders acknowledged the “threat of irreversible climate change” and committed to reaching agreements at the United Nations Climate Change conference in Copenhagen in December 2009.⁴³⁴³ Five months later at the 2009 Pittsburgh Summit, G20 leaders made more substantial commitments on climate change issues, although the focus was on energy security and clean energy technologies.⁴³⁴⁴

At the 2010 Seoul Summit, G20 leaders committed to protecting the global marine environment and to “support country-led green growth policies that promote environmentally sustainable global growth.”⁴³⁴⁵ This Summit was the first G20 Summit to explicitly highlight environmental issues although only in terms of marine environments and sustainable green growth. At the 2011 Cannes Summit, G20 leaders further committed to protecting marine environments by preventing accidents related to offshore oil and gas exploration, and marine transportation.⁴³⁴⁶

At the 2012 Los Cabos Summit, G20 leaders committed to fighting climate change and recognized the need to adapt agricultural techniques to impacts of climate change through soil fertility enhancement and agroforestry.⁴³⁴⁷

At the 2013 St. Petersburg Summit, G20 leaders recognized the need of and committed to working together to address environmental protection and climate change.⁴³⁴⁸

At the 2016 Hangzhou Summit, G20 leaders committed to taking innovation as a “key element ... to identify new growth engines for individual countries” to build a cleaner environment.⁴³⁴⁹ G20 leaders also announced enhancing “collaboration on solutions that promote natural gas extraction, transportation, and processing in a manner that minimizes environmental impacts.” Furthermore, G20 leaders committed to supporting developing countries to promote “environment-friendly technologies.”

At the 2017 Hamburg Summit, G20 leaders introduced the G20 Action Plan on Marine Litter, which focused on preventing and reducing all types of marine litter and on addressing pollution from both land-based sources as well as sea-based sources like the fishing, aquaculture and shipping industries.⁴³⁵⁰ In this Action Plan, G20 leaders committed to promoting socio-economic benefits of establishing policies to prevent marine litter such as promoting partnerships with stakeholders in relevant sectors

(tourism, fisheries, shipping, consumer goods, etc.) and to supporting removal and remediation actions to clean up marine litter.⁴³⁵¹ Further in this Action Plan, G20 leaders committed to promoting waste prevention and resource efficiency, sustainable waste management, and effective wastewater treatment and storm water management. At the 2017 Hamburg Summit, G20 leaders also announced intentions to “collaborate closely on climate and energy issues to successfully address the challenges of environmental protection.”

At the 2019 Osaka Summit, G20 leaders affirmed the need to “foster coherence between mitigation action, adaptation measures, environmental protection, and resilient infrastructure” to tackle climate change, and to consider each country’s circumstances and focus on ecosystem and community-based approaches to promote clean technologies and approaches.⁴³⁵² At this Summit, the United States specifically reaffirmed its commitment to promoting environmental protection and efforts to reduce emissions and provide cleaner environments after announcing its withdrawal from the Paris Agreement.

At the 2020 Riyadh Summit, G20 leaders committed to “building a more environmentally sustainable and inclusive future for all people” and reiterated support for tackling environmental challenges like biodiversity loss.⁴³⁵³ At this Summit, G20 leaders also committed to achieving “a 50 per cent reduction of degraded land by 2040, on a voluntary basis.” The 2020 Riyadh Summit was the first G20 Summit that committed to tackling land degradation.

Commitment Features

At the 2021 Rome Summit, G20 leaders committed to “acknowledging the urgency of combating land degradation and creating new carbon sinks, we share the aspirational goal to collectively plant 1 trillion trees, focusing on the most degraded ecosystems in the planet.”⁴³⁵⁴

“Acknowledging” is understood to mean “to take notice of [and] to recognize as genuine or valid.”⁴³⁵⁵

“Urgency” is understood to mean “the quality of needing to be dealt with or happen immediately.”⁴³⁵⁶

“Combating” is understood to mean “to stop something unpleasant or harmful from happening or from getting worse,” which in this commitment, refers to land degradation.⁴³⁵⁷

“Land degradation” is understood to mean “the reduction or loss of the biological or economic productivity and complexity of rain-fed cropland, irrigated cropland, or range, pasture, forest or woodlands resulting from natural processes, land uses or other human activities and habitation patterns such as land contamination, soil erosion and the destruction of the vegetation cover.”⁴³⁵⁸ Land

⁴³⁵⁸ Land Degradation, Organisation for Economic Cooperation and Development (Paris) 25 September 2001. Access Date: 4 December 2021. <https://stats.oecd.org/glossary/detail.asp?ID=1494>

degradation “negatively affects food production, livelihoods, and the production and provision of other ecosystem goods and services,” and an example of land degradation is desertification.⁴³⁵⁹

“Creating” is understood to mean “to make something happen or exist,” which in this commitment refers to new carbon sinks.⁴³⁶⁰

“New carbon sinks” refer to “anything that absorbs more carbon than it releases.”⁴³⁶¹ For example, forests, soil and oceans are all carbon sinks “as they absorb significant quantities of carbon.” Most importantly, forests are “crucial carbon sinks as the tropical forests of Asia, Africa and South America alone absorb about 18% of all carbon dioxide added by fossil fuels.” In this commitment’s context, actions should not focus solely on restoring already existing carbon sinks, but rather on building entirely new carbon sinks such as new forests.

“Share” is understood to mean “to have in common,” which in this commitment refers to collectively planting 1 million trees.⁴³⁶²

“Aspirational” is understood to mean “relating to or characterized by aspiration or a strong desire for something.”⁴³⁶³ “Goal” is understood to mean “something that you hope to achieve.”⁴³⁶⁴ As such, an “aspirational goal” refers to a strong desire for something one hopes to achieve and, in this commitment, the aspirational goal is to plant 1 million trees collectively as G20 members.

“Focusing” is understood to mean “to concentrate attention or effort,” which in this commitment refers to the most degraded ecosystems on Earth.⁴³⁶⁵

“Most degraded ecosystems on the planet” is understood to mean any ecosystem assessed as threatened or collapsed on the International Union for Conservation of Nature’s (IUCN) Red List of Ecosystems (RLE), which evaluates whether ecosystems have reached the “final stage of degradation (a state of Collapse), . . . [or] threatened at Critically Endangered, Endangered or Vulnerable Levels.”⁴³⁶⁶ However, there are other definitions of which ecosystems are the most degraded and one such definition, by 16 conservation organizations including The Nature Conservancy, finds freshwater ecosystems such as rivers and lakes to be the most degraded in the world.⁴³⁶⁷ The IPBES also found that wetlands may be

⁴³⁶⁷ Rivers and lakes are the most degraded ecosystems in the world. Can we save them?, National Geographic (Washington D.C.) 1 March 2021. Access Date: 8 December 2021. <https://www.nationalgeographic.com/environment/article/rivers-and-lakes-are-most-degraded-ecosystems-in-world-can-we-save-them>

one of the most degraded ecosystems on the planet with losses of up to 87 per cent over the past 300 years.⁴³⁶⁸

There are two main outcomes to this commitment: combating land degradation and creating new carbon sinks. As part of this commitment, G20 members must take strong actions directed at the two commitment components mentioned. Examples of strong actions to combat land degradation include but are not limited to launching programs to financially incentivize sustainable land management and agriculture techniques, coordinating ministerial policies to promote sustainable production practices, enacting new policies to create more national parks or nature reserves, and/or implementing new legislation to combat deforestation.⁴³⁶⁹ Examples of strong actions to create new carbon sinks include but are not limited to allocating additional funding to multilateral initiatives like the Bonn Challenge, expanding programs aimed at planting and growing trees to include other actions such as financing seedlings, and/or introducing new programs to incentivize carbon farming. Examples of weak actions to combat land degradation and/or to create new carbon sinks include but are not limited to attendance at international conferences or meetings on land degradation, sharing information on land degradation levels to international multilateral organizations, and/or making speeches about the importance of planting trees.

Alongside the depth component, or the strength of the action taken by the G20 member, a G20 member must take significant action on either the domestic or international level for full compliance.⁴³⁷⁰ Actions on the domestic level would include verbal reaffirmations, allocating money and budgetary resources, creating new departments and/or programs, and/or enacting domestic legislations to combat land degradation. Actions on the international level would include sponsoring, signing or ratifying international treaties, financing programs led by international organizations like the UN Development Programme or UN Environment Programme, and/or providing international financial support to other countries so they can implement the REDD+ initiatives. However, actions must lead to trees being physically planted to be considered compliant, due to the strong wording of this commitment. Ultimately, the actions must extend beyond mere discussion of the degraded land and have an actionable component.

The G20 member will be awarded a score of +1, or full compliance, if the G20 member has taken action to combat land degradation by planting a significant number of trees in degraded lands.

The G20 member will be awarded a score of 0, or partial compliance, if it makes some progress, by planting trees and/or has taken steps to begin this process, such as through new bilateral or multilateral agreements to begin planting trees (i.e. planting trees actually is set to start outside of the compliance period), or has planted trees but not in degraded areas.

The G20 member will be awarded a score of -1, or non-compliance, if the member has not taken any action to plant trees in degraded lands, nor have they started the process; the G20 member has only made verbal promises but no actions have followed.

⁴³⁶⁸ Media Release: Worsening Worldwide Land Degradation Now ‘Critical’, Undermining Well-Being of 3.2 Billion People, Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (Bonn) 23 March 2018. Scoring Guidelines

-1	The G20 member has NOT taken any actions to plant trees, NOR have they begun the process.
0	The G20 member has planted SOME actions to plant trees in degraded lands AND/OR has taken steps to begin this process.
+1	The G20 member has made strong progress by planting a significant amount of trees in degraded lands.

Compliance Director: Brandon Yih

Lead Analyst: Sydney Grad

Argentina: +1

Argentina has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Argentina endorsed the Glasgow Leaders' Declaration on Forests and Land Use.⁴³⁷¹ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 8 November 2021, the Ministry of Environment and Sustainable Development held the sixth virtual meeting of the Environmental Training for Journalists program.⁴³⁷² This meeting focused on issues related to native forests along with the preservation of, management of, application of regulations and policies on forests.

On 9 November 2021, the Ministry of Environment and Sustainable Development held a two-day national meeting to analyze the implementation of policies on the preservation and sustainable use of native forests.⁴³⁷³ At this meeting, presentations were run by workers involved in various technical, legal and administrative areas on projects such as the Native Forests and Community project, a project on the sustainable management of palo santo plants, a reducing emissions from deforestation and forest degradation (REDD+) support project, and more.

On 1 December 2021, the Ministry of Environment and Sustainable Development published the Report of Implementation of the Forest Law 26.331 on minimum budgets for environmental protection of native forests with guidelines to manage forest ecosystems in a sustainable manner.⁴³⁷⁴

⁴³⁷¹ Glasgow Leaders' Declaration on Forests and Land Use, UN Climate Change Conference UK 2021 (Glasgow) 2 November 2021. Access Date: 26 February 2022. <https://ukcop26.org/glasgow-leaders-declaration-on-forests-and-land-use/>

https://www.argentina.gob.ar/sites/default/files/2020/10/2021_informe_estado_implementation.pdf

On 7 December 2021, Minister of Agriculture, Livestock and Fisheries Julián Domínguez announced that in 2022, Argentina will start a program to plant 100 million trees throughout the country.⁴³⁷⁵ Minister Domínguez stated that the project will be collaborative with local provinces and municipalities.

On 10 March 2022, Minister of Environment and Sustainable Development Juan Cabandié moved forward with the Iberá Environmental Restoration Plan, which would allocate ARS40 million to rehabilitate woodlands in the city of Corrientes after forest fires and expand the 25 species of existing native trees.⁴³⁷⁶

On 4 April 2022, the Federal Environment Council organized its 102nd Ordinary Assembly, where the National Director of Forests Martín Mónaco spoke on the status of implementation of Law 26.331 to protect 200,000 hectares of protected woodlands.⁴³⁷⁷

On 5 April 2022, the Ministry of Environment and Sustainable Development launched the National Program of Non-Timber Forest Products to increase the protection of forests and trees around the country.⁴³⁷⁸

On 11 April 2022, Minister Cabandié signed agreements with the provinces of Buenos Aires, Catamarca, Chaco, Chubut, Entre Ríos, La Pampa, La Rioja, Mendoza, Misiones, Río Negro, Salta, San Luis, Santa Cruz, Santa Fe, Santiago del Estero, Tierra del Fuego, Córdoba, San Juan and Jujuy, to distribute the USD82 million from the Green Climate Fund.⁴³⁷⁹ Additionally, on 6 May 2022, two more provinces, Formosa and Tucumán, agreed to set the budgets of ARS558,914,668 and ARS121,154,688 respectively, to directly fight deforestation.⁴³⁸⁰

On 27 May 2022, Minister Cabandié participated in the 10th Assembly of Governors of the Norte Grande.⁴³⁸¹ At the meeting, it was discussed that given that more than half of the country's native forests are located in the region, there is a need to strengthen public policy tools in the matter

⁴³⁸¹ Cabandié announced an increase in investments for native forests at the 10th Assembly of Governors of the Norte Grande, Ministry of Environment and Sustainable Development (Buenos Aires) 27 May 2022. Translation provided by Google Translate. Access Date: 10 June 2022. <https://www.argentina.gob.ar/noticias/cabandie-anuncio-un-aumento-de-inversiones-para-bosques-nativos-en-la-10a-asamblea-de>

considering the high levels of greenhouse gas emissions and clearing. To reverse inequalities, Minister Cabandié promised to increase the budget for native forests protection allocated to the provinces.

On 30 May 2022, the Ministry of Environment and Sustainable Development through the National Parks Administration planted 3,000 araucarias (monkey puzzle trees) in the burned area of the Norquinco lake basin located in the Lanín National Park in the province of Neuquén.⁴³⁸²

On 14 June 2022, the Ministry of Environment and Sustainable Development announced that the province of Misiones will receive ARS330 million from the Forest Fund and over USD3.5 million from the United Nations' Green Climate Fund.⁴³⁸³ This funding is aimed at supporting the management of urban solid waste, fire and other environmental activities conducted in the province. This funding will also go towards reducing greenhouse gas emissions from deforestation.

On 16 June 2022, the National Congress passed a new law to establish the new Islote Lobos national park in the province of Río Negro.⁴³⁸⁴ The creation of this new national park, the 40th in Argentina, ensures more ecosystems can be protected and serves as a tool to fight against climate change.

On 18 June 2022, the Ministry of Environment and Sustainable Development, through the National Fire Management Service, delivered two helicopters with buckets, a hydrant plane and an observer plane to combat active forest fires in the provinces of Santa Fe and Entre Ríos.⁴³⁸⁵ This is part of the Ministry's portfolio in making air and brigade means accessible to provinces with forest fires.

On 1 August 2022, Juan Cabandié, Minister of Environment and Sustainable Development signed an agreement with Omar Gutiérrez, Governor of the Neuquén Province, to pledge AR175,000,000 annually to the implementation of the Forests Law, which aims to preserve endangered species of trees, create more stable protected areas and better administer woodlands across the country.⁴³⁸⁶

⁴³⁸² Nearly 3,000 araucarias were planted in a burned area of the Lanín National Park, Ministry of Environment and Sustainable Development (Buenos Aires) 30 May 2022. On 31 August 2022, Marcos Koopman, Vice Governor of the Province of Neuquen, announced that the office will direct AR15,000,000 to plant 25,000 trees in the province, through a cooperative project with the Environment and Territorial Development Ministry.⁴³⁸⁷

Argentina has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Argentina has taken strong actions to acknowledge the urgency of land degradation and create new carbon sinks through the creation of new national parks and planting new trees in burned areas. The Ministry of Environment and Sustainable Development has given multiple announcements, published reports and hosted educational events to promote sustainable land management and other environmental initiatives. In addition, the Minister of Agriculture, Livestock and Fisheries announced the goal of planting 100 million trees.

Thus, Argentina receives a score of +1.

Analyst: Diego Arreola Fernández

Australia: +1

Australia has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Australia endorsed the Glasgow Leaders' Declaration on Forests and Land Use.⁴³⁸⁸ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 3 December 2021, the Minister for the Environment Sussan Ley reported that Australia has exceeded its targets under the "20 million trees" initiative and found that over 30 million trees have been planted thus far.⁴³⁸⁹

On 10 December 2021, Minister Ley and Senator for Victoria Sarah Henderson announced an AUD1.5 million investment to protect coastal dunes along the Bellarine Peninsula with initiatives like hands-on conservation measures including tree planting and weed eradication.⁴³⁹⁰

On 19 January 2022, the Department of Agriculture, Water and the Environment's Emissions Reduction Fund announced a strengthened method to credit various projects that store carbon in trees in order to substitute the current plantation forestry method.⁴³⁹¹

⁴³⁸⁷ Green Cities: 25,000 trees will be delivered to every municipality in the province for reforestation purposes, Minuto Neuquen (Neuquen) 31 August 2022. Translation provided by Google Translate. ⁴³⁹¹ Emissions Reduction Fund introduces new plantation forestry method, Department of Agriculture, Water and the Environment (Canberra) 19 January 2022. Access Date: 5 October 2022.

<https://www.dcceew.gov.au/about/news/emissions-reduction-fund-introduces-new-plantation-forestry-method>

On 6 February 2022, Australia announced the launch of the Planting Trees for The Queen's Jubilee Program, which provides up to AUD15.1 million in grant funding in 2022 to organizations for community-oriented tree planting activities.⁴³⁹² This includes allocating grant funds of up to AUD100,000 to go towards each federal electorate's tree planting initiatives to promote biodiversity and community engagement.

On 28 February 2022, the Minister for Agriculture and Northern Australia David Littleproud and Minister Ley announced the review of the AUD1.1 billion National Landcare Program and the move to phase two.⁴³⁹³ This includes opportunities to scale Landcare initiatives like soil, water and biodiversity from a local to a regional or national scale.

On 28 February 2022, Australia participated in the United Nations Environment Assembly-5.2 (UNEA) and adopted 14 resolutions.⁴³⁹⁴ At the virtual conference, Minister Ley stressed the importance of actions against fundamental threats such as biodiversity loss.

On 15 March 2022, the Department of Agriculture, Water and the Environment announced an investment of AUD128.5 million as a budget reform package to target environmental protection, facilitate assessment and heighten compliance to international environmental commitments.⁴³⁹⁵ This investment package is focused on advancing environmental reform of the Environment Protection and Biodiversity Conservation Act of 1999.

On 29 March 2022, Australia released its official 2022-23 Department of Agriculture, Water and the Environment budget.⁴³⁹⁶ The budget commits AUD90.6 million over five years to secure the future of Australian forestry. This includes AUD86.2 million to support the establishment of new plantations. Additionally, AUD100 million is committed to investing in efforts that target protecting and restoring the environment. The federal budget also demands the delivery of the National Soil Strategy by 2023.⁴³⁹⁷ The strategy prioritizes soil health, empowers soil innovation and stewardship, and strengthens soil knowledge and capability.

Australia has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Australia has focused on domestic policies and goals such as various tree planting initiatives and protections for existing forestry. Australia has also prioritized funding for agricultural initiatives related to reforestation. Australia has also taken part in various international conferences such as the UNEA-5.2 conference.

Thus, Australia receives a score of +1.

Brazil: 0

Brazil has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 1 November 2021, President Jair Bolsonaro pledged to raise the country's climate commitments at the start of the 2021 United Nations Climate Change Conference (COP26) in Glasgow, United Kingdom.⁴³⁹⁸ Minister of the Environment Joaquim Leite announced that Brazil would aim to reduce its greenhouse gas emissions by 50 per cent by 2030, compared to a previous commitment of reducing emissions by 43 per cent by 2030.

On 2 November 2021, Brazil endorsed the Glasgow Leaders' Declaration on Forests and Land Use.⁴³⁹⁹ Brazil, along with over 100 other countries, pledged a total amount of almost USD19.2 billion to end and reverse deforestation by 2030 at COP26.⁴⁴⁰⁰

On 14 December 2021, the Ministry of the Environment, through the Secretariat of the Protected Areas as well as the Chico Mendes Institute for Biodiversity Conservation, signed the Public Notice for the Concession of the Iguaçu National Park.⁴⁴⁰¹ This project will invest BRL3.5 billion to improve the infrastructure and services to the conservation of biodiversity and the development of cities surrounding the national park.

On 14 December 2021, Minister Leite announced that the rate of deforestation in the Amazon region fell by 19.5 per cent in November 2021 compared to November 2020.⁴⁴⁰² Furthermore, Minister Leite stated that the reduction in deforestation reflected the integrated cooperation between the Ministries of the Environment, Justice and Public Security and Defense, in fighting environmental crimes in the Amazon.

On 23 December 2021, the Ministry of the Environment presented a comprehensive legal framework to the Food and Agriculture Organization that covers climate change and adaptation, as well as a forest code that takes into consideration specificities of different biomes.⁴⁴⁰³ This framework aims to reduce emissions by addressing the information gap caused by data being scattered among different entities, in private, public and nongovernmental sectors, that currently do not interact or exchange information, preventing a proper assessment of the situation and allowing for more efficient policy design and incentives.

⁴³⁹⁸ Brazil pledges 50 percent emissions cut by 2030 in change of tone, Al Jazeera (Doha) 1 November 2021. Access Date: 25 January 2022. <https://www.aljazeera.com/news/2021/11/1/brazil-pledges-50-percent-emissions-cut-by-2030-in-change-of-tone>

On 27 January 2022, Minister Leite participated in the ministerial meeting of the Economies Forum on Energy and Climate.⁴⁴⁰⁴ Minister Leite highlighted the creation of the National Green Growth Program, which offers financing and subsidies to encourage sustainable economic projects and activities generating green jobs, as well as the expansion of the Interministerial Committee on Climate Change to emphasize their actions towards reducing greenhouse gas emissions.

On 2 February 2022, the Ministry of the Environment released a statement emphasizing the importance of Brazilian wetland conservation and explained that the ministry further set out to implement protective measures to the wetland.⁴⁴⁰⁵ The Ministry further explains that the wetlands serve an important factor for the country's biodiversity and carbon storage, and thus must be preserved.

On 6 February 2022, Minister Leite stated that the Federal Government will present over 100 cases of sustainability and green economy projects to take lead on the global carbon market.⁴⁴⁰⁶ Minister Leite further explained that 20 to 25 per cent of exports or transactions taken in Brazil will play a role in the global carbon market.

On 9 February 2022, Minister Leite explained that the federal government would announce the creation of the Methane Zero program in the next 30 days.⁴⁴⁰⁷ This measure aims to encourage sectors such as agriculture, energy and waste to transform methane gas into biofuel with the financial support of public banks.

On 4 April 2022, Minister Leite and the Archbishop of Rio de Janeiro Dom Orani João Tempesta signed a coexistence agreement and memorandum of understanding on the management of the Tijuca National Park and the Cristo Redentor Sanctuary.⁴⁴⁰⁸ The memorandum focuses on the conservation of local biodiversity and combating environmental impacts by integrating historical, cultural and religious values in environmental considerations.

On 26 April 2022, the Ministry of the Environment and the Ministry of Mines and Energy jointly published an Interministerial Ordinance, introducing a protocol that controls and eliminates the use of polychlorinated biphenyls.⁴⁴⁰⁹ The Federal Government of Brazil aims to eradicate any use of harmful chemicals and materials that will decrease the stability of the land.

On 28 April 2022, Minister Leite hosted a meeting with the National Network of Public Consortia to propose a new public policy action to manage environmental policies.⁴⁴¹⁰ Specifically, the meeting discussed the facilitation and the implementation of solid waste management policies to manage land degradation in Brazil.

On 2 June 2022, Minister Leite participated in the international meeting, Stockholm+50, in Sweden.⁴⁴¹¹ Minister Leite highlighted that “to protect forests, the Federal Government [of Brazil] reinforced the fight against illegal deforestation with more environmental agents and launched, in March 2022, the operation Guardians of the Amazon Biome, which aims to combat organized crime.”

On 15 June 2022, Minister Leite, Minister of Justice and Public Security Anderson Torres and the United States Special Envoy for Climate John Kerry jointly announced a new working group to combat illegal deforestation, illegal mining, animal trafficking and timber trades.⁴⁴¹² This new working group was announced during the Summit of the Americas.

On 19 July 2022, the Ministry of the Environment approved the Sustainable Landscapes of the Amazon Program’s (ASL Project) Annual Operational Plan, which includes over BRL21 million in funding for forest restoration activities in 2022-2023.⁴⁴¹³ The Plan will focus on 1270 hectares of areas for restoration.

Brazil has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Brazil has taken some actions in tackling land degradation and creating new carbon sinks. Brazil has primarily focused on tackling domestic issues and policy agendas but did cooperate with some international partners in setting a treaty, such as COP26.

Thus, Brazil receives a score of 0.

sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 2 November 2021, Canada signed onto a new Global Forest Finance Pledge at COP26.⁴⁴¹⁵ Collectively with 12 donor countries, this pledge provides USD12 billion between 2021 and 2025 to “support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁴¹⁶

On 2 November 2021, Canada signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue at COP26 along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁴¹⁷ The statement is part of the dialogue’s roadmap of actions, with four “overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation.”

On 16 December 2021, Canada affirmed that the “2 Billion Trees” (2BT) project is on track.⁴⁴¹⁸ This initiative ensures the planting of two billion trees nationwide over 10 years to combat and mitigate the effects of climate change while concurrently achieving biodiversity and conservation targets. By the end of 2021, 30 million trees will have been planted as part of the 2BT project.

On 11 January 2022, Minister of International Development Karina Gould announced up to CAD55 million in funding for the Land Degradation Neutrality (LDN) fund, an investment fund launched by the United Nations Convention to Combat Desertification in efforts to combat land degradation.⁴⁴¹⁹ This is part of the Government of Canada’s CAD2.65 billion climate finance commitment and the G7 Charlevoix Commitment for Innovative Financing for Sustainable Development. The LDN fund aims to ensure that economic recovery efforts from the COVID-19 pandemic will support green jobs and sustainable businesses.

On 10 February 2022, the Government of Canada updated the Greener Home Grant to provide additional financial incentives towards creating developments with sustainable, green practices.⁴⁴²⁰ Now, the act allows for an increased rate of application to ensure it is accessible; accelerating grant payments so that the funds can be delivered faster, additional employment of energy advisors to ensure the program succeeds and making it easier to contact advisors along with increased transparency to the public. On a macro level, this shows the Government of Canada’s initiative to accelerate construction with sustainable practices in mind in the effort to combat ongoing environmental degradation.

On 14 February 2022, the Minister of Environment and Climate Change Steven Guilbeault launched the Output-Based Pricing System Proceeds Fund on carbon emissions.⁴⁴²¹ This would serve to make emitters pay for all of their greenhouse gas emissions on a production basis with higher taxes for higher polluters. This serves as a method to disincentivize activities that are intensive in greenhouse gas emissions as a measure against ongoing climate change, which is a key contributor to environmental degradation.

On 29 April 2022, the Government of Canada issued its intention to delay action on the Canadian Environmental Protection Act for two more years in order to establish a foundation for the Act to be enforced.⁴⁴²²

On 3 June 2022, Canada hosted the sixth session of the Ministerial on Climate Action (MoCA6) and Minister Guilbeault participated in the United Nations-led Stockholm+50 events.⁴⁴²³

On 3 June 2022, Minister Guilbeault and India's Minister of Environment, Forest and Climate Change Bhupender Yadav signed a memorandum of understanding to increase bilateral cooperation on climate action, environmental protection and conservation, at the Stockholm+50 meeting.⁴⁴²⁴

On 7 June 2022, Minister of Natural Resources Jonathan Wilkinson announced over CAD2.4 million in funding through the 2BT project to Trees for Life.⁴⁴²⁵ Trees for Life will assist 34 projects focused on tree planting over 600,000 trees in the provinces of British Columbia, Alberta, Ontario, Quebec and New Brunswick.

On 10 June 2022, Environment and Climate Change Canada announced an investment of CAD11.3 million over three years from Canada's Enhanced Nature Legacy to increase biodiversity conservation actions in nineteen United Nations Educational, Scientific and Cultural Organization (UNESCO) biosphere reserves spread throughout Canada including British Columbia's Clayoquot Sound, Manitoba's Riding Mountain and Quebec's Manicouagan-Uapishka Biosphere Reserve.⁴⁴²⁶

⁴⁴²⁶ Canada invests \$11.3 million to increase biodiversity conservation in UNESCO biosphere reserves, Environment and Climate Change Canada (Toronto) 10 June 2022. Access Date: 11 June 2022. <https://www.canada.ca/en/environment-climate-change/news/2022/06/canada-invests-113million-to-increase-biodiversity-conservation-in-unesco-biosphere-reserves.html>

On 29 June 2022, the Government of Canada and the Government of Prince Edward Island (PEI) entered into the Agreement-in-Principle on tree planting.⁴⁴²⁷ Within this agreement, PEI intends to plant trees, which includes growing the supply of trees where applicable, and achieve tree and forest growth that aims to contribute to the Government of Canada's Two Billion Trees Commitment.

On 22 September 2022, Minister Guilbeault announced that Environment and Climate Change Canada was now accepting expressions of interest for up to CAD40 million in funding for Indigenous-led area-based conservation projects.⁴⁴²⁸

On 3 October 2022, Canada attended the 26th Session of the Food and Agriculture Organization Committee on Forestry, which is a four-day conference held in Rome, Italy.⁴⁴²⁹ During this conference, Canada stated their plans to plant 20 billion trees over the next four years.

Canada has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Canada has launched initiatives to plant trees domestically to support reforestation efforts with a focus on biosphere reserves. Canada has also set aside funding for land restoration projects both in Canada and worldwide.

Thus, Canada receives a score of +1.

On 5 January 2021, President Xi Jinping delivered a special address to the 2022 World Economic Forum virtual session, citing China's commitment to promoting ecological conservation and that economic growth should never be at the cost of resource depletion and environmental degradation.⁴⁴³³

On 12 April 2022, Vice Premier Han Zheng called for strengthening efforts of national afforestation, ecological protection and pursuing green development.⁴⁴³⁴ Vice Premier Han called for efforts to protect ecological resources, fight illegal logging, wildlife trafficking and occupation of forests and grasslands, prevent forest and grassland fires and guard against forest and grassland pests. Vice Premier Han also maintained that China will further balance land greening and farmland protection, pledging to ensure the country's farmland acreage remains above 1.8 billion mu (120 million hectares).

On 16 April 2022, the China Forestry Group Corporation pledged to plant over 604,000 mu (40,267 hectares) of trees in China in 2022.⁴⁴³⁵ The corporation, the only centrally administered state-owned enterprise in the forestry sector, will promote and execute large-scale afforestation projects depending on local conditions.

On 28 April 2022, Minister of Ecology and Environment Huang Runqiu made opening remarks addressing the Stockholm+50 stakeholder consultation event, noting that China has prioritized environmental protection on its domestic agenda since the inception of the Stockholm Declaration and has made significant progress in resources conservation, sustainable development and international governance.⁴⁴³⁶ Minister Huang cited the revisions of over 30 laws and regulations related to ecological and environmental protection, including the implementation of international environmental agreements and supporting developing countries with green developments.

On 6 July 2022, Vice-Minister of Ecology and Environment Zhai Qing held a press conference, noting that China recently completed its sixth batch of second round central environmental inspections, intended to curb illegal developments and construction that damaged local ecology, as well as polluted bodies of water throughout the country.⁴⁴³⁷ Around 95 per cent of the 3,294 rectification tasks from the first round of inspections and half of the 1,227 tasks in the second round have been completed. Environmental improvements efforts for 285,000 out of 287,000 public complaints in the two rounds of inspections have been finished

On 22 September 2022, Deputy Director of the National Forestry and Grassland Administration Li Chunliang told the Yangtze Forum on Conservation and Development that China has devised new scientific plans to better protect the nature reserves in the Yangtze River Basin, including wildlife

protection and biodiversity.⁴⁴³⁸ Li noted that since 2016, desertification and soil erosion nationwide were reduced by 42.33 million mu (2.32 million hectares) and 70.95 million mu (4.72 hectares) respectively.

China has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. China has taken strong actions in recognizing the importance of combatting land degradation through tree planting and reforestation projects. China has also committed to cooperating with international partners to limit deforestation as part of its decarbonization strategy and long-term environmental goals.

Thus, China receives a score of +1.

France: 0

France has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, France signed onto the Glasgow Leaders' Declaration on Forests and Land Use at the 2021 United Nations Climate Change Conference (COP26), which “commit[ted] to working collectively to halt and reverse forest loss and land degradation by 2030.”⁴⁴³⁹

On 2 November 2021, France signed onto a new Global Forest Finance Pledge at COP26.⁴⁴⁴⁰ Collectively with 12 donor countries, this pledge provides USD12 billion between 2021 and 2025 to “support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁴⁴¹

On 2 November 2021, France signed onto the Congo Basin Joint Donor Statement along with 11 other countries and philanthropic donors at COP26.⁴⁴⁴² As part of this statement, at least USD1.5 billion between 2021 and 2025 is collectively pledged to “support ambitious efforts and results in the region to protect and maintain the Congo Basin forests, peatlands and other critical global carbon stores.”

On 2 November 2021, France signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁴⁴³ The statement is part of the dialogue's roadmap of actions, with four “overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation.”

On 10 January 2022, Prime Minister Jean Castex announced that an existing fund to recycle brownfield sites would receive an additional EUR100 million from the Recovery Plan.⁴⁴⁴⁴ By making brownfield sites fit for use, the fund aims to reduce the development (or “artificialization”) of greenfield lands, with an ultimate goal of zero net artificialization by 2050.

On 6 February 2022, Minister of Agriculture and Food Julien Denormandie hosted an informal summit of the EU agriculture ministers on the subject of low-carbon agriculture.⁴⁴⁴⁵ Ministers “shared their experience regarding climate-friendly agricultural practices,” and “a common certification framework at European level emerged as a promising avenue” during the talks.

On 22 February 2022, the Government of France introduced the “La Forêt et nous” online platform to spread awareness to young people on the challenges of forest conservation and sustainable management.⁴⁴⁴⁶ The online platform allows young people to access maps from the National Institute for Geographic and Forest Information and take educational quizzes on forest ecosystems.

On 4 March 2022, Minister Denormandie, President of the Board of Directors of the National Center for Forest Property (CNPf) Anne-Marie Bateau and the Director General of the CNPF Claire Hubert signed a new contract on the objectives and performance of the CNPF during the International Agricultural Show.⁴⁴⁴⁷ Lasting from 2022 until 2026, this new contract focuses on initiatives to increase forest carbon sinks and encourage sustainable management of forests by the over 3.5 million forest owners of 12.6 million hectares of forest land.

On 17 March 2022, France introduced the new National Wetlands Plan 2022-2026 with actions including doubling the area of protected wetlands by 2030, conserving wetlands by acquiring 8,500 hectares by 2026, restoring over 50,000 hectares of wetlands by 2026 and introducing low-carbon initiatives to promote wetland protection and restoration.⁴⁴⁴⁸

On 9 May 2022, France took part in the 15th session of the Conference of the Parties to the UN Convention to Combat Desertification in Abidjan, Côte d’Ivoire.⁴⁴⁴⁹ For the Abidjan initiative launched as part of the conference, which seeks to increase the production of foods such as cocoa while restoring degraded lands, France has announced it will contribute EUR155 million.

On 28 October 2022, President Emmanuel Macron vowed to replant one billion trees, or ten per cent of the French forest, within the next ten years.⁴⁴⁵⁰ This is to replenish the huge areas of the country's forest that was destroyed by massive summer wildfires.

France has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. For new domestic engagements, France committed one action regarding land degradation and none regarding carbon sinks. On the international stage, France has not taken substantive actions for both components through the COP26 conference and promises of further funding.

Thus, France receives a score of 0.

Analyst: Koji Shiromoto

Germany: +1

Germany has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Germany signed the Glasgow Leaders' Declaration on Forests and Land Use at the 2021 United Nations Climate Change Conference (COP26), which intends to halt and reverse forest loss and land degradation by 2030 while delivering sustainable development and promoting an inclusive rural transformation.⁴⁴⁵¹

On 2 November 2021, Germany joined 12 other nations in announcing its intention to collectively provide USD12 billion for forest-related climate finance between 2021-2025 as part of the new Global Forest Finance Pledge at COP26.⁴⁴⁵²

On 2 November 2021, Germany joined 11 other countries and philanthropic donors in announcing an initial collective pledge of at least USD1.5 billion of climate financing between 2021-2025 to support the COP26 Congo Basin forests, peatlands and other critical global carbon stores.⁴⁴⁵³

On 2 November 2021, Germany signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue at COP26 to promote sustainable agricultural development and forest management.⁴⁴⁵⁴

On 2 November 2021, Germany advanced support for Indigenous Peoples' and Local Communities' Tenure Rights and their Forest Guardianship at COP26.⁴⁴⁵⁵ As part of the released Joint Donor Statement, the endorsing countries and organisations announced an initial collective pledge of USD1.7 billion from 2021 to 2025 to support the advancement of Indigenous Peoples' and local communities'

forest tenure rights and greater recognition and rewards for their role as guardians and defenders of tropical forests.

On 24 November 2021, the forthcoming tripartite coalition Federal Government released its official coalition agreement.⁴⁴⁵⁶ It calls for the development of an Action Program for Natural Climate Protection, which addresses both forests and other types of ecosystems.

On 13 December 2021, Federal Minister of Food and Agriculture Cem Özdemir supported a draft regulation of the European Commission to avoid deforestation and forest degradation in certain imported agricultural commodities such as soy, wheat, palm oil.⁴⁴⁵⁷ Minister Özdemir focused on ensuring global supply chains are free of deforestation activities.

On 17 December 2021, Germany and Pakistan signed a financing agreement worth EUR13.5 million for Phase One of the Billion Tree Afforestation Support Program.⁴⁴⁵⁸ The German KfW Development Bank will support the planting of 10 billion trees in Pakistan.

From 24 January to 28 January 2022, the Federal Ministry of Food and Agriculture hosted the 14th Global Forum for Food and Agriculture, hosting around 80 agriculture ministers and high-level representatives from international organisations.⁴⁴⁵⁹ The final communiqué includes 22 Calls to Action committing, amongst other things, to maintaining and enhancing soil health and soil conservation, strengthening activities to promote soil biodiversity, minimising soil pollution, preventing further soil degradation, combating desertification, and halving global food waste.⁴⁴⁶⁰ Within the German context, the Conference marked the official beginning of closer cooperation between the Environment and Agricultural Federal Ministries.⁴⁴⁶¹

On 9 February 2022, Minister Özdemir presented funding notices for nearly EUR23 million for the German Farmers' Association and the Federation of Organic Food Industry for humus build-up projects.⁴⁴⁶² These projects are an important part of the measures to achieve the target of minus 25 million metric tons of carbon dioxide equivalents by 2030 for the land use, land use change and forestry sector set out in the German Climate Protection Act.

On 2 May 2022, Federal Minister of the Environment Steffi Lemke and India's Minister of Environment, Forest and Climate Change Bhupender Yadav signed a joint declaration of intent at the

6th Indo-German intergovernmental consultations.⁴⁴⁶³ Germany will support India in restoring forests and forest landscapes as part of the International Climate Initiative.

On 25 May 2022, Minister Lemke, President of Umweltbundesamt Dirk Messner and the Administrator of the United States Environmental Protection Agency Michael Regan signed a joint declaration to expand cooperation between their two institutions on environmental issues.⁴⁴⁶⁴ The ceremony took place in Berlin at the start of the G7 meeting of environment, energy and climate ministers.

On 1 June 2022, the Bundestag approved the 2022 Budget of the Federal Ministry for the Environment and Consumer Protection (BMUV) in second and third readings.⁴⁴⁶⁵ The new budget of the BMUV has a volume of around EUR2.2 billion. The budget of the BMUV provides additional funds for significant areas of environmental and consumer protection including nature, marine and species protection as well as additional funds for the Energy and Climate Fund.

Germany has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Germany has planted a significant number of trees in degraded lands, both domestically and internationally. The newly formed federal government has made climate action a key part of its cross-sectoral policy proposals. By both supporting and organizing international forums for cooperation on this commitment, funding domestic and international projects in reforestation, forest sustainability and carbon sinks, Germany has fully complied with its commitments to planting trees, focusing on the most degraded ecosystems in the planet.

Thus, Germany receives a score of +1.

Analyst: Frederik Hayward

India: +1

India has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Prime Minister Narendra Modi, at the 2021 United Nations Climate Change Conference (COP26), failed to mention India's promise to create an additional carbon sink of two and a half to three billion tons of carbon dioxide through tree and forest cover by 2030, despite it being part of India's Intended Nationally Determined Contribution from the 2015 Paris Agreement.⁴⁴⁶⁶ While other key climate goals were brought up, land degradation was altogether omitted.

⁴⁴⁶⁶ Explained: PM Modi's climate promises, and how far India is on track to meet them, The Indian Express (Glasgow) 9 November 2021. Access Date: 31 January 2022. <https://indianexpress.com/article/explained/explained-pms-climate-promises-and-how-far-india-is-on-track-to-meet-them-7611943/>

On 2 November 2021, India did not sign the Glasgow Leaders' Declaration on Forests and Land Use, which intends to put an end to deforestation and land degradation by 2030.⁴⁴⁶⁷ The declaration aims to make the use of land sustainable in relation to climate change, but India refused to sign it on the grounds that it connected trade to climate change, arguing that trade falls under the authority of the World Trade Organization. This is an important agreement in regard to deforestation and preventing land degradation, and India's failure to sign it on the basis of these issues in particular is a setback to its G20 commitment.

On 13 January 2022, the Ministry of Environment, Forest and Climate Change released the India State of Forest Report (ISFR) 2021, outlining new initiatives to be undertaken regarding land degradation.⁴⁴⁶⁸ Key among these initiatives is analyzing the trend of carbon impacted by India's forest cover to understand the implications of increasing the amount of carbon sinks in the future. These initiatives are precursors to moving towards increasing the forest cover and creating carbon sinks. The ISFR 2021 declared that Hyderabad, Telangana, has developed the greatest amount of green cover of all megacities in India over the last 10 years, increasing the total green cover from 33.15 square kilometres to 81.81 square kilometres, through municipal tree planting initiatives.⁴⁴⁶⁹ In the same report, the Ministry announced that the total forest and tree cover in India has risen by 2,261 square kilometers in the last two years.⁴⁴⁷⁰ This is a move forward and brings light to previous actions undertaken by India prior to the current compliance cycle, by means of publishing the report.

On 13 January 2022, Union Minister of Environment, Forest and Climate Change Bhupender Yadav announced that India will be moving into Phase Two of the National Mission for Green India that aims to increase conservation of biodiversity and ecological sustainability.⁴⁴⁷¹ This involves using the Nagar Van Yojna Scheme to increase the number of city forests in the country and increase the tree cover. This is a plan for future steps, leaving it to be seen what actions India will undertake.

On 24 January 2022, Minister Yadav announced that India has achieved a total carbon stock in terms of forest and tree cover of 30.11 billion tonnes, as well as the ministry's intention to increase forest cover across the country.⁴⁴⁷² This is a reaffirmation of India's previous actions, leaving it to be seen what India's future measures will be to continue this progress.

On 14 March 2022, the Ministry for Forest, Environment and Climate Change announced that it would create riparian forests and plant trees along 13 rivers in India to create carbon sinks.⁴⁴⁷³ The proposed plan

⁴⁴⁷² 'Plantations meet ecological functions of natural forests': Bhupender Yadav, Hindustan Times (New Delhi). 24 January 2022. Access Date: 10 February 2022. <https://www.hindustantimes.com/environment/plantations-meet-ecological-functions-of-natural-forests-bhupender-yadav-101642975799614.html>

⁴⁴⁷³ Modi govt plans to rejuvenate 13 rivers, hopes it'll boost forest cover and carbon sequestration, The Print (New Delhi) 15 March 2022. Access Date: 2 May 2022. <https://theprint.in/environment/modi-govt-plans-to-rejuvenate-13-rivers-hopes-itll-boost-forest-cover-carbon-sequestration/873921/>

is projected to absorb 50.21 million tons of carbon dioxide equivalent in 10 years and 74.76 million tonnes of carbon dioxide equivalent in 20 years. This plan is geared towards planting trees throughout India.

On 2 May 2022, Minister Yadav and Germany's Minister for Environment, Nature Conservation, Nuclear Safety and Consumer Protection Steffi Lemke signed a joint declaration of intent during the 6th India-Germany Intergovernmental Consultations.⁴⁴⁷⁴ This joint declaration focused on forest landscape restoration and builds on bilateral cooperation on issues such as climate protection and biodiversity conservation.

On 3 June 2022, Minister Yadav and Canada's Minister of Environment and Climate Change Steven Guilbeault signed a memorandum of understanding to increase bilateral cooperation on climate action, environmental protection and conservation, at the Stockholm+50 meeting.⁴⁴⁷⁵

On 22 June 2022, the National Bank for Agriculture and Rural Development released its 2021-22 Annual Report, in which it describes its new initiative called JIVA.⁴⁴⁷⁶ This project aims to increase the sustainability of watersheds, diversify crop systems, and integrate trees and forest areas.

On 12 September 2022, Minister of Road Transport and Highways Nitin Gadkari mentioned plans to plant 30 million trees along national highways while constructing and expanding them.⁴⁴⁷⁷ So far, 27,000 trees have been planted. The Government of India is also planning to adopt a new policy called "Tree Bank" for the purposes of efficient and sustainable tree planting, which will require authorities to maintain a tree bank account of trees planted throughout the project.

On 7 October 2022, the Indian Ministry of Railways released their plans to become net-zero carbon emitter by 2030.⁴⁴⁷⁸ A part of this plan is to increase tree plantation to increase the natural carbon sink.

India has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. India has taken one concrete measure to plant trees to combat land degradation in this cycle. This includes those already planted, as well as plans for future and ongoing projects, such as the national highways and the "Tree Bank" policy. Moreover, India has signed bilateral cooperation agreements with Canada and Germany focused on environmental issues, further reiterating its commitment to combatting land degradation.

Thus, India receives a score of +1.

Indonesia: +1

Indonesia has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Indonesia endorsed the Glasgow Climate Pact at the 2021 United Nations Climate Change Conference, thereby pledging to reverse deforestation and land degradation by 2030.⁴⁴⁷⁹ This plan includes restoring damaged land and funding the protection of the tropical rainforest in the Congo Basin. However, Minister of Environment and Forestry Siti Nurbaya Bakar made a statement declaring the agreement unfair, claiming that Indonesia's development should not be sacrificed for the sake of reducing deforestation and carbon emissions.

On 2 November 2021, Indonesia signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁴⁸⁰ The statement is part of the dialogue's roadmap of actions, with four "overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation."

On 5 November 2021, the Government of Indonesia declared that its agreement to the Glasgow Climate Pact did not extend to a complete stop to deforestation by 2030, as that would be counterproductive to the country's development plans, which require land to build infrastructure, food security and industry development.⁴⁴⁸¹ Indonesia instead reemphasized its Long-Term Strategy for Low Carbon and Climate Resilience 2050, which included creating a carbon net sink in its forestry sector by 2030. Through this, Indonesia stresses the importance of bringing together deforestation with steady development.

On 17 November 2021, Head of Indonesia's Peatland and Mangrove Restoration Agency (BRGM) Hartono Prawiraatmadja announced that it would be reducing its target for rehabilitating mangroves from 83,000 hectares to 33,000 hectares due to the challenges brought on by the COVID-19 pandemic.⁴⁴⁸² However, the BRGM pledged to adhere to its larger target of rehabilitating 630,000 hectares of mangroves by 2022.

On 28 November 2021, the BRGM reinforced the planting of mangroves throughout Indonesia in accordance with the National Tree Planting Day, an initiative undertaken to meet the agency's target of planting 600,000 hectares of mangroves by 2024.⁴⁴⁸³ Within 2021, the agency successfully planted mangroves in 34,000 hectares of land in nine provinces: North Sumatra, Bangka Belitung, Riau Islands, Riau, West Kalimantan, East Kalimantan, North Kalimantan, Papua and West Papua.

⁴⁴⁸³ BRGM plants mangroves to commemorate National Tree Planting Day, Antara News (Jakarta) 28 November 2021. Access Date: 3 February 2022. <https://en.antaranews.com/news/201869/brgm-plants-mangroves-to-commemorate-national-tree-planting-day>

On 6 January 2022, President Joko Widodo announced his administration's plan to revoke more than 2000 permits for mining and use of forests to reduce deforestation.⁴⁴⁸⁴ This included 192 forestry permits covering three million hectares of forest were revoked from firms that misused the permits. The Government of Indonesia will continue to monitor and evaluate permits for future actions.

On 28 January 2022, Indonesia signed the Final Communiqué of the 14th Berlin Agriculture Ministers' Conference, which emphasized the goal of halting deforestation and the degradation of forests and other ecosystems by 2030.⁴⁴⁸⁵ By doing this, Indonesia reaffirmed its commitment to ending land degradation, signing another international agreement that fell in line with the Glasgow Leaders' Declaration on Forest and Land Use in November 2021.

On 3 February 2022, President Widodo handed over the 2021 Social Forestry Decrees to forest farmers throughout Indonesia, which require them to plant 50 per cent of existing land with woody trees, while the remaining 50 per cent may be planted with seasonal crops.⁴⁴⁸⁶ This maintains Indonesia's commitment to planting trees while incorporating the needs of local populations to ensure that such actions are done sustainably.

On 24 February 2022, Minister Nurbaya issued Decree Number 168 regarding the Forestry and Other Land Use (FOLU) Net Sink 2030, which has the goal of reducing 60 per cent of national emissions by 2030, which will set Indonesia on the path to achieving net-zero emissions by 2060 or sooner.⁴⁴⁸⁷ This is a part of Indonesia's efforts to incorporate forest management and carbon governance into its climate action plan.⁴⁴⁸⁸ The target set by this plan is to achieve net zero deforestation by 2030.⁴⁴⁸⁹

On 15 March 2022, President Widodo, First Lady Iriana Joko Widodo and Minister Nurbaya planted various Indonesian plants at the Zero Point of the Capital of the Archipelago East Kalimantan.⁴⁴⁹⁰ These plants are among fast-growing and durable and were planted in the planned location of the Rimba Botanika Botanical Gardens, which will become a miniature of the tropic rainforest habitat of Kalimantan.

On 30 March 2022, Minister Nurbaya welcomed the support of the United States in Indonesia's domestic plans to implement the Plan Operational Forestry and Other Land Use (FOLU) Net Sink

2030.⁴⁴⁹¹ Minister Nurbaya also announced that Indonesia has succeeded in reducing deforestation significantly, including through rehabilitation of mangrove forests, demonstrated by decreasing trends of deforestation in Indonesia.

On 18 April 2022, Minister Nurbaya reiterated the Government of Indonesia's intentions to reduce carbon emissions through land and forests by means of FOLU Net Sink 2030, while also emphasizing the importance of blue carbon and the use of marine ecosystems as carbon sinks, primarily through mangrove ecosystems, seagrass beds and brackish swamps.⁴⁴⁹² This is a move towards incorporating various types of planted landscapes to better meet the global need for carbon sinks.

On 22 April 2022, Minister Nurbaya issued a request that ministry staff and other stakeholders collaborate to realize FOLU Net Sink 2030, so that domestic carbon levels are reduced through the principles of sustainable forest management, environmental governance and carbon governance.⁴⁴⁹³ This is a move to ensure that the Government of Indonesia complies with a commitment to creating carbon sinks throughout the country.

On 15 August 2022, Minister Nurbaya announced the opening of the Eco Bee Park, which will be used to produce non-timber forest products.⁴⁴⁹⁴ This means that the forest area in this park will not be used for timber, but rather for products such as forest honey, Moringa leaves, and taxus plants. This increases forest cover without increasing timber production.

Indonesia has fully complied with its commitment to contributing to collectively planting 1 trillion trees, focusing on the most degraded ecosystems in the planet. Indonesia has taken actions to plant trees throughout the country, focusing on restoration of pre-existing forests along with the creation of new forested areas. It has placed particular focus on degraded areas, such as former mines, as well as locations with greatest potential for tree dispersion, such as watersheds. Indonesia has also set an explicit goal for itself through the Forestry and Other Land Use Net Sink 2030 plan and has also declared a target of planting 600,000 hectares of mangroves by 2023. Indonesia has also participated in global planning summits including the 2021 United Nations Climate Change Conference and the 14th Berlin Agriculture Ministers' Conference and has reasserted its commitment to halting land degradation at such meetings. Indonesia has made strong progress by planting trees in degraded areas and by pursuing plans to carry such actions forward.

Thus, Indonesia receives a score of +1.

Italy: +1

Italy has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Italy endorsed the Glasgow Leaders' Declaration on Forests and Land Use.⁴⁴⁹⁵ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 2 November 2021, Italy signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁴⁹⁶ The statement is part of the dialogue's roadmap of actions, with four "overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation."

On 3 November 2021, the Bank of Italy pledged their commitment to addressing climate change and to consider sustainability factors to facilitate smooth development of sustainable finance.⁴⁴⁹⁷ The bank pledged to support the collective commitment made by the Network for Greening the Financial System (NGFS), promising among other things, to integrate climate change considerations into monetary policy and to address biodiversity loss's impacts.⁴⁴⁹⁸ The Bank of Italy has also pledged to be part of the drive towards carbon neutrality by joining an afforestation endeavour.⁴⁴⁹⁹ The goal is to help Italy's financial system be more environmentally friendly and help the country meet its Paris Agreement targets.

On 17 November 2021, the Undersecretary of State at the Ministry of the Ecological Transition Ilaria Fontana launched a National Tree Day as part of the "A Tree for the Future" national project.⁴⁵⁰⁰ This project donates seedlings to Italian schools to support tree planting initiatives in cities across Italy. As of November 2021, around 50,000 seedlings have been distributed.

On 30 December 2021, the Ministry of Ecological Transition concluded various investments as part of the National Recovery and Resilience Plan (PNRR), as part of the larger Next Generation EU EUR750 billion package, aimed at environmental transition and carbon-neutral recovery from the COVID-19 pandemic.⁴⁵⁰¹ An investment of EUR330 million was made to plant 6.6 million trees in an area of 6,600 hectares, aiming to preserve and enhance biodiversity, stem land consumption and restore soils. Another EUR330 million was made for the "Renaturation of the Po area," intervening for the improvement of among other things, natural reforestation and the blockage of invasive species along

river ecosystems.⁴⁵⁰² The Ministry of Ecological Transition also unveiled its first milestone for the Digitization of National Parks Measure as part of the PNRR with an investment of EUR100 million for nature conservation, visitor services and administrative simplification for Italy's 24 national parks and marine protected areas.

On 10 February 2022, the Ministry of Agricultural, Food and Forestry Policies published the National Forest Strategy in the Official Gazette.⁴⁵⁰³ The National Forest Strategy will be valid for 20 years and prioritizes the sustainability of forest management, environmental protection and the bioeconomy. The aim of the National Forest Strategy is to ensure that Italy will have “extensive and resilient forests, rich in biodiversity, capable of contributing to mitigation and adaptation to the climate crisis.”

On 23 March 2022, the Ministry of Education introduced the School ReGeneration plan to promote environmental awareness in schools, which includes major projects to plant trees outside school facilities.⁴⁵⁰⁴ This plan also includes the creation of sustainable canteens serving local agricultural products and the construction of 200 new completely energy-efficient school buildings.

