Preface

Since the G20 leaders met at their first summit in 2008 in Washington, the G20 Research Group at the University of Toronto and the Center for International Institutions Research of the Russian Presidential Academy of National Economy and Public Administration (RANEPA), and formerly with the International Organizations Research Institute at the National Research University Higher School of Economics (HSE), in Moscow have produced reports on their progress in implementing the priority commitments made at each summit. These reports monitor each G20 member's efforts to implement a carefully chosen selection of the many commitments produced at each summit. The reports are offered to the general public and to policy makers, academics, civil society, the media and interested citizens around the world in an effort to make the work of the G20 more transparent, accessible and effective, and to provide scientific data to enable the meaningful analysis of the causes of compliance, including those that leaders can change to improve compliance and the impact of this important informal international institution. Previous reports are available at the G20 Information Centre at <http://www.g20.utoronto.ca/analysis>.

The G20 Research Group has been working with Marina Larionova's team at RANEPA and previously at HSE since initiating this G20 compliance research in 2009, after the Washington Summit in November 2008. The initial report, covering only one commitment made at that summit, tested the compliance methodology developed by the G8 Research Group and adapted it to the G20.

To make its assessments, the G20 Research Group relies on publicly available information, documentation and media reports. To ensure accuracy, comprehensiveness and integrity, we encourage comments from stakeholders. Indeed, scores can be recalibrated if new material becomes available. All feedback remains anonymous. Responsibility for the contents of this report lies exclusively with the authors and analysts of the G20 Research Group.

Introduction and Summary

The G20 2021 Rome Final Compliance Report is prepared by the G20 Research Group based at the University of Toronto and the Center for International Institutional Research of the Russian Presidential Academy of National Economy and Public Administration (RANEPA). The report analyzes compliance by G20 members with 21 priority commitments carefully selected from the total of 225 commitments made at the Rome Summit hosted by Italy on 30–31 October 2021. This final report covers relevant actions taken by the G20 members between 1 November 2021 to 14 October 2022.

Methodology and Scoring System

This report draws on the methodology developed by the G7 Research Group, which has been monitoring G7/8 compliance since 1996. The International Organisations Research Institute at the Higher School of Economics joined this multi-year project in 2005, followed by RANEPA. The use of this methodology builds cross-institutional and cross-member consistency and also allows compatibility with compliance assessments of other institutions.

The methodology uses a scale from -1 to $+1$, where $+1$ indicates full compliance with the stated commitment, -1 indicates a failure to comply or action taken that is directly opposite to the stated instruments or goal of the commitment, and 0 indicates partial compliance or work in progress, such as initiatives that have been launched but are not yet near completion and whose full results can therefore not be assessed. Each member assessed receives a score of -1 , 0 or $+1$ for each commitment. For convenience, the scores in the tables have been converted to percentages, where -1 equals 0 per cent and $+1$ equals 100 per cent.¹

A compliance score of -1 does not necessarily imply an unwillingness to comply on the part of G20 members. In some cases, policy actions can take multiple compliance cycles to implement and measure. As the G20 Research Group and RANEPA continue to monitor developments, progress made by members can be recorded in future compliance reports.

The Compliance Coding Manual that describes the methodology in detail is available on the G20 Information Centre website at <http://www.g20.utoronto.ca/analysis/index.html#method>.

Commitment Breakdown

The G20 made a total of 225 commitments at the Rome Summit.² These commitments, as identified by the G20 Research Group and RANEPA, are drawn from the official Rome Leaders' Declaration.

Selection of Commitments

For each compliance cycle (that is, the period between summits), the research team selects commitments that reflect the breadth of the G20 agenda and also reflect the priorities of the summit's host, while balancing the selection to allow for comparison with past and future summits, following the methodology developed by the G7 Research Group. The selection also replicates the breakdown of issue areas and the proportion of commitments in each one. Primary criteria for priority commitment selection are the comprehensiveness and relevance to the summit, the G20 and the world, as well as individual and collective pledges. Selected commitments must also meet secondary criteria of performance measurability and ability to comply to some degree within a year, as well as the tertiary criterion of significance as identified by scientific teams and relevant stakeholders in the host country.

¹ The formula to convert a score into a percentage is $P = 50 \times (S + 1)$, where P is the percentage and S is the score.

² A commitment is defined as a discrete, specific, publicly expressed, collectively agreed statement of intent; a promise by summit members that they will undertake future action to move toward, meet or adjust to an identified target. More details are contained in the Reference Manual for Summit Commitment and Compliance Coding).

For the 2021 G20 Rome Summit Final Compliance Report, 21 priority commitments were selected for assessment by the University of Toronto and the RANEPAs teams (see Table 1).

Final Compliance Scores

This assessment is based on relevant, publicly available information relating to actions taken from 1 November 2021 to 14 October 2022. The final compliance scores by commitment are contained in Table 2. Country rankings are listed in Table 3 and commitment rankings are listed in Table 4.

For the final compliance period, including all 21 commitments, G20 members achieved average compliance of +0.45 (73%).

Final Compliance by Member

For final compliance with the Rome Summit's priority commitments, the United Kingdom had the highest compliance at +0.90 (95%), followed by the European Union at +0.80 (90%), and Germany at +0.75 (88%). Indonesia, which hosts the 2022 summit, placed 17th for compliance alongside Turkey at +0.19 (60%). South Africa had the lowest compliance at 0 (50%), and Russia had the second lowest compliance at +0.14 (57%). The difference between the highest and lowest G20 member compliance scores is 0.90. All the scores by G20 members are listed in Table 3.

Final Compliance by Commitment

At +0.90 (95%), the development commitment on inclusive recovery and the macroeconomics commitment on inclusive growth had the highest final compliance. Next came three commitments with +0.85 (93%): the climate change commitment on national plans, the food and agriculture commitment on malnutrition, and the environment commitment on natural resources. These commitments were followed by the health commitment on One Health at +0.80 (90%). The energy commitment on unabated coal power had the lowest compliance at -0.35 (33%). All the scores by commitment are listed in Table 4.

Table 1: 2021 G20 Rome Summit Commitments Selected for Compliance Monitoring

1	Macroeconomics: Inclusive Growth	We reiterate our commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.
2	Macroeconomics: Local Currency Capital Markets	[We reiterate our commitment to strengthening long-term financial resilience and supporting inclusive growth, including through]...developing local currency capital markets.
3	Trade: Fair Competition	We underscore the importance of fair competition and] we will continue to work to ensure a level playing field to foster a favourable trade and investment environment.
4	Digital Economy: Challenges	We will continue to work on addressing challenges such as those related to privacy, data protection, security and intellectual property rights, in accordance with the relevant applicable legal frameworks.
5	Digital Economy: Artificial Intelligence	Well aware of the benefits stemming from the responsible use and development of trustworthy human-centered Artificial Intelligence (AI), we will advance the implementation of the G20 AI Principles, while considering the specific needs of MSMEs and start-ups to encourage competition and innovation.
6	International Taxation: BEPS	We call on the OECD/G20 Inclusive Framework on BEPS to swiftly develop the model rules and multilateral instruments as agreed in the Detailed Implementation Plan, with a view to ensure that the new rules will come into effect at global level in 2023.
7	Crime and Corruption: FATF	We will also provide competent authorities with adequate, accurate and up-to-date information by adopting legally appropriate measures to improve international and domestic beneficial ownership transparency of legal persons and arrangements and real estate, especially trans-national flows, in line with the Financial Action Task Force recommendations.
8	Labour and Employment: Social Inclusion	[we will]...strive to adapt our regulatory frameworks to new forms of work, ensuring that these are fair and inclusive, leaving no one behind, while paying special attention to addressing the digital gender divide and intergenerational inequalities.
9	Infrastructure: Public- Private Partnerships	In line with the G20 Roadmap for Infrastructure as an Asset Class, and building on the G20 Infrastructure Investors Dialogue, we will continue, in a flexible manner, to develop further the collaboration between the public and private investors to mobilise private capital.
10	Gender: SDGs	[we reaffirm our commitment to...support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of]...women empowerment.
11	Development: Inclusive Recovery	[we reaffirm our commitment to]...support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of nationally owned strategies.
12	Food and Agriculture: Malnutrition	We will foster sustainable and resilient food systems and agriculture innovation, which are vital to end hunger and malnutrition, eradicate poverty and ensure sustainability, also by increasing access to finance through responsible investment.

13	Health: Vaccines	To help advance toward the global goals of vaccinating at least 40 percent of the population in all countries by the end of 2021 and 70 percent by mid-2022, as recommended by the World Health Organization (WHO)'s global vaccination strategy, we will take steps to help boost the supply of vaccines and essential medical products and inputs in developing countries and remove relevant supply and financing constraints.
14	Health: One Health	We will integrate the implementation of a One Health approach in relevant policies and decision-making processes.
15	Health: Personal Health Data	We will pursue our efforts to enhance innovation in digital and other health-related technologies, taking into account the need to protect personal health data.
16	Energy: Unabated Coal Power	We will put an end to the provision of international public finance for new unabated coal power generation abroad by the end of 2021.
17	Environment: Land Degradation	Acknowledging the urgency of combating land degradation and creating new carbon sinks, we share the aspirational goal to collectively plant 1 trillion trees, focusing on the most degraded ecosystems in the planet.
18	Environment: Natural Resources	We will pursue our efforts to ensure the conservation, protection and sustainable use of natural resources.
19	Climate Change: Paris Agreement	In this endeavour, informed by the IPCC assessments, we will accelerate our actions across mitigation, adaptation and finance, acknowledging the key relevance of achieving global net zero greenhouse gas emissions or carbon neutrality by or around mid-century and the need to strengthen global efforts required to reach the goals of the Paris Agreement.
20	Climate Change: Developing Countries	We recall and reaffirm the commitment made by developed countries, to the goal of mobilizing jointly USD 100 billion per year by 2020 and annually through 2025 to address the needs of developing countries, in the context of meaningful mitigation actions and transparency on implementation and stress the importance of meeting that goal fully as soon as possible.
21	Climate Change: National Plans	We will deliver national recovery and resilience plans that allocate, according to national circumstances, an ambitious share of the financial resources to mitigating and adapting to climate change and avoid harm to the climate and environment.

Conclusions

Many of the commitments assessed in this report have timelines that extend beyond the next summit or reflect medium- and long-term priorities. A unique feature of this report is the incorporation of deadlines for commitments monitored over multiple compliance cycles. The convergence of medium- and long-term commitments and those with deadlines in the near future reflects the nature of G20 decisions as a crisis management forum and a global governance steering institution. It also illustrates the multifaceted nature of compliance assessment. As the relationship among short, medium, and long-term commitments becomes clearer, the compliance landscape for many of these priority commitments may change over the course of future compliance periods.

Future Research and Reports

The information contained in this report provides G20 members and other stakeholders with an indication of their compliance in period immediately following the Riyadh Summit. This report has been produced as an invitation for others to provide additional or more complete information on compliance during the period under study. Feedback should be sent to g20@utoronto.ca.

Considerations and Limitations

Several elements affect the findings contained in this report. While the purpose of the report is to monitor compliance with G20 commitments, it is necessary to ensure that the monitoring mechanism is realistic and considers the context within which the commitments are made. With new commitments, more attention must be paid to the initial implementation constraints faced by members. One way to accommodate these constraints is to regard the intent to implement policy measures as an illustration of compliance or being “on track” towards compliance. This initial leeway should only be granted for new commitments; intent is not a suitable indicator of compliance for medium-term or longstanding commitments. Over time as commitments become integrated in the G20 compliance mechanism, compliance guidelines should become more stringent (as members become more accustomed to the nature of the issue and the requirements for compliance).

See also Appendix: General Considerations.

Appendix: General Considerations

In evaluating the results of this report, the following considerations should be kept in mind.

Assessments contained in this report apply to commitment-related actions taken by G20 members only since the commitments were declared publicly at the last summit.

Compliance has been assessed against a selected set of priority commitments, rather than all commitments contained in the summit documents. The selection is intended to produce a representative subset of the total body of commitments. An ideal set of priority commitments represents proportionally the amount of attention paid to each policy area in summit documents, reflects the relative ambition of summit commitments, and holds as many G20 members to account for compliance as possible.

In addition to producing commitments, summits provide value by establishing new principles and norms, creating and highlighting issues and issue areas and altering the traditional discourse used to discuss priorities. Some of the most important decisions reached at summits may be done in private and not encoded in the public record of the summit documents.

Some commitments cover several years and thus compliance takes longer than the summit-to-summit timeframe applied in this report. For this reason, full compliance (denoted by a +1 score) might not require that G20 members carry out a given commitment completely, but might instead demand clear, visible progress commensurate with the overall timetable as well as public statements of support of commitment objectives.

In some cases, a G20 member might choose not to comply with a particular summit commitment for good reason, for example if global conditions have changed dramatically since the commitment was made or if new knowledge has become available about how a particular problem can best be solved.

As each G20 member has its own constitutional, legal and institutional processes for undertaking action at the national level (and in the case of the European Union at the supranational level), each member is free to act according to its own legislative schedule. Of particular importance here is the annual schedule for creating budgets, seeking legislative approval and appropriating funds.

Commitments in G20 summit documents might also be included, in whole or in part, in documents released by other international forums, as the decisions of other international organizations or even national statements such as the State of the Union Address in the US, the Queen's Speech in the UK and the Speech from the Throne in Canada. Merely repeating a G20 commitment in another forum does not count fully as compliant behaviour.

This report assesses G20 members' action in accordance with the text of actual, specific commitments made in G20 summit documents. Because commitments demand that policymakers and regulators act specifically to meet the identified objectives, this report holds policymakers accountable for pushing and passing recommended policies. Furthermore, compliance is assessed against the precise, particular commitment, rather than what might be regarded as a necessary or appropriate action to solve the problem being addressed.

As individual members can often take different actions to comply with the same commitment, no standardized cross-national evaluative criterion produced by external parties can be universally applied. The interpretive guidelines attempt to provide a clear, consistent, equitable method for assessing compliance.

Because the evaluative scale used in this compliance report runs from -1 to +1, any score in the positive range represents at least some degree of compliance.

1. Macroeconomics: Inclusive Growth

“We reiterate our commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.”

Background

The 2021 G20 Leaders’ Declaration highlights the importance of promoting “transitions towards green, more prosperous and inclusive economies.”³ G20 leaders also emphasized sustainable finance and its role in ensuring “just transitions” towards “more sustainable economies and inclusive societies.”⁴ They also affirmed the important role of “open, fair, equitable, sustainable, non-discriminatory and inclusive rules-based multilateral trade” systems to restore growth, improve industrial productivity and promote sustainable capital flows.⁵ Additionally, G20 leaders reiterated their commitment to develop “local currency capital markets” and their intent to maintain a “strong and effective Global Financial Safety Net” to “strengthen long-term financial resilience.”⁶

At the 2008 Washington Summit, G20 leaders noted that “inconsistent and insufficiently coordinated macroeconomic policies” that led to “unsustainable global macroeconomic outcomes” acted as one of

the root causes of the 2007-2008 Financial Crisis.⁷ As a result, G20 leaders recognized that a “broader policy response” based on “closer macroeconomic cooperation” is necessary to “support emerging market economies and developing countries” and general financial resilience and stability.⁸

At the 2009 London Summit, G20 leaders agreed to establish a new “Financial Stability Board” that collaborates with the International Monetary Fund to “provide early warning of macroeconomic and financial risks,” as well as the actions required to address them in an appropriate manner.⁹

At the 2010 Toronto Summit, G20 leaders committed to laying the foundation for “strong, sustainable and balanced growth” and safeguarding “financial systems against risks” to contribute to “our collective well-being.”¹⁰

At the 2010 Seoul Summit, G20 leaders committed to “moving toward more market-determined exchange rate systems” and “refraining from competitive devaluation of currencies” to avoid the risk of excessive market volatility harming emerging countries.¹¹

At the 2011 Cannes Summit, G20 leaders agreed on managing capital flows in such a way as to “reap the benefits from financial globalization” and preventing any risks that may jeopardize financial stability and sustainable growth on a national and global scale.¹²

At the 2012 Los Cabos Summit, G20 leaders committed to assist developing countries in promoting development by encouraging sustainable “inclusive green growth” strategies and policies.¹³

At the 2014 Brisbane Summit, G20 leaders “set an ambitious goal” to increase the G20’s GDP “by at least two per cent by 2018” by implementing ‘growth-appropriate’ macroeconomic policies to ensure inclusive growth and to “help reduce inequality and poverty.”¹⁴

At the 2016 Hangzhou Summit, G20 leaders, with the 2030 Agenda for Sustainable Development in mind, committed to fostering “an innovative, invigorated, interconnected and inclusive world economy” to welcome a “new era of global growth.”¹⁵

At the 2017 Hamburg Summit, G20 leaders underlined the importance of the “rules-based international trading system” and its role in promoting “open, transparent, inclusive and WTO-consistent” multilateral trade agreements.¹⁶

At the 2020 Riyadh Summit, G20 leaders committed to “leading the world in shaping a strong, sustainable, balanced and inclusive post COVID-19 era” through the G20 Action Plan by promoting, among other things, the “sustainable integration of developing and least developed countries into the trading system.”¹⁷

Commitment Features

At the 2021 Rome Summit, leaders affirmed the need to promote greater “Recovery from the COVID-19 Crisis” as part of their focus on “Ensuring a Sustainable and Inclusive Growth.”¹⁸ Thus, G20 leaders made the following commitment: “We reiterate our commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.” This commitment has two main components: strengthening long-term financial resilience and supporting inclusive growth. Promoting sustainable capital flows is an additional point of consideration for both the main components.

“Reiterate” is understood to “refer to commitments that have been established in the past. It should not be considered a new initiative; however, new efforts in the area should be made.”¹⁹

“Strengthening” refers to process of “making (someone or something) stronger, more forceful, and more effective.”²⁰

“Long-term” is understood to mean “any commitment with a delivery date of over five years.”²¹ “Medium term is from the summit cycle until five years.”

“Financial resilience” with reference to the COVID-19 pandemic refers to “a range of economic and financial factors, including temporary fiscal and regulatory measures to relieve consumers and businesses in financial difficulty, sound money management and planning.”²²

“Inclusive growth” is defined by the OECD as “economic growth that is distributed fairly across society and creates opportunities for all.”²³ This interpretation is further strengthened by the United Nations Development Programme, which views inclusive growth as “consisting of both participation and benefit-sharing, where everyone can participate in the growth process and can equally share [its]

²³ What is Inclusive Growth, Organisation for Economic Co-operation and Development (Paris) 6-7 May 2014. Access Date: 4 December 2021. <https://www.oecd.org/inclusive-growth/>

benefits.”²⁴ To provide further perspective, the World Bank denotes it as “both the pace and pattern of economic growth, which are interlinked and assessed together. Rapid pace of economic growth is necessary for reducing absolute poverty. But, for this growth to be sustainable in the long run, it should be broad-based across sectors, and inclusive of the large part of a country’s labour force.”

“Promoting” signifies “support or renewal old efforts or creation new efforts in the area. It should not have to be a brand-new initiative. To contribute to growth or prosperity of, to help bring into being.”²⁵

“Sustainable” can be understood to mean the same as sustainable global growth which in turn refers to “the pursuit of sustainable development where the pattern of resource use aims to meet human needs while preserving the environment; where this pursuit expands from domestic policy to the broader scope of international cooperation.”²⁶

“Capital Flows” are defined to be “an integral component of international finance. They allow for savings to be channelled from surplus countries to deficit countries, where returns to investment are typically higher. However, these flows can also pose important challenges to open economies.”²⁷

The first component shares similar ideas to prior summits, with the declaration referring to taking actions to address inclusive growth both on the domestic and international levels. On the domestic front, members can offer increased opportunities for youth, women, SMEs and take actions to invest in education and vocational training and reskilling of the population. Also, measures can be taken to alleviate poverty levels. On the international level, this may be advocating for fairer international systems that ensure developing countries have equal opportunities to advance and grow their economies, offering international assistance, and finally by bolstering international institutions that promote inclusive growth.

The second component requires proficient use of government and fiscal tools to promote more financially resilient domestic and international economies. These objectives can be translated into measures through efficient risk assessment and monitoring of financial cycles, fortification of domestic banks and prudent use of monetary and fiscal policies to mitigate risks of economic downturn. International measures could include, but are not limited to, supporting foreign economies, further empowering the World Bank and the IMF, and encouraging building of financial resilience.

The additional consideration of this commitment involves free movement of capital or the reduction in barriers to international capital flow. Promoting sustainable capital flows is a mechanism through which the two components of the commitment can be acted on. Furthermore, the inclusion of promoting sustainable capital flows should be given more weight than other mechanisms through which the two components of the commitment can be acted on.

To achieve a full compliance score, the G20 member must takes strong action in both areas of the commitment, while taking into consideration promoting sustainable capital flows. Partial compliance would be taking strong action in one of the components, but not the other or taking action in both

²⁷ Capital flows and the OECD Code of Liberalisation of Capital Movements, OECD (Paris). Date Accessed: 4 December 2021. <https://www.oecd.org/investment/investment-policy/capitalflowsandtheoecdcodeofliberalisationofcapitalmovements.htm>

components without promoting sustainable capital flows. If a G20 member address one of the components of the commitment while promoting sustainable capital flows, it would still be considered partial compliance. Anything less than this counts as a –1 for non-compliance.

Examples of partial action may include verbal reaffirmations, attendance at meetings or inclusion in institutions but no evidence of active participation in said meetings. Strong action for full compliance can include promotion of programs, ratification of an international treaty relating to the commitment, allocation of money or personnel to international bodies or to a foreign economy, changes in regulation and legislation, information sharing or the sponsoring of international policy actions that address relevant areas of reform, etc.

Scoring Guidelines

–1	The G20 member has not taken action to strengthen long-term financial resilience or support inclusive growth.
0	The G20 member has taken action to either strengthen long-term financial resilience OR support inclusive growth, with or without promoting sustainable capital flows.
+1	The G20 member has taken strong action to strengthen long-term financial resilience AND support inclusive growth, including through promoting sustainable capital flows.

Argentina has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 1 December 2021, Minister of Productive Development Matías Kulfas and Naranja X announced a line of microcredits to “improve the conditions for access to credit for [Micro, Small, and Medium Enterprises] (MSMEs) and individuals carrying out productive enterprises.”²⁸ The National Fund for Productive Development (FONDEP) will allocate a total of ARS1 billion to this line of productive investment.

On 2 December 2021, President Alberto Fernández announced the creation of a “Productive Plan 2030” that aims to “strengthen the productive sectors, industries, exports and generate employment.”²⁹

On 20 December 2021, the government allocated ARS180,205 million to “protect the most vulnerable sectors and to alleviate the effects of the pandemic on employment and production.”³⁰ This initiative also aims to promote the recovery of an inclusive economy.

On 17 January 2022, the Economic and Social Council (CES) announced which initiatives it selected to receive funding for development through the “Call for Innovative Projects for the Education and

Work of the Future.”³¹ The CES will open access to approximately ARS150.7 million for 20 projects with the “aim of reducing the digital divide, developing technological skills to improve employability opportunities for vulnerable sectors, laying the foundations for job training in technology, [training teachers in computer science] and building a system to monitor technological change.”³²

On 1 February 2022, the National Bank of Argentina opened a new line of financing for livestock producers and the meat industry, offering credits with a maximum ceiling of ARS250 million, a seven per cent subsidized rate by the FONDEP and terms of up to 60 months.³³ The loans are for investments, working capital and development expenses to “finance the increase in production, promote exports and industrial capacity in meat, milk and its by-products.”

On 9 March 2022, the Ministry of Productive Development launched the 2022 call for proposals for the National Supplier Development Program.³⁴ This program will allocate ARS3.135 billion to support companies with projects to “improve their export capacity, develop new products and processes, and boost the creation of quality jobs in strategic industries.”

On 15 March 2022, the Ministry of Productive Development launched a new call for the Knowledge Economy Nodes Programme, which allocates ARS1 billion to promote investments in “clusters, poles and technology parks” in all provinces of the country.³⁵ The new program establishes that “Non-Refundable Contributions” of up to ARS40 million will be available to promote the development of products and services, equipment for transfer and technical assistance and training.

On 29 March 2022, Minister Kulfas presented the “Productive Argentina 2030” plan, which provides a roadmap to create more than two million salaried jobs in the private sector, lift nine million Argentines out of poverty and create over 100,000 new companies.³⁶ The plan also outlines that 70 per cent of the new jobs will be outside the metropolitan area and that it will have at least 50 per cent female participation.

On 8 April 2022, Minister Kulfas and the CEO of Ualá Pierpaolo Barbieri agreed to allocate ARS1 billion from the FONDEP to strengthen the inclusion of “microcredits” from Ualá for productive

investments and increase access to financing, particularly for small businesses.³⁷ The minister reaffirmed his commitment to ensure that the smallest companies have quick access to financing at lower costs.

On 13 April 2022, Minister Kulfas and Governor of San Juan Sergio Uñac announced “financing tools” totalling ARS3.5 billion to promote the growth of imports and exports for small and medium sized enterprises (SMEs) in San Juan province.³⁸ The aim of this investment is to create jobs, lower the unemployment rate and improve living conditions in the province.

On 18 April 2022, Minister Kulfas met with Ecuador’s Minister of Production, Foreign Trade, Investments and Fisheries Julio José Prado Lucio-Paredes to discuss issues concerning bilateral economic cooperation.³⁹ They reaffirmed their commitments to promote suppliers in the mining, oil and gas sector and acknowledged the existing opportunities for growth and diversification in “value-added sectors.”

On 26 April 2022, Minister Kulfas launched Capital Goods 4.0, a regime that promotes the improvement of processes, exporting capabilities and research for companies in the metallurgical industry.⁴⁰ The minister also announced ARS118 million in financial assistance from the Central American Bank for Economic Integration for the development of new technological capabilities.

On 11 May 2022, Minister Kulfas and Secretary of Small and Medium Enterprises and Entrepreneurs Guillermo Merediz announced two new lines of financing totalling ARS70 billion to promote imports and exports for small and medium-sized enterprises.⁴¹ The minister expressed that this financing would help develop a “model of sustainable economic growth” and contribute to “macroeconomic sustainability.”

On 24 May 2022, the Ministry of Productive Development launched the call for applications for the PAC Entrepreneurs 2022 programme, which will allocate a total of ARS500 million to finance entrepreneurship that innovates in products and services, possesses a scientific and technological base,

and that has impact.⁴² This initiative aims to strength value chains and foster inclusive growth in the country.

On 8 June 2022, representatives of Argentina and Ecuador from both public and private sector met to discuss opportunities for joint growth.⁴³ The concerned sectors included the automotive industry, the food industry, and the energy sector. The purpose of the meeting was to modernize the context of the Economic Complementation Agreement No. 59 (ACE59 – MERCOSUR/Andean Community) which allows for trade expansion.

On 16 June 2022, Minister of Education Jaime Perczyk, met with Minister of Productive Development Daniel Scioli to talk about vocational training.⁴⁴ The two stressed on the importance of training programs to equip the youth with skillsets suitable to the workplace. Sciolo said that the two ministries must work together to allow SMEs to absorb new workers.

On 16 June 2022, the Ministry of Economy expressed that the government’s economic policy aims to promote sustainable growth through employment generation and reducing inflation.⁴⁵ They state that “a necessary condition for this is that fiscal and monetary policy are aligned with the objective of strengthening the accumulation of international reserves.”

On 16 July 2022, Minister Scioli stated that the country seeks to balance the accounts through greater expansion, the strengthening of industry, the growth of the economy and the creation of employment.⁴⁶

On 7 September 2022, Minister of Economy Sergio Massa met with the Managing Director of World Bank Operations Axel van Trotsenburg to discuss the macroeconomic situation in Argentina.⁴⁷ They agreed that they will “continue working to expand financing for the country’s inclusive development” in water and sanitation, social protection, health, transportation and education projects.

On 7 September 2022, Minister Massa met with the President of Inter-American Development Bank Mauricio Claver-Carone to discuss Argentina's loan portfolio.⁴⁸ They reached an agreement for a loan of USD700 million to finance the "Program to Support the Improvement of Fiscal Management and economic recovery" in Argentina that will allow the country to launch key programs in "infrastructure, health, water and tourism."

On 2 November 2022, during the second plenary session of Federal Council on Foreign Relations and International Trade, the Vice-Chancellor Pablo Tettamanti reaffirmed Argentina's commitment to promoting foreign trade, investment, infrastructure, bi-oceanic corridors, and the domestic economy's potential.⁴⁹

On 2 November 2022, Minister of Education Jaime Perczyk announced in the municipality of Almirante Brown that all high school students in rural Argentina will receive a personal notebook to improve their education and vocational training.⁵⁰

Argentina has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. The country implemented measures to promote inclusive recovery from the COVID-19 pandemic and improved capital flows for the financing of SMEs to strengthen long-term financial resilience.

Thus, Argentina receives a score of +1.

trade. This action supports inclusive growth by creating access to sustainable capital flows while encouraging trade between the two countries.

On 23 December 2021, Minister for Trade, Tourism and Investment Dan Tehan announced funding of AUD80 million to Australian exporters through the “Export Market Development Grants” program.⁵³ This will support exporters role in creating jobs and boosting Australia’s economic recovery.

On 17 March 2022, Australia and the United Arab Emirates announced the pursuit of a “Comprehensive Economic Partnership Agreement” that aims to create new jobs and grow the trade relationship between the two countries.⁵⁴ This trade deal will become the first for Australia in the Middle East. Minister Tehan states that the bilateral free trade agreement has the potential to “strengthen and deepen the dynamic relationship” between Australia and the United Arab Emirates.

On 1 April 2022, the government launched the “Digital Trade Strategy.”⁵⁵ This strategy aims to cut red tape, improve access to rules-based markets and support new trade opportunities in the digital environment.

On 2 April 2022, Australia and India signed the “Australia-India Economic Cooperation and Trade Agreement.”⁵⁶ This agreement aims to strengthen the relationship between the two countries, creating opportunities for workers and businesses and making Australian exports to India cheaper. It will eliminate tariffs on 85 per cent of Australian goods exports to India.

On 5 April 2022, the fifth meeting of the Korea-Australia Free Trade Agreement commenced.⁵⁷ The two countries welcomed increased dialogue and cooperation on regional trade rules, digital trade, green economy and supply chains.

On 8 April 2022, the government announced an AUD2.5 million contribution through the World Food Programme and the Food and Agriculture Organization to “boost food security” in Sri Lanka.⁵⁸ The contribution also aims to strengthen productivity for smallholder farmers in the country.

On 23 May 2022, Australia, among others, announced the launch of the “Indo-Pacific Economic Framework for Prosperity.”⁵⁹ The aim of the framework is to promote inclusive economic growth and advance financial resilience, sustainability and fairness.

Brazil: +1

Brazil has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 17 November 2021, the Executive Management Committee of the Chamber of Foreign Trade of the Ministry of Economy made the decision to reduce the import tax rates on products related to energy production.⁶⁶ The measures have the aim of promoting the diversification of the “Brazilian energy matrix from cleaner sources,” in addition to reducing the cost of energy production and commercialization in the country.

On 4 February 2022, the Ministry of Economy’s Special Secretariat for Productivity and Competitiveness launched the “Integrated Long-Term Infrastructure Plan,” which gathers estimates of investment needs in “various infrastructure sectors” to eliminate service shortages and to ensure “faster economic growth over the next 30 years.”⁶⁷

On 11 February 2022, Minister Paulo Guedes and the Secretary General of the Organization for Economic Cooperation and Development (OECD) Mathias Cormann thanked the support received to boost the start of Brazil’s process of “accession.”⁶⁸ Minister Guedes stressed the engagement of the Ministry of Economy with the formal process of accession to the OECD and the alignment of the country with the values of the organization.

On 31 March 2022, Minister Guedes reinforced Brazil’s commitment to sustainable development during a meeting with Spain’s Minister of Economy Nadia Calviño.⁶⁹ He also reinforced the country’s commitment to attracting foreign investments through the reform agenda, which plays a role in simplifying the participation of the private sector and increasing transparency.

On 25 April 2022, the Ministry of Economy launched the Brazil Entrepreneur Credit Programme, which aims to increase access to credit for entrepreneurs in the country.⁷⁰ The program includes the Provisional Credit Measure, which opens up RBL23 billion in financing. The Secretary for Productivity and Competitiveness Daniella Marques expressed that Brazil is “democratizing” access to credit for micro and small enterprises under conditions that were previously only available to larger companies.

Canada and ASEAN.⁸² The ministers highlighted the potential to reinforce rules-based trade, to diversify supply chains and to increase foreign investment.

On 21 January 2022, Minister Ng expressed support for a rules-based multilateral trade system.⁸³ She reiterated Canada's commitment to advancing reform of the World Trade Organization (WTO) and briefly touched on the need to alleviate trade restrictions on World Food Programme purchases. She proposes reform that ensures global economic recovery guided by rules-based trade.

On 24 March 2022, Minister Ng and the United Kingdom's Secretary of State for International Trade Anne-Marie Trevelyan agreed to hold discussions for a bilateral free trade agreement.⁸⁴ The ministers emphasized the need for a comprehensive free trade agreement that is inclusive, environmentally ambitious, sustainable and beneficial to "women, racialized communities, Indigenous peoples and other traditionally underrepresented groups."

On 24 March 2022, Prime Minister Justin Trudeau met with the Prime Minister of Japan Kishida Fumio where they discussed furthering collaboration to address issues of food security and rising energy costs.⁸⁵ They also reaffirmed their partnership towards creating a free and open Indo-Pacific.

On 11 April 2022, Minister of Employment, Workforce Development and Disability Inclusion Carla Qualtrough declared that Budget 2022 includes investment in the "green transition" for Canada's economy.⁸⁶ Minister Qualtrough outlined this investment will focus on "zero-emission vehicles and their supporting technology and infrastructure." The Minister emphasized that this investment will facilitate sustainable and long-term economic growth and will increase the affordability of zero-emission vehicles and their supporting technology and infrastructure.

On 10 May 2022, Prime Minister Trudeau spoke with German Chancellor Olaf Scholz.⁸⁷ The leaders talked about deepening their bilateral relations and progress in regard to cooperation on critical mineral and energy supply chains.

On 26 May 2022, Prime Minister Trudeau spoke with the President of the United Arab Emirates Sheikh Mohamed bin Zayed Al Nahyan to emphasize their commitment to deepen strategic partnership between Canada and the United Arab Emirates.⁸⁸

On 6 June 2022, Prime Minister Trudeau and Chilean President Gabriel Boric released a joint statement recognizing the importance of economic growth and the need for sustainable and inclusive trade.⁸⁹ The statement included talk of increasing access and opportunities for SMEs and women led businesses so they can benefit from international trade systems.

On 10 June 2022, Prime Minister Trudeau met with the Speaker of the United States House of Representatives Nancy Pelosi and other US congressional members.⁹⁰ They reiterated the importance of the bilateral relationship between the US and Canada. During the discussions, supply chain issues and critical mineral supply was considered. They also exchanged ideas on bilateral trade issues such as electric vehicle tax credits and dairy tariff-rate quotas.

On 10 June 2022, Prime Minister Trudeau met with the Prime Minister of Jamaica Andrew Holness. The two discussed shared concerns including fostering inclusive economies.⁹¹ They reiterated their desire to uphold and strengthen bilateral ties in trade, labor mobility and security and defence.

On 10 June 2022, Prime Minister Trudeau met with the President of the Dominican Republic Luis Abinader.⁹² They recognized the need for establishing greater ties between Canada and the Dominican Republic including creating a “predictable and transparent regulatory environment in order to build strong, resilient, and inclusive economies.” Furthermore, the two leaders discussed support measures to restore stability in Haiti.

On 17 June 2022, Minister Ng attended the Twelfth WTO Ministerial Conference.⁹³ At the conference Canada affirmed to resolve the impasse with the WTO appellate body and reiterated that global economy recovery must be sustainable and inclusive. Minister Ng welcomed Colombia and Peru to the Global Trade and Gender Arrangement (GTAGA). She joined ministers from Chile, Mexico and New Zealand to issue a joint statement, which called on WTO members to work in unison to make global trade policies more inclusive so that the benefits of trade and investment are more equitably shared.

On 1 January 2022, the China-Cambodia Free Trade Agreement came into effect.¹⁰⁵ The agreement ensures the strengthening of both China and Cambodia's cooperation in trade, investment, the Belt and Road Initiative, e-commerce, economic technology and more, therefore promoting inclusive growth by means of financial resilience for both states.

On 7 April 2022, the Protocol on Upgrading the Free Trade Agreement between China and New Zealand came into effect.¹⁰⁶ The Upgrade Protocol further expands the market access for goods and services and investments, and further improves trade facilitation by means of e-commerce and competition policy, which better meets the needs of "modern" economic development. The Upgrade Protocol would therefore encourage inclusive growth by promoting long-term financial resilience for the two countries.

On 26 April to 28 April 2022, China and Belarus held the fourth round of negotiations on the "Agreement on Investment and Trade in Services."¹⁰⁷ They exchanged in-depth views on the subjects of investment, specific trade services and e-commerce and discussed work plans for the future. The negotiations surrounding this trade agreement facilitates opportunity for inclusive growth through ensuring mutually beneficial trade regulations.

On 18 May 2022, Deputy Secretary General of the National Development and Reform Commission Su Wei held a virtual meeting with Germany's State Secretary of the Federal Foreign Office and the Special Envoy for International Climate Action Jennifer Morgan.¹⁰⁸ They agreed to deepen cooperation between Germany and China while promoting low-carbon and sustainable development. This agreement would encourage inclusive growth by means of committing to the cause of environmentally sustainable development on an international scale.

On 23 May 2022, the Ministry of Commerce and the United Nations Resident Coordinator's Office in China convened the inaugural meeting of the "Joint Steering Committee of the UN Sustainable Development Cooperation Framework for China."¹⁰⁹ Upon effective implementation of the Framework, areas such as rural revitalization, digital economy, climate change, public health and environmental protection would improve in lieu of the 2030 Sustainable Development Agenda. This would facilitate inclusive growth through promoting the social and environmental sustainability of capital flows.

On 27 May 2022, the General Office of the State Council issued the "Opinions on Promoting the Stability and Quality Improvement of Foreign Trade."¹¹⁰ The document proposes 13 policy measures that seek to achieve the task of stabilizing and improving the quality of imports and exports and

stabilizing both the industrial and supply chains. The implementation of the proposed measures would promote inclusive growth through financial resilience by means of improving the quality of foreign trade.

On 12 June 2022, Minister of Commerce Wang Wentao delivered an address at the 12th World Trade Organisation (WTO) Ministerial Conference.¹¹¹ Minister Wentao called for securing the multilateral trading system at the heart of the WTO. Additionally, he promoted the WTO reform to make globalization more inclusive, balanced and beneficial. Further, Minister Wentao said that China is working on opening its markets to a greater degree.

On 17 June 2022, President Xi Jinping addressed the plenary session of the 25th St. Petersburg International Economic Forum.¹¹² He emphasized the need for multilateralism, economic globalization and building development partnerships to make global development more “balanced, coordinated and inclusive.”

On 12 July 2022, Minister of Commerce Wentao and Nicaragua’s Foreign Minister Denis Moncada signed the “Early Harvest Arrangement for the Free Trade Agreement,” effectively announcing the beginning of free trade agreement negotiations between the two countries.¹¹³ Additionally, Minister Wentao and adviser to Nicaragua’s president Laureano Ortega Murillo signed the “Memorandum of Understanding on the Establishment of a Mixed Commission on Economic, Trade and Investment Cooperation.” The resumption of diplomatic relations between China and Nicaragua enables the possibility for encouraging inclusive growth through economic stability.

On 13 July 2022, the chief negotiators of the Ministry of Commerce and Korea’s Ministry of Trade, Industry and Energy met to discuss the second phase of free trade agreement negotiations.¹¹⁴ The two countries successfully consulted on cross-border trade in services, investment and financial services, issues on rules and the market access negative list. Actively promoting negotiations on a free trade agreement and achieving substantive outcomes at an early date will enhance the level of openness and cooperation in bilateral service trade and investment, therefore encouraging inclusive growth by promoting long-term financial resilience for the two countries.

On 22 July 2022, the State Council’s Customs Tariff Commission granted a “zero tariff treatment” to 98 per cent of tax items imported from 16 “least developed countries.”¹¹⁵ This measure aims to promote inclusive growth by encouraging trade.

On 6 August 2022, Minister of Commerce Wentao met with Russia's Minister of Economic Development Maksim Reshetnikov at the 25th meeting of the Economic and Trade Cooperation Sub-committee of the China-Russia Prime Ministers' Regular Meeting Committee.¹¹⁶ The two sides discussed views concerning the development of bilateral trade, the strengthening of cooperation in emerging and key areas and the promotion of trade and investment facilitation. They reached several consensuses, which included encouraging sustainable growth through maintaining foreign trade relations.

On 9 August 2022, Foreign Minister Wang Yi met with Korea's Foreign Minister Park Jin to commit to jointly keeping industrial and supply chains stable.¹¹⁷ The commitment refers to ensuring the safeguarding of security and stability of the industrial and supply chains, and agreement to speed up the second-phase of negotiations on the China-ROK free trade agreement, which will encourage inclusive growth through trade alliances.

On 24 August 2022, Assistant Minister of Commerce Li Fei and Thailand's Deputy Minister of Commerce Sinit Lertkrai co-chaired the second meeting of the Trade and Investment Sub-committee of the China-Thailand Joint Economic and Trade Commission.¹¹⁸ The two sides exchanged views on issues such as trade, investment, infrastructure connectivity, and economic cooperation. They reached a series of consensuses that involved encouraging sustainable development through strong capital flows and trade cooperation.

On 29 August 2022, the Department of International Economic and Financial Cooperation of the Ministry of Finance held an international seminar on improving the international competitiveness of small and medium sized enterprises in the Yangtze River Economic Belt.¹¹⁹ This promotes financial resilience and encourages the development of sustainable growth initiatives.

On 3 November 2022, President Xi Jinping held talks with Tanzanian President Samia Suluhu Hassan.¹²⁰ The two leaders discussed ways to strengthen bilateral relations and how China can help contribute towards Tanzania's social and economic development.

On 4 November 2022, President Xi Jinping met with German Chancellor Olaf Scholz to plan for bilateral relations and strategic roles going forward.¹²¹

On 4 November 2022, at the opening ceremony of the Fifth China International Import Expo, President Jinping reiterated China's desire to open its economy.¹²² His message included mention of working with other countries to share the opportunities in its vast market, deepen collaboration and open its institutions.

China has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth through economic stability, including through promoting sustainable capital flows. China's involvement in free trade agreements with New Zealand, and negotiations with Belarus and Cambodia, were crucial in encouraging inclusive growth and financial resilience.

Thus, China receives a score of +1.

Analyst: Kaamilah Moola

France: +1

France has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 12 November 2021, Minister of Agriculture and Food Julien Denormandie signed an agreement with the Town Hall of Sevran and Saltus Campus to open an agricultural high school in Seine-Saint-Denis.¹²³ The high school will develop agricultural training and projects in "agroecology" and "peri-urban agriculture." This action supports inclusive growth by providing more opportunities for workers to learn skills, which will improve their employment potential.

On 23 November 2021, Minister of National Education and Youth and Sports Jean-Michel Blanquer, Minister of Higher Education, Research and Innovation Frédérique Vidal and Minister Delegate of Industry Agnès Pannier-Runacher signed an agreement with President of the Union of Industries and Trades of Metallurgy Eric Trappier to strengthen the existing links between the educational and economic world.¹²⁴ The agreement aims to improve and promote initial and continuing technological and vocational training, specifically through apprenticeship.

On 26 November 2021, the Ministry of the Economy, Finance and Recovery hosted the first economic inclusion summit that addressed issues in the deployment of economic inclusion policy within territories and the potential of digital technology for economic inclusion.¹²⁵

On 1 December 2021, Minister of Labour, Employment and Inclusion Élisabeth Borne, Secretary of State for the Digital Transition and Electronic Communications Cédric O and Chairman of the Strategic Committee for digital infrastructures Nicolas Guérin signed a national commitment

framework protocol for “the development of employment and skills for the digital infrastructure sector.”¹²⁶ The framework allows individuals to secure employment and creates training gateways for new jobs in the digital infrastructure.

On 1 December 2021, the government extended the Zero Long-Term Unemployed Territories (TZCLD) to include new territories.¹²⁷ The TZCLD project makes it possible for the “right to work” to become a reality and helps individuals find long-term employment.

On 6 December 2021, the Ministry of Labour, Employment and Inclusion presented the deployment of “Pix Emploi,” a tool for better digital training and access for employment for young people and job seekers.¹²⁸ The tool makes it possible to evaluate and train in five major areas of digital technology, which are necessary for daily, professional and civic life. The “Pix Emploi” tests help measure worker’s level of mastery of digital skills allowing them to market their skills during job search and to maintain sustainable professional integration. Pix Emploi makes job searching easier and more accessible for individuals, creating more opportunities to find employment.

On 8 December 2021, Minister Delegate for Small and Medium-Sized Enterprises (SMEs) Alain Griset and Secretary of State to the Minister for Territorial Cohesion and Relations with local authorities Joël Giraud announced the first twenty winners of “France Relance.”¹²⁹ France Relance is a program developed under the France Recovery Plan in September 2020 and devotes EUR30 million to the development of local manufactures. It provides an opportunity for “craftsmen, entrepreneurs and very small businesses” to pool their skills and expertise and encourages entrepreneurship and the development of joint projects.

On 14 December 2021, Minister Borne and President of the Adecco group Alexandre Viros signed a partnership agreement aimed at “increasing support for long-term job seekers” and retraining of employees.¹³⁰ The agreement addresses three areas by strengthening integration through economic activity for the return to employment of vulnerable groups, extending hiring assistance under a professionalization contract and actively contributing to the deployment of the “Collective Transitions” system. This system supports companies and employees who are facing “lasting economic changes” by “enabling them to convert to sectors that are recruiting in the same employment area.”

On 4 January 2022, Minister Borne and High Commissioner for Employment and Business Engagement Thibaut Guilluy announced the launch of two new services that guide young people during their job search: “I create my CV” and “Find my job,” both forming a part of the “1 young person, 1 solution” initiative on “1jeune1solution.gouv.fr.”¹³¹ “I create my CV” will help job seekers, including those with little or no experience, to develop their CV and personalize it for each job opportunity. The “Find my job” tool suggests jobs to young people based on their education, interests, and desires. These new tools make it easier for young individuals to find employment based on their skills and training.

On 5 January 2022, the government announced ten new actions to promote the competitiveness of medium-sized enterprises (ETIs) through its “ETI Nation Strategy.”¹³² The program aims to support the development of ETIs by taking their specifications into account within the government’s economic policy. The ten new actions accentuate the original four pillars of the program: strengthen the support of ETIs by public authorities, develop the attractiveness and access of ETIs to skilled workers, improve the competitiveness of ETIs to strengthen their investment capacity and promote the environmental and social commitments of ETIs. These actions suggest support for SMEs, which facilitates a more inclusive and competitive economy.

On 12 January 2022, the Ministry of Labour, Employment and Inclusion and the “financial services and consulting skills operator” Atlas signed a “multi-year framework agreement” in relation to the implementation of a Digital Engagement for the Development of Employment and Skills (EDEC) project.¹³³ The project anticipates technological changes, such as the “digitization of activities” by 2025. It will be deployed in two stages and will have a total budget of approximately EUR470,000. The first phase aims to study the trends in industries from the past, identify economic changes in progress, project the evolution of activities and jobs by 2025 and the prefiguration of operational tools. The second phase will be to help companies, in particular VSEs-SMEs, position them self to take advantage of the trends studied in the first phase. The project will help employers identify the necessary skills in a digital economy and help industries develop and take actions to invest in education and vocational training and reskilling of the workforce.

On 17 January 2022, the Ministry of Labour, Employment and Inclusion announced that it will move to strengthen the implementation of the “validation of acquired experience” (VAE) program to allow employees to validate achievements from their professional experience to put towards earning a “diploma, title or certificate of professional qualification.”¹³⁴ The initiative by the Minister of Labour,

Employment and Inclusion to reinvigorate use of the VAE program exemplifies efforts to make learning and presenting new skills more accessible to workers.

On 17 January 2022, Minister Borne signed an employment and skills development charter with representatives of the “retail charcuterie sector” to meet the “recruitment needs of the sector while strengthening its attractiveness.”¹³⁵ The “retail charcuterie sector” is mostly comprised of small businesses, which have been struggling to recruit workers. To alleviate the burdens resulting from the labor shortage, the government signed an agreement with representatives in the industry to encourage young individuals and adults to join the sector by supporting companies to make the sector more attractive to workers.

On 19 January 2022, the government announced support for 20 platforms aimed at developing autonomous professions to respond appropriately to recruitment needs as part of the “Old Age Careers Plan,” a recruitment campaign in old age professions.¹³⁶ The goal of the platform is to promote professions in the elderly sector and propose orientation and training courses to promote access to employment.

On 24 January 2022, Minister Borne and Minister Pannier-Runacher chaired a committee of the National Council for Industry.¹³⁷ The meeting provided an opportunity to collaborate with industry players on actions implemented to meet the needs of the industry in terms of employment and skills development, as well as display initiatives launched to support professional transitions and the attractiveness of industrial professions for young people. The committee focused on responding to recruitment pressures by applying training actions to guide job seekers towards industrial trades through the mobilization of the Skills Investment Plan. It also emphasized the initiatives already taken to match young people with employment. Third, the committee highlighted progress on supporting individuals as they transition with the labor market. During discussions, an agreement was signed with the state and “OPCO 2i” to finance tools to help adapt the skills of employees through the National Employment Fund. Leaders also highlighted the success of anticipating changes and new skills in the auto industry as more gigafactories are built. The committee’s actions make progress on building vocational training and reskilling to support workers as the economy changes.

On 2 February 2022, Minister Borne set up a network of 120 individuals to support companies as they pursue professional retraining.¹³⁸ The purpose of the program is to “support companies and enable them to anticipate their needs, train or retrain their employees” based on ongoing transitions in society. The individuals will mobilize tools provided by the Ministry of Labor to support professional transitions within companies and intervene to enable smooth transitions, meet local recruitment needs

and preserve jobs and skills in regions. The implementation of this program creates opportunities for employees to gain skills necessary to pursue employment opportunities.

On 2 February 2022, the government announced the deployment of the “public service for integration and employment” (SPIE) program to prevent and fight poverty by helping struggling individuals access the labor market.¹³⁹ The government will allocate EUR80 million over 2021-2022 for the program, which includes a EUR30 million investment to implement projects focused on technical support. The government will also provide some selected territories with a “range of digital public services,” for free, to “simplify procedures for users and to increase the effectiveness of support and access to the various integration solutions.” SPIE promotes inclusive growth by providing those in poverty with resources to find work, lifting them out of poverty.

On 9 February 2022, Minister Denormandie and the Secretary of State to the Minister of Labour, Integration and Employment Laurent Pietraszewski announced the revaluation of pensions for agricultural spouses.¹⁴⁰ As a result, more than 200,000 retirees will receive an increase in their retirement pension, which will alleviate poverty among retirees who worked in agriculture.

On 25 February 2022, Minister Delegate to the Minister of Ecological Transition Emmanuelle Wargon launched two energy savings certificate programs to aid the training of craftsmen and companies for energy renovation and innovation in the building industry.¹⁴¹ The program will include EUR16 million in funding.

On 2 March 2022, the Ministry of Economy and Finance announced a guide for SMEs to develop public procurement aimed at improving growth.¹⁴² The guide improves access of SMEs to public contracts by supporting them in promoting their assets, their innovations and their fulfilling of environmental and social responsibility criteria as outlined by the “Climate and Resilience” law.