On 30 March 2022, Undersecretary Fontana announced the launch of urban reforestation projects in 14 metropolitan cities across Italy.⁴⁵⁰⁵ The Ministry for Ecological Transition called for the planting of over 6.6 million trees by 2024. The call allocated a total of EUR330 million for the projects with EUR74 million earmarked for 2022, EUR74 million for 2023 and EUR139 million for 2024.

On 27 May 2022, the Minister of Agricultural, Food and Forestry Policies Stefano Patuanelli announced that a total of EUR420 million in funding has been allocated to the National Forest Strategy up to the year 2032.⁴⁵⁰⁶ The funds have been made available through the Stability Law and funding will be allocated in relation to the achievement or needs of the over 30 objectives, almost 100 actions and sub-actions in the National Forest Strategy.

Italy has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Italy has signed onto pledges at the United Nations Climate Change Conference and focused on domestic tree planting initiatives through funding reforestation projects, the National Forest Strategy and other environmental initiatives.

Thus, Italy receives a score of +1.

Japan: 0

Japan has partially complied with its commitment to contributing to collectively planting one trillion trees, focusing on the most degraded ecosystems on the planet.

On 2 November 2021, Japan signed onto the Glasgow Leaders' Declaration on Forests and Land Use at the 2021 United Nations Climate Change Conference (COP26), which “commit[ted] to working collectively to halt and reverse forest loss and land degradation by 2030.”⁴⁵⁰⁷

On 2 November 2021, Japan signed onto a new Global Forest Finance Pledge at COP26.⁴⁵⁰⁸ Collectively with 12 donor countries, this pledge provides USD12 billion between 2021 and 2025 to “support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁵⁰⁹

On 2 November 2021, Japan signed onto the Congo Basin Joint Donor Statement along with 11 other countries and philanthropic donors.⁴⁵¹⁰ As part of this statement, at least USD1.5 billion between 2021 and 2025 is collectively pledged to “support ambitious efforts and results in the region to protect and maintain the Congo Basin forests, peatlands and other critical global carbon stores.”

On 2 November 2021, Prime Minister Fumio Kishida pledged an additional USD240 million to global forestry conservation while addressing the COP26's World Leaders Summit.⁴⁵¹¹

On 2 November 2021, Japan signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁵¹² The statement is part of the dialogue's roadmap of actions, with four “overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation.”

On 27 December 2021, the Forestry Agency within the Ministry of Agriculture, Forestry and Fisheries released official guidelines on how carbon sinks should be factored into carbon dioxide (CO₂) calculations.⁴⁵¹³ This document is pursuant to the Cabinet's adoption of the Climate Change Adaptation Plan in October 2021.

⁴⁵¹³ How to calculate the volume of carbon dioxide absorbed by forests, Forestry Agency (Tokyo) 27 December 2021.

Translation provided by Analyst. Access Date: 12 February 2022.

<https://www.rinya.maff.go.jp/j/press/kikaku/211227.html>

On 10 August 2022, the Forestry Agency within the Ministry of Agriculture, Forestry and Fisheries revised the “J-Credit” system, an existing system that accords credits for creating carbon sinks.⁴⁵¹⁴ The revisions included extending the certification period to a maximum of 16 years, loosening the additionality requirements, and changing the method of calculating the amount of carbon absorbed.

Japan has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Regarding both carbon sinks and combatting land degradation, Japan has pledged funding in the international arena, but little action has been taken domestically.

Thus, Japan receives a score of 0.

Analyst: Koji Shiromoto

Korea: +1

Korea has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 1 November 2021, President Moon Jae-in announced that Korea will update its 2030 Nationally Determined Contributions and cut greenhouse gas emissions by over 40 per cent from 2018 levels, in an address at the World Leaders Summit for the 2021 United Nations Climate Change Conference (COP26).⁴⁵¹⁵

On 2 November 2021, Korea endorsed the Glasgow Leaders’ Declaration on Forests and Land Use at COP26.⁴⁵¹⁶ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 2 November 2021, Korea signed onto a new Global Forest Finance Pledge at COP26.⁴⁵¹⁷ Collectively with 12 donor countries, this pledge provides USD12 billion between 2021 and 2025 to “support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁵¹⁸

On 2 November 2021, Korea signed onto the Congo Basin Joint Donor Statement along with 11 other countries and philanthropic donors.⁴⁵¹⁹ As part of this statement, at least USD1.5 billion between 2021

and 2025 is collectively pledged to “support ambitious efforts and results in the region to protect and maintain the Congo Basin forests, peatlands and other critical global carbon stores.”

On 2 November 2021, Korea signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁵²⁰ The statement is part of the dialogue’s roadmap of actions, with four “overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation.”

On 11 November 2021, President Moon Jae-in delivered a keynote speech at the Asia-Pacific Economic Cooperation Summit 2021, addressing the need for cooperation between South Korea and North Korea to increase and preserve forestry.⁴⁵²¹

On 10 December 2021, the Government of Korea announced that it will close down 24 aging coal-fired power plants permanently by 2034 as part of efforts to phase out coal consumption for electricity generation by 2050 and boost the country’s clean hydrogen self-sufficiency ratio to 24 per cent in 2030, and further to 60 per cent in 2050.⁴⁵²²

On 30 December 2021, the Ministry of Environment released a taxonomy to accelerate green goals, which declared liquefied natural gas as a sustainable investment, a statement that goes against their carbon neutral goal by 2050.⁴⁵²³

On 3 January 2022, the Korea Forest Service accepted the proposal for the third phase of the Korea-Mongolia Greenbelt Reforestation Project, a joint program with the Ministry of Environment and Tourism of Mongolia, to be implemented between 2022 to 2026.⁴⁵²⁴ This new phase of the project will introduce an advanced forest fire prevention control system, launch research and training initiatives on agroforestry in Mongolia and assist with developing healing forests in Mongolia.

On 6 January 2022, the Ministry of Environment revised and announced the “exclusion to the single-use plastic products,” which includes the commitment that Korea will ban using plastic products, such as disposable plastic cups in cafes starting 1 April 2022.⁴⁵²⁵

On 11 January 2022, the Ministry of Environment announced their plans for 2022, which includes the full implementation for carbon neutrality, integrated water management and expansion of inclusive

environmental services.⁴⁵²⁶ The Ministry of Environment also aims to create an integrated map of land usage including forests and wetlands in order to create an integrated management system of carbon sinks.

On 18 February 2022, the Ministry of Environment presented the ecological restoration results of and future vision of the Nakdonggang estuarine restoration project during a briefing session.⁴⁵²⁷ The Ministry of Environment furthermore opened the estuary gates to flow sea water into the freshwater on the same day.

On 9 May 2022, the Ministry of Environment and the National Institute of Biological Resources announced new guidelines for green space management.⁴⁵²⁸ With these new guidelines, local governments will manage green spaces including tree-lined roads and walking trails with consideration for biodiversity conservation and enhancement. The Ministry of Environment recognized the importance of street trees in varying functions such as absorbing greenhouse gases. The new guidelines will also include methods and places to plant street trees to reduce overgrown trees colliding with public infrastructure.

On 20 May 2022, the Ministry of Environment hosted a workshop on nature conservation policies in Dutayeon and the Yongneup Wetland of Daemsan Mountain with 40 civilian participants, including students and teachers.⁴⁵²⁹ Organized for the “Month of Biodiversity” to spread awareness on the importance of biodiversity conservation, the Ministry of Environment aims to increase civic participation in other nature conservation areas.

On 29 May 2022, the National Assembly passed over 14 environmental bills during its plenary session.⁴⁵³⁰ One of the 14 Acts includes the Natural Environment Conservation Act, which requires the Basic Policy for Conservation of Natural Environment to specifically include “conservation of ecological axis and restoration of a damaged ecological axis.” This is focused on reducing roadkill and strengthening the conservation of biodiversity and natural environments.

Man and the Biosphere Programme (MAB).⁴⁵³¹ The MAB International Coordinating Council is the leading decision-making body tasked with nominating new biosphere reserves and developing or reviewing management plans of such reserves.

On 2 September 2022, the Ministry of Environment announced an expected budget and fund for 2023 of around KRW13.7271 trillion.⁴⁵³² The 2023 Budget will focus on creating sustainable green land, restoring and increasing green spaces, restoring degraded land, and increasing carbon absorption projects in national parks and wetland protection areas.

Korea has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Korea has taken strong actions in both combatting land degradation and creating new carbon sinks. Korea has focused on domestic policies, as well as international cooperation. Domestic policies such as eradicating the use of plastic cups, as well as closing aging coal-powered plants play a prominent role in achieving the goals, while international corporations in COP26 as well as with Mongolia and other countries have also shown effort to work with other national entities.

Thus, Korea receives a score of +1.

Analyst: Taisei Inoue

Mexico: +1

Mexico has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Mexico endorsed the Glasgow Leaders' Declaration on Forests and Land Use at the 2021 United Nations Climate Change Conference (COP26).⁴⁵³³ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 8 December 2021, the National Commission of Natural Protected Areas (CONANP) donated a new vehicle fleet of Nissan Frontier trucks to rangers in natural protected areas of the Southern Region, Isthmus and South Pacific Regional Directorate of Mexico (Chiapas, Oaxaca and the Costa Chica de Guerrero) to strengthen surveillance strategies, combat forest fires and promote ecological

monitoring.⁴⁵³⁴ The CONANP says that this decision will “strengthen the presence in the territory to be more efficient and to continue with the work of conserving the land ecosystems.”

On 17 December 2021, Executive Director of the National Forestry Commission (CONAFOR) Luis Meneses Murillo signed a framework coordination agreement with the Governor of Michoacán Alfredo Ramírez Bedolla to establish a territorial planning process that allows the regularization, protection and preservation of the land aligned with environmental justice.⁴⁵³⁵ The main goals are promoting community forest management and restoration projects in the Purépecha Plateau.

On 19 January 2022, the CONANP and the Selva Maya Resources Protection project developed the Adaptation to Climate Change Program to promote sustainable practices in the Mayan Rainforest.⁴⁵³⁶ This project seeks to achieve seven levels of climate change resilience, including a “transition towards sustainable systems of production.”⁴⁵³⁷ This project is a continuation of the Selva Maya Project, funded by the German Bank for Development and the International Union for Conservation of Nature since 2018 to support Mexico, Guatemala, and Belize in the restoration, conservation, and sustainable management of the Mayan Rainforest.

On 20 January 2022, the CONAFOR and the State Government of Querétaro signed a collaborative agreement to ensure sustainable use of timber and non-timber forest resources in the Sierra Gorda Biosphere Reserve, the Semi-desert, and the Municipality of Amealco de Bonfil; through the financial support of the state government environmental services; and forest restoration of 13 municipalities.⁴⁵³⁸

On 21 January 2022, the CONAFOR signed a collaborative agreement on forestry with the State of Tlaxcala to promote sustainable management in ejidos; finance forest reforestation with concurrent funds in Calpulalpan, Nanacamilpa and the natural protected area La Malinche, which are areas of priority attention; and install a Forestry State Council.⁴⁵³⁹

Russia: 0

Russia has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Russia endorsed the Glasgow Leaders' Declaration on Forests and Land Use.⁴⁵⁴⁶ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 1 June 2022, the Russian Ministry of Natural Resources and the Environment announced the start of a large-scale forest climatic program called "Green Formula."⁴⁵⁴⁷ Green Formula aims at reducing anthropogenic climate impact and is conducted in cooperation with the public-private company, SIBUR. Over the course of 2022, over 120,000 new trees are set to be planted on an area of approximately 30 hectares within the Svobodnensky district. The first batch of seedlings were planted in the vicinity of Dubobka village, in Svobodny city.

Russia has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. While Russia has taken some action to reforest degraded ecosystems, it has not yet actively planted a significant number of trees in degraded ecosystems.

Thus, Russia receives a score of 0.

to create a national genetic data bank for plant genes.⁴⁵⁴⁹ This initiative aims to increase research cooperation on perennial and endangered plants in order to better understand how to preserve such species from extinction and to reproduce and grow them in their natural habitats.

On 1 December 2021, the Ministry of Environment, Water and Agriculture signed a cooperation agreement with the UN Convention to Combat Desertification to implement the Global Initiative on Reducing Land Degradation and Enhancing the Conservation of Terrestrial Habitats.⁴⁵⁵⁰ As part of the agreement, financial assistance will be granted to efforts to halve degraded land by 2040.

On 9 February 2022, Saudi Arabia and Pakistan signed a memorandum of understanding to increase cooperation in various environmental protection initiatives.⁴⁵⁵¹ The memorandum focuses on enhancing joint action in generating green cover, combating land degradation and desertification through planting trees as well as preserving natural resources and biodiversity.

In April 2022, Saudi Arabia announced the development of 24 national greening initiatives.⁴⁵⁵² The initiative will see the planting of 500 million trees between 2023 and 2036.

Saudi Arabia has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Although Saudi Arabia has voiced its intention to plant trees to combat land degradation and has increased both domestic and international partnerships in support of such efforts, Saudi Arabia has not yet actively planted a significant number of trees domestically and abroad.

Thus, Saudi Arabia receives a score of 0.

South Africa: 0

South Africa has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 3 November 2021, the Department of Forestry, Fisheries and the Environment launched a national call to corporate organizations, governmental institutions, non-governmental organizations, community-based organizations, educational institutions and interested individuals to participate in the Ten Million Trees Programme.⁴⁵⁵³ This campaign includes requests for people to plant trees to receive certificate rewards indicating their contribution. The Ten Million Trees Programme aims to plant at least two million trees in South Africa annually over a period of five years.⁴⁵⁵⁴

On 24 November 2021, Minister of Forestry, Fisheries and the Environment Barbara Creecy spoke at the Annual General Meeting of the Custodians of Professional Hunting and Conservation South Africa.⁴⁵⁵⁵ Minister Creecy stated that the Government of South Africa intends to increase conservation estates by half a per cent per annum and recognized that as of November 2021, 16 per cent of land and five per cent of the sea in South Africa is protected under conservation.

On 20 February 2022, Minister Creecy announced an extension to the Harold Porter National Botanical Garden.⁴⁵⁵⁶ This extension of protected land strengthens conservation efforts of the natural wetland habitat, which is located in the center of a coastal fynbos region.

On 12 April 2022, the Ministry of Forestry, Fisheries and the Environment released a draft of the National Biodiversity Offset Guideline for public consultation.⁴⁵⁵⁷ The new Guideline is aimed at counterbalancing consequences on biodiversity that remain even after efforts to minimize impacts and rehabilitate affected areas have been conducted. The new Guideline would strengthen biodiversity offset practices in South Africa in order to avoid major biodiversity loss and environmental degradation in South Africa.

On 13 April 2022, Deputy Minister of Forestry, Fisheries and the Environment Makhotso Sotyú hosted a meeting with counterparts from Mozambique and Zimbabwe on the collaborative management of the Great Limpopo Transfrontier Conservation Area.⁴⁵⁵⁸ The meeting included discussions on harmonizing environmental management procedures across international borders.

On 22 May 2022, Minister Creecy hosted the launch ceremony of the Thohoyandou National Botanical Garden as part of the International Day for Biodiversity.⁴⁵⁵⁹ The aim of this new botanical garden is to support local communities while ensuring that South Africa's natural ecosystems are conserved and protected.

On 20 September 2022, Deputy Minister of Forestry, Fisheries, and the Environments, Makhotso Sotyú, announced that she will be leading the tree planting efforts for National Arbor Month Campaign on 22 September 2022.⁴⁵⁶⁰ The campaign's aim is to sensitize "South Africans about the need to conserve, protect and plant trees for environmental and human related ideals." This year theme is "Forests and Sustainable Production and Consumption" which focuses on the sustainable development and forest management in South Africa.

Turkey: +1

Turkey has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, Turkey endorsed the Glasgow Leaders' Declaration on Forests and Land Use.⁴⁵⁶¹ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 11 November 2021, the Ministry of Agriculture and Forestry announced an initiative to plant 252 million saplings by the end of the year.⁴⁵⁶² It is expected that by the end of 2023, 7 billion saplings will be planted and 30 per cent of the country's surface area will be covered with forests.

On 30 December 2021, Minister of Agriculture and Forestry Bekir Pakdemirli announced the accomplishment of planting the 252 millionth sapling as promised in an announced goal from November 2021.⁴⁵⁶³

On 20 January 2022, the Ministry of Agriculture and Forestry announced a new program for the protection of forests and nature in the annual performance program evaluation.⁴⁵⁶⁴ The purpose of the program is the conservation and development of forests, natural life and natural assets with a goal of 23.24 million hectares of forests during 2022.

On 16 March 2022, the Ministry of Agriculture and Forestry's General Directorate of Agricultural Reform announced the IPARD III program with approval from the European Commission.⁴⁵⁶⁵ The program allocates almost EUR555 million to address agricultural concerns. One concern is specifically focused on combating land erosion and issues with biodiversity loss.

On 25 April 2022, the Ministry of Agriculture and Forestry's General Directorate of Forestry was awarded the Institutional Achievement Award by the Mediterranean Parliamentary Assembly (Akdeniz-PA) for successful afforestation projects over the past year.⁴⁵⁶⁶

On 16 May 2022, Minister of Agriculture and Forestry Vahit Kirisci announced a new technology-intensive strategy for fighting forest fires in 2022.⁴⁵⁶⁷ This new strategy increased the number of helicopters from 39 to 55, aircraft from three to 20 and unmanned aerial vehicles from four to eight.

On 19 May 2022, Minister Kirisci met with Azerbaijan's Minister of Emergency Situations and both agreed that Turkey and Azerbaijan should further increase bilateral cooperation for fighting forest fires.⁴⁵⁶⁸

On 19 September 2022, the Minister of Agriculture and Forestry Vahit Kirisci attended the opening of the Agriculture Park Project.⁴⁵⁶⁹ Funding of TKY17.5 million is allocated to the park project to fund improvement work, farmer training and agricultural production

Turkey has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. Turkey has focused on domestic policies and goals such as planting saplings and increasing forestry as well as prioritizing funding for agriculture and land cover. Turkey has also collaborated with other countries such as Azerbaijan on relevant issues such as fighting forest fires.

Thus, Turkey receives a score of +1.

“support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁵⁷²

On 2 November 2021, the UK joined other countries in announcing an initial collective pledge of at least USD1.5 billion of financing between 2021 and 2025 to support the Congo Basin forests, peatlands and other critical global carbon stores.⁴⁵⁷³

On 2 November 2021, the UK signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue to promote sustainable agricultural development and forest management.⁴⁵⁷⁴

On 2 November 2021, the UK advanced support for Indigenous Peoples’ and Local Communities’ Tenure Rights and their Forest Guardianship at COP26.⁴⁵⁷⁵ As part of the released Joint Donor Statement, the endorsing countries and organisations announced an initial collective pledge of USD1.7 billion from 2021 to 2025 to support the advancement of Indigenous Peoples’ and local communities’ forest tenure rights and greater recognition and rewards for their role as guardians and defenders of tropical forests.

On 10 November 2021, the UK’s new Environment Act was passed into law.⁴⁵⁷⁶ The Environment Act gives the government new powers in fighting against illegal deforestation and the protection of rainforests while also strengthening woodland protection enforcement measures by introducing due diligence and reporting obligations in relation to “forest risk commodities.”

On 27 November 2021, the UK announced GBP12 million in funding through the Nature for Climate Fund for four funds supporting tree planting efforts.⁴⁵⁷⁷ The four funds include the Local Authority Treescapes Fund, the Urban Tree Challenge Fund, the Woods into Management Forestry Innovation Funds and the Tree Production Innovation Fund.

On 27 November 2021, the UK announced the creation of the new Cumbria community forest that will cover up to 150 hectares.⁴⁵⁷⁸

On 6 December 2021, the Deputy Climate Change Minister of Wales Lee Waters announced that one free tree will be offered to every household in Wales. This amounts to 1.3 million trees at a cost of GBP2 million.⁴⁵⁷⁹

On 6 January 2022, the UK unveiled two new environmental land management schemes: bringing up to 60 per cent of the UK's agricultural soil under sustainable management by 2030 and restoring up to 300,000 hectares of wildlife habitat by 2042.⁴⁵⁸⁰

On 25 January 2022, the UK launched a new drive to encourage farmers and landowners to plant and manage more trees.⁴⁵⁸¹ The grant schemes will offer funding of over GBP10,000 for every hectare of woodland created.

On 9 February 2022, the UK-Kenya Strategic Partnership announced the launch of a program of funding opportunities for nature-based solutions projects in Kenya.⁴⁵⁸² The total value of the program is KSH800 million.⁴⁵⁸³

On 23 May 2022, the UK Government signed a new agreement on plant health and biosecurity with 29 organizations, including the Royal Horticultural Society, National Farmers Union and Tree Council.⁴⁵⁸⁴ The Accord will spread awareness to civilians to not bring home plants, trees, fruit and seeds from overseas, because doing so may accidentally allow pests, diseases and invasive species to enter the UK. Alongside this, an awareness campaign will also ensure that members of the public understand how to report sightings of pests and diseases.

On 31 May 2022, the Department for Environment, Food and Rural Affairs as well as the Environment Agency announced the winners of the second round of the Natural Environment Investment Readiness Fund. This provides grants up to GBP100,000 to environmental groups and other organizations for environment-related project development.⁴⁵⁸⁵ One project winner focuses on tree planting and brownfield land regeneration in the Liverpool City Region.

⁴⁵⁸⁵ 50 projects receive up to £100,000 to boost investment in nature, Department for Environment, Food and Rural Affairs (London) 31 May 2022. Access Date: 12 June 2022. <https://www.gov.uk/government/news/50-projects-receive-up-to-100000-each-to-boost-investment-in-nature>

On 2 June 2022, the UK Government convened an event titled “Financing the Transition to a Nature Positive Future” during the UN-led Stockholm+50 meeting.⁴⁵⁸⁶ During this event, the UK Government announced a grant of GBP330 million to the Global Environment Facility (GEF), which will go towards assisting developing countries to tackle environmental issues.

On 16 June 2022, the UK Government launched the Woodland Creation Accelerator Fund with GBP7.8 million in funding.⁴⁵⁸⁷ This Fund aims to provide financial support to over 50 local governments so they can seek professional expertise for tree planting initiatives. Successful applicants to the fund will receive up to GBP150,000, as part of the Nature for Climate Fund.

On 5 August 2022, the UK Government allocated GBP44.2 million in funding for community forests and woodland creation partners as part of the Nature for Climate Fund.⁴⁵⁸⁸ Around 2,300 hectares of trees will be planted this year across England’s 13 community forests such as the Humber and Mersey Forests, the Northern Forest and the Great Northumberland Forest.

On 22 September 2022, the UK Government allocated GBP1.2 million in funding to a new Seed Sourcing Grant in order to increase domestic tree seed production and green jobs as well as to diversify seed supply.⁴⁵⁸⁹ This grant aims to boost the number and quality of tree seed sources in England.

On 3 October 2022, the UK Partnering for Accelerated Climate Transitions (UK PACT) launched a project in Mexico to assist coffee-producing communities in Veracruz to combat the effects of climate change by planting tree species that will conserve local ecosystem biodiversity.⁴⁵⁹⁰ This project also focuses on raising awareness about the role of women in agriculture and forestry, especially in the Coatepec region.

The United Kingdom has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. The United Kingdom has taken strong action by planting a significant number of trees in degraded lands, both domestically and internationally. By both supporting and organizing international forums for cooperation on this commitment, most notably the UN Climate Change Conference in Glasgow, funding domestic and international projects in reforestation, forest sustainability and carbon sinks, the United Kingdom has fully complied with its commitments to planting trees, focusing on the most degraded ecosystems on the planet.

Thus, the United Kingdom receives a score of +1.

United States: 0

The United States has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, the US endorsed the Glasgow Leaders' Declaration on Forests and Land Use at the 2021 United Nations Climate Change Conference (COP26).⁴⁵⁹¹ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 2 November 2021, the US signed onto a new Global Forest Finance Pledge at COP26.⁴⁵⁹² Collectively with 12 donor countries, this pledge provides USD12 billion between 2021 and 2025 to “support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁵⁹³

On 2 November 2021, the US signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 26 other countries and the European Union, to promote sustainable agricultural development and forest management.⁴⁵⁹⁴ The statement is part of the dialogue's roadmap of actions, with four “overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation.”

On 2 November 2021, the US signed onto the Congo Basin Joint Donor Statement along with 11 other countries and philanthropic donors.⁴⁵⁹⁵ As part of this statement, at least USD1.5 billion between 2021 and 2025 is collectively pledged to “support ambitious efforts and results in the region to protect and maintain the Congo Basin forests, peatlands and other critical global carbon stores.”

On 2 November 2021, the US advanced support for Indigenous Peoples' and Local Communities' Tenure Rights and their Forest Guardianship at COP26.⁴⁵⁹⁶ As part of the released Joint Donor Statement, the endorsing countries and organisations announced an initial collective pledge of USD1.7 billion from 2021 to 2025 to support the advancement of Indigenous Peoples' and local communities' forest tenure rights and greater recognition and rewards for their role as guardians and defenders of tropical forests.

National Forest.⁴⁵⁹⁷ The 2020 Alaska Roadless Rule originally exempted the Tongass National Forest from the 2001 Roadless Rule, which prohibited road construction and timber harvests, so the repeal would allow millions of acres of forest land to be protected again from construction and logging.

On 2 January 2022, the Department of Energy announced up to USD10 million in funding for small businesses developing new energy technologies to reduce the effect of energy consumption and its environmental impacts.⁴⁵⁹⁸

On 1 April 2022, the Department of Transportation announced its initiative to significantly change domestic fuel economy standards in an effort towards putting more environmentally friendly vehicles on the road by 2026.⁴⁵⁹⁹ Automakers will be required by the new standards to increase the corporate average fuel economy of fleets to 49 mpg (miles-per-gallon) from 37 mpg. With this new shift, the United States strengthens actions towards combatting climate change and land degradation by striking at non-fuel-efficient cars.

On 21 April 2022, the United States Army unveiled its first climate plan to slash its greenhouse gas emissions in half by 2030.⁴⁶⁰⁰ This is significant because the US Army currently accounts for 56 per cent of the Federal Government's carbon footprint. This drastic move will take sustainability and environmentally friendly practices into account when restructuring the army to reduce emissions and land degradation.

The United States has partially complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. While the United States has signed onto various declarations and pledges at COP26 and committed to protecting forests domestically, the United States has not taken strong actions to plant trees domestically or abroad.

Thus, the United States receives a score of 0.

Analyst: Jake Knight

European Union: +1

The European Union has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet.

On 2 November 2021, the European Commission on behalf of the EU endorsed the Glasgow Leaders' Declaration on Forests and Land Use at the 2021 United Nations Climate Change Conference (COP26).⁴⁶⁰¹ This Declaration recognizes the need to conserve forests, facilitate trade and development policies promoting sustainable development, implement or redesign agricultural policies to incentivise sustainable agriculture, increase funding for sustainable forest management and

restoration projects and facilitating international financial flows to reverse forest loss and land degradation.

On 2 November 2021, the European Commission on behalf of the EU signed onto a new Global Forest Finance Pledge at COP26.⁴⁶⁰² Collectively with 12 donor countries, this pledge provides USD12 billion between 2021 and 2025 to “support action in developing countries, including restoring degraded land, tackling wildfires and advancing the rights of Indigenous Peoples and local communities.”⁴⁶⁰³

On 2 November 2021, the European Commission on behalf of the EU signed onto the Congo Basin Joint Donor Statement along with 11 other countries and philanthropic donors.⁴⁶⁰⁴ As part of this statement, at least USD1.5 billion between 2021 and 2025 is collectively pledged to “support ambitious efforts and results in the region to protect and maintain the Congo Basin forests, peatlands and other critical global carbon stores.”

On 2 November 2021, the EU signed the joint statement of the ongoing Forests, Agriculture and Commodity Trade dialogue along with 27 other countries, to promote sustainable agricultural development and forest management.⁴⁶⁰⁵ The statement is part of the dialogue’s roadmap of actions, with four “overall objectives: trade and market development; smallholder support; traceability and transparency; and research, development and innovation.”

On 15 November 2021, the European Union, European Bank for Reconstruction and Development and Austria began planting 1000 trees in six Western Balkan countries as part of the Green Economy Financing Facility program.⁴⁶⁰⁶ Over the past week, lime trees in Podgorica, Montenegro, and white pine trees in Sarajevo, Bosnia and Herzegovina, have been planted, with the campaign continuing for several more weeks in Albania, Kosovo, North Macedonia and Serbia.

On 17 November 2021, the European Commission presented a new Soil strategy for 2030.⁴⁶⁰⁷

On 17 November 2021, the European Commission proposed a regulation on deforestation-free products.⁴⁶⁰⁸

On 17 November 2021, the European Commission proposed a new regulation on waste shipments.⁴⁶⁰⁹

On 23 November 2021, the European Parliament approved the reformed Common Agricultural Policy (CAP) aligning with the European Green Deal.⁴⁶¹⁰ It was determined that there will be more transparency and better compliance with labour rules, and more support for small farms and young farmers, including a crisis reserve with an annual budget of EUR450 million.

On 9 December 2021, the European Commission and the European Environment Agency jointly launched MapMyTree, a data tool for all organizations to join the EU's pledge of planting three billion more trees by 2030 by registering and mapping their planted trees to count within the EU's goal.⁴⁶¹¹

On 7 January 2022, the European Citizens' Panel held in Warsaw, Poland, collected European citizens' opinions on ways to fight climate change and protect the environment among other things.⁴⁶¹²

On 17 January 2022, the European Union announced the Soil Health Law proposal in the EU soil strategy for 2030.⁴⁶¹³

On 5 February 2021, the Committee on Environment, Public Health and Food Safety (ENVI) adopted the resolution of a World Trade Organization-compatible EU carbon border adjustment mechanism (CBAM), placing a carbon price on imports from "less climate-ambitious" countries.⁴⁶¹⁴

On 10 February 2022, ENVI declared its position on battery product governing and regulation.⁴⁶¹⁵ The final agreement includes increasing battery sustainability, holding the battery industry to be more accountable and an increased ambition for waste management.

On 17 February 2022, the European Parliament approved new distance-based road charging rules for trucks reflecting the "polluter pays principle" which charges for actual kilometers driven.⁴⁶¹⁶ The new rules are aimed toward reducing greenhouse gas emissions in the European Union.

On 17 February 2022, the European Commission invested over EUR110 million into LIFE programme projects for environmental and climate protection in 11 EU countries (Cyprus, Czechia, Denmark, Estonia, Finland, France, Latvia, Lithuania, the Netherlands, Poland and Slovenia).⁴⁶¹⁷ One

project, focused on nature conservation, will set up three pilot forest areas in the Grand Est region of France in order to reverse biodiversity loss and assist the EU's Biodiversity Strategy for 2030.

On 10 March 2022, the European Parliament adopted EU environmental objectives until 2030, aiming at setting a deadline for the phase out of fossil fuel subsidies and identifying other environmentally harmful subsidies by 2023.⁴⁶¹⁸ The new objectives also specifically highlight the protection, conservation and restoration of biodiversity.

On 15 March 2022, the European Parliament adopted the report on the European Union External Action's Climate Change and Defence Roadmap.⁴⁶¹⁹ Members of the European Parliament (MEPs) in the Foreign Affairs Committee recognized that climate change must be highlighted in peace and security agendas and have called for the climate-security nexus to be prioritized in the UN-EU Strategic Partnership on Peace Operations and Crisis Management.

On 17 May 2022, the European Parliament's Economic and Monetary Affairs Committee adopted a negotiation position on the Regulation on European green bonds.⁴⁶²⁰ Previously there was no uniform green bond standard within the EU. The new European Green Bond Standard aims to ensure that European companies can benefit from green financing and that investors will find the green investments they wish to commence environmental projects.

On 19 May 2022, the European Commission awarded a Vocational Education and Training (VET) Excellence Award to the Veteran Tree Management Skills Certification Project led by Stiftelsen Pro Natura.⁴⁶²¹ This Swedish project focuses on increasing the standards for caring for trees considered important for nature conservation, landscapes or cultures.

On 15 June 2022, the European Commission placed the EU's firefighting fleet ready to combat forest fires in 2022.⁴⁶²² The fleet is located in Croatia, France, Greece, Italy, Spain and Sweden with 12 airplanes and one helicopter ready for deployment to save lives and forests.

On 22 June 2022, the European Parliament adopted the position on revising the Emissions Trading Scheme (ETS), implementation of carbon leakage instruments, and funding to ensure a fair energy transition.⁴⁶²³

On 22 June 2022, members of the European Parliament (MEPs) adopted the position on a European Commission proposal to establish a Social Climate Fund (SCF) to support the MEPs' call for transitioning towards climate neutrality in a socially just way, investing in energy efficiency,

⁴⁶²³ Green Deal: key to a climate-neutral and sustainable EU, European Parliament (Strasbourg) 22 June 2022, updated on 23 June 2022. Access Date: 4 September 2022. <https://www.europarl.europa.eu/news/en/headlines/society/20200618STO81513/green-deal-key-to-a-climate-neutral-and-sustainable-eu>

decarbonization, sustainable transport and setting up national “Social Climate Plans” to deal with mobility and energy poverty.⁴⁶²⁴

On 22 June 2022, the European Parliament introduced the world’s first Carbon Border Adjustment Mechanism (CBAM); this agrees to phase CBAM from 2027 and ends free allowances in European Union Emissions Trading Systems (ETS) by 2032.⁴⁶²⁵

On 24 June 2022, the European Parliament adopted the EU Climate Law, which made the target of reducing emissions fifty-five percent by 2030 and climate neutrality by 2050.⁴⁶²⁶ This law moved the European Union closer to its objective of negative emissions.

On 12 July 2022, the European Parliament’s Environment, Public Health and Food Safety Committee adopted its position on halting European Union driven global deforestation over the Commission proposal for a regulation on deforestation-free products.⁴⁶²⁷

On 13 July 2022, MEPs voted to agree that the share of renewable energy is to be raised to 45 per cent by 2030, raising energy savings targets to 40 per cent in final energy consumption and 42.5 per cent in primary energy consumption, and revised two laws targeting climate change and energy security.⁴⁶²⁸

On 6 October 2022, the European Parliament released a briefing outlining sustainable carbon cycle.⁴⁶²⁹ This briefing reiterates the importance of natural carbon sinks and affirms the European Parliament and Council’s commitment to protecting and restoring natural carbon sinks.

The European Union has fully complied with its commitment to collectively plant one trillion trees, focusing on the most degraded ecosystems in the planet. The European Union has taken strong actions on its commitment to combat land degradation, and actively engages in a variety of initiatives to improve its environment both in European Union member states as well as other parts of Europe.

Thus, the European Union receives a score of +1.

Background

At the 2009 Pittsburgh Summit, issues of environmental protection first gained prominence as the leaders affirmed the responsibility “to secure our future through sustainable consumption, production and use of resources that conserve our environment and address the challenge of climate change.”⁴⁶³⁰

Similar commitments, highlighting the interplay of social, economic and environmental dimensions of sustainability, were made at the consequent summits, including the Cannes, Saint Petersburg, Brisbane, Hangzhou, Hamburg and Osaka meetings.

At the 2021 Rome Summit the G20 leaders recognized “the efforts made by a number of countries to adhere to the Leaders’ Pledge for Nature and to ensure that at least 30 per cent of global land and at least 30 per cent of the global ocean and seas are conserved or protected by 2030,” while encouraging more countries to make similar commitments.⁴⁶³¹ The leaders followed up with a pledge to “end overfishing, deliver on our commitment to end illegal, unreported and unregulated fishing, and combat

⁴⁶³¹ Leaders’ Pledge for Nature, 26 September 2020. Access Date: 13 December 2021. https://www.leaderspledgefornature.org/wp-content/uploads/2021/06/Leaders_Pledge_for_Nature_27.09.20-ENGLISH.pdf

crimes that affect the environment such as illegal logging, illegal mining, illegal wildlife trade and illegal movement and disposal of waste and hazardous substances.”⁴⁶³²

Commitment Features

The commitment requires the G20 members to take actions aimed at conservation, protection and sustainable use of natural resources.

“Conservation” is defined as “the management of human use of organisms or ecosystems to ensure that such use is sustainable.”⁴⁶³³

“Environmental protection” refers to any activity to maintain or restore the quality of environmental media through preventing the emission of pollutants or reducing the presence of polluting substances in environmental media. It may consist of:

- changes in characteristics of goods and services,
- changes in consumption patterns,
- changes in production techniques,
- treatment or disposal of residuals in separate environmental protection facilities,
- recycling, and
- prevention of degradation of the landscape and ecosystems⁴⁶³⁴

“Sustainability” is defined as “use of the biosphere by present generations while maintaining its potential yield (benefit) for future generations.”⁴⁶³⁵

Thus, for the purposes of this assessment, the commitment is split into three sections:

- Environmental conservation,
- Environmental protection,
- Sustainable use of natural resources.

To achieve full compliance a G20 member must take strong action in all three sections.

Partial compliance is awarded if a G20 member takes action in one or two sections or weak action in all three sections. Failure to take action aimed at conservation, protection and sustainable use of natural resources results in non-compliance.

Scoring Guidelines

-1	The G20 member fails to take action aimed at conservation, protection and sustainable use of natural resources.
0	The G20 member takes action in one or two of the following categories: conservation, protection and sustainable use of natural resources.
+1	The G20 member takes action aimed in all three of the following categories: conservation, protection and sustainable use of natural resources.

Compliance director: Alexander Ignatov

Lead analyst: Andrei Sakharov

Argentina: +1

Argentina has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 17 November 2021, the Ministry of Agriculture, Livestock and Fisheries announced the launch of a national sustainable aquaculture development program which ensures sustainable use of resources (soil, water, aquatic organisms) and optimizes the economic benefits.⁴⁶³⁶

On 3 December 2021, the Ministry of Environment and Sustainable Development organized wildlife conservation days which seeks to provide a space for the exchange of experience with the analysis of the challenges of public policies aimed at the construction of an integrated strategy.⁴⁶³⁷

On 22 December 2021, the Ministry of Environment and Sustainable Development presented the National Strategy for Sustainable Consumption and Production that seeks to promote the decoupling of economic growth from environmental degradation and resource-intensive use towards a just transition. Key strategic areas include resource efficiency; pollution reduction; sustainable consumption and lifestyles; innovation and knowledge; public leadership; and information and awareness.⁴⁶³⁸

On 5 January 2022, Chief of the Cabinet of Ministers Juan Manzur together with Minister of Environment and Sustainable Development Juan Cabandí and Minister of Energy Dario Martínez discussed the start of hydrocarbon exploration in the northern part of the Argentinean basin. This initiative aims to intensify the development of strategic activities in order to meet the growing demand for energy complying with all environmental protection standards.⁴⁶³⁹

On 18 January 2022, President Alberto Fernández led an event in the city of San Juan to establish the “National Renewable Energy Cluster.” This public private institution will promote the production of

renewable energy goods, technologies and services to facilitate the country's sustainable energy transition.⁴⁶⁴⁰

On 19 January 2022, Minister Cabandí, participated in the launch of the National Renewable Cluster to expand electricity supply and care for the environment. Forming a cluster to build future solar parks is said to increase the share of renewable energy in energy matrix as part of the commitment Argentina have made to the energy transition.⁴⁶⁴¹

On 7 February 2022, Chief Mansur together with Governor of San Juan Sergio Uñac, and the President of Yacimientos Petrolíferos Fiscales Pablo González, announced the launch of the Zonda solar park, which will have a capacity of 300 megawatts. The project is said to attract investments worth ARS90 million.⁴⁶⁴²

On 15 February 2022, Chief Mansur held a working meeting to monitor the implementation of the National Plan of Forestation. An initiative through which 100 million trees would be planted throughout the country aims to promote environmental care and awareness.⁴⁶⁴³

On 3 February 2022, the Ministry of Environment and Sustainable Development introduced a programme to support indigenous people who conserve natural ecosystems in their territories. It aims to build capacity and provide resources so that communities can be aware of the values of biodiversity in their territories, develop management plans for its conservation and sustainable use, as well as facilitate the commercialization of products and promote community tourism.⁴⁶⁴⁴

On 9 March 2022, the Ministry of Environment and Sustainable Development, together with the National Parks Administration and the Federal Council for the Environment, held the Environment+Diverse meeting. It was designed to disseminate the environmental agenda with a gender and diversity perspective through six priority areas: biodiversity, native forests, protected areas, climate change, environmental education and circular economy and waste.⁴⁶⁴⁵

On 4 May 2022, the National Government formalized the creation of an "Inter-institutional Roundtable on Offshore Activities in the Argentinean Sea", to coordinate actions on the various

projects under study related to hydrocarbon exploration. It allows the country to expand its production capacity and boost its economy with an impact on its energy matrix in a sustainable manner.⁴⁶⁴⁶

On 17 August 2022, the Ministry of Environment and Sustainable Development led by Juan Cabandié, extended the validity of the National Strategy on Biodiversity and Action Plan 2016-2020 for the period 2021-2024, until the new framework on biological diversity is approved at the international level for Argentina to adopt measures in accordance with the commitments it assumes.⁴⁶⁴⁷

On 5 September 2022, the Ministry of Environment and Sustainable Development presented the project “Multiple Environmental Actions Program for the Promotion of the Sustainable Development Goals in Argentina”, during a workshop held earlier on that day. There, an initiative was announced that seeks to increase the systematization of publicly accessible environmental information and strengthen decision-making related to environmental issues.⁴⁶⁴⁸

On 27 September 2022, Minister of Environment and Sustainable Development of the Nation, Juan Cabandié, together with the Secretary of Environmental Control and Monitoring, Sergio Federovisky, presented large vehicles at the Tecnópolis site to strengthen the fight against forest fires throughout the country. The equipment includes 25 dump trucks — of which five are gas-powered —, 20 vans, four mobile camps that include bedrooms and bathrooms, and an emergency operations command truck (COE) that includes screens and Wi-Fi to plan the strategy in the affected territories. The vehicles will strengthen the equipment available to the National Fire Management Service, the National Parks Administration and 20 provinces.⁴⁶⁴⁹

Argentina has taken strong action in all three areas of the commitment: conservation, protection and sustainable use of natural resources. The Government launched a number of programs aimed at sustainable use of soil, water resources, fight against pollution and deforestation, introduction of greener technologies in production and treatment or disposal of residuals in separate environmental protection facilities.

Thus, Argentina receives a score of +1.

Analyst: Elena Alekseeva

Australia: +1

Australia has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 8 November 2021, the government informed that AUD1 million would be allocated to ensure better protection of Gunnedah's koalas. The package would be spent to safe koalas against drought and changing climate by means of ensuring access to water and bettering control of invasive weeds.⁴⁶⁵⁰

On 29 November 2021, the government announced that AUD1 million would be allocated to support land managers in Queensland's central region in replanting native vegetation, controlling weeds and improving grazing management.⁴⁶⁵¹

On 14 December 2021, the government ordered to allocate AUD13.5 million to facilitate recycling in New South Wales region. Allocated funds would be distributed in the form of grants open for local applicants to develop innovative recycling solutions.⁴⁶⁵²

On 20 December 2021, the government released the updated 2050 Reef Plan. The Plan is designed as to protect the Grand Barrier Reef in accordance with the Great Barrier Reef Outlook Report 2019.⁴⁶⁵³

On 29 January 2022, the government allocated AUD50 million extra funds to provide better protection for koalas. The package includes restoration of koala habitat, improving monitoring of koala populations and personnel training.⁴⁶⁵⁴

On 9 February 2022, the government announced that AUD11 million would be allocated as investments into recycling infrastructure in the Northern Territory region. New facilities would grant access to recycling opportunities in remote areas.⁴⁶⁵⁵

On 12 February 2022, the government presented a new five-years Action plan designed as to protect endangered species. The Plan underpins recovery of 100 priority endangered species across 20 priority areas. Also, it gives a lead to citizen science and community actions aimed to improve endangered species management.⁴⁶⁵⁶

On 13 February 2022, the government allocated another AUD50 million for the Emergency Response Fund as to improve local communities resilience against coastal natural disasters.⁴⁶⁵⁷

On 3 March 2022, Australia expressed public support of the adoption of the UN Environment Assembly resolution to get waste of plastic litter. An intergovernmental committee formed under the resolution would present an international legally binding instrument on plastic pollution by 2024.⁴⁶⁵⁸

On 4 March 2022, the government pledged to provide AUD5.5 million to protect the country's marine parks against illegal fisheries. Allocated funds would be spent on new electronic and vessel monitoring systems needed for commercial fishing boats to receive signals when encroaching sensitive marine areas.⁴⁶⁵⁹

On 8 March 2022, the government claimed that AUD250,000 from the National Heritage Grant program would be allocated to protect the cultural and natural values of the country's most ancient regions including the Willandra Lakes region and Mungo National Park.⁴⁶⁶⁰

On 15 March 2022, the government presented AUD128.5 million budget reform package to provide better environmental protection, stronger compliance and decision-making process. The package includes more funding to support 10 regional plans, streamlining assessment process and informed decision making.⁴⁶⁶¹

On 20 March 2022, the government established two new marine parks in the Indian Ocean – at Christmas Island and Cocos (Keeling) Islands. The two new parks cover 744,000 square kilometers. The offshore part of the area would be placed under the highest possible level of protection. As to support initial works, the Government allocated AUD5.4 billion through the Ocean's Leadership Package.⁴⁶⁶²

On 21 March 2022, the government announced allocation of AUD60 million extra funding to advance plastic recycling technologies boosting the Recycling Modernization Fund. The fund targets problematic plastics like bread bags and chip packets.⁴⁶⁶³

On 21 March 2022, the government announced three grants worth AUD20 million to support protection of threatened fish species and improve connectivity in Farrer, the Canberra region.⁴⁶⁶⁴

On 21 April 2022, the government imposed import restrictions aimed at protecting the local ecosystems against khapra beetle.⁴⁶⁶⁵

On 22 August 2022, the government announced its intention to invest AUD5 million on projects designed as to improve the country's biosecurity capabilities. Two projects that are said to be initiated in 2022 involve developing a proof-of-concept for a cheap, small diagnostic tool that employs nano-particle detection technology combined with a microneedle patch to detect the presence of exotic plant pathogens.⁴⁶⁶⁶

On 25 August 2022, the government presented the National Hitchhiker Plant Pest Action Plan 2022 - 2032. The plan is designed as to protect local vulnerable industries against exotic hitchhiking plant pests. Hitchhiking plant pests covered in this national action plan include the brown marmorated stink bug (BMSB), spongy moth, exotic bees, internal and external mites of bees, exotic snails and spotted lanternfly. The national action plan provides a nationally agreed approach on how to prevent, detect and respond to national priority hitchhiking plant pests and carriers of plant diseases.⁴⁶⁶⁷

On 7 October 2022, the government initiated public consultations on the National Soil Strategy Action Plan. The 20-years strategy adopted in May 2021 prioritizes public actions to improve the country's soils health by means of providing investment incentives, bettering soil data gathering, and knowledge sharing. The draft action plan outlines six priority actions for improving Australia's soil health and long-term soil security. The public consultations are said to last until 7 November 2022.⁴⁶⁶⁸

Australia has taken steps on all three components of the commitment: conservation, protection and sustainable use of natural resources.

Thus, Australia receives a score of +1.

Analyst: Alexander Ignatov

Brazil: +1

Brazil has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 31 October 2021, the government announced that it was committed to reducing greenhouse gas emissions by 50 percent by 2030 with an ultimate goal of reaching carbon neutrality by 2050 on the first day of the UN Climate Change Conference (COP26). Brazil also shared its plans to eliminate illegal deforestation in the country.⁴⁶⁶⁹ The explicit actions for the country to reach this goal are contained in the document "Guidelines for a National Strategy for Climate Neutrality," presented at the event. The publication includes the "National Plan for the Control of Illegal Deforestation and Recovery of Native Vegetation 2020-2023."⁴⁶⁷⁰

On 17 January 2021, the Ministry of Mines and Energy of Brazil affirmed the decision of the National Energy Policy Council to maintain the mandatory biodiesel content in diesel fuel at 10% throughout 2022. This policy is aimed at reducing carbon emissions resulting from the use of diesel fuel and

promote the clean bioenergy sector. It also acts as one of the staples of the Guidelines for a National Strategy for Climate Neutrality.⁴⁶⁷¹

On 18 January 2022, the Ministry of Mines and Energy of Brazil published a report on the importance of the building sector for energy consumption. The report, titled “Implementing the Paris Agreement and Reducing Greenhouse Gas Emissions Throughout the Life Cycle of Buildings: European Public Policies, Tools and Market Initiatives,” was prepared by the Buildings Performance Institute Europe in partnership with the Ministry. The study presents public policies developed to assist in the adoption of strategies and reduce the environmental impact of the building sector.⁴⁶⁷²

On 31 January 2022, the government announced the investment of BRL6 billion (USD1.14 billion) in energy and infrastructure in Rio de Janeiro. The investment includes the construction of the country’s largest natural gas-fired power plant as well as the expansion of road, railroad and port infrastructure. The primary objective of the whole investment project is the construction of the GNA II Thermoelectric Plant, which is expected to become be the biggest gas-fired thermal plant in the country and contribute to the Brazilian energy security, supplying energy to 14 million homes.⁴⁶⁷³

On 21 March 2022, the Ministry of Mines and Energy and the Ministry of the Environment launched a set of incentive measures for the production and sustainable use of biomethane. The initiative contributes to the commitments made by the country during the United Nations Climate Change Conference. The document, signed by Brazil and more than a hundred other countries, provides for a global effort to reduce methane emissions by 30 per cent by 2030 in relation to the 2020 levels. The Ministry of the Environment’s Administrative Rule no. 71, dated 21 March 2022, establishes the National Program for Methane Emission Reduction and the Special Regime of Incentives for Infrastructure Development.⁴⁶⁷⁴

On 13 April 2022, the government issued the Decree No. 11.044 and launched the Certificate of Recycling Credit Program. The measure aims to provide an injection of estimated BRL14 billion (USD 2.96 billion) in private investment in the recycling of products and discarded packaging.⁴⁶⁷⁵

On 13 April 2022, President Jair Bolsonaro signed a Federal Decree No. 11.043, establishing the National Solid Waste Plan (Planares). The plan includes guidelines, strategies, actions and sets targets to modernize solid waste management in the country, in order to put into practice the objectives set

international unabated fossil fuel sector by the end of 2022, except in limited and clearly defined circumstances that are consistent with the 1.5°C warming limit and the goals of the Paris Agreement.⁴⁶⁸⁰

On 12 November 2021, Innovative Solutions Canada launched a new challenge led by Natural Resources Canada to modernize tree seedling production and make tree planting more cost-efficient and sustainable.⁴⁶⁸¹

On 18 November 2021, Minister of Natural Resources Jonathan Wilkinson announced that after one year of its launch, the Emissions Reduction Fund (ERF) Onshore Program is making major strides in reducing methane emissions by helping oil and gas companies adopt clean technologies while maintaining jobs in the sector. The ERF was launched in fall 2020 as a COVID-19 response measure to maintain employment and support oil and gas workers and local communities during the pandemic. Small and medium-sized companies as well as communities across Western Canada including Estevan, Saskatchewan; Brandon, Manitoba; and Slave Lake, Alberta, where projects are underway, have been able to benefit directly from this program.⁴⁶⁸²

On 1 December 2021, Minister Wilkinson announced a new call for expressions of interest to support low-carbon fuels research, development and demonstration projects, further advancing Canada's competitiveness as markets shift to more sustainable, low-carbon operations. The intent of the expressions of interest is to provide research funding to help industry address its emissions in hard-to-abate sectors, including iron and steel, chemicals and fertilizers, smelting and refining, and cement — which accounted for 11 per cent of Canada's total emissions in 2019. Selected projects are expected to reduce GHG emissions in these sectors, leading to cleaner air and water, better health outcomes for Canadians and improved community resiliency, while helping Canada reach its goal of achieving a net-zero economy by 2050.⁴⁶⁸³

On 27 January 2022, Minister Wilkinson, Member of Parliament for Ottawa Centre Yasir Naqvi and Member of Parliament for York Centre Ya'ara Saks announced a combined investment of over CAD500,000 to two organizations in Ontario to support zero-emission vehicle (ZEV) awareness projects. These projects will help Canadians know about the clean options available when choosing their next vehicle. EnviroCentre will receive a CAD283,500 investment to develop and launch an electric vehicle (EV) Test Drive Concierge Service that will arrange EV test drives in Ottawa and provide consumers with access to up-to-date, accurate information on EVs, available incentives, cost-analysis, comparison and environmental benefits. Plug'n Drive will receive a CAD225,000 investment to create and deliver virtual webinars and in-person test drive opportunities for ride-sharing and the delivery segments of transportation to help potential EV drivers understand their total cost of ownership and provide them with the tools to help them make the switch from gas to electric. Federal funding for both projects is provided through Natural Resources Canada's Zero-Emission Vehicle

Awareness Initiative, supporting projects aiming to increase awareness, knowledge and public confidence in ZEVs and public charging and refuelling infrastructure.⁴⁶⁸⁴

On 3 February 2022, Minister Wilkinson announced an investment of CAD887 thousand to support the replacement of the Duchesnay Creek Bridge that connects the City of North Bay and the Nipissing First Nation. The Government of Ontario contributed CAD17 million as to promote the use of mass timber in highway bridges across Canada. By building with wood, this project will result in a total carbon benefit of 991 metric tonnes of CO₂, which is equivalent to taking over 190 cars off the road for a full year.⁴⁶⁸⁵

On 30 March 2022, at GLOBE Forum 2022, Minister Wilkinson announced a combined investment of over CAD12 million to seven organizations that are advancing emerging clean technologies to grow our economy and help Canada meet its environmental targets.⁴⁶⁸⁶

On 6 April 2022, Minister Wilkinson announced a more than CAD1 million investment in Newfoundland Power Inc. to install 38 electric vehicles (EV) chargers in Newfoundland and Labrador. The chargers are part of the takeCHARGE network, a joint initiative between Newfoundland Power Inc. and Newfoundland and Labrador Hydro.⁴⁶⁸⁷

On 25 April 2022, Minister Wilkinson announced CAD300 million investment toward capacity-building initiatives that communities can now apply for on the Clean Energy in Indigenous, Rural and Remote Communities website, and applications will be reviewed on an on-going basis.⁴⁶⁸⁸

On 7 June 2022, Minister Wilkinson, announced an investment of over CAD2.4 million to Trees for Life. With this funding, Trees for Life will engage partners and collaborators on 34 different tree-planting projects. These projects will range in size, style and scope and, working in different communities and ecosystems, will plant approximately 600,000 trees in British Columbia, Alberta, Ontario, Quebec and New Brunswick this tree-planting season. Trees for Life is a national charity committed to mobilizing, empowering and inspiring tree-planting initiatives across Canada.⁴⁶⁸⁹

On 19 August 2022, Minister Guilbeault, announced an investment of more than CAD1 million over three years for the Bras d'Or Lake Biosphere Reserve in Cape Breton, which will receive CAD463 thousand, and the Southwest Nova Biosphere Reserve in southwestern Nova Scotia, which will receive CAD585 thousand. The funding, from Canada's Enhanced Nature Legacy program, will support

enhanced management of biodiversity conservation areas in Nova Scotia, with the goal of recognizing them as Other Effective Conservation Measures, to become part of Canada's conservation network and bring the country closer to meeting its target of protecting 25 per cent of lands and waters in Canada by 2025, while working towards 30 percent by 2030.⁴⁶⁹⁰

On 29 August 2022, Minister Guilbeault, announced nearly CAD30 million in funding for more than eighty First Nations, Inuit, and Métis Guardians initiatives across the country. These initiatives to address the twin crises of climate change and biodiversity loss are taking place from coast to coast to coast, providing benefits for Indigenous communities, the natural environment, and species at risk, including boreal caribou.⁴⁶⁹¹

On 1 September 2022, Minister Guilbeault announced an investment of more than CAD 926 thousand over four years to increase biodiversity conservation efforts in the Átl'katsem / Howe Sound Biosphere Region.⁴⁶⁹²

On 28 September 2022, Parliamentary Secretary to the Minister of Natural Resources and Parliamentary Secretary to the Minister of Environment and Climate Change Julie Dabrusin announced an investment of over CAD2.3 million to SWITCH Power Ontario Battery Operations Corporation to deploy vital energy storage infrastructure that will enable Ontario's energy market transformation. This investment with SWITCH Power brings the total investment to nearly CAD7.8 million.⁴⁶⁹³

Canada has taken steps on all three components of the commitment: conservation, protection and sustainable use of natural resources.

Thus, Canada receives a score of +1.

Analyst: Nikita Shilikov

China: +1

China has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 3 November 2021, the Central Committee and the State Council revealed an action plan on saving food. The plan aims to establish a standard and a monitoring system for cutting food loss and waste

by 2025, through such means as scientific innovation, raising public awareness, implementing new storage techniques, etc.⁴⁶⁹⁴

On 30 November 2021, China Petroleum and Chemical Corp, launched a project in Kuqa, Xinjiang Uygur autonomous region, building a green hydrogen plant, which would be powered entirely by solar energy. The project is expected to reduce carbon dioxide emissions by 485,000 tons annually after it becomes operational in 2022.⁴⁶⁹⁵

On 7 December 2021, the National Energy Administration announced that it would launch the second phase of the wind and solar power projects focusing on the Gobi Desert and other arid regions by 2022. The new power plants are expected to get connected to the grid by 2023-24, generating clean energy for the region.⁴⁶⁹⁶

On 21 January 2022, the National Development and Reform Commission released a plan on boosting the green transformation of consumption. The plan contains measures to stimulate green consumption through raising public awareness, curbing “extravagance and waste,” and enhancing market share of green and low-carbon products. The government plans to incorporate measures of energy saving and environmental protection in such areas as food, clothing, housing, transport, tourism and electricity consumption.⁴⁶⁹⁷

On 24 January 2022, the State Council released a comprehensive work plan for energy conservation and emission reduction, detailing the country’s efforts “to build and improve an economic structure conducive to green, low-carbon and circular development in its ongoing anti-pollution fight to achieve its carbon peak and neutrality goals” set to be reached by 2060. The plan is a part of the 14th five-year plan. It contains 10 measures aimed at energy conservation and emissions reduction, including improvements in building and infrastructure sectors, transport and logistics, curbing energy consumption, promoting green technologies, providing stimuli for industrial enterprises to improve waste pollution management and control, and dealing with waste accumulation. According to the plan, by 2025 China aims to reduce energy consumption per unit of gross domestic product by 13.5 percent from 2020 while keeping total energy consumption “at reasonable levels.”⁴⁶⁹⁸

On 29 January 2022, the Civil Aviation Administration issued a roadmap for green development during the 14th Five-Year Plan period (2021-2025). The plan set up targets to “make civil aviation smarter,

low-carbon and resource-efficient to achieve green transformation,” including by optimizing aircraft fuel consumption and reducing airport carbon emissions.⁴⁶⁹⁹

On 23 March 2022, the National Development and Reform Commission and the National Energy Administration released a plan on the development of hydrogen energy for the 2021-2035. The plan provides for the creation of a complete cycle hydrogen energy industry development system “with the innovation capability significantly improved and the core technologies and manufacturing processes basically mastered.”⁴⁷⁰⁰

On 24 May 2022, the General Office of the State Council issued an action plan on controlling new pollutants, including persistent organic pollutants, endocrine disruptors and antibiotics. The plan sets up a new management system which subjects chemical plants to rigorous inspections and monitoring to evaluate environmental risks and identify new high-risk pollutants. The plan also provides for the establishment and the improvement of the legal and regulatory framework on chemical-related environmental issues, as well as the upgrade of the technology standards system.⁴⁷⁰¹

On 30 May 2022, the State Council released a circular «on the implementation plan to promote the high-quality development of new energy in the new era», prepared by the National Development and Reform Commission and the National Energy Administration. The plan provides for the acceleration of the construction of a clean, low-carbon, safe and highly efficient energy system with the total installed electricity capacity of wind and solar power of 1.2 billion kilowatts by 2030.⁴⁷⁰²

On 28 July 2022, National Development and Reform Commission of China announced an allocation of RMB2.4 billion (USD355 million) to save energy and reduce carbon emissions as part of the country’s effort to transition to a greener economy. The allocation is aimed at supporting the low-carbon and energy-saving transformation for key areas and industries, technology innovation in areas like low carbon, zero carbon, carbon removal and energy saving, as well as the promotion of a circular economy.⁴⁷⁰³

On 19 September 2022, deputy head of the National Forestry and Grassland Administration Li Chunliang announced the Three-River-Source National Park would become the world’s largest national park system as a layout plan for the system would be released soon. The plan is drafted in accordance with the requirements of building a system with the largest scale of protection, the most diverse geographical features and the highest conservation value in the world.⁴⁷⁰⁴

On 30 September 2022, the State Council of the People's Republic of China announced the delivery of the first 2,000-metric-ton offshore wind-power installation platform for use in the Nansha district of Guangzhou, Guangdong province. According to the message, it is the first offshore wind-power installation platform that meets the fourth-generation standards of offshore wind equipment in China.⁴⁷⁰⁵

China has taken measures in all three of the following categories: conservation, protection and sustainable use of natural resources.

Thus, China receives a score of +1.

Analyst: Andrei Sakbarov

France: +1

France has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 8 November 2021, Minister of Ecological Transition Barbara Pompili presented 10 measures to promote the development of citizen renewable energies during the citizen renewable energy meetings. The package includes incentives for local communities for participating in nation-wide green energy and sustainable energy projects; nomination of a larger number of consultants to cooperate with regional governments on energy transition matters; implementation of a national informing campaign to promote grass-root green energy activities and create market demand for sustainable solutions, etc.⁴⁷⁰⁶

On 12 November 2021, the Ministry of Ecological Transition launched the National Landscape Grand Prize. Through the Grand Prix national du paysage, the Ministry of Ecological Transition intends to promote an innovative landscape approach at the scale of a territory. This must have given rise to concrete achievements in France or in a cross-border area. The rewarded approach would be the result of close collaboration between a contracting authority with an ambitious territorial will and an inventive and creative project management team in which the role of the landscape designer is central and preponderant.⁴⁷⁰⁷

On 17 November 2021, the presentation of the Natura 2000 Grands Prix was held at the mayors and local authorities fair. Every 2 years, this event aims to better promote and publicize the actions carried out on Natura 2000 sites, to promote exchanges between actors and to contribute to a dynamic of continuous improvement of tools and methods for the preservation of biodiversity.⁴⁷⁰⁸

On 10 December 2021, Minister Pompili went to meet companies and associations committed to the fight against waste. As of January 1, 2022, new measures of the anti-waste law for a circular economy will come into force, including the ban on the disposal of unsold non-food items for several types of products in particular clothing and footwear, electrical and electronic products, furniture, hygiene and

childcare products, food storage and cooking equipment, educational and leisure products, books and school supplies. Beginning from December 31, 2023, all products will be subject to this legislation.⁴⁷⁰⁹

On 14 December 2021, Minister Pompili revealed the winners of the ideas competition on reducing vulnerability to risk and urban renewal, entitled “Better planning for changing territories exposed to natural risks,” in the presence of representatives of the Plan Urbanisme Construction Architecture and Cerema. This competition aims to bring out innovative development projects to ensure the urban renewal of 9 pre-selected territories (Béziers, Dax, Marseille, Montereau, Saint-Etienne, Saint-Nazaire, Touques, Tours and Vernon), reducing their vulnerability and improving their resilience to natural hazards.⁴⁷¹⁰

On 5 January 2022, France Rénov’ became the only public service for energy renovation of housing. It simplifies the user journey and makes the financial aid that households can claim clearer.⁴⁷¹¹

On 19 January 2022, the Ministry for Ecological Transition and the State Secretariat for Digital Transition and Electronic Communications launched an awareness campaign on responsible digital technology.⁴⁷¹²

On 20 January 2022, Minister Pompili, Secretary of State for the Digital Transition and Electronic Communications Cédric O and Secretary General for Investment Guillaume Boudy, launched the call for expressions of interest Digital greening in the framework of the 4th Investments for the Future Program. The objective: to reduce the environmental footprint of all digital activities. The publication of the digital and environmental government roadmap on February 23, 2021, as well as the promulgation of the law of 15 November 2021 aimed at reducing the environmental footprint of digital technology in France, initiate society’s transition towards more virtuous use. and responsible for digital tools and opportunities. By relying on the economic opportunity that the development of eco-responsible digital product and service offers represents for different economic actors, France can accelerate this movement and provide itself with the means to reduce gas emissions in the long term.⁴⁷¹³

On 18 March 2022, Secretary of State for Biodiversity Bérangère Abba detailed the first pre-COP 15 component of the national biodiversity 2030 strategy. The objective of this strategy is to reverse the trajectory of biodiversity decline and to bring about profound changes in order to reduce pressures on biodiversity and restore ecosystems.⁴⁷¹⁴

France has taken strong actions on all three components of the commitment: conservation, protection and sustainable use of natural resources.

Thus, France receives a score of +1.

Analyst: Nikita Shilikov

Germany: +1

Germany has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 2 February 2022, the Environment and Consumer Protection Ministry (BMUV) announced the launch of four additional projects to protect wetlands and peatlands worldwide worth EUR32 million, including a regional project kicked off on 1 January 2022 to safeguard important carbon sinks, water reservoirs and biodiversity hotspots in the peatlands of the Congo Basin.⁴⁷¹⁵

On 22 February 2022, Minister for the Environment and Consumer Protection Steffi Lemke met with Polish Environment Minister Anna Moskwa. The ministers agreed to resume the work of the Programme Council of the Lower Oder Valley International Park. The Council is intended as a platform for discussing issues regarding the protection of the Oder river.⁴⁷¹⁶

On 3 March 2022, the BMUV announced the establishment of a Multi-Partner Trust Fund (MPTF) on Nature for Health with an initial contribution of EUR50 million from Germany's International Climate Initiative (IKI). The Fund will help countries achieve more holistic policymaking by creating further evidence of the links between biodiversity, climate and health, and support decision makers and relevant actors to take measures to prevent future pandemics. Through application of enhanced One Health approaches, the Fund aims to achieve improved policies and cross-sector collaboration.⁴⁷¹⁷

On 17 March 2022, the European Union (EU) environment ministers adopted the council position on the EU batteries regulation. It is intended to ensure more sustainable use of batteries along the entire value chain throughout the EU. A carbon footprint will be introduced for electric vehicle batteries and the replaceability of portable batteries improved. In addition, social and corporate due diligence obligations regarding the extraction of raw materials and more ambitious collection and recycling targets will be established.⁴⁷¹⁸

consultations. According to the declaration, Germany will support India's forest landscape restoration efforts via its International Climate Initiative (IKI).⁴⁷¹⁹

On 25 May 2022, Minister Lemke and US Environmental Protection Agency Administrator Michael Regan signed a joint declaration to expand cooperation on environmental issues. This cooperation covers the topics of natural climate protection, recycling management, marine protection, just transition, air pollution control, soil and water protection as well as the opportunities and risks that arise from digitalization for the environment.⁴⁷²⁰

On 22 August 2022, Germany joined the international High Ambition Coalition to End Plastic Pollution by 2040. This coalition will drive forward implementation of joint measures to develop an international legally binding instrument in this area.⁴⁷²¹

On 21 September 2022, German Federal Chancellor Olaf Scholz announced that Germany would make EUR1.5 billion available annually for international biodiversity conservation starting from 2025. This doubles the roughly EUR750 million per year that were invested on average from 2017 to 2021. The funds are part of an increase in the budget for international climate action to at least EUR6 billion per year by 2025.⁴⁷²²

Germany has taken measures in all three of the following categories: conservation, protection and sustainable use of natural resources.

Thus, Germany receives a score of +1.

Analyst: Andrey Shelepor

India: 0

India has partially complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 2 November 2021, Prime Minister Narendra Modi addressed the United Nations Climate Change Conference (COP26), announcing the country's goals of increasing non-fossil energy capacity to 500 gigawatts, while meeting about 50 per cent of its energy requirements from renewables by 2030; reducing carbon intensity of its economy by more than 45 percent by 2030, and reaching Net Zero by 2070.⁴⁷²³

On 6 November 2021, the Indian Delegation stated that while India represented 17 per cent of the global population, its historical cumulative emissions amounted to only 4 per cent, and annual

⁴⁷²³ National Statement by Prime Minister Shri Narendra Modi at COP26 Summit in Glasgow, Ministry of External Affairs of India (Delhi) 2 November 2021. Access Date: 2 February 2022. <https://www.mea.gov.in/Speeches-Statements.htm?dtl/34466/National+Statement+by+Prime+Minister+Shri+Narendra+Modi+at+COP26+Summit+in+Glasgow>.

greenhouse gas emissions to about 5 per cent at the COP26. The achievement of 24 per cent reduction in gross domestic product emission intensity in 2005-2014 was also noted, as well as 17-fold increase in India's solar energy generation capacity.⁴⁷²⁴

On 1 February 2022, Minister of Finance Nirmala Sitharaman presented the Budget 2022-2023, unveiling a set of government policies on sustainable development promotion. These included: measures to promote a shift to increased use of public transportation in urban areas, as well as supporting technology applications, such as electric vehicles; the allocation of additional funds to facilitate the domestic manufacturing of solar panels; a plan on circular economy transition; the introduction of 5-7 per cent biomass pellets to thermal power plants, which would allegedly result in carbon savings of 38 million metric tons annually.⁴⁷²⁵

India took action to promote sustainable use of natural resources, but no action referred to two other spheres of the commitment – conservation and protection.

Thus, India receives a score of 0.

Analyst: Andrei Sakharov

Indonesia: 0

Indonesia has partially complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 20 September 2021, Indonesia ended forest protection deal with Norway, raising deforestation fears. Under the USD1 billion payment-by-results deal signed in 2010, Norway agreed to pay the Indonesian government for curbing its emissions by conserving peatlands and forests. In a statement dated 10 September, Indonesia's foreign ministry said the decision was based "on the lack of concrete progress" in Norway delivering the money and followed "a series of thorough inter-ministerial consultations."⁴⁷²⁶

On 19 September 2021, President Joko Widodo ended a temporary freeze on new permits for palm oil plantations, in place since 2018, despite environmentalists' calls for it to be extended to protect the forests.⁴⁷²⁷ The moratorium ostensibly allowed the industry to address the problems of deforestation, land conflicts and labor abuses long associated with palm oil. Without the moratorium in place, Indonesia could potentially lose an area half the size of California to make way for new plantations. That's according to calculations by the non-governmental organization Forest Watch Indonesia, which carried out an analysis of government maps showing lands that are deemed suitable for conversion into plantations.⁴⁷²⁸

⁴⁷²⁴ India speaks on climate change from a position of strength and responsibility at the Facilitative Sharing of Views (FSV) of India's Third Biennial Update Report (BUR) at COP26, Indian Ministry of Environment, Forest and Climate Change (Delhi) 6 November 2021. ⁴⁷²⁸ 'Forests will disappear again,' activists warn as Indonesia ends plantation freeze, Mongabay 6 December 2021. Access Date: 31 March 2022. <https://news.mongabay.com/2021/12/forests-will-disappear-again-activists-warn-as-indonesia-ends-plantation-freeze/>

On 21 December 2021, the Industry Ministry reported it continued to pursue the implementation of green industries in the country, including by holding various activities to collaborate with industry players and other stakeholders, including academics. The collaboration aims to create an environment-friendly domestic industry with low-carbon emissions. As a result, 38 scientific papers were received from all regional work units in the Standardization Agency and Industrial Services Policy according to the six predetermined topics.⁴⁷²⁹

On 6 January 2022, the Ministry of National Development Planning/National Development Planning Agency stated that green investment in the circular economic system would create 4.4 million new job opportunities in Indonesia by 2030. Apart from creating job opportunities, the green investment scheme within the circular economic system would increase the national gross domestic product to reach IDR593 trillion (approximately USD40.91 billion) to IDR638 trillion (approximately USD 44.02 billion) by 2030.⁴⁷³⁰

On 6 January 2022, President Widodo said that more than 2,000 mining, plantation and forest-use permits have been revoked due to non-compliance or because they had been unused, tightening oversight of the nation's natural resources. The permits revoked include 1,776 in metals and minerals mining, 302 in coal mining, as well as in forestry and plantations that cover more than three million hectares of land, spread across the archipelago.⁴⁷³¹

On 14 February 2022, the government pushed forward a nationwide harvest strategy for its world-leading tropical tuna fishery, in an effort to protect the country's wild stock. Since 2018, the government has applied an interim harvest strategy that consists of, among others, harvest control rules and monitoring for tuna fishery in its three fishery management areas. But the country's fisheries ministry said recently that having a specific nationwide harvest strategy would be crucial for protecting the country's wild stock. The planned tuna harvest strategy will also help the government's ongoing push to achieve sustainability certification for its fisheries and subsequently open them to the growing global demand for eco-labeled seafood.⁴⁷³²

On 11 August 2022, the government abandoned a plan to contract out long-term fishing rights to companies, following intense criticism from small-scale fishers and experts that the move would effectively privatize the country's marine resources. The fisheries ministry now says it will revert to a quota-based system for allocating fishing permits, under which new investors will be eligible for "special permits" of up to 15 years. Experts say details of the new fisheries management system must be made public, given that the "special permit" scheme looks suspiciously like the axed contract system.⁴⁷³³

On 9 September 2022, the government announced its intention to develop models for supporting sustainable and inclusive agriculture value chains in nine selected locations through the Agriculture Value Chain Development (ICARE) project. This USD100 million project was approved by the World Bank's Board of Executive Directors on June 9, 2022 and became effective on September 5, 2022. The

⁴⁷³³ Indonesia backtracks on plan criticized for 'privatizing' fisheries resources, Mongabay (Jakarta) 11 August 2022. Access Date: 1 October 2022. <https://news.mongabay.com/2022/08/indonesia-backtracks-on-plan-criticized-for-privatizing-fisheries-resources/>

project aims to help strengthen value chain in selected agri-zone clusters and to strengthen Ministry of Agriculture's institutional capacity to provide catalytic support to stakeholders.⁴⁷³⁴

Indonesia has taken actions both to foster environment protection and those doing harm to the environment.

Thus, Indonesia receives a score of 0.

Analyst: Pavel Doronin

Italy: +1

Italy has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 2 December 2021, Minister of Infrastructure and Sustainable Mobility Enrico Giovannini, announced the plans to invest EUR3.2 billion in development of water infrastructure, urban and tourist bike paths and the development of Special Economic Zones. These measures are aimed at improving the security of water supply systems for drinking and irrigation purposes and include works to complete infrastructure for water derivation, storage and adduction, with the aim of reducing waste and increasing resilience to climate change.⁴⁷³⁵

On 16 December 2021, the Unified Conference approved the draft decree allocating EUR1.9 billion to large municipalities for the purchase of environmentally friendly electric or hydrogen-powered buses.⁴⁷³⁶

On 20 December 2021, the government announced the EUR1.6 billion funding of 5 National Centers dedicated to frontier research on, inter alia, agricultural technologies, sustainable mobility and biodiversity.⁴⁷³⁷

On 14 January 2022, the Ministry of Infrastructure and Sustainable Mobility announced “unprecedented investments” into the infrastructure of the Southern regions of the country. The ministry allocated EUR25 billion for the program, of which EUR13 billion were directed specifically to the regions in the South, with specific attention to improving “green” mobility and local travel and reducing pollution in urban centers. EUR983 million were directed towards the renewal of suburban and urban buses, so as to improve air quality and reduce polluting emissions, with particular regard to large municipalities and those with higher pollution rates. Southern territories will also benefit from the planned for ‘Green Intercity’ trains program, amounting to EUR200 million.⁴⁷³⁸

On 28 September 2022, Italian Economic Development Minister Giancarlo Giorgetti and Ecological Transition Minister Roberto Cingolani signed the interministerial decree formalizing the creation of “Critical Raw Materials” technical working group. The group unites institutions, research centers, supply chain consortia and trade associations with the objectives of strengthening coordination and formulating proposals for the creation of regulatory, economic and market conditions aimed at ensuring a safe and sustainable supply of raw materials.⁴⁷³⁹

Italy took action to promote conservation, protection and sustainable use of natural resources.

Thus, Italy receives a score of +1.

Analyst: Andrei Sakbarov

Japan: +1

Japan has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 15 October 2021, the Japan International Cooperation Agency (JICA) signed a record of discussions with the Government of the Republic of Mauritius on two technical cooperation projects: the “Project for the development of Integrated Coastal Ecosystem Management System” and the “Project for the improvement of livelihood of coastal communities through sustainable development of Blue Economy.” The Project for the development of Integrated Coastal Ecosystem Management System supports the establishment of ecosystem monitoring systems by stakeholders such as government agencies and local non-governmental organizations, as well as the formulation and implementation of plans for ecosystem conservation and restoration, with a goal of restoring more resilient coastal ecosystems. The projects will contribute to Sustainable Development Goals (SDGs) 13 and 14.⁴⁷⁴⁰

On 23 November 2021, the government introduced new labeling legislation for plant-based food packaging amid efforts to ease restrictions and increase consumer transparency.⁴⁷⁴¹

On 24 December 2021, the JICA concluded a INR2.14 billion investment agreement with the SVL-SME Fund, whose fund manager is SBICAP Ventures Limited (SVL), a subsidiary of India’s largest state-owned bank, State Bank of India. JICA’s investment will be appropriated for investment in small and medium-sized enterprises that are engaged in solving social and environmental issues in India.⁴⁷⁴²

On 14 January 2022, the cabinet approved an ordinance obliging businesses to reduce the use of 12 types of disposable plastic items like cutlery and straws from April as part of a push to protect the environment amid growing concern over marine pollution.⁴⁷⁴³

On 25 February 2021, the JICA signed a Record of Discussions with the Government of Thailand in Bangkok for the Project for Sustainable Management of PM2.5 Prevention and Reduction Measures, a technical cooperation project. This project aims to improve the emission source inventory of air pollution caused by PM2.5 (information on the amount of air pollutants generated at each point and by each substance) and to develop a simulation model based on its relationship with meteorological and geographical conditions in the Bangkok Metropolitan Administration and its surrounding provinces in Thailand. The project will contribute to SDGs Goal 11.⁴⁷⁴⁴

On 10 March 2022, a working group established under the Agency for Natural Resources and Energy compiled new target standard values for sashes and insulated glass as building materials under the Top Runner Program. The new target standard values for windows that combine sashes and insulated glass have been increased by about 40 per cent. The heat insulating efficiency required for windows is calculated from the required energy efficiency performance for new houses built from 2030 onward.⁴⁷⁴⁵

On 10 March 2022, the JICA signed a grant agreement with the Government of Nepal in Kathmandu, to provide grant aid of up to JPY2.541 million for The Project for the Improvement of Water Supply in Biratnagar. Under this project, the water supply system in Biratnagar will be upgraded and expanded to improve water quality and accomplish a stable water supply. With its function as a countermeasure against infectious diseases including COVID-19, this project will contribute to the achievement of SDGs Goal 3 and 6.⁴⁷⁴⁶

On 4 May 2022, the JICA signed a record of discussions with Sri Lanka in Colombo for the “Project for Institutionalization Support to Establish an In-house Advanced Oil Spill Incident Management Training Program for Disaster Mitigation and Marine Environment Protection.”⁴⁷⁴⁷

On 19 May 2022, the JICA approved 12 projects to be newly selected for SATREPS (Science and Technology Research Partnership for Sustainable Development) program in FY 2022; the SATREPS program aims at acquiring new knowledge that may help address global issues, such as the environment/energy issue, bioresources, disaster prevention and mitigation, and infectious diseases control.⁴⁷⁴⁸

On 24 August 2022, the Ministry of Environment announced its intention to introduce tax incentives for private-sector businesses that own forests — including satoyama village forests — in fiscal 2023 if they are recognized as contributing to biodiversity conservation.⁴⁷⁴⁹

the growth of the related industries. The taskforce is mandated to form better ties with businesses as to promote usage of wastes as sources of energy, including solid fuels and biogas.⁴⁷⁵⁵

On 6 October 2022, Korea and China held a meeting on carbon neutrality promotion cooperation. During the meeting, the two countries discussed strengthening cooperation to reduce fine particles and achieving carbon neutrality. Also, the two countries have adopted a renewed “2nd Korea-China Environmental Collaboration Plan 2023-2027” setting out cooperation priorities for next five years.⁴⁷⁵⁶

Within the monitoring period, Korea has taken steps matching three out of three key areas – environment conservation and protection, and sustainable use of natural resources. Thus, Korea receives a score of +1.

Analyst: Alexander Ignatov

Mexico: +1

Mexico has fully complied with the commitment ensure the conservation, protection and sustainable use of natural resources.

On 8 November 2021, the Ministry of Environment and Natural Resources published in the Official Gazette of the Federation the National Program for the Remediation of Contaminated Sites, which is aimed at recovering the sites in the country so that no group or community has to bear disproportionately with the harmful effects of pollution. The remediation of sites allows the recovery of the environmental services that the soil and water have, promoting public awareness about pollution and paying for the fulfillment of the commitments assumed by the Mexican State in various international agreements such as those of Stockholm on Persistent Organic Pollutants and Minamata regarding mercury and its compounds.⁴⁷⁵⁷

On 5 December 2021, the Ministry of Agriculture and Rural Development and the German Development Cooperation Agency concluded the Integration of Biodiversity in Mexican Agriculture project, focused on technical cooperation to increase productivity in the primary sector of hand in hand with the conservation of biodiversity and natural resources. The results of the cooperation include: National Strategy for the Conservation and Sustainable Use of Pollinators in Mexico, whose ecosystem services benefit the production of more than 60 per cent of cultivated plants and research to understand the role of bats in the control of rice pests. It also included the preparation of manuals for the biodiversity-friendly production of various crops, such as vanilla, coffee and cocoa, as well as honey and silvopastoral systems, in collaboration with the National Commission for the Knowledge and Use of Biodiversity (Conabio), among others.⁴⁷⁵⁸

On 3 February 2022, the Ministry of Environment and Natural Resources (Semarnat) published the Agreement by which the surface of 785,864.81 m² of beach was allocated to the service of the National

Commission of Natural Protected Areas (Conanp) maritime zone, federal maritime-terrestrial zone and land reclaimed from the sea. This Agreement allows carrying out actions for the protection, conservation and sustainable management of its resources in accordance with the provisions of the management program of the Yum Balam Flora and Fauna Protection Area where this island is located.⁴⁷⁵⁹

On 10 February 2022, Ministry of Economy received a request for consultations from the United States on the implementation of measures for the protection of the vaquita marina under Chapter 24 of the Treaty between Mexico, the United States and Canada (T-MEC), which provides a consultation mechanism on environmental issues between the Parties. The Ministry of Economy will coordinate the work between the different Mexican and United States authorities with the objective of timely presenting the efforts and measures adopted to protect marine species in national waters.⁴⁷⁶⁰

On 1 March 2022, Secretary of the Environment and Natural Resources María Luisa Albores González, and the Undersecretary of Economic Development, Energy, and the Environment of the United States, José Fernández, met to address relevant environmental issues and establish working ties. Discussions were held on sustainable fishing, protection of the vaquita and totoaba, the Eastern Tropical Pacific Marine Corridor (CMAR), and strategies to combat deforestation and illegal logging. In addition, the importance of strengthening the creation of Protected Natural Areas for the conservation of the territory was discussed.⁴⁷⁶¹

On 24 March 2022, the Semarnat signed two Collaboration Framework Agreements with the government of Tlaxcala; one through the Security, Energy and Environment Agency (ASEA), another through the Mexican Institute of Water Technology (IMTA), which will allow preventing, controlling, mitigating, remedying and repairing the damage caused to the environment and natural resources by the different productive sectors in the entity.⁴⁷⁶²

On 1 April 2022, the Ministry of Environment and Natural Resources published in the Official Gazette of the Federation the Agreement establishing the Critical Habitat for the conservation of wildlife in the “La Kisst” and “María Eugenia” Mountain Wetlands, in the municipality of San Cristóbal de las Casas, in Chiapas. In these ecosystems, biological, physical and chemical processes occur that are essential for feeding, predation, foraging, resting, breeding or reproduction that are important for the existence and survival of the different species of fish, birds, amphibians and mammals referred to in

On 2 June 2022, the Ministry of Environment and Natural Resources (Semarnat), the Federal Attorney for Environmental Protection (Profepa), and the government of the state of Campeche signed an agreement with the aim of joining efforts that allow them to carry out actions and establish communication mechanisms. and coordination for the best destination of the seized wood in the entity. Through this instrument, the foundations will be laid for Profepa to have the power to donate confiscated wood that is not subject to administrative or criminal proceedings, as well as to develop a comprehensive work agenda to address the issue of illegal logging, in addition to collaborate mutually in the protection, conservation, sustainable use and restoration of ecosystems, forest resources and their environmental services in the state of Campeche.⁴⁷⁶⁴

On 10 June 2022, Semarnat, through the Conanp, launched a “Recognition of the Conservation of Nature 2022” campaign for Mexican citizens with the purpose of preserving, executing, evaluating and monitoring the conservation of natural resources, sustainable development and the recovery of ecosystems and their biodiversity through projects in the federal Protected Natural Areas, the Areas Voluntarily Destined for Conservation, and the areas of influence under federal jurisdiction.⁴⁷⁶⁵

On 15 June 2022, the Conanp and the government of Tlaxcala announced the start of the brigades for environmental protection, which will focus on carrying out ecological restoration work in forest areas that were affected by the bark beetle (*Dendroctonus mexicanus*). within La Malinche or Matlalcuéyatl National Park, and monitoring and diagnosis of the presence of forest pests.⁴⁷⁶⁶

On 24-25 August 2022, Ministry of Environment and Natural Resources and the National Commission of Natural Protected Areas, together with the Ministry of Environment, Biodiversity, Climate Change and Energy of the Government of Campeche promote the certification of Areas Voluntarily Destined for the Conservation in the territory that includes the Báalam-Beh Jaguar Biological Corridor initiative, with the aim of conserving the habitat of the jaguar in the municipalities of Champotón, Escárcega and Calakmul.⁴⁷⁶⁷

Mexico took action aimed in all three of the following categories: conservation, protection and sustainable use of natural resources.

Russia has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 10 December 2021, the Minister of Energy Nikolai Shulginov launched the Russko-Polyanskaya solar power plant in Omsk oblast. The plant is expected to provide an annual reduction of harmful emissions by 12,700 tons and improve the environmental situation in the Omsk region. Commissioning of the Russko-Polyanskaya power plant will increase the total installed capacity of solar generation in the region's energy system to 60 MW, according to the minister. Total investment into the solar power plant construction amounted to RUB2.8 billion (USD37 million).⁴⁷⁶⁸

On 16 December 2021, the government approved the rules for posting publicly available information on the state of the environment. According to the new rules, federal, regional, and local authorities are obligated to publish information on the state of the environment, including the quality of atmospheric air, soil, water, and forest resources, harmful emissions, as well as radiation levels on their official websites or make it available to the public through state and municipal information systems.⁴⁷⁶⁹

On 29 March 2022, the Federal Project "Clean Air" was extended by two years – until 31 December 2026. The project aims to ensure a significant reduction in air pollution in 12 major industrial centers: Bratsk, Krasnoyarsk, Lipetsk, Magnitogorsk, Mednogorsk, Nizhny Tagil, Novokuznetsk, Norilsk, Omsk, Chelyabinsk, Cherepovets and Chita through measures to reduce emissions from industrial enterprises, municipal and transport infrastructure facilities.⁴⁷⁷⁰

On 21 April 2022, the Ministry of Natural Resources and the Environment announced that in March-April 2022 four new projects for the reclamation of landfills near Moscow "Safonovo," "Yadrovo," "Zavolenye" and "Taldomsky" were launched in accordance with the federal project "Clean Country" of the national project "Ecology." Additionally, in December 2021, contracts were signed for the reclamation of the Egorievsky and Volovichy landfills.⁴⁷⁷¹

On 22 April 2022, the Ministry of Natural Resources and the Environment reported that it had finished the drafting of the federal law "On Amending the Forest Code of the Russian Federation" and Article 9 of the Federal Law "On Limiting Greenhouse Gas Emissions." The draft law is aimed at the

implementation of climate projects in the field of forest relations on the territory of Russia, ensuring the reduction of greenhouse gas emissions and increasing the absorption of greenhouse gases.⁴⁷⁷²

On 2 August 2022, the government approved a list of environmental protection measures, for financing through environmental payments system. Environmental payments received by the regions' budgets, including fines for environmental violations, will be primarily used to liquidate facilities that have a negative impact on the environment, e.g. landfill sites, abandoned enterprises, ownerless landfills, hazardous waste, etc.. In addition, funds are allowed to be allocated for additional environmental measures to protect and defend forests, protected areas, water bodies, flora and fauna, projects to reduce air pollution, land reclamation after mining, and other measures.⁴⁷⁷³

On 24 August 2022, the government approved a RUB1.5 billion (USD25.2 million) federal subsidy to the regions for the purchase of containers for separate collection of solid municipal waste (MSW). This support measure is aimed at increasing recycling of MSW and accelerating the country's transition to circular economy.⁴⁷⁷⁴

Russia took action to promote protection, conservation and sustainable use of natural resources.

Thus, Russia receives a score of +1.

Analyst: Andrei Sakharov

Saudi Arabia: +1

Saudi Arabia has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 15 September 2021, Saudi Arabia published a new Waste Management Law. The legislation aims to regulate the transport, segregation, storage, import, export, safe disposal of waste and all other activities related to it. According to article 11 of the law, waste producers must conserve natural resources and materials, reuse products, reduce waste, store it in the designated areas, and separate it for the purpose of reuse or recycle. Article 14 holds the manufacturers/importers an extended responsibility for their products. Article 16 to 18 prescribe the different responsibilities of waste related service providers. This law also regulates the import and export of waste as well as dealing with emergency situations.⁴⁷⁷⁵

On 2 November 2021, Saudi Arabia's sustainable tourism developer, The Red Sea Development Co., signed an agreement with Red Sea Farms to establish a farm that will produce food using smart technologies, sun light, and seawater to supply the hotels it is building with sustainable food. Instead of relying on rainfall, fresh groundwater, or desalinated water, the farm will use sunlight and saltwater to cool greenhouses and grow crops. This saves up to 300 liters of fresh water per kilogram of produce – a 95 per cent saving compared with other AgTech systems. This means a reduced impact on the

environment and a significant cost saving for growers. It also results in more nutritious crops, while also providing a richer taste, flavor and texture.⁴⁷⁷⁶

On 24 February 2022, a deal to strengthen sustainable development efforts was signed between the Federation of Saudi Chambers and the United Nations Global Compact Network Saudi Arabia in Riyadh. The agreement recognizes the importance of corporate sustainability to accelerate the 2030 agenda and the UN Sustainable Development Goals through private business activity. The Network's mission in Saudi Arabia is to provide the private sector with necessary guidance to ensure that they recognize the role of business in the achievement of the Sustainable Development Goals (SDGs) and to create high-impact collaborations.⁴⁷⁷⁷

In February 2022, the government announced that Saudi Arabia intends to divert 60 per cent of construction and demolition waste from landfills – recycling 12 per cent, reusing 35 percent and treating 13 per cent. Moreover, it plans to divert 100 per cent of municipal solid waste from landfills by recycling 82 per cent of this waste, and processing 19 per cent to use as energy sources (waste-to-energy).⁴⁷⁷⁸

On 20 March 2022, Minister of Environment, Water and Agriculture Abdulrahman Al-Fadhli announced that he would inaugurate the activities and exhibition of the Environment Week. Under the slogan “Our Environment is Our Responsibility,” the activities aim to raise awareness on the importance of preserving the environment, spreading environmental culture, consolidating quality of life goals, activating the role of individuals, institutions and various government agencies in preserving the environment and maintaining ecological balance in accordance with the objectives Vision 2030. This year's Environment Week includes a number of various events in 21 regions and cities across the Kingdom. It contains several sections on vegetation cover, combating desertification, wild and marine life, waste management, pollution, meteorology and environmental protection. It also includes workshops on recycling and handicrafts using environmentally friendly tools, in addition to meetings with environmental centers and associations.⁴⁷⁷⁹

On 13 June 2022, Saudi Arabia criminalized possession of endangered animals by private individuals and anyone found violating the regulations in this regard would face a fine of SR30 million and imprisonment of up to 10 years, among other types of penalties; the new environmental law in Saudi Arabia aims to protect the environment by developing and sustaining endangered animals.⁴⁷⁸⁰

South Africa: 0

South Africa has partially complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 2 November 2021, President Cyril Ramaphosa announced a revised Nationally Determined Contribution with the goals of reducing domestic carbon emissions to between 420 and 350 million tonnes of carbon dioxide-equivalent by 2030 at the United Nations Climate Change Conference (COP26). The President also announced a partnership with the governments of France, Germany, the United Kingdom and the United States, as well as the European Union, to support a transition to a low-carbon economy in South Africa. The Partnership pledged to mobilize ZAR131 billion (USD 8.5 billion) over the next three years to implement the vision outlined in the Political Declaration on the just energy transition in South Africa, also unveiled at COP26. The Declaration laid out medium and long-term goals for "accelerated decarbonization" of the country's energy system with particular attention to vulnerable demographics, e.g. coal miners, women and youth.⁴⁷⁸⁴

On 23 February 2022, Minister of Finance of South Africa Enoch Godongwana announced the government's plans to reform the electricity sector in a way that would allow for private sector renewable energy generation projects of up to 100MW without licensing.⁴⁷⁸⁵

On 23 May 2022, Minister of Environment, Forestry and Fisheries Barbara Creecy announced the launch of the national waste management fleet, with an estimated worth of ZAR44.5 million (USD2.87 million). The fleet, according to the minister, consists of 22 vehicles including skip loader trucks, front

Turkey: +1

Turkey has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 7 December 2021, the countries designed to protect the Mediterranean Sea from pollution began their 22nd meeting in Antalya, on the southern Turkish coast. As the host of a climate change summit for the preservation of the Mediterranean, Turkey calls for international action and aims to make itself a regional hub to organize conservation work against pollution and other environmental threats to the sea.⁴⁷⁸⁷

On 30 December 2021, Turkey boosted forestation efforts with 252 million saplings. Amid a construction boom and concerns over the climate crisis, Turkey has stepped up efforts to preserve and further expand its forests. It is also pursuing a campaign to boost the production of saplings and increase revenue from forestry products, namely fruit and honey production, for villagers. Thousands of forests were created in rural areas to generate extra income for farmers.⁴⁷⁸⁸

In January, Turkish Cooperation and Coordination Agency (TIKA) built an Organic Liquid Seaweed Fertilizer Plant in Mombasa, which has a population of nearly 1.5 million. A liquid seaweed fertilizer plant was built as part of the project, which was implemented in cooperation with Pwani Marine Non-Governmental Organization, which has mostly young members and aims to protect marine life. Liquid seaweed fertilizer is a renewable and eco-friendly product that contributes to the ecosystem. The project aims to contribute to food security and sustainable agricultural production through the use of innovative and eco-friendly fertilizers in the long term; to provide employment opportunities to young people; to ensure the protection of seas and coasts; and to promote organic farming.⁴⁷⁸⁹

On 27 January 2022, it was reported that TIKA provided 20 clothing banks for the clothing recycling project in Lebanon. Nearly 500,000 clothing items have been collected in these clothing collection banks, most of which were made of recycled materials. 410,000 of these items have been offered to those in need. Thanks to these recycling activities, 650,000 kg of carbon emissions from new garment production were avoided.⁴⁷⁹⁰

On 2 February 2022, Turkey celebrated the World Wetlands Day, an occasion to raise awareness to the environmental impact and benefits of those bodies of water. The country, which stepped up preservation efforts in the past two decades for wetlands, still runs the risk of losing more to drought

aggravated by a climate crisis and encroachment of human-made development on wetlands, as well as excessive drainage of the ecosystems for agricultural purposes.⁴⁷⁹¹

On 1-7 June 2022, Turkey held its inaugural Environment week, a series of country wide activities under the theme of zero waste led by the First Lady and coordinated by the Ministry of Environment, Urban Planning and Climate Change, aimed to raise awareness for environmental protection.⁴⁷⁹²

On 7 August 2022, the government has increased measures against the possibility of forest fires. The latest technologies are used for early warning, which is the main principle of firefighting. Unmanned aerial vehicles, used in many risky areas, perform important tasks in protecting the green homeland thanks to their thermal cameras. Apart from this, smart fire watchtowers also contribute to the fight.⁴⁷⁹³ Turkey has taken strong actions on conservation, protection and sustainable use of natural resources.

Thus, Turkey receives a score of +1.

United Kingdom: +1

The United Kingdom has fully complied with the commitment to ensure the conservation, protection and sustainable use of natural resources.

On 4 November 2021, Chief Secretary to the Treasury Simon Clarke announced GBP15 million investment to “digitize the world’s largest collection of plant and fungal specimens will “revolutionize” climate change research and help protect biodiversity for generations to come.”⁴⁷⁹⁴

On 6 November 2021, the UK pledged urgent action and investment to protect nature and shift to more sustainable ways of farming. The “United Kingdom will launch a new GBP500 million package to help protect five million hectares of rainforests from deforestation. The funding will create thousands of green jobs, including in sustainable agriculture and forestry, throughout rainforest regions and generate GBP1 billion of green private sector investment to tackle climate change around the world.”⁴⁷⁹⁵

On 24 November 2021, the government announced its intention to invest GBP11 million in the UK’s distilleries to facilitate their green transition. The allocated sum would help distilleries to “ditch fossil fuels and develop low carbon heating systems that will make production processes greener and more energy efficient.”⁴⁷⁹⁶

⁴⁷⁹⁶ Funding helps UK distilleries fuel a greener future, UK Government (London) 24 November 2021. Access Date: 7 March 2022. <https://www.gov.uk/government/news/funding-helps-uk-distilleries-fuel-a-greener-future>

On 24 November 2021, the government has announced the biggest investment of GBP20 million in tidal power generation that would “strengthen energy security, renewable electricity supply and create jobs across the UK.”⁴⁷⁹⁷

On 25 January 2022, the Department for Business, Energy and Industrial Strategy invested more than GBP31 million to drive forward plans to place turbines in deep-sea areas. This initiative “will help accelerate renewable energy deployment that reduces the UK exposure to volatility in global fossil fuel prices and maintain the UK’s position as a world leader in offshore wind.”⁴⁷⁹⁸

On 23 February 2022, the government awarded nearly GBP7 million to projects across the UK to “support the development of new energy storage technologies.”⁴⁷⁹⁹

On 8 March 2022, the Department for Environment, Food and Rural Affairs has announced to fund almost GBP4.5 million to help futureproof trees and forests against impacts of pests and disease, to promote biodiversity and support innovative approaches to «tree health, resilience and production against a changing climate».⁴⁸⁰⁰ As part of the initiative plans to plant 30,000 hectares of trees across the UK per year.

On 9 March 2022, the Department for Environment, Food and Rural Affairs invested GBP11.6 million for local authorities to tackle air pollution. It helps councils develop and implement measures to benefit schools, businesses and communities and reduce the impact of dirty air on people’s health.⁴⁸⁰¹

On 25 March 2022, the Department for Business, Energy and Industrial Strategy announced GBP10 million funding for innovative entrepreneurs to turn ideas into green technologies helping fuel the UK’s energy security, reliable low-carbon energy, reducing reliance on expensive fossil fuels and exposure to volatile global prices⁴⁸⁰².

On 8 April 2022, Government unveiled GBP375 million investment for energy technologies of the future to develop next-generation nuclear technology, power British homes and strengthen the nation’s energy security. Moreover, investment will support research, development and deployment of these cutting-edge technologies and reduce reliance on expensive fossil fuels.⁴⁸⁰³

On 16 May 2022, the Department for Business, Energy and Industrial Strategy announced the “Biomass Feedstocks Innovation Programme” (BEIS), which aims to increase the production of

sustainable domestic biomass by funding innovative ideas that address barriers to biomass feedstock production. The programme forms part of the “BEIS Net Zero Innovation Portfolio” and accelerates the commercialisation of innovative clean energy technologies.⁴⁸⁰⁴

On 31 May 2022, the Department for Business, Energy & Industrial Strategy has announced new £31 million government funding, which supports industry to reduce its reliance on fossil fuels and slash carbon emissions. Moreover, it will support development of innovative carbon capture and green energy technologies in the UK, supporting green jobs and encouraging investment.⁴⁸⁰⁵

On 17 June 2022, the Department for Business, Energy and Industrial Strategy has published the GBP26 million “Industrial Hydrogen Accelerator Programme,” which provides funding for innovation projects that can demonstrate end-to-end industrial fuel switching to hydrogen. It covers the full technology chain, from hydrogen generation and delivery infrastructure through to industrial end-use.⁴⁸⁰⁶

On 26 July 2022, the government invited local councils across England to bid for funding from a GBP7 million pot to find innovative ways to improve the air quality in their areas. The government’s Air Quality Grant helps councils develop and implement measures to benefit schools, businesses and communities and reduce the impact of air pollution on people’s health.⁴⁸⁰⁷

On 23 September, nearly GBP50 million in government funding was made available to support the future of British industry. GBP49.4 million will be awarded to pioneering projects across the country, helping drive economic growth through the development of fuel switching technology which will see a wide range of industries, including steel, ceramics, pharmaceuticals and food production, reduce their reliance on fossil fuels and slash energy costs.⁴⁸⁰⁸

On 3 October 2022, the government announced that the West Burton power station site in Nottinghamshire has been selected as the home for ‘STEP’ (Spherical Tokamak for Energy Production), the UK’s prototype fusion energy plant which aims to be built by 2040. This technology has significant potential to deliver safe, sustainable, low carbon energy for future generations.⁴⁸⁰⁹

The United Kingdom has taken strong action in all three areas of the commitment: conservation, protection and sustainable use of natural resources. The Government launched a number of programmes aimed at protecting biodiversity for future generations, transition to more sustainable ways of farming, saving millions of hectares of rainforest from logging, investing in new forms of energy.

Thus, the United Kingdom receives a score of +1.

Analysts: Elena Alekseeva and Nikita Shilikov

United States: +1

The United States has fully complied with the commitment on conservation, protection and sustainable use of natural resources.

On 3 November 2021, the Agency for International Development (USAID) Administrator Samantha Power announced an initiative to reduce global greenhouse gas emissions as part of the US Government's efforts to combat the climate crisis. USAID will support partner countries to prevent six billion metric tons of carbon dioxide equivalent emissions by 2030. This goal will be achieved through a series of new and forthcoming programs that support partner countries to reduce and sequester emissions by transitioning from fossil fuels to renewable energy, improving energy efficiency, and conserving, protecting, and better managing tropical forests, mangroves and other important ecosystems that sequester large amounts of carbon dioxide. New programs and commitments that support this target include, inter alia, supporting the protection, restoration, or management of 100 million hectares of critical landscapes that serve as important carbon sinks; mobilizing funds in public and private finance for natural climate solutions by 2030; and launching new partnerships with the private sector to reduce deforestation in commodity supply chains.⁴⁸¹⁰

On 21 April 2022, the US Environmental Protection Agency issued for public input a draft white paper on control techniques and measures that could reduce greenhouse gas (GHG) emissions from new stationary combustion turbines. These turbines, constituting a significant part of US electricity generation, primarily use natural gas to create electricity. The draft white paper is aimed at engaging communities and the power sector on strategies to improve clean air and reduce climate pollution in the years ahead.⁴⁸¹¹

On 25 May 2022, US Environmental Protection Agency Administrator Michael Regan and German Environment Minister Steffi Lemke signed a joint declaration to expand cooperation on environmental issues. This cooperation covers the topics of natural climate protection, recycling management, marine protection, just transition, air pollution control, soil and water protection as well as the opportunities and risks that arise from digitalization for the environment.⁴⁸¹²

The United States has taken measures in all three of the following categories: conservation, protection and sustainable use of natural resources.

Thus, the US receives a score of +1.

European Union: +1

The European Union has fully complied with the commitment on conservation, protection and sustainable use of natural resources.

On 10 March 2022, the European Parliament adopted Environmental Objectives until 2030, confirming an agreement reached with the Council in December 2021 on the eighth General Union Environment Action Programme to guide the EU's environmental policy to 2030 and align it with the European Green Deal. The six thematic priority objectives to be achieved by 2030 are: climate change mitigation to attain the 2030 greenhouse gas emission reduction target; adaptation to climate change; advancing towards a wellbeing economy that gives back to the planet more than it takes; pursuing zero-pollution, including in relation to harmful chemicals; protecting, preserving and restoring biodiversity, and significantly reducing key environmental pressures related to the EU's material and consumption footprints including through EU 2030 reduction targets. Moreover, the EU will set up a binding legislative framework to monitor and report on member states' progress towards phasing out fossil fuel subsidies.⁴⁸¹³

On 20 April 2022, the European Parliament adopted its position on the revised Radio Equipment Directive to reduce electronic waste. Mobile phones, tablets, digital cameras, headphones and headsets, handheld videogame consoles and portable speakers, rechargeable via a wired cable, would have to be equipped with a USB Type-C port, regardless of the manufacturer. The goal is to avoid a new fragmentation in the market, to continue to reduce environmental waste, ensure consumer convenience and avoid so-called "lock-in" effects created by proprietary charging solutions.⁴⁸¹⁴

On 3 May 2022, the European Parliament adopted its negotiating position for new rules on persistent organic pollutants (POPs), and the management of waste containing them, amending the proposal for a regulation of the European Parliament and of the Council amending Annexes IV and V to Regulation (EU) 2019/1021 of the European Parliament and of the Council on persistent organic pollutants (COM(2021)0656 – C9-0396/2021 – 2021/0340(COD)). In order to protect the circular lifespan of products, materials containing levels of POPs that are too high must be destroyed or incinerated and cannot be recycled. The position also includes proposal of stricter limits for POPs; POPs removal from recycling chains; new chemicals addition to list of harmful substances.⁴⁸¹⁵

On 10 May 2022, the European Commission adopted the amendment to the Horizon Europe Work Programme 2021-2022, increasing the budget by nearly EUR562 million to further support EU Missions towards innovative solutions. There will be 17 new calls covering Mission A Soil Deal for

⁴⁸¹³ European Parliament legislative resolution of 10 March 2022 on the proposal for a decision of the European Parliament and of the Council on a General Union Environment Action Programme to 2030 (COM(2020)0652 – C9-0329/2020 – 2020/0300(COD)), European Parliament (Strasbourg) 10 March 2022. Europe, Mission Adaptation to Climate Change and Mission Restore our Ocean and Waters by 2030.⁴⁸¹⁶

On 1 June 2022, the European Commission published its Communication “Towards more sustainable fishing in the EU: state of play and orientations for 2023” outlining priorities of EU’s fisheries management for 2023. The priorities include better management of fisheries in the Mediterranean basin, building on achievements in the Western Mediterranean and in the Adriatic Sea; proper implementation of the landing obligation; better data from surveys to improve the science advice and economic analyses; more actions to protect the marine ecosystems. In line with the priorities set for 2023, Member States will need to step up the enforcement and control of compliance with the landing obligation and eliminate discards by avoiding unwanted catches.⁴⁸¹⁷

On 20 June 2022, the European Parliament reached a provisional political agreement on new rules for persistent organic pollutants (POPs), and the management of waste containing them. In order to protect the circular lifespan of products, materials containing too high levels of POPs must be destroyed or incinerated and cannot be recycled.⁴⁸¹⁸

On 28 June 2022, the Council of the EU adopted its negotiating position (general approach) on a proposal to limit the consumption of products contributing to deforestation or forest degradation. The Council agreed to set mandatory due diligence rules for all operators and traders who place, make available or export the following products from the EU market: palm oil, beef, timber, coffee, cocoa and soy. The rules also apply to a number of derived products such as leather, chocolate and furniture. The Council agreed to set up a benchmarking system, which assigns to third and EU countries a level of risk related to deforestation (low, standard or high). The Council clarified the control obligations and set quantified objectives of minimum control levels for standard- and high-risk countries. The purpose is to set effective and targeted measures.⁴⁸¹⁹

On 18 July 2022, the Council of the EU welcomed the strategic guidelines for a more sustainable, resilient and competitive EU aquaculture for the period 2021 to 2030 proposed by the European Commission. They also underlined the importance of giving the appropriate high priority to the sector. The Council voiced its support for the development of new freshwater and marine aquaculture methods with low environmental impact and emphasized the need to ensure the provision of nutritious, healthy and safe food and to reduce the EU’s high dependence on imports of fishery and aquaculture products, therefore contributing to food security.⁴⁸²⁰

On 26 July 2022, the Commission presented a list of headline indicators for monitoring progress towards the EU’s environment and climate goals to 2030, as well as the 2050 long-term vision to ‘live

well, within planetary boundaries'. The headline indicators follow the structure of the 8th Environment Action Programme building on the European Green Deal and include the 2-3 most policy relevant and statistically robust indicators for each of the thematic priority objectives to 2030, covering circular economy, zero pollution, and biodiversity. Moreover, the headline set includes indicators to monitor progress towards the main enabling conditions, covering sustainable finance, the 'polluters-pay principle', and phasing out environmentally harmful subsidies.⁴⁸²¹

On 28 September 2022, the Commission presented a package of legislative measures to protect people and the environment from asbestos and ensure an asbestos-free future. The package includes a Communication on working towards an asbestos-free future, tackling asbestos in a comprehensive way, from improving diagnoses and treatment of diseases caused by asbestos, to identification and safe removal and waste treatment of asbestos; and a proposal to amend the Asbestos at Work Directive to improve workers' protection by significantly lowering the occupational exposure limit to asbestos. To protect people from exposure to asbestos and prevent risks for future generations, the Commission sets out a comprehensive public health approach to better support victims of asbestos-related diseases; better protect workers from asbestos; improve information on asbestos in buildings; ensure safe disposal of asbestos and zero pollution.⁴⁸²²

The European Union has taken strong actions in all three areas by implementing measures to combat soil degradation and deforestation; adopting new environmental goals until 2030 in all three areas; offering measures to combat microplastics and POPs; new opportunities for waste management, including electronic waste; as well as a range of measures to protect marine resources and aquaculture.

Thus, the European Union receives the score of +1.

19. Climate Change: Paris Agreement

“In this endeavour, informed by the IPCC assessments, we will accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.”