On 8 March 2022, Member States of the Council of the European Union unanimously adopted a declaration aimed at strengthening diversity and equality in entrepreneurship and innovation.¹⁴³ In the declaration, Member States reaffirmed a commitment to equality and defined three priority actions to achieve a more open and inclusive innovation ecosystem in the European Union. Priorities include guaranteeing equal access to financing for men and women, supporting the development of tools to measure and monitor inequalities in access to financing and strengthening the overall participation of

women in entrepreneurship and innovation. By agreeing to the declaration, France signals support for creating more opportunities for women, specifically in entrepreneurship and innovation.

On 10 March 2022, Minister Borne signed the first amendment to the regional pacts for investment in skills for the deployment of a plan to reduce recruitment tensions in Bourgogne-Franche-Comté.¹⁴⁴ The plan includes EUR1.4 billion to train employees and job seekers in the skills sought by companies with the intention of increasing the skill level of individuals.

On 16 March 2022, High Commissioner for Skills Carine Seiler and President of the Region Huguette Bello signed the first amendment to the Reunionese Skills Investment Pact.¹⁴⁵ The amendment will devote EUR110.5 million in 2022 to train people looking for work such as young people who have dropped out of school or people affected by illiteracy. This will lead to greater professional integration, sustainable development and meet the “skills needs” of Reunionese businesses.

On 17 March 2022, the Ministry of Labour, Employment and Integration announced a partnership agreement with the Kering group to take concrete actions to encourage employment of young people and access for individuals with disabilities.¹⁴⁶ The announcement of the partnership increases the impact of the “1 young person, 1 solution” plan announced by the government.

On 17 March 2022, Minister Borne, Minister of Labour, Employment and Inclusion Olivia Grégoire and High Commissioner Guilluy announced five new winners of the “Innovate for access to employment” impact contracts.¹⁴⁷ These contracts will finance innovative solutions to remove barriers to unemployment with a EUR10 million contract. Announcement of the competition and winners highlights the French government’s interest in removing barriers to employment, reducing poverty and increasing opportunities.

On 17 March 2022, High Commissioner Guilluy and Director of Human Resources at Airbus Atlantic Marc Jouenne signed a partnership agreement to commit to the “1 young person, 1 solution” plan and the “Companies get involved” system.¹⁴⁸ Under this partnership, Airbus Atlantic commits to recruiting more individuals with a permanent contract and training young people on work-study contracts. Atlantic's partnership with the government will provide many opportunities for young individuals and train and reskill individuals in the aeronautical industry.

On 17 March 2022, Minister Borne and President of CCI France Alain Di Crescenzo launched a campaign to promote immersions in "very small businesses" for job seekers.¹⁴⁹ Immersion programs allow companies to market themselves to a group of potential candidates while candidates can explore careers.

On 17 March 2022, the Ministry of National Education, Youth and Sports, is calling for projects which increase accessibility of civic service within the framework of the new Youth Engagement Contract, which supports young people who are out of employment or training in finding opportunities.¹⁵⁰

On 28 March 2022, the Ministry of Labour, Employment and Inclusion finalized employment and skills development charters with representatives of the butchery and bakery sectors to meet recruitment needs.¹⁵¹ The charter raises awareness for employment in the butchery and bakery sectors, supports companies and employees in the implementation of measures to make the profession more attractive, facilitates recruitment and acts on the quality of employment.

On 29 March 2022, Minister Le Maire requested the Director General of the French Development Agency (AFD) to implement a loan of EUR300 million to support Ukraine as it deals with the economic consequences of the ongoing conflict.¹⁵² Minister Le Maire's request and subsequent approval of the loan to Ukraine supports France's commitment to supporting foreign economies.

On 5 April 2022, European ministers for education affirmed the importance of investing in education for society and the economy.¹⁵³ At the meeting, all 26 members, including France, signed a joint declaration indicating a commitment to intensify actions to strengthen the effectiveness, equity, quality and efficiency of investments in education. The declaration signed by France signals support for increased investment in education including researching new avenues for support.

On 6 April 2022, the European Commission agreed to Frances's request to extend the period for granting Relance equity loans and Relance bonds until 31 December 2023.¹⁵⁴ Relance equity loans and Relance bonds are for French SMEs and ETIs to develop and invest, without involving outside shareholders. The additional opportunity for financing helps strengthen the financial situation of SMEs and ETIs and makes it easier to obtain additional financing and strengthen companies' ability to rebound.

On 15 June 2022, the Minister for Europe and Foreign Affairs Catherine Colonna and her Moldovan counterpart Nicu Popescu signed a bilateral taxation agreement.¹⁵⁵ In addition to strengthening economic ties between the two members, the agreement will also help in eliminating double taxation. It is expected to reduce tax fraud and evasion.

On 27 June 2022, Minister of Labour, Employment and Inclusion Olivier Dussopt met job seekers and the Pôle emploi teams of the agency Paris-Cardinet.¹⁵⁶ At the meeting, Pôle emploi presented its plan for helping job seekers find jobs and connecting employers with qualified candidates. With the help of Pôle emploi, the government is integrating workers into the workforce and as a result making the economy more inclusive by reducing the number of individuals in poverty.

On 18 July 2022, Minister Le Marie and Minister Pannier-Runacher signed a comprehensive strategic partnership agreement on energy cooperation with the UAE's Minister of Industry and Advanced Technologies and Special Envoy for the Climate Sultan Al-Jaber.¹⁵⁷ The agreement builds the foundation for a "stable long-term framework" for cooperation in new industrial contracts and future joint investment projects in the energy sector.

On 29 August 2022, the government announced measures to protect purchasing power in the country.¹⁵⁸ It mobilized EUR20 billion to intervene in increasing energy prices and rent and to protect families, the most vulnerable, students and retirees.

On 9 September 2022, Minister of Solidarity, Autonomy and People with Disabilities Jean-Christophe Combe announced an investment of EUR55 million in additional credits for food aid.¹⁵⁹ The investment aims to support French consumers in a time of rising inflation. Minister Combe's

announcement signals support for an inclusive French economy that helps those who are hurt by rising food prices.

On 15 September 2022, Minister Dussopt and Delegate Minister in charge of Education and Professional Training Carole Grandjean launched a messaging campaign to call on companies to continue offering apprenticeship programs to facilitate recruitment in jobs in demand for young people.¹⁶⁰ Additionally, financial aid for businesses has been extended until 31 December 31 2022, incentivizing companies to hire apprentices.

France has fully complied with its commitment to strengthen long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. France has acted to address inclusive growth by creating and promoting education and vocational training programs and reskilling of the population. Additionally, it has provided support for SMEs.

Thus, France receives a score of +1.

Analyst: Julia Rychlik

Germany: +1

Germany has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 2 December 2021, the Federal Ministry of Finance and the Federal Ministry for Economic Affairs agreed to extend the COVID-19 assistance, Bridging Assistance IV, until the end of March 2022.¹⁶¹ This extension provides companies with security and support as many of them continue to suffer the consequences of the restrictions implemented due to the COVID-19 pandemic. Companies who faced an average pandemic-related decline in revenue of at least 50 per cent in December 2021 and January 2022 are eligible to receive an up to 30 per cent higher rate of reimbursement.

On 10 December 2021, according to the World Trade Organization (WTO), Germany's Federal Ministry for Economic Cooperation and Development contributed CHF2.8 million to the Standards and Trade Development Facility (STDF) for the years 2021-2024.¹⁶² This contribution aims to help developing and least-developing countries (LDCs) meet international safety, animal and plant health standards for trade. The WTO states that the contribution will be used to develop and support projects that "strengthen the ability of small-scale farmers, producers, traders and governments to access global and regional markets for food and agriculture products." The investment also supports economic recovery and long-term financial resilience against the impact of COVID-19.

On 4 January 2022, the Federal Government designed a program called “Catching up after Corona for Children and young people.”¹⁶³ The Federal Government allocated EUR2 billion for the years 2021 and 2022 to this program and Federal Ministry for Family Affairs, Senior Citizens, Women and Youth plans on using EUR1 billion on early childhood education and support for children and young people in everyday life. This program is to avoid long-lasting negative effects of the COVID-19 pandemic that may increase inequalities and hinder inclusive growth.

On 4 April 2022, Foreign Minister Annalena Baerbock met with Singapore’s Foreign Minister Vivian Balakrishnan.¹⁶⁴ During the meeting, they discussed strengthening multilateral cooperation between the EU and the Association of Southeast Asian Nations to promote stability, international cooperation, sustainability and innovation. As Singapore is one of Germany’s key trading partners in Southeast Asia and a hub for more than 2,000 German companies, there is great interest to expand existing bilateral cooperation in the areas of sustainability and digital transformation.

On 27 April 2022, the Cabinet adopted Germany’s Stability Programme for 2022.¹⁶⁵ The report by the Ministry of Finance provides an overview of Germany’s medium-term fiscal planning. The report focuses on reducing the debt ratio, the government taking more international responsibility and using targeted measures to stimulate economic growth and accelerate the shift to a sustainable economy.

On 10 May 2022, the Ministry of Finance announced the Green German Federal Securities to boost sustainability in financial markets.¹⁶⁶ As part of the “Climate Action Programme 2030,” the government is issuing green bonds to promote sustainability in the financial sector. The “Green Bond Framework” states five main green expenditure categories that can be assigned to the Green German Federal Securities: transport, international cooperation, research, innovation and awareness raising, energy and industry and agriculture, forestry natural landscapes and biodiversity.

On 20 May 2022, the Minister for Economic Affairs and Climate Action Robert Habeck and Emir of Qatar Sheikh Tamim Al Thani signed a “Joint Declaration of Intent” to promote cooperation between the two countries in the energy field.¹⁶⁷ The “Energy Partnership” and liquefied natural gas bilateral trade relations between Qatar and Germany builds on previous successful discussions and both parties expect benefits in their pursuit of climate action and a sustainable economy.

On 24 May 2022, Chancellor Olaf Scholz concluded his visit to Senegal, Niger and South Africa as part of a three-day visit to expand partnerships in Africa.¹⁶⁸ He focused on deepening economic relations through investments, trade and the energy sector. The expansion of Germany’s partnership in Africa will

provide more economic stability and resilience in Africa with South Africa being a “key country” for Germany’s investments in Africa.

On 17 June 2022, the State Secretary Udo Philipp remarked on the 12th Ministerial Conference of the WTO.¹⁶⁹ He said on the topic of reforms, “It is very important that we initiated this process. It is of paramount importance that we quickly create a functioning dispute settlement system again, but we also want to revive rulemaking in the WTO with a view to the future challenges so that the WTO can continue to make a positive contribution to the global trade.”

On 1 July 2022, the Federal Cabinet adopted the proposed 2023 federal budget and financial plan for the next three years.¹⁷⁰ The new federal budget and financial plan includes robust finances and a refusal to increase new borrowing to ensure the government’s capabilities of taking effective fiscal action. The robust financial policy plans to limit imposing new burdens on citizens or the economy and aims to prioritize future-oriented investments that boost Germany as a business hub.

On 27 July 2022, the Federal Cabinet adopted the first comprehensive ‘start-up-strategy’ to strengthen and promote young and innovative companies with growth ambitions.¹⁷¹ The strategy will prioritize giving start-ups fast access to funding without “unnecessary bureaucracy.” The aim of the strategy is to significantly expand the financial avenues for start-ups and strengthen companies in different financial phases, with a focus on the capital-intensive growth phase. Along with private investors, the government aims to mobilize EUR30 billion of private and public capital for Germany as a venture capital location by supporting innovative, technology-oriented start-ups in their growth phase.

Germany has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. The member took strong actions through the Bridging Assistance IV program, contributions to the STDF and investing in the future of the youth to ensure financial resilience and inclusive growth, while ensuring that the Stability Programme for 2022 and Green German Federal Securities provided sustainable capital flows.

Thus, Germany receives a score of +1.

On 27 November 2021, the Ministry of Skill Development and Entrepreneurship launched two projects: the revival of “Namda craft of Kashmir as a special pilot project under Pradhan Mantri Kaushal Vikas Yojana (PMKVY) 3.0 and upskilling of artisans and weavers of Kashmir under Recognition of Prior Learning, component of PMKVY.”¹⁷³ These projects aim to “boost and preserve the traditional Namda craft of Kashmir and upskill the local weavers and artisans to enhance their productivity through RPL assessment and certification.”

On 6 December 2021, Deputy Minister of Industry and Trade Oleg Ryazantsev met with India’s Minister of Port Infrastructure, Shipping and Inland Waterways Sarbananda Sonowal to discuss a potential collaboration in shipbuilding ventures.¹⁷⁴ Both parties agreed upon a necessity to formalize an agreement pertaining to pertinent projects in the field of civil shipbuilding.

On 18 January 2022, the Ministry of Skill Development and Entrepreneurship signed a Memorandum of Understanding with Indira Gandhi Open University.¹⁷⁵ The partnership “aims to link vocational education and training with higher education, making India’s youth employable by creating avenues for them to access better work opportunities.”

On 1 February 2022, Union Minister of Finance and Corporate Affairs Nirmala Sitharaman presented the Union Budget 2022-2023 in Parliament.¹⁷⁶ The budget promotes inclusive development focusing on agriculture, fisheries and migrant and female workers. To financially support farmers, the proposal will increase the “Rural Infrastructure Development Fund” from INR30 million to INR40 million and double the “Micro Irrigation Fund” to INR5 million. Minister Sitharaman proposed to reduce the margin requirement from 25 per cent to 15 per cent under the “Stand Up India” scheme for “Scheduled Castes, Scheduled Tribes and women.” The government also funded a “Development Financial Institution” with INR20 million to enable long-term debt financing for infrastructure.

On 11 February 2022, Minister of Commerce and Industry Shri Piyush Goyal and Australia’s Minister of Trade, Tourism and Investment Hon Dan Tehan MP announced the reaching of an understanding on the Interim Trade Agreement to be signed in March 2022.¹⁷⁷ The ministers “agreed on the need for a balanced trade agreement that encourages expanded trade and investment flows to the benefit of both of the economies and reflects a shared commitment to the rules-based international trading system.”

Indonesia fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

Thus, Indonesia receives a score of +1.

Analyst: Gulfara Bekbolatova

Italy: +1

Italy has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 6 December 2021, Italian Minister of Foreign Affairs and International Cooperation met with Russian Minister of Industry Denis Manturov²⁰⁷ Both parties expressed a desire to alleviate barriers to cooperation and the implementation of shared projects. The ministers discussed promising production technology, artificial intelligence, hydrogen energy, electric transportation and the broad digitalization of the economy.

On 31 March 2022, Prime Minister Mario Draghi outlined steps taken and to be taken in the future regarding surging energy prices.²⁰⁸ The country will seek to mitigate the adverse effects of the surge by diversifying supplier countries and advocating for price caps on gas. Furthermore, the government has allocated approximately EUR20 billion on subsidies to both households and businesses negatively impacted by the higher gas prices.

On 6 April 2022, Prime Minister Draghi and Minister of Economy and Finance Daniele Franco drafted a short-term stability program, which plans to alleviate the current economic struggle related to the conflict in Ukraine through stimulus.²⁰⁹ It simultaneously plans to manage spending to lower the Italian deficit in order to comply with European standards by 2025.

On 10 May 2022, Prime Minister Draghi met with US President Joe Biden to discuss the impact of inflation on their respective economies and to contemplate possible solutions.²¹⁰ Both expressed a desire to implement market constraints and incentivize energy suppliers to increase production, thus stabilizing prices.

On 26 May 2022, Prime Minister Draghi addressed Italian trade unions at the Italian Confederation of Workers' Unions congress. Prime Minister Draghi introduced several steps taken by the government to help workers and households overcome current economic turmoil. He cited the ongoing desire to put the drafted National Recovery and Resilience Plan (NRRP) into action, which aims to reform the

Italian economy and job market.²¹¹ The NRRP will provide EUR68.9 billion in grants and EUR122.6 billion in loans with emphasis being put on the transition toward the green and digital spheres.²¹²

On 9 June 2022, Prime Minister Draghi spoke at the Ministerial Council Meeting of the Organisation for Economic Co-operation and Development.²¹³ He expressed the desire for international cooperation with regard to global economic issues plaguing several countries, namely inflation resulting from surging food and energy prices. The Italian government supports European initiatives to cap the price of Russian gas imports and offer low-rate loans to EU countries in order to curb unemployment and increase national income. Furthermore, he detailed the requirement to invest into greater sustainable growth models centring around the development of renewable energy sources.

On 14 June 2022, Minister of Labor and Social Policies Andrea Orlando met with the Minister of Labor and Social Security of El Salvador Oscar Rolando Castro to discuss labor flows and migration.²¹⁴ Their meeting involved the subject of legal migration and training programs in tourism and agriculture for migrants from El Salvador.

On 14 June 2022, Italy joined the Global Deal Partnership which combats challenges of the global labor market by working with governments, trade unions and businesses.²¹⁵ The initiative is expected to provide equal opportunities and promote inclusive and sustainable growth.

On 20 July 2022, Prime Minister Draghi summarized the performance of the recently implemented NRRP to Italian Senate and announced several amendments.²¹⁶ While Draghi claims the NRRP has met all of its objectives up to this point, reforms have been made to ensure Italian plans stay on course in order to receive additional funding of EUR19 billion by end of year. Reforms have also been implemented to improve competition by removing barriers to open markets for those offering local public services. Finally, they seek to reduce personal income taxes starting with those in lower income brackets while striving to improve the ability with which they can collect said taxes.

On 16 September 2022, Prime Minister Draghi approved an aid package aiming to support businesses and people during current surging energy prices.²¹⁷ It amounts to about EUR14 billion and will be funded through revenue earned from increased value added taxes due to higher electricity and gas bills. Eligible firms will benefit from tax breaks and access to more affordable lending as the state export agency will guarantee loans with rates equal to those of comparable government bonds for free. Around 22 million workers and pensioners with an annual income below EUR20,000 in the country will receive a one-time EUR150 payment. Furthermore, existing tax cuts pertaining to the commercial purchase of

fuel will persist into November as opposed to the original end date of 17 October 2022. The government hopes that these policies will add much needed liquidity to the national economy.

On 27 October 2022, The Secretary General of the Farnesina, Ambassador Ettore Sequi, received the new Ambassador of the State of Kuwait, Nasser Sanhat Alqahtani, at the Farnesina.²¹⁸ In the meeting, they discussed the already good bilateral relations and explored further boosting their ties.

Italy has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

Thus, Italy receives a score of +1.

Analyst: Julind Skenderi

Japan: +1

Japan has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 16 December 2021, the Ministry of Foreign Affairs announced its ongoing promotion for both economic partnership agreements and free trade agreements.²¹⁹ The Ministry highlights that promoting these agreements would serve to encourage the reduction—or elimination—of tariffs and other barriers on trade, as well as promote the creation of rule-based trade and investment within the country.

On 16 December 2021, the Ministry of Foreign Affairs called for the push of special and differential treatment for developing countries concerning World Trade Organization (WTO) decision making and responsibility.²²⁰ The ministry also highlighted its support for WTO reform, specifically along the lines of integrating digitization in the world economy and addressing the conditions in the world economy that impede free trade. The goal is to promote both a more inclusive international economy and free trade.

On 18 January 2022, Prime Minister Fumio Kishida announced his vision for the country's economy to experience a revival through a “New Form of Capitalism.”²²¹ This framework would lead to an achievement of a “virtuous cycle of growth and distribution,” inspire investment and promote an inclusive economy.

On 22 March 2022, the Ministry of Foreign Affairs announced in a joint statement to launch the Indo-Pacific Economic Framework for Prosperity.²²² The objective of this framework is to promote long-term inclusive and sustainable economic growth, inclusive free trade, long-term financial resilience, as well as encourage investment within the region.

On 22 April 2022, Minister of Finance Shunichi Suzuki stated that the country is committed to contributing to the strengthening of the World Bank Group's financial capacities to securely support sustainable and inclusive global economic growth in the world.²²³ Minister Suzuki also confirmed a JPY420.6 billion investment in the International Development Association's 20th Replenishment. This will provide strong support including stable and sustainable capital flows to lower income countries.

On 15 March 2022, Minister for Economy, Trade and Industry Hagiuda Koichi, India's Minister for Commerce and Industry Piyush Goyal and Australia's Minister for Trade, Tourism and Investment Dan Tehan announced in a joint statement their desire to strengthen supply chain resilience.²²⁴ The goal of supply chain resilience is to promote multilateral trade between the countries.

On 26 March 2022, Minister of Foreign Affairs Yoshimasa Hayashi announced the country's desire to help alleviate Africa from the effects resulting from the COVID-19 pandemic by stressing the importance of promoting private investment, digital transformation, free trade, deepening regional integration and the promotion of rules-based trade.²²⁵ The goal is to promote not only inclusive economic growth and recovery in Africa but also sustainable capital flows.

On 13 June 2022, Patent Offices in Japan, Europe, Korea, China, and the U.S., held their 15th IP5 Heads of Office Meeting.²²⁶ In the meeting, the representatives discussed the role of Intellectual Property in achieving the UN Sustainability Development Goals. The meeting reaffirmed that IP systems play an important role in technological developments which can alleviate climate change as well as support research and development into clean energy.

On 17 June 2022, Foreign Minister Hayashi issued a press statement following the Twelfth Ministerial Conference of the WTO.²²⁷ He expressed confidence in the WTO in its function in resolving international issues and affirmed Japan's efforts to strengthen multilateral trade systems.

On 20 July 2022, Prime Minister Kishida and Ireland's Taoiseach (Prime Minister) Micheál Martin welcomed the strengthening of bilateral relations through various methods including the establishment of new global economic trading systems that are free and open, as well as reforming and strengthening their relations through the WTO.²²⁸ This goal will help promote bilateral trade between the two countries.

On 18 August 2022, the Ministry of Economy, Trade, and Industry announced that Japan will take on a "new direction" of economic and industrial policies, primarily consisting of leveraging Japan's strengths, both in terms of human capital and economic resources, to help realize the government's

goal of “new capitalism.”²²⁹ This “New Direction” serves to promote sustainable growth in the Japanese economy.

On 2 September 2022, Minister Hayashi expressed Japan’s interest in further strengthening its economic relations with Morocco.²³⁰ This objective would allow both countries to further deepen their bilateral economic networks.

On 9 September 2022, the Ministry of Foreign Affairs announced that Japan will seek to promote an inclusive approach regarding its economic systems to ensure the benefits of the Indo-Pacific Economic Framework are equally shared among all members of society in participating nations—such as indigenous peoples, women and more.²³¹ This goal will allow for more inclusive economic growth and participation within the Indo-Pacific region.

On 27 September, Prime Minister Kishida and India’s Prime Minister Narendra Modi “renewed their commitment towards further strengthening the India-Japan Special Strategic and Global Partnership”²³²

On 27 October 2022, the Minister of Economy, Trade and Industry Nishimura held a meeting with Federal Minister of Labor and Economy of the Republic of Austria Kocher.²³³ In the meeting, they confirmed their continued cooperation and traded views on free trade and economic relations.

On 28 October 2022, the Minister of Economy, Trade and Industry Nishimura held a meeting with Prime Minister Šimonytė of the Republic of Lithuania.²³⁴ In the meeting, they confirmed their continued cooperation and traded views on the global landscape.

Japan has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. The country took strong actions through their promotion of WTO reform, presentation of a vision for a “New Form of Capitalism” and investments that promote capital flows to lower income countries.

Thus, Japan receives a score of +1.

Korea: +1

Korea has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 15 November 2021, President Moon Jae-in expressed his desire to increase cooperation in the Asian Pacific region through open and fair trade, as well as ensuring the cooperation is inclusive and results in sustainable development.²³⁵ The goal is to promote multilateral trade between the region's countries and inclusive economic recovery and prosperity.

On 18 February 2022, Deputy Prime Minister Hong Nam-ki announced at the G20 Finance Ministers and Central Bank Governors' Meeting that Korea will be a leading country in the discussion of improving global financial stability—such as supporting low-income countries with relieving debt burdens and reviewing International Monetary Fund quotas.²³⁶ This objective is to help promote inclusive economic growth within the international economy.

On 20 April 2022, Deputy Prime Minister Hong expressed expectations to enhance reciprocal economic cooperation and official development assistance with India.²³⁷ He also emphasized the need for global policy coordination to ensure global economic recovery and the strengthening of global supply chains.

On 20 April 2022, Deputy Prime Minister Hong had bilateral talks with the US Treasury Secretary Janet Yellen, wherein both leaders agreed to strengthen the Korea-US alliance and the economic cooperation between both countries.²³⁸

On 20 April 2022, Deputy Prime Minister Hong had bilateral talks with Spain's Minister for Economy and Digitalization Nadia Calviño, wherein both leaders highlighted their interest in further solidifying bilateral cooperation through the facilitation of cultural exchanges.²³⁹

On 22 April 2022, Deputy Prime Minister Hong highlighted his support for the International Monetary Fund's partial acceptance of the utilization of "Capital Flow Management/Macro Prudential Measure."²⁴⁰ This will help promote domestic and global economic stability through the regulation of capital flows in a sustainable manner.

On 25 April 2022, Deputy Prime Minister Hong expressed interest in developing stronger economic cooperation with Singapore through regional and bilateral economic agreements and arrangements.²⁴¹ The goal is to promote and deepen bilateral trade between the countries.

On 16 May 2022, Deputy Prime Minister Choo Kyung-ho and the Bank of Korea Governor Rhee Chang-yong announced the need for the creation of a “good policy mix” built on stronger coordination in order to tackle the ongoing economic challenges within the country.²⁴² They plan to base the policy on effective communication between various economic institutions and for it to act as the foundation for balancing macroeconomic conditions to render them more stable. The objective of this ‘policy mix’ serves to promote financial stability and sustainable capital flows.

On 21 May 2022, President Yoon Suk Yeol and U.S. President Joe Biden agreed to upgrade the bilateral alliance of their countries to a “global comprehensive strategic alliance.”²⁴³ This alliance will allow both Korea and the U.S. to respond to various challenges that pose a threat to their countries and help them create a rules-based order. This strategy will help further promote economic bilateral ties between the two countries and help encourage the creation of a rules-based trading system.

On 7 June 2022, the Ministry of Economy and Finance and the European Commission held the 10th Korea-EU Macroeconomic Dialogue to discuss the current global economic landscape.²⁴⁴ Both members emphasized the need for cooperation to prevent protectionism and global trade contraction, and to stabilize global supply chains.

On 16 June 2022, Korea joined the Minerals Security Partnership which aims to stabilize and diversify critical minerals’ supply chain through partnership.²⁴⁵ The partnership is a channel through which governments and private parties can make investments in accordance with environmental, social and governance (ESG) standards regarding critical minerals.

On 17 June 2022, the Vice Minister of Small and Medium-Sized Enterprises and Startups Juhyeon Cho met with micro-business leaders.²⁴⁶ During the meeting, talks were held to discuss policy changes which provide support for the damage recovery, growth of micro-entrepreneurs and the creation of ideal business environment.

On 4 July 2022, Korea and Mexico agreed to promote the free trade agreement between the two countries and signed a triangular cooperation agreement to finance development in Central America.²⁴⁷

On 7 July 2022, cabinet members and the private sector announced a new fiscal strategy, which highlights ways that the government aims to encourage private-led economic growth and increase the country's fiscal sustainability through the adoption of universal standards for fiscal rules.²⁴⁸ These objectives serve to promote sustainable capital flows.

On 13 July 2022, Korea and China met to discuss the second phase of free trade agreement negotiations.²⁴⁹ The two countries successfully consulted on cross-border trade in services, investment and financial services, issues on rules and the market access negative list. Actively promoting negotiations on a free trade agreement and achieving substantive outcomes at an early date will enhance the level of openness and cooperation in bilateral service trade and investment, therefore encouraging inclusive growth by promoting long-term financial resilience for the two countries.

On 9 August 2022, Minister Jin met with Chinese Foreign Minister Wang Yi to commit to jointly keeping industrial and supply chains stable.²⁵⁰ The commitment refers to ensuring the safeguarding of security and stability of the industrial and supply chains, and agreement to speed up the second phase of negotiations on the China-Korea free trade agreement, which will encourage inclusive growth through trade alliances.

On 19 August 2022, Deputy Prime Minister Choo announced the country's plans to implement policies to further strengthen economic cooperation and trading networks with member states of the Indo-Pacific Economic Framework.²⁵¹ This plan is to help promote both multi and bilateral trading between Korea and its key partnering countries.

On 24 August 2022, Vice Minister of Economy and Finance Choi Sang-dae announced at the treasury bond market meeting that the government will work on regulatory fiscal improvements, particularly with the objective of joining the FTSE WGBI and improving the financial market for foreign investment.²⁵²

On 24 August 2022, President Yoon Suk Yeol announced Korea will seek out new directions of economic cooperation with China that extend beyond those already present.²⁵³ This objective will help further deepen bilateral economic and trading relations between the two countries

On 5 September 2022, Deputy Prime Minister Choo announced that the government will closely monitor shifts in supply and demand within the foreign exchange market and address any volatility in

the global financial market through policy.²⁵⁴ This goal will help promote financial sustainability and stability in the global fiscal market, and thereby encourage more sustainable capital flows.

On 8 September 2022, Deputy Prime Minister Choo announced that the government will establish an institutional basis for expanding foreign investment into Korean start-up businesses.²⁵⁵ This objective seeks to promote not only the outward expansion of Korean markets and thereby the strengthening of the country's multilateral economic ties, but also encourage investment—both foreign and domestic—into Korean businesses.

On 2 November 2022, Trade, Industry and Energy Minister Lee Chang-yang held a videoconference with Saudi Arabia's Energy Minister Prince Abdulaziz bin Salman to discuss collaboration in energy sectors.²⁵⁶ The two stressed the importance of continued cooperation to aid in the stabilization of the global supply chain market.

Korea has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

Thus, Korea receives a score of +1.

funds. The analysis of the budget suggests a commitment by the government to comply with guidelines set to promote sustainable capital flows specifically as it relates to domestic programs.

On 22 November 2021, the Foreign Ministry's area for Multilateral Affairs and Human Rights, the Commission for Refugee Assistance (Comar), the UN Refugee Agency and the Active Mexico Intercultural Dialogue (DIMA) civil association agreed to collaborate on transferring 100 refugees and displaced people to Mexico and create opportunities for them to "study under the university scholarship program created by the Habesha Project."²⁵⁹ The Habesha Project was originally created in 2015 for Syrian youths to pursue higher education in Mexico and has since been expanded to include refugees recognized in a third country and displaced people. The collaboration between the Foreign Ministry, Comar, United Nations Refugee Agency (UNHCR) and DIMA supports the UNHCR's global goal of "increasing access to higher education for young refugees by 15 per cent by 2030."

On 25 November 2021, Foreign Secretary Marcelo Ebrard presented the "Territorial-Industrial Investment Atlas: An Opportunity for Socio-economic Recovery in Mexico."²⁶⁰ The Atlas is a collaboration between the Mexican Foreign Ministry, the United Nations Human Settlements Program and the United Nations Industrial Development Organization to "attract investment to high value-added sectors and specific regions of the country to leverage economic, social, environmental and urban development." The Atlas identifies five sectors in which Mexico can "improve its market share, add value and increase its ability to create jobs," in sectors such as the aerospace and agro-industrial industries.

On 1 December 2021, Mexico and the United States announced the "Sembrando Oportunidade" program to "address the root causes of irregular migration from El Salvador, Guatemala and Honduras."²⁶¹ The program is a collaboration between the Mexican Agency for International Development and Cooperation (AMEXCID) and the United States Agency for International Development (USAID) to help citizens of El Salvador, Guatemala and Honduras build prosperous futures in their home communities. The program will begin in Honduras where AMEXCID and USAID will "provide youth with skills and experience that can lead to long-term employment" and reduce the risk of irregular migration. AMEXCID intends to continue to assist small farmers through their "Sembrando Vida agriculture and reforestation program." Additionally, the United States and Mexico will work together to "promote good governance, an improved business enabling environment, and enhanced investment by national governments in the neglected communities" of El Salvador, Guatemala and Honduras.

On 7 December 2021, Undersecretary of Foreign Affairs Carmen Moreno presented the "World Plan for Wellbeing" at the G20 Sherpa meeting in Jakarta, Indonesia.²⁶² The purpose of the Plan is to support more than 750 million people living in extreme poverty in the world through voluntary direct

²⁶² Mexico presents the World Plan for Wellbeing to the G20, Government of Mexico (Mexico City) 7 December 2021. Access Date: 1 February 2022. <https://www.gob.mx/sre/prensa/mexico-presents-the-world-plan-for-wellbeing-to-the-g20?idiom=en>

transfers. Introducing the “World Plan for Wellbeing” at the G20 represents an effort by Mexico to alleviate poverty internationally and assist developing countries as they grow their economies.

On 14 December 2021, Secretary of the Treasury Rogelio Ramírez de la O presented Peru’s President Pedro Castillo with a variety of economic proposals in support of Peru’s economy.²⁶³ Ramírez presented proposals to strengthen trade between the two countries and “grant lines of credit from development banks to promote exports.” Both parties agreed to “maintain mutual consultations” to execute the proposals.

On 7 January 2022, the Welfare Secretariat announced support for sons and daughters of working mothers in Mexico City.²⁶⁴ The Secretariat announced a payment of MXN1,600 every two months for 50,000 children of working mothers. A monthly stipend for working mothers will help them support their children, helping prevent these children from entering poverty.

On 24 February 2022, the National Institute of Migration of the Ministry of the Interior received the certificate of the “Mexican Standard NMX-R025-SCFI-2015” in Labor Equality and Non-Discrimination.²⁶⁵ The distinction signals that the National Institute of Migration of the Ministry of the Interior incorporates a gender perspective and non-discrimination in the processes of recruitment, selection, mobility and training, in addition to preventing workplace violence and strengthening the realization of co-responsibility actions between work, family and personal life of public servants.

On 28 February 2022, the head of the Unit for North America Roberto Velasco Álvarez met with the Undersecretary for Economic Growth, Energy and the Environment of the United States José W. Fernández.²⁶⁶ Under the framework of the High-Level Economic Dialogue between Mexico and the US, both officials discussed economic issues to strengthen trade ties and boost the region’s competitiveness.

On 17 March 2022, Secretary of Welfare Ariadna Montiel Reyes announced universal pension for people between the ages of 30 and 64.²⁶⁷ The proposal prevents and alleviates poverty by targeting groups most venerable.

On 18 March 2022, authorities from the public and private sectors signed the Public-Private Interinstitutional Coordination and Collaboration Agreement for the installation of the

On 22 July 2022, Secretary Ebrard announced that the Ministry of Foreign Affairs and the state government of Chiapas will work together to increase exports of Chiapas products.²⁷⁹ Through help from the Ministry of Foreign Affairs, Chiapas coffee producers increased their production and started exports to the United States, Canada and Europe. Secretary Casaubon noted that exporting presents the opportunity for foreign investment and inclusive development of communities.

On 29 July 2022, Secretary Ebrard participated in the signing of an agreement between the United Nations Development Programme (UNDP) and the state government of Morelos to develop projects that aim to reduce the economic impact of the COVID-19 pandemic and to promote the resilient recovery of Mexico's communities.²⁸⁰ Morelos and the UNDP will each contribute MEX5 million to create a company which will export avocados and nopal to the US and Europe.

On 5 September 2022, the Ministry of Welfare began dispersing MEX46.7 million to 12.1 million beneficiaries of both pension and disability programs and working mothers program.²⁸¹ Those enrolled in the Program for the Welfare of Girls and Boys, Children of Working Mothers received MEX1,600. Payments made by the Ministry of Welfare resemble follow through on commitments made earlier in the year to support welfare programs.

Mexico has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. Mexico has taken actions to address the core pillars of inclusive growth both on the domestic and international levels, used governmental and fiscal tools to promote more financially resilient economies and the free movement of capital through the reduction in barriers to international capital flow.

Thus, Mexico receives a score of +1.

potential collaboration in shipbuilding ventures.²⁸³ Both parties agreed upon a necessity to formalize an agreement pertaining to pertinent projects in the field of civil shipbuilding.

On 16 December 2021, the Ministry of Agriculture and the Ministry of Industry of Trade welcomed a meeting organized by the “Russian-Danish Agro-Business Club” to discuss prospective bilateral trade agreements between Russia and Denmark within the agro-industrial sector.²⁸⁴ The sector employs 200,000 Danish citizens and comprises approximately a quarter of the country’s exports. Russia invited Danish investment into Moscow, Lipetsk and Yenisei Siberia, noting the facilitation of foreign direct investment by the state. The meeting concluded with the identification of principal investment opportunities for 2022.

On 24 February 2022, the central bank introduced policies intending to provide liquidity to the banking system and support a struggling Rouble.²⁸⁵ The central bank increased the lending rate to 20 per cent. It also broadened collateral options and provided RUB874 billion at a “daily repo auction,” which allowed for greater volumes of transactions throughout the system.²⁸⁶

On 26 April 2022, Prime Minister Mikhail Mishustin announced policies that the government plans to implement to ensure self-sufficiency and economic resilience in spite of the sanctions imposed against Russia due to their ongoing conflict in Ukraine.²⁸⁷ The policies include subsidies to companies in the form of a one-year deferral of social security contributions with an additional quarter of grace to companies with a domestic focus. This will allow the creation of RUB1.6 trillion in working capital and provide another RUB550 billion to loan guarantees. Furthermore, the policies will decrease interest rates to 9 per cent from 12 per cent in order to make housing more affordable and boost the construction sector.

On 18 May 2022, Prime Minister Mishustin announced 14 additional items to be added to Russia’s “priority action plan.”²⁸⁸ Among the additions were changes to company regulation and correspondence with the Federal Anti-Monopoly Service. Companies not belonging to state-deemed vital sectors may now purchase assets up to a value of RUB2 billion while no longer needing to submit preliminary inquiries to the regulatory firm. They also plan to subsidize company efforts to buy back shares from foreign investors. The goal of these measures is address current demand for affordable housing while concurrently developing the construction industry and multiplying that economic output into related industries.

of adequate support for businesses and approved establishment of a joint working group on import substitution to facilitate more effective cooperation within existing production chains.²⁸⁹

On 26 May 2022, Deputy Prime Minister Overchuk announced that the government has exempted 1,300 products from import duties, increased the duty-free threshold to purchases valued up to EUR1000 and cut red tape on essential goods.²⁹⁰ The government has also launched “preferential loan programmes” for importers to purchase products. The country will share the related risks with importers to encourage banks to provide greater access to capital.

On 30 May 2022, First Deputy Prime Minister Andrei Belousov met with Secretary-General of the United Nations Conference on Trade and Development Rebeca Grynspan.²⁹¹ They discussed Russia’s ability to supply food and fertilizer to the international market, which is currently experiencing a shortage.

On 2 June 2022, Deputy Prime Minister Alexander Novak co-chaired in the 29th meeting of members and non-members of the Organization of Petroleum Exporting Countries. The parties decided to increase oil production in July and August 2022 using September quotas by 432,000 barrels daily. The decision is said to stabilize the oil market amid growing demand due to eradication of COVID-19-related limitations.²⁹²

On 16 June 2022, Deputy Prime Minister Novak held a working breakfast with business representatives from Russia and Turkey.²⁹³ During the event, Novak emphasized the need for developing Russia-Turkey business partnership and lowering administrative barriers and measures to improve working conditions for Turkish businesses in Russia. He said, “Russia has made significant investments in Turkey. New opportunities are opening up for economic dialogue between Russia and Turkey, which could become a major trade and logistics hub for delivering products to and from Russia.”

On 17 June 2022, Deputy Prime Minister Yury Borisov and Executive Vice President and Minister for Economy, Finance and Foreign Trade of Venezuela Delcy Rodriguez met at the International Economic Forum.²⁹⁴ They spoke about increasing bilateral trade in areas of healthcare, industry and agriculture.

On 17 June 2022, Deputy Minister Overchuk met with First Deputy Minister of Light Industry of Iran Alirez Pak on margins of the Saint-Petersburg Economic Forum. The parties discussed cooperation in transport and logistics and further deepening of economic exchanges within the EEU.²⁹⁵

On 22 June 2022, Prime Minister Mishustin introduced changes made to policies already implemented by the government.²⁹⁶ He announced a reduction to the “low-cost mortgage rate” from nine to seven per cent. Furthermore, he announced a RUB5 trillion investment toward the construction of modern motorways in the country to facilitate the reconstruction of supply chains and help businesses deliver goods faster and cheaper.

On 7 July 2022, Prime Minister Mishustin announced measures to discourage anti-market behaviour and encourage the provision of technical education.²⁹⁷ The government drafted “antimonopoly legislation,” which is projected to come into law in March 2023. The legislation aims to identify and prevent companies from price gouging. The government also seeks to provide tax incentives to companies offering free vocational education to college students and other trainees. These companies will be able to write-off as much as 100% of the costs as a deduction.

On 6 August 2022, Russia and China met at the 25th meeting of the Economic and Trade Cooperation Sub-committee of the China-Russia Prime Ministers’ Regular Meeting Committee.²⁹⁸ The two sides discussed views concerning the development of bilateral trade, the strengthening of cooperation in emerging and key areas and the promotion of trade and investment facilitation. They reached several consensuses, which included encouraging sustainable growth through maintaining foreign trade relations.

On 18 August 2022, Minister Manturov and Advisor to the Indian Prime Minister Ajit Doval explored collaborative opportunities between the two countries.²⁹⁹ Typical economic trade relationships were reviewed in addition to similar auxiliary areas of interest including the use of space.

On 31 August 2022, Economic Development Minister Maxim Reshetnikov detailed Russia’s main economic plans spanning to the end of the decade.³⁰⁰ The government seeks to overcome recent sanctions to alleviate the current recession and promote sustainable growth. They plan to achieve this by generating domestic investment demand. The financial system will also be supported to create greater confidence in Russian markets. The ultimate objective is to bring stability while developing greater technological independence.

On 19 September 2022, Prime Minister Mishustin introduced several new policies adopted by the government to support its domestic agricultural sectors.³⁰¹ Primarily, the government will be offering preferential loans to farmers and constructors of agricultural infrastructure. Additionally, in an effort to support the residents and promote the development of the agricultural sector in the region, RUB1.3 billion will be invested into housing, education, IT, transportation and entertainment in seven Russian regions in the Far East. The government expects all of these policies to work in conjunction to sufficiently meet national demand for food and develop greater independence agriculturally.

Saudi Arabia: +1

Saudi Arabia has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 9 November 2021, the Capital Market Authority announced that non-Saudis were allowed to invest in assets within Makkah and Madinah.³⁰³ This is part of the National Investment Strategy that will help increase foreign direct investment.

On 16 November 2021, Saudi Arabia announced the establishment of OXAGON, the largest industrial complex in the world.³⁰⁴ The OXAGON will strengthen long-term financial resilience and support inclusive growth in an environmentally friendly way.

On 12 December 2021, the Ministry of Finance launched the Fiscal Sustainability Program that aims to diversify Saudi Arabia's economic production beyond oil-related industries.³⁰⁵ By investing in other industries the program will help bolster the country's financial resilience and yield stable future economic growth rates.

On 13 December 2021, Saudi Arabia announced an investment of more than USD3.2 trillion to diversify its economy.³⁰⁶ Saudi Arabia aims to attract this foreign investment over the next nine years in new sectors such as green hydrogen, renewable energy and information technology. There are 300 legislative reforms being made to assist in opening up the economy.

Assembly.³¹⁸ The country's participation deals with discussing strategies and policies to promote economic and health recovery from global crises, in addition to holding a number of bilateral meetings with foreign ministers, therefore encouraging sustainable growth through strengthening global economic networks.

On 21 September 2022, the Tourism Development Fund signed a memorandum of understanding with the Saudi Endeavor Network with the aim of enhancing opportunities for cooperation between the two parties in supporting and empowering local and international entrepreneurs in the tourism sector.³¹⁹ The aim to create high-quality projects for tourist destinations by increasing opportunities for entrepreneurs, thereby boosting the economic development of the country, promotes financial resilience and strong capital flows.

Saudi Arabia has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth through economic stability, including through promoting sustainable capital flows. Through the launch of the Fiscal Sustainability Program and the signing of the Memorandum of Understanding with the KAUST and AITamayyuz Finance and Accounting Excellence Academy, it has promoted both financial resilience, domestic investment, and inclusive growth. Further, promise of sustainable growth trends appear evident in near-double digit growth of the country's GDP due to increased trade activity.

Thus, Saudi Arabia receives a score of +1.

Analyst: Kaamilah Moola

South Africa: 0

South Africa has partially complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 1 February 2022, Minister of Higher Education, Science and Innovation Blade Nzimande announced that all eligible applicants to the National Student Financial Aid Scheme (NSFAS) bursary will receive funds for completing their education.³²⁰ The objective of the NSFAS is to improve access to higher education for low-income households.

On 10 February 2022, President Cyril Ramaphosa announced the introduction of a redesigned loan guarantee scheme to “enable small businesses to bounce back from the pandemic and civil unrest.”³²¹ The scheme will promote inclusive growth and ensure sustainable capital flows for small businesses.

On 13 May 2022, Minister Enoch Godongwana announced that “Operation Vulindlela” was moving forward successfully. The operation intends to “modernize and transform network industries including electricity, water, transport and digital communications.”³²²

On 31 May 2022, Minister Godongwana and the Minister of Mineral Resources and Energy Gwede Mantashe extended the temporary reduction in the general fuel levy.³²³ From 1 June 2022 to 6 July 2022, the price per liter would be ZAR1.50, with further downward adjustments to the price the following month to soften the influence of higher fuel prices on corporations and households.

On 29 June 2022, the National Treasury issued a floating rate note to continue supporting national debt capital markets and diversified portfolios.³²⁴ To manage debt, the National Treasury plans to monitor the associated risks and costs with the new servicing of floating-rate debt.

On 6 July 2022, the government transferred the first tranche of the “Local Government Equitable Share” to the country’s municipalities.³²⁵ This will help municipalities fund the delivery of free basic services to lower income households and subsidize the cost of administration and other core services.

On 18 August 2022, the National Treasury and the Financial Sector Conduct Authority launched “Money Smart Week South Africa 2022 (MSWSA 2022).”³²⁶ The aim of MSWSA 2022 is to increase awareness and provide education on financial well-being to South Africans.

South Africa has partially complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. The country has taken some action to support inclusive growth and promote sustainable capital flows. But it has failed to take sufficient action to build financial resilience.

Thus, South Africa receives a score of 0.

On 2 February 2022, the government announced the flagship “Levelling Up White Paper,” which will lead to 200,000 more people successfully completing high-quality skills training and 80,000 more people completing training in low-skilled areas by 2030 in England.³³⁹ The purpose of this document is to transform the UK by “spreading opportunity and prosperity” across the country and promoting inclusive growth.

On 7 February 2022, the government launched a new task force led by the Institution of Civil Engineers focused on career promotion and securing new opportunities for the next generation of talent in the transport sector.³⁴⁰

On 10 March 2022, the government launched a new series of loans totalling GBP150 million to support “innovative” small and medium-sized enterprises.³⁴¹ The new initiative builds on the successful program that provided GBP163 million and provides financial support to businesses that is available at all stages of innovation.

On 24 March 2022, International Trade Secretary Anne-Marie Trevelyan met with Canada’s Minister for International Trade, Export Promotion, Small Business and Economic Development Mary Ng to announce the launching of negotiations on a new free trade agreement between the two countries.³⁴² The new agreement will focus on promoting development in areas such as innovation, digital, data, the environment and women’s economic empowerment.

On 29 March 2022, the government launched the African Continental Free Trade Area (AfCFTA) Support Programme, which provides GBP35 million to support the negotiations and implementation of the AfCFTA.³⁴³ The goal of the AfCFTA is to create jobs, lift 30 million people out of extreme poverty and provide new opportunities for businesses across Africa and the UK.

On 6 April 2022, the Trade Remedies Authority launched a “Tariff Rate Quota” review on steel imports that are part of the country’s “safeguard trade remedy measure.”³⁴⁴ The goal of this reassessment is to adjust the tariff rate to ensure a steady supply of steel.

On 25 April 2022, the government announced measures to remove all tariffs under the UK-Ukraine trade deal to support Ukraine in its conflict with Russia.³⁴⁵ This announcement comes after the Government of Ukraine's request to liberalise tariffs to support the Ukrainian economy.

On 28 April 2022, the government began work for a new "enhanced trade deal" with Switzerland by launching an eight-week consultation with businesses and the public for their views prior to the start of negotiations between the two countries.³⁴⁶ The aim of the trade deal is to boost bilateral trade between the UK and Switzerland by breaking down trade barriers and increasing access to the Swiss market for UK companies.

On 12 May 2022, the government reached an agreement with the Government of Wales to establish a new Welsh Freeport with GBP26 million in funding.³⁴⁷ The aim of the Freeport is to increase high quality secure jobs and investment to boost the Welsh economy.

On 15 June 2022, the government launched a campaign to recruit a skilled workforce in the logistics sector and a GBP7 million investment for new freight technology to ensure a robust supply chain.³⁴⁸ The campaign forms a part of the "Future of Freight" plan, which seeks to ensure the "seamless flow" of freight across the country's roads, railways, seas, skies and canals.

On 18 June 2022, the government announced funding of GBP15 million to develop nine "Restoring Your Railway" schemes.³⁴⁹ This action aims to reopen disused railway lines, services and stations to improve access to jobs, homes and education.

On 15 July 2022, the government opened applications for the second round of the "Levelling Up Fund."³⁵⁰ The second round aims to build on the success of the first round by continuing to empower communities by boosting local transport lines, creating jobs and helping local businesses and entrepreneurs.

On 2 September 2022, Australia and the UK met to discuss ways of reinforcing the Australia-UK bilateral economic and trade partnership.³⁵¹ Both stressed the significance of the Australia-UK Free Trade Agreement and its role in liberalising trade and creating jobs.

On 28 April 2022, the Department of Treasury announced plans to provide USD300 million of State Small Business Credit Initiative Technical Assistance funding to small businesses in the country.³⁵⁷ The aim of this funding is to support “underserved entrepreneurs and very small business owners” in overcoming barriers such as limited access to capital and lack of a technical support network.

On 4 May 2022, the Board of Governors of the Federal Reserve System decided to raise the target range for the federal funds rate to 3/4 to one per cent.³⁵⁸ The interest rate targeting goal is to improve financial resilience and sustained capital flows by controlling inflation and balancing the effect of supply chain disruptions.

On 9 May 2022, Secretary of Commerce Gina M. Raimondo announced the suspension of 232 tariffs on Ukrainian steel for one year.³⁵⁹ The Ukrainian steel industry is “uniquely important” to the country’s economic strength and, as such, the aim of this suspension is to create export opportunities for steel mills in Ukraine.

On 19 May 2022, Secretary Raimondo announced that she will join President Biden on a visit to Korea and Japan to deepen economic ties between the three countries.³⁶⁰ She plans to discuss the future of economic cooperation between the US and the Indo-Pacific region, particularly in relation to the production of semiconductors and the opening of supply chains.

On 16 June 2022, the US Department of Labor announced a USD200 million funding to support training and employment services in 45 states and Puerto Rico to workers affected negatively by foreign trade.³⁶¹ The program will “support training, employment and case management services, job search and relocation allowances and income support during training.”

On 28 July 2022, Congress passed the Chips and Science Act, which is designed to promote research, investment and advanced manufacturing.³⁶² The passing of this act will help to create more jobs across the country while reducing the price of commodities and reducing the effects of inflation.

On 29 July 2022, Secretary Raimondo and Japan’s Minister of Economy, Trade, and Industry Koichi Hagiuda met following the inaugural Economic Policy Consultative Committee to discuss bilateral

initiatives such as the Japan-US Commercial and Industrial Partnership.³⁶³ This partnership seeks to continue support for the Indo-Pacific Economic Framework for Prosperity (IPEF) and aims to achieve high-standard outcomes that promote inclusive economic prosperity for all IPEF members.

On 15 August 2022, the Federal Reserve Board announced its final guidelines for reviewing request to access Federal Reserve accounts and payment services.³⁶⁴ This revised guideline is designed to improve the consistency and the transparency of capital flows.