Background

As defined by the United Nations, climate change is the long-term shift in temperatures and weather patterns.⁴⁸²³ Due to the increased burning of fossil fuels, and as a result, the emission of greenhouse gasses has steadily contributed to the rapid rise in the Earth’s temperature.⁴⁸²⁴ This has and will continue to threaten health and safety, agriculture, housing, and economic development on a global and unprecedented scale.⁴⁸²⁵ The first official acknowledgement and global commitment against climate change was held in Stockholm, Sweden in June 1972, known as the First Earth Summit, which introduced and “adopted a declaration that set our principles for the preservation and enhancement of the human environment.”⁴⁸²⁶ More recently, in the 21st century, there has been an evolution in the

commitments and response against climate change, such as the 2015 Paris Climate Change Agreement. The Paris Agreement is an international treaty that legally binds signatory countries to implementing change in order to limit global warming.⁴⁸²⁷ In accordance, the G20 summits began addressing climate change at some capacity since the inaugural summit in 2008.⁴⁸²⁸ The G20 economies combined account for around 80 per cent of the greenhouse gasses emitted,⁴⁸²⁹ and thus bear a large responsibility in climate action. The UN has projected a profit of USD26 trillion in comparison to the current business and fuel models being followed.⁴⁸³⁰ Therefore, it is not only viable for the G20 to promote the implementations of climate action for the future of economic prosperity, but also to reach their primary goal of the promotion of “international financial stability.”⁴⁸³¹

At the 2008 inaugural summit in Washington, D.C., there was an acknowledgement and intent to address various issues including climate change. The summit recognized climate change as a “critical challenge.”⁴⁸³² However, there was no further indication of how or what commitments will be made towards addressing this challenge.⁴⁸³³

At the 2009 London Summit, the G20 reaffirmed their “commitment to address the threat of irreversible climate change,” with plans to reach an agreement at the UN Climate Change conference in Copenhagen in their commitment dedicated towards climate change.⁴⁸³⁴ This marked the first-time climate change was addressed in a commitment while referencing specific and measurable goals outlined in the 2009 UN Climate Change Agreement.⁴⁸³⁵

At the 2009 Pittsburgh Summit, the conference dedicated a significant portion of its time discussing energy security and climate change, recognizing climate change as a multi-faceted issue, needing to be addressed through different avenues. The members discussed the involvement of The World Bank as well as other multilateral development banks having a role to play in addressing climate change.⁴⁸³⁶ In the leaders’ statement, they addressed specific issues concerning climate change, including “inefficient fossil fuel subsidies [that] encourage wasteful consumption, distort markets, impede investment in clean energy sources and undermine efforts to deal with climate change.”⁴⁸³⁷ Members also identified

⁴⁸³⁷ G20 Leaders Statement: The Pittsburgh Summit, G20 Information Centre (Toronto) 25 September 2009. Access Date: 6 December 2021. <http://www.g20.utoronto.ca/2009/2009communique0925.html#energy>

specific steps to address climate change, including “increasing clean and renewable energy supplies, improving energy efficiency, and promoting conservation.”⁴⁸³⁸

At the 2010 Toronto Summit, the G20 members reaffirmed their previous commitments to addressing climate change but failed to make any further commitments on the topic.⁴⁸³⁹ The commitments on climate change at this summit also lack further specificity.

At the 2010 Seoul Summit, the G20 members reaffirmed their commitment to fight climate change. Specifically, they made a commitment to “rationalize and phase-out over the medium-term inefficient fossil fuel subsidies; mitigate excessive fossil fuel price volatility; safeguard the global marine environment; and combat the challenges of global climate change.”⁴⁸⁴⁰

At the 2011 Cannes Summit, the G20 members identified the fight against climate change as a main priority. Specifically, there was a significant focus placed on financing initiatives addressing climate change, primarily supporting “climate-related investments in developing countries” and “assist[ing] developing countries to mitigate and adapt to the impact of climate change.”⁴⁸⁴¹ Additionally, G20 members committed to “fostering clean energy, green growth and sustainable development [through] promot[ing] low-carbon development strategies.”

At the 2012 Los Cabos Summit, the G20 members acknowledged the significant impact of climate change on the world economy and reaffirmed their commitment to fight climate change. They committed to take action to fulfill their Rio+20 and the United Nations Framework Convention on Climate Change agreements, the Green Climate Fund, implementation of Cancun and Durban outcomes and achieving greater outcomes at COP-18.⁴⁸⁴² Additionally, they recognized the importance of adapting agriculture to climate change, namely through “improving the efficiency of water and soil use in a sustainable manner.”

At the 2013 St. Petersburg Summit, the G20 members reaffirmed their commitment to the fight against climate change and committed to the full implementation of the United Nations Framework Convention on Climate Change outcomes, as well as the Green Climate Fund.⁴⁸⁴³ In this, they specified their commitment to adhering to the Kyoto protocol for accounting and reporting emissions, marking the first direct reference to the role of CO₂ emissions in addressing climate change.

At the 2014 Brisbane Summit, the G20 members reaffirmed their commitment to the United Nations Framework Convention on Climate Change’s outcomes, as well as to the Green Climate Fund.⁴⁸⁴⁴ Additionally, they committed to “an Action Plan for Voluntary Collaboration on Energy Efficiency, including new work on the efficiency and emissions performance of vehicles, particularly heavy-duty

vehicles; networked devices; buildings; industrial processes; and electricity generation; as well as work on financing for energy efficiency.”

At the 2015 Antalya Summit, the G20 members identified climate change as “one of the greatest challenges of our time” and committed to the below 2 degrees Celsius goal in the Lima Call for Action, as well as the commitments made in the “ambitious agreement in Paris.”⁴⁸⁴⁵ The members at the time also instructed their individual negotiators to “engage constructively and flexibility.”

At the 2016 Hangzhou Summit, the G20 members reaffirmed their commitment to the Paris Agreement and the Green Climate Fund, specifically “in providing means of implementation including financial resources to assist developing countries with respect to both mitigation and adaptation actions in line with Paris outcomes.”⁴⁸⁴⁶ Additionally, members restated their commitment to “to building well-functioning, open, competitive, efficient, stable and transparent energy markets, fostering more effective and inclusive global energy architecture to better reflect the changing realities of the world’s energy landscape, and shaping an affordable, reliable, sustainable and low greenhouse gas (GHG) emissions energy future while utilizing energy sources and technologies.” The members declared they will continue their cooperation when facing climate change, specifically to implement the Paris Agreement.

At the 2017 Hamburg Summit, the G20 members recognized that “a strong economy and a healthy planet are mutually reinforcing” and reaffirmed their commitment to reducing greenhouse gas emissions. Members also acknowledged the importance of a collaborative effort as stipulated with the 2030 Agenda for Sustainable Development and the Paris Agreement, identifying “energy security as one of the guiding principles for the transformation of our energy systems.”⁴⁸⁴⁷ With the adoption of the Paris Agreement, the G20 reaffirmed their pledge towards the Paris Agreement with the goal to limit global temperature to 2 degree Celsius, with an ideal of 1.5 Celsius. They also noted the official linkage of climate and energy policy in order to ensure a reliable investment climate. The decision of the United States to withdraw from the Paris Climate Change Agreement was noted, and the leaders of the other G20 members acknowledged the irreversibility of the agreement.

At the 2018 Buenos Aires Summit, the G20 members “recognize[d] the importance of comprehensive adaptation strategies, including investment in infrastructure that is resilient to extreme weather events and disasters,” noting the global warming of 1.5 degrees.⁴⁸⁴⁸ Members also reaffirmed the importance of “energy security, sustainability, resilience, efficiency, affordability and stability” in achieving the broader goal of reduced emissions. Signatories to the Paris Agreement reaffirmed that their signatures and commitments are irreversible, with “common but differentiated responsibilities,” while the United States reiterated their withdrawal from the Paris Agreement.

At the 2019 Osaka Summit, the G20 members recognized the “urgent need for addressing complex and pressing global issues and challenges including climate change; resource efficiency; air, land, freshwater and marine pollution; biodiversity loss; sustainable consumption and production; urban environmental quality; and other environmental issues.” Key areas of focus on this topic were reducing emissions and fostering resilient development. In accordance with the Paris Agreement, the members

⁴⁸⁴⁸ G20 Leaders’ Declaration: Building Consensus for Fair and Sustainable Development, G20 Information Centre (Buenos Aires) 1 December 2018. Access Date: 7 December 2021. <http://www.g20.utoronto.ca/2018/2018-leaders-declaration.html>

emphasized the importance of providing financial resources in order to assist developing members with a green transition.⁴⁸⁴⁹

At the 2020 Riyadh Summit, the G20 members identified “preventing environmental degradation, conserving, sustainably using and restoring biodiversity, preserving our oceans, promoting clean air and clean water, responding to natural disasters and extreme weather events, and tackling climate change” as being among the most “pressing issues of our time.”⁴⁸⁵⁰ They also reaffirmed the importance of international cooperation in addressing climate change, in accordance with the UNFCCC and the Paris Agreement.

At the 2021 Rome Summit, the G20 members reaffirmed their commitment “to the full and effective implementation of the UNFCCC and of the Paris Agreement.”⁴⁸⁵¹ Through actions of mitigation, adaptation and finance, the members continue to pursue efforts to limit the global temperature below 2 degrees Celsius. The leaders also committed to scale up adaptation finance in order to address the needs of developing countries. Recalling the Paris Agreement’s aim towards sustainable development, and the eradication of poverty, the members introduced different possible implementations and goals towards reducing greenhouse gases.

Commitment Features

On 31 November 2021, G20 leaders adopted the present commitment at the summit hosted by Rome, Italy. The commitment reads as the following: “In this endeavour, informed by the IPCC assessments, we will accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.”⁴⁸⁵²

The term “endeavour” is to be understood as a “serious determined effort” as well as “activity directed toward a goal.”⁴⁸⁵³

The term “informed” is to be understood as being “based on the possession of information” or “educated.”⁴⁸⁵⁴ In this context, the “information” in question is the IPCC assessments, indicating that actions contributing to compliance on this commitment will be aligned with the IPCC assessments. Actions should coincide with the information in the assessments, as well as with the options outlined relating to climate adaptation and mitigation.

The IPCC assessments refer to the assessments made by the United Nations Intergovernmental Panel on Climate Change (IPCC) which “determine the state of knowledge on climate change.”⁴⁸⁵⁵ The IPCC was established with the goal of “provid[ing] policymakers with regular scientific assessments on

climate change, its implications and potential future risks, as well as put[ting] forward adaptation and mitigation options.”⁴⁸⁵⁶

To “accelerate” is understood as the act of “hasten[ing] the progress or development of” a given goal of effort.⁴⁸⁵⁷ The definition of this term echoes the sense of urgency that surrounds action on climate change goals, as it signifies a commitment to increase the pace at which members seek to address climate change.

The term “actions” is to be understood as a deed, behaviour, or conduct.⁴⁸⁵⁸ In this context, the “actions” in question refer to actions relating to climate change, specifically in the three identified categories of [climate change] mitigation, [climate change] adaptation, and [climate] finance.

The term “mitigation” is to be understood as “the process or result of making something less severe, dangerous, painful, harsh, or damaging.”⁴⁸⁵⁹ In this context, “mitigation” refers to climate change mitigation, meaning it is to be understood as the process or result of making climate change and its impacts less severe, dangerous, painful, harsh, and damaging. The United Nations Environment Programme defines climate change mitigation as “efforts to reduce or prevent emission of greenhouse gases.”⁴⁸⁶⁰ Examples of actions that contribute to climate change mitigation include, but are not limited to, investing in renewable energy, establishing carbon sinks, and placing restrictions on the emissions of greenhouse gases of corporations.

The term “adaptation” is to be understood as “the process of changing to fit some purpose or situation.”⁴⁸⁶¹ In this context, “adaptation” refers to climate change adaptation, which is defined by the United Nations Framework Convention on Climate Change as “adjustments in ecological, social, or economic systems in response to actual or expected climatic stimuli and their effects or impacts.”⁴⁸⁶² The phrase refers to “changes in processes, practices, and structures to moderate potential damages or to benefit from opportunities associated with climate change.” Examples of actions that contribute to climate change adaptation include, but are not limited to, investing in infrastructure that is less vulnerable to climate-related disasters, allocating funding to regions that are particularly vulnerable to climate-related disasters, and implementing strategies to address health concerns related to climate change.

The term “finance,” in this context, is to be understood as “money or other liquid resources of a government, business, group, or individual.”⁴⁸⁶³ In this context, “finance” refers to climate finance, which refers to money or other liquid resources allocated to “support critical infrastructure for

Access Date: 5 December 2021. <https://unfccc.int/topics/adaptation-and-resilience/the-big-picture/what-do-adaptation-to-climate-change-and-climate-resilience-mean>

⁴⁸⁶³ Finance, Merriam-Webster Dictionary (Springfield) n.d. Access Date: 4 December 2021. <https://www.merriam-webster.com/dictionary/finance>

adaptation, resilience and the new renewable energy-based economy.”⁴⁸⁶⁴ In this context, relevant actions towards climate finance include government funding or government incentivized funding by non-state actors. Therefore, examples of actions that contribute to climate finance include, but are not limited to, allocating funding towards renewable energy, allocating funding to support climate action in developing countries, or creating incentives for corporations to allocate funding to climate action.

To “acknowledge” is to be understood as the act of “recognizing [something] as genuine or valid.”⁴⁸⁶⁵

The term “relevance” refers to “the degree to which something is related or useful to what is happening or being talked about.”⁴⁸⁶⁶ In this context, the commitment is discussing the degree to which achieving global net zero emissions or carbon neutrality by mid-century is useful for addressing climate change. The term “key” is to be understood as “extremely or crucially important.”⁴⁸⁶⁷ Therefore, the phrase “key relevance” in this context, indicates that achieving global net zero emissions or carbon neutrality by mid-century is crucially important and useful for addressing climate change.

To “achieve” is to be understood as “reach[ing] a goal.”⁴⁸⁶⁸ In this context, the goal to be reached is global net zero greenhouse gas emissions or carbon neutrality by or around mid-century as outlined by the Paris Agreement.

The phrase “global net zero greenhouse gas emissions or carbon neutrality” refers to “balancing a measured amount of carbon released with an equivalent amount sequestered or offset.”⁴⁸⁶⁹ Meaning, the overall levels of emissions in the atmosphere are not increasing.

The phrase “mid-century” is to be understood as the year 2050, as that is the year that falls in the middle of the 21st century. This phrase indicates the timeline of the goal of achieving global net zero greenhouse gas emissions or carbon neutrality. In this context, it is evident the phrase “mid-century” refers to a specific year, rather than a larger period of time, as the United Nations has stated that “net zero by 2050 is the goal.”⁴⁸⁷⁰

To “strengthen” is to be understood as “to make stronger.”⁴⁸⁷¹

The phrase “global efforts” can be broken down into the two words “global” and “efforts.” The term “global” refers to “involving the entire world” and the term “efforts” refers to “the total work done to achieve a particular end.”^{4872,4873} Therefore, the phrase “global efforts” refers to the total work done to

⁴⁸⁷¹ Strengthen, Merriam-Webster Dictionary (Springfield) n.d. Access Date: 4 December 2021. <https://www.merriam-webster.com/dictionary/strengthen>

⁴⁸⁷² Global, Merriam-Webster Dictionary (Springfield) n.d. Access Date: 4 December 2021. <https://www.merriam-webster.com/dictionary/global>

⁴⁸⁷³ Efforts, Merriam-Webster Dictionary (Springfield) n.d. Access Date: 4 December 2021. <https://www.merriam-webster.com/dictionary/efforts>

achieve a particular end involving the entire world. In this context, the “particular end” is the goal of the Paris Agreement. Therefore, “global efforts” can refer to any collective action taken by a G20 member that contributes to the goals outlined in the Paris Agreement. As the phrase “global efforts” indicates a requirement for collective action, G20 members must include at least one action that involves another state. Examples of such actions include, but are not limited to, granting climate funding to developing countries, engaging in joint climate initiatives, working with another state to address the impact of climate change on a shared environmental resource, such as an ocean. An example of an action that would not contribute to compliance of this requirement is engaging in conversations surrounding climate change with the leader of another state; however, any tangible and actionable outcomes of the conversation would be relevant.

The term “required” describes something that is “stipulated as necessary to be done.”⁴⁸⁷⁴ In this context, the adjective “required” describes the global efforts that are necessary to be done to achieve the goals outlined in the Paris Agreement.

The Paris Agreement is a “legally binding international treaty on climate change [which was] adopted by 196 Parties at COP 21 in Paris, on 12 December 2015 and entered into force on 4 November 2016.”⁴⁸⁷⁵ Thus, the “goals of the Paris Agreement” refers to the goals outlined in this treaty. The primary goal of the Paris Agreement is “to limit global warming to well below 2, preferably to 1.5 degrees Celsius, compared to pre-industrial levels.” There are two other principle goals of the Paris Agreement which are the following: “increasing the ability to adapt to the adverse impacts of climate change and foster climate resilience and low greenhouse gas emissions development, in a manner that does not threaten food production; and making finance flows consistent with a pathway towards low greenhouse gas emissions and climate-resilient development.”

In this commitment, both instruments and outcomes are outlined which indicates a more ambitious commitment.⁴⁸⁷⁶ Nevertheless, both are broad, particularly the outcomes which cannot be achieved, nor are they meant to be achieved, within this G20 cycle. Therefore, the instruments outlined in the commitment are intended to contribute to achieving the outcomes rather than achieve them. The first set of instruments identified in the commitment are [climate] actions across mitigation, adaptation, and finance. The corresponding outcomes are achieving global net zero greenhouse gas emissions or carbon neutrality by mid-century. The second set of instruments identified in the commitment are stronger global efforts, and the corresponding outcomes are the goals of the Paris Agreement.

This commitment can be characterized as a multiyear “other” commitment, as they declare they are going to accomplish a non-monetary goal over a set number of years. In this case, the goal in question is achieving net zero emissions or carbon neutrality and the set number of years is now until the year 2050. While climate finance is mentioned in this commitment, it nonetheless does not constitute a multiyear financial commitment because there is no specific monetary goal set in the commitment. As well, the mention of climate finance is an instrument to meet the outcome, and thus is not the goal itself.

Addressing the breadth of this commitment, to achieve full compliance, G20 members must take actions on all three identified categories of climate action: mitigation, adaptation, and finance. Further, there is the requirement for some international action due to the mention of global efforts. To achieve partial compliance, the G20 member must take action in one or two of the aforementioned categories,

⁴⁸⁷⁴ Required, Merriam-Webster Dictionary (Springfield) n.d. Access Date: 4 December 2021. <https://www.merriam-webster.com/dictionary/required>

⁴⁸⁷⁵ The Paris Agreement, United Nations Framework Convention on Climate Change (Bonn) n.d. <https://unfccc.int/process-and-meetings/the-paris-agreement/the-paris-agreement>

⁴⁸⁷⁶ Compliance Coding Manual for International Institutional Commitments, G7, G20, and BRICS Research Groups (Toronto) 12 November 2020. Access Date: 5 December 2021. https://docs.google.com/document/d/17lvFnX1j-koOirFJFz-1tPGnDyX09VxzpreQgF_cQIQ/edit

but without an action constituting a global, collective action. For instances of non-compliance, the G20 member has failed to address any of the three categories and has not taken any global, collective actions.

Additionally, addressing the depth of this commitment, relevant items must be actionable. Meaning, complaint actions require something to come into effect and discussions on climate change do not suffice. This is indicated by the use of the word “action” in the commitment. Relevant actions can also include the continuation of past commitments, rather than exclusively focusing on new initiatives. This is evident through the use of the word “accelerate.”

Scoring Guidelines

-1	G20 member has taken strong action in none of the three identified categories of climate action: mitigation, adaptation, and finance, without including at least one action constituting international, collective action.
0	G20 member has taken strong action in one or two of the three identified categories of climate action: mitigation, adaptation, and finance, without including at least one action constituting international, collective action.
+1	G20 member has taken strong action in all three identified categories of climate action: mitigation, adaptation, and finance, with at least one action constituting international, collective action involving at least other state.

Lead Analyst: Surabhi Pradhan*

Argentina: +1

Argentina has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the Ministry of Foreign Affairs, International Trade and Worship announced that Argentina joined the Global Methane Pledge.⁴⁸⁷⁷ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁴⁸⁷⁸ Due to the fact methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the Ministry of Foreign Affairs, International Trade and Worship announced that Argentina joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁴⁸⁷⁹ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

⁴⁸⁷⁷ Argentina signed two agreements to reverse deforestation and reduce methane emission, Energía Online (Buenos Aires) 2 November 2021. Translation provided by Analyst. Access Date: 12 February 2022. <https://www.energiaonline.com.ar/cop26-argentina-firmo-dos-acuerdos-para-revertir-la-deforestacion-y-reducir-las-emisiones-de-metano/>

On 9 November 2021, the Ministry of Foreign Affairs, International Trade and Worship announced that Argentina joined a multilateral commitment of 50 countries to develop climate-resilient and low-carbon healthcare systems.⁴⁸⁸⁰ The plan seeks to improve the readiness of health systems in the face of the threats posed by climate change while also reducing the dependence of said systems on fossil fuels.

On 9 December 2021, the Minister of Environment and Sustainable Development Juan Cabandié; the Minister of Science, Technology and Innovation Daniel Filmus; the president of the National Parks Administration Lautaro Erratchú; and the Minister of the Interior Wado de Pedro, signed an agreement which outlines the creation of six regional research centres in protected areas across Argentina.⁴⁸⁸¹ These research centres will support existing National Parks in their conservation efforts, as well as with providing environmental education and development activities. The overall goal is to have greater investments in science and technology, and to prioritize the health of future generations.

On 15 December 2021, Minister Cabandié and Governor of San Luis, Alberto Rodríguez Saá announced the signing of an agreement that commits to an investment of ARS67 million by the national Ministry of the Environment to set up the headquarters of the Central National Brigade.⁴⁸⁸² The objective of this agreement is to improve fire management efforts in the region by centralizing the base of operations for forest fires. The new headquarters will be located in San Luis, and will thus better address fires in the region as well.

On 10 February 2022, the Ministry of the Environment and Sustainable Development announced that the National Fire Management Service would receive an additional ARS4 billion to strengthen the fight against forest fires.⁴⁸⁸³ This increased funding comes from Argentina's National Executive Power and is part of the updated budget for 2022.

On 15 February 2022, Minister Cabandié and Chief of the Cabinet of Ministers Juan Manzur announced the creation of the Federal Campo San Juan Park, specifically protecting an area of more than 5,000 hectares.⁴⁸⁸⁴ This is the first park created in a program designed to increase total protected land and maritime areas to 17 million hectares.

On March 14 2022, Minister Cabandié and the mayor of Morón Lucas Ghi signed two agreements concerning the enhancement of a sustainable public space and the equipment of urban solid waste

management.⁴⁸⁸⁵ Included in these agreements is a commitment to invest ARS34.3 million into the project.

On 21 March 2022, the Ministry of the Environment and Sustainable Development, through its Secretary of Climate Change, announced the creation of an ecopark in the municipality of Federación, Entre Ríos.⁴⁸⁸⁶ This project will receive an investment of ARS28 million to build the ecopark as part of the Common House initiative, which funds projects that improve and preserve the environment and the local standard of living.

On 5 April 2022, the Ministry of the Environment and Sustainable Development announced the creation of the National Program of Non-Timber Forest Products, an instrument meant to manage and plan at a national level the sustainable usage of renewable natural resources found in forests and other areas.⁴⁸⁸⁷ The initiative is aimed at promoting the usage of the country's biodiversity in a sustainable manner.

On 27 May 2022, Minister Cabandié announced a ten-fold increase in the forest protection budget for the Great North region of the country, which accounts for 53 per cent of the nation's forests.⁴⁸⁸⁸ This initiative is aimed at both improving preservation efforts while also providing the financing to provide the means to achieve said goal.

On 22 June 2022, the budget of the Ministry of the Environment and Sustainable Development's national parks initiative was augmented by ARP6.7 billion, an increase of 142 per cent.⁴⁸⁸⁹ Furthermore, new areas designated for protection were announced. Collectively, this will help the ministry better fulfill its duties in preserving the environment and promoting sustainable economic development.

On 6 July 2022, the Ministry of the Environment and Sustainable Development signed an agreement with the province of Misiones to improve coordination on fire-fighting efforts.⁴⁸⁹⁰ The goal of this initiative is to help the local authorities better adapt to the coming adverse climate events that may affect the province of Misiones.

On 1 August 2022, the Ministry of the Environment and Sustainable Development signed agreements with the province of Neuquen to improve coordination on fire-fighting efforts and strengthening

⁴⁸⁹⁰ Cabandie signed a collaborative agreement with the province of Misiones to strengthen coordination on fire-fighting efforts, Ministry of Environment and Sustainable Development (Buenos Aires) 6 July 2022. Translation provided by: Analyst. Access Date: 23 September 2022 <https://www.argentina.gob.ar/noticias/cabandie-firmo-con-la-provincia-de-misiones-un-convenio-para-fortalecer-tareas-de-manejo>

implementation of the Law of the Forests.⁴⁸⁹¹ Annual transfers of ARP175M will go towards this initiative that seeks to improve climate adaption and preservation of forests.

On 19 August 2022, the Ministers of Economy and the Environment and Sustainable Development signed an agreement with the Development Bank of Latin America for USD75 million that will go to the strengthening of ecosystems and promotion of the circular economy.⁴⁸⁹² This aims to help finance the various initiatives that are part of the Argentine government's climate agenda to adhere to the Paris Agreement.

On 6 September 2022, Minister Cabandie met with the governor of Salta to sign an accord that strengthens prevention and treatment of forest fires in the province.⁴⁸⁹³ In doing so, this promotes better adaption to the changing climate in Salta.

On 6 September 2022, Minister Cabandie and the Minister of Science, Technology, and Innovation, Daniel Filmus, announced the creation of regional research centres to conduct studies in national parks.⁴⁸⁹⁴ Through studies and other research on parks, this initiative will lead to better management of protected areas.

On 12 September 2022, Minister Cabandie and the governor of Morales announced investments in combatting forest fires that amounted to ARP87 million.⁴⁸⁹⁵ Through this, the region of Morales will be better equipped to contain fires within its jurisdiction.

Argentina has taken strong actions to address climate mitigation, adaptation, and finance, while also taking actions constituting international collective actions. The decision to sign the Global Methane Pledge acts as an action towards climate mitigation and constitutes an international collective action, as 102 other countries are signatories. Committing to the development of a climate-resistant, low-carbon healthcare system acts as an action towards climate adaptation. Finally, the increased budget of the National Fire Management Service supports the goal of climate finance, as forest fires are a common consequence of climate change.

Thus, Argentina receives a score of +1.

Australia: +1

Australia has fully complied with its commitment to accelerate its actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that Australia joined 141 other countries in committing to the Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference.⁴⁸⁹⁶ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 9 November 2021, Prime Minister Scott Morrison and Minister for Industry, Energy and Emissions Reduction Angus Taylor announced the new national Future Fuels and Vehicles Strategy, which aims to reduce emissions in Australia's transportation sector.⁴⁸⁹⁷ Included in this strategy is a AUD250 million expansion of the Future Fuels Fund, which will be invested into four key areas: public electric vehicle charging and hydrogen refueling infrastructure; heavy and long-distance vehicle technologies; commercial fleets; and household smart charging.

On 10 November 2021, Prime Minister Morrison announced a new AUD1 billion Low Emissions Technology Commercialisation Fund, which will combine AUD500 million of new capital for the Clean Energy Finance Corporation with AUD500 million from private sector investors.⁴⁸⁹⁸ The purpose of this fund is to support and encourage the development of new low emissions technology, with the broader goal of achieving net zero emissions by the year 2050.

On 13 December 2021, Prime Minister Morrison announced a new deal with Korea to commit to a zero emissions future through strengthening cooperation on low emission technology.⁴⁸⁹⁹ Australia has made an initial pledge of AUD50 million to the partnership, with the goal of collectively investing up to AUD100 million. The two countries plan to collaborate on developing a wide range of new technologies, with a specific focus on clean hydrogen and other derivatives.

On 23 December 2021, the National Indigenous Australians Agency announced an AUD75 million funding agreement with the Torres Strait Regional Authority to invest in supporting the locals in caring for the land and the sea.⁴⁹⁰⁰ This investment would be delivered over the course of seven years and would support actions under the Land and Sea Management Strategy for Torres Strait, a guiding framework for enabling Torres Strait communities to continue to sustainably manage and benefit from

their land, sea and cultural resources into the future. The overall purpose of this agreement is to support the people of Torres Strait in protecting and preserving the environment, now and in the future.

On 6 January 2022, Prime Minister Morrison announced a new AUD150 million initiative called the Australian Clean Hydrogen Trade Program, which is aimed at attracting overseas investment into clean hydrogen supply chains originating in Australia.⁴⁹⁰¹ The first round of the program will be concerned with the export of clean hydrogen to Japan, which falls under the Japan-Australia Partnership on Decarbonisation through Technology. The goal of this initiative is to meet Australia's emission targets through collaborating with international partners.

On 28 January 2022, Prime Minister Morrison announced an investment of AUD1 billion to protect the Great Barrier Reef, which will be distributed throughout the next nine years.⁴⁹⁰² This investment will fund the deployment of new climate adaptation technology, major investments in water quality programs, and state of the art on-water management practices to reduce threats from Crown of Thorns Starfish, protect key species and prevent illegal fishing. More specifically, AUD579.9 million will be allocated to improve water quality; AUD252.9 million will be for reef management and conservation; AUD92.7 million will go towards research and the deployment of world leading reef resilience science and adaptation strategies; and AUD74.4 million will be allocated to community-led projects including species protection, habitat restoration, citizen science programs and marine debris.

On 29 January 2022, Prime Minister Morrison announced an AUD50 million investment into protection and recovery efforts for Australia's koalas.⁴⁹⁰³ This investment, which will be allocated throughout the next four years, will support the restoration of the koala's natural habitat, improve understanding of koala populations, support training in koala treatment and care, and strengthen research into koala health outcomes. More specifically, AUD20 million will go towards habitat and health protection projects; AUD10 million will go towards community-led initiatives; AUD10 million will extend the National Koala Monitoring Program; AUD2 million will go towards improving koala health outcomes; and AUD1 million will go towards koala care, treatment and triage.

On 31 January 2022, Department of Agriculture, Water and the Environment Deputy Secretary Andrew Tongue announced a new policy concerned with the management of biofouling and international shipping.⁴⁹⁰⁴ This new policy will require all vessels subject to biosecurity control to provide information relating to biofouling management practices before they arrive in Australia. The purpose of this change in policy is to reduce the risk of marine pests establishing themselves in Australia, which would thus disrupt Australian ecosystems. This policy also has the purpose of bringing Australia in accordance with the International Maritime Organization's 2011 biofouling guidelines.

On 3 February 2022, a new round of funding was provided under the National Soil Carbon Innovation Challenge.⁴⁹⁰⁵ AUD20 million in grants was made available to reduce the cost of soil carbon

measurement.⁴⁹⁰⁶ The funding will improve carbon stocks that can improve farm productivity and crop yields through better nutrient and water retention, and boost resilience against drought and erosion.

On 16 February 2022, Minister Angus Taylor of Australia and the Honourable Minister Raj Kumar Singh signed a Letter of Intent on New and Renewable Energy Technology.⁴⁹⁰⁷ This letter of intent demonstrates the two nations' collaboration on new and renewable energy technology. The collaborative efforts will focus on tangible actions and projects such as manufacturing and the deployment of ultra-low-cost solar and clean hydrogen.

On 17 February 2022, the Methane Emissions Reduction in Livestock program awarded AUD4 million to support low-emissions livestock feed research and development.⁴⁹⁰⁸ Six projects have been chosen to share AUD4 million in grants. The chosen projects will measure emissions reduction and the productivity benefits of new livestock feed supplements.

On 21 February 2022, the Australian Government announced that AUD20 million in funding would be available as part of the next stages of the Methane Emissions Reduction in Livestock program.⁴⁹⁰⁹ The goal of this program is to use technology to reduce emissions from cattle and sheep as livestock is approximately 10 per cent of Australia's emissions.

On 9 March 2022, Australia and India announced that they will fund six collaborative research projects using the AUD5.2 million in grants provided by the Australia-India Strategic Research Fund.⁴⁹¹⁰ Projects will focus on “quantum technologies; groundwater resources management; downstream processing, recycling and tailings reclamation of critical minerals; infection prevention and control; digital health and telemedicine; biomaterials (including bioplastics).” The funding will go towards: “low cost, portable and solar-powered optical sensing technology to monitor groundwater contaminants; research into the structural dynamics of SARS-CoV-2; a versatile protein mimicry platform to deliver bioadhesives for mending soft tissues; advanced recovery of battery materials and rare earth elements from ores and wastes; digital technologies at primary care centres to prevent blindness; [and] quantum-enhanced atomic gravimetry to improve sensing capabilities.”

On 10 March 2022, the Australian Renewable Energy Agency (ARENA) opened applications for German-Australian Hydrogen Innovation and Technology Incubator (HyGATE).⁴⁹¹¹ HyGATE will

provide EUR50 million and AUD50 million to fund initiatives that bring down the cost of hydrogen generation from renewables.

On 24 May 2022, Australia, India, Japan and the United States met in Tokyo to “renew [their] steadfast commitment to a free and open Indo-Pacific that is inclusive and resilient.”⁴⁹¹² At this meeting, they launched the “Quad Climate Change Adaptation and Mitigation Package (Q-CHAMP)” where they will be focusing on the themes of adaptation and mitigation. Alongside Q-CHAMP, the Quad Climate Working Group will work on: “green shipping and ports aiming for a shared green corridor framework building on each Quad country’s input; clean energy cooperation in clean hydrogen and methane emissions from the natural gas sector; strengthening clean energy supply chains, welcoming the contribution of the Sydney Energy Forum; climate information services for developing an engagement strategy with Pacific island countries; and disaster risk reduction, including disaster and climate resilient infrastructure such as the efforts through the Coalition for Disaster Resilient Infrastructure (CDRI). Its coverage includes new cooperation in clean fuel ammonia, CCUS/Carbon Recycling, cooperation and capacity building support to advance high integrity carbon markets under Article 6 of the Paris Agreement, climate-smart agriculture, knowledge sharing on subnational climate actions, and ecosystem-based adaptation.”

On 6 June 2022, Australia released its joint communiqué from its Indonesia-Australia Annual Leaders’ Meeting.⁴⁹¹³ In this communiqué, newly elected Prime Minister Anthony Albanese affirmed “Australia’s new commitment to a AUD200 million climate and infrastructure partnership with Indonesia. The content of the partnership will be developed between officials and launched as soon as mutually agreed.”

On 16 June 2022, Prime Minister Albanese and Minister for Climate Change and Energy Chris Bowen released Australia’s “updated NDC under the Paris Agreement,” to reduce emissions by 43 per cent below 2005 levels by 2030, and reach net zero emissions by 2050.⁴⁹¹⁴ This includes “AU20 billion investment in Australia’s electricity grid to accelerate the decarbonisation of the grid; An additional AU300 million to deliver community batteries and solar banks across Australia; Up to AUD3 billion investment of from the new National Reconstruction Fund to support renewables manufacturing and low emissions technologies; Powering the Regions Fund to support the development of new clean energy industries and the decarbonisation priorities of existing industry; A further AUD100 million to train 10,000 New Energy Apprentices in the jobs of the future; AUD10 million New Energy Skills Program to provide additional training pathways; The introduction of declining emission baselines for Australia’s major emitters, under the existing Safeguard Mechanism; Australia’s first National Electric Vehicle Strategy, to reduce emissions and accelerate the uptake of electric vehicle; Double existing investment in electric vehicle charging and establish hydrogen refuelling infrastructure – to AUD500 million; The application of new standardised and internationally-aligned reporting requirements for climate risks and opportunities for large businesses; A commitment to reduce the emissions of Commonwealth Government agencies to net zero by 2030; Restoring the role of the Climate Change Authority, while keeping decision-making and accountability with Government and introducing new annual Parliamentary reporting by the Minister; [and] bid to host a future Conference of the Parties in Australia with an offer to Pacific partner countries to co-host.” Australia has fully complied with its commitment to accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around

⁴⁹¹³ Joint Communiqué: Indonesia-Australia Annual Leaders’ Meeting, Prime Minister of Australia (Canberra) 6 June 2022. Access Date: 17 June 2022. <https://www.pm.gov.au/media/joint-communique-indonesia-australia-annual-leaders-meeting>

⁴⁹¹⁴ Stronger Action on Climate Change, Prime Minister of Australia (Canberra) 16 June 2022. Access Date: 17 June 2022. <https://www.pm.gov.au/media/stronger-action-climate-change>

mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 28 July 2022, the Australian Government introduced the Climate Change Bill 2022.⁴⁹¹⁵ The Bill legislates the commitment the country has made towards reducing greenhouse gas emissions by 43 per cent below 2005 levels by 2030, and net zero by 2050. The Bill calls to action different agencies within the government, and will require the Minister to prepare and table annual statements and future targets. Targets will also automatically increase every five years in order to stay within the line of the Paris Agreement.

On 25 October 2022, the Australian Government released its 2022-2023 Budget.⁴⁹¹⁶ Its key goals include “supporting the transformation of Australia’s economy to net-zero emissions by 2050; transforming energy to net zero emissions while maintaining security, reliability and affordability; [and] supporting actions to promote adaptation and strengthen resilience in Australia’s economy, society and environment.” The spending in the budget includes, but is not limited to, “AUD275.4 million over 6 years from 2022–23 to establish the Driving the Nation Fund to invest in cheaper, cleaner transport, bringing total investment for electric and hydrogen vehicle infrastructure to over AUD500 million; AUD47.1 million for restoring the Climate Change Authority to provide independent climate change advice and delivering new annual climate change statements to Parliament, supporting integrity and greater transparency in emissions reduction; AUD45.8 million over 6 years from 2022–23 to restore Australia's reputation and increase international engagement on climate change and energy transformation issues; AUD15.9 million for engaging First Nations Peoples on Climate Change; AUD9.3 million to set up the Commonwealth Climate Risk and Opportunity Management Program and AUD20.3 million to support carbon farming.”⁴⁹¹⁷

Australia has fully complied with its commitment to accelerate its actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. Australia has taken strong actions to address climate mitigation, adaptation, and finance, while also taking actions constituting international collective actions. The new national Future Fuels and Vehicles Strategy serves as an example of climate mitigation, as the goal is to reduce emissions and thus mitigate the effects of climate change. The AUD50 million investment into the protection of koalas contributes to climate adaptation and the AUD1 billion investment to protect the Great Barrier Reef contributes to climate finance. Finally, the joint efforts with the Republic of Korea to collaborate on low emissions technology serves as an example of an international collective action.

Thus, Australia receives a score of +1.

⁴⁹¹⁷ Budget 2022-2023, Department of Climate Change, Energy, the Environment and Water (Canberra) 25 October 2022. Access Date: 6 November 2022. <https://www.dcceew.gov.au/sites/default/files/documents/oct-budget-2022-23-climate-change-fs.pdf>

or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that Brazil joined the Global Methane Pledge.⁴⁹¹⁸ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁴⁹¹⁹ Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that Brazil joined 141 other countries in committing to the Declaration on Forests and Land Use at the COP26.⁴⁹²⁰ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 2 November 2021, the Minister of the Environment Joaquim Leite, in participation of COP26 negotiations, announced that the Brazilian government increased their target of reducing the emission of greenhouse gases from 43 per cent to 50 per cent by 2030.⁴⁹²¹ He also confirmed the goal of zero-emission would be achieved between 2050 to 2060 and illegal deforestation will be terminated in 2028.

On 12 January 2022, Brazil published Presidential Decree No. 10936 to announce the revisions on the National Solid Waste Policy.⁴⁹²² The Decree announced the creation of the National Reverse Logistics Program which extends reuse and disposal efforts for commercial goods. This system would be effective in reducing the emission of greenhouse gases.

On 10 February 2022, Minister of the Environment Joaquim Leite, attended an interview with a Brazil Communication Company.⁴⁹²³ He stated that the Federal Government would initiate the Methane Zero program within a month. The program would allow public banks to fund the industries to replace methane gas with biofuel. This is a measure to achieve the target of reducing methane emissions by 30 per cent before 2030 which was set during COP26.

On 21 March 2022, the Federal Government attended a conference with the Ministries of Mines and Energy and the Environment to announce the launch of a new series of measures to enhance the use

of biomethane.⁴⁹²⁴ President Jair Bolsonaro signed a proclamation along with Ministers Bento Albuquerque and Joaquim Leite to implement strategies to incentivize the use of Biogas and Biomethane. The goal of the measures is to replace the use of fossil fuels with renewable energy sources in the future. The Initiatives include actions such as increasing the number of biodigesters and sites for purifying biogas, funding scientific research on biofuel and fostering international cooperation toward a green economy.

On 10 May 2022, the Ministry of Science, Technology, and Innovations attended the 14th Meeting of the Executive Committee of the Brazil-Sweden Working Group on Innovative High Technology.⁴⁹²⁵ They announced that Brazil will cooperate with Sweden on developing the technology for bioproducts and sustainable forest management. The development of bioproduct will help to reduce the emission of ethanol from the sugar cane production in Brazil. The planning of the project timeline will be started after the Sweden-Brazil Innovation Week.

On 19 May 2022, the Federal Government published Decree No. 11075.⁴⁹²⁶ This provides a blueprint for the action to mitigate climate change and reduce Greenhouse gas emissions. The plan mainly focuses on regulating the carbon market with measures such as exporting credits to countries and companies. The revenue generated from the regulated carbon market would be spent on the projects that encourage the development of the green economy.

On 20 May 2022, the Ministry of the Environment signed a decree with five private sectors to agree on taking actions to reduce carbon emissions.⁴⁹²⁷ The signing of the protocol allows the government to cooperate with the energy industry in mitigating climate change. The collaborative measures include allocating methane credits and recording the carbon footprint of any economic activities.

On 29 August 2022, the Ministry of Mines and Energy announced the establishment of the National Hydrogen Program.⁴⁹²⁸ The program aims to expand the hydrogen market with green technological development to decarbonize energy use. This effort will help address the technological and economic issues of transitioning to a decarbonized economy.

Brazil has fully complied with its commitment to take strong action in all three identified categories of climate action: mitigation, adaptation, and finance, and at least 1 of action constituting international, collective action involving other states. Brazil addressed climate mitigation by increasing the target range of reducing greenhouse gasses emission. It addressed adaptation by implementing a new waste management policy and initiatives to regulate the carbon market. It addressed climate finance by funding scientific research on biofuel. Lastly, it took collective action by joining the global methane

pledge and cooperating with the Sweden government on developing bioproducts to decrease the emission of ethanol.

Thus, Brazil receives a score of +1.

Analyst: Wesley Cheung

Canada: +1

Canada has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 1 November 2021, Prime Minister Justin Trudeau, announced investments of up to CAD1 billion for the Climate Investment Funds Accelerated Coal Transition Investment Program to help developing countries transition away from coal-powered electricity, and CAD25 million to the Energy Sector Management Assistance Program, in partnership with the World Bank, to develop green energy alternatives in low-income countries at the 26th United Nations Climate Change Conference (COP26) in Glasgow.⁴⁹²⁹ Prime Minister Trudeau also pledged that Canada will be the first major oil-producing country to reach net zero in the oil sector by 2050.

On 2 November 2021, the United Nations announced that Canada joined the Global Methane Pledge.⁴⁹³⁰ The Global Methane Pledge, signed at COP26, is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁴⁹³¹ Because methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that Canada joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁴⁹³² The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 2 November 2021, Prime Minister Trudeau concluded his attendance at the 26th United Nations Climate Change Summit by announcing the implementation of Canada’s Climate Action Incentive, which financially incentivizes businesses and individuals to transition to a green economy.⁴⁹³³ He also pledged additional investments up to CAD57.5 million to the poorest developing countries to increase preparedness for climate events.

On 4 November 2021, Canada joined 24 countries in pledging to decrease subsidies to oil and gas companies that have overseas operations and redirecting the funds to clean energy.⁴⁹³⁴ Canada has also announced ending funding to overseas coal plants in addition to oil and gas.

On 5 November 2021, Minister of Natural Resources Jonathan Wilkinson announced an investment of CAD500,000 in collaboration with the International Renewable Energy Agency to support remote communities in the transition to clean energy.⁴⁹³⁵ The federal government will work with Indigenous leaders and the Commission for Environmental Cooperation as part of the Canada-United States-Mexico agreement to deliver models for other countries with similar challenges.

On 9 November 2021, the Ministry of Environment and Climate Change announced an investment of CAD10 million over five years to the Climate and Clean Air Coalition.⁴⁹³⁶ The investment will be used to fund the necessary actions as listed by the mandate and to support the 2030 Strategy for sustainable development, as well as the Global Methane Pledge to decrease emissions.

On 17 December 2021, Minister Wilkinson joined Minister Guilbeault to announce two new resources aimed at helping the Atlantic provinces respond to climate change.⁴⁹³⁷ The project recognizes the unique circumstances faced by the Atlantic provinces on climate-related disasters and joined forces with them to launch CLIMAtlantic, providing CAD1.65 million over three years to support the mitigation and adaptation in those provinces, as well as providing education and resources to residents.

On 28 January 2022, Canada joined the Sustainable Productivity Growth for Food Security and Resource Conservation Coalition along with 15 countries and organizations.⁴⁹³⁸ The Coalition works in collaboration with its members to accelerate the transition into a more sustainable agricultural process.

On 8 February 2022, Minister Wilkinson announced an investment totaling CAD450,000 to two Canadian organizations and their zero-emission vehicle projects, providing the education, tools, and information to support Canadians in their transition to electric vehicles.⁴⁹³⁹ The funding is part of Natural Resources Canada's Zero-Emission Vehicle Awareness Initiative.

On 12 February 2022, Prime Minister Trudeau attended the One Ocean Summit hosted in France to announce Canada's membership in several new global initiatives on waste reduction and ocean

protection, including the New Plastics Economy Global Commitment.⁴⁹⁴⁰ As one of over 500 businesses and governments, Canada will support a “legally binding global agreement” at the United Nations to reduce plastic pollution, in addition to existing domestic policies on the accountability of major plastic waste producers.

On 22 February 2022, Minister Wilkinson announced a CAD20 million investment to the Steel Reef Infrastructure Corporation in Saskatchewan to reduce methane emissions from oil and gas productions.⁴⁹⁴¹ The funding will be used in new technologies to capture and transfer the methane emissions to prevent them from being released into the atmosphere, and is expected to “permanently avoid” approximately 410,000 tonnes of CO₂ equivalent.

On 24 March 2022, Minister Wilkinson attended and pledged CAD8 million at an International Energy Agency meeting in Paris. The investment will be directed towards the Agency’s Clean Energy Transition Programme to help developing countries with their transitions to renewable energy and aid in their current energy demands.⁴⁹⁴²

On 1 April 2022, Minister of Environment and Climate Change Steven Guilbeault, and Minister Wilkinson, attended the GLOBE Forum 2022 along with other government ministers and announced an investment of CAD12 million through Natural Resources Canada’s Clean Growth and Energy Innovation Programs to support the development of clean technologies.⁴⁹⁴³

On 1 April 2022, Minister of Innovation, Science and Industry Francois-Philippe Champagne announced an investment of over CAD27 million through Sustainable Development Technology Canada to fund the development of green climate technology at the GLOBE Forums. The investment will also support the decarbonization of Canada’s economy.⁴⁹⁴⁴

On 7 April 2022, the government released the 2022 budget, including new investments to aid the development of alternative energy sources and carbon capture. The Government highlights a CAD3 billion investment to build a national network of charging stations and making zero-emission vehicles more affordable for Canadians.⁴⁹⁴⁵ CAD1.7 billion will go to the electric vehicle purchase incentive program, and CAD400 million is planned over the next five years to improve the accessibility of zero-emission vehicles in remote communities.⁴⁹⁴⁶

On 11 April 2022, Minister Wilkinson, announced a CAD32.2 million investment through the Low Carbon Economy Fund to support the expansion of two Indigenous-owned hydro power plants in British Columbia. The completed project will increase energy production by 8.5 megawatts, and will be transferred to Yukon through a new transmission line, built to deliver clean energy in the northern territories.⁴⁹⁴⁷

On 28 April 2022, Minister Wilkinson announced a CAD5 million investment to the Deep Retrofit Challenge, which makes residential and commercial buildings in Toronto more energy efficient. The project aims to reduce energy consumption and greenhouse gas emissions by 50 per cent. Builders and owners in Toronto will also receive guidance from the federal government on the technical processes of achieving low-emissions standards.⁴⁹⁴⁸

On 29 April 2022, Environment and Climate Change Canada announced a joint investment with the Government of Quebec to support the construction of an energy-efficient cement plant in the province. The federal investment of CAD17.5 million is delivered through the Low Carbon Economy Fund, a national initiative aimed at reducing carbon emissions and implementing green technologies.⁴⁹⁴⁹

On 29 April 2022, Minister of the Federal Economic Development Agency for Southern Ontario Helena Jaczek announced a CAD10 million contribution to Innovation Guelph to support the i.d.e.a. fund, which supports local businesses in the innovation and implementation of green technologies. The fund covers over 240 businesses and will create 840 jobs in the southern Ontario area.⁴⁹⁵⁰

On 5 May 2022, Minister Guilbeault announced a CAD2.8 million investment through the federal Low Carbon Economy Fund to support the Northern First Nations Home Retrofit Program. The Program aims to increase energy affordability to the Northern First Nations by replacing and improving existing structures in individual households. The project is expected to reduce 16,000 tonnes of greenhouse gas.⁴⁹⁵¹

On 24 May 2022, Minister Guilbeault announced an investment of CAD20 million over the next four years to support the west African countries of Ghana, Liberia, The Gambia and Togo with their systems of climate change measurements. The measurement, reporting and verification systems are

designed to help countries to better track climate activities and allow for timely mitigation and adaptation, a process essential in the fight against climate change.⁴⁹⁵²

On 31 May 2022, Minister Guilbeault hosted over 30 leaders in the sixth Ministerial on Climate Action in Sweden. At the conference, Canada confirmed the goal of reaching CAD100 billion in climate finance to developing countries by 2023 and committed to donating at least 20 per cent of the recently doubled climate finance fund to this initiative. MoCA6 aimed to help less developed countries with their climate transition by encouraging financing from major economies.⁴⁹⁵³

On 1 June 2022, the Ministry of Natural Resources and Ministry of Northern Affairs announced an investment of CAD21.6 million to 14 Indigenous communities as part of the Indigenous Off-Diesel Initiative. Each project will receive up to CAD1.6 million to fund their clean energy projects and create new opportunities within the field of renewable energy for Indigenous Canadians.⁴⁹⁵⁴

On 2 June 2022, Minister Guilbeault, joined the Honourable Bhupender Yadav, India's Minister of Environment, Forest and Climate Change, to sign a memorandum of understanding. Both sides committed to mutual collaboration and exchange of information on decarbonization, zero-emissions, pollution and renewable energy.⁴⁹⁵⁵

On 13 July 2022, Prime Minister Trudeau joined federal and provincial ministers in announcing a new partnership with Umicore to increase the production of electric vehicle batteries in Ontario. The partnership includes a CAD1.5 billion investment to construct a net-zero facility, with the goal to produce enough components to supply 1 million electric vehicles annually by the end of the decade.⁴⁹⁵⁶

On 14 July 2022, the Honourable Steven Guilbeault, Minister of Environment and Climate Change Canada, announced an investment of CAD4.5 million dollars over the next four years to the Pacific Alliance Countries of Mexico, Peru, Chile, and Colombia at the North American Commission for Environmental Cooperation's annual meeting.⁴⁹⁵⁷

On 17 August 2022, the Honourable Daniel Vandal, Minister of Northern Affairs, announced a CAD15.5 million investment to the White River First Nation in Yukon. The investment will be used

to replace diesel-fueled electricity with solar power in the community, decreasing an average of 1,100 tonnes of CO₂ annually.⁴⁹⁵⁸

On 23 August 2022, Canada signed a Joint Declaration of Intent on the export of clean Canadian hydrogen with Germany. The declaration will support investments and developments of clean hydrogen projects, and establish a trans-Atlantic export chain by 2025.⁴⁹⁵⁹

On 25 August 2022, Natural Resources Canada announced a CAD815,115 investment to the Smart Grid Innovation Network as part of their CAD1.56 billion investment into the Smart Renewables and Electrification Pathways Program. The project will expand on the decarbonization of Canada's electricity grid and reduce greenhouse gas emissions.⁴⁹⁶⁰

On 29 August 2022, Minister Guilbeault announced a CAD30 million for over 80 Indigenous climate change initiatives. The First Nations, Metis and Inuit Guardians will collaborate closely to address climate change and biodiversity loss in Canada, incorporating traditional knowledge with conservation efforts against global warming.⁴⁹⁶¹

On 8 September 2022, Natural Resources Canada announced a CAD11.5 million investment through the Green Municipal Fund to support the construction of a net-zero ready Royal Canadian Mounted Police facility in British Columbia. The model has been adapted to the climate in North Cowichan, where the facility will be located, and is expected to reduce cooling demands by 45 per cent and lighting costs by 25 per cent.⁴⁹⁶²

On 21 September 2022, Minister Wilkinson announced a CAD5.3 million federal investment to Student Energy to encourage youth participation in the clean energy sector. Student Energy's project aims to develop programs for youth aged 18 to 30 in skill development and entrepreneurial programs, with a special focus on traditionally underrepresented groups such as Indigenous peoples and women. The investment includes CAD5 million from the Smart Renewables and Electrification Pathways Program.⁴⁹⁶³

⁴⁹⁶³ Government of Canada Contributes \$5.3 Million to Promote Youth Participation in the Clean Energy Sector, Natural Resources Canada (Pittsburgh) 21 September 2022. Access Date: 23 September 2022. <https://www.canada.ca/en/natural-resources-canada/news/2022/09/government-of-canada-contributes-53-million-to-promote-youth-participation-in-the-clean-energy-sector.html>

On 29 September 2022, the Canadian Government invested CAD11.4 million into climate actions that aim to reduce food waste, and thus decrease greenhouse gas emissions.⁴⁹⁶⁴ The investments include “up to CAD1.4 million and CAD10 million to support Redcliff Cypress Regional Waste Management Authority and PurEnergy Inc.’s waste emissions reduction initiatives.” These initiatives will see to the “cumulative reduction of about 77,000 tonnes of greenhouse gas emissions, equivalent to removing approximately 23,600 cars off the road for an entire year.”

Canada has fully complied with its commitment to accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. Canada has taken strong actions to address climate mitigation, adaptation, and finance. Progressive climate plans such as their investment into the clean air coalition contribute towards climate mitigation. The resources to support the Atlantic provinces adapt to climate change contribute to climate adaptation. The investment of CAD450,000 into zero-emissions vehicles contributes towards climate finance. Finally, the decision to join the global methane pledge and investments to help developing countries in their adaptation to climate change constitute international collective actions.

Thus, Canada receives a score of +1.

Analyst: Katherine Zhang

China: +1

China has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that China joined 141 other countries in committing to the Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference.⁴⁹⁶⁵ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 29 November 2021, the National Energy Administration signed 15 documents on clean energy, green financial investments, and nuclear power at the 3rd China-Russia Energy Business Forum in Beijing.⁴⁹⁶⁶ The two sides proposed and committed to continued Chinese-Russian cooperation on the energy sector.

On 30 December 2021, the National Energy Administration signed a cooperation agreement with the Chinese Meteorological Administration on the development of wind and solar energy resources, to improve extreme weather warning systems, and maintain stable energy supply using renewable

⁴⁹⁶⁴ Government of Canada invests \$11.4 million in climate action projects to reduce emissions from food waste, Environment and Climate Canada (Gatineau) 29 September 2022. sources.⁴⁹⁶⁷ The agreement aims to expand the promotion of carbon peaking and carbon neutrality through the integration of energy and meteorological research.

On 24 January 2022, the National Energy Administration signed an agreement with the Agricultural Bank of China to establish a collaborative partnership, which will seek to improve and accelerate green energy within the energy sector.⁴⁹⁶⁸ Included in this agreement, is a CNY3 trillion investment by the Agricultural Bank of China into the energy sector, over the next five years. The National Energy Administration will focus on industrial planning within the energy sector while the Agricultural Bank of China will focus on high level finances.