On 25 October 2022, Secretary of Commerce Gina Raimondo met with Indonesian Minister for Economic Affairs Airlangga Hartarto and Minister of Industry Agus Gumiwang Kartasasmita.³⁶⁵ During the meeting, Indo-Pacific Economic Framework for Prosperity (IPEF) and improving bilateral trade relations were discussed.

The United States has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including promoting sustainable capital flows. The member has taken decisive action to promote inclusive growth, economic stability, and sustainable capital flows.

Thus, the United States receives a score of +1.

Analyst: Han Wang

European Union: +1

The European Union has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows.

On 15 December 2021, the European Commission launched a public online platform called the “Recovery and Resilience Scoreboard.”³⁶⁶ The platform shows the individual national recovery, resilience plans and the progress made in the implementation of the Recovery and Resilience Facility (RRF). The RRF was designed in 2021 to finance reforms and investments in member states from the beginning of the pandemic in February 2020 until 31 December 2026. On behalf of the European Union, the European Commission will borrow on the capital markets to finance the “NextGenerationEU” economic recovery package.

On 15 December 2021, the European Economic and Social Committee President Christa Schweng met with the Chairman of the China Economic and Social Council Zhang Qingli.³⁶⁷ During the meeting, they discussed post-COVID economic recovery and possible cooperation between the

European Union and China based on trade agreements, investment agreements and other forms of partnerships. Further, they committed to jointly promoting basic values, including rights, freedom and dignity of human beings when engaging in future agreements.

On 28 January 2022, the European Investment Fund (EIF) and Bank of Valletta signed an agreement to provide an additional EUR28 million to support the business needs of small and medium-sized companies (SMEs) in Malta.³⁶⁸ This funding aims to provide loans over the next two years to help entrepreneurs recover from economic difficulties caused by the COVID-19 pandemic.

On 31 January 2022, the European Investment Bank (EIB) and the European Free Trade Agreement (EFTA) council renewed a new envelope of EUR800 million for investments in four EFTA countries: Iceland, Norway, Switzerland and Liechtenstein.³⁶⁹ The investment envelope will be available until 31 December 2025, following the conclusion of the previous EUR1 billion envelope, which ended in 2021. The new investment is in response to increased shared interests among the four EFTA countries in financing climate-related and sustainability projects.

On 1 February 2022, the European Parliament's Committee on Budgets approved France's request for financial support from the European Globalization Adjustment Fund for Displaced Workers (EGF).³⁷⁰ The committee has agreed to provide EUR3.7 million in aid to 297 Airbus employees who have lost their jobs because of the COVID-19 pandemic in France. According to Airbus, the full recovery of the aviation sector is not expected to happen before 2025, thus the aid will help finance training on how to create a business and gain access to start-up grants.

On 9 February 2022, the EIB and Citi signed a EUR350 million trade finance partnership in Athens, Greece.³⁷¹ This partnership is the third expansion of the EIB's Trade Finance Facility program totalling EUR550 million. The initiative will support the trade and export finance services of internationally active private companies in Greece to enhance their access to global markets.

On 21 February 2022, the European Council announced that it will provide EUR1.2 billion of financial assistance in the form of loans to Ukraine.³⁷² The goal of the emergency macro-financial assistance operation is to promote stability and strengthen Ukraine's resilience.

On 4 April 2022, the European Council announced that it will provide a macro-financial assistance operation of EUR150 million to benefit Moldova.³⁷³ The assistance comes in the form of loans and

grants to strengthen Moldova's resilience, cover Moldova's balance of payments as identified in the International Monetary Fund and support Moldova's economic stabilisation and reform agendas.

On 12 May 2022, the European Council released a joint statement with Japan to reaffirm a close and comprehensive partnership based upon the EU-Japan Economic Partnership Agreement and the Strategic Partnership Agreement.³⁷⁴ These agreements cover shared values of respect for human rights, freedom, open, free and fair trade, multilateralism and the rules-based international order. The leaders have agreed to strengthen EU-Japan cooperation on humanitarian aid in response to Russia's aggression towards Ukraine, deepen political, economic and security dynamics with China and launch the EU-Japan Digital Partnership to advance cooperation on digital issues to foster economic growth and achieve a sustainable society that is inclusive.

On 16 May 2022, the European Commission approved a EUR2 billion Greek scheme to provide investment support for a sustainable recovery.³⁷⁵ The scheme was approved under the "Temporary Framework" State aid to help approximately 250 Greek companies with a faster and more sustainable recovery, in line with the Greek Recovery and Resilience Plan.

On 24 May 2022, the European Council adopted a regulation allowing for temporary trade liberalisation and other trade concessions regarding certain Ukrainian products to support Ukraine's economy.³⁷⁶ This regulation suspends all import duties for Ukrainian exports to the EU for a period of one year, which includes all tariffs under 'Title IV of the Association Agreement' between the EU and Ukraine.

On 1 June 2022, the European Commission endorsed Poland's EUR35.4 billion recovery and resilience plan under the Recovery and Resilience Facility (RRF).³⁷⁷ This endorsement will allow Poland to recover faster and stronger from the COVID-19 pandemic and progress with green and digital transitions. The RRF is an important part of the previously introduced "NextGenerationEU" economic recovery package that will provide up to EUR800 billion in support investments and reforms across the EU.

On 3 June 2022, the European Investment Bank collaborated with Zimbabwe's First Capital Bank Limited to secure a developmental line of credit totalling EUR12.5 million.³⁷⁸ The line of credit will aid the development of SMEs and midcap companies' investment projects. The funding primarily aims to increase economic growth through employment creation, commerce upliftment and promotion of environmentally responsible businesses.

On 7 June 2022, the European Commission proposed an annual EU budget of EUR185.6 billion for 2023, which will be complemented by a grant of approximately EUR113.9 billion under “NextGenerationEU.”³⁷⁹ The budget aims to mobilize significant investments in order to boost Europe’s strategic autonomy, safeguard sustainability, promote economic recovery and create jobs.

On 15 June 2022, Commission President Ursula von der Leyen and Egyptian President El Sisi issued a joint statement in support for greater cooperation between Egypt and the EU on matters of energy, climate and green transition.³⁸⁰ The partnership will focus on renewable energy sources, hydrogen, and energy efficiency.

On 16 June 2022, the Council adopted a recommendation to support policies which promote learning for the green transition and sustainable development.³⁸¹ According to the recommendations, new learning opportunities will be provided in formal and informal settings. Further, educators will be able to take part in professional development programmes related to sustainability.

On 6 July 2022, the EIB and Banque Misr agreed to enhance cooperation to further strengthen support for SMEs in Egypt.³⁸² The support will increase financing for companies in sectors most impacted by the COVID-19 pandemic to help smaller companies grow, create jobs and gain new business opportunities.

On 8 July 2022, the EIB and Cassa Depositi e Prestiti signed three agreements to further strengthen their partnership and to support the Italian economy.³⁸³ The goal of this partnership is to promote public and private investment in Italy, improve the selection and financing of green projects and generate over EUR1 billion in new financing for public entities, especially in the south of Italy.

On 18 July 2022, the Council adopted a temporary trade liberalization regulation in seven Moldovan agricultural products due to the impact of Russia’s invasion of Ukraine on Moldova.³⁸⁴ This trade liberalization will allow Moldova to double its exports of the seven products for one year to the EU without any tariffs, which will support the stabilization of Moldova’s economy.

On 25 July 2022, the EIB Board with the support of the European Commission approved an additional EUR1.59 billion of financial support for Ukraine.³⁸⁵ The additional support aims to address Ukraine’s infrastructure financial gap, strengthen the country’s resilience and maintain its economic stability.

On 25 July 2022, the Commission allocated EUR31.5 billion from the EU Cohesion Policy to Romania in 2021-2027.³⁸⁶ The funds will promote the economic, social and territorial cohesion of the country and its green and digital transition as well as the development of a competitive, innovative and export-oriented economy.

On 1 August 2022, the Commission disbursed EUR50 million in Macro-Financial Assistance (MFA) to Moldova.³⁸⁷ The financial assistance is available for two and a half years and consists of EUR35 million in long-term loans on concessional terms and EUR15 million in grants. The MFA aims to help Moldova address its urgent financing needs and support its overall macroeconomic stability due to the negative impact the country has experienced from Russia's invasion of Ukraine along with pre-existing challenges and imbalances from the COVID-19 pandemic.

On 8 September 2022, the European Commission endorsed EUR4.7 billion in grants to the Netherlands under the Recovery and Resilience Facility.³⁸⁸ This financing will support the implementation of crucial investments and reform measures outlined in Netherlands' 'recovery and resilience plan' and enable the Netherlands to recover stronger from the COVID-19 pandemic.

On 20 September 2022, the European Council adopted the decision to provide an additional EUR5 billion in macro-financial assistance to Ukraine.³⁸⁹ This financial assistance will be provided in the form of "highly concessional long-term loans" to support Ukraine's macro-financial stabilisation, strengthen the immediate resilience of the country and sustain its capacity towards recovery.

On 4 November 2022, the European Commission approved a DKK 10 billion Danish scheme to support energy intensive companies.³⁹⁰ This aid to be administered by the Danish Business Authority will take the form of loans with subsidized interest rates for energy intensive SMEs'.

The European Union has fully complied with its commitment to strengthening long-term financial resilience and supporting inclusive growth, including through promoting sustainable capital flows. It has taken strong action in promoting greater recovery from the COVID-19 crisis, while ensuring sustainable and inclusive growth through the platform Recovery and Resilience Scoreboard, measures to improve cooperation with China, funding of SMEs in Malta and the Republic of Moldova, renewed investments, increased financial assistance for aerospace workers in France, strengthening trade finance partnerships and implementing trade liberalizations to support Ukraine's economy.

Thus, the European Union receives a score of +1.

Background

The G20 leaders first addressed the issue of inclusive economic growth at the 2014 Brisbane Summit, calling for two per cent of economic growth to be directed towards supporting “development and inclusive growth” and helping “to reduce inequality and poverty” by 2018.³⁹¹

At the 2015 Antalya Summit, G20 leaders agreed that inclusive growth requires “the use of all policy tools and strong engagement with all stakeholders” and that inclusive growth should be “inclusive, job-rich” and benefit “all segments of our societies.”³⁹² The issue of using “all policy tools” to work towards bolstering inclusive growth has remained a priority since the Antalya Summit.

At the 2016 Hangzhou Summit, G20 leaders further committed to advancing “sustainable, balanced, and inclusive growth,” outlining in the Hangzhou consensus policies and actions that members should take to promote inclusive growth. The actions and policies outlined followed four main themes: vision, integration, openness and inclusiveness. These four themes lay the foundation of what inclusive growth

³⁹¹ G20 Leaders' Communique, RANEP (Moscow) 16 November 2014. Access Date: 13 December 2021. <https://www.ranepa.ru/images/media/g20/2014brisbane/G20%20Leaders%E2%80%99%20Communicu%C3%A9%20Brisbane%20Summit,%2015-16%20November%202014.pdf>

³⁹² G20 Leaders' Communique. Antalya Summit 15-16 November 2015, RANEP (Moscow) 16 November 2015. Access Date: 13 December 2021. <https://www.ranepa.ru/images/media/g20/2015Antalya/000111117.pdf>

would look like moving forward, including sustainability, cooperation, fairness and removing inequalities in the international economic system.³⁹³

At the 2017 Hamburg Summit, G20 leaders reiterated their commitment to inclusive growth, stating that “strong, sustainable, balanced and inclusive growth ... remains our highest priority.” Once again, leaders committed to using “all policy tools” in advancing inclusive growth. The leaders also focused on international investment, digitalization, empowering women and equal access to financial and economic systems as important components of promoting inclusive growth. The G20 Africa Partnership was also discussed as a vehicle to advance and promote inclusive growth amongst African economies.³⁹⁴

At the 2018 Buenos Aires Summit, G20 leaders continued the theme of prior summits by committing to “use all policy tools to achieve strong, sustainable, balanced, and inclusive growth.” One of the summit’s priority areas, infrastructure, was also promoted as a significant factor in advancing inclusive growth.³⁹⁵ In the Buenos Aires Action Plan, G20 leaders outlined the primary areas to focus and improve on in promoting inclusive growth, and also offered previously implemented measures in areas such as tax, education, social security reform, financial regulation and labour that had a positive impact on advancing inclusive growth.³⁹⁶

The central theme of using “all policy tools” to achieve inclusive growth continued at the 2019 Osaka Summit, where G20 leaders reaffirmed their committed to use them “to achieve strong, sustainable, balanced and inclusive growth, and safeguard against downside risks, by stepping up our dialogue and actions to enhance confidence.” G20 members identified that “carefully calibrated macroeconomic and structural policies tailored to country-specific circumstances” are imperative in order to achieve this commitment. In addition, central banks were included as vital actors in promoting inclusive growth and safeguarding against “downside risks,” and leaders called upon central banks to promote “flexible and growth-friendly” fiscal policies to maintain stability and sustainability on the path to inclusive growth.³⁹⁷

In 2020, amid economic constraints put by the COVID-19 pandemic, G20 leaders highlighted the necessity to provide sustainable capital flows and foster domestic capital markets development to ensure economic recovery and growth after the pandemic is over.³⁹⁸

https://www.ranepa.ru/ciir/sfery-issledovaniy/gruppa-dvadtsati/dokumenty-gruppy-dvadtsati/saudovskoe-predsedatelstvo-2020/G20%20Riyadh%20Summit%20Leaders%20Declaration_EN.pdf

At the 2021 Rome Summit, the leaders retained the priority of developing local currency capital markets as a means to strengthen long-term financial resilience and support inclusive growth.³⁹⁹

Commitment Features

The commitment requires the G20 members to develop local currency capital markets. The “capital market” generally refers to “an organized market that provides facilities for dealing in stocks and shares and through which (along with special financial institutions dealing therein) new capital could be raised by the offer of securities to the public.”⁴⁰⁰ “Local currency” in this context refers to the domestic market of a particular jurisdiction, which operates using its national currency. “Development” refers to “process in which someone or something grows or changes and becomes more advanced.”⁴⁰¹ “Resilience” is defined as the “ability to recover from or adjust easily to misfortune or change.”⁴⁰² In the context of this commitment, financial resilience refers to the ability of the financial markets to recover from negative impacts. “Inclusive growth” is defined by the OECD as “economic growth that is distributed fairly across society and creates opportunities for all.”⁴⁰³

The G20 members are required to take actions that make their domestic capital markets stronger against economic constraints caused by the COVID-19 pandemic. As it is proposed by the Bank for International Settlements,⁴⁰⁴ possible actions may include, but are not limited to:

- Strengthening legal and judicial systems for investor protection. For example, easing access to legal recourse; lowering litigation costs; promoting well defined property and contracting rights; giving minority shareholders more information and access to information, etc.
- Enhancing regulatory independence and effectiveness, that implies strengthening legal foundations to raise operational independence; ensuring adequate staffing and resources; raising disclosure and accounting standards, etc.
- Deepening the domestic institutional investor base. This aspect refers to provision of tax benefits for institutional investors; increasing transparency and investors education to facilitate effective choices among investment options, etc.
- Pursuing bi-directional opening to international participation while preparing for spillovers that implies lifting barriers to foreign participation; implementation of policies aimed at reduction of spillover risks, etc.

This commitment has a depth component of how strong the action taken by the G20 member is. A G20 member must take significant action to register full compliance. For strong actions, a G20 member would have to initiate a program or new law, and/or contribute financial or technical resources to develop local

currency capital markets in line with at least one of the aforementioned action areas.⁴⁰⁵ Weak actions for partial compliance could include verbal reaffirmation of the commitment or attending meetings that discuss relevant issues.

Scoring Guidelines

-1	G20 member has not taken any actions to develop local currency capital markets
0	G20 member has only taken weak actions to develop local currency capital markets
+1	G20 member has taken strong actions to develop local currency capital markets

Compliance director: Alexander Ignatov

Lead analyst: Andrey Sheleпов

Argentina: +1

Argentina has fully complied with the commitment to develop local currency capital markets.

On 20 December 2021, the Ministry of Finance based on the premise of further strengthening local currency financing offered a diverse basket of instruments with a monetary value of approximately ARS429 million, achieving a refinancing rate of 149 per cent.⁴⁰⁶

On 21 December 2021, Minister of Agriculture, Livestock and Fisheries Julián Domínguez launched bonus rate financing for livestock producers and the meat industry amounting to ARS100 billion. According to him, “the aim is to finance increased production, boost exports and industrial capacity and suitability in meat, milk and its by-products.”⁴⁰⁷

On 27 December 2021, President Alberto Fernández headed the signing of a new “Fiscal Consensus for 2022” with governors from all over the country. This initiative aims to create a tax structure oriented towards encouraging investment, economic growth, formal employment in the private sector and narrowing the gap in economic and social development between different regions of the country.⁴⁰⁸

On 30 December 2021, the Central Bank of the Argentine Republic (BCRA) under the “Special Regime for the Creation of SME Mutual Funds” allowed financial institutions to invest in mutual funds for small and medium-sized enterprises (SMEs). This measure aims to stimulate SME financing through direct credit lines as well as through the capital market.⁴⁰⁹

On 30 December 2021, the BCRA approved the “Objectives and plans for 2022” in the field of monetary, financial and foreign exchange policy. They aim to prevent imbalances that could directly or

indirectly affect the economy, maintain external competitiveness, and ensure sufficient liquidity and solvency for financial institutions.⁴¹⁰

On 6 January 2022, the BCRA adopted a set of measures to realign monetary policy instruments to support the recovery and improve monetary, exchange rate and financial stability conditions. Such decisions are designed to realign the interest rate framework and optimize systemic liquidity management.⁴¹¹

On 3 March 2022, the BCRA has simplified access to the forex market for importers. The measure “gives priority to the use of foreign currency in the Argentine economy within a scheme based on maximizing its social and economic impact, and aims at building up international reserves to strengthen the monetary and foreign exchange policy.”⁴¹²

On 27 April 2022, Minister of Productive Development Matías Kulfas announced financing tools for ARS16 billion to deepen financial inclusion and improve the conditions of access to credit for more micro, small and medium enterprises, small businesses and enterprises.⁴¹³

On 12 May 2022, Minister Kulfas signed an agreement to implement a financing package for a total amount of ARS18 billion for micro, small and medium-sized enterprises. This initiative means financing SMEs to make them more competitive in the development, to generate more employment, more productive activity and contribute to a more solid macroeconomic system. The agreement also provides for the launch of a line of microcredits, which will finance working capital and investments for the purchase of tools, equipment, materials and inputs.⁴¹⁴

On 24 May 2022, President Fernandez announced the Foreign Exchange Access Regime for the hydrocarbon sector to encourage investment and production, facilitate companies’ access to special equipment and create new foreign exchange rules. This initiative determines the creation of Regime for Access to Foreign Exchange for Incremental Oil Production; Regime for Access to Foreign Exchange for Incremental Natural Gas Production; Regime for the Promotion of Employment, Labour and the Development of Regional and National Suppliers of the Hydrocarbons Industry.⁴¹⁵

On 2 June 2022, the BCRA has created a foreign exchange availability scheme for service exporters. Individuals who export services are able to dispose of up to ARS12,000 a year in accounts in local

financial institutions without the requirement of settlement in pesos. The benefit is extended to companies in the sector, which will have foreign currency available for the payment of wages for a percentage of the increase in foreign sales.⁴¹⁶

On 13 June 2022, Minister of Economy Martín Guzmán announced a progressive tax rate on copper exports, which aims to encourage production and exports. The new optional regime will allow the replacement of the current 4.5 per cent rate with a variable rate, ranging from 0 to 8 per cent. In this sense, an optional regime will be established so that new copper investments that wish to replace the fixed rate currently in force (4.5 per cent) can opt for a progressive export duty scheme based on price.⁴¹⁷

On 29 July 2022, the National Securities Commission issued legislation that introduced a series of changes and improvements that impact the guaranteed and non-guaranteed financing regime through higher issuance amounts and better access to information. The measure seeks to provide investors with relevant information regarding the situation of the guarantee entities that operate in the capital market through the modification of the current Guarantee Entities Regime.⁴¹⁸

Argentina has taken strong actions to develop local currency capital markets. The government partly strengthened legal and judicial system by adopting initiative to create a tax structure oriented towards encouraging investment, economic growth, formal employment in the private sector and simplifying access to the forex market for importers. Argentina adopted a set of measures to realign monetary policy instruments in order to continue to support the recovery and improve monetary, exchange rate and financial stability conditions.

Thus, Argentina receives a score of +1.

France has fully complied with the commitment to develop local currency capital markets.

On 19 January 2022, Minister of Higher Education, Research and Innovation Frédérique Vidal, Minister Delegate in charge of Industry Agnès Pannier-Runacher, Secretary of State for Digital Transition and Electronic Communications Cédric O and Secretary General for Investment Guillaume Boudy detailed the public support strategy for industrial and deep tech start-ups. Resulting from the France 2030 plan, this strategy will remove the obstacles that hinder the emergence, innovation and industrialization of start-ups in France. Since 2017, government policy has made support for industrial and deep tech start-ups a priority. EUR3.25 billion are mobilized between 2021 and 2025 for the ecosystem of start-ups and innovative companies on various mechanisms: innovation competitions, structuring R&D projects, the regionalized PIA or aid counters including deep tech aids. As part of France 2030, an additional EUR2.3 billion has been mobilized to support these start-ups through to industrialization and accelerate the emergence of high-density technology start-ups. This strategy will make it possible to concretize in the coming years the industrialization of the start-ups supported on our territory. This strategy is based on

Germany has fully complied with the commitment on developing local currency capital markets.

On 10 November 2021, the state-owned KfW development bank launched LAGreen, a new fund for environmentally and climate-friendly investments in Latin America and officially presented it to the public at the climate conference in Glasgow. LAGreen is a structured fund that prepares green bonds in cooperation with local issuers. Green bonds are fixed-interest bonds used by actors in climate finance, such as state and private banks or project developers of renewable energy projects. The bonds are assigned to environmentally friendly projects and are subject to binding and comprehensible criteria that are also monitored. The aim of the new fund is to mobilise private capital for climate-friendly investments and thereby contribute to achieving the Nationally Determined Contributions. A first investment in a green bond of a bank in Costa Rica had already been made. The bond proceeds will be used to finance a green real estate development project with sustainable use of industrial, office and commercial space.⁴³³

Indonesia has fully complied with the commitment to develop local currency capital markets.

On 12 November 2021, the Bank Indonesia (BI) reported it was taking steps to strengthen consumer protection by monitoring the conduct of service providers in the payment system, money market and foreign exchange market, cash services as well as other parties under the regulation and supervision of BI. Supervision and oversight are performed directly and/or indirectly concerning the behavior of service providers based on a market conduct approach focusing on the design, compilation and presentation of information, product and/or service offerings and agreements as well as complaint handling and resolution. Supervising the conduct of service providers will complement existing prudential oversight at BI to simultaneously create and maintain financial system stability by safeguarding consumer protection. Strengthening consumer protection by monitoring market conduct will ensure implementation of the seven Consumer Protection Principles by service providers: (i) equity and fair treatment, (ii) disclosure and transparency, (iii) education and literacy, (iv) accountable business conduct, (v) protection of consumer assets against misuse, (vi) protection of consumer data and/or information, and (vii) effective complaint handling and resolution.⁴³⁵

On 17 November 2021, the BI reported issuance of regulations for Bank Indonesia-Fast Payment (BI-FAST) payment system infrastructure operated by Bank Indonesia to facilitate retail payments continuously (24/7) and in real time for nonbank financial institutions and other parties that meet the predetermined criteria. The regulation includes participant requirements, participant obligations, BI-FAST infrastructure management mechanisms and transaction processing using the BI-FAST system.⁴³⁶

On 15-16 December 2021, the BI's Board of Governors meeting was held with a number of important decisions made to maintain exchange rate and financial system stability, while supporting national economic recovery. In particular, it was agreed that (i) monetary policy in 2022 would be oriented towards maintaining stability, while pro-growth macroprudential and payment system policies would focus on driving economic growth together with money market deepening; (ii) rupiah exchange rate policy would be maintained to preserve stability in line with the currency's fundamental value and market mechanisms; (iii) strategy for monetary operations will be further strengthened to reinforce the effectiveness of the accommodative monetary policy stance.⁴³⁷

On 21 December 2021, the BI officially launched its BI-FAST payment system as backbone of retail payment system infrastructure moving forward, thus accelerating digitalization of the national economy and finance.⁴³⁸

On 24 December 2021, BI's National Working Group on Benchmark Reform released a practical guide on the London Inter-bank Offered Rate (LIBOR) transition for Indonesia market participant in order to support a smooth and orderly transition; the guide consists of background information concerning LIBOR discontinuation, timeline for LIBOR discontinuation, implication on LIBOR transition, as well as preparation guide and LIBOR transition recommendation as a reference for market participant. The LIBOR Transition Guide shall be a valuable information for market participant to address and prepare LIBOR transition, thereby maintaining financial system stability in Indonesia.⁴³⁹

On 28 January 2022, Minister of Finance Sri Mulyani, the BI's Governor Perry Warjiyo, Chairman of Financial Services Authority Board of Commissioners Mahendra Siregar and Chairman of Indonesia Deposit Insurance Corporation Board of Commissioners Heru Budiargo agreed joint commitments to strengthen synergy towards maintaining financial system stability and economic recovery momentum at the first Financial System Stability Committee meeting of 2022.⁴⁴⁰

On 1 March 2022, the BI amended the Macroprudential Inclusive Financing Ratio for conventional commercial banks, sharia banks and sharia business units; the amendment was a follow-up action to the Board of Governors Meeting in January 2022 taken to strengthen the accommodative macroprudential policy stance in 2022 by increasing bank loans/financing to the corporate sector, thus reinforcing the national economic recovery and maintaining financial system stability.⁴⁴¹

On 16-17 March 2022, BI's Board of Governors meeting was held with a number of important decisions made to maintain exchange rate and financial system stability, while supporting national economic recovery. In particular, it was agreed that (i) exchange rate policy would be strengthened to maintain rupiah stability in line with market mechanisms and economic fundamentals, (ii) the availability and distribution of rupiah currency throughout the archipelago will be safeguarded, and (iii) Payment System Providers would be prepared for National Open API Payment Standard implementation to support interlinkages between the banking and FinTech industries.⁴⁴²

On 25 June 2022, the Indonesian Financial Services Authority (OJK) enacted regulation concerning Consumer and Public Protection in the Financial Services Sector (POJK 6 of 2022). The POJK came into force on 18 April 2022, but micro-financial institutions are exempted for the next five years. The newly enacted POJK provides a comprehensive legal framework for consumer protection by taking into account the life cycle of financial products — including their design, the provision and delivery of information, marketing, the drafting of agreements, the offering of financial services and compliance

settlements. This new approach means that financial institutions may face additional regulatory requirements and obligations when conducting business.⁴⁴³

On 22 September 2022, the OJK issued three new regulations to create orderly, fair, and efficient capital market activity while protecting the interests of investors and the public. The first regulation stipulates the mechanism for stock splits and reverse stock splits by public companies. If the shares of a public company are listed on the Stock Exchange, the public company must obtain principal approval for any planned stock splits or reverse stock splits from the Stock Exchange where the public company is listed. The second regulation serves as a guideline for investment managers to avoid misconduct in terms of investment manager independence while helping to ensure rational investment decisions, appropriate conduct in terms of securities transactions in the interest of the customer, the marketing of investment products, information disclosure regarding investment products, as well as relating to the receipt of gifts and other benefits. The third regulation stipulates that Issuers or Public Companies with an effective registration statement must submit Periodic Financial Statements to OJK and publish them to the public. Periodic Financial Statements must be submitted via the OJK electronic reporting system.⁴⁴⁴

Indonesia has taken strong actions to develop local currency capital markets.

Thus, Indonesia receives a score of +1.

Analyst: Pavel Doronin

Italy: -1

Italy has failed to comply with the commitment to develop local currency capital markets.

No information on Italy's steps to develop local currency capital markets made during the monitoring period was found.

Thus, Italy is awarded a score of -1.⁴⁴⁵

Analyst: Andrei Sakbarov

Japan: +1

Japan has fully complied with the commitment to develop local currency capital markets.

During the compliance period, the Bank of Japan (BOJ) has held three Monetary Policy Meetings.

On 17 December 2021, decided that it was appropriate to extend the Special Funds-Supplying Operations to Facilitate Financing in Response to the Novel Coronavirus (COVID-19) by additional six months until September 2022; the decision covers both government-supported and non-government-supported loans to SMEs to provide liquidity. BOJ also decided to continue additional purchases of corporate papers and bonds, through starting from April 2022 the amounts of purchases

⁴⁴⁴ OJK Issues 3 New Regulations to Strengthen Capital Market, OJK International Information Hub (Jakarta) 22 September 2022. Access Date: 1 October 2022. <https://www.ojk.go.id/iru/policy/detailpolicy/9460/press-release-ojk-issues-3-new-regulations-to-strengthen-capital-market>

⁴⁴⁵ This non-compliance was determined after searching the following websites: <https://www.governo.it/en>, <https://www.bancaditalia.it/homepage/index.html?com.dotmarketing.htmlpage.language=1>, <https://senato.it/en/parliamentary-business/parliament>, <https://www.gazzettaufficiale.it>, <https://www.mef.gov.it>, <https://en.camera.it>

should decrease gradually to the pre-pandemic levels. Additionally, BOJ decided to apply a negative interest rate of minus 0.1 per cent to the Policy-Rate Balances in current accounts held by financial institutions at the Bank; to purchase a necessary amount of Japan Government Bonds (JGB) without setting an upper limit so that 10-year JGB yields will remain at around zero per cent; to purchase exchange-traded funds (ETFs) and Japan real estate investment trusts (J-REITs) as necessary with upper limits of about JPY12 trillion and about JPY180 billion, respectively, on annual paces of increase in their amounts outstanding; and to purchase corporate papers and corporate bonds with an upper limit on the amount outstanding of about JPY20 trillion in total until the end of March 2022.⁴⁴⁶

On 18 January 2022 and subsequently on 18 March 2022, two meetings of the BOJ concluded with decisions to apply a negative interest rate of minus 0.1 per cent to the Policy-Rate Balances in current accounts held by financial institutions at the Bank; to purchase a necessary amount of Japan Government Bonds without setting an upper limit so that 10-year JGB yields will remain at around zero per cent; to purchase ETFs and J-REITs as necessary with upper limits of about JPY12 trillion and about JPY180 billion, respectively, on annual paces of increase in their amounts outstanding; and to purchase corporate papers and corporate bonds with an upper limit on the amount outstanding of about JPY20 trillion in total until the end of March 2022. BOJ stressed at both meetings that it would continue to maintain stability in financial markets through the Special Program to Support Financing in Response to the COVID-19, an ample provision of yen and foreign currency funds without setting upper limits, and additional easing measures if necessary. It was also noted that from April onward BOJ would purchase these assets at about the same pace as prior to the COVID-19 pandemic, so that their amounts outstanding will gradually return to pre-pandemic levels, namely, at about JPY2 trillion for corporate papers and about JPY3 trillion for corporate bonds.⁴⁴⁷

On 28 February 2022, the Financial Services Agency (FSA) reported that as many as 321 institutional investors had signed up to Japan's Stewardship Code – the Principles for Responsible Institutional Investors.⁴⁴⁸

On 15 March 2022, the FSA announced finalization of the amendments to the regulatory notice concerning the “designated International Financial Reporting Standards,” stipulated in the “Regulation for Terminology, Forms and Preparation of Consolidated Financial Statements”; the amendments define the international accounting standards by the International Accounting Standards Board as “designated international accounting standards” to be applied within the Regulation on Consolidated Financial Statements.⁴⁴⁹

On 23 March 2022, the FSA and European Commission's Directorate-General for Financial Stability, Financial Services and Capital Markets Union adopted the regulatory cooperation framework adding practical arrangements to the Regulatory Cooperation on Financial Regulation of the Agreement between the European Union and Japan for an Economic Partnership.⁴⁵⁰

authorization processes more transparent and timely for the financial institutions that operate in Mexico.⁴⁶²

On 9 September 2022, Banco de México submitted for public consultation the draft provisions to modify the Rules for the execution of derivative transactions. The purpose of these amendments is to broaden the type of counterparties with which banks may enter into credit derivative transactions. As a result, banks may enter into Credit Derivative Transactions with brokerage firms, investment funds, specialized retirement fund companies, insurance companies and other institutional investors whose regimes allow it, as well as hedge funds, limited to Credit Default Swaps and Total Return Swaps without leverage (fully funded).⁴⁶³

Mexico has taken strong actions to develop local currency capital markets by broadening the access to credit derivatives transactions.

Thus, Mexico receives a score of +1.

Analyst: Irina Popova

Russia: +1

Russia has fully complied with the commitment to develop local currency capital markets.

On 22 March 2022, the Central Bank of Russia launched the “Know Your Client” platform and issued a recommendation to credit institutions to apply for the new service. The platform allows to accelerate information processing regarding potential borrowers’ accounts with a special attention given to risky cases.⁴⁶⁴

On 15 April 2022, the Central Bank issued a recommendation to local banks regarding providing better protection against fraud. The regulator recommended financial operators to suspend suspicious operations and temporary prohibit remote access to bank accounts as to prevent a malefactor’s usage of a client’s finance.⁴⁶⁵

On 12 August 2022, the Central Bank presented the Monetary Policy Strategy for 2023 and 2024–2025 period. In the second half of 2022, the Central Bank would consider further lowering of the key interest rate as to keep the annual inflation rate lower 4 per cent. Optimal scenario predicts average key interest rate between 10.5 per cent to 10.8 per cent in 2022, 6.5 per cent to 8.5 per cent in 2023, and 6.0 per cent to 7.0 per cent in 2024. However, high uncertainty persists as a key challenge.⁴⁶⁶

On 7 September 2022, the Central Bank announced a set of measures designed as to stimulate growth of merchandise trade systems by easing regulatory requirements. The regulator cancels requirements

Saudi Arabia has taken strong actions to develop local currency capital markets.

Thus, Saudi Arabia receives a score of +1.

Analyst: Pavel Doronin

South Africa: 0

South Africa has partially complied with the commitment to develop local currency capital markets

On 29 November 2021, the government opened consultations on reviewing the country's monetary policy implementation framework (MPIF). The MPIF provides guidelines for implementing the monetary policy decisions; thus, target inflation rate, repo rate, etc. shall not be amended.⁴⁷⁶ The amended MPIF was presented on 26 May 2022.⁴⁷⁷

On 11 May 2022, the South African Reserve Bank presented a revised schedule for the Basel recommendations Implementation Dates. As because of the COVID-19 pandemic and its consequences, it was decided to delay proposed regulatory reforms such as interest rate risk in the banking book, disclosure requirements, etc. until 2023–2024 and 2028 in some cases.⁴⁷⁸

On 22 September 2022, the Monetary Policy Committee of the Reserve Bank decided to increase the repurchase rate by 75 basic points to 6.25 per cent per year. The committee plans to facilitate credit demand in near term with the current view of inflation risks and thus keep inflation closer to mid-point target. The new repurchase rate becomes effective immediately after the announcement.⁴⁷⁹

South Africa takes actions to improve its monetary policy, but none of the implemented measures could be regarded as strongly contributing to local capital market development.

Thus, South Africa receives a score of 0.

Analyst: Alexander Ignatov

Turkey: +1

Turkey has fully complied with the commitment to develop local currency capital markets.

On 11 January 2022, Turkey included corporate foreign currency and gold deposit accounts converted to lira in a scheme that protects local currency savings against exchange rate volatility; the dollars, euros, pounds or gold in corporate deposit accounts as of the end of 2021 may be converted to lira deposits

with a maturity of six months to a year to be included under the scheme.⁴⁸⁰ The measure is intended to support financial stability through providing an incentive to domestic legal persons holding deposits and participation funds in the event that their foreign exchange and gold deposit accounts and participation funds are converted into Turkish lira time deposit accounts at the account holder's request.⁴⁸¹

On 27 January 2022, the Central Bank of the Republic of Turkey (CBRT) highlighted that comprehensive review of the policy framework was being conducted with the aim of encouraging permanent liraization in all policy tools of the CBRT, and that the focus of this process will be on developing policy instruments to support the improvement of the Turkish lira deposits, to increase the Turkish lira-denominated assets in the collateral structure of the open market operations funding, to gradually reduce the volume of swaps and to strengthen foreign exchange reserves; it was further added that the CBRT would continue to follow a liraization oriented approach that also addresses risks to financial stability. Additionally, it was noted that the effects of the liquidity and distribution developments of the Turkish lira on deposits and loan pricing, the lagged effects of exchange rate developments on inflation expectations, and the impact of the developments regarding foreign exchange protected deposit products on reverse currency substitution, the depth and stability of the foreign exchange market and price stability are being analyzed and necessary policy measures are being taken.⁴⁸²

On 3 February 2022, Turkey's Capital Markets Board (CMB) had published its Communiqué on the Procedures and Principles on the Issuance of Secured Capital Market Instruments numbered II-31/B.1; the Communiqué regulates the concept of the security agent and its responsibilities, together with the general principles of the issuance of secured capital market instruments. With this new regulation, the capital markets instruments to be determined by the CMB will be secured with the assets listed in the communiqué by the CMB. It was prohibited to subject these assets to seizure, pledge, provisional attachment and preliminary injunction by setting the framework of these assets. Terms of the Security Management Agreement have been determined;

The security agent was defined as the investment institution having general custody authorisation of the security in accordance with Turkish capital markets legislation and powers and duties of the security agent have been regulated.⁴⁸³

On 15 March 2022, Turkey's stock exchange Borsa Istanbul launched physically delivered government bond futures contracts to be traded on the derivatives market; the underlying assets of the government bond futures contracts will be government debt securities with a maturity of 2023, 2026 and 2030, which have the ability to represent the market and high liquidity within the market making system in government debt securities. The new product will enable the financial sector and institutional investors

to manage their interest rate risks more effectively, increase the depth in the debt securities market by ensuring the interaction between the spot/futures market, and create more efficient prices.⁴⁸⁴

On 29 July 2022, it was reported that the government, the CBRT and the Banking Regulation and Supervision Agency took steps to limit loans to companies except those that are net exporters, as part of an economic plan that seeks to flip the big current account deficit to a surplus. ISO had earlier complained that the new regulations created a “bottleneck” for companies accessing financing. But this week Reuters reported, citing people familiar the plans, that Ankara will forge on with the policies. Speaking at ISO headquarters, Chairman Erdal Bahcivan repeated that the rules were hurting companies.⁴⁸⁵

On 22 September 2022, the central bank opted for a 100 basis point cut, bringing the key one-week repurchase rate from 13 per cent to 12per cent. In August, the inflation rate in Turkey was recorded at 80.2 per cent, quickening for the 15th consecutive month and the highest level in 24 years. The CBRT said the cut was necessary as growth and demand continued to slow and also cited “escalating geopolitical risk.” The policy direction has long stunned investors and economists, who say the refusal to tighten policy is a result of political pressure from Turkish President Recep Tayyip Erdogan, who has long railed against interest rates and turned against economic orthodoxy by insisting that lowering rates are the way to bring down inflation.⁴⁸⁶

Turkey has taken strong actions to develop local currency capital markets.

Thus, Turkey receives a score of +1.

Analyst: Pavel Doronin

United Kingdom: +1

The United Kingdom has fully complied with the commitment to develop local currency capital markets.

On 3 November 2021, the government announced about backing 477 locally led, innovative projects that “will help breathe new life into towns, villages and coastal communities across the UK” as part of a mission to improve the nation’s level and commitment to net zero.⁴⁸⁷

On 3 November 2021, the government announced that more than 30 projects across Northern Ireland would “receive a share of over GBP12 million to help people into work, boost productivity and grow

On 16 June 2022, the Business Finance Council signed off “The SME Finance Charter,” which consists of 5 commitments that provide a framework for finance providers to set out their specific undertaking to small and medium-sized enterprises.⁴⁹⁶

On 22 September 2022, the Bank of England increased interest rates by 0.5 per cent, the biggest hike since 2008.⁴⁹⁷

On 26 September 2022, the Bank of England published the scenario that it will be using for the 2022 annual cyclical scenario stress test of the UK banking system. The exercise subjects the major UK banks to hypothetical deep simultaneous recessions in the UK and global economies, large falls in asset prices and higher global interest rates, and a separate stress of misconduct costs.⁴⁹⁸

The United Kingdom has taken strong actions to develop local currency capital markets. The Government has strengthened legal and judicial system by adopting an initiative for tax changes that delivers a stronger economy for the local population through driving growth, securing public finances and levelling up employment opportunities. Also, it has launched series of loans to create highly skilled jobs and to support innovative SMEs.

Thus, United Kingdom receives a score of +1.

Analyst: Elena Alekseeva

United States: -1

The United States has failed to comply with the commitment on developing local currency capital markets.

No evidence of US actions to develop local currency capital markets was found during the compliance period.

Thus, the US receives a score of -1.⁴⁹⁹

Analyst: Andrey Shelepov

European Union: +1

The European Union has fully complied with the commitment on developing local currency capital markets.

On 11 May 2022 the European Commission proposed a debt-equity bias reduction allowance to help businesses access the financing they need and to become more resilient. This measure will support businesses by introducing an allowance that will grant to equity the same tax treatment as debt. The proposal stipulates that increases in a taxpayer’s equity from one tax year to the next will be deductible from its taxable base, similarly to what happens to debt. This initiative is part of the EU strategy on business taxation, which aims to ensure a fair and efficient tax system across the EU, and contributes to

the Capital Markets Union, making financing more accessible to EU business and promoting the integration of national capital markets into a genuine single market.⁵⁰⁰ On 17 June 2022 the Council of the European Union reached agreement on its position (general approach) on a review of the alternative investment fund managers directive, the legislative framework which governs managers of hedge funds, private equity funds, private debt funds, real estate funds and other so-called alternative investment funds in the Union. This will help to improve the European Capital Markets Union and strengthen investor protection. The Council stresses the importance of consistent harmonisation in the area of liquidity risk management; the Council also supports the creation, as proposed by the European Commission, of an EU framework for loan-originating funds, i.e. funds that provide credit to companies, supplemented with several requirements to alleviate risks for financial stability and to ensure an appropriate level of investor protection.⁵⁰¹

On 27 June 2022 the European Parliament published a Proposal for a Regulation of the European Parliament and of the Council establishing a European single access point providing centralised access to publicly available information of relevance to financial services, capital markets and sustainability. A proposal for the Regulation establishing a European single access point (ESAP) was published on 25 November 2021. The establishment of a ESAP by 2024 is a main goal of the Capital Markets Union Action Plan adopted by the Commission in September 2020, to help provide EU-wide access to information activities and products of entities that are required to disclose information relevant to capital markets, financial services and sustainable finance.⁵⁰²

On 2 September 2022 the European Commission announced the Green Generation Fund (GGF) founded by Manon Littek and Janna Ensthaler has raised €100 million for investments in innovative food tech and green tech startups with the support of the European Investment Fund (EIF) contributed €25 million backed by an EU budget guarantee from the new InvestEU programme. The Green Generation Fund invests exclusively in sustainable startups that make significant progress in CO2 avoidance, the circular economy, climate and resource protection, health promotion and biodiversity.⁵⁰³

On 16 September 2022 the European Commission announced the first close of new energy fund at €75 million, including a €30 million contribution from the European Investment Fund (EIF) by the Belgian growth equity fund Junction. The EIF participation in the fund is made possible through the support of the European Commission's InvestEU programme, as well as the Dutch Future Fund

Background

At the 2008 Washington Summit trade and investment the G20 leaders committed to maintain free trade and open market access for the first time.

Before the 2017 Hamburg Summit this commitment primarily took the form of an anti-protectionism pledge. This pledge was part of the response by the G20 to the 2008 financial crisis and was extended three times: at the 2009 London Summit, at the 2010 Toronto Summit and at the Los Cabos Summit until the end of 2014. At the 2013 St. Petersburg Summit, the anti-protectionism commitment was again extended until the end of 2016.

At the 2015 and 2016 G20 summits in Antalya and Hangzhou, the G20 reaffirmed the commitment to a standstill and rollback on protectionist measures. Since then, the G20 have gradually moved away from the traditional anti-protectionism wording of the commitment, partly due to the apparent inability to follow up on it, with the WTO and the OECD reporting consistently high numbers of new restrictive measures and the growing trade coverage thereof.⁵⁰⁶

⁵⁰⁶ WTO Report on G20 Trade Measures (mid-May to mid-October 2021), WTO (Geneva) 28 October 2021. Access Date: 13 December 2021. https://www.wto.org/english/news_e/news21_e/report_trdev_nov21_e.pdf

The COVID-19 pandemic introduced additional pressures for the governments to prop up domestic producers through the introduction of additional restrictions for foreign trade and investment. The WTO report on G20 trade measures for mid-May-mid-October 2021 revealed that 144 COVID-19-related measures have been implemented since the outbreak.⁵⁰⁷ At the 2021 Rome Summit the G20 leaders noted, that “reducing trade tensions, tackling distortions in all sectors of trade and investment, addressing supply chain disruptions and fostering mutually beneficial trade and investment relations will be critical as economies respond to and recover from the COVID-19 pandemic.”⁵⁰⁸

Commitment Features

The commitment requires the G20 members to ensure equitable competitive conditions providing equal access to their respective markets for foreign and domestic actors. As such, to fully comply with the commitment the G20 members need to avoid introducing measures, which restrict foreign access to trade and investment opportunities, and actively promote free competition/ liberalize market access conditions (inter alia, through eliminating previously existing restrictions). To partially comply with the commitment the G20 members need to either liberalize access to trade and investment for foreign actors, while introducing new restrictive measures, or to take no action to liberalize access to trade and investment for foreign actors, while avoiding new restrictive measures. Failing to take action to liberalize access to trade and investment for foreign actors, and introducing new restrictive measures results in non-compliance.

The restrictive measures in trade and investment are the actions aimed at limiting the access of foreign actors to domestic markets, including by providing competitive advantages to domestic producers, introducing tariffs, quantitative or technical barriers to trade, etc.

Liberalizing measures are the actions aimed at facilitating trade and investment with foreign actors, by providing them with incentives to enter domestic markets, or removing previously existing restrictive measures.

Scoring Guidelines

-1	The G20 member failed to take action to liberalize access to trade and investment for foreign actors, AND introduced new restrictive measures.
0	The G20 member took action to liberalize access to trade and investment for foreign actors, BUT introduced new restrictive measures OR failed to take action to liberalize access to trade and investment for foreign actors, BUT avoided new restrictive measures.
+1	The G20 member took action to liberalize access to trade and investment for foreign actors, AND avoided new restrictive measures.

*Compliance director: Alexander Ignatov
Lead analyst: Andrei Sakharov*

Argentina: 0

Argentina has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 11 November 2021, the Secretary for International Economic Relations Cecilia Todesca Bocco has launched the ‘Argentina-Brazil Logistics Cost Reduction Programme’, which reduces freight tariffs

to the latest authorised volume of February 2022 (see related state act). The measure will be in force until 31 December 2022.⁵¹⁵

On 9 September 2022, the Federal Public Revenue Administration adopted General Resolution 5256/2022 increasing the export reference price on concentrated grape juice for certain destinations. The affected product was classified under tariff subheading 2009.69.00.⁵¹⁶

On 9 September 2022, the Federal Public Revenue Administration adopted General Resolution 5257/2022 decreasing the export criterion values on shrimp tails classified under tariff subheading NCM 0306.17.90 for certain North American and European destinations.⁵¹⁷

Argentina has taken steps to liberalize trade and investment cooperation by means of signing agreement with foreign partners. However, Argentina has also imposed new restrictive measures limiting export trade.

Thus, Argentina receives a score of 0.

Analysts: Elena Alekseeva and Irina Popova

Australia: 0

Australia has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 2 November 2021, Australia ratified the Regional Comprehensive Economic Partnership Agreement, which came into effect on 1 January 2022. The Agreement is a trade in goods, trade in services, investment, economic and technical cooperation, and creates new rules for electronic commerce, intellectual property, government procurement, competition, and small and medium sized enterprises.⁵¹⁸

On 24 February 2022, the government imposed sanctions against four Russian financial institutions prohibiting carrying of business operations. The list included the Russian Direct Investment Fund responsible for Russian vaccine export.⁵¹⁹

On 26 February 2022, the government introduced sanctions against six Belarussian defense production entities to take effect from 27 February 2022.⁵²⁰

⁵²⁵ GECEX RESOLUTION No. 280, OF DECEMBER 6, 2021, Changes to zero percent the rates of Import Tax levied on Computer and Telecommunications Goods mentioned, as ex-tariff", Official Gazette of Brazil (Brasilia) 6 December 2021. Translation provided by the analyst. Access Date: 4 April 2022. <https://www.globaltradealert.org/state-act/61813/brazil-modifications-of-import-duties-on-10-it-and-telecommunications-products>.

tariff line). The changes introduced lead to an increase in the import duties applicable to the affected product.⁵²⁶

On 29 December 2021, the GECEX issued Resolution No. 292 establishing lower import tariff-rate quotas for the following six products: certain whey proteins, propylene polymers, nickel alloys, aluminum alloys, parts of telephone sets and electric cables. Resolution No. 292 was published on 4 January 2022 and entered into force two days following its publication, namely on 6 January 2022.⁵²⁷

On 29 December 2021, the GECEX issued Resolution No. 293 establishing tariff-rate quotas on several products and increasing the in-volume quota for one product. Resolution No. 293 was published on 4 January 2021 and it applies for a period of 365 days from 14 January 2022 (namely, until 13 January 2023). Concretely, the new regulation established new import tariff quotas on certain woven fabrics, glass bottles, and steel products.⁵²⁸

On 9 May 2022, the GECEX issued Resolution No. 336 removing 196 products from the list of auto parts not locally manufactured under GECEX Resolution No. 284/2021. The new measure affected 18 eight-digits tariff lines. Previously, these products were subject to a preferential duty treatment of 2 per cent. As a consequence of the amendments, the affected products will be now subjected to higher import duties.⁵²⁹

On 19 May 2022, the GECEX issued Resolution No. 346 removing the import duties for certain automotive products. A total of 50 products enclosed in 14 six-digit tariff subheadings were affected.⁵³⁰

On 23 May 2022, the GECEX issued Resolution No. 353 reducing by 10 per cent the import duties of 6195 products, enclosed in 3708 six-digits tariff subheadings. Resolution N° 353 was published in the Official Gazette on 24 May 2022 and will be in force from 1 June 2022 until 31 December 2023.⁵³¹

On 22 August 2022, the Executive Committee of the Brazilian Foreign Trade Chamber (GECEX) issued Resolution No. 388 decreasing the import duties of 7 products by modifying the List of Exceptions to the Common External Tariff (LETEC).⁵³²

On 30 August 2022, the GECEX issued Resolution No. 394 temporarily eliminating the import tariffs on 333 capital goods classified under 142 six-digits tariff subheadings. However, the same resolution temporarily raised the import tariffs on 33 capital goods classified under 23 six-digits tariff subheadings.⁵³³

During the compliance period Brazil took action to liberalize access to trade and investment for foreign actors, but also introduced new restrictive measures.

Thus, Brazil receives a score of 0.