On 22 February 2022, the Ministry of Commerce issued a joint document with the National Development and Reform Commission and the Ministry of Industry and Information Technology, outlining 22 key areas in promoting sustainable lifestyles in the Chinese economy.⁴⁹⁶⁹ The Implementation Plan for Promoting Green Consumption is designed to strengthen green technologies, provide institutional reforms on related policies, and certify commercial products that meet the evaluation criteria.

On 25 March 2022, the People's Bank of China announced the establishment of carbon emission reduction support for commercial banks.⁴⁹⁷⁰ The toolkit includes financial aid to existing green and low-carbon industries, as well as further support to promote the transition into a green economy.

On 19 April 2022, Minister of the Ministry of Ecology and Environment Huang Renqiu signed a Memorandum of Understanding on Cooperation between China and the state of California.⁴⁹⁷¹ The memorandum included joint agreements on strengthening bilateral cooperation on addressing climate change.

On 19 April 2022, the Ministry of Education issued a comprehensive plan to enhance the higher education system's capacity to provide adequate training regarding carbon peaking and carbon neutrality.⁴⁹⁷² The plan incorporates green energy and low-emission education into the teaching system and provides new opportunities for research and innovation in post-secondary institutions.

On 30 May 2022, the State Council released the Notice of High-Quality Development Implementation Plan, which gave in-depth directions on the incorporation of hydro and wind energy into the power

grid. The Plan committed to accelerating the construction of new green power plants to adapt to the evolving demand of clean energy, as well as strengthening international cooperation in the industry.⁴⁹⁷³

On 3 June 2022, Chinese ambassador to Fiji Qian Bo joined Prime Minister of Fiji Frank Bainimarama to sign a memorandum of mutual understanding. China promised to invest in Fiji's climate adaptation and mitigation capacities and construct solar projects. The memorandum is a continuation of the south-south cooperation between the two countries started in 2014.⁴⁹⁷⁴

On 26 July 2022, the Ministry of Ecology and Environment met with their Egyptian counterparts in a videoconference to deliver aid materials as part of China's South-South Cooperation Program on Climate Change. This first instalment of materials includes energy-saving street lamps, household solar generators and energy-efficient air conditioners, and will help promote sustainable lifestyles for low-income Egyptians.⁴⁹⁷⁵

China has fully complied with its commitment to accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. China has taken strong actions to address climate mitigation, adaptation, and finance, while also taking actions constituting international collective actions. By signing the Declaration on Forests and Land Use, China has contributed to climate mitigation. Cooperative relationships with developing countries in the Pacific Island region constitute a collective action. The agreement with the Chinese Meteorological Administration to improve extreme weather warning signs contributes to climate adaptation. The CNY3 trillion into the energy sector contributes to climate finance.

Thus, China receives a score of +1.

cent by 2030, using a 2020 baseline.”⁴⁹⁷⁷ Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that France joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁴⁹⁷⁸ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 3 November 2021, Minister of Ecological Transition Barbara Pompili announced an action plan to accelerate the development of photovoltaics, to reduce reliance on fossil fuels.⁴⁹⁷⁹ Measures include placing additional solar projects on buildings and unused land, including mandatory solar panels on warehouses and parking lots. The action sets a target of 1,000 solar projects on public land by 2025.

On 4 November 2021, Minister Pompili signed a new sector contract for energy transition industries for 2021-2023.⁴⁹⁸⁰ The contract aims to accelerate the energy transition while developing French industry and jobs in this sector, through bringing together various energy transition industries to work collaboratively on renewable energy.

On 5 November 2021, Minister of Agriculture and Food Julien Denormandie announced the launch of a new seeds and plants plan for sustainable agriculture.⁴⁹⁸¹ The plan outlines various measures aimed to increase the diversity of plant varieties, produce sustainable and environmentally friendly produce, support the development of new agricultural techniques to adapt to climate change, and provide scientific advice to the Government.

On 8 November 2021, Minister Pompili announced 10 measures to accelerate the development of renewable energy projects with local governance, including the development of 1,000 new local governance projects, and working with financial players to simplify access to bank financing within the framework of these projects.⁴⁹⁸² France aims to increase the share of renewable energy as a portion of the total energy consumption to 33 per cent by 2030.

On 15 November 2021, Minister Pompili announced the installation of the National Council for the Circular Economy, which will provide information, consultations, and monitoring of progress on

issues related to climate resilience and national waste.⁴⁹⁸³ The Council will also support a national strategy to ban single-use plastic packaging.

On 7 December 2021, Minister Pompili launched the French branch of the Space Climate Observatory.⁴⁹⁸⁴ This agency will examine and monitor the impacts of climate change at the local level by combining data from satellite observations with other sources.

On 10 December 2021, Minister Pompili announced EUR420 million to accelerate the development of industrial biotechnologies and the manufacture of biosourced products for use as sustainable fuels.⁴⁹⁸⁵ Industrial biotechnologies and biosourced products can be a solution to environmental degradation and climate change by helping to reduce dependence on fossil fuels, act as a carbon sink by absorbing carbon from the atmosphere, act as a substitute for other harmful compounds, and be more recyclable and reusable.

On 14 December 2021, Minister Pompili launched the call for projects to support innovation in building energy systems and air treatment. This aims to reduce the energy consumption of buildings and decrease the carbon output.⁴⁹⁸⁶

On 15 December 2021, Minister Delegate for Transport Jean-Baptiste Djebbari launched the National Observatory for Daily Carpooling.⁴⁹⁸⁷ This aims to allow France to track data on carpooling practices, assess the impact of government measures, and allow local authorities to rapidly adapt their public policies to reduce carbon emissions from the total number of vehicles on the road.

On 23 December 2021, Minister Denormandie, Minister Delegate for Industry Agnès Pannier-Runacher, and Secretary General for Investment Guillaume Boudy announced the launch of the opening three new calls for projects to support the deployment of innovative food systems solutions, funded by EUR207 million.⁴⁹⁸⁸ These projects will help develop more climate change resilient crops and livestock, the development of eco-friendly agricultural infrastructure, and agricultural practices that preserve soil and water.

On 6 January 2022, France declared that in order to reduce greenhouse gas emissions, the installation of heating or hot water production equipment running on fuel oil will be prohibited from July 2022.⁴⁹⁸⁹ Any new equipment installed for heating or hot water production in residential or commercial buildings using other energy sources must also comply with a greenhouse gas emissions ceiling.

On 10 January 2022, France announced an additional EUR100 million to depollute and reconvert wasteland from industrial or urban development sites, to reduce consumption of natural, agricultural and forest areas by 2032, and mitigate the contributions to climate change.⁴⁹⁹⁰

On 19 January 2022, the French Development Agency announced four new projects in collaboration with Vietnam, aimed to help adapt farmers to the effects of climate change and increase agricultural resiliency.⁴⁹⁹¹

On 8 February 2022, the French Development Agency announced EUR800,000 to support the development of sustainable fisheries in Indonesia.⁴⁹⁹² The agreements include preliminary studies in four ports, including environmental, social, economic and climatic studies, as part of efforts to adapt fisheries to climate change.

On 10 February 2022, President Emmanuel Macron announced France's new energy strategy, based on renewable energies and nuclear energy.⁴⁹⁹³ France announced its intention to increase wind and solar energy. France announced that it would no longer close any active nuclear reactors, with the exception for safety reasons, and would extend the life cycle of all currently active nuclear power plants beyond 50 years. In addition, 6 new reactors will be built by 2050, and studies will be launched for the construction of an additional 8 reactors.

On 10 February 2022, President Macron announced EUR500 million for several projects aimed at supporting new research and models of nuclear reactors, including in nuclear fission and fusion.⁴⁹⁹⁴ These projects are aimed at improving the production, efficiency, and cleanliness of nuclear power plants. President Emmanuel Macron also announced EUR50 million for a research program on technology for energy systems, and EUR400 million to support industry adoption of renewable energies through the launch of call for projects.⁴⁹⁹⁵

On 11 February 2022, at the One Ocean Summit, the President Macron announced that the French Southern Territories' nature reserve would be extended.⁴⁹⁹⁶ While protecting the biodiversity of the area, the nature reserve areas also absorb carbon dioxide, helping combat climate change.

On 14 February 2022, Minister Djebbari announced EUR65 million in aid for subsidising the use of heavy electric vehicles, including the construction of electric charging stations for electric vehicles.⁴⁹⁹⁷ The subsidy can cover up to 65 per cent of the cost difference between an electric vehicle and its diesel equivalent, as well as up to 60 per cent of the cost of electric recharging stations. Transport is amongst the sectors that contribute the most to climate change, and this measure is aimed at reducing the carbon output of the logistics and freight transport industry.

On 17 February 2022, Minister Pompili announced EUR100 million in new funding for new energy saving projects, under the Energy Savings Certificates program.⁴⁹⁹⁸ These programs include reducing energy consumption caused by the use of digital technology, providing support to small and medium sized enterprises to reduce their energy use, supporting municipalities with renovating public lighting to save electricity.

On 17 February 2022, Minister of Ecological Transition, Barbara Pompili, announced EUR100 million in new funding for new energy saving projects, under the Energy Savings Certificates program. These programs include reducing energy consumption caused by the use of digital technology, providing support to small and medium sized enterprises to reduce their energy use, supporting municipalities with renovating public lighting to save electricity.⁴⁹⁹⁹ On 1 March 2022, Minister Delegate for Transport, Jean-Baptiste Djebbari, announced funding for two more projects under the Energy Savings Certificates program. Projects will support the use of artificial intelligence in the transport sector, thus improving logistics and saving on fuel use, as well as a project to support the transition to transporting goods by river, sea, and rail, rather than road.⁵⁰⁰⁰

On 2 March 2022, Minister Pompili issued a decree that government subsidies for connecting biomethane production facilities to natural gas networks would be increased from 40 per cent to 60 per cent.⁵⁰⁰¹ This effort will facilitate the development of new biomethane production facilities. This measure is aimed to reduce reliance on fossil fuels and transition to more sustainable sources of energy.

On 4 March 2022, Minister Denormandie signed a contract with the President of the Board of Directors of the National Center for Forest Property, Marie Bateau.⁵⁰⁰² The contract aims to strengthen the actions of private forest owners in the sustainable management of wood and the transition to low-carbon production and energy use.

On 9 March 2022, Minister Pompili announced EUR450 million for a call for projects to develop new solutions to improve the recyclability of materials, such as paper and cardboard, textiles, and composite materials.⁵⁰⁰³ This call for projects aims to develop solutions that improve the design of materials to make them easier to recycle and to develop new technologies to make recycled materials easier to incorporate into new manufactured goods. These measures are aimed at helping France transition to a circular economy and reduce energy consumption.

On 11 March 2022, France issued a decree that allows for new uses of treated wastewater, such as cleaning roads and replenishing groundwater.⁵⁰⁰⁴ This measure is aimed at conserving water, which is becoming scarce as a result of climate change, as well as helping France transition to a circular economy.

On 14 March 2022, Prime Minister Jean Castex announced the launch of two wind turbine farms in the Mediterranean.⁵⁰⁰⁵ The Prime Minister launched a competitive bidding process for the development of these wind turbine farms. These wind turbine farms are expected to eventually produce enough electricity to support 2.9 million people, reducing reliance on non-renewable sources of energy.

On 15 March 2022, Secretary of State for Biodiversity, Bérangère Abba, outlined the first stage of France's National Biodiversity Strategy. Actions under the strategy include 500 operations by 2025 to combat invasive species, restore degraded ecological areas, preservation of 50,000 hectares of wetlands by 2026, restore 55 coastal areas in danger of erosion by 2030, and mobilizing youth through 1,000 educational initiatives by 2025. Protecting biodiversity in the face of climate change will mitigate the effects of environmental damage.⁵⁰⁰⁶

On 16 March 2022, Minister Pompili announced EUR150 million to support the increased heat fund intervention credits by 40 per cent.⁵⁰⁰⁷ This will allow local authorities and companies to finance the replacement of heating systems running on natural gas with renewable energies (e.g. biomass, geothermal energy).

On 17 March 2022, France announced an increase in the MaPrimeRénov grant by EUR1,000.⁵⁰⁰⁸ This grant subsidizes individuals who wish to replace their gas or oil powered boiler with a renewable powered heater. An increase in the grant will make it more affordable to purchase a renewable heating system, thus reducing reliance on fossil fuels.

On 17 March 2022, France announced the launch of a new national plan for the protection of wetlands from 2022 to 2026. Measures under the plan include doubling the protected wetlands area in mainland France by 2030, preserving wetlands by acquiring 8,500 hectares by 2026, accelerating the extension of the Ramsar network for protected wetlands in France, restoring 50,000 hectares of wetlands by 2026, developing economic and leisure practices that preserve wetlands, and developing low-carbon label methods that promote wetland protection and restoration projects. These measures will help preserve wetlands, which play an important role in regulating the climate and mitigating the impacts of climate change.⁵⁰⁰⁹

On 18 March 2022, France adopted a decree approving the National Strategy for the Development of Rail Freight.⁵⁰¹⁰ The National Strategy aims to improve and expand on rail travel, which produces less carbon emissions and pollution than road transportation. The National Strategy outlines 72 concrete measures which aim to improve the service of rail networks, improve the infrastructure of rail freight development, and develop connections with ports and rivers.

On 25 March 2022, France launched a compensation program of EUR63 million to support farmers insured against climate risks. The compensation program provides financial support to farmers, and is intended to supplement any compensation they have already received under private insurance policies.⁵⁰¹¹

On 29 March 2022, Minister Pompili signed a new contract between the government and the Electricity Transport Network.⁵⁰¹² The contract will support France's transition to net carbon energy consumption, and outlines 40 strategic objectives to help the Electricity Transport Network adapt to renewable energy. Measures include long-term planning for future renewable energy projects at sea, supporting the decarbonization of the Network, and increasing the resiliency of the electrical network.

On 30 March 2022, France issued a decree that bans heated or air-conditioned terraces.⁵⁰¹³ Infringements can be fined up to a maximum of EUR1,500. This measure is aimed at reducing energy waste from heating or cooling outdoor spaces.

On 5 April 2022, France issued a decree that requires delivery platforms with more than 50 workers to use a set amount of low emissions vehicles with two or three wheels, bicycles and electrically assisted bicycles.⁵⁰¹⁴ The share of the platforms' vehicles that must be low emissions vehicles with two or three wheels, bicycles and electrically assisted bicycles must be a minimum of 20 per cent by 2023, increasing over time until it reaches 100 per cent by 2030.

On 6 April 2022, France issued an ordinance to help adapt housing to coastal erosion caused in part by climate change and rising sea levels. The ordinance creates a new type of lease for buildings located by a coastline, which allows for early termination of leases in case the safety of individuals and property cannot be guaranteed.⁵⁰¹⁵ The ordinance allows for deviation from existing construction and zoning law in coastal areas if existing measures conflict with relocating property to safer conditions in the case of coastline erosion.

On 13 April 2022, Minister Pompili, Minister Denormandie, Minister Pannier-Runacher, and Secretary of State for Biodiversity Bérangère Abba announced an additional EUR100 million for the 6 water management agencies in France.⁵⁰¹⁶ The additional funding will help support agricultural sectors to adapt to climate change, help local authorities reduce the risk of water shortages, and help build the resiliency of natural environments by reducing water pollution and promoting the refill of groundwater.

On 13 April 2022, France issued a decree that prohibits advertisers from marketing a product or service as carbon neutral, unless they present a graph of greenhouse gas emissions over the entire life cycle of the product or service, as well as the methods of offsetting residual emissions.⁵⁰¹⁷ These elements must be easily accessible to the public and updated on an annual basis. This measure is aimed to inform the public on carbon neutral products and services, and prevent greenwashing.

On 14 April 2022, France issued a decree that outlines the steps that private companies, local authorities, organisations, and the Government need to take for the reduction, reuse and recycling of single-use plastic packaging. France aims for 100 per cent of single use plastic packaging to be recyclable by 2025, in support of a circular economy.⁵⁰¹⁸

On 22 April 2022, France announced a zero-interest rate loan to purchase new or used vehicles, electric or rechargeable hybrids, in low mobility emission zones that exceed acceptable levels of air quality standards.⁵⁰¹⁹ Loans of up to EUR30,000 for purchases and EUR10,000 for rentals can be offered to

individuals as well as small businesses. Low mobility emissions zones in Paris and the Metropolises of Greater Paris, Lyon, Aix-Marseille and Rouen are eligible for the program.

On 22 April 2022, France announced a zero-interest rate loan to purchase new or used vehicles, electric or rechargeable hybrids, in low mobility emission zones that exceed acceptable levels of air quality standards.⁵⁰²⁰ Loans of up to EUR30,000 for purchases and EUR10,000 for rentals can be offered to individuals as well as small businesses. Low mobility emissions zones in Paris and the Metropolises of Greater Paris, Lyon, Aix-Marseille and Rouen are eligible for the program.

On 25 April 2022, France issued a decree that requires natural gas suppliers to contribute to the production of biogas.⁵⁰²¹ Natural gas suppliers can fulfill these requirements by directly producing biogas injected into a natural gas network, or by acquiring certificates from biogas producers.

On 25 April 2022, Minister of the Armed Forces Florence Parly approved a Climate & Defense ministerial strategy.⁵⁰²² The Ministry of the Armed Forces will commit to developing knowledge and forecasting capabilities for the strategic challenges posed by climate change, adapt defense tools to challenges caused by climate change, and collaborate with other ministries and governments on defense issues related to climate change.

On 26 April 2022, France issued a decree that domestic flights for aircraft operators subject to the EU Emissions Trading System are required to offset greenhouse gas emissions from flights.⁵⁰²³ For the year 2022, operators must offset 50 per cent of their emissions, increasing to 100 per cent of their emissions from 2024. Operators of aircraft generating more than 1,000 tonnes of carbon dioxide per year are required to report to the Ministry of Ecological Transition their emissions from previous year, as well as an offset report outlining the reductions and sequestrations of these declared emissions.

On 26 April 2022, France issued a decree that changes the rules for the classification of heating and cooling networks.⁵⁰²⁴ This decree helps promote the networks' development in priority areas, and thus encourage local authorities to pursue the development of renewable energies and the fight against greenhouse gas emissions. This classification makes it possible to connect new buildings to a heating or cooling network or to replace a heating or cooling installation located in the priority area perimeter of the network.

On 26 April 2022, France issued a decree that changes the rules for the classification of heating and cooling networks. or cooling network or to replace a heating or cooling installation located in the priority area perimeter of the network.⁵⁰²⁵

On 28 April 2022, Minister of Ecological Transition, Barbara Pompili, launched a new call for bids to support the development of biomethane producing facilities in France. France will issue a contract to purchase biomethane gas from the winning bidders over a period of 15 years. This measure is aimed to reduce France's reliance on fossil fuels.⁵⁰²⁶

On 29 April 2022, France issued a decree that regulates the environmental claims of companies and makes consumer information on the environmental claims required on products.⁵⁰²⁷ This information needs to be available at the time of purchase of the products, and will need to let consumers know the proportion of recycled material, their recyclability, the presence of hazardous substances, precious metals or rare earths, or their compostability or their reusability. This measure is aimed at reducing product waste and energy usage, and thus contributing to a circular economy.

From 9 May to 20 May 2022, France participated in the COP15 on Desertification.⁵⁰²⁸ France announced a contribution of EUR155 to the Abidjan initiative launched by Côte d'Ivoire, which will support sustainable agricultural production practices, especially in the production of cocoa beans.

On 26 May 2022, Prime Minister Élisabeth Borne announced several measures to help farmers with drought and economic hardship.⁵⁰²⁹ Measures include policies on preserving water resources, organizing drought committees at local levels, EUR400 million for farmers to help mitigate the consequences of the war in Ukraine, and setting up a crop insurance project. The Prime Minister also announced that the funding for crop protection materials and irrigation equipment would be doubled to EUR40 million.

On 3 June 2022, Minister of State for Development, Francophonie and International Partnerships, Chrysoula Zacharopoulou, attended the Stockholm+50 Summit to address issues on climate, biodiversity and pollution. The Minister proposed a plan that would call for protecting 30 per cent of the land and oceans.⁵⁰³⁰

On 21 June 2022, France launched FR-Alert, a system for sending warning notifications on mobile phones of people located in an area facing serious danger, such as natural disaster, biological, chemical

or industrial accident, terrorist act. This warning system will be helpful in informing people of forest fires, floods, and other natural disasters made more likely by climate change.⁵⁰³¹

On 28 June 2022, France approved new legislation to limit the consumption of products that contribute to deforestation or forest degradation, including due diligence regulators for traders of palm oil, beef, wood, coffee, cocoa and soya. The new legislation will be supported by the development of a benchmarking system for third party countries, where high risk countries will be subject to higher controls and monitoring.⁵⁰³²

On 29 June 2022, France led the European Commission to adopt a legislative package on climate change, which aims to reduce the EU's net greenhouse gas emissions by at least 55 per cent by 2030, and achieve net neutrality by 2050. The legislative package included adopting a common agreement on EU emissions trading system, emissions and removals from land use, land-use change and forestry, the creation of a social climate fund, and new CO2 emission performance standards for road vehicles.⁵⁰³³

On 30 June 2022, France announced the extension of the subsidy to purchase low-emissions vehicles until 31 December 2022. France also announced an increase in the maximum purchase cost of the vehicle, from EUR45,000 to EUR47,000.⁵⁰³⁴

On 13 July 2022, France announced the launch of a call for Frugal Artificial Intelligence projects to support ecological transition, in particular to find solutions for sustainable cities and innovative buildings. The call is funded with EUR40 million over a period of five years.⁵⁰³⁵

On 13 July 2022, Minister Delegate for Transport, Clément Beaune, announced the launch of the call for projects for autonomous, carbon-free boat prototypes, intended to transport people during the 2024 Olympic Games. These prototypes are intended as a step forward in environmentally sustainable water transportation, and serve as an alternative to carbon-heavy road transportation.⁵⁰³⁶

On 14 July 2022, President Emmanuel Macron announced an “energy sobriety” plan aimed at reducing gas and electricity consumption by 10 per cent compared to 2019 levels. Working groups were launched at the State level, at the businesses level, as well as with public and commercial buildings.⁵⁰³⁷

On 18 July 2022, Minister of the Interior and Overseas Gérald Darmanin committed to increasing the number of resources dedicated to fighting forest fires in Gironde, bringing to total to 9 planes and 11 heavy trucks. In addition, Prime Minister, Élisabeth Borne, asked all State services, local authorities and local players to be fully mobilized in response to 15 regions being placed on red alert for heat waves.⁵⁰³⁸ On 21 July 2022, President Emmanuel Macron promised a project to replant the 20,600 hectares of forest destroyed by the forest fire.⁵⁰³⁹

On 18 July 2022, France signed a strategic partnership agreement on energy cooperation with the United Arab Emirates. The partnership will identify joint investment projects in France, the United Arab Emirates or globally in the fields of hydrogen, renewable energies, or nuclear energy.⁵⁰⁴⁰

On 28 July 2022, Agnès Pannier-Runacher, Minister of Energy Transition announced several measures to improve energy efficiency of buildings and housing. France announced a 25 per cent threshold increase for energy savings certificates, EUR150 million for projects to support households facing energy and fuel shortages and launching a consultation.⁵⁰⁴¹

On 28 July 2022, Agnès Pannier-Runacher, Minister of Energy Transition announced several emergency measures to help the development of renewable energy production, which had been placed at risk due to rising costs from inflation. Measures include allowing renewable energy projects to sell energy on the market before contracts take effect, or to allowing projects to increase energy production before bids have been completed.⁵⁰⁴²

On 16 August 2022, France announced a bonus of up to EUR400 for the purchase of a new bicycle, as well as up to EUR3,000 for the purchase of an electrical bicycle that replaces a carbon-emitting vehicle. These grants will allow citizens to purchase a low-carbon method of transportation.⁵⁰⁴³

On 25 August 2022, France announced an increase to EUR24.3 million in the grant provided to municipalities to support biodiversity.⁵⁰⁴⁴

On 27 August 2022, Prime Minister, Élisabeth Borne, announced the creation of a “green fund” to accelerate the ecological transition. This fund, intended for communities, will be funded with EUR1.5 billion for 2023, to help support responses to environmental issues.⁵⁰⁴⁵

On 1 September 2022, France announced EUR10 million to develop or rehabilitate 10,000 kilometres of nature trails. This initiative is intended to preserve and restore natural habitats and biodiversity within France’s metropolitan areas and overseas areas, which are increasingly threatened as a result of climate change.⁵⁰⁴⁶

On 5 September 2022, France announced the creation of a new ecological reserve – the Arjuzanx National Nature Reserve in the Landes. The area, which encompasses 2,205 hectares, will contribute to the conservation of ecological diversity. The reserve will be granted EUR150,000 per year to carry out management, preservation, and educational activities.⁵⁰⁴⁷

On 12 September 2022, France announced the launch of a call for projects to use natural fermentation techniques to accelerate the agricultural and food revolution to develop healthy and sustainable food. The call is intended to develop more robust food and food processes in the face of climate change, and is funded with EUR48.3 million.⁵⁰⁴⁸

France has taken strong actions to address climate mitigation, adaptation, and finance, while also taking actions constituting international collective actions. France is addressing climate mitigation through the commitment to renewable and nuclear energy (e.g. facilitating the production of biomethane, wind, solar, and nuclear power plants); as well as working to reduce emissions through the subsidizing of low emission alternatives for transportation (e.g. developing railways, carbon offsetting aviation industries).. France is addressing climate adaptation by providing financial support to those most affected by climate change (e.g. farmers), and combating the effects of drought, coastal erosion, and wetland habitat loss associated with climate change. France is addressed climate finance by providing financial incentives for private companies to develop projects to address climate change (e.g. research on new nuclear or biomass technology) and for individuals to adapt lifestyle choices that reduce their carbon emissions (e.g. subsidies to switch to renewable energy boilers and low emissions vehicles). France is contributing to international collective by providing funding to other countries (e.g. South Africa) to help them transition to low emissions energies, as well as signing international agreements on climate action (e.g. Beyond Oil and Gas Alliance).

Thus, France receives a score of +1

Germany: +1

Germany has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, by promoting green energy, climate financing and fossil fuel reduction policies. Germany has further used collective action by engaging in multilateral agreements hosted by the United Nations.

On 2 November 2021, the United Nations announced Germany joined the Global Methane Pledge.⁵⁰⁴⁹ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁵⁰⁵⁰ Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that Germany joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁵⁰⁵¹ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 8 November 2021, Germany announced their support for developing countries in regards to the adaptation of climate change with EUR150 million.⁵⁰⁵² This financial support will assist in funding Global environment facilities. This international financing will allow the poorest countries to help mitigate climate change.

On 11 November 2021, Germany committed under a joint declaration to introduce a nuclear-free European Union Taxonomy.⁵⁰⁵³ Under this new policy, Germany will monitor climate neutrality by using the nuclear-free European Union policies to ensure that products are marked as sustainable use or finance nuclear power. This allows Germany to be a global leader in sustainable finance.

On 11 November 2021, Germany in partnership with the United Kingdom, the United States, France and the European Union created an agreement with South Africa after COP26 to phase out coal.⁵⁰⁵⁴ The focus will be to transition the electricity generation from coal combustion to other sustainable forms of energy.

On 13 November 2021, Germany announced their strength support for the Santiago Network to assist with the damaging effects of climate change in developing countries.⁵⁰⁵⁵ Germany has pledged EUR10 million to helping developing countries amongst the Santiago Network with loss and damages that occur with climate change.

On 14 November 2021, Germany, under the Paris Agreement agreed to change the double-counting policy for emission reductions.⁵⁰⁵⁶ Thus, emission reductions may only be counted once either in the purchasing country or the country where the measure is implemented, allowing emission trading to help increase climate action.

On 1 December 2021, Germany pledged EUR7.5 million to support school cycle paths in Landau as an initiative to reduce carbon emissions and promote climate protection.⁵⁰⁵⁷ This funding will aid to support designated bicycle roads and the construction of wheel friendly streets to promote climate protecting through the means of cycling.

On 13 December 2021, the Federal Ministry for Economic Affairs and Climate Protection announced further funding for electric vehicles with the intention to switch to clean mobility.⁵⁰⁵⁸ These financial incentives will increase electric mobility and increase climate projection.

On 23 December 2021, the Federal Ministry for Economic Affairs and Climate Protection pledged 900 million towards green hydrogen initiatives to provide the advancement of this international market.⁵⁰⁵⁹

On 16 March 2022, Germany and Norway agreed to hydrogen imports.⁵⁰⁶⁰ This joint venture allows for the increase of renewable energies and energy efficiency and will reduce the consumption of fossil fuels for both parties.

On 25 May 2022, Germany joined the US in signing a joint declaration on the cooperation of their two houses on environmental issues.⁵⁰⁶¹ This joint agreement will assist in solving current commonalities of environmental challenges on both ends and promote bilateral cooperation.

On 27 June 2022, Germany committed to taking climate change initiatives by reaching key decisions reaching an agreement on binding EU energy efficiency targets and expanding renewable energy.⁵⁰⁶² Germany has increased the renewable energy target to 40 per cent by 2030. These commitments allow Germany to rely less on fossil fuels and look towards expanding renewable energies within the EU.

On 22 August 2022, Germany joined the international coalition against plastic pollution with the intention on ending plastic pollution by 2040.⁵⁰⁶³ In addition to this, the coalition has three main strategic goals with its international bunding framework that includes: limiting plastic consumptions and production to a sustainable level, establishing a circular economy for plastics and ensuring the environmentally friendly handling of plastic.

On 29 August 2022, Germany has presented EUR188,000 dollars to climate adaption in Offenburg.⁵⁰⁶⁴ This funding is intended to help set up sustainable climate adaptation management to assist with the current extreme weather concerns in Offenburg.

On 16 September 2022, Federal Environmental Minister Steffi Lemke presented the district mayor of Tempelhof-Schoeneberg with grant approval for climate change adaptation.⁵⁰⁶⁵ This grant additionally provides local communities with a network of special mentoring programs for climate adaptation and a measure of qualifications for climate change adaptations.

On 21 September 2022, Germany committed to EUR1.5 billion for international biodiversity protection from 2025.⁵⁰⁶⁶ This action is instead to demonstrate an important signal for the protection of forests and other endangered ecosystems worldwide and for an ambitious result of the world conference on Nature in December 2022 in Montreal.

⁵⁰⁶⁶ Reliable partner for global nature conservation: Germany is increasing its international funding for biological diversity to 1.5 billion euros per year by 2025, Federal Minister for Environment, Nature Conservation, Nuclear Safety and Consumer Protection (Berlin) 21 September 2022. Access Date: 23 September 2022. <https://www.bmuv.de/pressemitteilung/verlaesslicher-partner-bei-weltweitem-naturschutz-deutschland-steigert-seine-internationale-finanzierung-fuer-biologische-vielfalt-bis-2025-auf-15-milliarden-euro-pro-jahr>

Germany has taken strong action in all three identified categories of climate action: mitigation, adaptation, and finance, with at least one action constituting international, collective action involving at least one other state. Germany has contributed to climate mitigation through joining the global methane pledge, which also constitutes an international collective action. Germany has contributed to climate adaptation and climate finance through their pledge EUR10 million to help developing countries in the Santiago Network with loss and damages that occur with climate change.

Thus, Germany receives a score of +1.

Analyst: Jennifer Lam

India: +1

India has partially complied with its commitment to accelerate their actions across mitigation, adaptation and finance, by promoting green energy, advancing climate justice and waste-free policy frameworks. India has further used collective action to promote marine research and resource management.

On 2 November 2021, the United Nations announced that India joined the Global Methane Pledge.⁵⁰⁶⁷ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference, is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁵⁰⁶⁸ Because methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 24 November 2021, the Cabinet Committee on Economic Affairs of India approved the continuation of the research and development scheme O-SMART (Ocean Services, Modeling, Application, Resources and Technology).⁵⁰⁶⁹ This program will assist in the research and technology development that would assist in the capacity building of the oceanographic field. This scheme would strengthen India’s oceanography and technology development.

On 17 December 2021, India in partnership with Vietnam, signed a memorandum of understanding with the intention of scientific and technical cooperation in marine science and ecology.⁵⁰⁷⁰ This joint partnership between India and Vietnam aims to further scientific and applied research in regards to advancing ocean science and further improve the understanding of oceans. This partnership also provides collective research in marine science and ecology between both countries. This Memorandum of Understanding will be valid for the period of five years.

⁵⁰⁶⁷ Launch by United States, the European Union, and Partners of the Global Methane Pledge to Keep 1.5C Within Reach, European Commission (Brussels) 2 November 2021. Access Date: 21 February 2022. https://ec.europa.eu/commission/presscorner/detail/en/statement_21_5766

⁵⁰⁶⁹ Cabinet approved continuation of the umbrella scheme “Ocean Services, Modelling, Application, Resources and Technology (O-SMART),” Ministry of Earth Science, (New Delhi) 24 November 2022. Access Date: 15 May 2022. <https://moes.gov.in/sites/default/files/pib-1774581.pdf>

⁵⁰⁷⁰ India and Vietnam today signed a Memorandum of Understanding (MoU) towards promoting scientific and technical cooperation in marine science and ecology, Ministry of Earth Science, (New Delhi) 17 December 2021. Access Date: May 15 2022. <https://moes.gov.in/sites/default/files/PIB1782766.pdf>

On 3 February 2022, India merged two national afforestation programs to make a budgetary head. The purpose of these programs is to help find degraded forest areas.⁵⁰⁷¹ This effort has allowed for greater green efforts and better tree plantation promotion to assist in climate change efforts.

On 17 February 2022, India announced their Green Hydrogen Policy with the intention to bring down the global warming levels by transitioning their fossil fuel-based stocks to Green Hydrogen/Green Ammonia as the energy carriers and as chemical feedstock for different sectors.⁵⁰⁷²

On 18 July 2022, India announced that they would be prohibiting single-use plastic items that have low utility and high littering potential.⁵⁰⁷³ This regulation is intended to promote circular economy and sustainability in India.

On 31 August 2022, India and Nepal signed a memorandum of understanding in regard to the field of biodiversity.⁵⁰⁷⁴ This will assist in strengthening and enhancing cooperation in the field of forests, wildlife, environment, biodiversity and climate change.

India has fully complied with its commitment to accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. India has taken strong actions to address climate mitigation, including an action that constitutes an international collective action. This can be seen with the decision to join the global methane pledge. Furthermore, India has taken actions towards climate adaptation by prohibiting single-use plastic.

Thus, India receives a score of +1.

cent by 2030, using a 2020 baseline.”⁵⁰⁷⁶ Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that Indonesia joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁵⁰⁷⁷ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 15 November 2022, Indonesia introduced a carbon tax, costing a minimum rate of IDR30 per kilogram of CO₂ equivalent.⁵⁰⁷⁸ The regulation introduced a cap-and-trade system, along with a fund to be established to facilitate carbon trading.

On 8 February 2022, the Ministry of Maritime Affairs and Fisheries, and the French Development Agency, signed an agreement to support the development of sustainable fisheries in Indonesia.⁵⁰⁷⁹ The agreements include preliminary studies in four ports, including environmental, social, economic and climatic studies, as part of efforts to adapt fisheries to climate change.

On 24 February 2022, Indonesia issued a decree enacting Indonesia’s Forestry and Other Land Use (FOLU) NET SINK 2030 plan. The plan outlines actions for sustainable forest management, environmental governance, carbon governance.⁵⁰⁸⁰

On 5 July 2022, Indonesia announced a joint collaboration with Great Britain to develop a low-carbon transportation program in Indonesia. Britain provided GBP9 million for the development of low-carbon urban mass transportation in Indonesia, including electric Bus Rapid Transit systems and rail systems.⁵⁰⁸¹

On 12 September 2022, Indonesia announced a partnership with Norway to support Indonesia’s efforts to reduce greenhouse gas emissions in the forestry sector. Efforts include reducing emissions, adopting better forest management techniques, reducing fires, strengthening law enforcement, and sharing knowledge. Indonesia will also build 30 nurseries that are capable of growing at least 10 million tree seedlings per year.⁵⁰⁸²

Indonesia has taken action in two identified categories of climate action: adaptation and climate finance, but shows limited action in mitigation. Indonesia has taken action in climate adaptation through the enactment of the Forestry and Other Land Use (FOLU) NET SINK 2030 plan, which calls for sustainable forestry practices. Indonesia has taken action on climate finance through the introduction of a cap-and-trade system for carbon. Indonesia has taken international action by partnering with the French Development Agency to support sustainable fisheries in Indonesia.

Thus, Indonesia receives a score of 0.

⁵⁰⁸⁷ Italy makes constitution greener, environmentalists call for action, Reuters (Rome) 9 February 2022. Access Date: 1 October 2022. <https://www.reuters.com/world/europe/italy-makes-protecting-environment-part-constitution-2022-02-08/>

industry and private economic initiatives must not damage the health of the public or the environment. The constitution now also includes animal protection.

On 27 May 2022, the General Directorate of the Mountain Economy and Forests adopted the provision that allocates EUR420 million to the National Forest Strategy between 2022-2023.⁵⁰⁸⁸ Among the goals of this strategy is to increase the biological diversity of forest ecosystems and to prevent or repair damage caused by natural and anthropogenic risks.

Italy has fully complied with its commitment to accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. Italy has taken strong actions towards climate mitigation, climate adaptation, climate finance, and has taken actions that constitute international collective actions. The decision to join both the Global Methane Pledge and the Declaration on Forests and Land Use contribute to climate mitigation and are international collective actions. The allocation of funding to companies recovering from natural disasters and adverse climatic events contribute to both climate adaptation and climate finance.

Thus, Italy receives a score of +1.

Analysts: Sylvia Mursbed, Surabhi Pradhan and Jenna Im

Japan: +1

Japan has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, Prime Minister Fumio Kishida announced Japan's "Net-zero by 2050" plan which aims to reduce greenhouse gas emissions by 46 per cent in fiscal year 2030 from 2013 levels.⁵⁰⁸⁹ The plan includes a JPY2 trillion Green Innovation Fund to develop better batteries, synthetic fuels, and other commodities essential to electric vehicle production. Japan will invest USD14.8 billion in climate change adaptation and disaster mitigation and approximately USD240 million to help finance global forestry conservation.

On 2 November 2021, the United Nations announced that Japan joined the Global Methane Pledge.⁵⁰⁹⁰ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take "national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline." Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

⁵⁰⁸⁸420 million for the implementation of the National Forest Strategy: funds available for 2022 and 2023 allocated by the 2022 Stability Law, Ministry of Agricultural, Food, and Forestry Policies (Rome) 27 May 2022. Translation provided by: Google Chrome. Access Date: 26 June, 2022.

On 2 November 2021, the United Nations announced that Japan joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁵⁰⁹¹ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 14 January 2022, Japan announced it will provide USD13 million in emergency grant aid to the Philippines to assist in recovering from damages caused by Typhoon Odette.⁵⁰⁹² The emergency grant aid will fund humanitarian assistance activities through international nongovernmental organizations providing food, shelter, and health services. This constitutes climate change adaptation through the provision of financial support to a country facing the adverse effects of climate change.

On 4 February 2022, the government announced it will provide USD2.44 million in emergency grant aid to Tonga following damages caused by a volcanic eruption and tsunami.⁵⁰⁹³ The aid will help the implementation of humanitarian assistance through the United Nations Children's Fund and the World Food Programme. This constitutes climate change adaptation through the provision of financial support to a country facing the adverse effects of climate change.

On 22 March 2022, the Ministry of Foreign Affairs announced Japan has contributed USD6 million to the Adaptation Fund, a multilateral climate fund assisting developing countries in adapting to the adverse effects of climate change.⁵⁰⁹⁴ The initiative aims to address the Paris Agreement's emphasis on aiding vulnerable developing countries. This constitutes climate change adaptation through financing a multilateral instrument that assists developing countries in adapting to worsening climate conditions.

On 19 August 2022, the Environmental Regeneration and Material Cycles Bureau of the Ministry of the Environment of Japan and the Department of Local Administration of the Ministry of the Interior of the Kingdom of Thailand signed a memorandum of cooperation for the mutual strengthening of waste management and recycling policies.⁵⁰⁹⁵ The effective period will last for five years, and the cooperation will consist of regular policy dialogues, exchanges in information on policy development and implementation, and the organization of workshops, seminars, and conferences. This action addresses the commitment to strengthen global efforts to further climate change adaptation and mitigation through sustainable waste management practices.

On 25 August 2022, the Ambassador of Japan to the Republic of Senegal, Osamu Izawa, and Minister of Environment and Sustainable Development of the Republic of Senegal, Adbou Karim Sall, signed a memorandum of cooperation on the Joint Crediting Mechanism (JCM).⁵⁰⁹⁶ The Republic of Senegal

⁵⁰⁹⁵ Environmental Regeneration and Material Cycles Bureau, Ministry of the Environment of Japan, and Department of Local Administration, Ministry of the Interior of the Kingdom of Thailand, sign a Memorandum of Cooperation in the Field of Waste Management, Ministry of the Environment of Japan (Tokyo) 23 August 2022. Access Date: 25 August 2022. https://www.env.go.jp/en/press/press_00416.html

⁵⁰⁹⁶ Japan and the Republic of Senegal sign the Memorandum of Cooperation for establishing the JCM, Ministry of the Environment of Japan (Tokyo) 25 August 2022. Access Date: 25 September 2022. https://www.env.go.jp/en/press/press_00492.html

is the eighteenth partner country in the JCM program. The JCM is a market mechanism framework used to promote emission reductions through the dissemination of decarbonizing technologies and infrastructure from Japan to partnering developing countries. This action is in accordance with Article Six of the Paris Agreement and contributes to the mitigation of carbon emissions on a global scale.

On 26 August 2022, Minister for Foreign Affairs of Japan, Yoshimasa Hayashi, and Minister of Foreign Affairs, Migration and Tunisian Abroad of the Republic of Tunisia, Othman Jerandi, signed a memorandum of cooperation on the Joint Crediting Mechanism, becoming the nineteenth partner country.⁵⁰⁹⁷ This will allow Japan to contribute to the nationally determined contributions of both countries by sharing decarbonizing systems and services. This action is in accordance with Article Six of the Paris Agreement and contributes to the mitigation of carbon emissions on a global scale.

On 30 August 2022, Minister of the Environment of Japan, Akihiro Nishimura, and Coordinating Minister for Maritime Affairs and Investment of the Republic of Indonesia, Luhut Pandjaitan, signed the Comprehensive Environmental Cooperation Package on Climate-Biodiversity Conservation-Circular Economy-Nexus.⁵⁰⁹⁸ The package will promote cooperation on pressing environmental issues in the G20 and induce over USD700 million in private and public investments in decarbonization, biodiversity conservation, and the circular economy. This action advances climate change adaptation and mitigation in an international framework, promoting cooperation among countries to reach the Paris Agreement goals.

On 5 September 2022, the Ambassador of Japan to the Republic of Azerbaijan, Junichi Wada, and Minister of Ecology and Natural Resources of the Republic of Azerbaijan, Mukhtar Babayev, signed a memorandum of cooperation on the Joint Crediting Mechanism, becoming the twentieth partner country.⁵⁰⁹⁹ This will allow Japan to work closely with Azerbaijan to establish carbon mitigation systems with Joint Crediting Mechanism credits. This action is in accordance with Article Six of the Paris Agreement and contributes to the mitigation of carbon emissions on a global scale.

On 6 September 2022, the Ambassador of Japan to the Republic of Moldova, Yoshihiro Katayama, and Minister of Environment of the Republic of Moldova, Iuliana Cantaragiu, signed a memorandum of cooperation on the Joint Crediting Mechanism, becoming the twenty-first partner country.⁵¹⁰⁰ This will allow Japan to work closely with Moldova to establish carbon mitigation systems with Joint Crediting Mechanism credits. This action is in accordance with Article Six of the Paris Agreement and contributes to the mitigation of carbon emissions on a global scale.

On 13 September 2022, the Ambassador of Japan to Georgia, Akira Imamura, and Minister of Environment Protection and Agriculture of Georgia, Otar Shamgia, signed a memorandum of cooperation on the JCM, becoming the twenty-second partner country.⁵¹⁰¹ This will allow Japan to work closely with Georgia to establish carbon mitigation systems with Joint Crediting Mechanism

⁵¹⁰¹ Japan and Georgia Sign the Memorandum of Cooperation for Establishing the JCM, Ministry of the Environment of Japan (Tokyo) 13 September 2022. Access Date: 25 September 2022. https://www.env.go.jp/en/press/press_00444.html

credits. This action is in accordance with Article Six of the Paris Agreement and contributes to the mitigation of carbon emissions on a global scale.

On 16 September 2022, the Government of Japan announced it would allocate emergency grant aid of USD 7 million to Pakistan to assist in the recovery from damages caused by the floods this summer.⁵¹⁰² The aid will go to humanitarian assistance activities and resources through international organizations including the World Food Program, International Organization for Migration, and UNICEF. This action constitutes climate change adaptation financing.

Japan has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. Japan has taken strong action in all three identified categories of climate action: mitigation, adaptation, and finance, with at least one action constituting international, collective action involving at least one other state. Japan's investment of USD14.8 billion in climate change adaptation and disaster mitigation contributes to climate mitigation, adaptation, and finance. Further, their decision to join the global methane pledge and the expansion of JCM partnerships constitutes international collective action.

Thus, Japan receives a score of +1.

On 29 December 2021, the Ministry of Environment signed an agreement with Incheon Metropolitan City, Gyeongsangbuk-do, Korea Productivity Center, Korea Green Foundation, and Hyundai Steel to recycle spent coffee grounds.⁵¹⁰⁶ The aim is to recycle 200,000 tons of coffee grounds into a sawdust substitute of deodorant which will save up to KRW20 billion in waste processing costs as well as reduce carbon emissions by 338kg/ton. This constitutes to adapting industrial policy to help mitigate waste and emissions.

On 12 January 2022, the Ministry of Environment announced its plan for 2022 with three core tasks: full implementation for carbon neutrality, integrated water management, and expansion of inclusive environmental services.⁵¹⁰⁷ Each core task is accompanied by an in depth plan on how it will be achieved. The Ministry aims at keeping on track for the 2030 greenhouse gas reduction goal and 2050 carbon neutrality commitment with measures including scrapping old diesel vehicles and promoting eco-friendly electric appliances in households.

On 26 January 2022, the Ministry of Environment announced the government will implement a deposit system for disposable cups in major fast food and café chains from 10 June 2022.⁵¹⁰⁸ The plan will have consumers pay a KRW300 deposit per disposable cup which can be reclaimed when returning the cup to any of the 38,000 stores that will be subject to the deposit system. The disposable cups, both paper and plastic, will then be sent to recycling companies. As recycling saves energy, this policy will reduce carbon emissions. As of 20 May 2022, the government has decided to postpone the implementation of this policy to December 2022, acknowledging that many small to medium-sized businesses are struggling to recover from the effects of the pandemic.⁵¹⁰⁹

On 27 January 2022, Minister of Environment Han Jeoung Ae committed to strengthen the national environmental health services to protect socially vulnerable groups that are particularly susceptible to extreme temperatures.⁵¹¹⁰ Environmental health experts will visit 1,500 low-income households to assess living conditions and the ministry aims to provide indoor heaters and air purifiers as needed as part of climate change adaptation measures.

On 14 March 2022, Minister Han Jeoung Ae simplified the requirements for recycling used coffee grounds of coffee shops which had been classified as household waste.⁵¹¹¹ As a household waste, their disposal options were either by landfilling or incineration which created unnecessary carbon emissions. This change addresses climate change mitigation by aiming to reduce emissions by allowing coffee grounds to be a circular resource.

On 24 March 2022, Minister Han Jeoung Ae signed a memorandum of understanding on the establishment of a “Special Hydrogen Mobility Zone” with Gyeonggi-do Provincial Government, Pyeongtaek City, Hyundai Motor Company, SK E&S, Hyundai Glovis, and Korea Gas Technology Corporation.⁵¹¹² The project involves supplying 850 hydrogen-powered commercial vehicles for Pyeongtaek City, including trucks and buses, to replace the much higher carbon-emitting internal-combustion engine vehicles. The Ministry of Environment will assist the project through administrative and financial support.

On 31 March 2022, Minister Han Jeoung Ae signed a memorandum of understanding on the pilot projects for greener delivery services with the Seoul Metropolitan Government, the Korea Automobile Environmental Association, and Coupang e-commerce company.⁵¹¹³ The projects will aim to create wireless charging stations for electric trucks that are suitable for logistics and provide a mechanism to allow companies to convert internal-combustion engine trucks into electric trucks. This action contributes to an adaptation in the service industry to reduce vehicular carbon emissions.

On 26 April 2022, the Cabinet passed a partial amendment of the Enforcement Decree of the Act on the Promotion of Saving and Recycling of Resources which will see fifteen plastic products becoming subject to recycling obligations.⁵¹¹⁴ This contributes to an adaptation in industrial practices that mitigates greenhouse gas emissions.

On 9 May 2022, Minister Han Jeoung Ae and Minister of Environment and Tourism of Mongolia, Bat-Ulzii Bat-Erdene, signed an “Implementing Arrangement for Cooperation on Paris Agreement Article 6 Cooperative Approach (Agreement for Global GHG Reduction)” and an “Memorandum of Understanding on Environmental Cooperation.”⁵¹¹⁵ The agreement specifies how the signatories will cooperate in responding to climate change through sharing policies and establishing a joint committee

⁵¹¹⁵ Korea and Mongolia to Pursue Cooperation in the Mitigation of GHG in Accordance with Article 6 of the Paris Agreement, Ministry of Environment (Sejong) 9 May 2022. Access Date: 14 May 2022.

<http://eng.me.go.kr/eng/web/board/read.do?pagerOffset=0&maxPageItems=10&maxIndexPages=10&searchKey=&searchValue=&menuId=461&orgCd=&boardId=1523930&boardMasterId=522&boardCategoryId=&decorator=>

to monitor the implementation. This action satisfies the global effort aspect of the commitment by working with another country to address climate change.

On 21 June 2022, Minister of Environment, Han Wha-jin, announced plans to increase renewable energy production from 3,264 GWh in 2021 to 5,764 GWh in 2026, enough to supply 1.38 million households with electricity.⁵¹¹⁶ The plan will utilize biogas, floating solar farms, and hydropower derived from wastewater treatment facilities, water filtration plants, and dams. This commitment addresses climate change adaptation as it works to improve infrastructure to meet a more renewable standard.

On 30 June 2022, the Ministry of Environment amended the Enforcement Decree of the Clean Air Conservation Act to manage gas heat pumps as air pollutant emitting facilities.⁵¹¹⁷ Gas heat pumps will have newly permissible standards for emitting nitrogen oxide, carbon monoxide, and total hydrocarbons beginning in January 2023. This action constitutes climate change mitigation as it helps limit greenhouse gas emissions from a newly recognized pollutant emitting source.

On 17 August 2022, Minister of Environment, Han Wha-jin, announced the revision of the Enforcement Rules of the Clean Air Conservation Act which will be enforced on 1 January 2023.⁵¹¹⁸ The revision details the extension of the early scrappage subsidy program for grade four diesel vehicles that emit ultrafine particles. The ministry of Environment estimates an annual reduction in emissions of ultrafine particles by 3,400 tons and GHGs by 4.7 million tons. This action addresses climate change mitigation by significantly reducing emissions from polluting vehicles.

On 5 September 2022, Minister of Environment, Han Wha-jin, announced a significant ease in the criteria for recognizing circular resources and the establishment of a system to recycle captured carbon dioxide using Carbon Capture, Utilization, and Storage technology.⁵¹¹⁹ The standards outlined to classify a substance as a circular resource have been reduced from nine to two. This will lower the carbon dioxide emissions from incineration and will lessen the burden on the waste management sector. This action constitutes climate change adaptation and mitigation as it reduces emissions and promotes future sustainability with a circular economy.

On 19 September 2022, Minister of Environment, Han Wha-jin, Busan Metropolitan Government, Hyundai Motors, Busan Port Authority, Busan Metrobus Company Association, and Busan Techno Park signed a memorandum of understanding to replace 1,000 diesel buses into hydrogen fuel cell

buses in Busan by 2025.⁵¹²⁰ Busan aims to increase its competitiveness as a carbon-free exhibition in a bid to host the World Expo 2030. This action addresses climate change adaptation as it contributes to an infrastructural transformation towards sustainability.

Korea has taken strong action to address climate mitigation and adaptation, and has also taken action constituting international, collective action involving at least one other state. Their climate plan for 2022 contributes to climate mitigation, and their strengthened national environmental health services contribute towards climate adaptation. In leading the creation of the “Special Hydrogen Mobility Zone,” the Ministry of Environment has provided financial support for climate change mitigation. Further, the decision to join the global methane pledge constitutes an international collective action.

Thus, Korea receives a score of +1.

Analyst: Kenji Tan

Mexico: 0

Mexico has partially complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the Ministry of Foreign Relations announced Mexico joined the Global Methane Pledge.⁵¹²¹ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁵¹²² Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the Ministry of Foreign Relations announced Mexico had formally joined the Declaration on Forests and Land Use that was drafted at COP26.⁵¹²³ The document pushes for the conservation and restoration of forests and other torrential ecosystems, improving rural livelihoods, redesigning agricultural policies, and promoting food security.⁵¹²⁴

On 13 December 2021, the Ministry of the Environment and Natural Resources announced a new protected natural area located in the municipalities of Mexquitic de Carmona, San Luis Potosí, Villa de Reyes and Villa de Arriaga in the state of San Luis Potosí.⁵¹²⁵ This area spans over 111,000 hectares

and is made up of ecosystems that are crucial for the conservation of biological diversity with over 700 species of plants and 300 species of animals.

On 3 February 2022, the Ministry of Environment and Natural Resources announced an agreement in which the Federal Maritime-Terrestrial Zone in Isla Chica, Holbox, Quintana Roo is designated a protected area.⁵¹²⁶ Included in this agreement are actions for the protection, conservation and sustainable management of the resources in the region.

On 8 February 2022, the National Agency for Industrial Safety and Environmental Protection of the Hydrocarbons Sector signed a coordination agreement with the Government of the State of Puebla to improve mechanisms for the disclosure and compliance with the law that regulates the protection of the environment in the hydrocarbons sector, as well as releasing emissions into the atmosphere and managing of waste from it.⁵¹²⁷ This coordinated effort will identify and share information about situations with higher risks of causing environmental damage, with the goal of preventing negative outcomes.

On 22 February 2022, the Ministry of Environment and Natural Resources unveiled the General Strategy for Territorial Planning, an effort in coordination with the Ministry of Agrarian, Territorial, and Urban Development.⁵¹²⁸ It aims to shift the uses of land into a model that is more fair, balanced, and sustainable. The policy is part of a broader push to help plan areas in a way that integrates both the needs of communities and the environment, which thereby protects local areas while guaranteeing improvements in wellbeing.

On 24 March 2022, the Ministry of Environment and Natural Resources signed two agreements with the State of Tlaxcala which will allow for the prevention, control, mitigation, remedy, and repair of the damage incurred by the environment and natural resources by the various economic sectors within the state.⁵¹²⁹ This is created in hopes of promoting economic activity that is conscious of the need to protect the environment while also creating mechanisms to adapt to the effects of climate change.