Analyst: Irina Popova

Canada: 0

Canada has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 9 November 2021, Minister of Foreign Affairs Mélanie Joly and Minister of International Trade, Export Promotion, Small Business and Economic Development Mary Ng participated in the Asia-Pacific Economic Cooperation (APEC) Ministerial Meeting, which focused on how international trade can accelerate global economic recovery from the pandemic. Minister Joly and Minister Ng endorsed the 32nd APEC Ministerial Meeting Joint Ministerial Statement 2021, in which ministers from all the APEC countries showed their intention to pursue long-term, sustainable and inclusive growth in the Asia-Pacific region. The statement emphasizes the need to strengthen international cooperation on COVID-19, including on research and development. The statement highlights the urgent need to strengthen international cooperation on fighting COVID-19, including in spheres of research and development. APEC ministers also noted the importance of science, technology and innovation in supporting the region's post-pandemic recovery. The ministers underlined their collective desire to exercise restraint in the use of unnecessary export restrictions and non-tariff barriers, ensuring that these measures are in line with World Trade Organization rules.⁵³⁴

On 16 November 2021, Minister Ng had a virtual meeting with Association of Southeast Asian Nations (ASEAN) economic ministers at the ASEAN Economic Ministers (AEM) – Canada Consultations, where they announced that Canada and ASEAN have agreed to proceed with negotiations toward a comprehensive Free Trade Agreement (FTA), marking an historic milestone in the Canada-ASEAN relationship. The 10th AEM-Canada Consultations meeting was co-chaired by Minister Ng and Dato Amin Liew Abdullah, Minister at the Prime Minister's Office and Minister of Finance and Economy II Brunei Darussalam and included a briefing by senior representatives from the Canada-ASEAN Business Council. At the virtual meeting, the ministers agreed to a joint statement highlighting the potential for an

FTA to help diversify supply chains, increase trade and investment, and reinforce Canada and ASEAN's shared commitment to open markets and rules-based trade.⁵³⁵

On 25 November 2021, Minister Ng met with Nanaia Mahuta, New Zealand's Minister of Foreign Affairs, as part of Minister Mahuta's visit to Ottawa, which was hosted by Minister Joly. Minister Ng emphasized the close collaboration between Canada and New Zealand to advance inclusive trade through the Inclusive Trade Action Group and the Global Trade and Gender Arrangement. The ministers discussed the need for continued support of inclusive trade initiatives in months ahead.⁵³⁶

On 30 November 2021, Minister Ng held a virtual meeting with Katherine Tai, United States Trade Representative, in advance of her forthcoming trip to Washington DC, to advocate for Canadian industry and workers. Minister Ng and Ambassador Tai engaged on important Canada-United States trade issues, including the Government of Canada's continued significant concern with the discriminatory, protectionist elements of the US tax credits for electric vehicles proposed in the current version of the Build Back Better bill. Minister Ng noted that the proposed tax credits run counter to U.S. trade obligations under the Canada-United States-Mexico Agreement. The minister also voiced her disappointment with the doubling of U.S. duties on Canadian softwood lumber, which will harm Canadian communities, businesses and workers, and will add to the cost of housing in the United States.⁵³⁷

On 15 December 2021, Minister Ng had a meeting with the United Kingdom's Secretary of State for International Trade Anne-Marie Trevelyan. During the meeting, Minister Ng underlined Canada's strong people-to-people and cultural ties with the United Kingdom and emphasized how the two countries' commercial partnership is vital to achieving a sustainable and inclusive global economic recovery from the COVID-19 pandemic.⁵³⁸

On 16 December 2021, Minister Ng, addressed a joint meeting of the Canada Arab Business Council (CABC) and the Council of Arab League Ambassadors in Ottawa. Minister Ng reaffirmed Canada's commitment to increasing trade and investment with the Middle East and North Africa (MENA) region and recognized the CABC's work to help strengthen trade and investment ties between Canada and the MENA countries for the last 39 years. Under the theme The Future in Mind, the Canada Pavilion at Expo 2020 Dubai showcases Canadian innovation while promoting Canada to millions of visitors as an ideal place to live, work, study, and do business.⁵³⁹

On 16 December 2021, Minister Ng, hosted the last Ottawa Group meeting for 2021, at which members, attending virtually, reaffirmed their commitment to advancing work on the World Trade

Organization reform issues. The group agreed to keep up its momentum and support ambitious outcomes on key priorities ahead of the World Trade Organization's (WTO) 12th Ministerial Conference which was recently postponed because of developments in the COVID-19 pandemic and will be rescheduled in due course. In particular, Minister Ng and her Ottawa Group partners committed to achieving strong outcomes on trade and health and fisheries subsidies negotiations. The Ottawa Group has been a leader in advancing a trade and health declaration and has broadened support for the declaration to include 58 WTO members that together represent more than 60 per cent of world trade in essential medical goods.⁵⁴⁰

On 17 December 2021, Minister Ng, spoke with Tatiana Clouthier Carrillo, Mexico's Secretary of Economy. They discussed the two countries' common objective of increasing North American competitiveness, as well as shared challenges, including the United States' proposed tax credits for electric vehicles in the Build Back Better bill. Minister Ng reiterated that she has deep concerns about the proposed electric vehicle provisions and highlighted the steps that Canada has taken to defend its auto industry and workers, including outlining retaliatory options should the United States proceed with discriminatory measures.⁵⁴¹

On 22 December 2021, Minister Ng, spoke with Piyush Goyal, India's Minister of Commerce and Industry, Consumer Affairs and Food and Public Distribution and Textiles. They welcomed a re-engagement on negotiations toward a Canada-India comprehensive economic partnership agreement and a Canada-India foreign investment promotion and protection agreement, and committed to working closely together to reach agreements in the coming months.⁵⁴²

On 10 January 2022, Minister Ng, spoke with Taiwan Minister-without-Portfolio John Deng. During the meeting, the two ministers agreed to begin exploratory discussions on a possible foreign investment promotion and protection arrangement between Canada and Taiwan. Minister Ng highlighted Taiwan is a key trade and investment partner as Canada broadens its trade links and deepens its economic partnerships in the Indo-Pacific region. The ministers discussed the need for Canada and Taiwan to continue to work together to further promote supply chain resilience and mutually beneficial commercial opportunities, as well as to increase collaboration on science, technology and innovation, education, Indigenous affairs, and the green economy.⁵⁴³

On 17 January 2022, Minister Ng spoke with her counterpart, Korean Trade Minister Han-Koo Yeo. During the call, the ministers discussed their ongoing bilateral and multilateral trade cooperation. That includes the Canada-Korea Free Trade Agreement, through the Asia-Pacific Economic Cooperation forum, and the WTO.⁵⁴⁴

On 19 January 2022, Minister Ng met virtually with European Commission Executive Vice-President and European Union Commissioner for Trade Valdis Dombrovskis. Minister Ng extended her appreciation of the EU's ongoing engagement in the Ottawa Group and support to advance work on the WTO reform priorities. The ministers agreed to continue the momentum to address key issues, including trade and health, fisheries subsidies negotiations, agriculture negotiations, and WTO reform. Minister Ng and Minister Dombrovskis committed to further strengthen bilateral commercial relations, including the full implementation of the Canada-European Union Comprehensive Economic and Trade Agreement. Minister Ng also discussed the importance of working together to address trade-distorting subsidies while also avoiding the creation of new barriers to trade and investments between Canada and the EU.⁵⁴⁵

On 20 January 2022, Minister Ng hosted a virtual meeting of the Ottawa Group to advance work on the WTO reform. During the meeting, also attended by the WTO Director-General Ngozi Okonjo-Iweala, members committed to continuing momentum towards achieving strong outcomes on trade and health, the WTO reform, as well as on negotiations related to fisheries subsidies and agriculture.⁵⁴⁶

On 21 January 2022, Minister Ng participated in a virtual ministerial meeting of the WTO hosted by Switzerland to discuss priorities such as trade and health, fisheries subsidies negotiations, agriculture negotiations, and WTO reform. During the meeting, Minister Ng conveyed Canada's support for Switzerland's work on a ministerial statement calling for immediate action to support the multilateral trading system for a successful 12th WTO Ministerial Conference. The objective is to deliver strong outcomes on important issues, such as fisheries negotiations and trade and health, at the 12th ministerial conference, which will be held in due course.⁵⁴⁷

On 27 January 2022, Canada and Ukraine announced that they would proceed with negotiations on the modernization of the Canada-Ukraine Free Trade Agreement (CUFTA), with the first round of modernization negotiations to take place as soon as possible. A modernized CUFTA will further expand Canada and Ukraine's commercial ties, building on the over CAD300 million in bilateral trade between the two countries in 2020, and benefitting workers, businesses and consumers, including women and underrepresented communities in both countries. The modernization of CUFTA will also contribute to Ukraine's stability and broad-based economic development.⁵⁴⁸

On 4 February 2022, Minister Ng announced appointments to Business Development Bank of Canada (BDC) and Canadian Commercial Corporation (CCC). To ensure BDC and CCC possess the effective leadership they need to deliver on their mandates, Minister Ng, today announced the reappointments of Mike Pedersen as chair of the board of directors of BDC, and Douglas Harrison as chair of the

On 24 February 2022, Minister Ng spoke to Minister of Commerce and Industry, Consumer Affairs and Food and Public Distribution and Textiles of India Piyush Goyal. Minister Ng and Minister Goyal discussed advancing bilateral trade between the two countries and welcomed further engagement on negotiations toward a Canada-India comprehensive economic partnership agreement and a Canada-India foreign investment promotion and protection agreement.⁵⁵⁵

On 1 March 2022, Minister Ng concluded a successful visit to Washington, D.C., where she reinforced the importance of the rules-based international order and ensuring international trade is inclusive, both of which will be crucial to a strong, sustainable, and inclusive global recovery from the COVID-19 pandemic. While in Washington, Minister Ng met with key leaders, including United States Trade Representative Katherine Tai and Senator Chuck Grassley. In both meetings, Minister Ng reiterated Canada's steadfast support for Ukraine along with allies, including the United States.⁵⁵⁶

On 14 April 2022, Minister Ng concluded the successful Canada-Caribbean Trade Mission, which focused on opportunities to strengthen Canada's trade and economic relationships with Guyana, Jamaica, Barbados and Trinidad and Tobago, with a focus on clean growth. Minister Ng was joined virtually and in person by more than 200 Canadian businesses, many of which are led by Black and women entrepreneurs and those from Canada's other diverse communities. The trade mission began on April 12 in Georgetown, Guyana, where Minister Ng participated in a round table discussion with Canadian and Guyanese business leaders who shared best practices and growth opportunities.⁵⁵⁷

On 28 April 2022, Minister Ng announced the release of Responsible Business Conduct Abroad: Canada's Strategy for the Future. This 5-year strategy (2022 to 2027) sets out priorities for the Government of Canada to support Canadian businesses active abroad, assist in the integration of world-leading responsible business practices into their operations, and help mitigate potential risks of doing business abroad, no matter the company's size, sector, or scope of activities.⁵⁵⁸

On 2 May 2022, Minister Ng and Secretary of Trade and Industry of Philippines Ramon Lopez, witnessed the signing of a memorandum of understanding (MOU) between Canada and the Philippines to establish a Joint Economic Commission (JEC). During the virtual ceremony, Minister Ng emphasized the importance of the JEC as another step in deepening trade relations between Canada and the Philippines, and building stronger economic linkages in the Indo-Pacific. She highlighted that the JEC will improve dialogue and collaboration on shared and emerging economic, investment and trade priorities—including in growth sectors such as renewable energies, infrastructure, agriculture, sustainable mining, and information and communications technology. The JEC will allow for the

participation of stakeholders to help ensure that the interests of businesses and workers, especially SMEs and underrepresented groups, are promoted.⁵⁵⁹

On 17 September 2022, Minister Ng, concluded a productive trip to Siem Reap, Cambodia, where she met with ASEAN economic ministers. She announced at the ASEAN Foreign Ministers Meeting last month the creation of a new Canada-ASEAN trust fund to promote further collaboration and Canada's strategic objectives in the region, with an initial contribution of CAD 1 million. This builds on the CAD3.7 billion in development assistance that Canada has already provided to ASEAN and its member states since 2000.⁵⁶⁰ Canada took action to liberalize access to trade and investment for foreign actors, but introduced new restrictive measures.

Thus, Canada receives a score of 0.

Analyst: Nikita Shilikov

China: 0

China has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 7 January 2022, China imposed a definitive countervailing duty on imports of polyphenylene ether from the United States at the rate of 0.9 per cent ad valorem.⁵⁶¹

On 26 April 2022, the government announced a reduction in import tariffs for certain coal products. The reductions took tariffs on the 7 affected product lines down from between 3 per cent and 6 per cent to zero. The change was stated to be in effect from 1 May 2022 until 31 March 2023.⁵⁶²

China has taken actions to liberalize access to trade and investment for foreign actors but has also introduced new restrictive measures.

Thus, China receives a score of 0.

India: 0

India has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 3 November 2021, the Indian Directorate General of Foreign Trade amended the list of entities permitted to import urea. National Fertilizers Limited and Indian Potash Limited were permitted to import urea. At the same time, Metals and Minerals Trading Corporation of India and State Trading Corporation of India were removed from the list of permitted entities.⁵⁶³

On 22 November 2021, the Indian Directorate General of Foreign Trade imposed a registration requirement for importers and exporters trading in rough diamonds. Henceforth, trade in rough diamonds shall be permitted only if the concerned entities are registered with the Gems and Jewellery Export Promotion Council.⁵⁶⁴

On 29 November 2021, the Indian Directorate General of Foreign Trade amended the export policy of agarwood chips and powder and agar oil from “Free” to “Restricted.” It means that the exports of these goods now requires an export license. Moreover, a quota of 25,000 kilos per annum and 1500 kilos per annum was fixed for agarwood products and agar oil respectively.⁵⁶⁵

On 6 December 2021, the Indian Directorate General of Foreign Trade imposed an import quota of 15,000 metric tonnes on watermelon seeds. The quota was effective from 1 January 2022 to 31 March 2022.⁵⁶⁶

On 20 December 2021, the Indian Ministry of Finance reduced the import duty on refined palm oil from 17.5 per cent to 12.5 per cent.⁵⁶⁷

On 14 January 2022, the Indian Department of Commerce notified additional ports, Hazira and Kamarajar, through which imports of metallic waste and scrap can be imported from certain countries without requiring a Pre-Shipment Inspection Certificate from the country of origin.⁵⁶⁸

Indonesia: 0

Indonesia has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 1 November 2021, a new free trade agreement between European Free Trade Association (EFTA) and Indonesia entered into force after the ratification by all Parties. The Comprehensive Economic Partnership Agreement covers all areas normally included in EFTA's comprehensive free trade agreements, which are trade in goods and services, investment, intellectual property rights, competition, government procurement, trade and sustainable development as well as legal and horizontal provisions. The Agreement also contains a chapter on cooperation and capacity building.⁵⁸⁶

On 14 December 2021, Indonesia's envoy to Pakistan reported that the two countries were in talks to reach a trade agreement, which was likely to take effect soon "giving commercial and economic activities a much-needed upward thrust." A Preferential Trade Agreement already exists between the two countries, while a Free Trade Agreement is also being reviewed.⁵⁸⁷

On 6 January 2022, it was reported that in response to an Indonesian Trade Security Committee report that shows that local manufacturers are threatened by the increased import of apparel and its accessories, the Ministry of Finance imposed a safeguard duty on imports of those products. Minister of Finance Regulation Number 142 of 2021 on the Imposition of Safeguard Duty on the Import of Apparel and Its Accessories became effective on 12 November 2021.⁵⁸⁸

On 17 January 2022, "in the spirit" of simplifying Indonesian regulatory frameworks, the Minister of Trade (MOT) issued MOT Regulation No. 18 on Goods Prohibited from Being Imported and Exported ("Regulation 18"). Regulation 18 introduces new categories of goods that are prohibited for import, namely, sugar, rice and hand tools. Although importers are prohibited from importing said goods, under certain circumstances goods that are prohibited for import may be re-imported after having been previously exported, subject to the provisions under the prevailing regulations.⁵⁸⁹

In January 2022, Indonesia banned coal exports, imposed restrictions on palm oil shipments by requiring mandatory domestic market obligations, and also floated the idea of an export tax on nickel pig iron. While tight domestic coal stocks and high local edible oil prices were cited by authorities as

On 31 March 2022, it was stated that the Japanese government planned to submit a bill that would raise tariffs on some of the Russian imports and deprive Moscow of the most favored nation status. Once the bill becomes law, the tariff on Russian salmon and salmon roe will rise from 3.5 per cent to 5 per cent. For crabs, the tariff goes from 4 per cent to 6 per cent. The levy on most lumber products will increase from 4.8 per cent to 8 per cent. The higher rates are expected to be in place until the end of March next year.⁵⁹⁵

On 23 May 2022, Japan's and US Leaders during President Biden's visit to Japan issued joint statement that stressed the importance of a multilateral trading system based on free and fair economic rules, and confirmed that they will work closely together, through international frameworks such as the G7, G20, World Trade Organization and Organisation for Economic Co-operation and Development, to address non-market policies and practices as well as economic coercion, that are incompatible with the multilateral trading system.⁵⁹⁶

On 25 August 2022, Japan and the United States held the second round of meetings of the bilateral Partnership on Trade. On areas of common interest collaboration, Japan and the United States discussed specific initiatives and efforts in a range of areas, including labor (encourage best practices with respect to internationally-recognized worker rights, including through increasing predictability), digital economy (coordinate efforts to respond to several third-country regulations that present concerns in light of our shared commitments to harnessing the opportunities of the digital economy), multilateral cooperation and others. Bilateral trade issues were also discussed, including regulatory transparency, ensuring a level playing field for U.S. products and services such as standards-related issues, and increasing Japan's use of ethanol.⁵⁹⁷

On 5 July 2022, British businesses and consumers were set to benefit as the UK announced an ‘in principle’ deal to boost data sharing with the Republic of Korea. The deal is the UK’s first independent adequacy agreement with a priority country since leaving the European Union and sees the government seizing the benefits of having independent data laws.⁶⁴⁴

On 20 July 2022, Trade Secretary Trevelyan launched negotiations between the UK and Israel for a new, innovation-focused trade deal.⁶⁴⁵

On 17 August 2022, Trade Secretary Trevelyan launched the Developing Countries Trading Scheme (DCTS), providing tariff reductions and simpler terms of trade to 65 countries, including Pakistan, which will be implemented early next year.⁶⁴⁶

On 31 August 2022, the government suspended trade remedy measures of approximately GBP50 per tonne on imports of hot rolled flat and coil steel from Ukraine for nine months.⁶⁴⁷

On 30 September 2022, the UK implemented services sanctions and export ban that target Russian economic vulnerabilities in response to a so-called “illegal annexation” of Ukrainian regions.⁶⁴⁸

The United Kingdom has partially complied with the commitment the G20 members in trade and investment. On the one hand, the government ensured equal access to markets for foreign actors by introducing anti-dumping duty on goods from Asia, US, broken down hundreds of trade barriers around the world. On the other hand, country has adopted restrictive measures aimed at limiting the access of Russia to domestic markets.

Thus, the United Kingdom receives a score of 0

On 1 December 2021, the Customs and Border Protection (CBP) reclassified rooibos tea as herbal teas rather than as herbal teas made from mint leaves. With the new classification, the import tariff of this product reduced from 4.8 per cent duty to duty-free.⁶⁴⁹

On 12 January 2022, the CBP reclassified child car seat cushions with clips as cushions rather than as parts of car seats. With the new classification, the import tariff of this product increased from duty-free to 6 per cent duty.⁶⁵⁰

On 26 January 2022, the CBP reclassified a controllable shading system as curtains rather than as other mechanical appliances. With the new classification, the import tariff of this product increased from 2.5 per cent duty to 11.3, 10.3, or 6.4 per cent duty (depending on the fabric composition).⁶⁵¹

On 26 January 2022, the CBP reclassified certain girls' and women's closed-toe, closed-heel, below-the-ankle shoes as athletic footwear rather than as non-athletic footwear. With the new classification, the import tariff of this product has been increased from 9 per cent duty to 20 per cent duty.⁶⁵²

On 24 February 2022, the Department of Commerce and the Bureau of Industry and Security (BIS) issued a final rule imposing export control measures against Russia under the Export Administration Regulations (EAR). The rule imposed an export licensing requirement on a wide range of products including microelectronics, semiconductors, computers, telecommunications, information security equipment, lasers, sensors, navigation equipment, avionics, marine equipment, and aircraft components. These products were listed in a new commercial control list (CCL). The final rule also created a new foreign direct product (FDP) rule restricting Russia's ability to acquire foreign-produced items that are in the category of CCL and are a direct product of US-originated technology and software.⁶⁵³

On 2 March 2022, the BIS issued a final rule imposing export control measures against Belarus under the EAR. The purpose of this measure is to prevent the diversion of items, including technology and software to Russia through Belarus. The rule imposed an export licensing requirement on the same products as the previous document concerning Russia.⁶⁵⁴

European Union: 0

The European Union has partially complied with the commitment to liberalize access to trade and investment for foreign actors and abstain from introducing new restrictive measures.

On 27 April 2022, the European Commission proposed to suspend for one year import duties on all Ukrainian exports to the European Union. The proposal would also see the suspension for one year of all EU anti-dumping and safeguard measures in place on Ukrainian steel exports. The Commission also started liberalising the conditions for Ukrainian truck drivers transporting goods between Ukraine and the EU, as well as facilitating transit and the use of EU infrastructure to channel Ukrainian exports towards third countries.⁶⁶²

On 16 May 2022, the EU and the United States reaffirmed their close cooperation to address global trade and technology challenges in line with their shared commitment to democracy, freedom and human rights. Ministers agreed to work together on solutions that will help increase transatlantic trade and investment, including through increased cooperation on government procurement and conformity assessment, and exchanges on potential new trade barriers both bilaterally and in relation to third countries.⁶⁶³

On 3 June 2022, the EU adopted new trade, financial and sectoral sanctions against Russia. The measure includes an import ban on Russian oil, the exclusion of three more Russian banks from the SWIFT payment system, and the suspension of broadcasting activities of three more Russian agencies.^{664,665}

On 3 June 2022, the EU extended sanctions against Belarus. The package includes a series of capital control and financial restrictions on 8 Belarusian entities.⁶⁶⁶

On 24 June 2022, the Council of the EU adopted a regulation opening new import tariff-rate quotas for 4 products. Likewise, the document decreases the import tariff-rate quotas for 2 products. The

measures are the updates of the autonomous import tariff quotas for the second half of 2022 in response to market developments.⁶⁶⁷

On 28 June 2022, the Council of the EU adopted a regulation reducing or eliminating the import duties on 41 agricultural and industrial products and increasing the import duties on 8 agricultural and industrial products.⁶⁶⁸

On 30 June 2022, the European Union and New Zealand have today concluded negotiations for a Free Trade Agreement, providing all tariffs elimination, opening the New Zealand services market in key sectors such as financial services, telecommunications, maritime transport and delivery services, facilitating data flows, predictable and transparent rules for digital trade, helping small businesses export etc. Bilateral trade is expected to grow by up to 30 per cent.⁶⁶⁹

On 5 July 2022, the European Commission published the decision allowing Member States to temporarily waive customs duties on the imports of humanitarian aid distributed to Ukrainians. In particular, the affected products can be food, blankets, tents, electric generators and other life-saving equipment. The import duties waiver is only applicable to state organisations (hospitals, governmental organisations, regional governments, and communes/towns) and charitable or philanthropic organisations approved by the authorities.⁶⁷⁰

On 21 July 2022, the Council of the EU adopted a regulation imposing new trade restrictions on Russia. In particular, it prohibits the import or purchase, directly or indirectly, of Russian gold. This prohibition also covers jewelry. It also extends the list of goods which could contribute in particular to the enhancement of Russian industrial capacities subject to an export ban. The measure adds 29 new products to the list.⁶⁷¹

On 21 July 2022 the Council of the EU adopted a regulation adding one Syrian company to the list of entities whose funds and economic resources will be frozen within the EU given its involvement in

Background

The G20 addressed the issues related to digital growth for the first time at the 2015 Antalya Summit, the G20 members approved national adjusted growth strategies; several of them, including Germany’s, indicated “investing in research ... and expanding the “High Tech Strategy” as a key long-term task.”⁶⁷⁵ Approving adjusted growth strategies focused on the wide use of digital technologies in various spheres was the first step towards more specific initiatives and commitments. The G20 leaders committed to “bridge the digital divide” and also noted that “states have a special responsibility to promote security, stability, and economic ties with other nations” in information and communications and technology (ICT).⁶⁷⁶

At the 2016 Hangzhou Summit, in the G20 Blueprint on Innovative Growth, for the first time G20 leaders addressed the issue of proliferation of the digital economy, which they defined the digital economy as “a broad range of economic activities that includes using digitized information and knowledge as the key factor of production, modern information networks as the important activity space, and the effective use of ICT as an important driver for efficiency-enhancing and economic

⁶⁷⁵ Adjusted Growth Strategy: Germany, RANEPА (Moscow) 2015. Access Date: 11 January 2022.

structural optimization.”⁶⁷⁷ The leaders pledged to “offer policy support for an open, and secure ICT environment, including recognizing the key role of adequate and effective protection and enforcement of intellectual property rights to the development of the digital economy” by means of “cultivating transparent digital economy policy-making” and “supporting the development and use of international standards.” To facilitate “the G20 agenda on innovation, new industrial revolution and digital economy,”⁶⁷⁸ G20 leaders decided to establish a designated task force supported by the Organisation for Economic Co-operation and Development (OECD).

At the 2017 Hamburg Summit, the G20 addressed the issue of digital skills promotion. The #eSkills4Girls Initiative touched on the issue within the broader context of development and gender policy.⁶⁷⁹ To facilitate implementing commitments on digital growth, the Digital Economy Task Force (DETF) was established following the decision made at the 2016 Hangzhou Summit. The leaders concluded with commitments aimed at harnessing digitalization and digital growth such as a pledge to promote digital literacy and digital skills, ensure effective competition to foster investment and innovation, promote effective cooperation of all stakeholders and encourage the development and use of market and industry-led international standards for digitized production, products and services. During Argentina’s G20 presidency in 2018, the DETF presented political tools for digital growth including the G20 Digital Governance Principles, recommendations for measuring the digital economy, gender equality in digital sphere and digital infrastructure development.

At the 2018 Buenos Aires Summit, the G20 leaders pledged to “promote measures to boost micro, small and medium enterprises and entrepreneurs, bridge the digital gender divide and further digital inclusion, support consumer protection, and improve digital government, digital infrastructure and measurement of the digital economy.”⁶⁸⁰

At the 2019 Osaka Summit, the G20 leaders presented the Statement on Preventing Exploitation of the Internet for Terrorism and Violent Extremism Conducive to Terrorism, which tackled cyber security.⁶⁸¹ In addition, the Osaka Declaration on Digital Economy was adopted in which most G20 members (with exception of India, South Africa and Indonesia) declared the launch of the “Osaka track” to promote discussions on “trade-related aspects of electronic commerce at the [World Trade Organization].

In 2020 under Saudi Arabia’s G20 presidency the ministers responsible for the digital economy adopted the G20 Roadmap toward a Common Framework for Measuring the Digital Economy. Under the Framework, the ministers proposed “an overarching policy definition of the different elements of the digital economy: The digital economy incorporates all economic activity reliant on, or significantly enhanced by the use of digital inputs, including digital technologies, digital infrastructure, digital services, and data; it refers to all producers and consumers, including government, that are utilizing these digital inputs in their economic activities.” In 2020, the DETF presented its recommendations

⁶⁸¹ G20 Osaka Leaders’ Statement on Preventing Exploitation of the Internet for Terrorism and Violent Extremism Conducive to Terrorism (VECT), RANEPa (Moscow) 29 June 2019. Access Date: 11 January 2022.

https://www.ranepa.ru/images/News_ciir/Project/G20_new_downloadings/G20_OSAKA_LEADERS_STATEMENT_ON_PREVENTING_EXPLOITATION_OF_THE_INTERNET_FOR_TERRORISM.pdf

on adjusting the United Nations 2030 Sustainable Development Goals with more than 30 indicators related to digital jobs, skills and growth in the digital economy. The recommendations were included into the OECD report “Roadmap Toward a Common Framework for Measuring the Digital Economy” that is said to “complement previous work and proposes a clear step forward for Digital Economy measurement.” Along with the Common Framework for Measuring the Digital Economy, the G20 ministers responsible for the digital economy presented three sets of best practices related to ensuring Security in the Digital Economy, advancing the G20 common Principles on the AI and promoting Smart Mobility.

At the 2020 Riyadh Summit, the leaders’ recognized the key role of “connectivity, digital technologies, and policies” in “strengthening our response to the pandemic and facilitating the continuation of economic activity.” As an addition to the commitment made on promotion of consumers protection, non-discriminatory environment, intellectual property rights protection and data protection, the G20 leaders noted the importance of working with stakeholders “to connect humanity by accelerating global internet penetration and bridging digital divides.”⁶⁸²

At the 2021 Rome Summit, the ministers agreed on necessity to “embrace opportunities and address challenges and risks to further leverage the potential of digitalisation for a resilient, strong, sustainable and inclusive recovery, while tackling inequalities.”⁶⁸³ Regarding issues related to consumers protection in the global digital economy, the ministers committed to “take action to raise awareness, educate and support consumers, including through digital literacy programs in the digital economy, with the aim of preventing the detriment of consumers and ensuring consumer’s protection regarding products’ quality and safety, privacy and personal data protection, and unfair commercial practices, with particular consideration for vulnerable consumers.” Commitment to “coherent and responsible data governance” along with “enforcement of intellectual property rights, taking into account differences in national legal systems”⁶⁸⁴ were also mentioned in the Declaration’s text.

The decisions agreed by the responsible ministers were approved by the G20 leaders in Rome. The leaders reaffirmed the role of data for development and agreed on continuing working on “addressing challenges such as those related to privacy, data protection, security and intellectual property rights, in accordance with the relevant applicable legal frameworks.”⁶⁸⁵

Commitment Features

This commitment requires the G20 members to take actions aimed at promoting privacy and improving data protection; ensuring security; and enforcing intellectual property rights in accordance with the relevant applicable legal protection. To achieve full compliance, a G20 member should take action on all three key areas.

Promoting privacy and data protection

Following the OECD works on privacy and data protection such as the OECD Guidelines Governing the Protection of Privacy and Transborder Flows of Personal Data,⁶⁸⁶ these aspects should not be treated separately.

“Data protection” embraces two closely intertwined but not overlapping notions of “consumer data” and “personal data.” The term “consumer data” refers to data concerning consumers, where such data have been collected, traded or used as part of a commercial relationship.⁶⁸⁷ “Personal data” refers to “any information relating to an identified or identifiable individual (data subject).⁶⁸⁸

The OECD Privacy Framework suggests the following actions that could be taken by a state to promote privacy and data protection:

- Develop national privacy strategies that reflect a coordinated approach across governmental bodies;
- Adopt laws protecting privacy;
- Establish and maintain privacy enforcement authorities with the governance, resources and technical expertise necessary to exercise their powers effectively and to make decisions on an objective, impartial and consistent basis;
- Encourage and support self-regulation, whether in the form of codes of conduct or otherwise;
- Provide for reasonable means for individuals to exercise their rights;
- Provide for adequate sanctions and remedies in case of failures to comply with laws protecting privacy
- Consider the adoption of complementary measures, including education and awareness raising, skills development, and the promotion of technical measures which help to protect privacy;
- Consider the role of actors other than data controllers, in a manner appropriate to their individual role; and
- Ensure that there is no unfair discrimination against data subjects.⁶⁸⁹

Ensuring security

“Digital security” refers to “economic and social aspects of cybersecurity as opposed to purely technical aspects and those related to criminal law enforcement and national and international security.”⁶⁹⁰ Addressing security risks is essential for economic and social prosperity. Regarding “digital security risks” the OECD notes the following:

⁶⁸⁶ OECD Guidelines on the Protection of Privacy and Transborder Flows of Personal Data, OECD (Paris) 2013. Access Date: 13 December 2021.

<https://www.oecd.org/sti/ieconomy/oecdguidelinesontheprivacyandtransborderflowsofpersonaldata.htm>

<https://www.oecd.org/sti/ieconomy/oecdguidelinesontheprivacyandtransborderflowsofpersonaldata.htm>

⁶⁸⁹ The OECD Privacy Framework, OECD (Paris) 2013. Access Date: 13 December 2021.

https://www.oecd.org/sti/ieconomy/oecd_privacy_framework.pdf

⁶⁹⁰ Digital Security Risk Management for Economic and Social Prosperity, OECD (Paris) 2015. Access Date: 13 December 2021. <https://www.oecd.org/digital/ieconomy/digital-security-risk-management.pdf>

“Digital security risk as a category of risk related to the use, development and management of the digital environment in the course of any activity. This risk can result from the combination of threats and vulnerabilities in the digital environment. They can undermine the achievement of economic and social objectives by disrupting the confidentiality, integrity and availability of the activities and/or the environment. Digital security risk is dynamic in nature. It includes aspects related to the digital and physical environments, the people involved in the activity and the organizational processes supporting it.”⁶⁹¹

Ensuring digital security requires cooperation of all “stakeholders” considered as “the governments, public and private organizations, and the individuals, who rely on the digital environment for all or part of their economic and social activities.”⁶⁹²

To comply with this commitment feature the G20 should lead by example in implementation of a holistic public policy approach to digital security risk management and establishing coordination mechanisms at the domestic, regional and international levels, which ensure that all stakeholders understand digital security risk and how to manage it, take responsibility for the management of digital security, manage digital security risk in a transparent manner; cooperate, including across borders. To foster trust and confidence in the digital environment at the national level the G20 members may implement strategies which include measures such as:

- Adopting a comprehensive framework to manage digital security risk to the government’s own activities;
- Establishing coordination mechanisms among all relevant governmental actors to ensure that their management of digital security risk is compatible and enhances economic and social prosperity;
- Ensuring the establishment of one or more Computer Security Incident Response Team (CSIRT), also known as Computer Emergency Response Team (CERT), at national level and, where appropriate, encourage the emergence of public and private CSIRTs working collaboratively, including across borders;
- Using their market position to foster digital security risk management across the economy and society, including through public procurement policies, and the recruitment of professionals with appropriate risk management qualification;
- Encouraging the use of international standards and best practices on digital security risk management, and promoting their development and review through open, transparent and multi-stakeholder processes;
- Adopting innovative security techniques to manage digital security risk in order to assure that information is appropriately protected at rest as well as in transit, and taking into account the benefits of appropriate limitations on data collection and retention;
- Coordinating and promoting public research and development on digital security risk management with a view to fostering innovation;
- Supporting the development of a skilled workforce that can manage digital security risk, in particular by addressing digital security risk management in broader skills strategies. This could include

⁶⁹¹ Digital Security Risk Management for Economic and Social Prosperity, OECD (Paris) 2015. Access Date: 13 December 2021. <https://www.oecd.org/digital/ieconomy/digital-security-risk-management.pdf>

⁶⁹² Digital Security Risk Management for Economic and Social Prosperity, OECD (Paris) 2015. Access Date: 19 January 2021. <https://www.oecd.org/digital/ieconomy/digital-security-risk-management.pdf>

fostering the development of in-service risk management training and certification and supporting the development of digital skills across the population through national education programs, notably in higher education;

- Adopting and implementing a comprehensive framework to help mitigate cybercrime, drawing on existing international instruments;
- Allocating sufficient resources to effectively implement the strategy.⁶⁹³

Enforcing intellectual property rights

“Intellectual property rights” (IPR) refers to “the legal rights which result from intellectual activity in the industrial, scientific, literary and artistic fields.” WIPO also specifies that these laws “aims at safeguarding creators and other producers of intellectual goods and services by granting them certain time-limited rights to control the use made of those productions.”⁶⁹⁴

Against this background, the G20 actions may refer but not limited to facilitating better legal protection of:

- Patents;
- Copyrights and related rights;
- Trademarks;
- Industrial designs and integrated circuits;
- Geographical indicators;
- IPR proprietors against unfair competition.⁶⁹⁵

To achieve full compliance (+1), a G20 member must demonstrate strong willingness to fulfil the task that implies taking actions in all three spheres that go beyond mere verbal support or participation in a discussion on a topic without further implementation in a legislative form, resources allocation, etc. Partial compliance (0) is awarded if a G20 member takes actions either matching only one or two key areas or even all three key areas but at least one area out of three is not supported with a strong action. Partial compliance will also be given if a G20 member takes an action matching any of three key areas, but this action could not be regarded as a strong one. A score of non-compliance (-1) will be given to a G20 member that fails to take action towards any of the three spheres.

Scoring Guidelines

-1	G20 member does no action addressing challenges such as those related to privacy and data protection; security; and intellectual property rights, in accordance with the relevant applicable legal frameworks
0	G20 member takes actions in ONE or TWO of the areas: privacy and data protection; security; and intellectual property rights, in accordance with the relevant applicable legal frameworks

+1	G20 member takes actions in all THREE of the areas: privacy and data protection; security; and intellectual property rights, in accordance with the relevant applicable legal frameworks
----	--

Compliance director and lead analyst: Alexander Ignatov

Argentina: +1

Argentina has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 30 December 2021, the Central Bank Board decided that financial institutions should hold 100 per cent of the funds deposited by payment service providers offering payment accounts in reserve to protect deposits from any unforeseen circumstances. This measure promotes “transactional nature of payment accounts while favoring the expansion of digital means of payment, and endowing them with enhanced transparency and security.”⁶⁹⁶

On 8 January 2022, following the signing of Administrative Decision 5/2022,⁶⁹⁷ Chief of the Cabinet and Minister of the Interior signed a contract with the national telecommunications company for the installation, commissioning and distribution of digital communications to provide free internet access to localities in all regions of the country. The national government is investing more than ARS289 million to reduce the digital divide across the country and achieve digital sovereignty.⁶⁹⁸

On 22 January 2022, the Central Bank Board presented the new standardized quick response code payment system, based on a digital, open and universal payments ecosystem. This system makes access to digital payments much easier and safer, and increases competition between service providers.⁶⁹⁹

On 11 February 2022, Minister of Community Innovation Daniel Filmus formally announced that the United Nations Children’s Fund has joined the Gender Technology Centre. The main goal is to encourage cooperation, collaboration and exchange that will promote spread of STEM – Science, Technology, Engineering, Mathematics – skills and competencies.⁷⁰⁰

On 24 February 2022, the Central Bank Board established new technical requirements for payment service providers “in order to reinforce measures that mitigate fraud in transactions made through digital wallets.” It improves the traceability of suspicious fraudulent transactions and maintains confidentiality.⁷⁰¹

On 9 March 2022, the Financial Intelligence Unit has announced Cybersecurity Awareness Programme to provide general knowledge to protect the agency's information assets from internal and external risks.⁷⁰²

On 15 March 2022, the Ministry of Productive Development Daniel Scioli has launched a new call for the "Knowledge Economy Nodes Programme," with resources of ARS1 billion to promote investment in clusters, poles and technology parks in all provinces of the country.⁷⁰³

On 19 March 2022, Head of Cabinet Minister Juan Manzur announced the "Digital Infrastructure Development Programme" to improve digital infrastructure across the country. It foresees a loan of ARS170 million and aims to foster innovation in the digital services provided by the state through the government-owned telecommunications company ARSAT.⁷⁰⁴

On 22 March 2022, the National Secretariat for Small and Medium-sized Enterprise has launched the Digital Transformation Programme for small and medium size enterprises (SMEs) to promote the digitalization of SMEs throughout the country by training and technical assistance.⁷⁰⁵

On 28 March 2022, within the framework of the Programme for Strengthening Cybersecurity and Cybercrime Investigation, the Minister of Security of the Nation signed a series of agreements to receive specific information to detect, prevent, mitigate or neutralise threats and cybercrime such as scams, cyberattacks and grooming, among other crimes.⁷⁰⁶

On 31 March 2022, the National Agency for the Promotion of Research, Technological Development and Innovation presented the "Federal Network of Innovative SMEs." This initiative seeks to create a space for those companies that make investment in science and technology a key element of their development to establish links, agree on work agendas and strengthen themselves through the exchange of experiences.⁷⁰⁷

On 8 April 2022, President Alberto Fernandez has launched the federal programmes "Construir and Equipar Ciencia," which will have an investment of ARS13 billion to acquire strategic equipment and adapt infrastructure with the aim of strengthening capacities and developing strategic opportunities in regional economies throughout the country. It will create a federal network of science and technology

infrastructure to transform the production model and reduce asymmetries between provinces and regions of the country.⁷⁰⁸

On 11 April 2022, Minister Scioli announced the new call for Strategic Scientific and Technological Projects, which would receive funding of ARS150 million for the development of scientific and technological products, the creation of prototypes and the scaling up of production, through the Supplier Development Programme.⁷⁰⁹

On 11 April 2022, Minister of Economy Martín Guzmán announced to invest more than USD500,000 to the construction of the nanotechnology production area. This financing will allow to promote exports; to trade with regional and non-traditional markets such as Iran, Holland, Saudi Arabia; and to double the company's workforce.⁷¹⁰

On 12 April 2022, the Secretariat of Technological Innovation of the Public Sector of the Office of the Chief of Cabinet of Ministers, through the Undersecretariat of Administrative Innovation, created the "Federal Programme of Digital Public Transformation." This initiative aims to implement digital tools for the integration of systems for the simplification of procedures and digital signature throughout the public sector; streamline administrative processes and generate digital documents.⁷¹¹

On 14 May 2022, Secretary of Industry, Knowledge Economy and External Trade Management Ariel Schale presented the second edition of "Solucioná" programme, with an initial budget of ARS25 million to finance projects of companies, universities and cooperatives that incorporate or develop Knowledge Economy for their products and services.⁷¹²

On 16 May 2022, a meeting dedicated to "Intellectual Property in the National System of Science, Technology and Innovation" was held with the participation of the Minister of Science, Technology and Innovation, Daniel Filmus; the president of the National Agency for the Promotion of Research, Technological Development and Innovation (R+D+i Agency), Fernando Peirano, and the president of CONICET, Ana Franchi. The meeting addressed the initiatives and problems related to these intangible assets and the analysis of how they affect the country's science, technology and innovation ecosystem.⁷¹³

On 10 June 2022, in the framework of “Empowering Communities,” one of the pillars of the initiative promoted by the International Telecommunication Union, Sanchez Malcolm stressed that Argentina aims to reach 70 per cent digitised jurisdictions by 2026, which implies an investment of at least ARS12 million. The goal of the federal Digital Public Transformation programme is to transfer resources to digitize the country’s 24 provincial and 2,300 local governments.⁷¹⁴

On 18-19 August 2022, two conferences were held in San Salvador de Jujuy to disseminate and train intellectual property tools. The objective of the activity was to propose and analyze technology transfer instruments and create a space to design management strategies for intangible assets that allow the knowledge generated in the province to be valued. It was organized by the Agency for Science, Technology and Innovation of Jujuy and the National Program for the Management of Intangible Assets, Intellectual Property and Technology Transfer (Knowledge for Development) of the National Directorate of Studies of the Ministry of Science, Technology and Innovation.⁷¹⁵

Argentina took actions in all three areas of the commitment: privacy and data protection; security; and intellectual property rights.

Thus, Argentina receives a score of +1.

Analysts: Elena Alekseeva and Irina Popova

Australia: 0

Australia has partially complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 6 December 2021, the government released an update to the Digital Government Strategy. The update is set as to promote the government’s digital capabilities, including provision of reliable access to public data.⁷¹⁶

On 14 December 2021, the government presented the Data Strategy. This first of a kind document for Australia sets out a long-term vision to create a national ecosystem of data that is accessible, reliable and relevant. The document is based on three pillars – data value maximization; accessibility of data; and enabling data use. The Strategy’s goal is to maximize data usage to benefit the economy while keeping data safe and building culture of data owners’ trust.⁷¹⁷ On 25 May 2022, Australia joined the Quad Partnership on Critical technology Supply Chains together with Japan, the United States and India. The parties agreed to set a joint cyber security principles to provide better cybersecurity of critical infrastructure.⁷¹⁸

Australia has taken steps to address challenges such as those related to privacy and data protection, and security. However, no action aimed to tackle challenges related to intellectual property rights has been found during the monitoring period.

Thus, Australia receives a score of 0.

Analyst: Alexander Ignatov

Brazil: +1

Brazil has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 7 December 2021, Brazil adopted the Decree No. 10,886 on National Intellectual Property Strategy. It is established for the period from 2021 to 2030 with the objective of defining long-term actions for the coordinated action to establish an effective and balanced National System of Intellectual Property.⁷¹⁹

On 10 February 2022, Constitutional Amendment (EC) 115/2022 was enacted. It includes the protection of personal data among fundamental rights and guarantees. It also establishes the Union's private competence to legislate on the protection and processing of personal data, in accordance with the General Data Protection Law.⁷²⁰

On 14 March 2022, President Jair Bolsonaro signed the Decree No. 10996, which amends the 2020-2022 Digital Government Strategy for the Federal Public Administration. The change aims to further improve the quality of services gathered on the GOV.BR platform. The new text also highlights the importance of unifying digital channels in GOV.BR, the interoperability of government systems (data integration), and security and privacy, in line with the General Law for the Protection of Personal Data.⁷²¹

On 18 March 2022, it was announced that public services with relevant access offered on the digital platform for the relationship between citizens and the Brazilian government, GOV.BR, will begin to require higher levels of security for validation. This update of security requirements occurs with services that involve access to sensitive information or the payment of benefits by the government, such as, for example, some of the National Institute of Social Security. A practical action to increase the level of security in GOV.BR accounts is bank validation.⁷²²

On 20 June 2022, the Ministry of Economy published operational guide with guidelines to expand the protection of critical government systems and encourage the use of safer practices in the bodies and entities of the Federal Public Administration. The Vulnerability Management Guide focuses on building routine processes for managing vulnerability cycles in the organization's data protection and

security. The measure is part of the Privacy and Information Security Program to increase the level of maturity of the bodies in terms of protection of personal data and information security actions.⁷²³

On 15 September 2022, as part of the strategy to modernize the Single Registry, the Ministry of Citizenship published Ordinance No. 810, which defines procedures for the management, operation, transfer and use of data from the Single Registry, in addition to proposing innovations and consolidating the contents of three previous ordinances. The objective is to simplify and assist management with states, municipalities and the Federal District.⁷²⁴

Brazil took actions in all three areas of the commitment: privacy and data protection; security; and intellectual property rights.

Thus, Brazil receives a score of +1.

Canada: +1

Canada has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 9 December 2021, the final annual report of the Privacy Commissioner's mandate was presented in Parliament of Canada. The report focuses on the growing challenges for privacy and steps that should be made to provide security of personal data. Daniel Therrien, the Commissioner, insists that the government ought to act as recommended in a recent declaration of G7 Digital and Technology Ministers. It calls for implementation of a "sustainable, inclusive and human-centric" approach to a post-pandemic prosperity that is guided by common democratic values of open competitive markets. The main idea of the report is to limit governmental activities aimed at collecting personal information of citizens within the framework of the Privacy Act.⁷²⁵

On 1 February 2022, the Intellectual Property Office started the process of becoming a depositing office for patent applications for the World Intellectual Property Organization (WIPO) Digital Access Service (DAS). The DAS is a digital library service administered by WIPO that facilitates the secure exchange of priority documents between intellectual property offices. This initiative will simplify the patent application process for clients who have a priority claim in Canada. By making a copy of their application easily available on DAS, applicants will save time and effort on their international filings at participating offices.⁷²⁶

On 10 March 2022, the Office of the Privacy Commissioner of Canada (OPC) has renewed and updated a Memorandum of Understanding (MOU) with Autoriteit Persoonsgegevens, the data protection authority

for the Netherlands, to facilitate information sharing between the two organizations. The OPC has signed similar memorandums of understanding with a number of other data protection authorities as part of the goal of protecting personal information. The Office is committed to collaborating with partners in Canada and internationally. The updated MOU will replace an earlier version of the agreement which was first signed in 2011.⁷²⁷

On 2 May 2022, the heads of Canada's privacy protection authorities issued a joint statement recommending legislators develop a legal framework that establishes clearly and explicitly the circumstances in which police use of facial recognition may be acceptable.⁷²⁸

On 6 June 2022, the OPC announced that it signed a Memorandum of Understanding with the Commissioner of Data Protection of the Abu Dhabi Global Market to facilitate information sharing between the two organizations. The OPC has signed similar memorandums of understanding with a number of other data protection authorities as part of the goal of protecting personal information. The OPC is committed to collaborating with partners in Canada and internationally.⁷²⁹

On 15 June 2022, François-Philippe Champagne, Minister of Innovation, Science and Industry, and David Lametti, Minister of Justice and Attorney General of Canada, held a media statement on proposed legislation that includes a new privacy regime to increase transparency and give Canadians more control over their data and new rules to help ensure the responsible use of artificial intelligence, building trust in the digital economy.⁷³⁰

On 16 June 2022, Minister Champagne together with Minister of Justice and Attorney General David Lametti, introduced the Digital Charter Implementation Act, 2022, which is said to significantly strengthen Canada's private sector privacy law, create new rules for the responsible development and use of artificial intelligence, and continue advancing the implementation of Canada's Digital Charter. As such, the Digital Charter Implementation Act, 2022 includes three proposed acts: the Consumer Privacy Protection Act, the Personal Information and Data Protection Tribunal Act, and the Artificial Intelligence and Data Act. The proposed Consumer Privacy Protection Act will address the needs of Canadians who rely on digital technology and respond to feedback received on previous proposed legislation. This law will ensure that the privacy of Canadians will be protected and that innovative businesses can benefit from clear rules as technology continues to evolve. The proposed Personal Information and Data Protection Tribunal Act will enable the creation of a new tribunal to facilitate the enforcement of the Consumer Privacy Protection Act.⁷³¹

Canada has taken actions in all three key areas of the commitment – privacy and data protection; security and intellectual property rights.

Thus, Canada receives a score of +1.

Analyst: Nikita Shilikov

China: +1

China has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights (IPRs).

On 1 November 2021, the law on protecting online user data privacy came into force in China. The law states that handling of personal information shall be limited to the minimum scope necessary to achieve the goals of handling data. Moreover, it lays out conditions for which companies can collect personal data, including obtaining an individual's consent, as provides guidelines for ensuring data protection when data is transferred outside the country.⁷³²

On 1 November 2021, China and Russia held a meeting on cooperation in information and communication sphere. The parties discussed issues related to network security, mailing and broadband spectrum usage in neighboring regions of the two countries. The counterparts agreed on initiation of several bilateral projects in the respective sphere.⁷³³

On 9 November 2021, the Foreign Ministry announced it would further promote the opening up of intellectual property rights at a deeper level, as well as strengthen international cooperation with all parties, including the World Intellectual Property Organization (WIPO), in order to make contribution “to the balanced, inclusive and sustainable development of global IPRs” in line with the new five-year plan for IPRs.⁷³⁴

On 21 January 2022, China Banking and Insurance Regulatory Commission announced measures for the regulation of information technology outsourcing activities in banking and insurance institutions to further strengthen risk management. The new regulations required banking and insurance institutions to reduce their reliance on a few information technology (IT) providers outsourcing service providers, conduct onsite inspections of offsite outsourcing services which meet the standards for important IT outsourcing activities, carry out comprehensive IT outsourcing risk management evaluation at least once a year, as well as conduct audit work on this type of outsourcing activities regularly.⁷³⁵

On 14 September 2022, the Cyberspace Administration of China (CAC) proposed a series of amendments to the country's cybersecurity law including raising the size of fines for some violations. For instance, a penalty was proposed that would see operators of critical information infrastructure which used products or services that had not undergone security reviews be fined up to an equivalent of 5% of their previous year's revenue, or 10 times the amount they paid for the product.⁷³⁶

France: 0

France has partially complied with the commitment address challenges related to privacy, data protection, security and intellectual property rights.

On November 2, 2021, Secretary of State for Digital Transition and Electronic Communications Cédric O, presented the industrial plan to support the French Cloud sector, the last pillar of the national Cloud strategy announced in May 2021 jointly by Minister of the Economy and Finance Bruno Le Maire and Minister of Public Transformation and Service Amélie de Montchalin. Symbolically, Secretary O presented this strategy to OVHcloud, the first European player to climb into the world's top 10 cloud providers. This economic plan constitutes the third pillar of the national strategy for the Cloud Industry, following the new doctrine "Cloud at the center" to transform public authorities and the promotion of trusted offers from the SecNumCloud. This component, endowed with EUR1.8 billion, including EUR667 million in public funding, EUR680 million in private co-financing and EUR444 million in European funding, is part of the 4th Investments for the Future Program and France Relance. This strategy relies on innovation and the strengths of French cloud providers by:

- supporting the development of innovative French offers, including free software;
- accelerating the scaling up of French players on critical technologies in high demand, such as big data or collaborative work;
- ensuring data protection;
- intensifying the development of breakthrough technologies by 2025, such as edge computing in order to position the European sector as a future champion.

This strategy is the result of the public consultations carried out with the players in the sector, in particular within the framework of the cyber security framework industry, major European projects and partnerships and the call for expressions of interest launched at the beginning of the year.⁷³⁷

France has taken steps to tackle issues related to digital users' data privacy protection. However, no action aimed at providing digital security and dealing with intellectual property rights issues has been found within the monitoring period.

Thus, France receives a score of 0.

Analyst: Nikita Shilikov

Germany: +1

Germany has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights (IPRs).

⁷³⁷ Investments for the future | Cédric O announces an innovation strategy of nearly €1.8 billion to support the French Cloud industry, Government of France (Paris) 2 November 2021. On 11 November 2021, the European Parliament adopted a resolution on an intellectual property action plan aimed at supporting the EU's recovery and resilience. It notes the importance of balanced protection and enforcement of IPRs to the European economy as well as to the EU's recovery and resilience, in particular to the COVID-19 pandemic. The plan follows the Commission's IP Action Plan adopted in November 2020 and addresses a number of strategies for the protection and enforcement of IPRs.⁷³⁸

On 14 December 2021, the European Data Protection Board (EDPB) adopted the Guidelines on Examples regarding Personal Data Breach Notification. The Guidelines provide practice-oriented, case-based guidance, that utilizes the experiences gained by supervisory authorities since the General Data Protection Regulation is applicable.⁷³⁹

On 28 January 2022, the EDPB published new guidelines on individuals' right to access their data, including that held by employers and former or prospective employers.⁷⁴⁰

On 15 March 2022, the EU, the US, India and South Africa reached agreement on a proposed patent waiver for COVID-19 vaccines related to the Agreement on Trade-Related Aspects of Intellectual Property. The proposal would permit an "eligible" World Trade Organization (WTO) member to temporarily authorize use of patented inventions necessary for COVID-19 vaccine production and supply, without the right holder's consent. An eligible member would be any developing country member that exported less than 10 per cent of world exports of COVID-19 vaccines in 2021. It could use any instrument available in law to make the authorization.⁷⁴¹

On 16 June 2022, the Ministry of Finance issued its report on the evaluation of nonresident taxation of royalty income and capital gains relating to rights which are registered in a public German book or registry to the Finance Committee of the German Parliament. It concluded that the current should be abolished for the future, but not retroactively, except with respect to taxpayers resident in jurisdictions listed on the European Union's list of non-cooperative tax jurisdictions. Besides, the deadline for applications for a retroactive exemption from German withholding tax should be extended from the existing deadline of 30 June 2022 to 30 June 2023.⁷⁴²

Germany has taken actions in all three of the areas: privacy and data protection; security; and intellectual property rights, in accordance with the relevant applicable legal frameworks.

Thus, Germany receives a score of +1.

India: +1

India has fully with the commitment to address challenges related to privacy, data protection, security and intellectual property rights (IPRs).

On 18 November 2021, Union Minister for Electronics and Information Technologies (IT), Communications and Railways Ashwini Vaishnaw and Union Minister of State for Electronics and IT, Skill Development and Entrepreneurship Rajeesh Chandrasekhar announced the winners of the Cyber Security Grand Challenge. The Challenge is aimed at promoting innovation and entrepreneurship in the country. The winners of Grand Challenge were awarded with a trophy each and cash prize money of INR10 million to the winner, INR6 million to the first runner-up and INR4 million to the second runner-up.⁷⁴³

On 16 December 2021, the Joint Parliamentary Committee (JPC) presented its report on the Personal Data Protection (PDP) Bill 2019 in both Houses of Indian Parliament. The committee highlighted that the PDP Bill should cover both personal and non-personal data till an additional framework is established to distinguish between them. The JPC also suggested that no social media platform be permitted to operate in India unless the parent company in charge of the technology sets up an office in the country.⁷⁴⁴

On 10 March 2022, Union Minister for micro, small and medium-sized enterprises (MSMEs) Narayan Rane launched the MSME Innovative Scheme (Incubation, Design and IPR). MSME Innovative Scheme is a tool to unify, synergize and converge three sub-components and interventions with a single purpose. In terms of IPRs the objective of the scheme is to improve the IP culture in India with a view to enhance the awareness among MSMEs. It also aims to take measures for the protection of ideas, technological innovation and knowledge-driven business strategies developed by the MSMEs for their commercialization and effective utilization of IPR tools through IP Facilitation Centre and relevant financial assistance.⁷⁴⁵

On 15 March 2022, the EU, the US, India and South Africa reached agreement on a proposed patent waiver for COVID-19 vaccines related to the Agreement on Trade-Related Aspects of Intellectual Property. The proposal would permit an “eligible” World Trade Organization member to temporarily authorize use of patented inventions necessary for COVID-19 vaccine production and supply, without the right holder’s consent. functions. The directions relate to information security practices, procedure, prevention, response, and reporting of cybersecurity incidents.⁷⁴⁷

On 4 August 2022, the government withdrew a proposed PDP Bill. The government's explanation for withdrawing the bill was that it had grown too complicated. In the near future, a new bill is expected to be presented for public consultation.⁷⁴⁸

India has taken actions in all three of the areas: privacy and data protection; security; and intellectual property rights, in accordance with the relevant applicable legal frameworks.

Thus, India receives a score of +1.

Analyst: Andrey Shelepov

Indonesia: 0

Indonesia has partially complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 20 December 2021, The Directorate General of Intellectual Property of the Ministry of Law and Human Rights of the Republic of Indonesia issued the decision on Implementation of Automatic Approval in Copyright Recordation System; the purpose of the system is to provide legal certainty and increase the confidence of copyright owners through automatic acceptance and processing of requests for copyright recording and automatic approvals upon compliance with certain conditions.⁷⁴⁹

On 25 March 2022, the House of Representatives suspended further discussions on the Personal Data Protection and Cyber Security Bill. The government suggested that this institution should be overseen by a State Ministry, but House legislators rejected the idea claiming that the authority should be independent.⁷⁵⁰

On 23 May 2022, the government announced that it would develop the National Intellectual Property Strategy as a major step to boosting economic growth and supporting national development through the intellectual property ecosystem.⁷⁵¹

On 14 June 2022, Indonesia passed the draft Law on Personal Data Protection (PDP) in response to the growing need for stronger legislative framework to protect personal data and ensure the public's right to personal data protection (though there was no indication on when it would be enacted); the draft Law covers all forms of data processing including acquisition and collection, processing and analyzing, storing, updating and correcting, displaying, announcing, transferring, disseminating,

disclosing, deleting or destroying. Through the PDP Bill, the government manifests its commitment to the strengthening of personal data protection in Indonesia in the public interest.⁷⁵²

On 20 September 2022, the parliament introduced a data privacy law as its first motion months after encountering several breaches in the Southeast Asian country. With this law, data handlers could become liable for up to five years of jail for leaking or misusing private information. Individuals falsifying personal data for their gains could also be jailed for up to six years under the legislation. Additionally, the law includes corporate fines that can be as high as 2% of the company's annual revenue in case of a data leak. Assets of the company leaking personal data could also be confiscated or auctioned off.⁷⁵³

Indonesia has taken actions in data and intellectual property rights protection, in accordance with the relevant applicable legal frameworks. However, no action taken as to tackle security issues was found.

Thus, Indonesia receives the score of 0.

Italy took action to promote privacy and data protection; security; and intellectual property rights.

Thus, Italy is awarded a score of +1.

Analyst: Andrei Sakharov

Japan: +1

Japan has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 28 September 2021, the cabinet adopted a revised Cybersecurity Strategy; the purpose of the strategy is to make cyber space “a free, fair and secure space” based on the principles of (i) assurance of the free flow of information, (ii) rule of law, (iii) openness, (iv) autonomy, and (v) collaboration among multi-stakeholders. The strategy’s policy approaches cover four main areas, namely, (1) enhancing socio-economic vitality and sustainable development (through raising awareness among executives, local regions and small and medium-sized enterprises, building a foundation for ensuring trustworthiness of supply chains that support new value creation, and advancing digital security literacy with no one left behind), (2) realizing a digital society where people can live with a sense of safety and security (through providing a cybersecurity environment that protects the people and society, ensuring cybersecurity integral with digital transformation, promotion of efforts by stakeholders which underpin the socio-economic infrastructure, ensuring seamless information sharing and collaboration among multiple stakeholders, and enhancement of readiness to respond to massive cyberattacks), (3) contributing to the peace and stability of the international community and Japan’s national security (through ensuring “a free, fair and secure space,” strengthening Japan’s capabilities and international cooperation), and (4) cross-cutting approaches to cybersecurity (including advancement of research and development, recruitment, development and active use of human resources, and collaboration based on full participation and awareness raising).⁷⁵⁷

On 25-29 October 2021, the Japan–U.S. Industrial Control Systems (ICS) Cybersecurity Week was held as the fourth iteration of the Japan-U.S. ICS cybersecurity exercise, which aims to improve the security of critical cyber infrastructure in partner countries across the Indo-Pacific region; Cybersecurity Week provided participants with unique opportunities to conduct hands-on training remotely and study a variety of cybersecurity-related topics, including supply chains, process automation, and workforce development from experts from the United States, Japan, and the European Union.⁷⁵⁸

On 30 November 2021, the government announced that it would require that website operators give internet users a way to keep their browsing data out of the hands of third parties as it moves to address growing privacy and security concerns.⁷⁵⁹

On 14 December 2021, the government adopted the basic policy for helping developing countries to improve their capacity in the field of cybersecurity; under the policy, Japan will expand the scope of its aid to cover economies in the Indo-Pacific region, after focusing its support in the field on member states of the Association of Southeast Asian Nations.⁷⁶⁰

On 20 December 2021, the government announced that it is considering to formally oblige the companies in key infrastructure sectors such as finance, telecom and transport to introduce plans for coping with cyberattacks, in response to a rise in such incidents globally.⁷⁶¹

On 12 January 2022, the Patent Office announced that the gazette of published patents would be provided on a daily basis rather than a weekly basis.⁷⁶²

On 2 February 2022, the government announced that it would consider imposing tighter curbs on companies in security-sensitive sectors that procure overseas software as part of efforts to ramp up steps to counter cyberattacks; the proposal provides for crafting legislation that allows the government to order companies in such sectors as energy, water supply, information technology, finance and transportation and others critical to national security to provide advance information when updating software or procuring new equipment, and vet purchases that could put Japan at risk of cyberattacks.⁷⁶³

On 1 April 2022, an amendment to Japan's privacy and data protection law, the Act on the Protection of Personal Information (APPI), came into force. The APPI, applies to and regulates the privacy and data protection activities of any business that is considered a personal information handling business operator. One of the biggest shifts under the APPI amendments are the new requirements placed on businesses that transfer personal information from Japan to another location. Beginning April 2022, businesses within the scope of the APPI need to either (i) obtain an individual's opt-in consent prior to transferring that individual's personal information to a location outside of Japan; or (ii) establish a personal information protection system with the party receiving the personal in the foreign jurisdiction. The amended APPI also introduces new categories of regulated information; one of which is sensitive personal information, which is referred to as "special care-required personal information." Under the APPI, sensitive personal information includes any information about an individual's race, creed, social status, medical history, criminal records, crime victim's history, or any other information that may lead to social discrimination or disadvantage. Businesses within the scope of the APPI cannot collect or use an individual's sensitive personal information without first obtaining their prior, opt-in consent. Additionally, under the newly amended APPI, businesses within the scope of the law must report a data breach to the Personal Information Protection Commission if the breach includes: (i) sensitive information; (ii) data that could result in significant economic loss (i.e., financial information); (iii) an "unjust purpose," such as personal information hijacked by ransomware; or (iv) more than 1,000 individuals' personal information.⁷⁶⁴

On 4 April 2022, the Ministry of Defense announced its plans to introduce stricter cybersecurity standards for its domestic contractor companies to protect against possible cyber-attacks on the defense industry, and to prevent the leakage of sensitive national security information.⁷⁶⁵

On 3 June 2022, the government presented the Intellectual Property Strategic Program 2022. The Program sets out the government's policies and future actions for promoting the creation, protection and exploitation of intellectual property in a focused and systematic manner. The goal of the Program is to transform the economy and society so that motivated individuals and players can fully utilize intellectual properties and intangible assets existing in the society.⁷⁶⁶

On 20 September 2022, the government announced its intention to present a system for companies to pay salaries digitally – without going through bank accounts – by spring 2023. By promoting this system, which allows companies to transfer salaries to workers using smartphone payment apps, the government hopes to solve the complex issues facing foreign workers in Japan, expand the financial services market and deregulation, and promote growth. According to a recent survey, only 30 per cent of companies are considering implementing this system.⁷⁶⁷

Japan has taken strong actions on privacy and data protection; digital security; and intellectual property rights protection.

Thus, Japan receives a score of +1.

Russia: 0

Russia has partially complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 1 November 2021, Russia and China held a meeting on cooperation in information and communication sphere. The parties discussed issues related to network security, mailing and broadband spectrum usage in neighboring regions of the two countries. The counterparts agreed on initiation of several bilateral projects in the respective sphere.⁷⁷⁸

On 25 November 2021, Russia and Syria held a meeting on promoting cooperation in digital sphere. The parties agreed on deepening cooperation in cybersecurity, digital infrastructure development, providing better Internet access to Syrian nationals.⁷⁷⁹

On 1 February 2022, the government announced launch of the state-backed application Gosklutch (Government Key) designed as to provide Russian citizens with better protection when sealing online transactions. The new application is integrated into the government-powered system Gosuslugi (Government Services). Gosklutch would allow to verify the identification of potential transaction party by gathering public data and thus providing extra protection against online threats.⁷⁸⁰

On 16 February 2022, the Saint Petersburg University of Telecommunications (public university) announced that a new cyber defense training facility had started operating. A new facility would provide students with access to virtual training grounds mocking real cyberattacks and thus facilitate necessary skills development for cybersecurity specialists.⁷⁸¹

On 4 March 2022, the Volga Region State Telecommunications and Information Technologies University announced that it would become a control station for the National Cyber Polygon. This initiative sponsored under the federal program “Digital Economy” would facilitate cybersecurity capacity building and necessary skills development.⁷⁸²

On 27 June 2022, Russia and Syria discussed bilateral cooperation in the field of information and communications technologies. The parties expressed interest in building up cybersecurity capacities and proliferation of important skills in higher education.⁷⁸³

On 1 August 2022, the government launched a nation-wide educational program targeting issues of personal digital security and “digital hygiene.” The three-year program is designed as to involve younger generation that is especially vulnerable to cyberthreats being at the same time the most active strata of the Internet users. The program includes operationalization of regular monitoring of the country’s population cyber literacy; the monitoring data would be used to design projects and programs in future.⁷⁸⁴

On 1 September 2022, the government launched several educational projects on information technology for school and university students – “Kod budučevo” (“Code of Future”) and “Tsifroviye Kafedry” (“Digital Lecterns”) respectively. The project provides extra supplementary educational opportunities in coding, artificial intelligence, information security, etc., in the form of 135 courses. The government plans to enroll 113,000 students by the end of 2022.⁷⁸⁵

By means of facilitating cybersecurity capacity and skills development, Russia has addressed two out of three key commitment spheres namely privacy and data protection, and security. However, no actions matching the intellectual property rights component of the commitment has been founded within the monitoring period.

Thus, Russia receives a score of 0.

Turkey: 0

Turkey has partially complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 22 November 2022, it the Cyber Security Cluster and the Presidency of Defense Industries held the country's the National Cyber Security Summit.⁷⁹¹

On 6 December 2021, the Data Protection Authority (DPA) published the Communiqué on the Procedures and Principles Regarding the Personnel Certification Mechanism; in accordance with the Communiqué, (i) the trainees who have obtained the certificate of participation and who are successful in the exam will be entitled to use “data protection officer” titles, (ii) organizations accredited by the Turkish Accreditation Agency within the scope of EN ISO/IEC 17024 standard will be authorized to certify those who are successful in the relevant certification exams.⁷⁹²

On 11 January 2022, the DPA published Draft Guidelines on Cookies, which provide the definition of cookies and types of cookies (categorizing them based on timeframes, purpose and parties), assess the legal basis on the application of the PD law for processing of personal data through the use of cookies and set out conditions for such processing (explicit consent obtained, cases when explicit consent is not required, lawful consent, liability, inter alia).⁷⁹³

On 15 February 2022, the DPA published the guidance on technical and administrative measures to be taken by data controllers, in order to prevent data breaches and decrease the possible negative consequences against increased data breaches.⁷⁹⁴

On 15 June 2022, the Ministry of Trade announced that it was currently working on a draft bill that amends the e-commerce law by regulating e-commerce marketplaces. The ministry is expected to identify certain e-commerce marketplaces as “large” and “very large,” based on specific turnover thresholds. Accordingly, while the draft bill aims to protect e-commerce service providers from unfair practices by e-commerce intermediary service providers, it also aims to establish a fair and competitive environment among them that will benefit consumers.⁷⁹⁵ Turkey has taken strong actions on privacy and data protection and digital security. However, no action regarding intellectual property rights protection has been found during the monitoring period.

Thus, Turkey receives a score of 0.

United Kingdom: +1

The United Kingdom has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 24 November 2021, the Department for Digital, Culture, Media and Sport published “National Data Strategy Mission 1 Policy Framework: Unlocking the value of data across the economy,” which offers a framework for authorities’ action to set the perfect conditions to “make private and third sector data more usable, accessible and available across the UK economy.” At the same time, it protects people’s data rights and private enterprises’ intellectual property.⁷⁹⁶

On 25 November 2021, the Board of Trade published a new report dedicated to opportunities digital trade “for boosting UK exports, turbocharging economic growth, and creating high-paying jobs across all parts of the UK.” It will help to reduce protectionism in online trade internationally, to the benefit of UK businesses and consumers, boost wages in digital sector.⁷⁹⁷

On 29 November 2021, the Cabinet Office’s Central Digital and Data Office has developed an algorithmic transparency standard for government departments and public sector bodies to manage risks, uphold the highest standards of transparency and accountability.⁷⁹⁸

On 20 January 2022, the government has launched “The Government’s Help to Grow: Digital Scheme” to support smaller businesses in adopting digital technologies so they can grow. Under the scheme, “businesses can admit abatements of over GBP5,000 off the retail price of approved Digital Accounting and customer relationship management software from leading technology suppliers and access practical, specialized support and advice on how to choose the right digital technologies to boost their growth and productivity.”⁷⁹⁹

On 8 March 2022, the Department for Digital, Culture, Media and Sport has announced to make changes to the Online Safety Bill to tackle scams and fraud, which involves requiring the largest and most popular social media platforms and search engines to prevent paid-for fraudulent adverts appearing on their services.⁸⁰⁰

On 17 March 2022, the Department for Digital, Culture, Media and Sport introduced world-first online safety laws, which include tougher and quicker criminal sanctions for tech bosses and new criminal offences for falsifying and destroying data. The “Online Safety Bill,” among other things, protects children from harmful content such as pornography and limit people’s exposure to illegal content.⁸⁰¹

On 28 March 2022, the Cabinet Office announced the “New digital playbook” to cut costs and support job growth. This initiative breaks down barriers for small and medium-sized businesses, urging teams to focus on offering agile and innovative digital solutions. This focus takes advantage of tender opportunities and drive job growth right across the country.⁸⁰²

On 20 April 2022, the Department for Business, Energy and Industrial Strategy has announced about reforming competition and consumer policy in order to strengthen enforcement against illegal anticompetitive conduct and create a more active pro-competitive strategy for the Competition and Markets Authority, to keep pace with the speed of digital innovation.⁸⁰³

On 27 April 2022, the Chancellor has announced a creation of the new the new GBP25 million Public Sector Fraud Authority, which cracks down on criminal gangs who rip off the taxpayer. This body will recruit leading data analytics experts and economic crime investigators to “recover money stolen from Covid support schemes.”⁸⁰⁴

On 13 May 2022, the Department for Business, Energy and Industrial Strategy published “Civil nuclear cyber security” strategy 2022, setting out how the UK’s civil nuclear sector aims to manage and mitigate evolving cyber risks over the next 5 years due to legacy challenges and adoption of new technologies.⁸⁰⁵

On 13 June 2022, the Department for Digital, Culture, Media and Sport published policy paper “UK’s Digital Strategy,” which sets out a coherent articulation of the government’s ambitious agenda for digital policy. It includes a focus on digital infrastructure, data, regulation and digital markets, and security, consolidation of the government’s work to support the innovation ecosystem, including in universities and the private sector, strengthening the digital education pipeline, financing digital growth, spreading prosperity and levelling up.⁸⁰⁶

On 20 July 2022, the UK and US governments launched a set of prize challenges to unleash the potential of privacy-enhancing technologies to combat global societal challenges. Announced at the Summit for Democracy last year, innovators from academia, industry, and the broader public will have the opportunity to participate in up to two separate tracks (improving detection of financial crime and forecasting an individual’s risk of infection during a pandemic) as well as the option to design one generalised solution that works for both scenarios for broader applicability.⁸⁰⁷

The United Kingdom has taken strong actions in all three dimensions. The government adopted national privacy strategy to promote privacy and improve data protection, developed mechanisms to reduce protectionism in international online trade, created an algorithmic transparency standard for

government departments and public sector bodies to manage risks in digital sphere, to protect people's data rights and private enterprises' intellectual property.

Thus, the United Kingdom receives a score of +1.

Analysts: Elena Alekseeva and Nikita Shilikov

United States: +1

The United States has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 19 January 2022, President Joe Biden signed the National Security Memorandum on Improving the Cybersecurity of National Security, Department of Defense and Intelligence Community Systems. This Memorandum implemented the cybersecurity requirements of executive order 14028 for National Security Systems (NSS) – networks across the US Government that contain classified information or are otherwise critical to military and intelligence activities. The Memorandum provides the Director of the National Security Agency Paul M. Nakasone, in his role as the National Manager for NSS, with enhanced insight and authorities to better safeguard these systems.⁸⁰⁸

On 15 March 2022, the US, the European Union, India and South Africa reached agreement on a proposed "TRIPS" patent waiver for COVID-19 vaccines. The proposal would permit an "eligible" World Trade Organization member to temporarily authorize use of patented inventions necessary for COVID-19 vaccine production and supply, without the right holder's consent. An eligible member would be any developing country member that exported less than 10 per cent of world exports of COVID-19 vaccines in 2021. It could use any instrument available in law to make the authorization.⁸⁰⁹

On 25 March 2022, the US and the European Commission announced that they had agreed in principle on a new Trans-Atlantic Data Privacy Framework. The Framework provides for the United States put in place new safeguards to ensure that signals surveillance activities are necessary and proportionate in the pursuit of defined national security objectives, establish a two-level independent redress mechanism with binding authority to direct remedial measures, and enhance rigorous and layered oversight of signals intelligence activities to ensure compliance with limitations on surveillance activities.⁸¹⁰

On 27 April 2022, the Office of the United States Trade Representative (USTR) announced its decision not to list Kuwait in the 2022 Special 301 Report as a result of its continued and significant progress on concerns that stakeholders identified with intellectual property enforcement and transparency. The Special 301 Report is an annual report released by the USTR on the adequacy and effectiveness of US trading partners' protection and enforcement of intellectual property rights.⁸¹¹

On 27 July 2022, the US Cybersecurity and Infrastructure Security Agency and the Ukrainian State Service of Special Communications and Information Protection of Ukraine signed a Memorandum of Cooperation to strengthen collaboration on shared cybersecurity priorities.⁸¹²

The United States has taken actions in all three of the areas: privacy and data protection; security; and intellectual property rights, in accordance with the relevant applicable legal frameworks.

Thus, the US receives a score of +1.

Analyst: Andrey Shelepov

European Union: +1

The European Union has fully complied with the commitment to address challenges related to privacy, data protection, security and intellectual property rights.

On 23 April 2022, the European Parliament and the Council of the European Union reached a provisional political agreement on the Digital Services Act (DSA) which sets the standards for a safer and more open digital space for users and a level playing field for companies for years to come. Under the new rules, intermediary services, namely online platforms – such as social media and marketplaces – will have to take measures to protect their users from illegal content, goods and services. The Act also provides a safer online space for users which will have better control over how their personal data are used. Users will be empowered to report illegal content online and platforms will have to act quickly, while respecting fundamental rights, including the freedom of expression and data protection. Recipients of digital services will have a right to seek redress for any damages or loss suffered due to infringements by platforms.⁸¹³ On 16 June Parliament's Internal Market Committee endorsed the provisionally reached agreement with EU governments on the DSA.⁸¹⁴

On 10 May 2022, the Council of the European Union presidency and the European Parliament reached a provisional agreement on the Digital Operational Resilience Act (DORA), which will make sure the financial sector in Europe is able to maintain resilient operations through a severe operational disruption.⁸¹⁵ DORA sets uniform requirements for the security of network and information systems of companies and organisations operating in the financial sector as well as critical third parties which provide services related to ICT (Information Communication Technologies), such as cloud platforms or data analytics services. DORA creates a regulatory framework on digital operational resilience

whereby all firms need to make sure they can withstand, respond to and recover from all types of disruptions and threats related to information and communications technologies.⁸¹⁶

On 11 May 2022, the European Commission adopted a new European strategy for a Better Internet for Kids that sets out the vision for a Digital Decade for children and youth, based on three key pillars: safe digital experiences, protecting children from harmful and illegal online content; digital empowerment so that children acquire the necessary skills and competences; active participation, respecting children by giving them a say in the digital environment, with more child-led activities to foster innovative and creative safe digital experiences.⁸¹⁷

On 11 May the Commission proposed a new legislation to prevent and combat child sexual abuse online. The proposed rules will oblige providers to detect, report and remove child sexual abuse material on their services. Providers will need to assess and mitigate the risk of misuse of their services and the measures taken must be proportionate to that risk and subject to robust conditions and safeguards.⁸¹⁸

On 11 May 2022, the Council of the European Union agreed on a negotiating mandate for the 2030 policy programme “Path to the Digital Decade.”⁸¹⁹ The text aims to strengthen the EU’s digital leadership promoting inclusive and sustainable digital policies that serve citizens and businesses. It provides in particular the addressing the major shortage of cybersecurity skills in the EU workforce, as an important component of protecting the EU against cyber threats. Therefore, in addition to the target on basic digital skills established in the European Pillar of Social Rights Action Plan, the EU shall have a target of 20 million employed Information and Communication Technologies specialists in the EU. One of the general objections of the plan is to ensure that democratic life, public services and health and care services are accessible online for everyone, in particular disadvantaged groups including persons with disabilities, offering inclusive, efficient and personalised services and tools with high security and privacy standards.⁸²⁰

On 13 May 2022, the European Parliament and the Council of the European Union reached an agreement on measures for a high common level of cybersecurity across the Union, to further improve the resilience and incident response capacities of both the public and private sector and the EU as a

whole.⁸²¹ The new directive, called NIS2, replaces the directive on security of network and information systems (the NIS directive). The NIS2 will set the baseline for cybersecurity risk management measures and reporting obligations across all sectors that are covered by the directive. It sets out minimum rules for a regulatory framework and lays down mechanisms for effective cooperation among relevant authorities in each member state. It updates the list of sectors and activities subject to cybersecurity obligations, and provides for remedies and sanctions to ensure enforcement. The directive will formally establish the European Cyber Crises Liaison Organisation Network which will support the coordinated management of large-scale cybersecurity incidents.⁸²²

On 29 June 2022, the European Commission adopted the 2022 Strategic Foresight Report – “Twinning the green and digital transitions in the new geopolitical context”. The report identifies ten key areas of action from now until 2050, including promotion of the robust cybersecurity and secure data sharing framework to ensure, among other things, that critical entities can prevent, resist and recover from disruptions, and ultimately, to build trust in technologies linked to the twin transitions.⁸²³

On 30 June 2022, the European Commission adopted a new digital strategy under the theme “Next Generation Digital Commission” which sets out a vision for a digitally transformed, more agile administration that will contribute to the achievement of the EU’s strategic priorities. Building on the previous (2018) digital strategy of the Commission, the new strategy provides a corporate approach to further streamline current initiatives on information technology, refocus on digital modernization and innovative service provision. It is based on guiding principles, which will be reinforced by the update, such as digital by default and once-only, security and privacy, openness and transparency, interoperability and cross-border, and user-centric, data-driven and agile.⁸²⁴

On 5 July 2022, the European Parliament adopted the DSA proposed by the Commission in December 2020. The DSA sets the standards for a safer and more open digital space for users and a level playing field for companies. The provisional agreement was reached on 23 April 2022.⁸²⁵

On 14 July 2022, the Council of the EU and the European Parliament reached a provisional agreement on the 2030 policy programme ‘Path to the Digital Decade’. This decision aims to strengthen the EU’s digital leadership by promoting inclusive and sustainable digital policies that serve citizens and

businesses. It sets out the concrete digital targets in the areas of skills, secure and sustainable digital infrastructures, digital transformation of businesses and digitalisation of public services.⁸²⁶

On 14 September 2022, the Commission proposed a new Cyber Resilience Act which introduces common cybersecurity rules for manufacturers and developers of products with digital elements, covering both hardware and software. It will ensure that wired and wireless products that are connected to the internet and software placed on the EU market are more secure and that manufacturers remain responsible for cybersecurity throughout a product's life cycle. It will also allow the customers of these products to be properly informed about the cybersecurity of the products they buy and use. The Cyber Resilience Act mandates that products with digital elements will only be made available on the market if they meet specific essential cybersecurity requirements. It requires manufacturers to factor cybersecurity in the design and development of the products with digital elements.⁸²⁷

On 28 September 2022, the Commission adopted two proposals to adapt liability rules to the digital age, circular economy and the impact of global value chains. The new rules allow compensation for damage when products like robots, drones or smart-home systems are made unsafe by software updates, AI or digital services that are needed to operate the product, as well as when manufacturers fail to address cybersecurity vulnerabilities.⁸²⁸

The European Union has fully complied its commitments in all three areas. The EU has adopted multiple measures and strategies for data protection as well as for cyber security, including cybersecurity measures for EU bodies, institutions and agencies, and cybersecurity measures for kids. It launched the new Fund to protect the intellectual property of SMEs support for reimbursement of fees.

Thus, the European Union receives the score of +1.

Background

For the first time ever, the G20 addressed the issue of trustworthy human-centred artificial intelligence (AI) development at the 2018 Buenos Aires Summit. The G20 leaders pledged to “continue ... work on artificial intelligence’ along with ‘emerging technologies and new business platforms’ to maximize the benefits of digitalization and emerging technologies for innovative growth and productivity.”⁸²⁹

In 2019 during Japan’s G20 Presidency the G20 trade and digital economy ministers held a joint meeting resulted in adoption of the G20 AI Principles drawn from the principles and recommendations of the Organisation for Economic Co-operation and Development (OECD).⁸³⁰ The Section 1 of the Principles covers the basic aspects of responsible stewardship of Trustworthy AI, namely: proactive engagement of stakeholders in responsible stewardship of trustworthy AI in pursuit of benefits for people and the planet; respect the rule of law, human rights and democratic values throughout the AI system lifecycle; implementation of mechanisms and safeguards such as capacity for human

⁸²⁹ G20 Leaders’ declaration Building consensus for fair and sustainable development, RANEPa (Moscow). Access Date: 8 December 2021. https://www.ranepa.ru/images/media/g20/2018buenosaires/buenos_aires_leaders_declaration.pdf

⁸³⁰ G20 AI Principles, RANEPa (Moscow). Access Date: 8 December 2021. https://www.ranepa.ru/images/News_ciir/Project/G20_new_downloadings/G20_AI_Principles.pdf

determination; commitment to transparency and responsible disclosure regarding AI systems; application of systematic risk management approach to each phase of the AI system lifecycle; accountability of AI actors for the proper functioning of AI systems. At the 2019 Osaka Summit the G20 leaders committed to “a human-centered approach to AI” and welcomed the non-binding G20 AI Principles in order to ‘foster public trust and confidence in AI technologies and fully realize their potential.’⁸³¹

At the 2020 Riyadh Summit the G20 members reaffirmed their commitment regarding responsible use of AI technologies. In the G20 Riyadh Summit Leaders’ Declaration the G20 members pledged to “promote multi-stakeholder discussions to advance innovation and a human-centered approach to Artificial Intelligence (AI)” taking into account “the Examples of National Policies to Advance the G20 AI Principles.”⁸³²

In 2021, the G20 digital economy ministers reaffirmed their “willingness to implement trustworthy Artificial Intelligence (AI) and to commit to a human-centered approach ... guided by the G20 AI Principles, drawn from the OECD Recommendations on AI” and “build on the Examples of National Policies to advance the G20 AI principles.”⁸³³ The ministers also pledged to “consider the specific needs of MSMEs [micro, small and medium-sized enterprises] and start-ups, for the implementation of trustworthy AI that is human-centered, fair, transparent, robust, accountable, responsible, safe and secure and protects privacy, so as to encourage competition, innovation, diversity and inclusion.”⁸³⁴ The G20 digital economy ministers’ pledges were then supported by the G20 leaders and incorporated into the G20 Rome Leaders’ Declaration.⁸³⁵

Commitment Features

This commitment requires the G20 members to take measures aimed at the implementation of the G20 AI principles while considering the specific needs of businesses including MSMEs and start-ups.

The abbreviation “AI” stands for “artificial intelligence.” In its Recommendation of the Council on Artificial Intelligence⁸³⁶ that has laid the foundation for the OECD/G20 AI Principles, the OECD defines the term “AI system” as “a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations, or decisions influencing real or virtual environments.” For better understanding of the G20 AI Principles such terms as “AI system lifecycle,” “AI actors” and “Stakeholders” regarding the AI development should be taken into consideration:

⁸³⁶ Recommendation of the Council on Artificial Intelligence, OECD 22 May 2019. Access Date: 8 December 2021.
<https://legalinstruments.oecd.org/en/instruments/OECD-LEGAL-0449>

- AI system lifecycle phases involve: i) “design, data and models”; which is a context-dependent sequence encompassing planning and design, data collection and processing, as well as model building; ii) “verification and validation”; iii) “deployment”; and iv) “operation and monitoring”;
- AI actors are those who play an active role in the AI system lifecycle, including organisations and individuals that deploy or operate AI.

Stakeholders encompass all organisations and individuals involved in, or affected by, AI systems, directly or indirectly. AI actors are a subset of stakeholders.

MSMEs are “small firms are generally those with fewer than 50 employees, while micro-enterprises have at most 10, or in some cases 5, workers.” Regarding medium-sized enterprises, it is worth mentioning that “the most frequent upper limit designating an SME [small and medium sized enterprise] is 250 employees.”⁸³⁷

Section 2 of the G20 AI Principles “National policies and international cooperation for trustworthy AI” covers suggested actions to be taken by the G20 members to ensure implementation of the G20 AI Principle.⁸³⁸ This list is divided into five general groups:

- Investing in AI research and development;
- Fostering a digital ecosystem for AI;
- Shaping an enabling policy environment for AI;
- Building human capacity and preparing for labor market transformation; and
- International co-operation for trustworthy AI.

Investing in AI research and development. This line of action implies long-term public and private investment in research and development, including inter-disciplinary efforts, and open datasets that are representative and respect data protection to spur innovation, improve interoperability and use of AI standards.

Regarding fostering a digital ecosystem for AI, the Principles suggest development of digital technologies and infrastructure, and mechanisms for sharing AI knowledge. Also, the Principles encourage governments to support safe, fair, legal and ethical sharing of data.

Shaping an enabling policy environment for AI means facilitation of an agile transition from the research and development stage to the deployment and operation stage that includes “a controlled environment in which AI systems can be tested, and scaled-up.” Also, there is a recommendation for governments to “review and adapt, as appropriate, their policy and regulatory frameworks and assessment mechanisms as they apply to AI systems.”⁸³⁹

Building human capacity and preparing for labor market transformation component prioritizes closer engagement with stakeholders and better provision of skills necessary for effective usage of AI-based applications. Governments should also consider ways to ensure a fair transition for displaced workers

⁸³⁷ Small and Medium-Sized Enterprises (SMEs), OECD Glossary of Statistical Terms, 2 December 2005. Access Date: 8 December 2021. <https://stats.oecd.org/glossary/detail.asp?ID=3123>

⁸³⁸ G20 AI Principles, RANEPa (Moscow). Access Date: 8 December 2021. https://www.ranepa.ru/images/News_ciir/Project/G20_new_downloadings/G20_AI_Principles.pdf

⁸³⁹ Recommendation of the Council on Artificial Intelligence, OECD 22 May 2019. Access Date: 8 December 2021. <https://legalinstruments.oecd.org/en/instruments/OECD-LEGAL-0449>

such as training programs, direct support for displaced persons, provide better access to new opportunities in the labor market, foster entrepreneurship and productivity, and “aim to ensure that the benefits from AI are broadly and fairly shared.”

International cooperation for trustworthy AI embraces all kinds of intergovernmental cooperation aimed at progressing on “responsible stewardship of trustworthy AI.” Suggested actions include, but are not limited to: work together in the OECD and other global and regional fora to foster the sharing of AI knowledge; encourage international, cross-sectoral and open multi-stakeholder initiatives to garner long-term expertise on AI; development of multi-stakeholder, consensus-driven global technical standards for interoperable and trustworthy AI; and development, and their own use, of internationally comparable metrics to measure AI research, development and deployment, and gather the evidence base to assess progress in the implementation of these principles.

To ensure full implementation of the commitment, a G20 member should take strong actions in all five spheres mentioned above. Strong action here implies concrete steps that go beyond a mere declaration of intentions or participation in bilateral and multilateral discussions on the topic, and are supported with allocation of resources, relevant amendments in national legislation, building-up necessary institutional foundation, etc. Also, full compliance requires that at least some of actions taken by a G20 member consider MSMEs and start-ups as a target group.

Partial compliance in the context of the commitment means lack of strong actions in each of five key spheres, listed in the Section 2 of the G20 AI Principles. Absence of actions specifically targeting MSMEs and start-ups as a target group is also considered as partial compliance even if a G20 member takes strong actions in all key spheres. Strong action taken in at least one of the key spheres should be regarded as a partial compliance.

Absence of any strong actions taken by a G20 member means no compliance with the commitment. Weak actions that mean actions not matching requirements for strong actions mentioned above, taken in all five spheres do not serve as a precondition for partial compliance.

Scoring Guidelines

-1	The G20 member has not taken any or at least one strong action aimed at implementation of the G20 AI [Artificial Intelligence] Principles
0	The G20 member has taken strong actions that match at least one of five key spheres but lacks strong actions in other spheres or no action that takes micro, small and medium-sized enterprises (MSMEs) and start-ups as a target group has been found
+1	The G20 member has taken strong actions in all five key spheres listed in the G20 AI Principles and some of them take MSMEs and start-ups as a target group

Compliance director and lead analyst: Alexander Ignatov

Argentina: +1

Argentina has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups to encourage competition and innovation.

On 1 November 2021, the National Agency for the Promotion of Research, Technological Development and Innovation, through the Argentinean Technological Fund allocated grants for integration projects in highly qualified human resource companies aimed at strengthening scientific

and technical capacities in six strategic areas, including digital transformation. There are 13 annual payments vary from ARS360,000 to ARS405,000 over three years.⁸⁴⁰

On 1 November 2021, the National Agency for the Promotion of Research, Technological Development and Innovation, through the Argentinean Technological Fund allocated grants for projects of technological and productive development up to ARS15 million to strengthen national productive capacity innovations in the framework of federal innovation programme.⁸⁴¹

On 18 November 2021, the Ministry of Productive Development has pledged ARS950 million to support the development of 68 knowledge economy hubs so that they can strengthen the structures of productive innovation that will add value to the regional economy and new knowledge sector industries. This initiative aims to guide the connection between existing information communication and technology (ICT) hubs and the local manufacturing structure to provide competitiveness-enhancing solutions.⁸⁴²

On 29 November 2021, the government together with the Inter-American Development Bank launched the project “Learning Analytics, Artificial Intelligence and Behavioural Sciences for Quality Education in the Aftermath of the COVID-19 Pandemic” amounting to ARS200,000.⁸⁴³

On 4 January 2022, the Ministry of Productive Development has allocated more than ARS12 billion over the course of 2021 to “promote knowledge economy enterprises and projects among universities, technology clusters and companies.”⁸⁴⁴

On 6 January 2022, the Ministry of Productive Development has earmarked ARS200 million to support projects that solve various technological challenges in the public sector. “Programa Traccionar Economía del Conocimiento” is part of open innovation initiatives in knowledge related to the use of new technologies and information to obtain goods, provide services and/or improve processes to optimize country’s productive potential.⁸⁴⁵

On 6 January 2022, the Ministry of Productive Development, through the Secretariat of Small and Medium Enterprises and Entrepreneurs approved an assistance of more than ARS88 million to be used for consulting services, creation and implementation of 19 Digital Transformation Units (UTD)

to “to increase the productivity and competitiveness of SMEs [small and medium-sized enterprises] through the adoption of digital technologies and skills.” The UTD should hold at least three thematic workshops on emerging technologies 4.0, such as big data, internet of things, cloud computing, data analytics, machine learning, artificial intelligence, virtual and augmented reality, additive manufacturing (3D printing) or cybersecurity.⁸⁴⁶

On 6 January 2022, the Secretariat for Small and Medium Enterprises and Entrepreneurs announced that would provide ARS25 million under the Programme “ICT Manufacturing Conglomerates Competitiveness Support” to “support local manufacturing and export promotion for conglomerates made up of micro, small and medium enterprises in the software and computer systems sector.”⁸⁴⁷

On 8 January 2022, the Ministry of Industrial Development launches “production of the future” in Technopolis where attendees will be able to play interactive games, observe satellite, advanced technology innovations: nanosatellite for using the internet of things, a robot arm industry 4.0 and a siloboom sensor.⁸⁴⁸

On 13 January 2022, President Alberto Fernandez and Minister of Productive Development Matias Kulfas took part in the virtual launch of the First National Mini Satellite General San Martin, which “will provide internet access to rural producers throughout the country.”⁸⁴⁹ The Ministry of Productive Development contributed almost ARS50 million for an initiative which involves building the smallest satellites in order to create a constellation of Internet communications providing full coverage of the entire region and stimulate the growth of agricultural production in the various countries.

On 17 January 2022, the Economic and Social Council has completed the selection process of the “Call for Innovative Projects for Future Education and Work” initiatives. A total of 20 projects will access ARS150.7 million to bridge the digital divide, develop technology skills to enhance employment opportunities in vulnerable sectors, lay the foundation for technology training, train teachers in computer science and build a system to monitor technological change. The projects were selected in four areas: 1) Technology 4.0 training; 2) Digital education for vulnerable populations; 3) Training in 4.0 technologies; 4) Monitoring of the jobs of the future.⁸⁵⁰

On 26 January 2022, President Fernández headed the presentation of the Digital Inclusion and Educational Transformation Programme Santa Fe + Connected to “expand and modernize the infrastructure of the connectivity system and guarantee a quality internet service for the Santa Fe, with the objective of promoting digital inclusion, educational transformation, the reduction of technological

gaps, and greater efficiency in the provision of public services in that jurisdiction.” This initiative will be financed by Development Bank of Latin America and the Province Santa Fe for ARS124.6 million.⁸⁵¹

On 11 February 2022, the Ministry of Science, Technology and Innovation published on its official website about funding of seven new inter-agency projects on strategic issues. The ministry will allocate ARS100 million to Biosensor platform for the diagnosis of infectious diseases, Inter-institutional research and development to generate high-impact capabilities in life sciences research, etc.⁸⁵²

On 23 February 2022, President Fernández has announced the presentation of the investment plan for around ARS15 billion for innovation initiatives in SMEs to boost the benefits of the Knowledge Economy Law.⁸⁵³

On 11 March 2022, under the Secretariat of Scientific and Technological Articulation the new Federal Programmes “Building Science” and “Equipping Science” were launched to increase infrastructure and equipment to boost research. The objectives of both programmes include encouraging researchers to settle in the provinces; promoting the federalization of the scientific and technological system through the production, dissemination and appropriation of scientific and technological knowledge throughout the national territory; and prioritising geographic areas of lesser relative development, reducing existing asymmetries between jurisdictions and regions of the country.⁸⁵⁴

On 11 April 2022, Minister of Economy Martín Guzmán announced to invest more than USD500,000 to the construction of the nanotechnology production area. This financing will allow to promote exports; to trade with regional and non-traditional markets such as Iran, Holland, Saudi Arabia; and to double the company’s workforce.⁸⁵⁵

On 25 April 2022, within the framework of the visit to the State of Israel, in a delegation also made up of governors, ministers and other officials, Minister of Science, Technology and Innovation Daniel Filmus held a meeting with the Senior Director of Government Affairs and Public Policies of Google Israel, Doron Avni, with the aim of knowing first-hand the Israeli experience in AI. In addition, Google announced the opening of a software engineering area in Google Argentina that will provide solutions to computer problems at an international level. In this way, the Argentine subsidiary of the company will go from being a support area to producing tools with added value.⁸⁵⁶

On 4 May 2022, Minister Guzman confirmed that the Science and Technology function would have an investment of ARS18.6 million that equals to 0.31 per cent of the gross domestic product. Investments are aimed to create knowledge that allows critical sectors for adding value and foreign exchange to have a more dynamic pattern in industry and agro-industry, energy, software.⁸⁵⁷

On 11 May 2022, Minister Filmus and President of the Empretec Foundation Adrián Lebendiker signed a cooperation and collaboration framework agreement aimed at strengthening the capacities of scientific-technological enterprises, science and technology-based companies, technology service centres and innovative SMEs. The agreement allows to strengthen the capacities of different projects and enterprises and promotes science and technology-based companies for the production of goods and services based on knowledge with the possibility of generating quality employment and exports with high added value.⁸⁵⁸

On 13 June 2022, in line with the dialogue activities initiated on April 5, and within the framework of the “International AI Forum. Towards a Multidisciplinary Argentine Center for AI,” the Economic and Social Council in collaboration with the Team Europe held a new work meeting in order to move towards the co-design of an ethical and institutional agenda to frame the progress of artificial intelligence in our country.⁸⁵⁹

Argentina has taken strong in all five groups of the G20 AI Principles. The government allocated grants for integration projects in highly qualified human resource companies aimed at strengthening scientific and technical capacities in digital transformation, for development of technology skills to enhance employment opportunities in vulnerable sectors and lay the foundation for technology training in computer science and for promotion the development of computer products and solutions to support local manufacturing and enterprises.

Thus, Argentina receives a score of +1.

Analysts: Elena Alekseeva and Irina Popova

Australia: 0

Australia has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 18 March 2022, the government announced that it has opened consultation on digital economy regulation settings in Australia. The government is seeking feedback on regulatory frameworks, particularly in relation to automated decision making and AI. Among the main issues – uncertainty and complexity of AI-based systems and relative regulations; growing international competition; growing

need for extra actions and regulations ensuring public trust and confidence; eradication of bias and discrimination; and privacy. The consultations are said to be completed on 22 April 2022.⁸⁶⁰

On 19 April 2022, the Federal Court has made a decision on the AI inventorship case. The Court has decided that an AI system cannot be recognized as an inventor following Australia's patent rulings thus establishing a remarkable law practice.⁸⁶¹

Australia has taken strong actions in all areas, but did not specifically supported small and medium-sized enterprises.

Thus, Australia receives a score of 0.

Analyst: Alexander Ignatov

Brazil: +1

Brazil has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 24 November 2021, Minister of Science, Technology and Innovation Marcos Pontes participated in the launch of the Joint Parliamentary Front for Artificial Intelligence (Frente). Deputies and senators participated in the launching ceremony of the Frente, whose mission will be to debate and forward within the National Congress agendas of interest to the AI sector in the country. The Ministry of Science, Technology and Innovation (MCTI) is responsible for several policies and initiatives aimed at the sector.⁸⁶²

On 10 January 2022, the government series of free courses offered by the Facti foundation in the area of Information and Communication Technology began. QualiFacti de Verão is an initiative that is part of the "MCTI Futuro" program of the Ministry of Science, Technology and Innovation, which is aimed at technological training throughout the country. 8 courses will be offered in January on the following topics: Information Security, Artificial Intelligence, Internet of Things, Cloud and Big Data. According to the foundation, the summer courses aim to provide students with the opportunity to combine the vacation period with new learning.⁸⁶³

On 8 February 2022, the Secretariat of Financial and Project Structures Laboratory of Machine Learning in Finance and Organizations at the University of Brasília entered into a partnership to facilitate fundraising outside the budget for research and development projects in Brazil. The goal is to use data science and Artificial Intelligence and create a tool that will facilitate the search for funding sources for science and technology projects around the world.⁸⁶⁴

On 22 February 2022, the MCTI Futuro Program opened enrollment for several free training courses in the area of technology, including AI. The program will offer 70,000 places through MCTI partnerships with several private institutions. The objective of MCTI Futuro is to promote large-scale training of researchers and students in emerging technologies.⁸⁶⁵

On 2 March 2022, Minister Pontes participated in the launch of studies carried out by Huawei, Inatel and the Federal Institute of Ceará, on artificial intelligence and talent development during the Mobile World Congress. The works entitled IA Whitepaper Brazil and 5G+ Pan-Industry Talent Development bring trends and challenges of these markets in the country.⁸⁶⁶

On 23 March 2022, the government launched a public notice to select Artificial Intelligence innovation projects in startups, along the lines of themes: Agro, Health, Industry, Smart Cities and Tourism. In all, there will be BRL80 million in economic subsidy resources, which do not need to be returned to the Federal Government.⁸⁶⁷

On 15 September 2022, the Ministry of Education signed a Cooperation Agreement with the technology company Oracle, so that the Oracle Academy program is made available free of charge. It offers a variety of educational and technological resources for the institutions that are part of the federal, state, district and municipal education networks, which adhere to the agreement. Among the mechanisms offered by Oracle Academy are classroom learning tools, curricula, software, cloud technology and practice environments. Oracle also includes complete programming programs in Java, Database, Cloud Programming and modules for emerging technologies, such as Data Science, Big Data and Artificial Intelligence. These are some of the learning paths already available.⁸⁶⁸

On 21 September 2022, MCTI promoted the event Webs of Innovation, which brings together participants from local innovation ecosystems, in the city of Goiânia. With the theme “Digital transformation as a driver of economic and social development,” the event discussed the research and development of exponential technologies such as artificial intelligence, and how these future technologies will impact organizations.⁸⁶⁹

On 28 September 2022, MCTI launched the second edition of the Conecta Startup Brasil program. The initiative aims to strengthen the innovation ecosystem in the five regions of the country. This is

done by connecting new startups to training, fostering and real market challenges, stimulating open innovation.⁸⁷⁰

Brazil has taken strong actions has taken strong in all five groups of the G20 AI Principles and also specifically supported small and medium-sized enterprises.

Thus, Brazil receives a score of +1.

Analyst: Irina Popova

Canada: 0

Canada has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 4 November 2021, Innovative Solutions Canada started a new program led by the Royal Canadian Mounted Police (RCMP). Increasingly people who engage in illegal behavior use sophisticated digital technologies including different methods of encryption in order to evade prosecution. The RCMP is looking for an artificial intelligence decryption system that would be able to process the captured data files and generate lists of specific words to analyze and gain access to the encrypted materials⁸⁷¹.