On 1 April 2022, the Ministry of Environment and Natural Resources established a Critical Habitat zone in the mountainous wetlands of La Kisst and María Eugenia in the town of San Cristobal de las Casas, Chiapas.⁵¹³⁰ Through the creation of this mechanism, the Ministry is striving to ensure the protection and conservation of the flora and fauna residing in the ecosystems of La Kisst and María Eugenia.

On 19 April 2022, the Ministry of Environment and Natural Resources and the government of the State of Nayarit signed a collaboration agreement that allows for participatory urban planning of the

municipality of Bahía de Banderas and thus allow for sustainable development in the region.⁵¹³¹ Through this initiative, it is hoped that new policies are developed that allow for sustainable development in the region of Bahía de Banderas-Vallarta.

On 25 May 2022, the Ministry of Environment and Natural Resources and the government of Yucatan signed and ratified agreements to allow for coordinated efforts to tackle issues of land use planning, pig farms and the Federal Maritime-Terrestrial Zone.⁵¹³² The agreements are targeting the objective of harmonizing legislative instruments of different levels of government in the nation, allowing for cross-government collaboration in environmental issues in the state of Yucatan.

On 17 August 2022, the Ministry of Environment and Natural Resources launched, SIAT which expects to help with the monitoring of mitigation and adaption actions within the country.⁵¹³³ Through this, it is expected that it will be easier to track what has been conducted to fulfill the Paris Agreement, improving reporting.⁵¹³⁴

Mexico has taken strong actions towards climate mitigation through initiatives like creating new environmentally protected areas and building frameworks to encourage more sustainable planning practices. Further, the decision to join both the Global Methane Pledge and the Declaration on Forest and Land Use constitute international collective actions. Additionally, establishing collaboration agreements with lower levels of governments supports the goal of climate adaption by formalizing procedures to better deal with the impacts of climate change. Nevertheless, Mexico has yet to take concrete steps toward the goal of climate financing.

Thus, Mexico receives a score of 0.

Analyst: Mateo Larrazabal

Russia: 0

Russia has partially complied with its commitment to accelerate its actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that Russia joined 141 other countries in committing to the Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference.⁵¹³⁵ The Declaration reaffirms collective and individual commitments to the UN

⁵¹³⁵ Glasgow Leaders' Declaration on Forest and Land Use, United Nations (Glasgow) 2 November 2021. Access Date: 21 February 2022. <https://ukcop26.org/glasgow-leaders-declaration-on-forests-and-land-use/>

Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 8 February 2022, Deputy Prime Minister for Environmental Policy Viktoria Abramchenko announced their plans to invest RUB5.9 into climate and decarbonization research over the span of the next eight years.⁵¹³⁶ The state-funded research program will focus on studying climate change and strategies for adaptation and decarbonization. The government hopes the program and funding will reduce air pollution and improve the health of those in heavily industrialized cities. By monitoring industrial carbon emissions and boosting Russian ecosystems' the country will be able to better understand environmental changes and predict possible risks, to reduce them.

Russia has partially complied with its commitment to accelerate actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. Russia has taken action towards climate mitigation through signing the Declaration on Forests and Land Use. Further, this agreement constitutes a collective international action. Russia has not taken actions towards climate adaptation or climate finance.

Thus, Russia receives a score of 0.

Analysts: Jenna Im and Surabhi Pradhan

Saudi Arabia: 0

Saudi Arabia has partially complied with its commitment to accelerate their actions across mitigation, adaptation, and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that Saudi Arabia joined the Global Methane Pledge.⁵¹³⁷ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference, is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.” Due to the fact that methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 23 December 2021, Assistant Minister of Foreign Affairs for Executive Affairs, Abdulhadi bin Ahmed Al-Mansoori, increased the energy efficiency of the Ministry of Foreign Affairs headquarters by 31.98 per cent.⁵¹³⁸ By upgrading the air-conditioning, lighting and control systems, over 5.59 million kilowatt-hours or 3,700 metric tons of harmful carbon emissions will be saved annually.

On 24 January 2022, the Ministry of Economy & Planning signed a Memorandum of Understanding with the King Abdullah University of Science and Technology.⁵¹³⁹ The three-year agreement primarily facilitates collaboration in research for sustainable development, especially with respect to offshore coastal systems, desert agriculture and low carbon fuels. Additionally, it creates programs in talent and capacity development as well as innovation inducement.

On 26 April 2022, the Government of the government of Saudi Arabia signed an agreement to purchase between 50,000 and 100,000 electric vehicles over a ten-year period.⁵¹⁴⁰ The agreement aims to reduce carbon emissions through adoption of these vehicles and by promoting the manufacture and development of environmentally friendly vehicles.

On 28 May 2022, the Saudi Ministry of Economy and Planning announced a collaboration with the World Economic Forum to research solutions to sustainability problems such as food security, food stability and resilient agricultural systems.⁵¹⁴¹

On 16 July 2022, the Saudi Minister of Energy, along with the U.S. Senior Advisor for Energy Security joined an agreement regarding cooperation in establishing a Circular Carbon Economy and deploying Carbon Capture, Utilization and Storage technologies.⁵¹⁴²

On 4 September 2022, the Kingdom of Saudi Arabia announced USD2.5 to the International Atomic Energy Agency to support the use of nuclear technology.⁵¹⁴³

Saudi Arabia has taken actions to address climate mitigation, but has not taken any actions to address climate adaptation or climate finance. The efforts of the government in increasing the energy efficiency of the Ministry of Foreign Affairs headquarters, conducting research in sustainable development and making its fleet of vehicles environmentally friendly contributed towards climate mitigation. By joining the global methane pledge, Saudi Arabia contributed to climate mitigation and engaged in an international collective action.

Thus, Saudi Arabia receives a score of 0.

On 2 November 2021, President Cyril Ramaphosa, announced that South Africa will cooperate with France, Germany, the United Kingdom, the United States, and the European Union to strive toward “a just transition to a low carbon economy and a climate-resilient society.”⁵¹⁴⁴ The South African government submitted a revised Nationally Determined Contribution to reduce domestic carbon emissions with the range of 420 CO₂-eq and 350 CO₂-eq by 2030. In this partnership, supporting countries would finance USD8.5 billion within the next three to five years to aid South Africa to undergo the transition for investing in renewable energy or the development of new low-carbon industries.

On 29 March 2022, four tree species were added to the list of protected trees in South Africa.⁵¹⁴⁵ This designation prohibits anyone from cutting, damaging, or owning the tree unless they were granted express permission from the Minister to do so.

South Africa has partially complied with its commitment to take strong action in all three identified categories of climate action: mitigation, adaptation, and finance, and at least 1 action constituting international, collective action involving other states. South Africa addressed climate mitigation through the partnership with France, Germany, the UK and the US, which also constitutes an international collective action. However, South Africa did not contribute towards climate adaptation or climate finance.

Thus, South Africa receives a score of 0.

Analyst: Wesley Cheung

Turkey: 0

Turkey partially complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that Turkey joined 141 other countries in committing to the Declaration on Forests and Land Use at the 26th United Nations Climate Change Conference.⁵¹⁴⁶ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 1 June 2022, the “Vocational and Technical Education Cooperation Protocol” was signed between the Ministries of Agriculture and Forestry and the Ministry of National Education.⁵¹⁴⁷ This agreement aims to follow the developments in the field of agriculture and to train the qualified manpower needed by the agriculture and food sectors.

On 9 August 2022, the Ministry of Agriculture and Forestry of Turkey published a regulation, turning 18 million tons of food waste by hostels, restaurants, and cafeterias into animal feed.⁵¹⁴⁸ With the regulation, the food can be fed to domestic, ornamental, laboratory animals, and animals from zoos and circuses. This new regulation will significantly reduce the amount of municipal solid waste.

Turkey partially complied with its commitment to take action in all three identified categories of climate action: mitigation, adaptation, and finance, and at least one action constituting international, collective action involving other states. Turkey addressed climate mitigation by committing to the declaration on Forests and Land Use, which also constitutes an international collective action. Turkey has not taken actions towards climate adaptation or climate finance.

Thus, Turkey has received a score of 0.

On 9 May 2022, the Environment Agency pledged a minimum of GBP3.5 million and a maximum of GBP5 million to repair a collapsed flood wall in Matlock, UK.⁵¹⁵³ This funding will also contribute towards a long-term solution to protect 50 homes and businesses from River Derwent flooding.

On 31 May 2022, the Department for Business, Energy, and Industrial Strategy allocated over GBP31 million to support British industries in reducing their reliance on fossil fuels and their production of carbon emissions.⁵¹⁵⁴ More specifically, this funding will be used in the development of red diesel alternatives, such as e-fuels and green hydrogen, as well as technologies which capture and store energy.

On 16 June 2022, the Forestry Commission developed the Woodland Creation Accelerator Fund with GBP7.8 million to support local authorities in hiring and training new staff.⁵¹⁵⁵ The goal of training these new staff is to enhance woodland creation and tree planting plans.

On 22 June 2022, the government released GBP636,548 of additional emergency funding to be allocated to flood victims in Bangladesh.⁵¹⁵⁶ The purpose of this emergency funding is to provide financial assistance, shelter management, water and sanitation, and educational materials to communities and individuals affected by the flooding in Bangladesh.

On 8 July 2022, the Department for Business, Energy & Industrial Strategy announced the funding of GBP54 million to develop technologies to aid in removing carbon emissions from the atmosphere.⁵¹⁵⁷ The projects which will receive the funding will aid in the UK reaching its climate change targets. The funding will also help in developing a new greenhouse gas removal industry within the UK.

On 2 August 2022, the Department for Business, Energy & Industrial Strategy announced up to GBP635 million in funding for public sector organizations to install low carbon heating and energy efficiency measures.⁵¹⁵⁸ This funding will also help taxpayers and public organizations save GBP650 million per year in energy bills over the next 15 years. This funding can be provided for schools, hospitals, leisure centres and historic town halls. Organizations will be able to reduce their use of fossil fuels through the installation of low carbon heating systems, which will be powered by cleaner, renewable energies.

On 4 August 2022, innovative biomass projects across the UK received government funding of GBP37 million.⁵¹⁵⁹ GBP32 million of funding is directed towards projects that will increase the production of

sustainable biomass, which can be used as a renewable energy source. GBP5 million of the funding is directed towards supporting innovative technologies to generate hydrogen from biomass and waste.

On 17 August 2022, the Department for Environment, Food and Rural Affairs, the Environment Agency, and Rural Payments Agency announced support for farmers impacted by dry weather for the year.⁵¹⁶⁰ The country relaxed its rules to allow farmers to cut or graze areas of land set aside in their previous agreements in lieu of the changing climate. These changes will make it easier for farmers to provide vital foods for livestock. The new rules will also help increase access to bedding, fodder, grazing or foraging in ways that limit environmental impacts.

On 27 August 2022, the Department for Environment, Food and Rural Affairs, Natural England, and Rt Hon Lord Nenyon announced the banning of the sale of horticultural peat by 2024.⁵¹⁶¹ The ban aims to preserve England's peatlands, which are the UK's largest carbon store. The banning of amateur uses of peats will contribute towards the country's efforts to restore 35,000 hectares of peatlands by 2025 and achieve net zero.

On 2 September 2022, the government of UK provided nuclear projects across the UK with funding to help develop the next generation of nuclear reactors.⁵¹⁶² The funding of GBP3.3 million, provided from the Advanced Modular Reactor Research, Development and Demonstration programme will support the development of the nuclear technology, helping revolutionize and decarbonize the UK's energy. The funding will support the innovation of 6 of the winning projects, until they are able to attract private investments.

On 22 September 2022, the Department for Environment, Food & Rural Affairs, and the Forestry Commission announced the Seed Sourcing Grant.⁵¹⁶³ The Grant will enhance the quality, quantity and diversity of domestic tree seed sources, create greener jobs and help reach the country's net zero target. The Grant received the funding of GBP1.2 million.

On 23 September 2022, the Department for Business, Energy & Industrial Strategy, and Lord Callanan announced GBP49.4 million in funding to support the British industry, end their reliance on fossil fuels and reduce the cost of energy.⁵¹⁶⁴ The funding will be awarded to pioneering projects across the country in order to drive economic growth through the transition towards low carbon energy.

On 3 October, the government announced the site for the country's first fusion energy plant for the Spherical Tokamak for Energy Production.⁵¹⁶⁵ This plant, which has received the funding of GBP220

million from the government, will provide safe, sustainable, and low carbon energy. It is expected for the plant to also attract further development nationwide.

On 3 October 2022, the UK Partnering for Accelerated Climate Transition implemented a project in Mexico to help mitigate the effects of climate change.⁵¹⁶⁶ Specifically, the production of coffee will be aided in the state of Veracruz. Through planting tree species that favour conservation of the biodiversity in the regions ecosystem and region, the community will benefit from an improved quality of life and decarbonization in the area.

On 6 October 2022, the United Kingdom government launched a GBP20 million competition to research the use of hydrogen in the effort for a cleaner and more efficient transportation sector.⁵¹⁶⁷ The competition aims to clear the air and lower carbon emissions emitted from transport buses and delivery vehicles. The competition will develop long term solutions for using hydrogen in transport, and decarbonize the nation's transport sector, providing energy security.

The United Kingdom has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement. The United Kingdom has taken strong actions to address climate mitigation, adaptation, and finance, while also taking actions constituting international, collective action.

Thus, the United Kingdom receives a score of +1.

Analysts: Jyoti Kalsi, Jenna Im and Surabhi Pradhan

United States: +1

The United States has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the United Nations announced that the United States joined the Global Methane Pledge.⁵¹⁶⁸ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁵¹⁶⁹ Because methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that the United States joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁵¹⁷⁰ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 3 November 2021, the Department of Energy announced the Net-Zero World Initiative, which provides its country partners with assistance in developing and implementing a technology and investment strategy to meet the goal of net-zero emissions.⁵¹⁷¹ The initiative currently involves Argentina, Chile, Egypt, Indonesia, Nigeria, and Ukraine.

On 8 November 2021, the U.S. Agency for International Development announced its plan for climate mitigation and adaptation investment by mobilizing a targeted USD150 billion by 2030.⁵¹⁷² The plan includes working with partner governments in Colombia, Philippines, South Africa, Vietnam, Indonesia, and India, as well as with private partners.

On 15 November 2021, the United States passed the Bipartisan Infrastructure Law Clean School Bus Program, providing USD5 billion over the next five years to replace existing school buses with low- or no-emission electric buses.⁵¹⁷³ The United States aims to replace around 500,000 diesel school buses to reduce emission of greenhouse gases and particulate matter.

On 3 December 2022, the U.S. Department of Agriculture announced USD633 million to set up climate-friendly systems for rural businesses and to improve the availability of biofuel.⁵¹⁷⁴

On 7 December 2022, the U.S. Department of Agriculture announced up to USD800 million to support biofuel production and infrastructure.⁵¹⁷⁵ The decision aims to nullify the losses due to the COVID-19 pandemic and to support refuelling and distribution centres.

On 12 January 2022, the U.S. Department of Agriculture committed USD9 million to support climate research and their acquisition by the agricultural sector.⁵¹⁷⁶

On 13 January 2022, the Department of Energy announced USD420 million supporting preliminary research on clean energy technology, low-carbon manufacturing, and quantum information science at the DOE's Energy Frontier Research Centers.⁵¹⁷⁷

On 25 January 2022, the Department of Energy committed USD25 million to eight research projects on the development of wave energy technologies.⁵¹⁷⁸ The purpose of this research is to “[diversify] and [expand] clean energy sources will usher in a new era of energy independence that makes the grid more resilient, curbs the climate crisis, and saves Americans money on their energy bills.”

On 2 February 2022, the Department of Energy and the Departments of Homeland Security and Housing and Urban Development committed to rebuild, expand and fortify the Puerto Rican electrical grid using funds amounting to USD12 billion.⁵¹⁷⁹ The initiative establishes energy stores and improves the electrical power system while making it more resilient.

On 2 February 2022, the Department of Energy and the Departments of Homeland Security and Housing and Urban Development launched the two-year long Puerto Rico Grid Resilience and Transitions to 100 per cent Renewable Energy (PR100) study. While considering climate justice, it aims to provide a pathway to 100 per cent renewable energy, resilient power systems, affordable energy and cleaner air.

On 7 February 2022, Agriculture Secretary, Tom Vilsack, announced the United States Department of Agriculture will provide incentives worth USD1 billion to farmers to implement climate-smart technologies and monitor the greenhouse gas benefits associated with them.⁵¹⁸⁰ This action aims to support cost-effective innovations to reduce emissions and the market for climate-smart commodities.

On 10 February 2022, the Departments of Transportation and Energy allocated almost USD5 billion over a five-year period under the new National Electric Vehicle Infrastructure Formula Program.⁵¹⁸¹ It aims to make electric vehicle charging accessible by installing electric vehicle charging stations along the Alternative Fuels Corridor.

On 14 February 2022, the Department of Energy granted USD175 million to 68 high-risk and high-impact research projects on the development of clean energy such as electric vehicles, offshore wind energy and nuclear energy.⁵¹⁸²

⁵¹⁸² DOE Announces \$175 Million for Novel Clean Energy Technology Projects, U.S. Department of Energy (Washington) 14 February 2022. Access Date: 20 May 2022 <https://www.energy.gov/articles/doe-announces-175-million-novel-clean-energy-technology-projects>

On 17 February 2022, the Department of Energy granted USD36 million to 11 projects aiming to reduce the production of nuclear waste and to improve measures of storage.⁵¹⁸³ These projects will “support safe and sustainable domestic fuel stocks, and advance our nation’s clean energy portfolio.”

On 22 February 2022, the Department of Energy granted USD150 million in research funds for increasing the efficiency and decreasing the carbon footprint of clean energy manufacturing and technologies.⁵¹⁸⁴ Under the Energy Earthshots initiatives, this action supports chemical and materials research with the goal of developing solar and nuclear energy, carbon capture, energy storage and mineral usage in manufacturing.

On 14 March 2022, the U.S. Department of Energy allocated USD32 million to support over 30 renovation projects aiming to improve energy efficiency.⁵¹⁸⁵

On 18 March 2022, the U.S. Department of Energy and the U.S. Department of Labor launched a national workforce training program in lithium-battery manufacturing, with an investment of USD5 million.⁵¹⁸⁶

On 21 March 2022, the Department of Energy allocated nearly USD9 million to 14 projects by tribal communities to develop a resilient system of clean energy which communities can access at lower costs.⁵¹⁸⁷ These projects are estimated to generate 3.3 megawatts of clean energy, over 3.6 megawatt-hours of battery storage and USD48.5 million in savings.

On 29 March 2022, the U.S. Department of Energy selected 23 communities to receive assistance in reducing pollution and energy costs, increasing energy resilience and creating economic opportunities in clean energy.⁵¹⁸⁸

On 30 March 2022, the U.S. Department of Energy allocated USD3.16 billion for the renovation of thousands of low-income homes to reduce energy usage, under the Weatherization Assistance Program.⁵¹⁸⁹

⁵¹⁸⁹ Biden Administration Announces Investments to Make Homes More Energy Efficient and Lower Costs for American Families, U.S. Department of Energy (Washington) 30 March 2022. Access Date: 30 July 2022 <https://www.energy.gov/articles/biden-administration-announces-investments-make-homes-more-energy-efficient-and-lower>

On 22 April 2022, the U.S. Department of Agriculture allocated nearly USD800 million to energy-efficient infrastructure and rebuilding rural communities affected by climate change.⁵¹⁹⁰

On 2 May 2022, the U.S. Department of Energy announced USD3.16 billion to expand the domestic manufacturing and recycling of batteries used in electric vehicles.⁵¹⁹¹

On 3 May 2022, the U.S. Department of Energy launched the Electric Vehicles for American Low-Carbon Living and granted up to USD45 million to the program.⁵¹⁹² It aims to support research for the development of electric vehicles batteries with improved charging speeds, efficiency and resilience.

On 5 May 2022, the Department of Energy allocated over USD2.3 billion for cutting carbon pollution.⁵¹⁹³ Of this, USD1.25 billion will be used to “accelerate geologic carbon storage projects each capable of permanently storing at least 50 million metric tons of captured CO₂ – the equivalent to the emissions from roughly 10 million gasoline-powered cars a year.”

On 18 May 2022, the Department of Energy announced USD53 million for 259 projects by small businesses to develop clean-energy scientific instrumentations and technologies.⁵¹⁹⁴

On 19 May 2022, the Department of Energy granted USD24.9 million to six research and development projects on the efficiency of hydrogen turbines for the generation of clean electricity.⁵¹⁹⁵

On 20 May 2022, the Department of Energy allocated USD7 million to expand the Industrial Assessment Center Program that helps local manufacturers reduce their energy usage and waste generation.⁵¹⁹⁶

On 25 May 2022, the Department of Energy granted USD38 million to the Net Zero Labs Pilot Initiative that aims to decarbonize four DOE National Laboratories.⁵¹⁹⁷

On 1 June 2022, the Department of Energy announced USD59 million to support research on the establishment of commercial integrated biorefineries, with the aim of decarbonizing the transportation industry.⁵¹⁹⁸

On 6 June 2022, the U.S. Department of Energy announced USD2.3 billion for projects that make the power grid cleaner and more resilient to the effects of climate change.⁵¹⁹⁹

On 7 July 2022, the U.S. Department of Energy awarded USD14 million to 22 projects working towards understanding climate phenomena to help predict climate change events.⁵²⁰⁰

On 8 July 2022, the U.S. Department of Energy awarded USD41.6 million for repairs, weatherization and implementation of other energy-saving technologies in houses.⁵²⁰¹

On 14 July 2022, the U.S. Department of Energy allocated USD18.4 million to seven projects on resolving the barriers to the commercialisation of clean energy technologies.⁵²⁰²

On 14 July 2022, the U.S. Department of Energy committed USD56 million to initiatives aiming to commercialise and recycle solar technologies.⁵²⁰³

On 16 July 2022, the Saudi Minister of Energy, along with the U.S. Senior Advisor for Energy Security joined an agreement regarding cooperation in establishing a Circular Carbon Economy and deploying Carbon Capture, Utilization and Storage technologies.⁵²⁰⁴

On 21 July 2022, the U.S. Department of Energy committed USD96 million to develop cleaner non-road vehicles and to increase the charging accessibility, efficiency and affordability of electric vehicles.⁵²⁰⁵

On 27 July 2022, the U.S. Department of Energy launched the Community Solar Subscription Platform to integrate low-income households to community solar projects.⁵²⁰⁶ Additionally, the DOE announced USD10 million to hire and train workers in the solar industry.

On 27 July 2022, the U.S. Department of Energy's Loan Office Program granted a loan of USD102.1 million to a facility producing graphite-based active anode material, which is used in lithium-ion batteries for green technologies.⁵²⁰⁷

On 28 July 2022, the U.S. Department of Treasury's Office of Financial Research launched the Climate Data and Analytics Hub to develop the government's understanding on financial risks caused by climate change.⁵²⁰⁸ The program permits the integration of public financial data with federal climate data and offers analytical and visualization tools.

On 28 July 2022, the U.S. Department of Energy committed up to USD165 million to develop the technology and understanding required to scale up geothermal energy production.⁵²⁰⁹

On 1 August 2022, the Vice President of the United States, the Department of Homeland Security Secretary and the Federal Emergency Management Agency Administrator announced USD1.16 billion to improve community resilience to extreme weather events like "floods, hurricanes, droughts, wildfires and extreme heat."⁵²¹⁰

On 1 August 2022, the U.S. Department of Energy announced the Cadmium Telluride Accelerator Consortium, with a USD20 million investment, to develop cheaper and more productive cadmium telluride solar cells.⁵²¹¹

On 2 August 2022, the U.S. Department of Energy announced USD 26 million for projects that will illustrate the reliability of a clean energy grid during disruptions.⁵²¹²

On 5 August 2022, the U.S. Department of Energy committed up to USD32 million for research into technology that can detect, assess and mitigate methane emissions from oil and gas production.⁵²¹³

On 12 August 2022, the U.S. Department of Agriculture announced USD197 million for conservation partnerships that address the effects of climate change.⁵²¹⁴

On 15 August 2022, the U.S. Department of Energy committed up to USD44 million to develop and test enhanced geothermal systems technology.⁵²¹⁵

On 23 August 2022, the U.S. Department of Energy allocated USD60 million for research into clean hydrogen technology as well as electrical grid resilience.⁵²¹⁶ The Department's efforts in clean hydrogen research will focus on emissions monitoring, storage technologies and fuel cell durability.

On 24 August 2022, the U.S. Department of Agriculture invested USD121 million in rural infrastructure to increase their energy efficiency.⁵²¹⁷

On 25 August 2022, the Interagency Working Group on Coal and Power Plant Communities and Economic Revitalization created a rapid response team to assist four states in their transition to a cleaner energy infrastructure.⁵²¹⁸

On 25 August 2022, the U.S. Department of Energy committed more than USD540 million to research on green energy and clean production.⁵²¹⁹ The projects will work on efficient use of critical minerals, solar and nuclear energy, improved manufacturing, direct air capture, carbon sinks, energy storage and hydrogen production.

On 26 August 2022, the U.S. Department of Energy allocated more than USD31 million to develop carbon capture technology able to capture at least 95 per cent of the carbon dioxide emitted by power and industrial plants.⁵²²⁰

On 30 August 2022, the U.S. Department of Energy announced USD6.4 million to research on experimental decarbonization technology and carbon capture to redress the effects of coal pollution.⁵²²¹

On 30 August 2022, the U.S. Department of Energy committed USD70 million to improve the Energy Exascale Earth System Model for better climate predictions in the effort against climate change.⁵²²²

On 31 August 2022, the U.S. Department of Energy announced USD46 million to develop technologies that create biofuel and bioproducts from waste streams and carbon dioxide capture.⁵²²³

On 6 September 2022, the U.S. Department of Energy announced USD66 million to research the effects of extreme weather events caused by climate change on urban infrastructure and communities.⁵²²⁴

On 13 September 2022, the U.S. Department of Energy committed USD4.7 million to research on improving the energy efficiency of hydrogen turbines using ceramic matrix composite components.⁵²²⁵

On 13 September 2022, the U.S. Department of Energy committed USD178 million to advance renewable bioenergy research.⁵²²⁶

On 14 September 2022, the U.S. Department of Agriculture (USDA) committed up to USD2.8 billion to assist in the implementation of green agricultural technology that reduces the emission of greenhouse gases and sequesters carbon.⁵²²⁷ Over a five-year period, the USDA aims to sequester over 50 million metric tons of carbon dioxide.

On 16 September 2022, the U.S. Department of Energy announced the American Made prize challenge to support community organisations in developing solutions to clean energy problems.⁵²²⁸

The United States has taken strong actions to address climate mitigation, climate adaptation and climate finance, while also taking actions constituting international collective actions. In terms of the efforts

for climate mitigation, the United States has invested in electric vehicles and numerous research projects on clean energy. The governmental decision to allocate USD12 billion to the Puerto Rican electrical grid contributes to climate adaptation. By joining the global methane pledge, the United States is contributing towards climate mitigation, and the USD1 billion investment into incentives for farmers to implement climate-smart technologies contributes to climate finance. Further, the Net-Zero World Initiative constitutes an international collective action.

Thus, the United States receives a score of +1.

Analyst: Farhan Sakkir Karepilakkejiyl

European Union: +1

The European Union has fully complied with its commitment to accelerate their actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.

On 2 November 2021, the European Commission announced that the European Union joined the Global Methane Pledge.⁵²²⁹ The Global Methane Pledge, signed at the 26th United Nations Climate Change Conference (COP26), is a collective agreement in which the 103 countries that have signed on agree to take “national-level, voluntary actions to contribute to reducing global methane emissions by at least 30 per cent by 2030, using a 2020 baseline.”⁵²³⁰ Because methane contributes significantly to climate change, scientists believe this could prevent 0.2°C of warming by 2050.

On 2 November 2021, the United Nations announced that the European Union joined 141 other countries in committing to the Declaration on Forests and Land Use at COP26.⁵²³¹ The Declaration reaffirms collective and individual commitments to the UN Framework Convention on Climate Change and the Paris Agreement, the Convention on Biological Diversity, the UN Convention to Combat Desertification, the Sustainable Development Goals; and other relevant initiatives, with the goal of reversing forest loss and land degradation.

On 16 November 2021, the Commission of the European Union reached an agreement on the 2022 EU budget.⁵²³² The budget reflects that climate change and green transitions are some of the EU’s main priorities. According to the budget, the EU sets total commitments of EUR562,354 million and total payments of EUR566,018 million on “natural resources and environment.”

On 24 November 2021, the Commission of the European Union approved a EUR2.27 billion Greek plan “for the production of electricity from renewable sources and high efficiency combined heat and power.”⁵²³³ This measure aims to help Greece reduce their emissions by meeting its targets for renewable energy, thus contributing to the European goal of climate neutrality by 2050.

On 25 November 2021, the European Commission approved an investment package of over EUR290 million for the LIFE Programmes for the environment and climate action.⁵²³⁴ This investment will fund 132 new projects which collectively aim to help Europe reach its target to become climate neutral by 2050.

On 2 December 2021, the European Council adopted the Common Agricultural Policy for 2023-2027.⁵²³⁵ The goal of this new policy is to facilitate “fairer, greener and more performance-based Common Agricultural Policy that seeks to ensure a sustainable future for European farmers, provide more targeted support to smaller farms, and allow greater flexibility for member states in adapting the measures to local conditions.”

On 15 December 2021, the European Union Commission approved the allocation of EUR185.9 million to promote the EU agri-food products in and outside the EU.⁵²³⁶ The promotion policy work programme “focuses on products and agricultural practices that support the European Green Deal objectives, such as EU organic products, fruit and vegetables, sustainable agriculture and animal welfare.”

On 20 December 2021, the Commission of the European Union approved a EUR900 million German plan to support investments in the production of renewable hydrogen in non-EU countries, “which will then be imported and sold in the EU.”⁵²³⁷ The goal of the plan is to meet the EU’s increasing demand for renewable hydrogen, and it supports the development of unexploited renewable resources outside of the EU.

On 17 February 2022, the European Commission announced a EUR110 million investment into the LIFE programme, which integrates projects for environmental and climate protection in eleven EU countries.⁵²³⁸ These projects will “contribute to a green recovery from the COVID-19 pandemic and support the European Green Deal’s objectives of making the EU climate neutral and zero-pollution by 2050.” All of which are key actions of delivering the European Green Deal objectives under the EU Biodiversity Strategy for 2030 and the EU Circular Economy Action Plan.

On 1 April 2022, the European Commission signed an agreement with seven large-scale projects via the EU Innovation Fund to allocate EUR1.1 billion grant to fund innovative projects for the EU climate transition.⁵²³⁹ These projects seek to “reduce emissions by over 76 Mt of CO₂eq during the first ten years of operation.” They also deploy innovative low-carbon technologies to key industries such as “hydrogen, steel, chemicals, cement, solar energy, biofuels, and carbon capture and storage.”⁵²⁴⁰

⁵²⁴⁰ Commission awards over €1 billion to innovative projects for the EU climate transition (Brussels) 1 April 2022. Access Date: 30 April 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_22_2163

On 5 April 2022, the European Parliament approved new rules for selecting which energy projects can receive the EU funding and aligning the existing regulation with the EU's Green Deal.⁵²⁴¹ This legislation sets criteria and the methodology for choosing energy projects of common interests. This new rule promotes energy infrastructure policy; support hydrogen, carbon capture, and storage; and increase the security of supply.

On 28 April 2022, the European Commission announced that 100 European Union cities will be participating in “the European Union Mission for 100 climate-neutral and smart cities by 2030.”⁵²⁴² A hundred cities coming from twenty-seven Member States, with twelve additional cities coming from countries associated with the Horizon Europe, will participate in research and innovation actions to transition their cities to become climate-neutral by 2030. This Cities Mission will receive ERU360 million of Horizon Europe funding covering the period 2022 to 2023. The Cities Mission will also include custom assistance from a dedicated Mission Platform run by NetZeroCities.

On 4 May 2022, the Parliament of the European Union approved new guidelines for the funding of trans-European energy infrastructure, which further aligns the regulation with the EU's Green Deal.⁵²⁴³ This regulation sets the criteria for choosing energy projects that are eligible to receive EU funding. The updated regulation supports projects related to the development of hydrogen infrastructure and carbon capture and storage, and it now excludes new projects based on natural gas.

On 16 May 2022, the Council of the European Union adopted a revised Trans-European Networks for Energy Regulation, which facilitates the cross-border connection of member states' energy infrastructure.⁵²⁴⁴ The regulation aims to further help the EU achieve its 2050 climate neutrality objectives while ensuring market integration, competitiveness, and security of supply.

On 24 June 2022, the EU Commission officially launched the Alliance for Zero Emission Aviation.⁵²⁴⁵ The Alliance sought to gather representatives of the aviation community to join forces in preparing for the advent of zero-emission aircraft. The Alliance for Zero Emission Aviation aims to prepare the aviation ecosystem for the entry into service of hydrogen- and electric-powered aircraft, therefore contributes to Europe's 2050 climate neutrality objective.

On 27 June 2022, the European energy and environment ministers launched one of the most comprehensive climate action packages in the history of the EU. These include the Fit for 55' package: the EU Renewable Energy Directive and the EU Energy Efficiency Directive. For the first time, a

⁵²⁴⁵ Zero-Emission Aviation: Commission launches new Alliance to make hydrogen-powered and electric aircraft a reality (Brussels) 24 June 2022. Access Date: 22 July 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_22_3854

binding EU-wide target for energy efficiency was defined. In addition, the binding 2030 target for renewable energy share in gross final energy consumption was raised to 40 per cent.⁵²⁴⁶

On 12 July 2022, the EU invested ERU1.8 billion in large-scale innovative clean-tech projects.⁵²⁴⁷ These grants will be disbursed through the Innovation Fund to assist bringing new technologies to the market to drive a green transition. This fund has increased by 60 per cent relative to the first disbursement round, doubling the number of projects supported. Projects were evaluated by independent experts based on their ability to reduce greenhouse gas emissions and innovate while being mature for deployment.

On 30 August 2022, the European Investment Bank grants a EUR18 million loan to Tapojarvi, to reduce the environmental footprint of the steel industry.⁵²⁴⁸ Tapojarvi is a family-owned Finnish company specializing in “handling, processing, and recycling services for the mining and steel industry.” This loan seeks to help reduce the environmental impact of the steel industry, promote a shift toward a circular economy, and the development of innovative processes.

On 7 September 2022, the “Aquila Clean Energy EMEA, the clean energy development platform in Europe of Aquila Capital, has closed a EUR 1 billion construction facility.”⁵²⁴⁹ This loan was granted by the European Investment Bank and was supported by the InvestEU programme. It will finance the development and construction of Aquila Clean Energy’s entire renewable energy pipeline in Spain and Portugal, with over 50 projects and within the next three years.

The European Union has fully complied with its commitment to take strong action in all three identified categories of climate action: mitigation, adaptation, and finance, and at least one action constituting international, collective action involving other states. Climate mitigation was addressed through joining the global methane pledge, which also constitutes an international collective action. The new Common Agricultural policy contributes towards climate adaptation for smaller farms. The investment into the LIFE Programme contributes towards climate finance.

Thus, the European Union has received a score of +1.

20. Climate Change: Developing Countries

“We recall and reaffirm the commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.”

Background

In 2008, G20 leaders proclaimed that they would address — among other global challenges — the impact of climate change.⁵²⁵⁰ In April 2009, at the London Summit the reaffirmed their commitment to address “the threat of irreversible climate change, based on the principle of common but differentiated responsibilities, and to reach agreement at the United Nations’ Climate Change conference in Copenhagen in December 2009.”⁵²⁵¹

The 2009 Pittsburgh Summit saw G20 leaders once again call for globally coordinated action to tackle the harmful effects of climate change. Some of the actions that were recommended include “increasing clean and renewable energy supplies, improving energy efficiency, and promoting conservation are

⁵²⁵⁰ Declaration of the Summit on Financial Markets and the World Economy, G20 Information Centre (Toronto) 14-15 November 2008. Access Date: 7 December 2021. <http://www.g20.utoronto.ca/2008/2008declaration1115.html>

⁵²⁵¹ London Summit – Leaders’ Statement, G20 Information Centre (Toronto) 2 April 2009. Access Date: 7 December 2021. <http://www.g20.utoronto.ca/2009/2009communique0402.pdf>

critical steps to protect our environment, promote sustainable growth and address the threat of climate change.”⁵²⁵²

At the 2010 Toronto Summit, G20 leaders announced that they had fulfilled their Pittsburgh Summit commitment on capital increases for the Multilateral Development Banks (MDBs) which would make these lending institutions more “transparent, accountable and effective” and would “strengthen their focus on [...] addressing climate change.”⁵²⁵³ They further announced that this reform was helping to build “not just bigger MDBs, but better MDBs, with more strategic focus on [...] addressing the global challenges of climate change.”

At the 2010 Seoul Summit, G20 leaders vowed to “reach a balanced and successful outcome in Cancun” on the UN Framework Convention on Climate Change negotiations and on the High-Level Advisory Group on Climate Change Financing submitted to the UN Secretary-General.⁵²⁵⁴ The Green Climate Fund was later established during the 2010 United Nations Climate Change Conference in Cancun.⁵²⁵⁵

During the 2011 Cannes Summit, G20 leaders proclaimed that they would “stand ready to work towards operationalization of the Green Climate Fund as part of a balanced outcome in Durban, building upon the report of the Transitional Committee.”⁵²⁵⁶ This summit represents the first year in which this commitment was undertaken. G20 members recalled the Cancun Agreement, and the commitment made in Copenhagen for “developed countries have committed to the goal of mobilizing jointly USD100 billion per year from all sources by 2020 to assist developing countries to mitigate and adapt to the impact of climate change, in the context of meaningful mitigation actions and transparency. We discussed the World Bank – IMF [International Monetary Fund] – OECD [Organisation for Economic Co-operation and Development] – regional development banks report on climate finance and call for continued work taking into account the objectives, provisions and principles of the UNFCCC [United Nations Framework Convention on Climate Change] by international financial institutions and the relevant UN organizations.” They also requested a Finance Ministers report to be delivered for the next summit on progress made on climate finance, which was to “come from a wide variety of sources, public and private, bilateral and multilateral, including innovative sources of finance.” To that end, they called on the MDBs to “develop new and innovative financial instruments to increase their leveraging effect on private flows.”

The 2012 Los Cabos Summit saw leaders commit to “maintaining a focus on inclusive green growth as part of our G20 agenda and in the light of agreements reached at Rio+20 and the United Nations Framework Convention on Climate Change (UNFCCC).”⁵²⁵⁷ There was a call for the development of and a greater use of “available technologies, well-known practices and techniques such as soil fertility enhancement, minimum tillage and agroforestry, and call upon international organizations to provide a report on science-based options to improve the efficiency of water use in agriculture including in ways particularly suitable for small farms” in an effort to adapt agricultural practices to climate change.

⁵²⁵⁷ G20 Leaders Declaration, G20 Information Centre (Toronto) 19 June 2012. Access Date: 7 December 2021. <http://www.g20.utoronto.ca/2012/2012-0619-loscabos.html>

Moreover, the G20 “welcome[d] the creation of the G20 study group on climate finance, in order to consider ways to effectively mobilize resources taking into account the objectives, provisions and principles of the UNFCCC in line with the Cancun Agreement and ask to provide a progress report to Finance Ministers in November. We support the operationalization of the Green Climate Fund” for climate financing.

The 2013 St. Petersburg Summit saw leaders commit “to a full implementation of the outcomes of Cancun, Durban and Doha and [to work] with Poland as the incoming presidency towards achieving a successful outcome at COP [Conference to the Parties] 19,” to lend continued support to the operationalization of the Green Climate Fund, and for effective mobilization of climate financing.⁵²⁵⁸

At the 2014 Brisbane Summit, leaders stated that they “support a strong and effective action to address climate change,” and that they “reaffirm our support for mobilising finance for adaptation and mitigation, such as the Green Climate Fund.”⁵²⁵⁹

The 2015 Antalya Summit saw the creation of the “Toolkit to enhance access to adaptation finance: for developing countries that are vulnerable to adverse effects of climate change, including LIDCs [low-income developing countries], SIDS [small island developing states] and African states” by the G20 Climate Finance Study Group. The Toolkit’s rationale is recommended “tools [that] are not prescriptive, intrusive or exhaustive, but aim to provide practical and technical solutions, including to: identify and support adaptation as a national priority; design fundable projects and programmes; better link with available funding; and enhance in-country capacities and enabling environments to attract investments from a wide variety of sources. The toolkit primarily focuses on enhancing access of the countries particularly vulnerable to climate change (including LIDCs, SIDS and African states) to international climate finance trust funds, while recognising that various domestic resources within those countries will also be important to finance and scale up adaptation action.”⁵²⁶⁰ Within the Toolkit’s background, it specifically references the Cancun Agreement, wherein which “developed countries formalised their commitment to jointly mobilise USD100 billion per year by 2020 from a range of sources (public and private, bilateral and multilateral, including alternative sources) to address the adaptation and mitigation needs of developing countries.”

At the 2016 Hangzhou Summit, the need to address the global effects of climate change was once again on the agenda when the leaders reiterated their commitment to sustainable development and support for the Green Climate Fund.⁵²⁶¹ The G20 leaders also welcomed the G20 Climate Finance Study Group to report on “Promoting Efficient and Transparent Provision and Mobilization of Climate Finance to Enhance Ambition of Mitigation and Adaptation Actions.”

At the 2017 Hamburg Summit, G20 members reiterated their commitment to the goal of mobilising jointly USD100 billion per year by 2020 “from public and private sources, for mitigation and adaptation in developing countries, taking into account their needs and priorities.”⁵²⁶² They declared finance

institutions such as the Green Climate Fund and the Global Environment Facility as crucial in supporting the global response to climate change.

At the 2019 Osaka summit, the parties once again reiterated their commitment to fostering inclusive finance for sustainable development including public and private financing mobilization and alignment between them, as well as innovation in a wide range of areas for low emissions and resilient development.⁵²⁶³ They also vowed to look into “a wide range of clean technologies and approaches, including smart cities, ecosystem and community based approaches, nature based solutions and traditional and indigenous knowledge.” This was to foster coherence between “mitigation action, adaptation measures, environmental protection, and resilient infrastructure.”

At the 2020 Riyadh Summit, the leaders stated their aim of “mobilizing sustainable finance and strengthening financial inclusion are important for global growth and stability. The Financial Stability Board is continuing to examine the financial stability implications of climate change.⁵²⁶⁴

Commitment Features

On 31 October 2021, G20 leaders adopted the present commitment at the G20 summit hosted in Rome, Italy. The commitment reads as follows: “We recall and reaffirm the commitment made by developed countries, to the goal of mobilizing jointly USD100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.”⁵²⁶⁵

To “reaffirm” is defined as “to affirm again,” where to affirm is to “assert strongly, state as fact, confirm or ratify a judgment.”⁵²⁶⁶ The commitment that the G20 is reaffirming is the commitment to mobilize USD100 billion by 2020.⁵²⁶⁷ This commitment has been a key part of the Conference of the Parties (COP) climate accords since COP15 in 2009, as well as the Paris Agreement.⁵²⁶⁸ The commitment is also subsection 13.a of the United Nations’ Sustainable Development Goal 13 which deals with climate action.⁵²⁶⁹ To “reaffirm the commitment” indicates a future-oriented and politically binding obligation to change members’ behaviour.⁵²⁷⁰ But, to “reaffirm” also indicates a low binding commitment because it lacks innovation on the previous commitment it is referencing. Reaffirming a commitment indicates that the previous commitment has not been met and that there are no new specific actions required in order to meet this commitment.

“Mobilizing” means to organize or prepare something for a particular purpose.⁵²⁷¹ In the context of the commitment, what is being mobilized is USD100 billion to finance climate action in developing countries.⁵²⁷²

“Address” means “to give attention to or deal with a matter or problem.”⁵²⁷³

“Needs” are defined as “a lack of something requisite, desirable, or useful.”⁵²⁷⁴

“Developing countries” are defined as “a nonindustrialized poor country that is seeking to develop its resources by industrialization.”⁵²⁷⁵ According to the United Nations Conference on Trade and Development, these countries include: “Algeria, American Samoa, Anguilla, Antigua and Barbuda, Argentina, Aruba, Bahamas, Bahrain, Barbados, Belize, Plurinational State of Bolivia, Bonaire, Sint Eustatius and Saba, Botswana, Bouvet Island, Brazil, British Indian Ocean Territory, British Virgin Islands, Brunei Darussalam, Cabo Verde, Cameroon, Cayman Islands, Chile, China, Hong Kong SAR, Macao SAR, Taiwan Province of China, Colombia, Congo, Cook Islands, Costa Rica, Côte d’Ivoire, Cuba, Curaçao, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eswatini, Falkland Islands (Malvinas), Fiji, French Polynesia, French Southern Territories, Gabon, Ghana, Grenada, Guam, Guatemala, Guyana, Honduras, India, Indonesia, Islamic Republic of Iran, Iraq, Jamaica, Jordan, Kenya, Democratic People’s Republic of Korea, Republic of Korea, Kuwait, Lebanon, Libya, Malaysia, Maldives, Marshall Islands, Mauritius, Mexico, Federated States of Micronesia, Mongolia, Montserrat, Morocco, Namibia, Nauru, Netherlands Antilles, New Caledonia, Nicaragua, Nigeria, Niue, Northern Mariana Islands, Oman, Pacific Islands, Trust Territory, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Pitcairn, Qatar, Saint Barthélemy, Saint Helena, Saint Kitts and Nevis, Saint Lucia, Saint Martin (French part), Saint Vincent and the Grenadines, Samoa, Saudi Arabia, Seychelles, Singapore, Sint Maarten (Dutch part), South Africa, South Georgia and South Sandwich Islands, Sri Lanka, State of Palestine, Suriname, Syrian Arab Republic, Thailand, Tokelau, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turks and Caicos Islands, United Arab Emirates, United States Minor Outlying Islands, Uruguay, Bolivarian Republic of Venezuela, Viet Nam, Wallis and Futuna Islands, Western Sahara, Zimbabwe.”⁵²⁷⁶

Furthermore, there are Least Developed Countries, which have been identified by the United Nations Committee for Development Policy. As of 24 November 2021, these countries include: “Angola, Benin, Burkina Faso, Burundi, Central African Republic, Chad, Democratic Republic of the Congo, Djibouti, Eritrea, Ethiopia, Gambia, Guinea, Guinea-Bissau, Haiti, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Niger, Rwanda, Senegal, Sierra Leone, Somalia, South Sudan, Sudan, Togo, Uganda, United Republic of Tanzania, Zambia ... Afghanistan, Bangladesh, Bhutan, Cambodia, Lao People’s Democratic Republic, Myanmar, Nepal, Yemen ... Comoros, Kiribati, Sao Tome and

Principe, Solomon Islands, Timor-Leste, Tuvalu.”⁵²⁷⁷ These countries are especially economically and environmentally vulnerable.⁵²⁷⁸

In order to be compliant with this commitment, the G20 member must take actions in which the aforementioned developing and least developed countries’ needs are addressed.

“Meaningful” is defined as important or significant.⁵²⁷⁹

“Mitigation” is defined as “the process or result of making something less severe, dangerous, painful, harsh, or damaging.”⁵²⁸⁰ Specifically in the context of climate change, the United Nations Environment Programme defines mitigation as “efforts to reduce or prevent emission of greenhouse gases.”⁵²⁸¹ This includes, but is not limited to, switching to renewable energy, utilizing carbon capture and storage technology, improving the energy efficiency of pre-existing equipment.⁵²⁸²

“Actions” are defined as deeds, behaviour or conduct.⁵²⁸³ In the context of this commitment, the sort of actions that are funded are climate change mitigation actions.

“Transparency” is defined as “the quality of being done in an open way without secrets.”⁵²⁸⁴ “Implementation” is defined as “the process of making something active or effective.”⁵²⁸⁵ Therefore, “transparency on implementation” in regards to climate change is considered to be the communication of “information on greenhouse gas emissions and actions to reduce them, as well as on adaptation and means of implementation such as finance, technology transfer and capacity building.”⁵²⁸⁶

This commitment has both outcomes and instruments which indicates a more ambitious commitment.⁵²⁸⁷ However, this commitment is also a reaffirmation of a long-standing commitment as mentioned earlier, and contains no new instruments or outcomes. Further, the specific monetary value

⁵²⁸⁶ What is Transparency and Reporting?, United Nations Framework Convention on Climate Change (Bonn) n.d. Access Date: 16 December 2021. <https://unfccc.int/process-and-meetings/transparency-and-reporting/the-big-picture/what-is-transparency-and-reporting>

⁵²⁸⁷ Compliance Coding Manual for International Institutional Commitments, G7 and G20 Research Groups (Toronto) 12 November 2020. Access Date: 7 December 2021. http://www.g7.utoronto.ca/compliance/Compliance_Coding_Manual_2020.pdf

that is attached to the instrument is also a value that should have already been reached. This explains why the commitment “[stresses] the importance of meeting that goal fully as soon as possible,” and maintaining that level of monetary funding.⁵²⁸⁸ Additionally, while there is a specific monetary goal outlined and a specific time frame mentioned, this does not count as a multi-year financial commitment because it does not indicate a set amount of money to be funded over a set amount of years.⁵²⁸⁹ Instead, the goal is to mobilize USD100 billion, which was the 2020 target, and then at minimum maintain that level of climate financing through to 2025.⁵²⁹⁰ There is no required annual increase in fund mobilization, the goal is about reaching and maintaining an annual funding target.

This commitment emphasizes increased climate change financing through investment in two component areas. Both of these component areas use funding, or specifically international climate finance, as an instrument.⁵²⁹¹ The first component deals with providing funding that helps developing countries carry out mitigation actions and the second component deals with providing funding for projects that improve transparency in implementing climate change related actions and policies.⁵²⁹²

To achieve full compliance, or a score of +1, G20 members must take action to increase international climate finance contributions towards both mitigation actions and actions that foster implementation transparency. Domestic actions that count towards compliance include the provision of money towards programs or private businesses that carry out or fund projects in developing countries.⁵²⁹³ Actions that count towards compliance and take place at the international level include providing financial support to or creating joint agreements with international organizations and institutions working in developing countries, such as the Green Climate Fund, the Adaptation Fund and the Least Developed Country Fund. Further, international action also includes making joint agreements with developing countries to fund projects or with other developed countries in order to fund developing nation’s projects. These agreements can be bilateral or multilateral. Finally, what counts as financing for both domestic and international measures includes both loans and grants, however, it is necessary for the G20 member to mobilize more money than the year prior.

For partial compliance, or a score of 0, G20 members must take action to increase international climate finance contributions and direct this funding either towards mitigation actions or actions that foster implementation transparency.

For non-compliance, or a score of -1, G20 members must take no action to increase their international climate finance contributions towards funding either mitigation actions or actions that foster implementation transparency.

Scoring Guidelines

-1	The G20 member has NOT taken action to increase its international climate finance contributions towards mitigation actions NOR actions fostering implementation transparency.
0	The G20 member has taken action to increase its international climate finance contributions towards EITHER mitigation actions OR actions fostering implementation transparency.
+1	The G20 member has taken strong action to increase its international climate finance contributions towards BOTH mitigation actions AND actions fostering implementation transparency.

Compliance Director: Karči Aldridge Végi

Lead Analyst: Yana Sadeghi

Argentina: -1

Argentina has failed to comply with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

Argentina has failed to comply with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, Argentina has not taken action to increase its international climate finance contributions towards mitigation actions nor has it taken actions fostering implementation transparency in developing countries as stated in its commitment.

Thus, Argentina has received a score of -1.⁵²⁹⁴

Analyst: Da Seul Chong

Australia: +1

Australia has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

On 1 November 2021, Prime Minister Scott Morrison announced that Australia is increasing its international climate finance commitment by AUD500 million.⁵²⁹⁵ The additional funding will be focused on providing support to Pacific and Southeast Asian countries, including AUD200 million for countries in the Pacific which will involve funding for private sector-led climate solutions and scaling up mitigation actions.

⁵²⁹⁴ This score of non-compliance was determined after searching the following websites: <https://www.boletinoficial.gob.ar>, <https://www.argentina.gob.ar>, <https://www.cancilleria.gob.ar>, <https://www.buenosaires.gob.ar>, <https://elpais.com>, <https://www.who.int>, <https://unfccc.int>, <https://www.greenclimate.fund>, <https://www.adaptation-fund.org>, <https://www.thegef.org>, <https://www.climateinvestmentfunds.org>.

On 5 November 2021, at the 26th United Nations Climate Change Conference the Australian Government announced its partnership with Fiji and Papua New Guinea under the Indo-Pacific Carbon Offsets Scheme.⁵²⁹⁶ In addition to announcing its first international partners under the scheme, Australia is also providing AUD44 million in funding for the purpose of establishing high-integrity carbon offsets in the Indo-Pacific region.⁵²⁹⁷

On 8 November 2021, Minister for Foreign Affairs and Minister for Women Marise Payne announced two new climate investments totalling AUD500 million to support countries in Southeast Asia.⁵²⁹⁸ The Australian Climate Finance Partnership (ACFP) announced that Australia would allocate AUD13 million to the Tropical Asia Forest Fund 2 (TAFF2) which has the goal of improving biodiversity, climate and livelihood outcomes in South East Asia. The Australian Government will also invest in their partnership with Convergence Blended Finance for a new Asia Climate-Smart Landscape Fund in Indonesia, mobilizing AUD200 million to provide long-term loans to small and medium enterprises working in the forestry sector for the purpose of fostering sustainable forest protection, land regeneration and positive agriculture outcomes.

On 3 December 2021, Minister for Foreign Affairs and Minister for Women Marise Payne visited Palau to discuss reducing emissions within the country.⁵²⁹⁹ The Australian Senator committed to establishing a AUD22 million solar farm in Palau through grants and loans from the Australian Infrastructure Financing Facility for the Pacific.

On 11 February 2022, Minister for Foreign Affairs and Minister for Women Marise Payne released a Ministerial Statement titled Partnerships for Recovery, stating Australia will continue to provide AUD2 billion in climate finance between 2020-2025.⁵³⁰⁰ AUD700 million will go directly towards countries in the Pacific.

On 3 March 2022, the Asian Development Bank signed an equity investment worth AUD15 to TAFF2 to support sustainable forestry practices in Southeast Asia.⁵³⁰¹ The investment was funded in part by the Australian government with AUD10 million coming from the Australian Climate Finance Partnership (ACFP) trust fund. TAFF2 investments will target climate adaptation and climate mitigation within Cambodia, Viet Nam, Indonesia, the Lao People's Democratic Republic, Thailand and Malaysia.

On 29 March 2022, the government released its 2022-2023 budget.⁵³⁰² In the budget, the government announced that it would increase the financing for the Australian Infrastructure Financing Facility for the Pacific by AUD1.5 billion which will go towards building climate-resilient infrastructure.

On 5-7 June 2022, Prime Minister Anthony Albanese attended the Annual Leaders' Meeting with President Widodo in Jakarta.⁵³⁰³ During the meeting, Prime Minister Anthony Albanese discussed the establishment of an "Indonesia-Australia Comprehensive Economic Partnership Agreement." The government has pledged to contribute AUD200 million in funds to the fund, specifically dedicated towards climate and infrastructure.

On 25 June 2022, Minister for the Environment and Water Tanya Plibersek and Minister for Foreign Affairs Penny Wong released a joint media statement on supporting developing countries on climate change.⁵³⁰⁴ The governments pledged to commit AUD80 million towards restoration of land, protection of international waters, support for developing countries on climate action, elimination of harmful chemicals, strengthening of biodiversity and increase of sustainable cities over a four-year period. This commitment forms part of Australia's AUD2 billion climate action package from 2020-2025, a doubling of the commitment through Australia's development program.