On 11 November 2021, François-Philippe Champagne, Minister of Innovation, Science and Industry, joined international AI experts, with official representatives from eighteen member countries of the Global Partnership on Artificial Intelligence (GPAI) and the European Union, for the second annual plenary of the GPAI in Paris, France. During the opening ceremony, Minister Champagne focused on the positive changes that the GPAI has made in its first year under Canada's chair. Working groups have explored the best way to harness AI to solve complex challenges affecting the world, such as those relating to the COVID-19 pandemic, foster more inclusive economic growth or improve working conditions anywhere on the planet. The projects completed in 2021 will serve as the foundation for the next phase of the GPAI's work.⁸⁷²

On 19 January 2022, Minister of Official Language and Minister responsible for Atlantic Canada Opportunities Agency Act Ginette Petitpas Taylor, along with Member of Parliament for Fredericton Jenica Atwin and CEO of the New Brunswick Innovation Foundation (NBIF) Jeff White, officially launched the NBIF's new Artificial Intelligence Fund. The AI Fund features a suite of programs designed to accelerate AI applied research capacity in New Brunswick and will focus on building a strong AI talent pool, engaging industry and supporting technology adoption of AI by companies.⁸⁷³

On 11 February 2022, Minister Champagne announced the 29 organizations across the country that are receiving CAD80 million in funding in the third phase of the CanCode program. This investment

will enable these organizations to offer 3 million training opportunities for students, from kindergarten to Grade 12, to learn digital skills, like coding, data analytics and digital content development.⁸⁷⁴

On 28 February 2022, Minister Champagne announced the Semiconductor Challenge Callout, a fund of CAD150 million through the Strategic Innovation Fund to make targeted investments to build on Canada's domestic strengths associated with the development and supply of semiconductors. He also announced CAD90 million in funding for the National Research Council of Canada's Canadian Photonics Fabrication Centre.⁸⁷⁵

On 17 February 2022, François-Philippe Champagne, Minister of Innovation, Science and Industry, announced that the National Cybersecurity Consortium will receive up to CAD80 million to lead the Cyber Security Innovation Network. This funding will help foster a strong national cyber security ecosystem in Canada and position the country as a global leader in cyber security.⁸⁷⁶

On 28 April 2022, Minister Champagne announced that Canada is joining trusted partners in endorsing the Declaration for the Future of the Internet. By signing the declaration, Canada is committing to work with like-minded partners to affirm and promote the shared vision of an open, trusted and secure Internet that fosters democratic values and respect for human rights. Partners in this declaration are inviting others who share this vision to join in working together, with civil society and other stakeholders, to affirm guiding principles for the future of the global Internet.⁸⁷⁷

On 20 May 2022, Minister of Northern Affairs, Minister for PrairiesCan and Minister for CanNor Daniel Vandal announced that the government is investing nearly CAD128,000 to support the Yukon's innovation sector as it continues to strengthen and grow. This announcement aligns with Canadian Innovation Week, an opportunity to celebrate, recognize and support ingenuity across the country. This funding, delivered by CanNor, supports three initiatives in Whitehorse. Though each project serves a different purpose, they all exemplify ingenuity and creativity within their fields. The impacts of these projects range from creating modular communications shelters, to supporting businesses interested in adopting artificial intelligence, to advancing physical and mental health, reconciliation and inclusivity.⁸⁷⁸

On 16 June 2022, Minister Champagne, with Minister of Justice and Attorney General David Lametti, introduced the Digital Charter Implementation Act, 2022, which will significantly strengthen Canada's private sector privacy law, create new rules for the responsible development and use of artificial intelligence, and continue advancing the implementation of Canada's Digital Charter. As such, the act will include three proposed acts: the Consumer Privacy Protection Act, the Personal Information and

Data Protection Tribunal Act, and the Artificial Intelligence and Data Act. The proposed Artificial Intelligence and Data Act will introduce new rules to strengthen Canadians' trust in the development and deployment of AI systems.⁸⁷⁹

Canada has taken strong actions in one out of five key spheres listed in the G20 AI Principles. However, no action targeted micro, small and medium sized enterprises and start-ups.

Thus, Canada receives a score of 0.

Analyst: Nikita Shilikov

China: +1

China has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups (MSMEs).

On 14 December 2021, the Foreign Affairs Ministry published the Position Paper on Regulating Military Applications of Artificial Intelligence. The document reveals the principles China aims to adhere in military applications of AI in terms of strategic security, military policies, law and ethics, technological security, research and development, risk management and control, rules-making, and international cooperation.⁸⁸⁰

On 24 January 2022, Director of the Bureau of the small and medium enterprises of the Ministry of Industry and Information Technology (MIIT) Liang Zhifeng announced the MIIT would offer guidance and support to small and medium-sized enterprises (SMEs) to accelerate the process of digital industrialization and industrial digital through innovation and entrepreneurship. He also pledged to cultivate a group of innovative SMEs to enter the high-end digital industries including the metaverse, blockchain, artificial intelligence and other emerging fields.⁸⁸¹

China has taken strong actions in all five key spheres listed in the G20 AI Principles and some of them take MSMEs and start-ups as a target group

Thus, China receives a score of +1.

co-financing. The public contribution to the strategy is mainly financed by the Investments for the Future Program (EUR577 million) and France 2030 (EUR700 million). The government launched a national strategy for Artificial Intelligence in 2018. The national strategy for artificial intelligence has laid the foundations for a long-term structuring of the AI ecosystem, at all stages of technological development: research, development and innovations, applications, placing on the market and intersectoral distribution, support and supervision of deployment.⁸⁸²

On 19 April 2022, France and Germany announced providing funding worth EUR17.9 million to support five projects to develop new solutions in the field of artificial intelligence. The main goal of the projects is to develop AI solutions in the area of sustainability, to detect and combat potential epidemics at an early stage, and to make the industry more resilient to supply chain disruptions. Some of the projects involve small and medium-sized enterprises.⁸⁸³

On 15 June 2022, the French Presidency of the European Council circulated a consolidated compromise text of the proposed Artificial Intelligence Act, which aims to establish a legal framework for the development and deployment of “trustworthy” AI in the EU.⁸⁸⁴

France has taken strong actions in all five key spheres listed in the G20 AI Principles and some of them take micro, small and medium-sized enterprises and start-ups as a target group.

Thus, France receives a score of +1.

Analysts: Nikita Shilikov and Andrey Shelepov

Germany: 0

Germany has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

From 29 March to 1 April 2022, the Federal Ministry for Economic Cooperation and Development co-organized a series of meetings in Cape Town under the first Africa-Asia AI Policy Maker Network. The programme has focused on the promotion of local AI innovation, AI ethics and how AI can contribute to the achievement of the SDGs. The event formed part of “FAIR Forward – Artificial Intelligence for All” (FAIR Forward), a project being implemented by the German government.⁸⁸⁵

Germany has taken steps in some areas covered by the commitment, including international cooperation for trustworthy AI.

Thus, Germany receives a score of 0.

Indonesia: 0

Indonesia has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises (MSMEs) and start-ups.

On 19 January 2021, the government unveiled a draft presidential regulation, derived from the recently passed Job Creation Law, that offers leeway for foreign investment in tech-based start-ups in special economic zones. The regulation will further ease the process for start-ups to hire foreign workers without being required to have a government-approved plan to use foreign employees, which is included in an article of the jobs law.⁸⁹¹

On 29 November 2021, the Aeronautics and Space Research Organisation of the National Research and Innovation Agency developed a platform that used AI to monitor natural resources and the environment. The use of AI to monitor natural resources and the environment is still in the development phase.⁸⁹²

On 14 January 2022, the government issued Regulation 7 of 2021 (GR 7/2021) implementing regulation of the Omnibus Law to provide greater protection and empowerment to Indonesia's cooperatives and MSMEs. GR 7/2021 provides several facilities to encourage the growth of local MSMEs, such as mandating regional governments to provide at least 30 per cent of the total land area for commercial areas for the promotion and development of MSMEs. In addition, the regulation has made it easier for MSMEs to obtain a business license, tax reductions, and reliefs, and are exempt from paying the provincial or the regency/city minimum wage.⁸⁹³

On 27 January 2022, the Directorate General of Higher Education, Research, and Technology of the Ministry of Education, Culture, Research, and Technology worked with a tech company to develop Indonesian digital talents in the field of AI. The cooperation is stated in a memorandum of agreement signed by both parties through a virtual ceremony. This collaboration is an effort made by the Directorate General of Higher Education to accelerate the growth of AI talent in Indonesia. The scope of the collaboration includes improving the competence of human resources at Indonesian universities, through various activities such as AI skills training for lecturers and students, AI curriculum development in universities, translation workshops and research discussions, as well as development and support for the AI startup ecosystem.⁸⁹⁴

On 9 February 2022, the government announced start of drafting a regulation to support the improvement of the mass media ecosystem and empower the community. The attempt is a response to the development of the media industry ecosystem and digital technologies, such as augmented reality, virtual reality, metaverse, artificial intelligence, and 5G.⁸⁹⁵

On 2 September 2022, the government initiated several policies to support the development of digital talent, Coordinating Minister for Economic Affairs, Airlangga Hartarto emphasized. “It is predicted that by 2030, there will be a shortage of 47 million digital talents in the Asia-Pacific region. Currently, Indonesia needs around 600 thousand digital talents every year. To that end, the government has initiated various policies,” he said in an official statement.⁸⁹⁶

Indonesia has taken steps in some areas covered by the commitment, including investing in AI research and development, fostering a digital ecosystem, and building human capacity and preparing for labor market transformation.

Thus, Indonesia receives a score of 0.

Analyst: Pavel Doronin

Italy: +1

Italy has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 24 November 2021, the Government presented the Strategic Programme on Artificial Intelligence for 2022 – 2024. The Program outlines 24 policies to be implemented over the next three years including promotion of necessary skills and competencies, support for enterprises in AI-based products certification, promotion of AI startups, etc.⁸⁹⁷

On 6 December 2021 the Ministry of Economic Development and Ministry of Economy and Finance approved the Decree that earmarked EUR45 million to promote research and development and innovation on artificial intelligence, blockchain and IoTs applications. The initiative focuses on these strategic sectors: industry and manufacturing; education; agribusiness; health care; environment and infrastructure; culture and tourism; logistics and mobility; security and information technology; aerospace.⁸⁹⁸

On 9 March 2022, the Data Protection Authority published the statement it had submitted to the Chamber of Deputies of the Italian Parliament concerning the European Commission’s Proposal for a Regulation on Laying Down Harmonised Rules on Artificial Intelligence (Artificial Intelligence Act). In particular, the Garante noted the interrelation between artificial intelligence and data protection and highlighted that, at the moment, the only legislation currently in force in the field of AI is, in fact, the data protection legislation.⁸⁹⁹

On 24 May 2022, the National Cybersecurity Strategy 2022-2026 was published. The Strategy contains 82 measures on three major issue areas: protection of national strategic assets; response to national cyber threats, incidents and crises; and development of digital technologies, research, and industrial competitiveness. The Strategy provides for cooperation with other European countries on AI research within the framework of the Digital Europe 2021-2027 budget, amounting to EUR7.59 billion; utilization

Italy took action in all five spheres listed in the G20 AI Principles and also targeted specific needs of micro, small and medium-sized enterprises and start-ups.

Thus, Italy receives a score of +1.

Analyst: Andrei Sakharov

Japan: +1

Japan has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 6 July 2021, the Ministry of Economy, Trade and Industry (METI) and the European Commission’s Directorate-General for Communications Networks, Content and Technology held a EU-Japan workshop on monitoring AI systems. Government agencies, companies, and experts had discussions based on use cases of monitoring and evaluation of AI systems after the start of operations.⁹⁰¹

On 18 October 2021, Japan was set to launch GBP637 million worth tech fund that would accelerate research and development of advanced technologies and reinforce economic security. The government is planning to launch the fund next year and investments will be focused on quantum technology, robotics, AI and biotechnology. The fund will be managed by the country’s New Energy and Industrial Technology Development Organization and the Japan Science and Technology Agency and will also be used to fuel research into 5G networks, big data, and semiconductors.⁹⁰²

On 23 December 2021, the Fair Trade Commission and Ministry of Economy, Trade and Industry proposed a draft of Guidelines for Business Collaboration with Startups and Investment in Startups for the purpose of promoting open innovation and ensuring fair and free competitive environments. The draft of Guidelines categorizes potential issues related to investment contracts into nine: disclosure of trade secrets, violation of non-disclosure agreements, work without compensation, bearing the cost of work outsourced by an investor to a third party, purchase of unnecessary goods or services, appraisal rights (i.e., right to demand purchase of the shares under certain conditions), restrictions on research and development activities, restrictions on business partners, and most favorable treatment conditions.⁹⁰³

On 23 December 2021, the National Police Agency was set to create a permitting system for the use of level four self-driving cars for transportation services in rural areas. The government aims to put level four automated driving systems to practical use in areas, aimed mainly at elderly passengers, by

the end of the fiscal year ending in March 2023, expanding them to more than 40 locations nationwide by around 2025.⁹⁰⁴

On 28 January 2022, METI, with the Expert Group on How AI Principles Should be Implemented, compiled the document, “Governance Guidelines for Implementation of AI Principles Ver. 1.1,” which summarizes what to put into practice when respecting the Social Principles of Human-Centric AI.⁹⁰⁵

On 1 February 2022, METI published “Governance Guidelines for the Practice of AI Principles.” The guidelines follow work of the AI Social Implementation Architecture Study Group, which examined “the ideal state of AI governance in Japan, such as regulations, standardization, guidelines, audits, etc.,” as well as trends in AI principles and regulations overseas.⁹⁰⁶

On 8 March 2022, the government announced that it would set a national strategy to promote the development of quantum and artificial intelligence technologies through cooperation between the public and private sectors. At a meeting of its Council of New Form of Capitalism Realization, the government ensured that investment would be expanded intensively to support research and development in the areas, in addition to other important fields of biotechnology and advanced medicine.⁹⁰⁷

On 8 April 2022, the METI released governance Code and AI guidebooks for SMEs. In particular, the METI highlighted that the Code summarises the measures required of business owners to promote digital transformation within companies and introduces good practices and efforts through measures such as digital transformation brands. The AI Guidebook is meant to provide SMEs with guidance on how to prepare and commence utilisation of AI in their enterprises, providing practical steps for decision-making.⁹⁰⁸

On 29 July 2022, METI established an office named the “Web 3.0 Policy Office” under the Minister’s Secretariat. The office has the mandate of strengthening the framework for developing the business environment in relation to Web 3.0. It will serve as a Cross-Departmental Internal Organization, bringing together all government bodies responsible for Web 3.0. These include “departments responsible for industrial finance, taxation, and corporate system (vehicles),” as well as those responsible for “media and content, sports, fashion, and the other related industries,” the METI announcement said. The office will operate by gathering information about the challenges facing the Web 3.0 business environment in Japan and overseas from stakeholders. The ministry added that the initiative should help in stemming the exodus of Web 3-related businesses from the country.⁹⁰⁹

On 13 August 2022, the Justice Ministry planned to use an artificial intelligence-equipped system to translate Japanese laws and ordinances into English from next fiscal year. In its Basic Policy on Economic and Fiscal Management and Reform for fiscal 2022, the government set a target of doubling

foreign direct investment stock in Japan from JPY40 trillion at the end of 2020 to JPY80 trillion in 2030. The swift translation of laws and regulations into English was identified as an important task to achieve the goal.⁹¹⁰

Japan has taken actions in all areas covered by the commitment.

Thus, Japan receives a score of +1.

Analyst: Pavel Doronin

Korea: 0

Korea has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 9 December 2021, the proposed amendment to the Act on Development of Cloud Computing and Protection of Its Users passed at the plenary session of the National Assembly. The Proposed Amendment seeks to promote the use of cloud computing services by the national and local governments in addition to public sector customers.⁹¹¹

On 8 June 2022, the Ministry of Science and ICT (Information and Communications Technology) (MSIT) announced that three major Korean universities are selected as recipients of government funding under the “AI Chip Talent Nurturing Program.” The program is designed to provide advanced training to undergraduate students for AI manufacturing industry. The amount of funding for 2022–2024 exceeds KRW1.4 billion (USD1.1 million).⁹¹²

On 15 July 2022, the MSIT announced five key development directions regarding the country’s innovation development under the new administration. Minister Lee Jong-Ho put emphasis on 1) research and development systems design and development, supported with extra budget allocations with a special emphasis given to AI development; 2) private investment attraction; 3) talent development; 4) public-private partnership development; 5) usage technologies to support vulnerable population and resolve social problems. Also, the MSIT plans to revisit various regulations as to “overhaul the public agencies and public commissions.”⁹¹³

On 28 July 2022, Korea and Argentina signed the renewed Memorandum of Understanding on cooperation in ICT. The parties specified mutual interest in joint promotion of artificial intelligence technologies.⁹¹⁴

Korea has taken strong actions in just one key sphere listed in the G20 AI Principles.

Thus, Korea receives a score of 0.

Analyst: Alexander Ignatov

Mexico: 0

Mexico has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 1 November 2021, Foreign Ministry's Chief Officer for North America Roberto Velasco concluded his trip to Canada in Quebec. At the meeting, Mexico set the priorities for its work with the province of Quebec during the 2021-2023 period in the areas of trade, investment, the economy, research and innovation, and education. Parties plan to “strengthen the region’s supply chains, increase competitiveness and take advantage of technological advances in areas such as electric vehicles, battery development, stronger small and medium-sized enterprises, promoting creativity and improving its commercialization, and the ethical use of artificial intelligence, as well as other cutting-edge technologies.”⁹¹⁵

On 5 November 2021, Mexico and Canada held a meeting on post-pandemic economic recovery, including building more resilient supply chains. Minister of Innovation, Science and Industry of Canada François-Philippe Champagne urged to promoted investment opportunities in Canada’s automotive, information and communications technology/digital, cleantech and life sciences sectors, and highlighted the importance of collaboration in science and research that advance scientific exploration, technological development and innovation in areas like digital and emerging technologies, including artificial intelligence.⁹¹⁶

On 10-12 November 2021, the National Council for Science and Technology of Mexico held Congress for the Generation of Industrial Solutions Based on Artificial Intelligence. The congress through keynote speeches and a discussion panel provided a general overview to businessmen, entrepreneurs, developers, academics and students of the type of problems that can be solved through the use of Artificial Intelligence. It also offered training tutorials that allowed attendees to become familiar with tools, techniques and methodologies that they can adopt and incorporate into their own projects.⁹¹⁷

On 7 June 2022, within the framework of the forum “Towards the implementation in Mexico of the UNESCO Recommendation on the Ethics of Artificial Intelligence,” the United Nations Educational, Scientific and Cultural Organization (UNESCO) in Mexico presented the Recommendation on the Ethics of Artificial Intelligence. UNESCO’s Mexico office announced its intention to install an Artificial Intelligence (AI) Committee, whose purpose is to serve as a space for multidisciplinary and plural dialogue to provide tools for the development of policy strategies focused on human beings for

the ethical governance of AI with the collaboration of multiple stakeholders from the public and private spheres, for which it contemplates convening public entities, industry and academia.⁹¹⁸

On 2 August 2022, Ministry of Foreign Affairs, the National Autonomous University of Mexico (UNAM) and the Huawei company formalized a strategic alliance through the signing of the Letter of Intent “Alliance to Promote the Development of Digital Capabilities in Mexico”, which was carried out within the framework of the “Artificial Intelligence Forum: first results,” at the UNAM facilities. The Letter of Intent reaffirms the commitment to promote the creation of new data scientists.⁹¹⁹

Mexico took actions on two areas of the commitment.

Thus, Mexico receives a score of 0.

Analyst: Irina Popova

Russia: 0

Russia has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises (MSMEs) and start-ups.

On 4 April 2022, the Government has published several amendments to the grant competition rules. The government allocated extra sums for promotion of information technology-based solutions for local businesses; the allocated sum was lifted up to RUB14 billion for 2022.⁹²⁰

On 1 September 2022, the government launched several IT educational projects for school and university students – “Kod buduchevo” (“Code of Future”) and “Tsifroviye Kafedry” (“Digital Lecterns”) respectively. The project provides extra supplementary educational opportunities in coding, AI-technologies, information security, etc. – 135 courses in total. The government plans to enroll 113 thousand students by the end of 2022.⁹²¹

Russia has taken strong action in just one key sphere listed in the G20 AI Principles and also targeted the needs of MSMEs.

Thus, Russia receives a score of 0.

Analyst: Alexander Ignatov

Saudi Arabia: 0

Saudi Arabia has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises (MSMEs) and start-ups.

On 23 May 2022, the Saudi delegation held a series of meetings with chief executive officers (CEOs) of major international digital companies on the sidelines of the World Economic Forum held in Davos, Switzerland. Minister of Technologies and Information technologies Abdullah Alswaha held a meeting with C Vijayakumar, the CEO of HCL Technologies and discussed issues related to cooperation between the Ministry and the company. As it was mentioned, the Saudi delegation pushed forward cooperation agenda in telecommunications, Internet of Things and AI technologies.⁹²²

On 17 August 2022, the Public Consultation Platform initiated public consultations on the draft AI Ethic Principles. This project aims to support the Kingdom's efforts towards achieving its vision and national strategies related to adopting AI technology, encouraging research and innovation, and driving economic growth for prosperity and development. Public consultations are set to be concluded by 1st September 2022.⁹²³

On 26 October 2022, the Future Investment Initiative launched the "Algorithmi Prize" Initiative to promote innovations in robotics and AI technologies. As the press release stated, "the winning applicants will then receive funding to develop and scale their technology, while getting access to the FII Institute's platforms where they will be able to share their research with investors, academics and decision-makers".⁹²⁴

Saudi Arabia has initiated consultations that could contribute to the implementation of the G20 AI Principles, and also dedicated extra funding through a non-profit platform as to promote AI-related innovations. In this regard, Saudi Arabi has taken actions matching at least two spheres mentioned in the G20 AI Principles – investing in AI research and creating enabling policy environment.

Thus, Saudi Arabia receives a score of 0.

Analyst: Alexander Ignatov

South Africa: -1

South Africa has failed to comply with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises (MSMEs) and start-ups.

No evidence of South Africa taking steps to advance the G20 AI Principles while considering the specific needs of MSMEs and start-ups to encourage competition and innovation has been found so far.

Thus, Saudi Arabia receives a score of -1.⁹²⁵

Turkey: 0

Turkey has partially complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises and start-ups.

On 24 August 2021, Turkey launched a national strategy for artificial intelligence outlining goals and objectives for the period 2021–2025. The government aims to increase the contribution of AI to the country's gross domestic product to 5 per cent, and to reach an overall number of 50,000 jobs in the sector by 2025. Other objectives covered in the strategy include investing in human capital (e.g. training AI specialists, supporting the creation of AI jobs), encouraging AI research and innovation, supporting AI entrepreneurship, ensuring the availability of quality data and an enabling technical infrastructure, and engaging in international cooperation mechanisms focused on AI.⁹²⁶

On 13 November 2021, Turkey and China held a meeting to bolster collaboration in the field of digital technologies at an international fair held in Turkey's financial and cultural hub Istanbul.⁹²⁷

On 2 June 2022, the Analysis System Narcotics Network was launched as to assist the national security forces in preventing crime. The locally developed software harnesses thousands of pieces of data from a criminal database and employs artificial intelligence (AI) to detect suspicious activities.⁹²⁸

On 21 July 2022, Turkey and Poland offered exemplary AI strategies. Turkey announced its National Artificial Intelligence Strategy for 2021-2025 prepared by the Presidency's Digital Transformation Office and the Industry and Technology Ministry. The very agenda contains key concepts to turn the country into a "digital Turkey," meaning a globally competitive Turkey in the field of technological progress and productivity. The strategy consists of six priorities, namely: 1) Training AI specialists and increasing employment in the field; 2) Supporting research, entrepreneurship and innovation; 3) Access to quality data and technical infrastructure; 4) Making arrangements to accelerate socioeconomic adaptation; 5) Strengthening international cooperation; 6) Structural and business updates to accelerate the power transformation.⁹²⁹

Turkey has taken steps in some areas covered by the commitment, including investing in AI research and development shaping an enabling policy environment for AI, building human capacity and preparing for labor market transformation, and international cooperation for trustworthy AI.

Thus, Turkey receives a score of 0.

to make it easier to analyse material for the purposes of machine learning, research and innovation. This will promote the use of AI technology, and wider “data mining” techniques, for the public good”.⁹⁴⁴

The United Kingdom has taken strong actions in all five dimensions. The government invested in AI research and development, adopted roadmap setting to build a world-leading AI assurance ecosystem, to create practical tools for businesses, develop educational materials and improve the governance of AI. Also, the UK held summits on international co-operation for trustworthy AI in order to meet the world’s largest challenges, which include the pandemic, climate, exclusion and inequality, transformation of government, digital identity systems, digital infrastructure and skills of civil servants.

Thus, the United Kingdom receives a score of +1.

Analysts: Elena Alekseeva and Nikita Shillikov

United States: +1

The United States has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises (MSMEs) and start-ups.

On 3 November 2021, Director of the White House Office of Science and Technology Policy Eric Lander and Canada’s Minister of Innovation, Science and Industry Francois-Philippe Champagne announced their intention to launch a bilateral collaborative initiative to fund research projects in the areas of artificial intelligence and quantum science.⁹⁴⁵

On 9 December 2021, the Australia–United Kingdom–United States (AUKUS) Joint Steering Group for Advanced Capabilities met at the Pentagon. The participants committed to finalizing a program of work in relation to advanced capabilities. Beyond the four initial areas of focus outlined in the Joint Leaders’ Statement on AUKUS – cyber capabilities, AI, quantum technologies, and additional undersea capabilities – they also discussed other additional capabilities and agreed to identify potential opportunities for collaboration in those areas.⁹⁴⁶

On 16 February 2022, the National Artificial Intelligence Research Resource (NAIRR) Task Force convened its fifth public meeting, continuing its efforts launched in June 2021 to develop a vision and implementation plan for a national cyberinfrastructure that would connect American researchers from all backgrounds and regions to the computational, data, and testing resources that fuel AI research and innovation.⁹⁴⁷

On 29 March 2022, President Joe Biden and Prime Minister of the Republic of Singapore Lee Hsien Loong made a joint statement discussing, inter alia, the US-Singapore Partnership for Growth and Innovation (PGI), which aims to secure inclusive growth for our economies and regions in new and

forward-looking areas: digital economy, energy and environmental technology, advanced manufacturing, and health services. New initiatives announced under the PGI included the development of interoperable ethical AI governance frameworks and plans for a US business development mission to Singapore to facilitate new business opportunities and strengthen partnerships in advanced manufacturing.⁹⁴⁸

The United States has taken strong actions in all five key spheres listed in the G20 AI Principles and some of them take MSMEs and start-ups as a target group

Thus, the US receives a score of +1.

Analyst: Andrey Shelepon

European Union: +1

The European Union has fully complied with the commitment to advance the implementation of the G20 AI [Artificial Intelligence] Principles, while considering the specific needs of micro, small and medium-sized enterprises (MSMEs) and start-ups.

On 3 May 2020, the European Parliament adopted a set of proposals to develop AI in the long term.⁹⁴⁹ The final report from Parliament's special committee on artificial intelligence in the digital age proposes an EU Roadmap for AI, a holistic approach for a common, long-term position that highlights the EU's key values, objectives and values about AI and continues the EU's current legislative efforts in this area. The report proposes a favourable regulatory environment: to support innovation and avoid regulatory burden, only high-risk AI applications should be strictly regulated. The Parliament said digital infrastructure should be strengthened, ensuring access to services for everyone. The EU should support the development of AI skills so that people have the skills needed for life and work. The military and security aspects of AI also need to be tackled: the EU should cooperate internationally with like-minded partners to promote its human-centric, EU-value based vision.⁹⁵⁰

On 28 September 2022 the Commission adopted two proposals to adapt liability rules to the digital age, circular economy and the impact of global value chains. The Commission proposes for the first time a targeted harmonisation of national liability rules for AI, making it easier for victims of AI-related damage to get compensation. The new rules will ensure that victims benefit from the same standards of protection when harmed by AI products or services, as they would if harm was caused under any other circumstances. The purpose of the AI Liability Directive is to lay down uniform rules for access to information and alleviation of the burden of proof in relation to damages caused by AI systems, establishing broader protection for victims (be it individuals or businesses), and fostering the AI sector by increasing guarantees.⁹⁵¹

The EU is making efforts in investing in AI research and development; shaping an enabling policy environment for AI; fostering digital ecosystem for AI (creating a digital single market) as well as developing the international digital cooperation; some of the actions consider MSMEs and start-ups as

Background

International taxation has been on the G20 agenda since Finance Ministers and Central Bank Governors met for the first time in Berlin, Germany in 1999.⁹⁵² Transparency and international standards were the main focus for many years, which led into efforts to tackle base erosion and profit shifting (BEPS).

On 19 July 2013, the Organisation for Economic Co-operation and Development (OECD) published the Action Plan on BEPS, which provided 15 action points to tackle weaknesses in the existing international taxation principles.⁹⁵³ The plan set up an international framework to combat tax avoidance by multinational enterprises (MNEs) using BEPS tools. Base erosion is the practice of reducing the taxable base. Profit shifting refers to shifting taxable profits from high-tax countries to low-tax countries. The BEPS Action Plan constitutes 15 actions that equip governments with the necessary domestic and international instruments to ensure that profits are taxed where economic activities that generate the profits are performed and where value is created. On the international level,

⁹⁵² G20 Finance Ministers and Central Bank Governors, G20 Information Centre (Toronto) 16 December 1999. Access Date: 21 January 2022. <http://www.g20.utoronto.ca/1999/1999communique.pdf>

⁹⁵³ BEPS Actions, OECD (Paris) n.d. Access Date: 22 January 2022. <https://www.oecd.org/tax/beps/beps-actions/>

the action plan aims to mitigate tax code loopholes and country-to-country inconsistencies to ensure corporations cannot shift profits from a country with a high corporate tax rate to countries with a low tax rate. The BEPS package also gives businesses greater certainty by reducing disputes over the application of international tax rules and by standardizing compliance requirements.

On 6 September 2013, at the St. Petersburg Summit, the G20 leaders fully welcomed “the establishment of the G20/OECD BEPS project” and “the OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting.”⁹⁵⁴ G20 leaders and Finance Ministers encouraged all interested countries to participate and aims to expand the coverage of measures to tackle BEPS. The plan brings together 137 countries and jurisdictions to collaborate on implementing its recommendations.

At the 2014 Brisbane Summit, G20 leaders welcomed the progress made on the G20/OECD BEPS Action Plan and “committed to finalising this work in 2015, including transparency of taxpayer-specific rulings found to constitute harmful tax practices.”⁹⁵⁵

On 5 October 2015, the OECD and the G20 “published final reports along with an explanatory statement outlining consensus recommendations that had been reached as part of the BEPS project.”⁹⁵⁶

At the 2015 Antalya Summit, G20 leaders endorsed the measures of the G20/OECD BEPS project. G20 leader stated that “To monitor the implementation of the BEPS project globally, we call on the OECD to develop an inclusive framework by early 2016 with the involvement of interested non-G20 countries and jurisdictions which commit to implement the BEPS project, including developing economies, on an equal footing.”⁹⁵⁷

At the 2016 Hangzhou Summit, G20 leaders reaffirmed their support for international tax cooperation and a globally fair and modern international tax system.⁹⁵⁸ They welcomed the establishment of the G20/OECD Inclusive Framework on BEPS and its first meeting, in Kyoto, Japan. G20 leaders called on all relevant and interested countries and jurisdictions to commit to the BEPS package and join the framework.

At the 2017 Hamburg Summit, G20 leaders reiterated their commitment to the implementation of the BEPS package.⁹⁵⁹

On 20 March 2018, G20 Finance Ministers and Central Bank Governors met prior to the G20 Buenos Aires Summit. The ministers and governors committed to continue working towards a globally fair and modern international tax system, including implementing BEPS, recognizing the importance of addressing the impacts of the digitalisation of the economy. They stated “we welcome the OECD interim report analyzing the impact of the digitalisation of the economy on the international tax system.

⁹⁵⁹ G20 Leaders’ Declaration: Shaping an Interconnected World, G20 Information Centre (Toronto) 8 July 2017. Access Date: 22 January 2022. <http://www.g20.utoronto.ca/2017/2017-G20-leaders-declaration.html>

We are committed to work together to seek a consensus-based solution by 2020, with an update in 2019.”⁹⁶⁰

On 29 June 2019, in Osaka, Japan, G20 leaders reaffirmed the importance of the worldwide implementation of the BEPS package and enhanced tax certainty.⁹⁶¹ They recognized the progress on addressing the tax challenges arising from digitalization and endorsed the work program that consists of a two-pillar approach.

On 21 November 2020, G20 leaders welcomed the public release of Reports on the Blueprints for Pillar 1 and Pillar 2 constructed by the OECD/G20 Inclusive Framework on BEPS.⁹⁶² G20 leaders committed to further progress on both pillars and urged the G20/OECD Inclusive Framework on BEPS to address the remaining issues with a view to reaching a global and consensus-based solution by mid-2021.

On 8 October 2021, the OECD released a statement reflecting the agreement reached by 136 out of the 140 Inclusive Framework member jurisdictions on core design features of the two pillars of the BEPS 2.0 project.⁹⁶³ The BEPS 2.0 project sets out additional tasks and the timeline for the new rules to come into effect. In the communiqué issued on 13 October 2021, Washington, the G20 Finance Ministers endorsed the agreement.

On 31 October 2021, Rome, Italy, the G20 Rome Leaders’ declaration issued embraced the agreement reached regarding global tax changes addressed in the OECD/G20 Inclusive Framework on BEPS in connection with the BEPS 2.0 project. The G20 leaders recognized the Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy and in the Detailed Implementation Plan as “a historic achievement.” The declaration called for swift action as contemplated in the implementation plan included in the agreement, with the aim of “identifying developing countries’ progress made through their participation in the OECD/G20 Inclusive Framework on BEPS and possible areas where domestic resource mobilisation efforts could be further supported.” The declaration called for the new rules set out in the Statement to come into effect globally in 2023.⁹⁶⁴

Commitment Features

The present commitment is situated in the following paragraph of the G20 Rome Leaders’ Declaration on International Taxation:

“The final political agreement as set out in the Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy and in the Detailed Implementation Plan, released by the OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting (BEPS) on 8 October, is a historic achievement through which we will establish a more stable and fairer international tax system. We call on the OECD/G20 Inclusive Framework on BEPS to swiftly develop the model rules and multilateral instruments as agreed in the Detailed Implementation Plan, with a view to ensure that the new rules will come into effect at global level in 2023. We note the OECD report on

Developing Countries and the OECD/G20 Inclusive Framework on BEPS identifying developing countries' progress made through their participation in the OECD/G20 Inclusive Framework on BEPS and possible areas where domestic resource mobilisation efforts could be further supported.”⁹⁶⁵

To define the key terms in this commitment, “call on” generally means “to promote or motion others to associate with the mentioned requirement”⁹⁶⁶ and “the OECD/G20 Inclusive Framework on BEPS” is a forum of 141 countries and jurisdictions (as of December 2021), including all G20 members, that have been collaborating since 2016 to improve international tax rules, to promote a more transparent tax environment and to implement the 15 actions to tackle tax avoidance.⁹⁶⁷ It is often referred to simply as the “Inclusive Framework” or “IF.” Since the G20 is a member of the IF, to “call on” is understood to mean both to promote the commitment and to motion other IF members to take action.

“Swiftly” means “quickly” or “immediately,”⁹⁶⁸ and it should be interpreted that the commitment requires short-term initiatives that will be implemented in the present or near future. As such, prolonged and/or delayed efforts should not count towards this commitment. “Develop” is defined as “creating or producing especially by deliberate effort over time,”⁹⁶⁹ which means only new initiatives that advance the commitment should be counted.

“With a view” means with “the aim or intention of”⁹⁷⁰ and “to ensure” means “to make something certain to happen.”⁹⁷¹ In this commitment, “new rules” refers to the model rules explained above. To “come into effect” means “to become operative”⁹⁷² and “at a global level,” is understood to mean “in relation to the entire world,”⁹⁷³ but in the context of the commitment, it means a majority of IF members. The depth or the strength of the action required to demonstrate compliance is qualified by the phrase “swiftly develop.” This is interpreted to mean the G20 leaders must take new initiatives that will be accomplished within the short timeline proposed in the Detailed Implementation Plan.

“Model rules and multilateral instruments of the Detailed Implementation Plan” refers to the Annex to the “Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy,” published on 8 October 2021 and agreed by 136 IF members in total as of 8 December 2021.⁹⁷⁴ The Annex describes the steps needed to implement the two-pillar solution

⁹⁷⁴ Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy, Organisation for Economic Co-operation and Development (Paris) 8 October 2021. <https://www.oecd.org/tax/beps/statement-on-a-two-pillar-solution-to-address-the-tax-challenges-arising-from-the-digitalisation-of-the-economy-october-2021.pdf>

described in the body of the Statement, as well as a timeline with key milestones for the members of the Inclusive Framework (IF). It also notes that technical assistance for all aspects of implementation will be available to developing countries.

Pillar One of the Detailed Implementation Plan is broken down into Amount A (“the removal of all Digital Service Taxes and other relevant similar measures on all companies”) and Amount B, which is yet to be finalized.⁹⁷⁵ Amount A will be implemented through a Multilateral Convention (MLC) and Amount B will be finalized by Working Party 6 and the Forum on Tax Administration’s (FTA) Mutual Agreement Procedure (MAP) Forum by the end of 2022. The Multilateral Convention will be developed with three main focuses: rules for determining and allocating Amount A and eliminating double taxation; removing all Digital Services Taxes and other relevant similar measures with respect to all companies; and rules for domestic legislation.

Under Pillar One, the MLC should be entered into force and effect in 2023.⁹⁷⁶ However, the text of the MLC and its Explanatory Statement aims to be concluded by early 2022, so that by mid-2022 the MLC will be open to signature. Once signed, it is expected that the signatories will ratify the MLC as quickly as possible to be prepared to implement it in 2023. The second focus on removing Digital Services Taxes should be finalized as part of the adoption of the MLC in mid-2022. The third focus on model rules for domestic legislation should be developed by early 2022. If a G20 member needs to change their domestic laws, they will be required to follow the new model rules, but not all G20 members may need to make changes. Nonetheless, the model rules should be developed by early 2022. All G20 members are part of the Task Force on Digital Economy that has been mandated to develop these aspects of the MLC for early and mid-2022 and 2023, and the FTA MAP forum that has been mandated to finalize the work on Amount B by end of 2022.

Pillar Two of the Detailed Implementation Plan is on model rules to give effect to the Global Anti-Base Erosion (GloBE) rules, to be developed by the end of November 2021. “These model rules will define the scope and set out the mechanics of the GloBE rules. They will include the rules for determining the [Effective Tax Rate] on a jurisdictional basis and the relevant exclusions, such as the formulaic substance based carve-out. The model rules will also cover administrative provisions that address an MNE’s filing obligations and the use of any administrative safe harbours. The model rules will further include transition rules. The model rules are supplemented by commentary that explains the purpose and operation of the rules and addresses the need for a switch-over rule in certain treaties and in circumstances that otherwise commit the contracting parties to the use of the exemption method.”⁹⁷⁷

The model rules to give effect to the Subject to Tax Rule (STTR) aimed to be developed by end of November 2021 and a multilateral instrument to facilitate the implementation of the STTR aims to be

⁹⁷⁵ Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy, Organisation for Economic Co-operation and Development (Paris) 8 October 2021. <https://www.oecd.org/tax/beps/statement-on-a-two-pillar-solution-to-address-the-tax-challenges-arising-from-the-digitalisation-of-the-economy-october-2021.pdf>

⁹⁷⁶ Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy, Organisation for Economic Co-operation and Development (Paris) 8 October 2021. <https://www.oecd.org/tax/beps/statement-on-a-two-pillar-solution-to-address-the-tax-challenges-arising-from-the-digitalisation-of-the-economy-october-2021.pdf>

⁹⁷⁷ Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy, Organisation for Economic Co-operation and Development (Paris) 8 October 2021. <https://www.oecd.org/tax/beps/statement-on-a-two-pillar-solution-to-address-the-tax-challenges-arising-from-the-digitalisation-of-the-economy-october-2021.pdf>

developed by mid-2022.⁹⁷⁸ Latest by end of 2022, an implementation framework should be developed for the coordinated implementation of the GloBE rules.

Based on the two pillars of the Detailed Implementation Plan, G20 members have to meet several deadlines for both model rules and multilateral instruments. If G20 members do not meet those deadlines, it cannot be considered full compliance. The deadlines are as follows:

End of November 2021: model rules for GloBE and for STTR

Early-2022: MLC and Explanatory Statement

Early-2022: develop model rules for domestic legislation

Mid-2022: multilateral instrument to facilitate STTR implementation

Mid-2022: adoption and signing of the MLC, including finalized measures for removing Digital Services Taxes and other similar measures

End of 2022: implementation framework for coordinated implementation of GloBE rules

End of 2022: finalized Amount B

2023: MLC enters into force.

The compliance cycle ends before the end of 2022, as the next summit in Bali will be held at the end of October 2022. As such, G20 members will only be required to meet the deadlines that are before the Bali Summit for full compliance, but the requirements for the end of 2022 should be well underway. Furthermore, early 2022 will be considered as January-April 2022 and mid-2022 will be considered as May-August 2022. End of 2022 can be any time before 31 December 2022.

Full compliance, or a score of +1, is assigned to G20 members that actively and substantially contribute to the development of the model rules and sign on to all proposed multilateral instruments specified above. Developing the model rules and multilateral instruments, as well as signing the MLC and multilateral instruments by the deadlines are required. If G20 members complete the required actions but not by the specified deadlines, it would be considered partial compliance. Furthermore, if a G20 member addresses some but not all the required actions of the Detailed Implementation Plan, it would still be considered partial compliance. Any actions taken that are less than meeting all the deadlines before the Bali Summit is considered partial compliance.

Non-compliance, or a score of -1, is assigned to G20 members that did not take action to develop the model rules specified in the Detailed Implementation Plan and did not sign the multilateral instruments referred in this commitment.

⁹⁷⁸ Statement on a Two-Pillar Solution to Address the Tax Challenges Arising from the Digitalisation of the Economy, Organisation for Economic Co-operation and Development (Paris) 8 October 2021.
<https://www.oecd.org/tax/beps/statement-on-a-two-pillar-solution-to-address-the-tax-challenges-arising-from-the-digitalisation-of-the-economy-october-2021.pdf>

Scoring Guidelines

-1	G20 member has NOT taken measures to develop the model rules OR multilateral instruments as agreed in the Detailed Implementation Plan.
0	G20 member has taken SOME measures to swiftly develop the model rules AND multilateral instruments as agreed in the Detailed Implementation Plan.
+1	G20 member has taken measures to swiftly develop ALL the model rules and multilateral instruments as agreed in the Detailed Implementation Plan and met the deadlines, with a view to ensure that the new rules will come into effect at global level in 2023.

Argentina has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 1 November 2021, Argentina joined a deal brokered by the OECD that aims to more fairly tax multinational companies and impose a minimum tax of 15% on global corporations.⁹⁷⁹ The agreement to set a minimum tax rate is consistent with Pillar 2 of the Detailed Implementation Plan, which calls for the development of Global Anti-Base Erosion Rules.

On 17 November 2021, the Argentinian Government published Decree 796/2021, which exempts the movement of funds collected or paid on behalf of third parties by payment services and entities which collect taxes or payments from public services or other services from the tax on financial transactions.⁹⁸⁰ However, this exemption does not apply to the purchase or sale, exchange, brokerage or any other forms of operation involving digital currencies.⁹⁸¹ These measures partially fulfil the requirements of Pillar 1 of the Detailed Implementation Plan, where a Multilateral Convention should be developed with the aim of removing all Digital Services Taxes and other relevant similar measures with respect to all companies.

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.⁹⁸²

Argentina has not taken action to draft a model treaty provision to give effect to Subject to Tax Rules (STTR) as well as the supplemental commentary that explains the purpose and operation of the STTR. Argentina has also not developed model rules for domestic legislation. As a member of the

⁹⁷⁹ What's in the global tax reform agreed on by the G20?, Japan Times, 1 Nov 2021, Access date: September 23, 2022, <https://www.japantimes.co.jp/news/2021/11/01/business/g20-tax-deal-details/>

⁹⁸² International tax reform: Multilateral Convention to implement Pillar One on track for delivery by mid-2023, OECD (Paris) 11 July 2022. Access Date: 10 October 2022. <https://www.oecd.org/newsroom/international-tax-reform-multilateral-convention-to-implement-pillar-one-on-track-for-delivery-by-mid-2023.htm>

G20/OECD Inclusive Framework, Argentina published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Thus, Argentina receives a score of 0.⁹⁸³

Analyst: Wong Yin Chi Jade

Australia: 0

Australia has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 6 December 2021, Second Commissioner of Australian Taxation Office (ATO) Jeremy Hirschhorn reported in a keynote speech that ATO is focusing on establishing Action 1.⁹⁸⁴ For Pillar One, the current focus is on the development of the text of the Multilateral Convention and model rules for domestic legislation by early next year. For Pillar Two, the current focus is on the development of the model rules and supporting commentary which set out the mechanics of the Global anti-Base Erosion (GloBE) rules and the model treaty provision to give effect to the Subject To Tax Rule (STTR). For the inclusive framework, ATO is collaborating with the Forum on Tax Administration on implementation and administrative issues.

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.⁹⁸⁵

Australia has engaged in soft actions reaffirming their commitment towards the OECD/G20 Inclusive Framework. However, the government has not taken tangible steps to develop model rules or multilateral instruments. Australia has failed to fully satisfy Pillar Two of the Inclusive Framework, as it did not develop model rules for GloBE and STTR by the desired deadline of November 2021. As a member of the G20/OECD Inclusive Framework, Australia published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Thus, Australia receives a score of 0.

Canada: 0

Canada has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 16 December 2021, Prime Minister Justin Trudeau published a letter to Minister of Finance Chrystia Freeland outlining the government’s plans for 2022.⁹⁸⁸ One of Canada’s goals was continuing to work with global partners to bring the OECD Inclusive Framework into effect to improve international taxation on the world’s largest corporations. However, Prime Minister Trudeau noted that Canada will be “moving ahead with legislation to implement a Digital Services Tax (DSTs),” which though would come into effect by 2024, it would be payable on revenues earned as early as 1 January 2022, if the treaty does not come into force. Despite verbal commitment to the OECD Inclusive Framework, Canada’s plans to move forward with a separate DST was against the proposed policy of the interim period until Pillar One of the OECD Inclusive Framework comes into force.

On 29 April 2022, the Department of Finance drafted new legislation proposal aimed to quell cross-border tax avoidance arrangements.⁹⁸⁹ The legislation would be consistent with the Action 2 Report of the OECD/G20 Inclusive Framework on “Neutralizing the Effects of Hybrid Mismatch Arrangements.” Chapters 1 and 2 of the Action 2 Report would apply as of 1 July 2022 while the remaining recommendations will be addressed at a later date.

On 3 June 2022, Prime Minister Justin Trudeau released a joint statement with the Prime Minister of Spain.⁹⁹⁰ They reaffirmed their commitment to fostering equitable and sustainable economic growth that is guided by the rules-based multilateral trading system and World Trade Organisation. They emphasized their support for the implementation of the two-pillar solution of the G20/OECD Inclusive Framework on BEPS in order to diminish the tax challenges arising from globalization and digitalization.

By 11 July 2022, Canada has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”⁹⁹¹

Canada has partially complied with the commitment to further progress on both of the G20/OECD Inclusive Framework on BEPS. Canada has failed to act in accordance with the interim plans of Pillar One of the OECD Inclusive Framework by legislating a separate DST. Canada has also failed to fully satisfy Pillar Two of the Inclusive Framework, as it did not develop model rules for Global anti-Base Erosion and STTR by the desired deadline of November 2021.

Thus, Canada receives a score of 0.

Analyst: Chiara Barsanti

China: 0

China has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 15 December 2021, the Customs Tariff Commission of the State Council announced a plan to grant zero preferential tax rate treatment to 98 per cent of imported goods from least-developed countries that have established diplomatic ties with China.⁹⁹² The Commission published a comprehensive document listing each of the goods benefitted by this policy. The specific timeline and logistics of this policy were to be established later.⁹⁹³

On 31 December 2021, the Ministry of Finance and the State Administration of Taxation declared a deadline extension for preferential tax policies for subsidies, including those for foreign individuals, until 31 December 2023.⁹⁹⁴ The government also announced that all sole proprietorships and partnerships with equity investments will be subject to audits for reporting purposes as of 1 January 2022.

On 7 January 2022, the General Office of the Ministry of Finance issued a notice and specific data specifications for its initiative to promote electronic reporting of non-tax income.⁹⁹⁵ The Office posted relevant files online to be used in issuing letters for invoicing, write-off, and source control purposes.

http://gks.mof.gov.cn/guizhangzhidu/202201/t20220105_3780823.htm

On 24 February 2022, the Ministry of Finance and the State Administration of Taxation released information on the continuation of the implementation of preferential tax policies for commodity reserves.⁹⁹⁶ Specifically, the government created exemptions from stamp duties for businesses with commodity reserves within their treasuries, including soybeans, oil, cotton, sugar, and meat.

On 25 May 2022, China deposited its instruments of approval for the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS.⁹⁹⁷ The Convention will enter into force on 1 September 2022.

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.⁹⁹⁸

China has partially complied with its commitment to further progress on both of the G20/OECD Inclusive Framework on BEPS. China has implemented new policies directed towards strengthening financial market infrastructure, implementing measures to improve transparency and regulatory oversight. Although these measures somewhat contribute to meeting the commitment, they are not directly targeted at the goals of the Detailed Implementation Plan. As a member of the G20/OECD Inclusive Framework, China published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Thus, China receives a score of 0.

France: 0

France has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 9 November 2021, the Ministry of Finance announced the signing of a new treaty between France and Belgium to address the avoidance of double taxation of income and wealth taxes.⁹⁹⁹ This new treaty and the protocols were published on 16 November 2021 and provided an update of the current treaty which was in place since 10 March 1964. The updated treaty better aligns the protocols and principles with the international principles established by the OECD and includes provisions to ensure the implementation of anti-BEPS measures. The treaty will enter into force on 1 January 2023 following the ratification process being completed by both countries.

On 13 December 2021, through the Appeals Court in Paris, France lowered a penalty placed on the Union Bank of Switzerland for aiding tax evasion of wealthy individuals in France.¹⁰⁰⁰ The court upheld that the bank was guilty of promoting illegal banking services and money laundering.

On 31 December 2021, the 2022 French Finance Law (Law No. 2021-1900) was published in the French Official Gazette.¹⁰⁰¹ It details new tax measures pertaining to multinational corporations with entities that have interest ownership in France. One updated tax measure lowers the regular corporate income tax rate for all companies to 25 per cent, with a reduced rate benefit for certain small and medium enterprises.

On 7 February 2022, France published the revised text of a tax treaty with Chile in accordance with the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI).¹⁰⁰² Applicable parts of the MLI on the previous France-Chile 2004 treaty include: taxes withheld at source on amounts paid or credited to non-residents, tax levies by France and tax levies by Chile.

On 18 March 2022, France moved to delay implementation of the OECD/Global anti-Base Erosion Rules, originally agreed upon in December 2021.¹⁰⁰³ Measures agreed upon include the 15 per cent global minimum corporation tax on multinational enterprises and other measures to ensure corporations pay income taxes in jurisdictions where they have a customer base but not necessarily a fixed address. France put forward a proposed compromise text at the Economic and Financial Affairs Council meeting on 15 March 2022.

On 2 May 2022, it was reported that on 4 February 2022, France and Denmark concluded an agreement to avoid double taxation.¹⁰⁰⁴ At this time, the agreement is not yet active since the legislative process must be completed. Specifically, France must have a parliamentary vote on approval before ratification. The treaty covers income taxes only, not wealth tax nor donations and inheritances. Furthermore, there are provisions for French firms – partnerships or entities, with residence in France.

By 11 July 2022, France has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰⁰⁵

Germany: 0

Germany has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 16 January 2022, Minister of Finance Christian Lindner expressed his intentions to implement the 15 per cent global minimum tax.¹⁰⁰⁶ He stated that the ministry wants to introduce regulations on 1 January 2023 and will do so by presenting the draft law promptly.