On 21 September 2022, the Australian Government announced AUD9 million in funding to the United Nations Office of Disaster Risk Reduction to help nations prepare for the impacts of climate change.⁵³⁰⁵ The Government is particularly focusing on providing support to its neighbours and partners in the Pacific.

Australia has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, Australia has acted to increase its international finance contributions, pledging an additional AUD500 million to support Pacific and Southeast Asian countries. It has also established partnerships with Fiji and Papua New Guinea for the Indo-Pacific Carbon Offsets Scheme and increased funding by AUD44 million. Australia also announced AUD22 million in funding towards increasing solar energy production in Palau. Australia fostered transparency through providing funding for climate funds such as the Asia Climate-Smart Landscape Fund and the Tropical Asia Forest Fund 2.

Thus, Australia receives a score of +1.

Canada: +1

Canada has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

On 1 November 2021, Prime Minister Justin Trudeau announced CAD1 billion in funding for the Climate Investment Funds Accelerated Coal Transition Investment Program which aids developing countries as they transition away from coal power towards cleaner energy sources.⁵³⁰⁷

On 1 November 2021, Prime Minister Trudeau announced CAD25 million in funding for the Energy Sector Management Assistance Program.⁵³⁰⁸ The goal of the program is to fund clean energy alternatives and help support low- and middle-income countries as they transition to cleaner energy systems.

On 2 November 2021, Canada signed the Global Forest Finance Pledge alongside 11 other countries.⁵³⁰⁹ The signees agreed to collectively finance USD12 billion from 2021 to 2025. The pledge will allocate the funding to partner countries for the purpose of aiding the partner nations in carrying out mitigation projects in the forest sector and adapting to the effects of climate change.

On 2 November 2021, Environment and Climate Change Canada announced a contribution of CAD37.5 million to the Least Developed Countries Fund (LDCF) for the purpose of funding critical, on-the-ground projects related “to water, agriculture and food security, disaster risk management and prevention, and fragile ecosystems.”⁵³¹⁰

On 2 November 2021, Environment and Climate Change Canada pledged a contribution of up to CAD10 million to the Adaptation Fund to protect vulnerable countries against the detrimental impacts of climate change.⁵³¹¹

On 2 November 2021, Environment and Climate Change Canada allotted up to CAD10 million to the National Adaptation Plan (NAP) Global Network to bolster international cooperation in climate change Adaptation efforts.⁵³¹²

On 17 February 2022, the Ministry of International Development announced CAD315 million in funding for the Partnering for Climate program.⁵³¹³ The program is intended to engage Canadian organizations in climate action while also supporting the role of women. This program will fund projects put forth by civil society, Indigenous groups and other organizations to support adaptive measures against climate change in developing nations.

On 8 March 2022, Minister of International Development and Minister responsible for the Pacific Economic Development Agency of Canada Harjit S. Sajjan, announced CAD67.5 million in funding for eight projects in developing countries that focus on fostering gender equality in the response to climate change.⁵³¹⁴

On 21 March 2022, Minister Sajjan at the conclusion of his trip to Ghana announced funding of CAD17.5 million to support green climate innovation and to establish a Centre of Excellence for the Circular Economy.⁵³¹⁵ This funding will aid Ghana as it seeks to undergo a green transition in response to the challenges presented by climate change.

On 24 May 2022, Minister Sajjan announced CAD100 million in funding for the African Development Bank (AfDB).⁵³¹⁶ The funding will go towards supporting the growth of small and medium sized agri-food enterprises providing climate-smart and nature-based solutions to food insecurity.

On 24 May 2022, Steven Guilbeault, Minister of Environment and Climate Change, announced funding of CAD20 million over four years to support Ghana, Liberia, The Gambia and Togo build national climate measurement, reporting, and verification (MRV) system capacity.⁵³¹⁷ This will help provide the governments of Ghana, Liberia, The Gambia and Togo with transparent, accurate and

comparable information on emissions and will help these countries track their mitigation efforts in compliance with the Paris Agreement.

On 17 June 2022, Canada announced that it would contribute USD2 million over the next four years to support methane mitigation projects in developing countries.⁵³¹⁸ This is guided by Canada's participation in the Global Methane Initiative and part of Canada's global climate financing commitment.

On 14 July 2022, Minister Guilbeault announced CAD4.5 million in funding, over four years, for the Pacific Alliance countries, Mexico, Peru, Chile and Colombia.⁵³¹⁹ This funding will go towards strengthening national climate measurement, reporting and verification systems that are necessary for developing mitigation policies.

On 10 August 2022, Global Affairs Canada announced CAD5 million in funding for efforts to develop sustainable solid waste management methods in southern Jordan.⁵³²⁰ This project also aims to create opportunities specifically for women and youth.

On 16 August 2022, Minister Sajjan visited Egypt and discussed the ongoing operations of the Food and Agriculture Organization of the United Nations.⁵³²¹ Efforts include the development of "climate-smart" maize farming techniques. Minister Sajjan pledged CAD10 million towards this project during his trip.

Canada has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, Canada has acted to increase its international finance contributions, including dedicating CAD1 billion for the Climate Investment Funds' Accelerated Coal Transition Investment Program. In terms of transparency, Canada has provided funding to international climate change funds including CAD37.5 million to the LDCF and CAD10 million to the Adaptation Fund.

Thus, Canada receives a score of +1.

the finances necessary for climate mitigation actions, adaptation, and sustainable urban development within Rwanda.

On 31 March 2022, Germany was reported to have pledged around USD1 billion for initial resource mobilization and USD1.5 billion for the first replenishment period of the GCF.⁵³³⁷ The GCF uses such financial contributions from developed countries to help developing countries “design and deliver ambitious climate action plans” known as NDCs.⁵³³⁸ The intent of this pledge is to support the GCF in addressing climate mitigation actions and adaptation within developing countries.

On 8 April 2022, Germany pledged to jointly fund USD5.25 billion to the Global Environment Facility (GEF).⁵³³⁹ These funds are intended to support climate mitigation actions within developing countries, including the protection of biodiversity, reduction of greenhouse gases, chemicals and waste and usage of renewable energy.

On 2 May 2022, Chancellor Olaf Scholz and the Indian Prime Minister Narendra Modi signed a joint declaration of intent for a partnership for green and sustainable development, with Germany committing EUR10 billion for related projects and measures.⁵³⁴⁰ Germany and India intend to cooperate in supporting developing countries in Africa, Asia and other regions as well as expanding the use of green hydrogen through a joint task force. The purpose of this partnership is to mitigate greenhouse gases within developing countries by investing in alternative, renewable energy sources and backing initiatives for climate mitigation.

On 2 May 2022, Environment Minister Steffi Lemke and Indian Environment Minister Bhupender Yadav signed a joint declaration of intent as part of the International Climate Initiative, wherein Germany will assist India in forest and forest landscape restoration of 26 million hectares by 2030.⁵³⁴¹ The goal of the partnership is to achieve India’s sustainability goals, create climate resilience and reduce greenhouse emissions through reforestation.

On 13 May 2022, Germany announced that it will launch a follow-up initiative to the Delivery Plan from COP26 to fund adaptation finance for developing countries, which will document the progress being made on the plan in an effort to increase transparency on implementation.⁵³⁴² This joint-led initiative aims to keep countries on track towards delivering USD100 billion per year towards developing countries by 2023 through increased transparency and credibility for developed countries.

Germany has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. Japan: +1

Japan has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

On 2 November 2021, at the United Nations Climate Change Conference in Glasgow, Prime Minister Fumio Kishida announced four new climate financing commitments.⁵³⁴⁶ (1) Japan committed to providing up to USD10 billion over the next five years to support the launch of the Innovative Financial Facility for Climate in partnership with the Asian Development Bank. (2) Japan committed to mobilizing private and public finance totaling USD14.8 billion for climate adaptation by 2025. (3) Japan committed to providing USD240 million for the forest sector to help fund vulnerable countries mitigation and adaptation projects. (4) Japan committed to providing USD100 million in funding for projects that “transform fossil-fuel-fired thermal power into zero-emission thermal power.” This investment will occur mostly in Asia as part of the Asia Energy Transition Initiative. These investments will help fund decarbonize efforts in Asia and contribute to developed countries’ overall goal of USD100 billion a year in international climate financing. Japan also fosters transparency in climate financing by allocating its investments to funds.

⁵³⁴⁴ This score of non-compliance was determined after searching the following websites:

<https://www.theguardian.com/international>, https://kemlu.go.id/portal/en/siaran_pers, <https://www.menlhk.go.id/>, <https://www.dpr.go.id/en>, <https://ukcop26.org>, <https://www.greenclimate.fund>, <https://www.adaptation-fund.org>, <https://www.thegef.org>, <https://www.climateinvestmentfunds.org>.

On 22 March 2022, Japan contributed USD6 million to the Adaptation Fund (AF).⁵³⁴⁷ The AF is a multilateral climate fund that helps support developing countries dealing with the adverse impacts of climate change.

On 24 March 2022, Japan contributed USD42 million to the United Nations Development Programme (UNDP) to go towards helping developing countries implement their national climate pledges.⁵³⁴⁸ Japan's contribution will contribute to the UNDP's operation in 23 countries and territories in Asia-Pacific, Europe, Central Asia, Africa and the Arab State regions to realize national climate targets.

On 10 May 2022, Japan announced USD2.68 million to the UNDP to help Kenya implement its national Nationally Determined Contribution (NDC).⁵³⁴⁹

On 23 May 2022, Japan signed a loan agreement with the government of Vietnam whereby it would provide JPY18.87 million to help Vietnam take climate change disaster response measures including the procurement of an earth observation satellite.⁵³⁵⁰

On 23 May 2022, Japan and the United States announced their climate partnership.⁵³⁵¹ Japan and the United States intend to increase their cooperation towards their climate targets including meeting their NDCs under the Paris Agreement and meeting their international climate financing commitments.

On 30 May 2022, Japan provided the UNDP with USD1.8 million to help Türkiye meet its national climate pledge.⁵³⁵² The funding will go towards mitigation measures to deal with pollution and invasive species along the Asi River.

Japan has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, Japan has acted to increase its international climate financing contribution through actions such as working with the UNDP and through investments that promote sustainable development in countries like Vietnam. Japan has also acted to foster implementation transparency through its financing of the Adaptation Fund.

Thus, Japan receives a score of +1.

Korea: +1

Korea has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

On 28 December 2021, the Korea International Cooperation Agency (KOICA) allotted USD 9.6 million for the implementation of the program signed on 25 November 2021 set to restore over 13,000 hectares of degraded land in Ethiopia. The five-year project will focus on the Blue Nile basin to avert forest degradation and gradually reduce over-flooding and sedimentation, restoring and conserving degraded lands that improve the livelihood of climate change vulnerable people and communities.⁵³⁵³

On 27 January 2022, according to the ‘2022 Implementation Plan’, the Ministry of Economy and Finance stated that it will provide KRW37.5 billion (USD 31 million) in 2022 to the Green Climate Fund (GCF). The government also pledged to establish a USD 5 million Green New Deal Trust Fund in the Global Green Growth Institute (GGGI) to support the development of climate response projects in low- and middle-income countries in connection with the Korean version of the Green New Deal. In addition, Korea has planned to make a voluntary contribution to the GGGI of KRW11.3 billion (USD 9.3 million) in 2022.⁵³⁵⁴

On 25 February 2022, the Bank of Korea announced that it has invested part of the country’s foreign exchange reserves in a green bond fund for central banks in a bid to expand its investment in green projects.⁵³⁵⁵ The BOK said its participation is designed to join global efforts to fight climate change and help develop the green bond market in Asia.

On 17 March 2022, the Ministry of Economy and Finance and the GGI signed an Administration Agreement for the Korea Green New Deal Trust Fund (KGNDTF).⁵³⁵⁶ The Korean government plans to contribute KRW6 billion to the KGNDTF annually over five years to support the development of overseas projects related to the Korea Green New Deal and implementation of policies and regulations as well as capacity building in the developing countries. The Korean government will strengthen collaboration with international organizations such as GGGI to take the lead in the global climate response discussion in the future.

On 31 March 2022, Korea announced its plans to contribute USD4 million to the Partnering for Green Growth and the Global Goals 2030, a multinational body on green growth, to help developing countries’ responses to climate change.⁵³⁵⁷ The donation is expected to aid in the international community’s responses to the climate crisis through 70 private-public green projects in developing countries, including Vietnam, Indonesia, Bangladesh, Kenya, Ethiopia and Mexico.

On 1 April 2022, Deputy Prime Minister Hong Nam-ki announced that Korea has increased its Nationally Determined Contribution pledges to 40 per cent from its previous goal of 26.3 per cent at the seventh Ministerial Meeting of the Coalition of Finance Ministers for Climate Action.⁵³⁵⁸ In addition, it reasserted its commitment to continuously helping developing countries make the green transition by adding more to best practices such as Korea's capacity-building project designed to support developing countries.

On 20 April 2022, Korea announced that it is providing a total of KRW3 billion to the Needs-Based Finance project through the United Nations Framework Convention on Climate Change (UNFCCC) from 2022 to 2024 for developing nations' climate change related projects⁵³⁵⁹

On 27 April 2022, Korea jointly signed a three-year term Memorandum of Understanding on Economic Innovation Partnership Program (EIPP) worth around KRW5 billion with Hungary.⁵³⁶⁰ The two countries agreed to cooperate in the eco-friendly and green mobility sectors by nurturing human resources in the electronic vehicle (EV) field and establishing EV charging infrastructures under the EIPP.

On 2 May 2022, Korea pledged increased support for reforestation in developing countries by expanding the size of the Official Development Assistance budget through a donation of USD60 million and technical help to support reforestation in developing countries on the first day of the World Forestry Congress.⁵³⁶¹

On 17 May 2022, KOICA and Paraguay's Ministry of Agriculture and Livestock awarded USD150,000 to six committees of outstanding producers through the Saemaeul Undong project for Sustainable Agriculture and Rural Development in Paraguay, an initiative led by KOICA.⁵³⁶² Its aim is to encourage the growth of sustainable agriculture in Paraguay.

On 22 June 2022, KOICA and the International Trade Centre signed a four-year grant arrangement of USD5.07 million in support of gender-responsive resilience to natural disasters exacerbated by climate change and environmental degradation across Northern and North-eastern Uganda.⁵³⁶³ The Strengthening Agribusiness Resilience and Competitiveness project will target farming households and small and medium-sized enterprises, with a particular focus on women.

On 29 August 2022, KOICA pledged to fund a USD16 million project led by International Organisation for Migration in partnership with the Save the Children Fiji and National Disaster

a new project dedicated to strengthening resilience in South Asian, Southeast Asian, and Pacific countries through partnerships with governments, cities, the private sector, and local communities.

On 9 November 2021, Alok Sharma, President of the 26th United Nations Climate Change Conference (COP26), announced how an investment of GBP165 million will be utilized to address gender inequality in the climate crisis.⁵³⁷⁸ GBP45 million will go towards communities and grassroots women's organizations in the Asia and the Pacific to tackle climate change's impact on gender inequality. In addition, a portion of a GBP120 million investment addressing climate protection in Bangladesh will be utilized to support women's leadership, finance, and education.

On 11 November 2021, the UK-Urban Climate Action Programme was launched to assist developing cities lessen emissions.⁵³⁷⁹ This program invests GBP27.5 million to support cities in Africa, Asia, and Latin America move towards sustainable growth by creating low-carbon infrastructure projects and aspiring for carbon neutrality by 2050.

On 27 January 2022, Minister for the Pacific and Environment Lord Goldsmith announced that the country had invested GBP2 million through the Blue Planet Fund to assist Costa Rica, Colombia, Ecuador, and Panama in their efforts towards protecting and preserving an impressive half-million square kilometres of ocean.⁵³⁸⁰

On 13 February 2022, Minister Sharma visited Vietnam to meet with Prime Minister Minh Chinh to discuss the commitment of the United Kingdom to help the country achieve the 2030 climate action plan.⁵³⁸¹

On 23 February 2022, Minister Sharma held a dialogue for the Pacific region with private sector actors, Council of Regional Organisations in the Pacific agencies, negotiators, civil society and government officials.⁵³⁸² The dialogue encouraged leaders of the region to identify how the Pacific region could best address climate change.

On 15 March 2022, the Honduras British Embassy supported the development of the Climate Empowerment Forums alongside the organization Sustenta Honduras.⁵³⁸³ The Climate Empowerment Forums is an opportunity for the young people of Honduras to develop and propose solutions that address climate change. It also acknowledges the diverse issues youth face in the climate crisis.

On 8-9 June 2022, Minister of State for South and Central Asia, North Africa, United Nations and the Commonwealth Tariq Ahmad met with Algerian government officials to discuss improving bilateral relations, specifically in the area of climate change.⁵³⁹⁰

On 19 June 2022, Minister Sharma announced an additional GBP1.5 million in funding for South Africa's Just Energy Transition Partnership (JETP).⁵³⁹¹ JETP, announced at COP26, seeks to provide technical assistance to South Africa's government stakeholders as they work to decarbonize the energy sector and ensure a just energy transition.

The United Kingdom has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, the United Kingdom has acted to increase its international climate financing contribution, providing additional funding through programmes such as MOBILIST and JETP. The United Kingdom also fostered transparency regarding implementation of projects through its investment in funds such as the Blue Planet Fund and through its provision of funding to the UNDP.

Thus, the United Kingdom receives a score of +1.

Analyst: Kristi Deki

United States: +1

The United States has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

On 1 November 2021, at the 26th United Nations Climate Change Conference (COP26), President Joe Biden announced measures to advance the President's Emergency Plan for Adaptation and Resilience (PREPARE).⁵³⁹² The government announced its intention to provide USD3 billion annually for PREPARE by 2024.⁵³⁹³ PREPARE shows the United States' commitment to developing, implementing and financing plans for developing countries in relation to climate change.⁵³⁹⁴ The U.S. Agency for International Development (USAID) plans to support the African Union, African countries, and high-risk countries to establish strong National Adaptation Plans and Nationally Determined Contributions (NDCs).

On 1 November 2021, the U.S. International Development Finance Corporation (DFC) provided Rwandan electric motorbike and transport energy provider a USD9 million credit facility.⁵³⁹⁵ The funding will invest in additional charging stations, additional batteries, and more than 1000 motorbikes in Rwanda and Kenya.⁵³⁹⁶ This investment is conducive to reducing emissions in developing countries.

On 2 November 2021, the United States alongside France, Germany, the United Kingdom, and the European Union announced a long-term Just Energy Transition Partnership with South Africa for the purpose of supporting South Africa's decarbonisation efforts.⁵³⁹⁷ The Partnership aims to accelerate the decarbonisation of South Africa's economy, focusing on the electricity system in order to prevent emissions and support South Africa's transition away from coal and towards low emission alternatives and a climate resilient economy. The partnership will jointly mobilize USD8.5 billion through concessional loans, investments, grants, and risk sharing instruments in order to mobilize the private sector.

On 2 November 2021, the Department of Agriculture and the United Arab Emirates launched the Agriculture Innovation Mission for Climate (AIM for Climate) alongside 31 countries and 48 non-government partners.⁵³⁹⁸ President Biden announced that the United States intends to mobilize USD1 billion in investment in climate-smart agriculture and food system innovation over the next 5 years. The goal of AIM for Climate is to generate investment for agricultural research and development in order to fight the impact of climate change.

On 2 November 2021, President Biden announced that the United States would allocate US9 billion in order to restore and preserve the world's forests.⁵³⁹⁹ Additionally, the United States also announced the creation of the Forest Investor Club, a network of private and public investors for the purpose of scaling up investments in restoration, conservation, sustainable agriculture and forestry and green infrastructure.⁵⁴⁰⁰ The United States also announced the creation of the Forest Finance Risk Consortium, which "will bring together financial institutions and experts in forest monitoring and climate finance disclosure to better assess and disclose exposure to forest-related emissions in investment portfolios."⁵⁴⁰¹ These actions will fund mitigation projects as well as aid in the mobilization and effectiveness of private and public funding for forest-related mitigation projects.

On 2 November 2021, the United States joined the Global Forest Finance Pledge, where the US, alongside 11 other countries, agreed to collectively finance USD12 billion from 2021 to 2025 for the

purpose of providing funding to partner countries in order to restore and protect forests and take actions to mitigate and adapt to the effects of climate change.⁵⁴⁰²

On 2 November 2021, the United States signed the Congo Basin Joint Donor Statement in which the signing countries agreed to collectively finance at least USD1.5 billion between 2021-2025.⁵⁴⁰³ This financing will go towards supporting regional partners in carrying out protection and maintenance projects to protect the Congo Basin which serves as an important carbon sink.⁵⁴⁰⁴

On 4 November 2021, the Climate Investment Funds launched the Accelerating Coal Transition (ACT) investment program, consisting of nearly USD2.5 billion in funding from the governments of the United States, the United Kingdom, Germany, Canada, and Denmark.⁵⁴⁰⁵ The goal of ACT is to aid the transition from coal power to clean energy in developing countries. ACT intends to remove risks from investments for transitions away from coal power including investments in infrastructure, governance, people and communities. The first beneficiaries of the initiative include South Africa, Indonesia, India, and the Philippines.

On 8 November 2021, USAID announced its goal to mobilize USD150 billion for public and private climate finance by 2030.⁵⁴⁰⁶ In order to meet this goal USAID will work alongside partner governments in the Philippines, Colombia, South Africa, Vietnam, and India, to mobilize both public and private financing for renewable energy. USAID will also partner with DFC to support mitigation and adaptation efforts, including by providing loan guarantees.

On 9 November 2021, at COP26, the United States announced a USD25 million contribution to the Least Developed Countries Fund.⁵⁴⁰⁷ This contribution will provide financial aid for poor countries as they adapt to the effects of climate change, further investing through the LDCF contributes to funding transparency.

On 7 December 2021, the DFC announced its approval of up to USD500 million in debt financing for First Solar Inc.⁵⁴⁰⁸ This financing will support a photovoltaic solar module manufacturing facility in Tamil Nadu, India to aid the transition to renewable energy.

On 8 December 2021, the DFC announced the approval of a sustainable recycling industry in Morocco, South Africa, and India.⁵⁴⁰⁹ The project will provide Averda Recycling Platform a USD45 million loan for the development, construction, and operation of five low-density polyethylene and high-density polyethylene recycling facilities.

On 28 March 2022, the White House released their FY 2023 Budget.⁵⁴¹⁰ The 2023 Budget meets President Joe Biden's pledge to quadruple international climate finance, budgeting USD11 billion for international climate finance. The Budget provides a contribution worth USD1.6 billion to the Green Climate Fund for financing adaptation and mitigation climate projects in developing countries. The Budget supports a USD3.2 billion loan to the Clean Technology Fund to finance clean energy projects in developing countries.

On 8 April 2022, the United States pledged USD600.8 million over the next four years to the Global Environment Facility (GEF) as part of the 8th replenishment period.⁵⁴¹¹ The United States announced its funding measures alongside 28 other countries who raised more than USD5 billion for the GEF.

On 21 April 2022, USAID released its climate strategy for 2022-2030 that said it plans to assist 80 countries by 2024 through aligning its development portfolios with countries' climate change mitigation and adaptation commitments.⁵⁴¹² Furthermore, USAID has pledged to mobilize USD150 billion in public and private finance for climate.

On 23 May 2022, the United States and Japan announced their climate partnership.⁵⁴¹³ The United States and Japan intend to increase their cooperation towards their climate targets including meeting their NDCs under the Paris Agreement and meeting their international climate financing commitments.

On 9 June 2022, Vice-President Kamala Harris announced the U.S.-Caribbean Partnership to Address the Climate Crisis 2030 (PACC 2030).⁵⁴¹⁴ The goal of PACC 2030 is to support climate adaptation and resilience and clean energy programs in the Caribbean through collaboration with Caribbean partners and capacity building. PACC 2030 will focus on providing access to new financing for Caribbean countries by providing more funding to current financial mechanisms and developing new mechanisms.

On 17 June 2022, the United States announced that it would contribute USD3.5 million to support methane mitigation projects in developing countries. This is part of the United States' Global Methane Initiative and is in accordance with its global climate financing commitment.

On 3 August 2022, USAID issued a press release announcing USAID had awarded over USD300,000 to the Small and Medium Enterprise Development Finance Corporation and FJS Consulting to support climate resilience interventions in the Maldives.⁵⁴¹⁵ USAID will provide a grant of USD86,000 to the Small and Medium Enterprise Development Finance Corporation as a National Implementing Entity that can “directly access” the funding from the GCF. USAID will provide FJS Consulting with a USD204,000 grant to design an Enterprise Development Program to develop solutions to climate change.

On 8 September 2022, USAID announced the launch of a new initiative between USAID, the Ministry of Environment, Forest and Climate Change and the Government of India titled ‘Trees Outside Forests in India.’⁵⁴¹⁶ The USD25 million program will expand tree coverage to enhance carbon sequestration, strengthen climate resilience of agriculture, support local communities and support climate mitigation and adaptation goals.

On 13 September 2022, USAID announced a 5-year project to conserve forests in Papua New Guinea.⁵⁴¹⁷ The project will cost up to USD18.5 million and will help combat climate change by preserving forests that help sequester greenhouse gas emissions.

On 29 September, the United States and its Pacific allies announced the U.S.-Pacific Partnership.⁵⁴¹⁸ At the United States-Pacific Island Country Summit, the United States announced USD130 million in funding to go towards resourcing, support, and partnerships and also indicated its intent to leverage USD400 million in private financing to help Pacific Island nations deal with the climate crisis. This includes USD15 million for Pacific Island states in order for them to take measures to build resilience to climate change and other extreme weather events by improving their ability to identify and prepare for climate impacts on public health, food security, water, ecosystems, and sustainable development. USAID also intends to make available USD27 million through programs and technical assistance for Pacific Islands that invest in adaptation and energy resilience and also engage in good governance practices.

The United States has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, the United States has acted to increase their international finance contributions and foster implementation transparency. Examples of actions to increase international climate financing include a USD9 million credit facility towards a Rwandan electric motorbike and transport energy provider, funding alongside France, Germany, the United Kingdom, and the European Union the Just Energy Transition Partnership to support South Africa’s decarbonisation efforts and USD2.5 billion towards ACT investment programs to transition from coal power to clean energy in developing countries. The United States also fostered transparency regarding implementation of projects by investing in funds such as the Least Developed Countries Fund and in long-term strategies.

European Union: +1

The European Union has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.

On 2 November 2021, President of the European Commission Ursula von der Leyen announced a EUR1 billion contribution to the Global Forests Finance Pledge.⁵⁴¹⁹ The program will provide funding to partner countries in order to restore and protect forests and take actions to mitigate and adapt to the effects of climate change.

On 2 November 2021, the European Union signed the Congo Basin Joint Donor Statement in which it agreed to collectively finance at least USD1.5 billion between 2021-2025 with the other signing countries.⁵⁴²⁰ This financing will help to fund Congo Basin protection and maintenance activities carried out by partner countries in Central Africa.⁵⁴²¹

On 2 November 2021, the European Union in addition to the United States, the United Kingdom, France and Germany announced a long-term Just Energy Transition Partnership to support South Africa's decarbonisation efforts.⁵⁴²² The Partnership aims to accelerate the decarbonisation of South Africa's economy, with a focus on reducing emissions in the electricity system and supporting South Africa's transition away from coal and towards a low emission, climate resilient economy. The Partnership will jointly mobilize USD8.5 billion through concessional loans, investments, grants, and risk sharing instruments designed to mobilize additional private sector financing.

On 9 November 2021, EU Lead Negotiator Frans Timmermans presented the EU's pledge to the Climate Adaptation Fund.⁵⁴²³ This amounted to EUR100 million and placed emphasis on funding for the least developed countries and small island developing states.

On 21 February 2022, the EU issued a press release emphasizing the importance of climate diplomacy and the EU's role in pursuing outreach efforts to developing nations to better comply with targets set at the 26th United Nations Climate Change Conference.⁵⁴²⁴ Associated with these efforts, the EU also reiterated its commitment to helping overcome the barriers to the development and adoption of sustainable green technology in developing nations.

Access Date: 15 May 2022. <https://www.consilium.europa.eu/en/press/press-releases/2022/02/21/climate-diplomacy-council-calls-for-accelerating-the-implementation-of-the-glasgow-cop26-outcomes/>

The European Union has fully complied with its commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible. During the compliance period, the European Union has acted to increase its international climate financing contribution through actions such as pledging USD1 billion to the Global Forests Finance Pledge and through the Just Energy Transition Partnership. The European Union also fostered transparency regarding implementation of projects through its investment in funds such as the Climate Adaptation Fund.

Thus, the European Union receives a score of +1.

Analyst: Jessica Johnson

21. Climate Change: National Plans

“We will deliver national recovery and resilience plans that allocate, according to national circumstances, an ambitious share of the financial resources to mitigating and adapting to climate change and avoid harm to the climate and environment.”

Background

At the 2008 Washington Summit the G20 leaders addressed the issue of climate change for the first time.⁵⁴²⁵ It is recognized that, “climate change represents an urgent and potentially irreversible threat to human societies and the planet, and thus requires to be urgently addressed by all [countries].”⁵⁴²⁶ Many commitments made at past G20 summits have either dealt directly with climate change, or have had climate change as an underlying theme. These include commitments relating to clean energy, food and agriculture, among others.

At the 2009 London Summit, G20 members expressed their support for the United Nations Framework Convention on Climate Change (UNFCCC).⁵⁴²⁷ This support was reiterated at every G20 summit, including at the 2017 Hamburg Summit where leaders reiterated the importance of fulfilling

⁵⁴²⁵ Declaration of the Summit on Financial Markets and the World Economy, 2008 Washington Summit, RANEP (Moscow). Access Date: 10 January 2021. <https://www.ranepa.ru/images/media/g20/2008washington/Declaration%20of%20the%20Summit%20on%20Financial%20Markets.pdf>

⁵⁴²⁶ Report of the Conference of the Parties on its Seventeenth Session, Held in Durban from 28 November to 11 December 2011, United Nations Framework Convention on Climate Change (Bonn) 15 March 2012 Access Date: 10 January 2021. <http://unfccc.int/resource/docs/2011/cop17/eng/09a01.pdf#page=2>.

⁵⁴²⁷ Global Plan for Recovery and Reform, 2009 London Summit, RANEP (Moscow). Access date: 10 January 2021. <https://www.ranepa.ru/images/media/g20/2009london/2009communique0402.pdf>

the UNFCCC commitment by developed countries in providing means of implementation including financial resources to assist developing countries with respect to both mitigation and adaptation actions in line with Paris outcomes and note the Organisation for Economic Co-operation and Development's (OECD) report "Investing in Climate, Investing in Growth."⁵⁴²⁸

The COVID-19 pandemic highlighted the need to integrate climate-focused policies into the countries' recovery efforts to ensure resilience and environmental sustainability of the world economy. Multiple international institutions, including the United Nations, the World Bank, the OECD, the International Energy Agency, issued recommendations to promote sustainable crisis response efforts, which take into account economic, social and environmental aspects of sustainability. This sustainability drive is further emphasized by the need to implement the 2030 Agenda for Sustainable Development, adopted by the United Nations in 2015.

Commitment Features

The commitment requires G20 members to include environmentally oriented spending, primarily aimed at mitigation and adaptation to climate change, into their post-pandemic recovery efforts, while at the same time avoiding additional harm to the environment.

To fully comply with the commitment the G20 member should adopt a recovery and resilience plan (or a similar policy document) allocating funds for concrete actions to mitigate the adverse effects of or adapt to climate change. The G20 member should also avoid taking policy actions, which may cause harm "to the climate and environment."

Mitigation actions refer to efforts to prevent, reduce or reverse the anthropogenic effects on the environment. Adaptation actions refer "to adjustments in ecological, social, or economic systems in response to actual or expected climatic stimuli and their effects or impacts."⁵⁴²⁹ This set of actions may include, but are not limited to:

- Natural ecosystems restoration
- Biodiversity and natural habitat rehabilitation;
- Forest wildfire mitigation;
- Creating weather-resilient infrastructure;
- Reducing adverse impacts of climate change-induced conditions on local communities, etc.
- The policy actions considered harmful for climate resilience and environment in general may include, but are not limited to:
 - Relaxing environmental regulation for businesses;
 - Increasing financial or regulatory benefits to emission-heavy industries;
 - Increasing fossil-fuel subsidies (both production and consumption-wise);

⁵⁴²⁹ What do adaptation to climate change and climate resilience mean?, UNFCCC 2022. Access Date: 12 January 2021.

<https://unfccc.int/topics/adaptation-and-resilience/the-big-picture/what-do-adaptation-to-climate-change-and-climate-resilience-mean>.

- Financing or otherwise supporting projects, which result in shrinking of nature conservation and protected areas, etc.

Anthropogenic or natural disasters causing harm to the climate and environment, which may happen during the monitoring period, do not affect the scoring of this commitment as they cannot be considered policy actions, taken by the G20 members’ governments or intended results thereof.

To partially comply with the commitment the G20 member should either adopt a policy document allocating funds for climate change adaptation and mitigation, while taking policy actions, which may cause harm to the climate and environment, or fail to adopt policy documents allocating funds for climate change adaptation and mitigation, while taking no policy actions, which may cause harm to the climate and environment.

The G20 member which does not adopt policy documents allocating funds for climate change adaptation and mitigation, and takes policy actions, which may cause harm to the climate and environment is considered non-compliant with the commitment.

Scoring Guidelines

-1	The G20 member does not adopt policy documents allocating funds for climate change adaptation and mitigation, AND takes policy actions, which may cause harm to the climate and environment.
0	The G20 member adopts a policy document allocating funds for climate change adaptation and mitigation, and takes policy actions, which may cause harm to the climate and environment OR does not adopt policy documents allocating funds for climate change adaptation and mitigation, and takes no policy actions, which may cause harm to the climate and environment.
+1	The G20 member adopts a policy document allocating funds for climate change adaptation and mitigation, AND takes no policy actions, which may cause harm to the climate and environment.

Argentina: +1

Argentina has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 1 November 2021, President Alberto Fernandez while participating in Glasgow at the High-level event entitled “Action and Solidarity: The Critical Decade” declared 2 per cent increase in the National Contribution to promote investment and the development of national production chains to move forward with an inclusive, stable, sovereign, sustainable and federal energy matrix.⁵⁴³⁰

On 8 November 2021, Minister of Health Carla Vizzotti announced the establishment of a working group on Climate Change and Health. The objectives are to mainstream the issue of climate variability and climate change in the policies and programmes of the health portfolio; to encourage the

⁵⁴³⁰ Without sustainable financing, there will be no sustainable development, Casa Rosada Presidency (Buenos Aires) 1 November 2021. Translation provided by DeepL Translate. Access Date: 3 March 2022. <https://www.casarosada.gob.ar/slider-principal/48203-sin-financiamiento-sostenible-no-habra-desarrollo-sostenible-afirmo-el-presidente-en-glasgow>

incorporation of health promotion and protection as fundamental elements of policies related to climate change; to create a space for updating and exchanging specific knowledge on the subject.⁵⁴³¹

On 11 November 2021, Minister of Environment and Sustainable Development Juan Cabandié, along with his counterparts from Brazil, Paraguay and Uruguay announced the creation of a joint negotiating group on climate change. The group's main areas of focus are agriculture, global food security and the region's ecosystems for sustainable development.⁵⁴³²

On 17 November 2021, the Ministry of Agriculture, Livestock and Fisheries announced the launch of a national sustainable aquaculture development programme which ensures sustainable use of resources (soil, water, aquatic organisms) and optimizes the economic benefits.⁵⁴³³

On 9 December 2021, the Ministry of Environment and Sustainable Development reported receiving USD70 million from the Inter-American Development Bank for integrated solid waste management and a commitment to eliminate 5,000 open dumps in the country.⁵⁴³⁴

On 22 December 2021, the Ministry of Environment and Sustainable Development presented the National Strategy for Sustainable Consumption and Production that seeks to promote the decoupling of economic growth from environmental degradation and resource-intensive use towards a just transition. Key strategic areas include resource efficiency; pollution reduction; sustainable consumption and lifestyles; innovation and knowledge; public leadership; and information and awareness.⁵⁴³⁵

On 19 January 2022, Minister Cabandié participated in the launch of the National Renewable Cluster to expand electricity supply and care for the environment. Forming a cluster to build future solar parks is said to increase the share of renewable energy in energy matrix as part of the commitment Argentina have made to the energy transition.⁵⁴³⁶

On 3 February 2022, the Ministry of Environment and Sustainable Development introduced a programme to support indigenous people who conserve natural ecosystems in their territories. It aims to build capacity and provide resources so that communities can be aware of the values of biodiversity

in their territories, develop management plans for its conservation and sustainable use, as well as facilitate the commercialization of products and promote community tourism.⁵⁴³⁷

On 15 March 2022, Secretary of Climate Change, Sustainable Development and Innovation Rodrigo Rodríguez Tornquist held a meeting with the Australian Ambassador to Argentina Brett Hackett to review the common agenda that both countries have in relation to climate change: climate crisis adaptation plans, the development of good environmental assessment practices and the promotion of green hydrogen production in the energy transition.⁵⁴³⁸

On 22 March 2022, President Fernández chaired the first National Climate Change Cabinet meeting of the year. Argentina has proposed a debt-for-environment swap with multilateral lending institutions.⁵⁴³⁹

On 4 August 2022, Ministry of Environment and Sustainable Development obtained a loan to strengthen the comprehensive management of solid urban waste throughout the country. The credit approval will reach USD 450 million over four years and was granted by the Inter-American Development Bank (IDB), the European Investment Bank and the French Development Agency.⁵⁴⁴⁰

On 16 September 2022, Ministry of Environment and Sustainable Development of the Nation the Secretary of Climate Change and Sustainable Development Cecilia Nicolini, participated in a conference on climate action in Korea together with global leaders from more than 60 countries. The theme of the international meeting revolved around the mechanisms to promote climate action in developing countries in the face of growing global economic pressures and uncertainties.⁵⁴⁴¹

On 20 September 2022, Minister Cabandié traveled to the province of La Rioja to inaugurate a pellet factory and sign agreements with Governor Ricardo Quintela, for the delivery of machinery linked to waste management and fighting forest fires for an amount greater than USD50 million.⁵⁴⁴²

On 26 September 2022, Minister Cabandié delivered USD87 million for waste management and biogas capture in Gualeguaychú. The head of the environmental portfolio also announced that the IDB approved financing to expand the treatment cells at the waste plant in that town in Entre Ríos.⁵⁴⁴³

On 28 September 2022, Secretary for Climate Change, Sustainable Development and Innovation of the Ministry of the Environment Cecilia Nicolini participated in a meeting with climate change authorities from the member countries of the Community of Latin American and Caribbean States, which took place in the Palacio San Martín, to consolidate a common vision and strategy in international discussions, within the framework of the United Nations Conference on Climate Change to be held in Egypt next November.⁵⁴⁴⁴

Argentina has taken strong actions to support natural eco-systems restoration and biodiversity, natural habitat rehabilitation, forest wildfire mitigation and reducing adverse impacts of climate change-induced conditions on local communities. The Government launched national sustainable aquaculture development program to ensure sustainable use of resources and optimize the economic benefits, National Strategy for sustainable consumption and production to promote decoupling of economic growth from environmental degradation and resource-intensive use towards a just transition and created joint negotiating group with other countries to focus on agriculture, global food security and the region's ecosystems. Also, during the monitoring period no policy actions, which may cause harm to the climate and environment have been found.

Thus, Argentina receives a score of +1.

Analyst: Elena Alekseeva

Australia: 0

Australia has partially complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 10 November 2021, the government pledged to establish a new AUD1 billion fund to promote development of low emissions technologies. The Low Emissions Technology Commercialization Fund would combine AUD500 million of governmental spendings along with AUD500 million of private investments. The Fund is said to back Australian companies at early stages of new technologies development.⁵⁴⁴⁵

On 18 November 2021, the government pledged to grant AUD44 million funding under the Modern Manufacturing Initiative to six Australian companies operating in recycling, renewables and sustainable manufacturing. Government funding would help to create jobs, scale-up recycling process and find new export opportunities.⁵⁴⁴⁶

On 13 December 2021, Australia and Korea signed a cooperation agreement on clean energy technologies development. The parties pledge to invest AUD100 million together to lower carbon emissions, create jobs in renewables and support overall economic growth.⁵⁴⁴⁷

On 7 January 2022, Australia and Japan signed a bilateral agreement to facilitate trade on hydrogen. The Government plans to attract foreign investment into local supply chains. The Australian Clean Hydrogen Trade Program would channelize AUD150 million to this end.⁵⁴⁴⁸

On 15 February 2022, Australia and India signed six bilateral agreements on cooperative low emissions technology development. The parties aim at making low and zero emission technologies cost-effective and competitive with higher emitting alternatives. The Government pledged to invest AUD565.8 to support international partnerships of this kind. Also, the allocated money would facilitate creation of 2500 jobs in Australia-based low emission projects.⁵⁴⁴⁹

On 8 March 2022, the Government entered an agreement with Germany to promote hydrogen innovations. The parties committed to provide AUD50 million and EUR50 million investments respectively; allocated sums would facilitate establishment of renewable hydrogen supply chains.⁵⁴⁵⁰

On 11 March 2022, the Government announced that it would invest AUD5.8 million to realize strategic and economic priorities under Australia-India three-year Minerals Investment Partnership. The project is said to benefit renewable energy sector as well as automobile production, defense, telecommunications, aerospace and agriculture.⁵⁴⁵¹

On 14 March 2022, the Government released the allocation plan for offshore natural resource exploration. The plan implies intensification of oil field exploitation to facilitate the country's energy security amid the crisis. The bids for 21 areas across Australia coastline are to be assessed by the National Offshore Petroleum Titles Administrator.⁵⁴⁵²

On 15 March 2022, the Government allocated AUD8.5 million through the Clean Energy Finance Corporation to develop a renewable energy park in the Gippsland region. The park is said to facilitate the country's energy transition as well as provide the local population with jobs.⁵⁴⁵³

⁵⁴⁴⁷ Australia and Republic of Korea sign new deals on clean energy tech and critical minerals, the Hon Angus Taylor MP 13 December 2021. ⁵⁴⁵³ \$8.5M to build innovative Gippsland Renewable Energy park, the Hon Tim Wilson MP 15 March 2022. Access Date: 21 March 2022. <https://www.minister.industry.gov.au/ministers/wilson/media-releases/85m-build-innovative-gippsland-renewable-energy-park>

On 15 March 2022, the Government announced its intention to invest AUD217 million to support national steel production. Enhanced steel production is said to facilitate renewable energy projects as well as the local defense sector. Also, the Government plans to create more 1000 jobs in steel production and adjacent industries.⁵⁴⁵⁴

On 15 March 2022, Secretary of Climate Change, Sustainable Development and Innovation Rodrigo Rodriguez Tornquist held a meeting with the Australian Ambassador to Argentina Brett Hackett to review the common agenda that both countries have in relation to climate change: climate crisis adaptation plans, the development of good environmental assessment practices and the promotion of green hydrogen production in the energy transition.⁵⁴⁵⁵

On 12 July 2022, Australia and the United States signed the bilateral “Net Zero Technology Acceleration Partnership” on margins of the Sydney Energy Forum. This is a formal partnership to accelerate the development and deployment of zero emissions technology and cooperate on critical minerals supply chains to reduce greenhouse gas emissions while supercharging economic growth.⁵⁴⁵⁶

Australia has taken strong action to promote clean energy production and allocated sufficient financial resources to fulfil national obligations under green transition agenda. However, within the monitoring period Australia has also taken steps to promote local industrial production namely steel production that could potentially cause harm to the environment.

Thus, Australia receives a score of 0.

Analyst: Alexander Ignatov

Brazil: +1

Brazil has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 31 October 2021, on the first day of the United Nations Climate Change Conference (COP26) the government announced that it was committed to reducing greenhouse gas emissions by 50 per cent by 2030 with an ultimate goal of reaching carbon neutrality by 2050. Brazil also shared its plans to eliminate illegal deforestation in the country.⁵⁴⁵⁷ The explicit actions for the country to reach this goal are contained in the document “Guidelines for a National Strategy for Climate Neutrality,” presented at the event. The publication includes the “National Plan for the Control of Illegal Deforestation and Recovery of Native Vegetation 2020-2023.”⁵⁴⁵⁸

On 17 January 2021, the Ministry of Mines and Energy affirmed the decision of the National Energy Policy Council to maintain the mandatory biodiesel content in diesel fuel at 10 per cent throughout

⁵⁴⁵⁸ Guidelines for a National Strategy for Climate Neutrality, Brazilian Government (Brasilia) 31 October 2021. Translation provided by Google Translate. Access Date: 2 February 2022. <https://www.gov.br/mma/pt-br/DiretrizesparaumaEstrategiaNacionalparaNeutralidadeClimtica.pdf>.

2022. This policy is aimed at reducing carbon emissions resulting from the use of diesel fuel and promote the clean bioenergy sector. It also acts as one of the staples of the Guidelines for a National Strategy for Climate Neutrality.⁵⁴⁵⁹

On 18 January 2022, the Ministry of Mines and Energy published a report on the importance of the building sector for energy consumption. The report, titled “Implementing the Paris Agreement and Reducing Greenhouse Gas Emissions Throughout the Life Cycle of Buildings: European Public Policies, Tools and Market Initiatives,” was prepared by the Buildings Performance Institute Europe in partnership with the Ministry. The study presents public policies developed to assist in the adoption of strategies and reduce the environmental impact of the building sector.⁵⁴⁶⁰

On 31 January 2022, the government announced the investment of BRL6 billion (USD1.14 billion) in energy and infrastructure in Rio de Janeiro. The investment includes the construction of the country’s largest natural gas-fired power plant as well as the expansion of road, railroad and port infrastructure. The primary objective of the whole investment project is the construction of the GNA II Thermolectric Plant, which is expected to become be the biggest gas-fired thermal plant in the country and contribute to the Brazilian energy security, supplying energy to 14 million homes.⁵⁴⁶¹

On 21 March 2022, the Ministry of Mines and Energy and the Ministry of Environment launched a set of incentive measures for the production and sustainable use of biomethane. The initiative contributes to the commitments made by the country during COP26. The document, signed by Brazil and more than a hundred other countries, provides for a global effort to reduce methane emissions by 30 per cent by 2030 in relation to the 2020 levels. The MMA Administrative Rule no. 71, dated 21 March 2022, establishes the National Program for Methane Emission Reduction and the Special Regime of Incentives for Infrastructure Development.⁵⁴⁶²

On 13 April 2022, through the Decree No. 11.044, the Brazilian Government launched the Certificate of Recycling Credit (Recicla+) Program. The measure aims to provide an injection of estimated BRL14 billion (USD 2.96 billion) in private investment in the recycling of products and discarded packaging.⁵⁴⁶³

On 13 April 2022, President Jair Bolsonaro, signed a Federal Decree No. 11.043, establishing the National Solid Waste Plan (Planares). The plan includes guidelines, strategies, actions and sets targets to modernize solid waste management in the country, in order to put into practice the objectives set

⁵⁴⁵⁹ MME reaffirms the correctness of the CNPE decision to maintain the biodiesel content in diesel at 10% throughout 2022, Brazilian Government (Brasilia) 17 January 2022. 2021. out in the National Policy for Solid Waste - Law No. 12.305 of 2010. Among the objectives set by the plan is the elimination of all landfill sites in the country by 2024.⁵⁴⁶⁴

On 26 April 2022, the government, in particular, the ministries of the Environment and the Ministry of Mines and Energy published the joint Interministerial Ordinance No. 107, of 25 April 2022, which provides for the controlled elimination of polychlorinated biphenyls (PCBs), approves the PCB Management Manual for electric equipment and implements the PCB National Inventory system. PCBs are a class of persistent organic pollutants, banned by the Stockholm Convention in 2001.⁵⁴⁶⁵

On 30 June 2022, a new Brazilian Mineral Policy document was published. The Policy provides for the creation of instruments for planning in the mineral sector and a collegiate body for coordinating and implementing the respective public policy - National Council of Mineral Policy. The general aim is to promote economic, social and environmentally responsible use of the country's mineral resources, aiming at the competitiveness and development of the mineral sector.⁵⁴⁶⁶

On 26 September 2022, the Ministry of Environment of Brazil announced a second call for the applications to the Floresta+ Conservation initiative. Small producers, owners and holders of rural properties in the nine states of the Legal Amazon are eligible to enroll in the program until 28 February 2023. The project provides financial incentives to individuals and enterprises, which contribute to protection and recovery of forest areas as well as contribute to greenhouse gases emissions reduction.⁵⁴⁶⁷

Brazil allocated funds for climate change adaptation and mitigation, while taking no policy actions, which could cause harm to the climate and environment.

Thus, Brazil receives a score of +1.