On 18 January 2022, Minister Lindner reaffirmed that the introduction of the global minimum effective tax is a priority for the German government in a press conference following the Economic and Financial Affairs Council meeting.¹⁰⁰⁷

On 2 May 2022, Chancellor Olaf Scholz met with Indian Prime Minister Narendra Modi to discuss about the reformation of World Trade Organization and the negotiations between the European Union and India regarding “a Free Trade Agreement, an Investment Protection Agreement and Agreement on Geographical Indications.”¹⁰⁰⁸ Both parties expressed their support for the two pillar OECD solution on BEPS and their commitment to quickly amend the double tax avoidance agreement accordingly.

On 27 and 28 June 2022, Director General of International Taxation at the Federal Ministry of Finance and Vice Chair of the Committee on Fiscal Affairs Martin Kreienbaum attended OECD’s annual tax conference to discuss the adoption of both pillars of the BEPS framework. Director Kreienbaum assured members that despite Hungary’s objection to the implementation of pillar 2, Germany, among other EU countries, would implement the directive if unanimity is not agreed to. Additionally, he discussed the details of the draft EU directive, including a Qualified Domestic Minimum Top-up Tax.

By 11 July 2022, Germany has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a

comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰⁰⁹

On 9 September 2022, Minister Lindner signed a joint statement with counterparts in France, Italy, the Netherlands and Spain announcing a plan to implement the minimum global tax rate in 2023 “by any possible legal means” even if unanimity is not reached by EU member states. They also committed to signing a multilateral convention by mid-2023.

Germany has publicly supported and set an expected date for regulations regarding the minimum rate, supporting Pillar 2 of the G20/OECD Inclusive Framework on BEPS. No solid action, however, has been implemented within the monitoring period and Germany has failed to meet the November 2021 deadline to develop model rules for the Subject to Tax Rule and Global anti-Base Erosion rules.

Thus, Germany receives a score of 0.

Indonesia: 0

Indonesia has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 1 December 2021, the government of Indonesia made available a tax exemption for dividend income that was announced in the Omnibus Law of November 2020.¹⁰¹³ This rule makes dividend income 100 per cent tax exempt as long as the amount is reinvested in Indonesia.

On 10 December 2021, the government approved legislation to overhaul the tax code in various ways.¹⁰¹⁴ Among these changes, financial institutions were allowed to begin deducting bad debts for tax purposes. Furthermore, the value added tax rate was set to be increased to 11 per cent as of 1 April 2022. The legislation also set in motion the implementation of a carbon tax in phases.

On 23 December 2021, the Ministry of Finance issued guidance on the details of the Voluntary Disclosure Program (VDP) established under the tax harmonisation law of November 2021.¹⁰¹⁵ The VDP establishes the regulations surrounding the repatriation of assets and details the process through which a taxpayer may disclose relevant investments.

On 1 January 2022, the Director General of Taxes issued a notice that an agreed-upon Tax Treaty with the United Arab Emirates would come into effect for all income incurred from 1 January 2022 onwards.¹⁰¹⁶ The new treaty replaced a prior treaty from 1995, introducing changes in tax treatment for dividends, interest, fees for technical service, capital gains, and more.

On 1 May 2022, the Ministry of Finance of Indonesia's legislation concerning the taxation of cryptocurrency assets came into effect.¹⁰¹⁷ Miners and traders are now taxed at a 0.1% rate, while platforms are subject to corporate taxation.

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published "presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest

multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.¹⁰¹⁸

Indonesia has partially complied with its commitment for the Development of an Inclusive Framework regarding International Taxation, and BEPS though missing the deadline for model rule for Global anti-Base Erosion and for Subject to Tax Rule. As a member of the G20/OECD Inclusive Framework, Indonesia published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Thus, Indonesia receives a score of 0.

Analyst: Raza Akbari

Italy: 0

Italy has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 23 November 2021, the Italian Tax Authorities launched a public consultation on a draft circular concerning the hybrid mismatch rules.¹⁰¹⁹ The Draft Circular outlines examples and interpretations on the provisions governed by decree 142/2018 which implemented the European Union Anti-Tax Avoidance directive in domestic law.

On 31 December 2021, the Italian Tax authorities issued a ruling on the Value-Added Tax (VAT) regime with respect to its applicability to the assignment of non-performing loans (NPLs).¹⁰²⁰ The regime now helps to focus on the determination of the taxable base for VAT purposes relating to transactions.

By 11 July 2022, Italy has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰²¹

From taking action to engage in public consultation on a draft circular for hybrid mismatch rules to implementing an NPL adjustment to their current VAT regime, Italy has made strides thus far to improve its taxation of multinational corporations. Nevertheless, Italy has not complied with its commitment for the Development of an Inclusive Framework regarding International Taxation, and BEPS.

Thus, Italy receives a score of 0.

Japan: 0

Japan has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

By 11 July 2022, Japan has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰²²

Japan has taken action to introduce Pillar Two and has contributed to a new Progress on Pillar One, which indicates that the G20/OECD Inclusive Framework is on track to implement the BEPS Action Plan.

Thus, Japan receives a score of 0.

Analyst: Julian Lam

Korea: 0

Korea has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 9 February 2022, the Industry Ministry held talks with the OECD to urge further discussion on a global tax deal to prevent exporters from shouldering an excessive economic burden.¹⁰²³ The delegation stressed the need to address technical issues of contention regarding the global minimum corporate tax and their impacts on domestic exporters.

By 11 July 2022, Korea has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰²⁴

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.¹⁰²⁵

Korea has taken some action to comply with its commitment for the Development of an Inclusive Framework regarding International Taxation, and BEPS. Nevertheless, Korea has not met the November 2021 deadline to develop model rules for Subject to Tax Rule and the Global anti-Base Erosion rules.

Thus, Korea receives a score of 0.

Analyst: Julian Lam

Mexico: 0

Mexico has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 1 January 2022, Mexico introduced Aprovechamiento, a new tax of two per cent to delivery apps of goods, merchandise and food at Mexico City.¹⁰²⁶ Mexico has also subjected any paid act, entertainment, fun, movie or theatre playing, broadcasted digitally in Mexico city to a 8 per cent tax. This directly contradicts Pillar 1 of the Detailed Implementation Plan, where a Multilateral Convention should be developed with the aim of removing all Digital Services Taxes and other relevant similar measures with respect to all companies.

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰²⁷

Mexico has contributed to a new Progress on Pillar One, which indicates that the G20/OECD Inclusive Framework is on track to implement the BEPS Action Plan.

Thus, Mexico receives a score of 0.

Saudi Arabia: 0

Saudi Arabia has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

The strategies devised for bringing both pillars to effect were related to three main domains – the removal of Zakat, broadening of the Corporate Income Tax, and the base amendment of Corporate Income Tax rate.¹⁰²⁹

On 13 January 2020, Saudi Arabia deposited its instrument of ratification for the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) with the OECD Secretary-General.¹⁰³⁰ This was brought into effect on 1 May 2020 at which point 14 Saudi Arabian double tax treaties were amended.

In May 2020, the General Authority of Zakat and Tax released the second edition of Transfer Pricing Guidelines aimed at providing more information for OECD compliant approaches for international taxation.¹⁰³¹

On 28 May 2021, the Zakat, Tax and Customs Authority published official guidelines and standards regarding the implementation of e-invoicing, which remained in effect till 4 December 2021.¹⁰³²

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.¹⁰³³

Saudi Arabia has shown a partial commitment for achieving the guidelines defined by the G20/OECD and the Inclusive Framework, regarding International Taxation, and BEPS. Information regarding the term limits, fiscal plans, implementation steps, tax rates, surrounding Pillar 1 and Pillar 2 was limited, and no action regarding OECD was implemented. As a member of the G20/OECD Inclusive

Framework, Saudi Arabia published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Thus, Saudi Arabia receives a score of 0.

Analyst: Amardeep Singh

South Africa: 0

South Africa has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 10 December 2022, the South African Revenue Service published a high-level model and draft legislation framework for the introduction of an advance pricing agreement (APA) program that aims to enhance the efficiency of the OECD/G20's BEPS Project and the OECD's Inclusive Framework, especially regarding the OECD Model Tax Convention on Income and Capital and the United Nations equivalent.¹⁰³⁴ According to the OECD, an APA is an “arrangement that determines, in advance of controlled transactions, an appropriate set of criteria ... for the determination of the transfer pricing for those transactions over a fixed period of time.”¹⁰³⁵ Advance pricing agreements would be implemented to avoid disputes and create an environment of tax certainty that investors look for before they invest.

On 25 March 2022, the South African Cabinet approved the submission of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) to parliament for ratification.¹⁰³⁶ If the internal ratification process is completed, and the MLI comes into force for its covered agreements (tax treaties), it would enhance the swift implementation of the tax treaty-related measures arising from the G20/OECD BEPS project, without the need to renegotiate each double tax treaty.

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.¹⁰³⁷

South Africa has partially complied with its commitment to further progress on both G20/OECD and Development Inclusive Framework on BEPS. It has proposed frameworks that once implemented would advance the goals set out in OECD and BEPS. As a member of the G20/OECD Inclusive Framework, South Africa published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Turkey: 0

Turkey has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

Turkey has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 22 November 2021, Turkey and the United States released a statement reinforcing their commitment to not impose unilateral taxation Digital Service Taxes in compliance with the Detailed Implementation Plan specifications for Pillar One of the Two-Pillar Solution.¹⁰³⁸

On 11 July 2022, as a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises” and indicated that the G20/OECD Inclusive Framework on BEPS is on track to implement the BEPS Action Plan.¹⁰³⁹

Turkey has taken some actions related to Pillars One and Two of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework, Turkey published a new Progress Report which outlines that the Framework is on track to implement the BEPS Action Plan.

Thus, Turkey receives a score of 0.

Analyst: Anabit Hakobyan

United Kingdom: 0

The United Kingdom has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 30 November 2021, the United Kingdom announced a review of tax administration for large businesses. Stakeholder feedback included securing upfront certainty on tax treatment, in particular for the BEPS project.¹⁰⁴⁰ In response, the government will invest to enable Her Majesty’s Revenue and Customs (HMRC) to develop a programme of new “Guidelines for Compliance,” which will provide practical guidance and greater transparency.

¹⁰⁴⁰ Review of tax administration for large businesses, GOV.UK (London) 30 November 2021. Access Date: 13 February 2022. <https://www.gov.uk/government/publications/review-of-tax-administration-for-large-businesses/review-of-tax-administration-for-large-businesses>

On 11 January 2022, Her Majesty's Treasury and HMRC launched a public consultation seeking views on the implementation of Pillar Two, which aims to ensure multinational enterprises operating within the United Kingdom pay a minimum effective tax rate of 15 per cent.¹⁰⁴¹ The consultation includes a number of issues, including accounting matters, charging mechanisms, reporting procedures and potential safe harbors.

By 11 July 2022, the UK has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published "presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises."¹⁰⁴²

The United Kingdom has addressed how Pillar Two rules should be launched by the specified deadline of early 2022. However, the government has not addressed the reallocation of tax rights or development of model rules under Pillar One by the deadline, and no action regarding OECD was implemented.

Thus, the United Kingdom receives a score of 0.

Analyst: Eva Li

United States: 0

The United States has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 19 November 2021, the House of Representatives passed the Build Back Better Act (BBBA).¹⁰⁴³ The BBBA intends to prevent corporations from exporting jobs and profits overseas by implementing a global minimum tax, in line with the G20/OECD Inclusive Framework. The estimated offset of the policy is USD350 billion. If made into law, the BBBA will establish international taxation rules that satisfy Pillar Two of the OECD Inclusive Framework.¹⁰⁴⁴

On 22 November 2021, the US and Turkey released a joint statement regarding the treatment of Digital Services Taxes (DSTs) during the interim period prior to the implementation of Pillar One of the G20/OECD Inclusive Framework.¹⁰⁴⁵ The US promised to remove the suspended additional duties

on imported goods from Turkey that had been previously adopted in the DST Section 301 investigation. This decision marks a step towards multilateral commitment to Pillar One.¹⁰⁴⁶

On 24 November 2021, the Department of the Treasury released a statement regarding the transition from existing Indian equalisation levy to the new multilateral solution agreed upon by the OECD Inclusive Framework.¹⁰⁴⁷ In return, the US promised to remove the currently suspended additional duties on imported goods from India that had been adopted in the DST Section 301 investigation. The agreement marks a further step to establishing appropriate DSTs during the interim period prior to the implementation of Pillar One.

On 15 December 2021, Trade Representative Adam Hodge released a statement in response to Canada's announcement to continue pursuing a unilateral DST which will discriminate against American companies.¹⁰⁴⁸ Hodge noted that Canada's proposed DST would cause retroactive tax liabilities that are not in line with the OECD's Pillar One Inclusive Framework. The statement reinforces the US's commitment to working towards Pillar One.

On 16 December 2021, the Congressional Research Service updated its report on Issues in International Corporate Taxation.¹⁰⁴⁹ It discussed the variety of proposals put further by the Congress and President Joe Biden to strengthen international tax rules in relation to foreign-source income. Notably, President Biden's budget proposals would increase the corporate tax rate to 28 per cent and impose a 15 per cent minimum tax on companies with more than USD2 billion in income. Senate Finance Committee Chair Ron Wyden, D-Ore., Senator Sherrod Brown, D-Ohio and Senator Mark Warner, D-Va., proposed a higher-tier tax on base erosion payments. These proposals intend to satisfy Pillar Two of the OECD Inclusive Framework.

On 18 February 2022, the Department of the Treasury released a statement on the G20 Finance Ministers and Central Bank Governors meeting in Jakarta, Indonesia.¹⁰⁵⁰ Section 4 reaffirmed their commitment to the OECD/G20 Inclusive Framework on BEPS with the promise of developing model rules and multilateral tools to achieve the project goals.

On 28 March 2022, President Joe Biden announced changes to international tax rules in line with Pillar 2 Global anti-Base Erosion Rules rules of the OECD/G20 BEPS project.¹⁰⁵¹ It would enact a 15 per cent minimum undertaxed profits rule and a 15 per cent qualified domestic minimum top-up tax.

By 11 July 2022, the US has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-

¹⁰⁵¹ The Biden Administration Proposes Changes to the U.S. International Tax Rules (New York) 22 April 2022. Access Date: 7 May 2022. https://www.proskauertaxtalks.com/2022/04/the-biden-administration-proposes-changes-to-the-u-s-international-tax-rules/#_ftn1

2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰⁵²

The United States has taken some measures to swiftly develop the model rules and multilateral instruments as agreed in the Detailed Implementation Plan. However, the United States has failed to fully satisfy Pillar Two of the Inclusive Framework because it did not develop model rules for the Subject to Tax Rule and the Global anti-Base Erosion rules by the November 2021 deadline.

Thus, the United States receives a score of 0.

Analyst: Chiara Barsanti

European Union: 0

The European Union has partially complied with the commitment to further progress on both of the G20/Organisation for Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS).

On 10 December 2021, the European Union and the OECD decided to extend the program “Improving Domestic Resource Mobilization through the Establishment of an Efficient Tax System and Enhanced Tax Transparency” with Tunisia.¹⁰⁵³ This program will also be expanded to include two new key areas, including the implementation of Pillar One and Pillar Two.

On 22 December 2021, the EU presented an initiative to fight the misuse of shell entities for improper tax purposes.¹⁰⁵⁴ Once approved, the proposal would come into effect on 1 January 2024. The proposal will make use of new monitoring and reporting requirements, establish transparency, and allow national taxation authorities to identify these problem firms. This serves to fight against tax avoidance and evasion and support fair taxation.

On 22 December 2021, the EU proposed a Directive to set the minimum tax rate for multinational enterprises (MNEs).¹⁰⁵⁵ The proposal follows the international agreement of 137 countries that has a set principle of a 15 per cent tax rate to be applied within the European Union.

On 22 March 2022, Council Directive EU/2018/822 of 25 May 2018 was amended to form DAC6, a regime that governs tax disclosure and reporting requirements.¹⁰⁵⁶ A 6-month deferral of the deadline was taken by most EU member states due to COVID-19 complications. DAC6 “covers the mandatory disclosure and automatic exchange of information among EU states in the field of taxation related to reportable cross-border arrangements.”

¹⁰⁵² International tax reform: Multilateral Convention to implement Pillar One on track for delivery by mid-2023, OECD (Paris) 11 July 2022. Access Date: 10 October 2022. <https://www.oecd.org/newsroom/international-tax-reform-multilateral-convention-to-implement-pillar-one-on-track-for-delivery-by-mid-2023.htm>

¹⁰⁵⁴ Fair Taxation: Commission proposes to end the misuse of shell entities for tax purposes within the EU, Press Release (Brussels) 22 December 2021. Access Date: 11 February 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_21_7027

¹⁰⁵⁵ Fair Taxation: Commission proposes swift transposition of the international agreement on minimum taxation of multinationals, Press Release (Brussels) 22 December 2021. Access Date: 11 February 2022. https://ec.europa.eu/commission/presscorner/detail/en/ip_21_7028.

¹⁰⁵⁶ DAC6: EU’s New Mandatory Disclosure Regime. Bloomberg Tax (Location unknown) 22 March 2022. Access Date: 6 May 2022. <https://pro.bloombergtax.com/brief/complying-with-dac6/>

On 28 April 2022, the EPP Group and European Parliament called for the “most reluctant states, such as Poland” to stop blocking the EU plan for the implementation of a minimum corporate tax rate.¹⁰⁵⁷ This would aid in ending aggressive tax planning, fair tax taxation of MNEs, and overall implementation of the OECD global agreement.

By 11 July 2022, the EU has scheduled plans to introduce Pillar Two, which introduces a 15 per cent global minimum corporate tax rate and is on track to finalize a new Multilateral Convention by mid-2023 as part of the G20/OECD Inclusive Framework on BEPS. As a member of the G20/OECD Inclusive Framework on BEPS, a new Progress Report on Pillar One was published “presenting a comprehensive draft of the technical model rules to implement a new taxing right that will allow market jurisdictions to tax profits from some of the largest multinational enterprises.”¹⁰⁵⁸

The European Union has somewhat complied with its commitment to the BEPS framework.

Thus, the European Union receives a score of 0.

Background

According to the Financial Action Task Force (FATF), “corporate vehicles...have been misused for illicit purposes, including money laundering (ML), bribery and corruption, insider dealings, tax fraud, terrorist financing (TF), and other illegal activities.”¹⁰⁵⁹ However, “The misuse of corporate vehicles could be significantly reduced if information regarding both the legal owner and the beneficial owner, the source of the corporate vehicle’s assets, and its activities were readily available to the authorities,” so the FATF “has established standards on transparency, so as to deter and prevent the misuse of corporate vehicles.” In order to “promote financial regulations that reduce risks and prevent future financial crises,” the G20 has “[implemented] the FATF standards on beneficial ownership.”

At the 2008 Washington Summit, the G20 members first emphasized the importance of promoting integrity in financial markets, calling on members to “implement national and international measures that protect the global financial system from uncooperative and non-transparent jurisdictions that pose

¹⁰⁵⁹ FATF Guidance on Transparency and Beneficial Ownership (Paris) 2014. Access Date: 8 December 2021. <https://www.fatf-gafi.org/media/fatf/documents/reports/Guidance-transparency-beneficial-ownership.pdf>

risks of illicit financial activity” and urging the Financial Action Task Force to “continue its important work against money laundering and terrorist financing.”¹⁰⁶⁰

At the 2009 Pittsburgh Summit, the G20 members reiterated their commitment “to maintain the momentum in dealing with tax havens, money laundering, proceeds of corruption, terrorist financing, and prudential standards,” welcomed “the progress made by the FATF in the fight against money laundering and terrorist financing,” and called upon “the FATF to issue a public list of high risk jurisdictions by February 2010.”¹⁰⁶¹

At the 2010 Toronto Summit, the G20 members re-stated their goal of addressing “non-cooperative jurisdictions based on comprehensive, consistent, and transparent assessment with respect to tax havens, the fight against money laundering and terrorist financing and the adherence to prudential standards,” and reaffirmed their support for “the work of the FATF and FATF-Style Regional Bodies in their fight against money laundering and terrorist financing and regular updates of a public list on jurisdictions with strategic deficiencies,” encouraging “the FATF to continue monitoring and enhancing global compliance with the anti-money laundering and counter-terrorism financing international standards.”¹⁰⁶²

At the 2010 Seoul Summit, the G20 members “reiterated our commitment to preventing non-cooperative jurisdictions from posing risks to the global financial system and welcomed the ongoing efforts by the Financial Stability Board (FSB), Global Forum on Tax Transparency and Exchange of Information (Global Forum), and the FATF, based on comprehensive, consistent and transparent assessment.”¹⁰⁶³

At the 2012 Los Cabos Summit, the G20 members declared their support for “the renewal of the FATF mandate, thereby sustaining global efforts to combat money laundering and the financing of terrorism and proliferation of weapons of mass destruction,” and welcomed “the adoption of the revised FATF standards” and “the progress made by FATF in identifying and monitoring high-risk jurisdictions with strategic Anti-Money Laundering/Counter-Terrorist Financing (AML/CFT) deficiencies, using AML/CFT tools in the fight against corruption, improving transparency of corporate vehicles and increasing cooperation against tax crimes, addressing the risks posed by tax havens, as well as in increasing the reach and the effectiveness of AML/CFT measures by also considering financial inclusion efforts.”¹⁰⁶⁴

At the 2013 St. Petersburg Summit, the G20 members renewed their “commitment to FATF’s work in fighting money laundering and terrorism financing and its key contribution into tackling other crimes such as tax crimes, corruption, terrorism, and drug trafficking,” encouraging “all countries to tackle the risks raised by opacity of legal persons and legal arrangements” and committing “to take measures to ensure that we meet the FATF standards regarding the identification of the beneficial owners of companies and other legal arrangements such as trusts that are also relevant for tax purposes,” ensuring “this information is available in a timely fashion to law enforcement, tax collection agencies and other

relevant authorities in accordance with the confidentiality legal requirements, for example through central registries or other appropriate mechanisms.”¹⁰⁶⁵

At the 2015 Antalya Summit, the G20 members continued their engagement by calling on “the FATF to report back to our Finance Ministers and Central Bank Governors by their first meeting in 2016 on the steps countries are taking to address the weaknesses identified to cut off terrorism-related financial flows.”¹⁰⁶⁶

At the 2016 Hangzhou Summit, the G20 members acknowledged that “Financial transparency and effective implementation of the standards on transparency by all, in particular with regard to the beneficial ownership of legal persons and legal arrangements, is vital to protecting the integrity of the international financial system, and to preventing misuse of these entities and arrangements for corruption, tax evasion, terrorist financing and money laundering,” urging “the FATF and the Global Forum to make initial proposals by the Finance Ministers and Central Bank Governors Meeting in October on ways to improve the implementation of the international standards on transparency, including on the availability of beneficial ownership information of legal persons and legal arrangements, and its international exchange.”¹⁰⁶⁷

At the 2017 Hamburg Summit, the G20 members agreed “advance the effective implementation of the international standards on transparency and beneficial ownership of legal persons and legal arrangements, including the availability of information in the domestic and cross-border context, welcoming “the work by the FATF.”¹⁰⁶⁸

At the 2019 Osaka Summit, the G20 members reaffirmed their “commitment to applying the recently amended FATF Standards to virtual assets and related providers for anti-money laundering and countering the financing of terrorism,” and called “for the full, effective and swift implementation of the FATF Standards.”¹⁰⁶⁹

At the 2020 Riyadh Summit, the G20 members expressed their support for “the FATF, as the global standard-setting body for preventing and combating money laundering, terrorist financing and proliferation financing,” and reiterated their “call for the full, effective and swift implementation of the FATF standards worldwide.”¹⁰⁷⁰

At the 2021 Rome Summit, the G20 members reasserted their “full support for the FATF and the Global Network,” noting “the relevance of the risk-based approach of the FATF recommendations with the aim to ensure legitimate cross-border payments and to promote financial inclusion” and encouraged the “strengthening the FATF recommendations to improve beneficial ownership transparency.”¹⁰⁷¹

Commitment Features

The G20 commitment is: “We will also provide competent authorities with adequate, accurate and up-to-date information by adopting legally appropriate measures to improve international and domestic beneficial ownership transparency of legal persons and arrangements and real estate, especially transnational flows, in line with the Financial Action Task Force recommendations.”

To “provide” is understood as “to supply or make available.”¹⁰⁷² In this context, to “provide” competent authorities with information means to supply them with it or to make it available to them. Measures that provide competent authorities with information within the meaning of this commitment make relevant data available to them.

“Competent authorities” is understood as “all public authorities with designated responsibilities for combating money laundering and/or terrorist financing.”¹⁰⁷³ In this context, “competent authorities” includes “the [Financial Intelligence Unit] (FIU); the authorities that have the function of investigating and/or prosecuting money laundering, associated predicate offences and terrorist financing, and seizing/freezing and confiscating criminal assets; authorities receiving reports on cross-border transportation of currency and [Bearer Negotiable Instruments] (BNIs); and authorities that have AML/CFT supervisory or monitoring responsibilities aimed at ensuring compliance by financial institutions and [Designated Non-Financial Businesses and Professions] (DNFBPs) with AML/CFT requirements” and excludes “[Self-Regulatory Bodies] SRBs.” Measures that provide information to competent authorities within the meaning of this commitment transmit such data to an authority within a class enumerated herein.

“Adequate” is understood as “sufficient for a specific need or requirement.”¹⁰⁷⁴ In this context, “adequate” information refers to information which is enough to fulfil its purpose. Measures that provide adequate information within the meaning of this commitment deliver information on transnational corruption that is sufficient to serve its prescribed purpose.

“Accurate” is understood as “free from mistakes or errors.”¹⁰⁷⁵ In this context, “accurate” information refers to “information that has been verified for accuracy.”¹⁰⁷⁶ Measures that provide accurate information within the meaning of this commitment deliver information that has been verified as correct and devoid of errors.

“Up-to-date” is understood as “kept accurate, and as current as possible.”¹⁰⁷⁷ In this context, “up-to-date” information refers to that which is updated promptly when changes to it occur. Measures that provide up-to-date information within the meaning of this commitment deliver information that is updated in a timely manner to reflect its current accuracy.

“Information” is understood as details concerning the beneficial ownership of concerned legal entities.¹⁰⁷⁸ In this context, such “information” refers to “the identity of the natural persons who ultimately have a controlling ownership interest in a legal person” and/or “the identity of the natural persons (if any) exercising control

of the legal person through other means.”¹⁰⁷⁹ Measures that provide information within the meaning of this commitment deliver details on the identities of the natural persons owning and/or controlling concerned legal entities.

To “adopt” is understood as “to accept formally and put into effect.”¹⁰⁸⁰ In this context, “adopting” legally appropriate measures refers to pronouncing and implementing them. Measures that adopt legally appropriate measures within the context of this commitment have them accepted and implemented by the competent authorities.

“Legally appropriate” is understood as suitable in consideration of countries’ “diverse legal, administrative and operational frameworks and different financial systems.”¹⁰⁸¹ In this context, “legally appropriate” measures are those which implement a prescribed international standard in a given country “through measures adapted to their particular circumstances.” Measures that are legally appropriate within the meaning of this commitment fulfil the FATF recommendations in accordance with the applicable domestic legal framework.

“Measures” is understood as “a step planned or taken as a means to an end.”¹⁰⁸² In this context, “measures” refers to steps taken to improve beneficial ownership transparency. Measures within the meaning of this commitment include both those set out in law and those which are not legally enforceable, provided they advance the stated objective in improving beneficial ownership transparency.¹⁰⁸³

To “improve” is understood as to “make or become better.”¹⁰⁸⁴ In this context, to “improve” refers to improving beneficial ownership transparency. Measures that improve beneficial ownership transparency within the meaning of this commitment increase or enhance it by aiding disclosure to the competent authorities of the beneficial owners of concerned legal entities.

A “beneficial owner” is understood as “the natural person(s) who ultimately owns or controls a customer and/or the natural person on whose behalf a transaction is being conducted. It also includes those persons who exercise ultimate effective control over a legal person or arrangement (through a

chain of ownership or by means of control other than direct control).”¹⁰⁸⁵ Measures that improve beneficial ownership transparency within the meaning of this commitment do so in relation to natural persons who possess ultimate ownership or exercise ultimate control over a concerned legal entity.

“Transparency” is understood as “characterized by visibility or accessibility of information especially concerning business practices.”¹⁰⁸⁶ In this context, beneficial ownership transparency refers to the “obtaining and recording of basic and beneficial ownership information.”¹⁰⁸⁷ Measures that improve beneficial ownership transparency within the meaning of this commitment enhance the visibility or accessibility of information concerning the beneficial ownership of concerned legal entities.

“Legal persons” is understood as “any entities other than natural persons that can establish a permanent customer relationship with a financial institution or otherwise own property. This can include companies, bodies corporate, foundations, *anstalt*, partnerships, or associations and other relevantly similar entities.”¹⁰⁸⁸ In this context, “property” refers to “assets of every kind, whether corporeal or incorporeal, moveable or immovable, tangible or intangible, and legal documents or instruments evidencing title to, or interest in such assets.” Measures that improve beneficial ownership transparency of legal persons within the meaning of this commitment aid disclosure to the competent authorities of the identities of beneficial owners of companies and other non-natural person actual or potential property owners.

“Legal arrangements” is understood as “express trusts or other similar legal arrangements.”¹⁰⁸⁹ In this context, an express trust “refers to a trust clearly created by the settlor, usually in the form of a document e.g. a written deed of trust. They are to be contrasted with trusts which come into being through the operation of the law and which do not result from the clear intent or decision of a settlor to create a trust or similar legal arrangements (e.g. constructive trust).” Measures that improve beneficial ownership transparency of legal arrangements within the meaning of this commitment aid disclosure to the competent authorities of the identities of beneficial owners of settlor-created trusts.

“Real estate” is understood as “property in buildings and land.”¹⁰⁹⁰ In this context, the beneficial ownership transparency of real estate concerns the transparency of the beneficial ownership of such property. Measures that improve beneficial ownership transparency of real estate within the meaning of this commitment aid disclosure to the competent authorities of the identities of beneficial owners of property in buildings and land.

A “flow” is understood as “a smooth uninterrupted movement or progress.”¹⁰⁹¹ In this context, a transnational flow refers to a movement of beneficial ownership across national boundaries. Measures

that improve beneficial ownership transparency of transnational flows aid the disclosure of the identities of beneficial owners of legal persons and arrangements and real estate across jurisdictions.

The “Financial Action Task Force recommendations” refers to those published by the FATF in 2012 entitled “International Standards on Combating Money Laundering and the Financing of Terrorism & Proliferation” and last updated in October 2021.¹⁰⁹² The FATF recommendations “set out a comprehensive and consistent framework of measures which countries should implement in order to combat money laundering and terrorist financing.” Measures that are “in line with” the FATF recommendations advance the implementation of a compliant national anti-money laundering/combating the financing of terrorism regime.

To achieve full compliance (+1), a G20 member must adopt legally appropriate measures to improve the international and domestic beneficial ownership transparency in all three areas of legal persons, legal arrangements and real estate. Furthermore, these measures must take into consideration transnational flows. If a G20 member adopts legal measures in both international and domestic beneficial ownership in all three areas without including trans-national flows, it would be considered partial compliance. If a G20 member adopts legally appropriate measures to improve either international or domestic beneficial ownership transparency of legal persons, legal arrangements and/or real estate, it would only be considered partial compliance. If a G20 member does not draft or pass new laws, or sign or ratify international agreements on improving beneficial ownership transparency, it would be considered non-compliance.

The measures which a G20 member takes can be either of strong or partial depth. Without strong actions, a G20 member cannot receive a score of +1. Strong action could include passing laws on improving beneficial ownership transparency or ratifying international agreements to do the same. Partial action could include simply drafting laws or signing international agreements.

Scoring Guidelines

-1	A G20 member does NOT take action to adopt legally appropriate measures to improve international OR domestic beneficial ownership transparency of legal persons OR arrangements NOR real estate.
0	A G20 member somewhat takes action to adopt legally appropriate measures to improve international OR domestic beneficial ownership transparency of legal persons OR arrangements OR real estate.
+1	A G20 member takes strong action to adopt legally appropriate measures to improve international AND domestic beneficial ownership transparency of legal persons AND arrangements AND real estate, including trans-national flows.

Compliance Director: Omar Kassam

Argentina: 0

Argentina has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 28 December 2021, the Financial Intelligence Unit (FIU) hosted the first of a series of working sessions with government institutions and private-sector participants to coordinate adherence to the

¹⁰⁹² The FATF Recommendations (Paris) 2012. Access Date: 8 December 2021. <https://www.fatf-gafi.org/publications/fatfrecommendations/documents/fatf-recommendations.html>

FATF standard on anti-money laundering (AML) and counter-terrorist financing (CTF).¹⁰⁹³ Alongside the FIU, officials from the Ministry of Justice and Human Rights, the Ministry of Economy (Public Income Administration), the Central Bank of Argentina, and the Argentine Chamber of Fintech joined the meeting. This public-private cooperative initiative by advancing the practical implementation of information-sharing regarding beneficial ownership, pursuant to Argentine law and in accordance with the FATF recommendations.

On 14 February 2022, the president of Argentina's FIU, Juan Carlos Otero, met with the Federal Council of Real Estate Registries of the Argentina Republic to discuss the operation and adoption of AML and CTF measures in the real estate sector, including the applicable disclosures of beneficial ownership.¹⁰⁹⁴ The meeting advanced Argentina's FATF commitment to the provision of beneficial ownership information in the area of real estate.

On 3 March 2022, the FIU signed a Memorandum of Understanding with its Mexican FIU counterpart to facilitate regular information-sharing, including of beneficial ownership information, to combat money-laundering and terrorist financing.¹⁰⁹⁵ The agreement advances Argentina's fulfilment of its FATF commitment by promoting international beneficial ownership transparency of legal persons and arrangements, including trans-national flows.

On 31 May 2022, the government presented a legislative proposal to the National Congress to create a centralized state registry of beneficial owners of legal persons and arrangements hosted by the Federal Administration of Public Revenues.¹⁰⁹⁶ The proposed measure seeks to improve the provision of beneficial ownership information to the competent authorities by consolidating existing agency-specific beneficial ownership data, allowing for easier information-sharing and advancing Argentina's FATF commitment for domestic beneficial ownership transparency.

On 29 June 2022, the Committee for the Prevention and Fight against Money Laundering approved the National Asset Laundering Risk Assessment (NRA) to identify and diagnose the risks Argentina faces in preventing and prosecuting money laundering, tax evasion, and terrorist financing.¹⁰⁹⁷ Alongside the FIU, the Coordination Committee for the Prevention and Fight against Money Laundering, comprised of officials from the executive branch, judiciary, and the Public Prosecutor's Office; and private-sector Designated Non-Financial Businesses and Professions collaborated to develop the NRA.¹⁰⁹⁸ The approval of the NRA is pursuant to Argentina's FATF commitment to take measures that facilitate information-sharing regarding beneficial ownership transparency.

On 25 July 2022, the President of the FIU and the coordinator for the Fight against Money Laundering and the Financing of Terrorism began participation in the Meeting of the Plenary of Representatives of the Financial Action Group of Latin America to collectively implement FATF Recommendations and create a regional system to prevent money laundering and terrorist financing.¹⁰⁹⁹ The meeting advances international beneficial ownership transparency, including trans-national flows, in line with Argentina's FATF commitment.

Argentina has partially complied with its commitment to provide competent authorities with adequate, accurate and up-to-date information by pursuing the adoption of legally appropriate measures to improve international and domestic beneficial ownership transparency of legal persons and arrangements and real estate, including trans-national flows, in line with the Financial Action Task Force recommendations. However, certain proposed legal measures have yet to be formally adopted, meaning sufficient strong action is currently absent.

Thus, Argentina receives a score of 0.

On 16 November 2021, the province of Newfoundland and Labrador amended its Corporations Act to require the disclosure of beneficial ownership of certain legal persons and arrangements, which entered into force on 1 April 2022.¹¹⁰² This legislation advances Canada's FATF commitment in the realm of domestic beneficial ownership transparency of legal persons and arrangements at the provincial level.

On 9 December 2021, the province of Ontario amended its Business Corporations Act to require the disclosure of beneficial ownership of certain legal persons and arrangements, to enter into full effect on 1 January 2023.¹¹⁰³ This legislation advances Canada's FATF commitment in the realm of domestic beneficial ownership transparency of legal persons and arrangements at the provincial level.

On 7 April 2022, Deputy Prime Minister and Minister of Finance Chrystia Freeland presented the 2022 federal budget, which allocated CAD89.8 million over five years to the Financial Transactions and Reports Analysis Centre of Canada (FINTRAC), Canada's Financial Intelligence Unit.¹¹⁰⁴ This funding commitment will accelerate the completion of a previously announced federal publicly accessible beneficial ownership registry in 2023, advancing Canada's FATF commitment to information-sharing.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹⁰⁵

On 10 June 2022, the province of New Brunswick amended its Business Corporations Act to require the disclosure of beneficial ownership of certain legal persons and arrangements.¹¹⁰⁶ This legislation advances Canada's FATF commitment in the realm of domestic beneficial ownership transparency of legal persons and arrangements at the provincial level.

Canada has partially complied with its commitment to improve beneficial ownership transparency in line with the FATF recommendations. However, Canada has not taken action specifically in relation to international beneficial ownership transparency, real estate, or trans-national flows.

Thus, Canada receives a score of 0.

France: 0

France has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 30 November 2021, the Ministry of Justice and the Ministry of Economy and Finance released a press dossier on financial crime and fraud control.¹¹⁰⁸ This dossier established the foundation of further inter-ministerial cooperation on the combatting of financial crime, as well as an announcement of continued active responses to financial crime on a judicial, administrative, regulatory and legislative layer in pushing to create further levels of beneficial ownership transparency.

On 21 January 2022, the Ministry of Economy and Finance hosted a European conference and negotiations on protecting Europeans from financial crime and terrorist financing as part of its presidency of the European Council.¹¹⁰⁹ France provided support to the implementation of measures outlined in the European Commission's anti-money laundering legislative package, regulating private sector action, increasing state scrutiny supervision and the creation of a new European Union agency to better combat money laundering efforts, as well as cryptocurrency security and the promotion of beneficial ownership transparency. France's support to the FATF as standard authority on financial crime, money laundering and the fight against terrorist financing was further enforced.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹¹⁰

Germany: 0

Germany has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 1 December 2021, the Federal Cartel Office began the implementation of its competition register as part of its anti-corruption efforts.¹¹¹¹ The register increases transparency on financial arrangements and legal persons, allowing public officials to access data on a company's legal financial history as well as a program to induce corporations to increase efforts to combat internal financial crime.

On 28 January 2022, the Federal Ministry of Finance released its monthly report, in which it outlined upcoming legislation on taxation and the fighting of financial crime.¹¹¹² Germany hereby commits to cooperation with the FATF under German Presidency, on key issues including the digital fighting of financial crime as well as increased transparency in the relationships between financial arrangements.

On 21 April 2022, the Federal Ministry of Finance and the Ministers of the Financial Action Task Force released a joint statement reaffirming the role of FATF as standard-setter for efforts to combat financial crime and money laundering.¹¹¹³ The Ministers affirmed to more frequent cooperation within the FATF to combat financial crime as well as to the stronger and more acute implementation of FATF standards and recommendations and the United Nations Convention against Corruption, including those pertaining to beneficial ownership transparency. Further commitments to cooperation with international bodies and the strengthening of the FATF Global Network and the FATF system of mutual evaluations were made.

On 2 May 2022, Federal Chancellor Olaf Scholz and the Prime Minister of India released a statement on the 6th German-Indian government consultations, featuring commitments on beneficial ownership transparency.¹¹¹⁴ Germany hereby committed to establishing and developing international standards regarding the combatting of money laundering and terrorist financing, as determined by the FATF.

On 10 May 2022, the Federal Cabinet passed the "First Sanctions Enforcement Act," expanding governmental authority to combat financial crimes and increase transparency on beneficial

ownership.¹¹¹⁵ The Act hereby gives the Federal Government and its agencies the right to investigate financial deposits and legal arrangements of sanctioned individuals, whilst requiring these to submit declarations as to wealth and possessions to the Bundesbank and/or the Federal Office for Economic Affairs and Export Control.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: “Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa.”¹¹¹⁶

On 23 August 2022, the Federal Ministry of Finance announced its three new cornerstone polices in its effort to combat financial crime and enforce sanctions in Germany, in light of the FATF evaluative report on Germany.¹¹¹⁷ The new measures are centred on, firstly, the creation of a new Federal Financial Crime Bureau, acting as the central national authority to combat financial crime, with a new and empowered Financial Intelligence Unit as well as constant supervision in the non-financial sector through a central coordination office. Secondly, Germany has committed to improved education and instruction of financial crime investigators as well as, thirdly, an increased rate in the digitalization and interconnection of federal registers on legal persons and arrangements, with a view to enhancing beneficial ownership transparency.

Germany has partially complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations. However, Germany has not taken specific actions to improve beneficial ownership transparency and applicable information-sharing in relation to real estate.

Thus, Germany receives a score of 0.

Indonesia has not taken any actions to fulfill this commitment during the compliance monitoring period.

Thus, Indonesia receives score of -1.¹¹¹⁹

Analyst: Amelia Marlow

Italy: +1

Italy has fully complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 11 March 2022, the Ministry of Economy and Finance, together with the Ministry of Economic Development, enacted a decree establishing a corporate beneficial ownership registry, which was formally realized on 9 June 2022.¹¹²⁰ The registry includes directors of certain corporations and societies, as well as those of foundations, associations, and trustees of applicable trusts. The creation of a beneficial ownership registry advances Italy's FATF commitment to providing relevant beneficial ownership information to competent authorities.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹²¹

On 14 June 2022, Italy published new guidance on the register of information on the beneficial owners of trusts.¹¹²² The register is not yet implemented, but the guidance gives trustees the information to collect.

Italy has fully complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations.

Thus, Italy receives a score of +1.

Japan: 0

Japan has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 21 November 2021, the Financial Services Agency published a revised Guidelines for Anti-Money Laundering and Combating the Financing of Terrorism.¹¹²³ This revision of guidelines was initiated in light of the FATF's Fourth Round Mutual Evaluation Report of Japan that was published on 30 August 2021. The guideline outlined general concepts on anti-money laundering and combating the financing of terrorism in Japan as well as specific practices for private-sector compliance, including the verification of the identities of beneficial owners and the cross-referencing of sanctions lists.¹¹²⁴ The revised Guidelines so further Japan's satisfaction of its FATF commitment to domestic beneficial ownership transparency of legal persons and arrangements by improving practical information collection and reporting.

On 31 January 2022, Japan implemented a new requirement for companies to submit in writing the names, addresses, and shareholding ratio of those who have a direct or indirect stake of more than 25 percent, based on voting rights.¹¹²⁵ This decision was taken after FATF placed Japan in the 'enhanced follow-up' category in its August 2021 Mutual Evaluation Report, pointing out that certain sectors lacked a high level of understanding of the risks related to money laundering and terrorism financing. The new disclosure requirement applies to both public and private companies and may be accessed both by companies and the regulatory authority upon request. The requirement so advances Japan's FATF commitment to promoting beneficial ownership transparency by extending mandatory disclosure to new entities.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹²⁶

Japan has partially complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations. However, Japan has not taken specific actions to improve international beneficial ownership transparency, or those specifically pertaining to the beneficial ownership transparency of real estate or trans-national flows.

Thus, Japan receives a score of 0.

Mexico: 0

Mexico has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 1 January 2022, Mexico implemented changes to the Federal Tax Code concerning the disclosure of beneficial ownership.¹¹²⁸ The revisions prescribe that trusts, corporations, and other legal entities incorporated in Mexico provide upon request to the Tax Administration Service information regarding their beneficial owners. Failure to comply with the disclosure requirements will incur a fine of MXN2 million per beneficial owner. The new disclosure requirements advance Mexico's FATF commitment to domestic beneficial ownership transparency of legal persons and arrangements, facilitating the provision of relevant information to the competent authorities.

Mexico has partially complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations. However, Mexico has not taken specific actions to improve international beneficial ownership transparency, or those specifically pertaining to the beneficial ownership transparency of real estate or trans-national flows.

Thus, Mexico receives a score of 0.

On 28 February 2022, the United Kingdom Department for Business, Energy and Industrial Strategy released a white paper on Corporate Transparency and Register Reform.¹¹³³ The white paper outlined 53 proposed reforms to the corporate oversight regime, including those to bolster beneficial ownership transparency. The Department's white paper contributes to the United Kingdom's satisfaction of its

¹¹³³ Research Briefing: Registers of beneficial ownership, House of Commons Library (London) 6 April 2022. Access Date: 20 June 2022. <https://researchbriefings.files.parliament.uk/documents/CBP-8259/CBP-8259.pdf>

FATF commitment by advancing domestic beneficial ownership transparency of legal persons and arrangements.

On 15 March 2022, Parliament enacted the Economic Crime (Transparency and Enforcement) Act 2022, which established a registry of beneficial ownership for overseas entities that own property in the United Kingdom.¹¹³⁴ Owners with a 25 per cent or larger stake or other significant control in an overseas entity that seeks to purchase property in the United Kingdom are included in the registry, which is active as of 1 August 2022. The establishment of the registry advances the United Kingdom's FATF commitment to improve international beneficial ownership transparency of legal persons and arrangements and real estate, including trans-national flows.

On 16 March 2022, the United Kingdom Central Digital and Data Office updated the Beneficial Ownership Data Standard on the collection, use and exchange of beneficial ownership information.¹¹³⁵ The revised standard sets out requirements to ensure beneficial ownership data is accessible to the competent authorities, both domestically and internationally, to meet compliance and enforcement objectives. The publication of the standard thus advances the United Kingdom's FATF commitment to the provision of adequate, accurate and up-to-date beneficial ownership information.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹³⁶

The United Kingdom has fully complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations.

Thus, the United Kingdom receives a score of +1.

Analyst: Zainab Syed

United States: 0

The United States has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 6 December 2021, the United States Financial Crimes Enforcement Network (FinCEN) announced a new proposed rule to address vulnerabilities to money-laundering and illicit finance in the real estate sector.¹¹³⁷ The rule seeks to extend reporting requirements, including those involving beneficial ownership disclosure, to all-cash real estate transactions that have previously been excluded. The proposed rule will further the United States' satisfaction of its FATF commitment to domestic

beneficial ownership transparency of legal persons and arrangements, particularly those involved in real estate.

On 7 December 2021, FinCEN announced a new proposed rule under the Corporate Transparency Act to increase beneficial ownership disclosure for shell corporations.¹¹³⁸ The rule would unmask the beneficial owners of shell companies that invest in the United States and apply to those with ownership stakes of 25 per cent or greater and to others exercising significant control of an applicable enterprise. The proposed rule will advance the United States' FATF commitment to domestic beneficial ownership transparency of legal persons and arrangements.

On 30 April 2022, FinCEN renewed and expanded Geographic Targeting Orders that require the disclosure of the identities of the beneficial owners of shell companies which purchase residential real estate in cash transactions.¹¹³⁹ The new Orders, which apply to portions of metropolitan areas spanning 12 states and the District of Columbia, will remain in force until 26 October 2022. The Orders advance the United States' FATF commitment by enhancing beneficial ownership transparency in the realm of real estate.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹⁴⁰

On 29 September 2022, FinCEN issued a final rule under the Corporate Transparency Act to increase beneficial ownership disclosure for shell corporations, formalizing its earlier proposal.¹¹⁴¹ The rule unmask the beneficial owners of shell companies that invest in the United States, and takes effect from 1 January 2024. FinCEN reiterated its intention to enact further rules pursuant to the use of beneficial ownership information collected. The implementation of the final rule advances the United States' FATF commitment to domestic beneficial ownership transparency of legal persons and arrangements.

The United States has partially complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations. However, the United States has not taken specific actions to improve international beneficial ownership transparency, nor those specifically pertaining to trans-national flows.

Thus, the United States receives a score of 0.

European Union: 0

The European Union has partially complied with its commitment to adopt legally appropriate measures to improve beneficial ownership transparency in line with the Financial Action Task Force (FATF) recommendations.

On 14 March 2022, the European Council made Czechia's receipt of further instalments under its National Recovery and Resilience Plan conditional on the implementation of 31 milestones and 6 targets, including those pertaining to beneficial ownership transparency.¹¹⁴² In order to receive EUR1.1 billion, Czechia must align its national definition of a beneficial owner with that prescribed in EU legislation and take necessary steps to implement the regulatory framework by June 2022. The EU's conditioning of National Recovery and Resilience Plan funds on Czechia's compliance with anti-money laundering and counter-terrorist financing requirements advances its FATF commitment to domestic and international beneficial ownership transparency of legal persons and arrangements.

On 18-19 May 2022, G7 Development Ministers committed to supporting African partners in terms of beneficial ownership registers: "Therefore, we as the G7 will support African partners in setting up 15 additional beneficial ownership transparency registers, and reiterate the commitments made by Finance Ministers in June 2021 to provide additional expertise and funding support to the Financial Action Task Force-style regional bodies (FSRBs), including those in Africa, as well as capacity development for the FSRBs in Africa."¹¹⁴³

The European Union has partially complied with its commitment to adopt measures to improve beneficial ownership transparency in line with the FATF recommendations. However, the European Union has not taken actions specifically in relation to beneficial ownership transparency of real estate or trans-national flows.

Thus, the European Union receives a score of 0.

Background

From the first G20 summit, the G20 leaders have shown their support and commitment to creating a more equitable and inclusive work environment. They strive to systematically reduce the class and gender gap that is prevalent in many parts of the world. The consistent emphasis of social inclusion in labour demographics shows the global nature and importance of this issue.

At the 2008 Washington Summit, G20 leaders agreed to support the stabilization of the economy through fostering entrepreneurship and innovation to increase employment.¹¹⁴⁴

At the 2009 London Summit, G20 leaders agreed to support equitable employment growth by investing in the most vulnerable in terms of class and race.¹¹⁴⁵

¹¹⁴⁴ Declaration of the Summit on Financial Markets and the World Economy, G20 Information Centre (Toronto) 15 November 2008. Access Date: 26 November 2021. <http://www.g20.utoronto.ca/2008/2008declaration1115.html>

At the 2009 Pittsburgh Summit, G20 leaders agreed to a new Framework for Strong, Sustainable, and Balanced Growth that supports education and training to increase the overall labour quality for G20 countries.¹¹⁴⁶

At the 2010 Seoul Summit, G20 leaders recognized the importance of jobs for the most vulnerable, especially in low-income countries.¹¹⁴⁷

At the 2011 Cannes Summit, G20 leaders supported the implementation of social protection floors that are specifically created for each low-income country and continue to expand the availability of SME financing services.¹¹⁴⁸

At the 2012 Los Cabos Summit, G20 leaders committed to increasing the quality of work by advocating for labor rights and social security coverage.¹¹⁴⁹

At the 2013 St. Petersburg Summit, G20 leaders acknowledged the high structural unemployment among women and youth and encouraged Ministers of Labour and Employment to revise their nation's policies for inclusive labour markets and social protection.¹¹⁵⁰

At the 2014 Brisbane Summit, G20 leaders encouraged members to enhance competitiveness by removing business barriers to increase inclusive job creation. The goal is to reduce the gender gap of the labour force participation by 25 per cent by 2025.¹¹⁵¹

At the 2015 Antalya Summit, G20 leaders agreed to consult Labour and Employment Ministers to improve G20 countries' labour market equality and promote the enhancement of skills in the labour market.¹¹⁵²

At the 2016 Hangzhou Summit, G20 leaders committed to creating an inclusive digital economy through policy support as well as endorsing the Sustainable Wage Policy Principles.¹¹⁵³ These initiatives attempt to decrease inequality and raise the overall quality of work.

At the 2017 Hamburg Summit, G20 leaders emphasized the importance of sustainable and inclusive supply chains and removing barriers for women's inclusion. The leaders encourage heightened protection for women against all forms of violence including in the workplace and policies that reduce employment discrimination.¹¹⁵⁴

At the 2018 Buenos Aires Summit, G20 leaders promoted acts of inclusion in the digital economy and the formalization of labour to increase social protection for vulnerable groups.¹¹⁵⁵

At the 2019 Osaka Summit, G20 leaders acknowledged the importance of creating flexible working arrangements for women. They also encouraged G20 members to share developments on their policy for new forms of work as well as to take action to eradicate forced labour.¹¹⁵⁶

At the 2020 Riyadh Summit, leaders addressed unpaid responsibilities of economically vulnerable groups and women as well as the importance of women in leadership positions. The Private Sector Alliance for the Empowerment and Progression of Women's Economic Representation (EMPOWER) was commenced to advocate for gender equality in the workplace.¹¹⁵⁷

At the 2021 Rome Summit, G20 leaders promised to promote greater social justice and decent work for all and further international cooperation to strengthen safe and healthy working conditions.¹¹⁵⁸ They also promised to strength their social protection systems to aid workers' transition and reintegration into labour markets, ensure decent working conditions for remote and platform workers in addition to adapting their regulatory frameworks to new forms of work.

Commitment Features

In the G20 Rome Leaders' Declaration, G20 leaders stated that “[we will] ... strive to adapt our regulatory frameworks to new forms of work, ensuring that these are fair and inclusive, leaving no one behind, while paying special attention to addressing the digital gender divide and intergenerational inequalities.”

“Strive” means to “try hard, make efforts, struggle or contend.”¹¹⁵⁹ The use of this verb calls for G20 members to take strong actions to count as full compliance in this commitment.

“Adapt” means “to adjust to different conditions or uses, or to change to meet different situations.”¹¹⁶⁰ This may include any changes to “facilitate transitions for employees, the self-employed and employers” adapting to new forms of work.¹¹⁶¹

<http://www.g20.utoronto.ca/2021/210623-labour.html#annex3>

“Regulatory” points to regulations, laws and other instruments that are used to achieve the government’s objectives.¹¹⁶² Regulatory instruments may involve legislations, regulatory bodies, regulatory processes and quasi legislation such as standards, codes, rulings and guidelines.^{1163 1164}

“Framework” means “a system of rules, ideas, or beliefs that is used to plan or decide something”¹¹⁶⁵ The G20 members specify adapting their regulatory frameworks as their policy instrument for achieving this commitment.

“New forms of work” are understood under Annex 3: G20 Policy Options to Enhance Regulatory Framework for Remote Working Arrangements and Work through Digital Platforms that was published on 23 June 2021 along with the G20 Labour and Employment Ministerial Declaration.¹¹⁶⁶ Annex 3 highlighted remote work and platform work as new forms of work that have emerged due to technological advancement and the COVID-19 pandemic.

“Remote work” refers to “personnel working from home and using tools such as videoconferencing, cloud services and virtual private networks.”¹¹⁶⁷

“Platform work” refers to “non-standard work facilitated by online platforms which use digital technologies to ‘intermediate’ between individual suppliers (platform workers) and buyers of labour.”¹¹⁶⁸ Platform workers are “individuals who use an app or a website to match themselves with customers, in order to provide a service in return for money.”¹¹⁶⁹

“Ensure” means “to make something certain to happen.”¹¹⁷⁰

“Fair” means treatment that is reasonable and what one would expect or deserve.¹¹⁷¹

“Inclusive” means to “include many different types of people and treat them all fairly and equally.”¹¹⁷²

¹¹⁷¹ Fair, Cambridge Dictionary (Cambridge) 2021. Access Date: 6 December 2021. <https://dictionary.cambridge.org/dictionary/english/fair>

¹¹⁷² Inclusive, Cambridge Dictionary (Cambridge) 2021. Access Date: 6 December 2021. <https://dictionary.cambridge.org/dictionary/english/inclusive>

“Leaving no one behind” indicates a commitment to workers from all employment status, sector, gender, age, ability, citizenship, or any other fragile context.¹¹⁷³

In the phrase “paying special attention,” “special” means “especially great or important.”¹¹⁷⁴ “Attention” means “to start to think about or consider a particular thing.”¹¹⁷⁵ This phrase asks that the G20 members consider addressing the following topics as important. However, a lesser strength of action is required as G20 members only indicated a consideration of these topics without committing to any specific action.

“Digital gender divide” refers to “gender differences in resources and capabilities to access and effectively utilise Information Communication Technology within and between countries, regions, sectors and socio-economic groups.”¹¹⁷⁶

“Intergenerational inequalities” refers to “[un]fairness in the intertemporal distribution of the endowment with natural assets or of the rights to their exploitation.”¹¹⁷⁷

The breadth requirement of this commitment is established by the two categories of “new forms of work” identified as remote work and platform work. G20 members must demonstrate action in both categories to achieve full compliance. G20 members should also show an awareness towards the digital gender divide and intergenerational inequalities to satisfy the latter half of the commitment.

The depth requirement of this commitment is established by the strong verbs “strive,” “adapt” and “ensure” used to indicate strong effort towards changing the status quo to bring about certain outcomes. Therefore, G20 members must demonstrate substantial action in adapting their regulatory framework. This may include taking any steps in their regulatory process, including the development, consultation and planning for a regulatory proposal, conducting regulatory analysis, adopting legislative decisions in national parliament, publication and implementation of regulations.

Full compliance, or a score of +1, is assigned if the G20 member has taken action to adapt their regulatory framework to both remote work and platform work. On the remote work component, this may take the form of proclaiming new legislative frameworks, amending existing legislative frameworks or collective agreements, introducing a code of practice that guarantees decent working conditions, or amending the fiscal code to cover employee’s expense for equipment. On the platform work component, this may take the form of amending or creating new labour law frameworks, clarifying the classification of employment status, issuing directives and instituting digital service standards. Compliance should be evaluated holistically to take into account regulatory actions which, while aimed at adapting to new forms of work, can also address the digital gender divide and intergenerational inequalities.

Partial compliance, or a score of 0 is assigned if the G20 member has only taken action to adapt their regulatory framework to either remote work or platform work and took no action or only partial action in the other category, with or without showing consideration to address the digital gender divide and intergenerational inequalities. Partial actions may include releasing government publications that

¹¹⁷⁷ Glossary of Statistical Terms, Organisation of Economic Co-operation and Development (Paris) 25 September 2002. Access Date: 8 December 2021. <https://stats.oecd.org/glossary/detail.asp?ID=1387>

recognize new forms of work and participating in international forums on new forms of work without committing to real regulatory change.

Non-compliance, or a score of -1 , is assigned if G20 members took no action to adapt their regulatory framework to either remote work or platform work and showed no consideration to address the digital gender divide and intergenerational inequalities. This would be the case if countries only took partial action that recognizes both remote work and platform work but which do not constitute real regulatory change.

Scoring Guidelines

-1	The G20 member has NOT taken any actions to adapt their regulatory framework to remote work OR platform work OR did they show consideration to address the digital gender divide and intergenerational inequalities.
0	The G20 member has taken actions to adapt their regulatory framework to EITHER remote work OR platform work, with or without showing consideration to address the digital gender divide and intergenerational inequalities.
+1	The G20 member has taken actions to adapt their regulatory framework to BOTH remote work AND platform work AND showed consideration to address the digital gender divide and intergenerational inequalities.

Compliance Director: Wai Suet Gi Gi Chan
Lead Analyst: Erica Matsui

Argentina: 0

Argentina has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 27 January 2022, the Ministry of Labor, Employment and Social Security signed a collective agreement with the Insurance Union and insurance companies that regulates the aspects and conditions for teleworking in activity insurance carriers.¹¹⁷⁸ The agreement outlines the employer's responsibility to provide necessary work elements and technical support, to recognize remote workers' right to disconnect from work activity outside of their working day and to receive compensation for higher expenses for internet connection. The agreement introduces a code of practice that guarantees decent working conditions for remote workers.

On 2 May 2022, Secretary of Public Management and Employment Ana Castellani, mandated through Resolution 58/2022 that all staff should return to the working arrangements they had before the 12 March 2020 remote work decree.¹¹⁷⁹ This resolution mandated all civil servants to return to in-person work.

On 11 May 2022, Minister of the Interior Wado de Pedro, Minister of Tourism and Sports Matías Lammens, and Director of National Directorate for Migration Florencia Carignano announced a new type of residency visa targeted at "digital nomads."¹¹⁸⁰ The visa provides a series of benefit, including discounts on flights with state-owned airline Aerolíneas Argentinas and the "Visit Argentina" card that allows foreign visitors to obtain points that can be exchanged for gastronomic or recreational

¹¹⁸⁰ De Pedro and Lammens launched a benefit plan for digital nomads and a new visa, Government of Argentina (Buenos Aires) 10 May 2022. Translation provided by Google Translate. Access Date: 13 May 2022. <https://www.argentina.gob.ar/noticias/de-pedro-y-lammens-lanzaron-un-plan-de-beneficios-para-nomades-digitales-y-una-nueva-visa-1>

experiences. The Ministry of Tourism and Sports also launched a program to train hotel workers to familiarize them with the specific needs of the digital nomads.

On 27 October 2022, the Ministry of Labour created a Telework Register.¹¹⁸¹ This registry mandates all employers with remote workers to provide information monthly about how many teleworkers they employ. This information is visible to employers, the government, and unions.

Argentina has taken steps regarding remote work through signing a collective agreement with insurance companies and its insurance union and providing a new type of residency visa targeted at digital nomads. However, it has not taken steps to address adaptation to platform work and address the digital gender divide and intergenerational inequalities.

Thus, Argentina received a score of 0.

Australia: -1

Australia has not complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 18 November 2021, Australia introduced the Youth Jobs PaTH (Prepare-Trial-Hire) program to young people, especially women, in order to gain a successful transition period between school and the workplace.¹¹⁸² The program will offer young people internships and a monetary incentive, reducing recruitment costs. Young people will also be able to attend workshops through the Encouraging Entrepreneurship classes provided. The program also offers the Empowering Youth initiative program, seeking to resolve the issues of intergenerational unemployment.

On 7 December 2021, Australia announced the Supported Returner Program in order to recruit individuals who have had an extended absence in the workplace.¹¹⁸³ The paid program is meant for women to be re-integrated back into the workforce after recent motherhood. Businesses will be providing this program to teach women new skills or re-introduce lost skills.

On 7 December 2021, Department of Education, Skills and Employment published an article that affirmed that workplace policies should be implemented to allow parents to navigate through their workplace and home lives.¹¹⁸⁴ It also provided a self-assessment tool for businesses to benchmark their supportive parental practices.

On 9 December 2021, Australia issued Seasonal Worker Programme (SWP) and Pacific Labour Scheme (PLS).¹¹⁸⁵ In rural areas, the SWP would provide employers of the agricultural and

accommodation industry access to seasonal labour. PLS would authorize Pacific and Timorese workers to live in Australia, as they will provide agricultural and accommodation jobs to the employers.

On 7 February 2022, Australia's Department of Education, Skills and Employment introduced the Workforce Australia Program which will connect employers to jobseekers.¹¹⁸⁶ The program will also offer an online platform that provides case management for individuals to find work.¹¹⁸⁷ The program is also equipped with skill learning and online training for greater accessibility.

On 4 April 2022, the Seasonal Worker Program was renamed the Pacific Australia Labour stream.¹¹⁸⁸

On 5 April 2022, Australia's Department of Education, Skills and Employment introduced the Skills Checkpoint for Older Workers Program allowing those over 40 years old to either find transitional jobs in their current industry or create a new pathway for their work.¹¹⁸⁹ Additionally, the program is linked to the Skills Checkpoint Program which aims to assist older workers to find training opportunities as well as cover training costs.

Australia has not complied with its commitment to adapt its regulatory frameworks to new forms of work. Australia provided a few programs to aid workers to adapt to changing skills and job needs, such as child bearer workplace policies, the Youth Jobs PaTH, and the Skills Checkpoint for Older Workers Program. These programs addressed intergenerational inequalities and the digital gender divide. However, Australia did not adapt its regulatory framework to platform work or remote work.

Thus, Australia receives a score of -1.

Analyst: Adriana Park

Brazil: +1

Brazil fully complied with its commitment adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 5 January 2022, President Jair Bolsonaro sanctioned Law No. 14,297 that requires platforms to buy insurance to protect their workers in case of accidents during the work period and the insurance policies for gig workers should cover personal accidents, permanent or temporary disability and death.¹¹⁹⁰

On 13 January 2022, Minister of Labor and Welfare Onyx Lorenzoni signed the Technical Cooperation Agreement for carrying out Medical Expertise Using teleassessment (PMUT).¹¹⁹¹ This agreement, which will be formalized in the ordinance of the Official Gazette of the Union, initiated a pilot project for 10 municipalities to perform medical services through remote assessments.

On 25 March 2022, the government published a new Provisional Measures that can expire in 120 days which modify several provisions of the labour code relating to remote workers.¹¹⁹² This Provisional Measure calculates the remote work hours into lawful work hours and suggests that employees with disabilities or small kids should be prioritized to work remotely.

On 27 April 2022, Labor Minister Jose Carlos Oliveira promised to introduce a new welfare system for platform workers before the end of the year.¹¹⁹³ The new welfare system will support the gig workers to remain self-employed while including them in social security coverage.

On 15 August 2022, the President of the Republic adopted the Provisional Measure No. 1,109 of 2022 and enacted the new Law No. 14,437 that employees and employers should adopt alternative labor measures to face the social and economic consequences at the national level.¹¹⁹⁴ In chapter two of this Law, it recognized the importance of remote work and asked employers to aid their remote employees in technological equipment and the necessary infrastructure.

On 5 September 2022, the Brazilian Government published Law 14,442/22, which clarified the definition of remote work.¹¹⁹⁵ Remote work now includes employees that are working remotely permanently, occasionally, or in hybrid style.

Brazil has adapted its regulatory framework to remote work through an ordinance that allowed municipalities to carry remote medical assessments, amendments to its labor code to acknowledge remote work hours and a new law that consider remote work as an alternative labor measure. Brazil adapted its regulatory framework to platform work through setting a new insurance system for gig workers on both the company and national level.

Thus, Brazil receives a score of +1.

On 26 November 2021, the government tabled Bill C-2 (An Act to provide Further Support In Response to COVID-19) to the Parliament.¹¹⁹⁶ Bill C-2 would provide up to six weeks of COVID-19 leave to employees that contracted COVID-19 or need to isolate.

On 26 November 2021, the government introduced legislation under the Canada Labour Code to support workers with ten days of paid sick leave and updated protection policies for health care workers.¹¹⁹⁷ The Government aimed to protect workers' income, jobs and health to light of the spread of COVID-19. This will enable Canadians to have safe and unobstructed access to health services.

On 29 November 2021, the government released two free online courses to help workplaces and employees for a better preparation of returning back to work.¹¹⁹⁸

On 30 November 2021, the government updated new COVID-19 vaccine requirements for Federal public servants, transportation sector employees and travellers. This requirement applies to employees in all working conditions, no matter working remotely, teleworking or attending offices in person.¹¹⁹⁹

On 7 December 2021, the government announced the proposal of updating the Canadian Labour Code for mandatory vaccination requirements in all federally regulated workplaces. These new regulations are expected to come into force in early 2022. Those workplaces included road transportation, telecommunications, and banking.¹²⁰⁰

On 22 December 2021, the government announced the Royal Assent for Bill C-2 on a new program aimed to provide businesses with wage and rent subsidy programs for the temporary COVID-19 lockdown disruptions.¹²⁰¹ Qualified businesses are those which have one or more locations being affected by public health order, or activities restricted by the public health unit accounted for half of the entity's revenues.¹²⁰²

On 30 December 2021, the government launched applications for the expanded Canada Worker Lockdown Benefit to support those who were affected by capacity restrictions.¹²⁰³ This benefit will provide income support to workers who have lost income directly due to COVID-19 lockdowns

On 17 January 2022, the Canadian Treasury Board President Mona Fortier announced the Federal Government would leave the decision to allow employees to work from home to federal public service departments.¹²⁰⁴

On 22 March 2022, the Canadian Treasury Board released the Guidebook For Departments On Easing of Restrictions: Federal Worksites.¹²⁰⁵ This guidebook is used to guide departments in planning for and managing an initial resumption of activity in the workplace.

On 7 April 2022, the Canadian Treasury Board's Budget 2022 announced supports to reduce gender gaps in reading and numeracy skills.¹²⁰⁶ This initiative contributes to more equal opportunities.

On 7 April 2022, the Canadian Treasury Board's Budget 2022 announced a consultation process for stakeholders to share their views, particularly on how existing rules can be strengthened to protect the integrity of the tax system.¹²⁰⁷ This can facilitate more intergenerational business transfers.

On 6 September 2022, the government announced flexible work arrangements for federal employees. Flexible work arrangements are applied according to employee's terms and conditions of employment.¹²⁰⁸ The Code provides other rights and protections to achieve work balance for employees.

Canada has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Canada has taken action to adapt its regulatory framework to accommodate for remote work, specifically through Bill C-2 and amendments to its labour code that provide COVID-19 related leave and sick leave to workers. However, Canada has not taken action to adapt its regulatory framework to platform work.

Thus, Canada has received a score of 0.

On 17 November 2021, the Ministry of Transport and seven other departments jointly announced the Opinions on Strengthening the Protection of the Rights and Interests of Employees in New Forms of Transportation to improve social insurance, welfare and working environments for gig workers.¹²⁰⁹

On 18 November 2021, the Central Committee of the Communist Party of China (CCCPC) and the State Council published the Opinions on Strengthening the Work of the Aged Group in the New Era that suggested the relevant departments to improve the elderly care system and provide a secure work environment for the elderly group.¹²¹⁰

On 12 December 2021, the State Council announced the “14th Five-Year” Digital Economy Development Plan.¹²¹¹ This guideline proposed training programs to improve the digital literacy and skills of the population, including students, elderly and people with disability.

On 5 March 2022, State Council Premier Keqiang Li mentioned the protection and support for the new forms of workers as a measure to achieve the employment goals in the Report on the Work of the Government during the annual National People’s Congress plenary session.¹²¹²

On 27 April 2022, the State Administration for Market Regulation released their work plan for 2022.¹²¹³ This work plan outlined 69 projects and intent to renew several intellectual property laws, thus improving the working environment of China.

On 9 July 2022, the Ministry of Human Resources and Social Security and four other departments jointly agreed to provide platform workers with more supportive conditions into the job market, such as more training courses and more open information.¹²¹⁴ The opinion also emphasized the importance of remote work as well as the need to improve the employment environment for gig workers.

On 14 September 2022, the Ministry of Labour along with the Ministry of Transportation, and the All-China Federation of Trade Unions gave administrative guidance to eleven cyber platforms.¹²¹⁵ The aim for the guidance was to urge the companies to implement more protection for their platform workers.

China has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. China has published opinions that serve a regulatory function to direct government agencies to better protect platform workers. However, it has not adapted its regulatory framework to remote work. Notwithstanding, China has

France: 0

France has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 27 December 2021, Prime Minister Jean Castex announced that all citizens must engage in remote work from home for at least three days a week where possible.¹²¹⁶ This measure encouraged remote work in response to a surge in the spread of the Omicron variant of Covid-19 in France.¹²¹⁷

On 1 January 2022, France assumed its Presidency of the Council of the European Union.¹²¹⁸ One of its priorities is the commitment to “equal work, equal pay, in the same place.”¹²¹⁹

On 4 January 2022, the Ministry of Labour, Employment and Integration posted an update to their guide to teleworking during Covid-19, which outlines key measures for managers, employers, and employees.¹²²⁰

On 2 February 2022, France lifted its guidance urging workers to work from home for three days a week, leaving working arrangements at the discretion of employees and their employers.¹²²¹ Prime Minister Jean Castex noted that teleworking will no longer be mandatory but still encouraged.¹²²²

France has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Although France has taken actions to adapt their regulatory framework to remote work by enforcing and publishing guidance for remote work, France has not taken any actions to adapt their regulatory frameworks to platform work.

Thus, France receives a score of 0.

Germany: -1

Germany has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 12 January 2022, Minister of Labour Hubertus Heil announced the intention to secure the right to work from home in federal law.¹²²³ He proposed that employer must allow their employees to work from home unless remote working is impossible for logistical reasons.

On 21 January 2022, Labor Minister Hubertus Heil, announced a plan to resume the legal regulation of mobile work.¹²²⁴ Employers would have to permit remote work as long as there were no operational reasons against it. This would change the current legal situation in Germany where employees are not entitled to work from home unless that is contractually regulated or subject to a works agreement or collective bargaining agreement.

On 2 February 2022, Minister Heil reiterated that Germany needs “a modern legal framework for mobile working.”¹²²⁵

Germany has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. While Minister Heil announced Germany’s intention incorporate work from home in German law, no regulatory action has been taken yet. Germany has not taken action to adapt its regulatory framework to remote work or platform work.

Thus, Germany receives a score of -1.

Analyst: Abana Jain

India: 0

India has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 16 February 2022, the Ministry of Education approved the New India Literacy Program for financial years 2022 to 2027.¹²²⁶ One of the objectives of the program is to teach digital literacy skills to citizens above the age of 15. Girls and women are given priority enrollment to the New India Literacy Program.

¹²²⁶ Government approves New India Literacy Programme, a new scheme of Adult Education for FYs 2022-27, Ministry of Education (New Delhi) 16 February 2022. Access Date: 4 March 2022. <https://pib.gov.in/PressReleaseIframePage.aspx?PRID=1798805>

On 23 February 2022, during a post-federal budget webinar, Prime Minister Narendra Modi announced that India will implement broadband infrastructure in all rural areas. This will help reduce the digital divide and facilitate digital empowerment and inclusion.¹²²⁷

On 1 June 2022, the Ministry of Labour and Employment issued an advisory that encourages businesses to allow mothers and expecting mothers to work from home whenever possible.¹²²⁸ This advisory showed consideration for bridging the gender divide and support for remote work.

On 19 July 2022, the Department of Commerce introduced a new rule called Rule 43A - Work from Home in Special Economic Zones Rules, 2006, across all Special Economic Zones.¹²²⁹ Under the new rule, work from home will be allowed for a period of one year in Special Economic Zones, subject to extension and discretion of the Development Commissioner of Special Economic Zones. Furthermore, the Department of Commerce has also promised that Special Economic Zones will provide equipment and secured connectivity for employees that are working from home.

India has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. India has adapted its regulatory framework to remote work by introducing Rule 43A to allow remote work and advising its employers to allow remote work for mothers and expecting mothers. However, it has not adapted its regulatory framework to platform work. Notwithstanding, India has introduced programs such as the New India Literacy Program and broadband infrastructure aimed to address digital inclusion.

Thus, India receives a score of 0.

On 20 July 2022, the Ministry of Tourism approved a new work visa called the Digital Nomad Visa, which allows foreign remote workers to live in Indonesia tax-free for up to five years.¹²³²

Indonesia has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Indonesia has adapted its regulatory framework to remote work through setting up a Digital Nomad Visa for foreign remote workers. However, it has not taken any actions to adapt its regulatory framework to platform work. Notwithstanding, it has shown consideration to address intergenerational inequalities through the Digital Talent Training program.

Thus, Indonesia receives a score of 0.

Analyst: Miloni Mehta

Italy: 0

Italy has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 7 December 2021, Italy announced a protocol on remote working that was made in collaboration with societal stakeholder.¹²³³ The protocol continues to enable voluntary buy-in to remote working and provided the necessary framework for the employer and the employee to enter into a specific individual agreement. Under the protocol, remote work is only permissible if the employer and the employee have made specific agreements and remote working is characterized by the absence of a set working time.

On 28 March 2022, Italian lawmakers approved a new digital nomad visa for remote workers aimed to attract internationals “highly qualified” remote workers and freelancers who work from outside the European Union.¹²³⁴ This visa encourages remote working to meet Italy’s labour needs.

On 19 August 2022, the Ministry of Labour announced that starting 1 September 2022 the online portal to register employees’ status of remote work will open.¹²³⁵ This program allows the government to collect data on people and companies that are involved in remote work.

Italy has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Italy has taken steps to adapt its regulatory framework to new forms of remote work through issuing a protocol that enables

and set standards for remote work.¹²³⁶ However, Italy has not taken steps to adapt their regulatory framework to platform work.

Thus, Italy receives a score of 0.

Analyst: Ahana Jain

Japan: 0

Japan has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 13 January 2022, Economic Revitalization Minister Daishiro Yamagiwa held an online meeting with leaders of Japan's three main business lobby groups and asked the business community to further promote telework. The minister urged the business community to prepare business continuity plans centred on telework and planned to spread examples of effective use of telework to other companies.¹²³⁷

On 3 February 2022, the Novel Coronavirus Response Headquarters published a new version of "Basic coping policy for measures against novel coronavirus infectious diseases," which encouraged government institutions and companies to promote telework and provide telework opportunities for workers who are at risk of becoming seriously ill.¹²³⁸

On 31 March 2022, the Ministry of Health, Labor and Welfare announced a policy to allow pharmacists to telework. The policy sought to revise the regulations in the Pharmaceuticals and Medical Devices Act regarding medication instruction by the end of the year to enable pharmacists to work outside the pharmacy. The policy intended to create an environment where the work of a pharmacist can be balanced with childcare and long-term care with an expansion of online instruction.¹²³⁹

On 1 May 2022, the Financial Services Agency announced that it would require listed companies to disclose in their annual securities reports the ratio of women in management positions in order to increase the proportion of female leaders and to close the pay gap between men and women in Japan.¹²⁴⁰ The agency also planned to oblige about 4,000 listed firms to disclose details such as the average pay by gender and the ratio of male workers who took childcare leave.

On 31 May 2022, the Ministry of Internal Affairs and Communications released a revised version of the "Guideline for Telework Security for Small and Medium-sized Enterprises" and a new handbook for telework employees. The content of the guideline and handbook were revised to make it easier to

use and understand and to help companies and employees ensure security while adopting the new form of telework.¹²⁴¹

Japan has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Japan has adapted its regulatory framework to remote work through publishing a basic coping policy that encourages companies to provide telework opportunities and addressed digital gender divide through mandatory disclosure of the pay gap between men and women in the annual reports of listed companies. However, Japan has not adapted its regulatory framework to platform work.

Thus, Japan receives a score of 0.

Analyst: Yuchen Bai

Korea: -1

Korea has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 17 December 2021, Minister of Employment and Labour An-Kyung-duk visited the company Callaway Golf Korea to promote a broader implementation of remote work.¹²⁴²

On 10 January 2022, the Ministry of Employment and Labour introduced the Elderly Employment Promotion Subsidies system in order to support aged citizens with financial support and to retire at an earlier age.¹²⁴³ Smaller businesses would also be cutting costs in hiring elderly.

On 3 February 2022, the Ministry of Employment and Labour announced there would be stricter safety and health measurements in high-risk environments such as the forestry industry, with the majority of the accidents impacting aged workers.¹²⁴⁴

On 10 March 2022, the Minister of Employment and Labour An-Kyung-duk announced the “Comprehensive Consulting for Remote Work” program.¹²⁴⁵ This program provides free consultation to small and medium sized businesses to assist them in adopting remote work in light of the COVID-19 pandemic.

On 6 April 2022, the Ministry of Employment and Labour introduced a program for unemployed individuals who are between the ages 50 to 69.¹²⁴⁶ The program will allow for those who have already garnered training certificates and skills to participate in work to better their communities, dubbed a “career-based work project.”

On 18 May 2022, the Ministry of Employment and Labour and the National Labour Relations released a new National Labour Relations (NLRC) correctional system in order to prevent gender discrimination when hiring employees.¹²⁴⁷ Further, the system will combat sexual harassment as well as the unjust management of those who were sexually assaulted by implementing better working conditions, anti-discriminative measures, and compensation for the victims.

Korea has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Despite efforts to promote the adoption of remote work through providing consulting resources, Korea has not adapted its regulatory framework to either remote work or platform work. Notwithstanding, it has implemented policies aimed at addressing intergenerational inequalities through programs that increase elderly subsidy and work training.

Thus, Korea receives a score of -1.

Analyst: Adriana Park

Mexico: 0

Mexico has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 2 November 2021, President Andrés Manuel López Obrador announced that women and girls would be a focal point of welfare programs of the Fourth Transformation.¹²⁴⁸

On 12 January 2022, the Government of Mexico passed the right to disconnect amendment in the Federal Labour Law.¹²⁴⁹ This amendment allows employees to accommodate rest hours into their day, which is essential when remote work or telework.

On 8 March 2022, President López Obrador participated in the commemoration of International Women's Day. The President gave a speech that emphasized the political rights of women as well as increased women participation in institutions.¹²⁵⁰ The President also expressed the importance of improving economic, social and gender equality.

On 13 June 2022, President López Obrador announced the purchase of Altán Redes by the government.¹²⁵¹ The goal of purchasing the telecommunications company is to increase internet coverage to rural areas of the country.

On 10 August 2022, President López Obrador announced that the government would be investing MXN30 billion in network infrastructure to bring internet access to remote communities.¹²⁵²

On 25 August 2022, President López Obrador met with members of the Federal Electricity Commission (CFE) and announced an investment to install 5000 antennas to expand connectivity of Altán Redes, which is estimated to increase internet coverage to 80 per cent.¹²⁵³

On 21 October 2022, the Ministry of Labor and Social Welfare revealed that they will submit a proposal to Congress to convert gig workers to formal employees.¹²⁵⁴ Though this is only a projection of an action, it shows intent to change platform work structures and intent to include more employees.

Mexico has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Mexico has adapted its regulation to remote work through amending its Federal Labour Code to legislate the right to disconnect. However, it has not adapted its regulatory framework to platform work. Notwithstanding, Mexico has sought to address the digital gender divide through increasing welfare for women.

Thus, Mexico receives a score of 0.

Analyst: Joseph Muqin Shen

Russia: 0

Russia has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 1 July 2022, the government announced that the “Gosuslugi” (“State Services”) platform that is used as the primary provider of digital governmental services, would serve to connect employers and applicants. The government decree No1192 allows usage of the platform to sign documents via electronic signature and paperless delivery.¹²⁵⁵

Russia has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. Russia has taken actions to adapt regulatory frameworks on digital work, but has not addressed platform work or the gender or intergenerational digital divide.

Thus, Russia receives a score of 0.¹²⁵⁶

Saudi Arabia: –1

Saudi Arabia has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 9 December 2021, the Ministry of Human Resources and Social Development's Social Security Office in Al-Kharj held training courses on computer skills and English for nearly 100 people that are covered by the social security system.¹²⁵⁷ Attendees of the training courses included both sexes and was an initiative from the office's Empowerment Department.

On 14 December 2021, the Ministry of Human Resources and Social Development confirmed that they will continue to pursue the goal of increasing flexible work environments.¹²⁵⁸ This commitment applies to encouraging flexible remote working platforms as well as less templated work schedules.

On 30 December 2021, the Ministry of Human Resources and Social Development's Social Development Center in Wadi Fatima hosted a training course on the principles of computer use and further skills.¹²⁵⁹

On 6 January 2022, the Ministry of Human Resources and Social Development hosted a virtual meeting that included leaders, consultants, experts and board of director members to discuss increasing women's participation in board memberships.¹²⁶⁰ The meeting included discussion of challenges that women face in companies and board memberships, as well as solutions and incentives that can increase participation.

On 2 February 2022, the Governor of Communications and Information Technology Commission Muhammad bin Saud Al-Tamimi announced initiatives to increase Saudi Arabia's internet connectivity, bringing coverage to more remote areas of the country.¹²⁶¹ Investments into Wi-Fi coverage and a trial of a Low Earth Orbit (LEO) satellite were simultaneously announced.

On 30 March 2022, the Minister of Communications and Information Technology Abdullah Al-Sawaha spoke at the Sync Digital Wellbeing Summit, where he emphasized the importance of digital development and investment, as well as the benefits of a digital transformation for future generations.¹²⁶²

On 26 May 2022, the Ministry of Human Resources and Social Development held a workshop on empowering women in the labor market.¹²⁶³ The workshop was organized in cooperation with the World Bank and addressed issues relating to participation of women in the labor force.

Saudi Arabia has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. While Saudi Arabia has created initiatives to foster digital skills, women's participation in management boards and flexible working arrangements, it has not adapted its regulatory framework to remote work or platform work.

Thus, Saudi Arabia receives a score of -1.

Analyst: Joseph Muqin Shen

South Africa: +1

South Africa has fully complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 7 December 2021, Minister of Labour Thulas Nxesi announced that amendments are underway for labour laws focusing on platform and online work that challenge the definition of the relationship of 'employer' and 'employee.'¹²⁶⁴ This announcement is preliminary and is yet to constitute a regulatory change.

On 10 February 2022, the South African Department of Home Affairs introduced a new work visa known as the Digital Nomad Visa, which aims to make South Africa more accessible to remote workers and boost tourism in the country.¹²⁶⁵ The remote working visa will make it possible for professional to live and work for a foreign company whilst living in South Africa.

On 28 February 2022, the Department of Employment and Labour published a proposed amendment to the Employment Services Act, No.4 of 2014, Sections 08 and 09 to introduce new provisions.¹²⁶⁶ The amendments introduce digital labour platforms and workers to the Act by defining digital labour platforms and platform workers in order to create a more inclusive labour market in South Africa.

On 15 June 2022, the Department of Public Works and Infrastructure announced their results for the Expanded Public Works Programme.¹²⁶⁷ The program provides opportunity for people of various backgrounds to garner or improve their skills to be more marketable in the labour market.

South Africa has fully complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. South Africa has taken steps by including definitions for labour platforms and platform workers in its Employment

Turkey has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

Turkey has failed to comply with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. No evidence was found of Turkey taking action on this commitment during the compliance monitoring period.

Thus, Turkey receives a score of -1.¹²⁶⁸

Analyst: Yuchen Bai

United Kingdom: +1

The United Kingdom has fully complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 2 February 2022, the government published the Levelling Up White Paper that included twelve national missions to be accomplished by 2030. National mission number five pledged to increase the proportion of students achieving the expected standard of education to 90 per cent and increasing this proportion in the worst performing areas.¹²⁶⁹

On 17 March 2022, the government published an Inclusive British strategy which detailed seventy actions to tackle racial disparities, increase opportunities and promote fairness.¹²⁷⁰ This strategy is further to the Levelling Up White Paper and includes measures such as policing reforms, support for at risk children and action on the pay gap within ethnic groups.

On 6 April 2022, the government started removing the requirement for employers to check Biometric Residence Cards, Biometric Residence Permits and Frontier Worker Permits of employees before permitting them to work.¹²⁷¹ This is a transition for employers to use the online check system that allows more workers, especially online or remote contractors, to operate not in-person.

On 28 April 2022, the Department for Business, Energy and Industrial Strategy announced a new subsidy control system that will support jobs in the United Kingdom. The new system aims to regulate subsidies

¹²⁶⁸ This score of non-compliance was determined after searching the following websites: <https://www.turkiye.gov.tr/>, <https://www.aile.gov.tr/>, <https://www.ktb.gov.tr/>, <https://www.icisleri.gov.tr/> and <https://www.oecd.org/coronavirus/en/policy-responses>.

¹²⁷⁰ Government launches landmark Inclusive Britain strategy, GOV.UK (London) 17 March 2022. Access Date: 10 June 2022. <https://www.gov.uk/government/news/government-launches-landmark-inclusive-britain-strategy>

¹²⁷¹ United Kingdom Introduces Changes to Right-to-Work Scheme and Revamps Immigration Rules, The Nat Law Review (Chicago) 11 April 2022. Access Date: 17 June 2022. <https://www.natlawreview.com/article/united-kingdom-introduces-changes-to-right-to-work-scheme-and-revamps-immigration>

so that every subsidy must deliver strong benefits to local communities, ensure good value for money for the British taxpayer and provide a more flexible system for the future of the labour market.¹²⁷²

On 9 May 2022, the Department for Business, Energy and Industrial Strategy announced that the government will widen the ban on exclusivity clauses, remove red tape and give workers with the lowest pay the choice to work multiple jobs if they wish.¹²⁷³ The new reform will benefit an estimate of 1.5 million low-paid workers and ensure flexibility over where and when they work. Additionally, “the reforms will remove red tape that prevents those who want to do so – for example, gig economy workers, younger people, or those from disadvantaged backgrounds facing barriers to entering the labour market.”

On 12 May 2022, Prime Minister Boris Johnson requested Member of Parliament Matt Warman to lead a review into how the government can best support a thriving future labour market. The review will consider how remote working could change the labour market regulations with regards to remote work.¹²⁷⁴

On 16 May 2022, the Department for Education updated their guide for employers and staff for flexible working in the education sector. The guide titled “Flexible working in schools” was updated to rename a section in the guide to “Implementing effective flexible working practices: training for senior leaders.” To complement this section webinar links were added for better guidance.¹²⁷⁵

On 13 June 2022, the Department for Digital, Culture, Media and Sports published a policy paper titled “UK Digital Strategy.”¹²⁷⁶ The policy paper described the steps the United Kingdom government will take to strengthen the foundations of their digital economy with the goal of growing the United Kingdom’s tech sector by GBP41.5 billion by 2025 and create a further 678,000 jobs.

On 18 October 2022, the government published a draft regulation to implement the OECD’s “model rules for reporting by platform operators with respect to sellers in the sharing and gig economy.”¹²⁷⁷ This regulation implements regular checks for tax payments on platforms.

The United Kingdom has fully complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. The United Kingdom has adapted its regulatory framework to platform work through allowing low-paid workers to work multiple jobs. It has adapted its regulatory framework to remote work through updating its guide for flexible working in schools. In addition, the United Kingdom has taken steps to address intergenerational inequalities through the Leveling Up White Paper.

Thus, the United Kingdom receives a score of +1.

United States: 0

The United States has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 12 November 2021, the Office of Personnel Management published the 2021 Guide to Network and Remote Work in the Federal Government.¹²⁷⁸ This guide provides policy guidance for federal agencies to leverage telework and remote work tools to meet organizational goals and the changing needs of the “the workforce of the future.”

On 2 December 2021, the Department of Agriculture issued a more expansive telework policy and established a new remote work regulation.¹²⁷⁹ The new regulation established various eligibility and procedures for remote work within the country.

On 30 January 2022, the Federal Acquisition Regulatory Council issued the rule to implement an increase in minimum wage to USD15 for federal contractors. An anticipated 327,300 workers will benefit from the new minimum wage.¹²⁸⁰

On 15 March 2022, the Department of Labour published a report, “Bearing the Cost: How Overrepresentation in Undervalued Jobs Disadvantaged Women During the Pandemic.”¹²⁸¹ This report shows the Department of Labour is willing to commit to addressing occupational segregation by supporting women to enter male-dominated fields, raising wages in women-dominated jobs, and ensuring racial and gender equality for all jobs.

On 13 October 2022, the Department of Labor published the Notice of Proposed Rulemaking on Oct. 13.¹²⁸² This notice adjusts the Fair Labor Standards Act to include consideration of platform workers as employees as opposed to independent contractors. This creates more possible protection and consideration for platform workers.

The United States has partially complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. The United States has taken actions to adapt its regulatory framework to remote work through the 2021 Guide to Network and Remote Work in the Federal Government and the Department of Agriculture’s telework policy. In addition, it has shown consideration for the gender divide in labour. However, the United States has not adapted its regulatory framework to platform work.

Thus, the United States receives a score of 0.

Analyst: Thomas Yue

European Union: +1

The European Union has fully complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities.

On 9 December 2021, the European Commission proposed a Directive that includes new measures to improve the working conditions of platform work.¹²⁸³ The measures focus on employment status, algorithmic management, enforcement, transparency and traceability. This Director proposes to give legal employment status to platform workers and extend rights to minimum wage, collective bargaining, pensions, benefits and work time and health protections.

On 16 December 2021, the European Commission announced an investment of greater than EUR1 billion to improve digital connectivity infrastructures for three years.¹²⁸⁴ This investment will contribute to allowing Europe's citizens to access new jobs and compete in new markets.

On 20 January 2022, President of the European Commission Ursula von der Leyen announced at the European Women on Boards' Gender Diversity Award that she would continue to push for Women on Boards to become an EU law.¹²⁸⁵

On 1 March 2022, the European Commission announced the 50 women-led companies will be selected for the Women TechEU pilot programme.¹²⁸⁶ The programme is a new initiative which offers grants and mentoring to push for more women in tech.

On 18 May 2022, the EU, as part of the Union for the Mediterranean Member States agreed to addressing employment challenges faced by vulnerable members of the population, with a focus on youth and women.¹²⁸⁷ One of the goals is to ensure an inclusive, green, digital and sustainable recovery for all.

On 30 June 2022, the European Commission introduced a new digital strategy, with a focus on the next generation.¹²⁸⁸ Among the strategic objectives is support for the access to a digital workplace.

On 14 July 2022, the European Commission announced a new policy programme Path to the Digital Decade that would foster increased digital transformation in the EU.¹²⁸⁹ The programme would support digitalization of businesses, as well as respect of digital rights.

On 2 August 2022, the European Commission announced implementation of new rules that would improve work-life balance in the EU.¹²⁹⁰ The rules would entitle parents, who are primarily women, to increased parental leave, as well as options to take flexible leaves.

The European Union has fully complied with its commitment to adapt regulatory frameworks to new forms of work while addressing the digital gender divide and intergenerational inequalities. The European Union has adapted its regulatory framework to platform work through its proposed Directive to confer legal employment status to platform workers and provide standards that govern platform work. In addition, the European Union has adapted its regulatory framework to make structural changes that would encourage remote work. It has also addressed the digital gender divide by increasing welfare for women.

Thus, the European Union receives a score of +1.

Background

The G20 Roadmap for Infrastructure as an Asset Class calls for a bridging of the infrastructure gap through collaboration to pool savings for long-term investment.¹²⁹¹ Mobilising private capital for long term investment was first mentioned in the 2008 Washington Summit as part of the focus on reforming financial institutions in which the immediate actions declared the summit should “explore ways to restore emerging and developing countries’ access to credit and resume private capital flows”¹²⁹²

Supporting the protection of private capital flows was subsequently brought to the forefront at the 2009 London Summit as part of a series of macroeconomic commitments that emerged to help summit members recuperate from the global impacts of the 2008 financial crisis. Building on the commitment from the 2008 Washington summit commitment 42 of the “resisting protectionism and promoting

¹²⁹² G20 Washington Summit Commitments, G20 Information Centre (Toronto) 15 November 2008. Access Date: 5 December 2021. <http://www.g20.utoronto.ca/analysis/commitments-08-washington.html>

global trade” focus promised to protect capital flow to developing countries from protectionism by implementing fiscal policies that support the financial sector.¹²⁹³

At the 2009 Pittsburgh Summit, the commitment to continue to encourage investment by supporting capital flows continued alongside the rejection of protectionist measures, encompassed by the commitment to an open, global economy where G20 leaders sought to “not retreat into financial protectionism, particularly measures that constrain worldwide capital flows, especially to developing countries.”¹²⁹⁴

Mention of the commitment to investment or the protection of capital flows was not present from 2010 to 2012. Rather, the 2010 Toronto, 2010 Seoul, 2011 Cannes and 2012 Los Cabos Summits shifted to specialized focuses on macroeconomic and trade commitments pertaining to exchange rates and the devaluation of currency, financial consolidation, and trade policies.

The commitment to investment returned at the 2013 St. Petersburg Summit as a macroeconomic policy on investment which declared the members “[recognize the paramount importance of the investment climate in attracting long-term financing and] will take a comprehensive approach to identifying and addressing impediments to improving underlying investment conditions.”¹²⁹⁵ This commitment is the first commitment to infrastructure investment for the G20.¹²⁹⁶

The 2013 St. Petersburg macroeconomic commitment to investment continued in similar form at the 2014 Brisbane Summit with a particular focus on small and medium-sized enterprises.¹²⁹⁷ The focus on small and medium-sized enterprises continued at the 2015 Antalya Summit but was coupled with a country-specific investment strategy that was proposed to boost investment from the private sector with the aim of “lifting the aggregate G20 investment to GDP ratio, by an estimated 1 percentage point by 2018.”

At the 2017 Hamburg summit, the G20 leaders relayed the importance of “mutually advantageous trade and investment frameworks” focused on maintaining open markets to establish a foundation of trade and fight protectionism.¹²⁹⁸ To do so, the G20 requested the Organization for Economic Cooperation and Development (OECD), the World Trade Organization (WTO), the World Bank Group and the International Monetary Fund (IMF) to report on their monitoring activities, thereby affirming transparency and “promoting a favourable environment for trade and investment.” Furthermore, a commitment to improving international financial architecture was made to improve the systems of international capital flows.

At the 2018 Buenos Aires Summit, commitment 10 of the Leaders’ declaration aimed “to attract more private capital to infrastructure investment” through the amelioration of the infrastructure financing gap.”¹²⁹⁹ This commitment builds upon the commitments of the preceding Hamburg Summit and its

commitment to creating an investment framework, consequently continuing to promote sound financing practices that can further promote investment and mobilise private capital.¹³⁰⁰

At the 2020 Riyadh Summit, mobilising private capital for long-term investment returned as a macroeconomic commitment to “strengthen long-term financial resilience and support growth, including through promoting sustainable capital flows and developing domestic capital markets.”¹³⁰¹

At the 2020 Rome Summit, recognizing the importance of quality infrastructure in the economic recovery of the COVID-19 pandemic, a commitment to financial infrastructure development was reaffirmed with a goal “to develop further the collaboration between the public and private investors to mobilise private capital.”¹³⁰²

Commitment Features

The G20 commitment is: “In line with the G20 Roadmap for Infrastructure as an Asset Class, and building on the G20 Infrastructure Investors Dialogue, we will continue, in a flexible manner, to develop further the collaboration between the public and private investors to mobilise private capital.”

“Building on” in this context is understood as using the G20 Infrastructure Investors Dialogue as a base to achieve further successes.¹³⁰³

“Continue” is meant to convey that progress will be made on this commitment without interruption from the affected parties.¹³⁰⁴

“Flexible” manner infers that the manner through which these aims are achieved can be changed or done in a variety of ways.¹³⁰⁵

“Develop” in this commitment should be interpreted to mean that new initiatives are to be raised in this area, inapplicable to previous initiatives.¹³⁰⁶

“Collaborate” in this context means that the relevant parties involved will work with each other in order to achieve the desired goal.¹³⁰⁷

¹³⁰⁰G20 Leaders’ Declaration: Shaping an Interconnected World, G20 Information Centre (Toronto) 8 July 2017. Access Date: 7 December 2021. <http://www.g20.utoronto.ca/2017/2017-G20-leaders-declaration.html>

¹³⁰⁷ Merriam-Webster (Springfield) n.d. Access Date: 8 December 2021 <https://www.merriam-webster.com/dictionary/collaborate>

“Public” investors references investment originating from the public sector, directly overseen by governments.¹³⁰⁸ “Private” investors, conversely, are businesses or industries not overseen or operated by governments.¹³⁰⁹

“Mobilise” is meant to imply organized cooperation between these private and public investors in the infrastructure sphere,¹³¹⁰ while private “capital” is defined as financial assets that will be invested toward the commitment.¹³¹¹

The G20 Roadmap for Infrastructure as an Asset Class was agreed to in March 2018 under the Argentinian Presidency. The purpose of the Roadmap is to “address common barriers to the emergence of infrastructure as an asset class, including the heterogeneous nature of infrastructure assets, the lack of a critical mass of bankable projects and insufficient data to track asset performance.” It encompasses three overarching pillars of i) improving project development; ii) improving the investment environment for infrastructure; and iii) promoting great standardization. Under pillar one are the workstreams of contractual standardization, financial standardization, project preparation and bridging the data gap. Under pillar two are the workstreams of financial engineering, risk allocation and mitigation; regulatory frameworks and capital markets; and quality infrastructure.¹³¹²

The G20 Infrastructure Investors Dialogue happened on 3 June 2021. It included the OECD and the D20 Long-Term Investors Club, with representatives from the private sector, international organizations and academia, to discuss Financing Sustainable Infrastructure for the Recovery.¹³¹³ The discussions focused on supporting “ongoing collaboration between the public and private sectors to unlock further investment and sustainability, particularly in light of the role of quality infrastructure investment for the recovery.”¹³¹⁴

Actions taken are to be pursued in line with the existing framework established by the G20 Roadmap for Infrastructure as an Asset Class. This encourages governments to collaborate with private sector actors to facilitate easier transfers to capital toward infrastructure projects, leading to long-term public savings. Governments are also called to build on the themes advanced as part of the G20 Infrastructure Investors Dialogue, which took place in 2021 under the Italian G20 Presidency in collaboration with the Organization for Economic Cooperation and Development (OECD).¹³¹⁵ This conference endorsed proposals to support collaboration between public and private actors to fund investments in infrastructure during the recovery from the COVID-19 recession.

To achieve a full compliance score, the G20 member must take strong actions to spearhead new infrastructure initiatives that harness the capital assets of private sector actors, as well as public sector

actors. Merely maintaining existing initiatives and plans in this field is insufficient to receive a score of full compliance; members must actively advance the goals outlined by the G20 Roadmap for Infrastructure as an Asset Class as well as build upon the principles endorsed by the G20 Infrastructure Investors Dialogue. This commitment includes a depth component: how strong the actions taken dictate whether a G20 member receives a score of +1 or 0. Both national and international actions count towards compliance. For full compliance, a G20 member must take strong action such as launching initiatives, challenges or calls for projects that result in public-private infrastructure investment. Other examples of strong action could include signing agreements or memorandums of understanding with private investors for infrastructure investment. Weak action, such as simply making statements which indicate a G20 members intention to further public-private partnerships without concrete action, attending international meetings on infrastructure investment or hosting meetings with private investors that do not result in concrete agreements or actions would be considered partial compliance.

Scoring Guidelines

-1	The G20 member has not furthered collaboration between public and private sectors to mobilise private capital for infrastructure investment.
0	The G20 member has somewhat furthered collaboration between public and private sectors to mobilise private capital for infrastructure investment.
+1	The G20 member has strongly furthered collaboration between public and private sectors to mobilise private capital for infrastructure investment.

*Compliance Director: Brett Szymul
Lead Analyst: Leila Koobi*

Argentina: +1

Argentina has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment. In line with the G20 Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, it has taken many steps to promote collaboration between private and public sectors to accrue capital for infrastructure.

On 23 November 2021, Minister of Economy Martin Guzman and Chief of Staff Juan Manzur met with Governor Gustavo Bordet to formalize a financial assistance agreement of ARS5 billion for the Entre Rios province.¹³¹⁶ This financing will be mostly directed towards gas pipeline expansions to provide energy for local economies. Further, the assistance will also fund repairs on highways to improve logistics between local productive farms. The agreement will work with local producers to target infrastructural development in the province for goals of enhancing regional economies.

On 24 November 2021, Secretary for International Economic and Financial Affairs of the Ministry of Economy Maia Colodenco stated that the Technical Table for Sustainable Finance in Argentina, granted the approval of a roadmap that will guide short-, medium-, and long-term actions of public actors of the financial system.¹³¹⁷ This roadmap will promote the alignment of the private sector in sustainable development ambitions. Further, she affirmed the signing the of the Joint Declaration of

On 26 February 2022, Minister Guzman, and Misiones Governor Oscar Herrera, signed a financial assistance agreement of ARS2 billion to be granted via the Trust Fund for Provincial Development.¹³²⁹ The funds will be used for installing photovoltaic panels and road works to the city of Andresito and protecting its wetlands. Guzman stated that the funding would be valuable for promoting productive development in the province, as it would stimulate economic and social activity around the major municipalities.

On 9 March 2022, Minister of Transport Alexis Guerrero, and World Bank officials met to discuss the development of railway services.¹³³⁰ The meeting saw both parties agree to securing more international funds for developing railway systems and improving the transport of goods across the country. Additional proposals saw an agreement to enhance the mobility network for passengers, by creating more stations, developing better designs for urban transport, and constructing bicycle lanes to encourage diverse modes of transport. The Minister also provided updates on current World Bank funding for developing the Retiro grid and Miter line station, stating successful progress in reducing train delays, increasing connectivity, and possibly adding electric trains. Both parties agreed to continue financing the development through the Plan for the Modernization of