Analyst: Andrei Sakharov

Canada: +1

Canada has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 2 November 2021, Minister of Environment and Climate Change Steven Guilbeault announced that Canada will contribute CAD37.5 million to the Least Developed Countries Fund, up to CAD10 million to the Adaptation Fund that in its turn will support vulnerable countries against the devastating impacts of climate change, and up to CAD10 million for the National Adaptation Plan Global Network at the African Adaptation Acceleration Summit. Funding for these important initiatives comes from Canada's CAD5.3 billion international climate finance commitment over the next five years. It was also

announced that Canada will increase its provision of funding towards climate adaptation to a minimum of 40 per cent.⁵⁴⁶⁸

On 3 November 2021, Minister for Environment, Nature Conservation and Nuclear Safety Jonathan Wilkinson highlighted the joint Canada-Germany Climate Finance Delivery Plan. The Delivery Plan sheds light on when and how developed countries will meet the CAD100 billion annual climate finance goal through to 2025. The Plan suggests a trajectory of climate finance from through to 2025 — taking into account new climate finance incentives including pledges from developed countries and multilateral development banks, as well as collective actions to improve the delivery of climate finance.⁵⁴⁶⁹

On 3 November 2021, Minister of Innovation, Science and Industry François-Philippe Champagne and Minister of Environment and Climate Change Steven Guilbeault announced an investment of CAD20 million in GHGSat, of Montréal, Quebec, through Sustainable Development Technology Canada (SDTC). GHGSat will use this funding to increase the number of high-tech satellites that track greenhouse gas emissions from the Earth's orbit. This space-based system for greenhouse gas monitoring uses spectrometer imaging to obtain high-resolution images of methane emissions.⁵⁴⁷⁰

On 6 November 2021, the government announced that at least 20 per cent of its CAD5.3 billion climate finance commitment to nature-based climate solutions with biodiversity co-benefits will be allocated in developing countries over the next five years.⁵⁴⁷¹

On 6 November 2021, Minister Guilbeault announced that the government would invest CAD460 million over five years to protect and expand twenty-two of Canada's national wildlife areas. This funding will also give the government an opportunity to create ten new national parks and four new freshwater marine conservation areas, at the same time working in order to acquire the territory needed to expand and complete existing national parks.⁵⁴⁷²

On 9 November 2021, Minister Guilbeault announced that the government would invest CAD10 million over five years towards the Climate and Clean Air Coalition Trust Fund. This step was announced at the Climate and Clean Air Ministerial, conveyed by the Special Presidential Envoy for Climate, John Kerry, and Ghana's Minister of Environment, Science, Technology and Innovation,

Kwaku Afriyie, where members committed to step up ambition and action to address climate and air issues, with a special focus on reducing methane emissions.⁵⁴⁷³

On 10 November 2021, Canada signed four declarations to accelerate international partnerships to tackle climate change by reducing carbon pollution from transportation.⁵⁴⁷⁴

On 22 November 2021, Minister of Indigenous Services Patty Hajdu announced that Indigenous Services Canada has received and approved a funding request through the Emergency Management Assistance Program for CAD4.4 million in additional funding to the British Columbia First Nations' Emergency Services Society. These financial resources be used in order to support the First Nations' Emergency Services Society as they assist First Nations in their response to the widespread flooding.⁵⁴⁷⁵

On 22 November 2021, Minister Guilbeault announced that the Government of Canada is issuing an Emergency Order to protect Western Chorus Frog habitat in Longueuil, Quebec. The Emergency Order follows a threat assessment by Environment and Climate Change Canada based on the best available information, including the most recent science and all data and documentation provided by both governmental and non-governmental organizations of Canada.⁵⁴⁷⁶

On 29 November 2021, Minister Champagne and President of the Treasury Board Mona Fortier announced an investment of CAD3.4 million in Ottawa-based SmartCone Technologies through the SDTC.⁵⁴⁷⁷

On 3 December 2021, Minister Guilbeault announced that the government is launching a series of early consultations on key, new emissions reductions measures before the end of the year. The Minister also confirmed that he will table the 2030 Emissions Reduction Plan—as required by the new Canadian Net-Zero Emissions Accountability Act—by the end of March 2022.⁵⁴⁷⁸

On 7 December 2021, Minister Guilbeault announced that applications are now being accepted for the Nature Smart Climate Solutions Fund. With up to CAD200 million available over the next five years,

CAD5.6 million in support of eight projects across Alberta that will help communities attract investment, create jobs and transition towards a greener economy.⁵⁴⁸⁶

On 20 January 2022, Minister Champagne and Julie Dabrusin, Parliamentary Secretary to the Minister of Natural Resources and to the Minister of Environment and Climate Change, announced the release of *Resourceful, Resilient, Ready: Canada's Strategy for Satellite Earth Observation*, which describes how Canada will take full advantage of the unique vantage point of space to address climate change and other key challenges of our time.⁵⁴⁸⁷

On 27 January 2022, Minister Guilbeault announced that the second round of applications is open for CAD200 million through the Low Carbon Economy Fund's Champions stream, which supports a wide range of local pollution-cutting initiatives in communities across Canada.⁵⁴⁸⁸

On 27 January 2022, Minister of Intergovernmental Affairs, Infrastructure and Communities Dominic LeBlanc launched a call for applications for new projects that will support public transit systems across Canada. Starting, applications to the Zero Emission Transit Fund, the Active Transportation Fund and the Rural Transit Solutions Fund will be accepted. These funds will help shorten people's commutes, grow a strong, healthy economy, and fight climate change.⁵⁴⁸⁹

On 28 January 2022, Minister Guilbeault announced the launch of consultations on two important measures to reduce methane emissions from landfills. Reducing these emissions will help the Government of Canada achieve its 2030 targets to reduce overall greenhouse gas emissions by 40 to 45 per cent below 2005 levels and to reduce methane emissions by 30 per cent as part of its commitment to the Global Methane Pledge.⁵⁴⁹⁰

On 2 February 2022, Minister Guilbeault and Chief Peter Powder of the Mikisew Cree First Nation announced a large expansion of the Kitaskino Nuwenënë Wildland Park in Northern Alberta. Through CAD5.3 million in funding under the Canada Nature Fund, the Mikisew Cree First Nation and the Government of Alberta have expanded the park's existing western border. This collaboration expands the park by 1,438 square kilometers and significantly adds to the largest connected area of protected boreal forest in the world.⁵⁴⁹¹

On 9 February 2022, the government introduced in the Senate the bill Strengthening Environmental Protection for a Healthier Canada Act, which would modernize the Canadian Environmental Protection Act, 1999 for the first time in 20 years and make related amendments to the Food and Drugs Act.⁵⁴⁹²

On 14 February 2022, Minister Guilbeault launched the Output-Based Pricing System Proceeds Fund, a new program to support industrial initiatives that reduce greenhouse gas emissions and deploy clean technology and green energy. The program will use the proceeds of Canada's carbon pollution pricing system for heavy industry—collected in Manitoba, New Brunswick, Ontario, and Saskatchewan—to support low carbon technology projects in those provinces. Approximately CAD161 million from the 2019 compliance period will go towards projects that reduce carbon pollution.⁵⁴⁹³

On 17 March 2022, Minister Guilbeault announced that the department is now accepting applications for funding from the Environmental Damages Fund (EDF). More than CAD8.3 million is available to help eligible recipients across the country carry out projects that improve Canada's natural environment. Funding distribution is based on the geographic region in which environmental convictions have resulted in fines and penalties being directed to the EDF.⁵⁴⁹⁴

On 25 March 2022, Minister Guilbeault launched the Government of Canada's consultations to seek input from the provinces and territories, Indigenous Peoples, industry, and interested stakeholders to inform the design of tougher regulations to achieve at least a 75 per cent reduction in methane emissions from the oil and gas sector by 2030. Building on Canada's progress in lowering methane emissions to date, Environment and Climate Change Canada is seeking input on a number of key topics to cut emissions further.⁵⁴⁹⁵

On 31 March 2022, Minister Guilbeault, Minister Wilkinson, Minister Champagne, Minister of Labour Seamus O'Regan Jr., and government officials participated in the GLOBE Forum 2022, a meeting with business leaders and innovators working to advance the transition to a clean growth economy. A key highlight of the conference was the announcement by Prime Minister Justin Trudeau of the 2030 Emissions Reduction Plan: Canada's Next Steps for Clean Air and a Strong Economy, along with Minister Guilbeault on Tuesday. An important early deliverable under the Canadian Net-Zero Emissions Accountability Act, the plan is a sector-by-sector roadmap of measures needed for Canada to reach its ambitious greenhouse gas emission reduction targets of at least 40 per cent below 2005 levels by 2030, and net-zero emissions by 2050.⁵⁴⁹⁶

On 11 April 2022, Minister Guilbeault highlighted the Government's plan to invest CAD547.5 million over four years to launch a new purchase incentive program for medium- and heavy-duty zero-emission vehicles to help businesses upgrade their fleets. Minister Guilbeault made the announcement at Motrec International Inc., a global company based in Canada that builds industrial electric vehicles. Minister Guilbeault was joined by the Minister of Agriculture and Agri-Food Canada, Marie-Claude Bibeau; the Member of Parliament for Sherbrooke, Élisabeth Brière; and Blair McIntosh, President and CEO of Motrec.⁵⁴⁹⁷

On 21 April 2022, Member of Parliament for Fredericton Jenica Atwin, on behalf of Minister Guilbeault announced CAD 440,000 in funding for three new projects to directly address water-quality issues in the Wolastoq/Saint John River watershed. The funding comes from the Atlantic Ecosystems Initiatives, which aims to improve the health, productivity, and sustainability of priority ecosystems in Atlantic Canada.⁵⁴⁹⁸

On 21 April 2022, Member of Parliament for Halifax Andy Fillmore, on behalf of Minister Guilbeault announced CAD554,700 in funding for three new projects to directly address water-quality issues in the Southern Gulf of St. Lawrence and the Wolastoq/Saint John River watersheds. The funding comes from the Atlantic Ecosystems Initiatives, which aim to improve the health, productivity, and sustainability of priority ecosystems in Atlantic Canada.⁵⁴⁹⁹

On 22 April 2022, Parliamentary Secretary to the Minister of Natural Resources and to the Minister of Environment and Climate Change Julie Dabrusin alongside Councillor for Ward 14 Toronto-Danforth Paula Fletcher and member of the Executive Committee and Board of Directors for Toronto and Region Conservation Authority, celebrated progress made to restore fish and wildlife habitat in the Toronto and Region Area of Concern, with the support of CAD203,000 in funding under the Great Lakes Protection Initiative.⁵⁵⁰⁰

On 29 April 2022, the government announced an investment of up to CAD17.5 million from the federal Low Carbon Economy Fund and CAD28.5million from the Government of Quebec to support Ciment Québec under the EcoPerformance program. This project will reduce emissions by installing a new energy-efficient cement grinding workshop at the Saint-Basile cement plant. The federal funding comes from the Low Carbon Economy Leadership Fund, which invests in projects that reduce carbon pollution and supports industries to put in place clean technologies that will help them be more efficient and innovative.⁵⁵⁰¹

On 5 May 2022, Minister Guilbeault announced a CAD2.8-million investment for SaskPower from the Low Carbon Economy Fund to support its Northern First Nations Home Retrofit Program, which this week is launching its application window for the year. SaskPower is also contributing over CAD1.0 million to support this project, which will provide energy efficiency home retrofits in participating First Nations communities.⁵⁵⁰²

On 16 May 2022, Minister Guilbeault launched a public consultation to develop Canada's first National Adaptation Strategy, a whole-of-society blueprint for coordinated action across the country, ensuring communities and Canadians are prepared for the impacts of climate change. The Minister launched the consultations at a virtual adaptation conference attended by over a thousand participants, including provinces, territories, leaders of National Indigenous Organizations, as well as climate adaptation experts, industry representatives, and members of the public.⁵⁵⁰³

On 24 May 2022, Minister Guilbeault announced CAD 20 million over four years to support four West African countries—Ghana, Liberia, The Gambia, and Togo—to help them build the capacity of their national climate measurement, reporting, and verification (MRV) systems. MRV systems are a crucial step for nations to develop strong and effective mitigation policies and actions because they give governments transparent, accurate, and comparable information on emissions sources. This Canadian climate finance project administered by NovaSphere, a Canadian non-profit organization, will help countries track emission reduction progress as they work towards achieving their goals under the Paris Agreement.⁵⁵⁰⁴

On 25 May 2022, Minister Guilbeault will advance Canada's leadership internationally for cooperation at three important back-to-back gatherings in Europe over the coming week. At these meetings, Minister Guilbeault will push for strong international action to achieve the Paris Agreement goals and keep a 1.5°C temperature rise within reach. Leading on climate action starts at home, which is why Minister Guilbeault will share the details of Canada's new 2030 Emissions Reduction Plan. He will also advocate for agreement on a new global biodiversity framework, and agreement on measures to reduce pollution, including a new legally binding global agreement on plastic waste. International collaboration is the only way to achieve a net-zero economy for the future while protecting the environment and conserving biodiversity for today.⁵⁵⁰⁵

On 31 May 2022, Minister Guilbeault hosted the sixth Ministerial on Climate Action (MoCA6) in Stockholm, Sweden. The meeting is occurring at the key halfway point between the 26th Conference

of the Parties (COP26) to the United Nations Framework Convention on Climate Change, held in Glasgow in late 2021, and COP27, to be held in Egypt in late 2022.⁵⁵⁰⁶

On 2 June 2022, Minister Guilbeault and Bhupender Yadav, India's Minister of Environment, Forest and Climate Change, signed a memorandum of understanding to increase bilateral cooperation on climate action, environmental protection and conservation. Both countries agreed to collaborate, exchange information and expertise, and support their respective ambition in a wide range of areas, including increasing renewable energy capacity, decarbonizing heavy industries, reducing plastic pollution, supporting the sound management of chemicals, and ensuring sustainable consumption.⁵⁵⁰⁷

On 9 August 2022, Minister Wilkinson announced an investment of over CAD2.4 million in Indigo Park Canada to install 500 Level 2 EV chargers at 68 sites across British Columbia, Alberta, Ontario, Quebec and New Brunswick, three of which will be in Manitoba. Funded through Natural Resources Canada's Zero-Emission Vehicle Infrastructure Program, all chargers will be available to Canadians by March 2024. Indigo Park Canada also contributed over CAD2.4 million, bringing the total project cost to over CAD4.8 million.⁵⁵⁰⁸

On 15 August 2022, Minister Wilkinson announced the release of the Ontario Chapter of the Canada in a Changing Climate: Regional Perspectives Report to help inform and support adaptation to climate change in Ontario.⁵⁵⁰⁹

On 23 September 2022, Parliamentary Secretary to the Minister of Environment and Climate Change Terry Duguid announced an investment of more than CAD3.9 million over three years in thirty-nine new projects in Ontario through the Great Lakes Protection Initiative, part of the Government of Canada's Freshwater Action Plan.⁵⁵¹⁰

Canada allocated funds for climate change adaptation and mitigation, while taking no policy actions, which could cause harm to the climate and environment.

Thus, Canada receives a score of +1.

China: +1

China has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 30 November 2021, China Petroleum and Chemical Corp, launched a project in Kuqa, Xinjiang Uygur autonomous region, building a green hydrogen plant, which would be powered entirely by solar energy. The project is expected to reduce carbon dioxide emissions by 485,000 tons annually after it becomes operational in 2022.⁵⁵¹¹

On 7 December 2021, the National Energy Administration of China announced that it would launch the second phase of the wind and solar power projects focusing on the Gobi Desert and other arid regions by 2022. The new power plants are expected to get connected to the grid by 2023-24, generating clean energy for the region.⁵⁵¹²

On 24 January 2022, the State Council released a Comprehensive work plan for energy conservation and emission reduction, detailing the country's efforts "to build and improve an economic structure conducive to green, low-carbon and circular development in its ongoing anti-pollution fight to achieve its carbon peak and neutrality goals" set to be reached by 2060. The Plan is a part of the 14th five-year plan. It contains 10 measures aimed at energy conservation and emissions reduction, including improvements in building and infrastructure sectors, transport and logistics, curbing energy consumption, promoting green technologies, providing stimuli for industrial enterprises to improve waste pollution management and control, and dealing with waste accumulation. According to the plan, by 2025 China aims to reduce energy consumption per unit of gross domestic product by 13.5 per cent from 2020 while keeping total energy consumption "at reasonable levels."⁵⁵¹³

On 29 January 2022, the Civil Aviation Administration of China issued a roadmap for green development during the 14th Five-Year Plan period (2021-2025). The plan set up targets to "make civil aviation smarter, low-carbon and resource-efficient to achieve green transformation," including by optimizing aircraft fuel consumption and reducing airport CO2 emissions.⁵⁵¹⁴

On 23 March 2022, the National Development and Reform Commission and the National Energy Administration released a plan on the development of hydrogen energy for the 2021-2035. The plan provides for the creation of a complete cycle hydrogen energy industry development system "with the innovation capability significantly improved and the core technologies and manufacturing processes basically mastered."⁵⁵¹⁵

On 24 May 2022, the General Office of the State Council issued an action plan on controlling new pollutants, including persistent organic pollutants, endocrine disruptors and antibiotics. The plan sets

up a new management system which subjects chemical plants to rigorous inspections and monitoring to evaluate environmental risks and identify new high-risk pollutants. The plan also provides for the establishment and the improvement of the legal and regulatory framework on chemical-related environmental issues, as well as the upgrade of the technology standards system.⁵⁵¹⁶

On 30 May 2022, the State Council released a circular “on the implementation plan to promote the high-quality development of new energy in the new era,” prepared by the National Development and Reform Commission and the National Energy Administration. The plan provides for the acceleration of the construction of a clean, low-carbon, safe and highly efficient energy system with the total installed electricity capacity of wind and solar power of 1.2 billion kilowatts by 2030.⁵⁵¹⁷

On 28 July 2022, the National Development and Reform Commission announced an allocation of RMB2.4 billion (USD355 million) to save energy and reduce carbon emissions as part of the country’s effort to transition to a greener economy. The allocation is aimed at supporting the low-carbon and energy-saving transformation for key areas and industries, technology innovation in areas like low carbon, zero carbon, carbon removal and energy saving, as well as the promotion of a circular economy.⁵⁵¹⁸

On 19 September 2022, the government released a policy document on “conserving the mountains, rivers, forests, farmlands, lakes, grasslands and sands of the Yangtze River Basin area”. Among the targets of the document: ensuring that all water in the river basin area meets standards for second-tier classification by the end of 2025, ensuring the harmless disposal of at least 97 per cent of the garbage produced in Yangtze River Economic Belt counties, eliminating polluted water bodies in urban areas, recycling at least 80 percent of animal waste from livestock and poultry farms and continuously improving biodiversity.⁵⁵¹⁹

On 30 September 2022, the State Council announced the delivery of the first 2,000-metric-ton offshore wind-power installation platform for use in the Nansha district of Guangzhou, Guangdong province. According to the message, it is the first offshore wind-power installation platform that meets the fourth-generation standards of offshore wind equipment in China.⁵⁵²⁰

China allocated funds for climate change adaptation and mitigation, while taking no policy actions, which could cause harm to the climate and environment.

Thus, China receives a score of +1.

France: +1

France has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 15 November 2021, the Ministry of Ecological Transition and the Agency for ecological transition announced the winners of the call for expressions of interest aimed at recruiting technical advisers to support communities in the development of their wind and photovoltaic projects on the occasion of the opening of the Mayors and Local Authorities Fair.⁵⁵²¹

On 15 November 2021, Minister for the Ecological Transition Barbara Pompili installed the National Council for the Circular Economy (CNEC). Established by the Climate and Resilience Law, the CNEC takes over from the National Waste Council and the Steering Committee for the Roadmap for the Circular Economy to support the development of the circular economy in France. It is chaired by Member of Parliament for Haute-Savoie and member of the National Assembly's Sustainable Development and Regional Planning Committee Véronique Riotton.⁵⁵²²

On 22 November 2021, the Ministry for Ecological Transition, in partnership with the Ministry for Territorial Cohesion and Relations with local authorities and the various stakeholders launched the first national action plan for sustainable stormwater management. Covering the period 2022-2024, its ambition is to better integrate stormwater management into land-use planning policies, and to make this water a resource in the perspective of cities adapting to climate change.⁵⁵²³

On 23 November 2021, the new national pollinator plan was launched. Supported by the Ministries of Ecological Transition, and Agriculture and Food, the new pollinator plan covers the period 2021-2026. Broken down into 6 axes, it brings together concrete measures in favor of wild pollinating insects and honey bees, to restore their habitats and improve their available food resources, as well as to restore the ecological services provided by pollination.⁵⁵²⁴

On 29 November 2021, new tools of implementation of the National Strategy to Combat Imported Deforestation were presented by Bérangère Abba, Secretary of State for Biodiversity, during the strategy monitoring committee which brought together administrations, businesses, NGOs and research players. This new tool focuses on the risk of deforestation and conversion of Brazilian ecosystems associated with French soybean imports for each importing company. It is based on public, logistical and soon to be customs satellite data, and in particular enables the many signatories of the manifesto for the mobilization of French actors to fight against imported deforestation linked to soy (distributors, manufacturers, importers, etc.).⁵⁵²⁵

On 6 December 2021, the government the Greentech Innovation program. This program of the Ministry of Ecological Transition aims to identify and support start-ups that innovate in the service of public policies for ecological transition. The Greentech Innovation approach identifies 20 to 25 start-ups and small and medium-sized enterprises each year. The winners integrate the Greentech Innovation ecosystem and are supported on several aspects: visibility, business opportunities, networking, access to digital tools and public markets.⁵⁵²⁶

On 7 December 2021, the first Congress of the Space Climate Observatory, was held by France at the Ministry of Ecological Transition, in Paris. That international initiative brought together the scientific community, public authorities and businesses to monitor the consequences of climate change. The initiative implements international coordination in order to accurately assess and monitor the consequences of climate change, based on observations and numerical models. 33 countries and 4 international organizations are cooperating within this framework to develop operational decision-making tools in terms of preparation, adaptation and resilience to the impacts of climate change at the local level.⁵⁵²⁷

On 20 January 2022, the Hydroportail replaced the Hydro Bank and becomes the new reference site for access to hydrometric and hydrological data.⁵⁵²⁸

On 31 January 2022, the Colloquium on sustainable urban development was Organized by the Ministry of Ecological Transition.⁵⁵²⁹

On 1 February 2022, a second part of the Ecophyto II+ plan is launched today and focuses exclusively on action 27: “Building with the overseas territories an agro-ecology focused on reducing the use, risks and impacts of plant protection products.” This section has an indicative budget of EUR600,000. It aims to collect proposals contributing to the implementation of action 27 of the Ecophyto II+ plan, including in the overseas departments, whose priorities are: projects aimed at the development and transfer to advisers and farmers (professionals or individuals with family gardens) of alternative solutions, in particular biocontrol or plant protection preparations of no concern; projects concerning alternatives to herbicides in tropical crops; control methods excluding synthetic products against rodents classified as crop pests (rats in particular), selective and safe for other animal or plant species in tropical ecosystems.⁵⁵³⁰

On 2 February 2022, Minister Pompili and Secretary Abba announced the creation of the National Nature Reserve of the alkaline peat bog of Marchiennes, in Hauts-de-France.⁵⁵³¹

On 5 April 2022, the implementing decree amending the environmental code regarding the greening of vehicles used in the connection by goods delivery platforms was published in the Official Journal. Introduced by article 114 of the Climate and Resilience Law, the decree provides for the obligation for delivery platforms with more than 50 workers to comply with a minimum share, increasing over time, of very low emission vehicles with two or three wheels, bicycles and electrically assisted bicycles for the connection.⁵⁵³²

On 17 May 2022, the Ministries of Ecological Transition, Solidarity and Health launched the fourth national health environment plan (PNSE 4), “One environment, one health,” with an ambition: to better understand the risks to which everyone is exposed to better protect themselves and their environment. The COVID-19 health crisis has also reminded us of the strong interactions between human health, animal health and environmental health. To meet these challenges, as well as the growing expectations of citizens on environmental health, the PNSE 4 is based on an integrated approach to human, animal, and environmental health, while respecting a “One Health” approach.⁵⁵³³

France has taken strong actions to deliver national recovery and resilience plans namely authorization of the CNEC and introduction of new mechanisms for the National Strategy to Combat Imported Deforestation implementation. No policy action that could potentially harm the environment has been found during the monitoring period.

Thus, France receives a score of +1.

Analyst: Nikita Shilikov

Germany: +1

Germany has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 8 November 2021, the government announced additional climate adaptation finance of EUR150 million. Of this sum, EUR100 million from the Federal Ministry for Economic Cooperation and Development would be channeled the Global Environment Facility fund for least developed countries. The Federal Environment Ministry would contribute another EUR50 million to the Adaptation Fund.⁵⁵³⁴

⁵⁵³⁴ Germany commits 150 million euros for climate change adaptation in developing countries, German Federal Environment and Consumer Protection Ministry (Berlin) 8 November 2021. Access Date: 1 April 2022. <https://www.bmv.de/en/pressrelease/germany-commits-150-million-euros-for-climate-change-adaptation-in-developing-countries>.

On 8 March 2022, Germany entered an agreement with Australia to promote hydrogen innovations. The parties committed to provide EUR50 million and AUD50 million investments respectively; allocated sums would facilitate establishment of renewable hydrogen supply chains.⁵⁵³⁵

Germany has adopted a policy document allocating funds for climate change adaptation and mitigation, and taken no policy actions, which may cause harm to the climate and environment.

Thus, Germany receives a score of +1.

Analyst: Andrey Shelepov

India: +1

India has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 2 November 2021, Prime Minister Narendra Modi addressed the United Nations Climate Change Conference, announcing the country's goals of increasing non-fossil energy capacity to 500GW, while meeting about 50 per cent of its energy requirements from renewables by 2030; reducing carbon intensity of its economy by more than 45 per cent by 2030, and reaching Net Zero by 2070.⁵⁵³⁶

On 6 November 2021, the Indian Delegation stated that while India represented 17 per cent of the global population, its historical cumulative emissions amounted to only 4 per cent, and annual greenhouse gas emissions to about 5 per cent at the 26th United Nations Climate Change Conference. The achievement of 24 per cent reduction in gross domestic product emission intensity in 2005-2014 was also noted, as well as 17-fold increase in India's solar energy generation capacity.⁵⁵³⁷

On 1 February 2022, Minister of Finance Nirmala Sitharaman presented the Budget 2022-2023, unveiling a set of Government policies on sustainable development promotion. These included: measures to promote a shift to increased use of public transportation in urban areas, as well as supporting technology applications, such as electric vehicles; the allocation of additional funds to facilitate the domestic manufacturing of solar panels; a plan on circular economy transition; the introduction of 5-7 per cent biomass pellets to thermal power plants, which would allegedly result in carbon savings of 38 million metric tons annually.⁵⁵³⁸

India allocated funds for climate change adaptation and mitigation, while taking no policy actions, which could cause harm to the climate and environment.

Thus, India receives a score of +1.

Indonesia: 0

Indonesia has partially complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 15 November 2021, Indonesia introduced new rules on carbon trading to set up a market mechanism to help achieve the country's greenhouse gas reduction targets by 2030.⁵⁵³⁹ The regulation No. 98 of 2021 regarding the Implementation of Carbon Economic Value for Achieving Nationally Determined Contribution Targets and Control of Greenhouse Gas Emissions in National Development was signed by President Joko Widodo ahead of the United Nations Climate Change Conference in Glasgow; the regulation introduces specific mechanisms to implement the Carbon Economic Value, including (i) carbon trading (emissions trading and offsetting), (ii) result-based payment (conditioned on activities resulting in a verified reduction in greenhouse gas emissions or generating other benefits, such as ecological conservation), and (iii) carbon levies (tax, duty, customs or other).⁵⁵⁴⁰

On 19 November 2021, the Meteorology, Climatology and Geophysical Agency announced it was working on a National Action Plan for Climate Change Adaptation in response to the worsening global climate situation to reduce the impact of hydro-meteorological disasters and reduce greenhouse gas emissions, and in accordance with Indonesia's nationally determined contribution to reduce greenhouse gas emissions by 29 per cent to 41 per cent from the business-as-usual scenario by 2030.⁵⁵⁴¹

On 1 December 2021, it was also reported that Indonesia's government declared coal ash non-hazardous waste and planned to use bricks made from coal ash as building blocks for coral transplant projects, which caused great concerns and opposition from environmental activists and organizations.⁵⁵⁴²

On 29 December 2021, the state owned energy company PT Pertamina reported it was implementing four community programs, based on adaptation and mitigation approaches for Environmental, Social, and Governance (ESG) criteria to support the government's Climate Village Program for cutting carbon emissions; the programs were focused on greening to increase and maintain vegetation cover, waste management, utilization of new and renewable energy, and agricultural cultivation with low greenhouse gas emissions to prevent land and forest fires.⁵⁵⁴³

On 20 January 2022, the Financial Services Authority, building on collaboration with ministries/institutions, the financial services industry, academics, and international and national non-

governmental organizations, published the Green Taxonomy 1.0 as a guideline in supporting sustainable economic and investment activities in Indonesia.⁵⁵⁴⁴

On 19 February 2022, it was reported that Bank Indonesia (BI) had determined the BI Green Financial and Institutional Framework, consisting of the two pillars of green policy transition and green institution, with the goal to “realize an inclusive, sustainable, and resilient financial system and economic growth”; it was further reported that as of December 2021 Bank Indonesia had invested USD1.83 billion in the green portfolio.⁵⁵⁴⁵

On 28 February 2022, the state-run bank Mandiri executed a diversification program of sustainable financing instruments through wholesale funding in the framework of ESG through a USD500 million-worth repo (repurchase agreement) with two counterparties, as part of Bank Mandiri’s commitment to supporting Indonesia’s 2022 G20 Presidency; the landmark transaction became first in Indonesia and one of the first-movers in Southeast Asia.⁵⁵⁴⁶

On 9 March 2022, it was reported that 22 provinces of Indonesia had approved Regional Energy General Plans that served as references in establishing energy transitions in each region; furthermore, the provinces had started to issue technical gubernatorial regulations for the application of General Plans, rules on clean energy and electric vehicles, and circular letters in utilizing rooftop solar panels for governmental, industrial, hotel, and household development.⁵⁵⁴⁷

On 12 September 2022, Indonesia signed a new climate deal with Norway that will see the Nordic country pay the Southeast Asian one to keep its forests standing. The deal comes a year after Indonesia terminated a nearly identical scheme between the two countries over the lack of payments. Officials from both countries say it’s of mutual benefit to both countries, and to the world, to preserve Indonesia’s forests boost their capacity to sequester carbon from the atmosphere.⁵⁵⁴⁸

Indonesia has made considerable progress in developing policies and providing funds for climate change mitigation and adaptation, while still taking some actions that may cause harm to climate and environment.

Thus, Indonesia receives a score of 0.

bike paths and the development of Special Economic Zones. These measures are aimed at improving the security of water supply systems for drinking and irrigation purposes and include works to complete infrastructure for water derivation, storage and adduction, with the aim of reducing waste and increasing resilience to climate change.⁵⁵⁴⁹

On 16 December 2021, the Unified Conference approved the draft decree allocating EUR1.9 billion to large municipalities for the purchase of environmentally friendly electric or hydrogen-powered buses.⁵⁵⁵⁰

On 14 January 2022, the Ministry of Infrastructure and Sustainable Mobility announced “unprecedented investments” into the infrastructure of the Southern regions of the country. The Ministry allocated EUR25 billion for the program, of which EUR13 billion were directed specifically to the regions in the South, with specific attention to improving “green” mobility and local travel and reducing pollution in urban centers. EUR983 million were directed towards the renewal of suburban and urban buses, so as to improve air quality and reduce polluting emissions, with particular regard to large municipalities and those with higher pollution rates. Southern territories will also benefit from the planned for ‘Green Intercity’ trains program, amounting to EUR200 million.⁵⁵⁵¹

On 28 September 2022, Italian Economic Development Minister Giancarlo Giorgetti and Ecological Transition Minister Roberto Cingolani signed the interministerial decree formalizing the creation of “Critical Raw Materials” technical working group. The group unites institutions, research centers, supply chain consortia and trade associations with the objectives of strengthening coordination and formulating proposals for the creation of regulatory, economic and market conditions aimed at ensuring a safe and sustainable supply of raw materials.⁵⁵⁵²

Italy allocated funds for climate change adaptation and mitigation, while taking no policy actions, which could cause harm to the climate and environment.

Thus, Italy receives a score of +1.

decarbonization in Asia, and double to USD14.8 billion its assistance to help other countries adapt to climate change and prevent disasters.⁵⁵⁵³

On 10 December 2021, the Ministry of Economy Trade and Industry presented the Roadmap for promoting transition finance toward decarbonization in the chemical sector; the roadmap based on scientific grounds shows the technologies that are expected to be necessary in order to make the chemical sector carbon neutral by 2050, and should be referred to by companies when considering climate measures that use transition finance, as well as by financial institutions to assess whether a company's strategies and efforts toward decarbonization are eligible for transition finance when the company approaches them for funding.⁵⁵⁵⁴

On 20 December 2021, the Japan International Cooperation Agency (JICA) joined the "Renewables in Latin America and the Caribbean" initiative as a cooperating organization; within the framework of the initiative JICA plans to quickly identify issues and support needs related to the introduction of renewable energy in the region.⁵⁵⁵⁵

On 24 January 2022, the JICA signed a grant agreement with Lesotho to provide grant aid of up to JPY1.415 billion for the Project for Small Hydropower Improvement, aiming to rehabilitate small-hydropower generation facilities at Katse Dam based on Japanese technologies.⁵⁵⁵⁶

On 5 August 2022, Japan took a first step into its research for a green gross domestic product (GDP) measurement that reflects the country's progress in reducing greenhouse gas emissions in its economic growth. Prime Minister Fumio Kishida has made green transformation a key policy item as his government seeks to meet a pledge to cut carbon emissions by 46 per cent in 2030 compared with 2013 levels.⁵⁵⁵⁷

On 5 August 2022, the Ministry of Economy, Trade and Industry said that it aims to start a demonstrative carbon credit exchange market in fiscal year 2022-23 (April-March) as it considers means to monetize local companies' carbon emissions reduction in its push for carbon neutrality. This plan was included in an interim policy report presented during the seventh round of a policy study group, launched in February, that is looking at means of carbon pricing in pursuit of carbon neutrality as Japan intends to formulate its course of action of carbon pricing by the end of 2021.⁵⁵⁵⁸

Japan has made further progress in developing policies and providing funds for climate change mitigation and adaptation, while no evidence was found that Japan had taken any actions that may cause harm to climate and environment.

Korea: +1

Korea has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 8 December 2021, the government announced establishment of a new wetland protected area. The Binaeseom Island in Chungcheongbuk-do province would become the 28th inland wetland protected area that is a home to 15 endangered species.⁵⁵⁵⁹

On 10 December 2021, the government presented the Carbon Neutrality Vision and Strategy for Industry and Energy that is the first one of a kind touching upon Korea's transitioning to zero-emission growth. The country plans to eradicate coal as a source of power by 2050 and substitute it with renewables and hydrogen. According to the press release, the government envisaged a set of tax allowances and finance incentives to stimulate the private sector.⁵⁵⁶⁰

On 13 December 2021, Korea and Australia signed a cooperation agreement on clean energy technologies development. The parties pledge to invest AUD100 million together to lower carbon emissions, create jobs in renewables and support overall economic growth.⁵⁵⁶¹

On 29 December 2021, the government released the plan designed to remediate the Seocheon Brownfield previously used for copper processing. The plan implies creation of 550,000 square meters of wetland after the area would be cleared of heavy metals – cadmium, lead and arsenic.⁵⁵⁶²

On 6 January 2022, Minister of Trade, Industry and Energy Moon Sungwook paid a visit to Saudi Arabia. The minister discussed with his Saudi counterpart issues related to bilateral cooperation, including development of renewables and nuclear energy. Also, the parties discussed further steps to expand Korea-Saudi business exchanges in general.⁵⁵⁶³

On 20 January 2022, Minister Moon visited Saudi Arabia to host the 3rd meeting of Korea-Saudi Vision 2030 Committee meeting. The parties agreed to sign the MoU on establishing a joint casting-forging

plant in Ras Al-Khair, Saudi Arabia. The project worth USD940 million is scheduled to completion by 2025.⁵⁵⁶⁴

On 29 May 2022, the National Assembly passed 14 environmental bills including the Wildlife Protection and management act. The said act obligates government agencies to install and manage artificial structures to minimize harm to wildlife. Such measures may reduce the chances of animals or birds dying from dashing or flying into glass windows or soundproof walls. The government hopes that the revision will help minimize wildlife's suffering from colliding or falling and create a healthy natural environment.⁵⁵⁶⁵

On 24 June 2022, the government announced its intention to extend the usage of biofuels and hydropower. The plan outlines the ministry's plan to double the renewable energy generation by utilizing biogas, floating solar farms, and small hydropower generation at the environmental facilities such as wastewater treatment plants, water filtration plants, and dams. The ministry aims to increase the annual energy production at environmental facilities from 3,264 GWh in 2021 to 5,764 GWh by 2026. As to fulfil the ambition, the government plans to increase the total number of biomass gasification plants and invest total of KRW42.8 billion for five years to develop technologies for generating energy from animal and plant wastes.⁵⁵⁶⁶

Korea has made further progress in developing policies and providing funds for climate change mitigation and adaptation, while no evidence was found that Korea had taken any actions that may cause harm to climate and environment.

Thus, Korea receives a score of +1.

⁵⁵⁶⁷ Semarnat publishes Special Climate Change Program 2021-2024, Mexican Government (Mexico City) 13 November 2021. Translation provided by the analyst. Access Date: 4 April 2022. <https://www.gob.mx/semarnat/prensa/publica-semarnat-el-programa-especial-de-cambio-climatico-2021-2024?idiom=es>.

the proclamation released by the US government instructs the United States Trade Representative (USTR) to initiate negotiations with Mexico and Canada to address the measure originally imposed in January 2018, which covered imports of photovoltaic cells and photovoltaic cell modules entering the United States for a period of four years. In coordination with the Mexican industry, the Ministry of Economy will lead the negotiations with the USTR committed to maintaining competitiveness and certainty for trade and investment in the North American region, allowing the Mexican industry to continue exporting photovoltaic cells and modules to United States under the preferential conditions negotiated in the Treaty between Mexico, the United States and Canada.⁵⁵⁶⁸

On 28 February 2022, Petróleos Mexicanos (Pemex) increased oil and condensate production in the fourth quarter, as increased light crude output more than offset lower heavy grades from deepwater platforms. Pemex, as the state-owned oil company, reported crude and condensate production of 1.751 million barrels per day, a 4.5 per cent increase from a year earlier, according to a statement Monday. President Andrés Manuel López Obrador announced an intention to make Mexico self-sufficient in gasoline and diesel by extracting more crude oil and producing all of the country's fuel locally, instead of relying heavily on US imports. To ensure the country has enough crude to produce fuel, Mexico also plans to stop exports in the future.⁵⁵⁶⁹

On 17 August 2022, Ministry of Environment and Natural Resources (Semarnat) and the German Cooperation for Sustainable Development Mexico (GIZ Mx) presented the Information System of the Transparency Agenda for Climate Actions at the Subnational Level, which will allow entities States annually evaluate their progress in the implementation of mitigation measures for Greenhouse Gases and adaptation to climate change, in a transparent and reliable manner.⁵⁵⁷⁰

On 8 September 2022, it was announced that Semarnat began work to design the implementation strategy for the Kigali Amendment to the Montreal Protocol and its action plan for the gradual reduction of the production and consumption of Hydrofluorocarbons.⁵⁵⁷¹

On 8 March 2022, the government announced that it plans to use the largest portion of its resources derived from excess oil revenues to subsidize fuels such as gasoline and diesel.⁵⁵⁷²

Mexico has made further progress in developing policies and providing funds for climate change mitigation and adaptation, but also took policy actions, which may cause harm to the climate and environment by subsidizing gasoline and diesel.

Thus, Mexico receives a score of 0.

Analyst: Irina Popova

Russia: +1

Russia has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 10 December 2021, Minister of Energy of Russia Nikolai Shulginov launched the Russko-Polyanskaya solar power plant in Omsk oblast. The plant is expected to provide an annual reduction of harmful emissions by 12,700 tons and improve the environmental situation in the Omsk region. Commissioning of the Russko-Polyanskaya power plant will increase the total installed capacity of solar generation in the region's energy system to 60 MW, according to the minister. Total investment into the solar power plant construction amounted to RUB2.8 billion (USD37 million).⁵⁵⁷³

On 16 December 2021, the government approved the rules for posting publicly available information on the state of the environment. According to the new rules, federal, regional, and local authorities are obligated to publish information on the state of the environment, including the quality of atmospheric air, soil, water, and forest resources, harmful emissions, as well as radiation levels on their official websites or make it available to the public through state and municipal information systems.⁵⁵⁷⁴

On 15 March 2022, the Ministry of Natural Resources and Ecology announced its intention to finance building of four new recycling facilities in Chechnya region. Combined, these new recycling plants would process 270 tones of litter per year. The allocated sum has not been announced.⁵⁵⁷⁵

On 16 March 2022, the Ministry of Natural Resources and Ecology held a roundtable discussion with businesses on biodiversity protection actions. The Ministry announced its intention to attract more than RUB800 million to preserve endangered species. As of 22 March 2022, the Ministry has reached agreements with several major Russian businesses including Lukoil, Rosneft and Nornikel.⁵⁵⁷⁶

On 17 March 2022, the Ministry of Natural Resources and Ecology announced its intention to allocate extra RUB168 million to cleansing and reconstruction works on a river dam in Buryatia region. The dam would prevent flooding of 70 hectares of land close to the region's capital city of Ulan-Ude. Previously the Ministry has planned to spend at least RUB245 million to this end under the 2022

budgeting scheme. Extra funds would be included into the 2023 budget. The reconstruction works are scheduled to be completed by 2024.⁵⁵⁷⁷

On 29 March 2022, the Federal Project “Clean Air” was extended by two years – until 31 December 2026. The project aims to ensure a significant reduction in air pollution in 12 major industrial centers: Bratsk, Krasnoyarsk, Lipetsk, Magnitogorsk, Mednogorsk, Nizhny Tagil, Novokuznetsk, Norilsk, Omsk, Chelyabinsk, Cherepovets and Chita through measures to reduce emissions from industrial enterprises, municipal and transport infrastructure facilities.⁵⁵⁷⁸

On 21 April 2022, the Ministry of Natural Resources and the Environment announced that in March-April 2022 four new projects for the reclamation of landfills near Moscow “Safonovo,” “Yadrovo,” “Zavolenye” and “Taldomsky” were launched in accordance with the federal project “Clean Country” of the national project “Ecology.” Additionally, in December 2021, contracts were signed for the reclamation of the Egorievsky and Volovichi landfills.⁵⁵⁷⁹

On 22 April 2022, the Ministry of Natural Resources and the Environment reported that it had finished the drafting of the federal law “On Amending the Forest Code of the Russian Federation” and Article 9 of the Federal Law “On Limiting Greenhouse Gas Emissions.” The draft law is aimed at the implementation of climate projects in the field of forest relations on the territory of Russia, ensuring the reduction of greenhouse gas emissions and increasing the absorption of greenhouse gases.⁵⁵⁸⁰

On 2 August 2022, the government approved a list of environmental protection measures, for financing through environmental payments system. Environmental payments received by the regions’ budgets, including fines for environmental violations, will be primarily used to liquidate facilities that have a negative impact on the environment, e.g. landfill sites, abandoned enterprises, ownerless landfills, hazardous waste, etc.. In addition, funds are allowed to be allocated for additional environmental measures to protect and defend forests, protected areas, water bodies, flora and fauna, projects to reduce air pollution, land reclamation after mining, and other measures.⁵⁵⁸¹

On 24 August 2022, the government approved a RUB1.5 billion (USD25.2 million) federal subsidy to the regions for the purchase of containers for separate collection of solid municipal waste (MSW). This support measure is aimed at increasing recycling of MSW and accelerating the country’s transition to circular economy.⁵⁵⁸²

Russia has taken strong actions to deliver national recovery and resilience plans namely financed development of new recycling facilities and attracted green private investments. No policy action that could potentially harm the environment has been found during the monitoring period.

Thus, Russia receives a score of +1.

Analyst: Andrei Sakharov

Saudi Arabia: +1

Saudi Arabia has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 6 January 2022, Saudi Arabia and Korea held a bilateral meeting on bilateral cooperation issues. The parties discussed development of renewables and nuclear energy along with further steps to expand business exchanges in general.⁵⁵⁸³

On 20 January 2022, Saudi Arabia and Korea held an ordinary Korea-Saudi Vision 2030 Committee meeting. The parties agreed to sign the Memorandum of Understanding on establishing a joint casting-forging plant in Ras Al-Khair, Saudi Arabia. The project worth USD940 million is scheduled to completion by 2025.⁵⁵⁸⁴

On 21 January 2022, Energy Minister Abdulaziz bin Salman told the online World Economic Forum this week the kingdom was pursuing cleaner hydrogen development having allocated more than USD5 billion investment into developing a green hydrogen plant in its new megacity of Neom, while also having plans to develop hydrogen production based on shale gas (blue hydrogen) and nuclear energy (pink hydrogen); over the longer term the Kingdom has plans to become one of the world's major hydrogen producers and exporters.⁵⁵⁸⁵

On 27 September 2022, Saudi Data and Artificial Intelligence Authority (SDAIA) and IBM announced the signing of a strategic agreement to drive adoption of artificial intelligence in the carbon capture and industrial domains across Saudi Arabia. Announced at the second Global AI summit in the Kingdom, the first use case under this agreement will be in collaboration with the Ministry of Energy. SDAIA, and IBM will use artificial intelligence technology to detect, map, and eventually reduce carbon emissions across the country.⁵⁵⁸⁶

South Africa: +1

South Africa has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 2 November 2021, at the 26th United Nations Climate Change Conference (COP26), President Cyril Ramaphosa announced a revised Nationally Determined Contribution with the goals of reducing domestic carbon emissions to between 420 and 350 million tonnes of carbon dioxide equivalent by 2030. The President also announced a partnership with the governments of France, Germany, the United Kingdom and the United States, as well as the European Union, to support a transition to a low-carbon economy in South Africa. The Partnership pledged to mobilize ZAR131 billion (USD8.5 billion) over the next three years to implement the vision outlined in the Political Declaration on the just energy transition in South Africa, also unveiled at COP26. The Declaration laid out medium and long-term goals for “accelerated decarbonization” of the country’s energy system with particular attention to vulnerable demographics, e.g. coal miners, women and youth.⁵⁵⁸⁸

On 23 February 2022, Minister of Finance Enoch Godongwana announced the government’s plans to reform the electricity sector, including through the amendment of the 2006 Electricity Regulation Act,⁵⁵⁸⁹ that allow for private sector renewable energy generation projects of up to 100 megawatt without licensing.⁵⁵⁹⁰

On 23 May 2022, Minister of Environment, Forestry and Fisheries Barbara Creecy, announced the launch of the national waste management fleet, with an estimated worth of ZAR44.5 million (USD 2.87 million). The fleet, according to the Minister, consists of 22 vehicles including skip loader trucks, front end loaders, compactor trucks and other trucks required to transport waste within these areas. The vehicles will be active across 19 municipalities of the country.⁵⁵⁹¹

South Africa allocated funds for climate change adaptation and mitigation, while taking no policy actions, which could cause harm to the climate and environment.

Turkey: +1

Turkey has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 16 July 2021, the Green Reconciliation Action Plan prepared by the Ministry of Trade and approved with the Presidential Circular 2021/15 was published in the Official Gazette came into force.⁵⁵⁹² The Action Plan was projected as a roadmap aiming to support green transformation in relevant policy areas and ensure Turkey's compliance with the regulations and principles under the European Green Deal, in order to contribute to Turkey's transition to a more sustainable, resource-efficient and green economy, in a way that will preserve and carry forward the existing integration of Turkey within the scope of the EU Customs Union. The Action Plan covers such policy areas as limiting carbon emissions, green and circular economy, green financing, clean, economic and safe energy supply, sustainable agriculture, sustainable smart travels, combatting against climate change, establishing diplomacy principles and raising awareness regarding European Green Deal.⁵⁵⁹³

On 6 October 2021, Turkey “embraced the vision of green development evolution,” in the context of which “the production of renewable energy sources and low-emission and clean production techniques will be encouraged.”⁵⁵⁹⁴ On 7 October 2021 Turkey eventually ratified the Paris climate agreement having become the last G20 country to commit to contributing to the global efforts against climate change.⁵⁵⁹⁵ It was further reported that Turkey was expected to update its national climate action plan (Nationally Determined Contribution) with updated emissions reduction targets in the energy, waste, transportation, buildings and agriculture sectors and that Turkey committed to net-zero emissions target by 2053.⁵⁵⁹⁶

On 1 November 2021, Minister of Environment, Urbanization and Climate Change Murat Kurum speaking at the 26th United Nations Climate Change Conference in Glasgow, announced that USD3.157 billion (provided by the World Bank, the UN, the European Bank for Reconstruction and Development, Germany and France via Green Climate Fund) would be spent on green development in 3 years; these funds were to be channeled to “all sectors that support Green Development, especially in the fields of energy, agriculture, transportation, environment and urbanism.” It was also reiterated by Minister that Turkey would create a strategic plan regarding climate change in line with the country's 2053 net zero emissions target.⁵⁵⁹⁷

⁵⁵⁹⁷ The Minister Assessed Actions On Combating Climate Change, Turkey's Ministry of Environment, Urbanization and Climate Change (Ankara) 1 November 2021. Translation provided by Google Translate. Access Date: 31 March 2022. <https://csb.gov.tr/bakan-kurum-iklim-degisikligiyle-mucadele-calismalarini-degerlendirdi-bakanlik-faaliyetleri-32018>.

On 21 February 2022, Minister Kurum, speaking at Turkey’s inaugural climate council, informed that work on Turkey’s comprehensive climate law was ongoing and that this legislation would be prepared “as soon as possible,” as well as an updated long-term strategy, an action plan on climate and the nationally determined contribution; he also added that some TRY20 billion would be available to local governments for climate projects in 2022.⁵⁵⁹⁸

On 21–25 February 2022, the Climate Council which took place. The meeting was devoted to determining a roadmap in key climate-related areas, including greenhouse gas reduction, green finance, carbon pricing, adaptation to climate change, local governments, migration, just transition, social policies as well as science and technology. Summarizing its outcomes, Minister Kurum noted that the council would be “a source of reference for the protection of nature and will offer an important method to the business world,” “a roadmap for increasing renewable energy sources, ensuring energy efficiency and reducing fossil fuels,” and “a very important guide for the implementation of sustainable production and consumption systems and alternative emission reduction methods in the industry.”⁵⁵⁹⁹

On 9 March 2022, the government announced its intention to provide economic incentives to help energy consumers switch to renewable resources in line with the European Green Deal, to add on to the existing frameworks to incentivize energy producers to switch to renewables.⁵⁶⁰⁰

On 28 March 2022, the government announced that it is going to amend national climate change law, and update and release its Nationally Determined Contribution; these anticipated pieces of legislation would send a strong signal to international investors that Turkey is fully dedicated to playing its part in the global action against climate change, and would guide the investment decisions of the private sector in announcing which sectors and activities will be prioritized in Turkey’s climate change efforts.⁵⁶⁰¹

Turkey has adopted important policies to foster climate change mitigation and adaptation, while no evidence was found that Turkey had taken any actions that may cause harm to climate and environment.

Thus, Turkey receives a score of +1.

GBP200 million ‘to inform future approaches to improving resilience to flooding and coastal erosion in communities across the country,’ etc.⁵⁶¹⁰

On 2 March 2022, the government has announced the “Blue Belt programme,” which helps UK Overseas Territories to “enhance the protection and management of their precious marine environments.”⁵⁶¹¹ Commonwealth and Development Office will directly fund the Programme for GBP8 million.

On 8 March 2022, the Department for Environment, Food & Rural Affairs has awarded GBP4.5 million to “help futureproof trees and forests against impacts of pests, disease and climate change.”⁵⁶¹² This initiative includes planting 30,000 hectares of trees across the UK per year by 2025 to reinforce nature regeneration efforts, promote biodiversity and product amidst a changing climate.

On 16 March 2022, the government has announced “long-term environmental targets” to protect and enhance natural world. These targets include reducing nutrient pollution in rivers, improving water use efficiency, cleaning up air, halting the decline in wildlife population by 2030.⁵⁶¹³

On 29 July 2022, the UK and local partners in Kenya launched a tool that aims to identify energy secure pathways for energy demand and supply between 2015 and 2050.⁵⁶¹⁴

On 12 August 2022, the Environment Agency took action to protect wildlife and the environment while the North East is experiencing prolonged dry weather. Prolonged dry weather is a natural event which has become more likely with climate change. It occurs as a result of low rainfall for an extended period of time. Once prolonged dry weather is declared, actions are taken to minimise impacts on the environment.⁵⁶¹⁵

On 1 September 2022, the government launched climate change consultation for pension scheme. The consultation proposes more effective governance, strategy, risk management and targets for the assessment and management of climate related risks and opportunities for the Local Government Pension Scheme.⁵⁶¹⁶

The United Kingdom has adopted a policy document allocating funds for climate change adaptation and mitigation, and taken no policy actions, which may cause harm to the climate and environment.

Thus, the United Kingdom receives a score of +1.

Analysts: Elena Alekseeva and Nikita Shilikov

United States: +1

The United States has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 1 November 2021, President Joe Biden announced the Emergency Plan for Adaptation and Resilience (PREPARE) to support developing countries and communities in vulnerable situations around the world in their efforts to adapt to and manage the impacts of climate change. President Biden pledged to provide USD3 billion in adaptation finance annually for PREPARE by fiscal year 2024. It is the largest US. commitment ever made to reduce climate impacts on those most vulnerable to climate change worldwide.⁵⁶¹⁷

The United States has adopted a policy document allocating funds for climate change adaptation and mitigation, and taken no policy actions, which may cause harm to the climate and environment.

Thus, the US receives a score of +1.

Analyst: Andrey Shelepov

European Union: +1

The European Union has fully complied with the commitment to deliver national recovery and resilience plans and avoid harm to the climate and environment.

On 5 April 2022, the European Commission presented a proposal to update and modernise the Industrial Emissions Directive. The new rules will cover more relevant sources of emissions, make permitting more effective, reduce administrative costs, increase transparency, and give more support to breakthrough technologies and other innovative approaches. The main changes include more effective permits for installations (permitting will have to assess the feasibility of reaching the best performance); more help for EU innovation frontrunners; supporting industry's circular economy investments; synergies between depollution and decarbonization.⁵⁶¹⁸

On 5 April 2022, the European Commission proposed two new joint Regulations with the Parliament to more tightly control fluorinated greenhouse gases (F-gases) and ozone depleting substances (ODS). The F-gas proposal will also contribute to reducing emissions by at least 55 per cent by 2030 and making Europe climate-neutral by 2050. Both proposals together could bring about a total reduction in the EU's greenhouse gas emissions (GHG) of 490 Mt (CO equivalent) by 2050. Proposal for a new F-gas Regulation includes tightening the quota system for hydrofluorocarbons (HFC phase-down); facilitation for customs and surveillance authorities to control imports and exports, cracking down on trade of illegal F-gases and equipment; more comprehensive monitoring; ensuring compliance with the

⁵⁶¹⁸ Proposal for a Directive of the European Parliament and of the Council Amending Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control) and Council Directive 1999/31/EC of 26 April 1999 on the landfill of waste COM(2022) 156 final/3, European Commission (Brussels) 5 April 2022. Access Date: 13 June 2022. <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A52022PC0156R%2802%29&qid=1651130627889>

Montreal Protocol.⁵⁶¹⁹ Proposal for a new ODS Regulation includes higher ambition; streamlining; improved enforcement and monitoring.⁵⁶²⁰

On 28 April 2022, the European Commission announced the 100 EU cities that will participate in the EU Mission for 100 climate-neutral and smart cities by 2030, the so-called Cities Mission. The Cities Mission will receive €360 million of Horizon Europe funding covering the period 2022-23, to start the innovation paths towards climate neutrality by 2030. The Commission will invite the 100 selected cities to develop Climate City Contracts, which will include an overall plan for climate neutrality across all sectors such as energy, buildings, waste management and transport, together with related investment plans. This process will involve citizens, research organisations and the private sector.⁵⁶²¹

On 17 May 2022, the European Parliament agreed to increase the EU carbon sinks target for land use, land use change and forestry sector (LULUCF) which would de facto increase EU 2030 greenhouse gas reduction target to 57 per cent. The Parliament adopted the report to reduce greenhouse gas (GHG) emissions and improve natural carbon sinks in the LULUCF. The Parliament emphasizes that natural carbon sinks are fragile and volatile, and therefore should not be pooled with the measuring of emissions from the agricultural sector - contrary to the Commission's proposal. Instead, the Parliament wants support to voluntary carbon farming initiatives to deliver at least 50 million additional tonnes carbon dioxide equivalent of net removals by 2030. LULUCF is part of the "Fit for 55 in 2030 package," which is the EU's plan to reduce greenhouse gas emissions by at least 55 per cent by 2030 compared to 1990 levels in line with the European Climate Law.⁵⁶²²

On 7 June 2022, the European Commission announced the first 118 regions and local authorities that will participate in the EU Mission for Adaptation to Climate Change, which will support the European Green Deal and the EU Climate Adaptation Strategy. The Mission Adaptation will receive EUR370 million of Horizon Europe funding for the period 2021-23. The research and innovation actions will address rebuilding areas impacted by extreme weather events, restoring floodplains, vertical farming, prototype insurance approaches, or creating a 'perfectly adapted' city ready to withstand a storm or heatwave.⁵⁶²³

On 8 June 2022, the Modernisation Fund made EUR2.4 billion available to seven beneficiary countries to help modernise their energy systems, reduce greenhouse gas emissions in energy, industry and transport, and support them in meeting their 2030 climate and energy targets. The Modernization Fund is supporting 45 investment proposals in the areas of electricity generation from renewable sources,

⁵⁶¹⁹ Proposal for a Regulation of The European Parliament And of the Council on fluorinated greenhouse gases, amending Directive (EU) 2019/1937 and repealing Regulation (EU) No 517/2014 COM/2022/150 final, European Commission (Brussels) 5 April 2022. ⁵⁶²³ 118 regions and local authorities join the EU Mission for Adaptation to Climate Change, European Commission (Brussels) 7 June 2022. Access Date: 13 June 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_22_3527

modernisation of energy networks and energy efficiency in the energy sector, in industry, in buildings, as well as in transport, and the replacement of coal generation with lower carbon intensity fuel.⁵⁶²⁴

On 22 June 2022, the European Commission adopted a proposal of the Nature restoration law. The document provides pioneering proposals to restore damaged ecosystems and bring nature back across Europe, from agricultural land and seas to forests and urban environments. The Commission also proposes to reduce the use and risk of chemical pesticides by 50 per cent by 2030. The proposed legislation aims to repair 80 per cent of European habitats that are in poor condition, and to bring back nature to all ecosystems, from forest and agricultural land to marine, freshwater and urban ecosystems. Under this proposal for a Nature Restoration Law, legally binding targets for nature restoration in different ecosystems will apply to every Member State, complementing existing laws. The aim is to cover at least 20 per cent of the EU's land and sea areas by 2030 with nature restoration measures, and eventually extend these to all ecosystems in need of restoration by 2050.⁵⁶²⁵

On 24 June 2022, the European Commission and the High Representative of the European Union for Foreign Affairs and Security Policy unveiled the renewed EU agenda on International Ocean Governance (IOG), proposing actions for a secure, clean and sustainably managed ocean. The Communication identifies several key priorities: Halt and reverse the loss of marine biodiversity by concluding an ambitious UN High Seas Treaty (Biodiversity Beyond National Jurisdiction) as soon as possible and reaching the goal of 30 per cent of Marine Protected Areas by 2030; protect the seabed, prohibiting deep-sea mining, which destroys the seabed, and regulating, where necessary, the use of fishing gear that are most harmful to biodiversity; ensure sustainable fisheries; fight climate change for a healthy ocean, including through maritime transport measures on the EU and global level as well as decarbonising the fishing sector to reduce the dependency on fossil fuels; fight marine pollution; invest in the ocean – up to EUR1 billion in 2021-2027 for ocean and coastal biodiversity and climate, including for high seas, and EUR350 million a year on ocean research through Horizon Europe 2021-2027 programme etc.⁵⁶²⁶

On 13 September the European Parliament adopted the resolution on “A New EU Forest Strategy for 2030 – Sustainable Forest Management in Europe”. The adopted text stresses that forests are essential for providing both ecosystem services and jobs in the EU. Only dynamic sustainable active management of forests will allow for their resilience and successful adaptation the changing climate. At the same time, diversity of forests, climate conditions, ownership patterns and forms of governance around the EU require this management be developed nationally, regionally and locally, hand in hand with forest owners. In this regard, support programmes, voluntary payment for ecosystem services schemes and research funding should be made available especially for small-holders of forests.⁵⁶²⁷

On 24 September the President of the European Commission, Ursula von der Leyen, announced that the doubling of the Commission's funding to global biodiversity would result in EUR7 billion invested

⁵⁶²⁷ A New EU Forest Strategy for 2030 must be developed with forests owners, European Parliament (Strasbourg) 13 September 2022. Access Date: 3 October 2022. <https://www.europarl.europa.eu/news/en/press-room/20220909IPR40150/a-new-eu-forest-strategy-for-2030-must-be-developed-with-forests-owners>

to protect biodiversity around the world. The statement was made following discussions at the UN General Assembly.⁵⁶²⁸

The European Union have fully complied with its commitments of adoption and renewing of recovery plans, incorporating climate commitments and sustainable growth. The European Union provides support for climate projects through funding such programmes as LIFE, NextGenerationEU, Natura 2000 and establishing new programmes such as InvestEU. These initiatives also provide support to the climate change adaptation, biodiversity, sustainable land usage and forest protection.

Thus, the European Union receives a score of +1.
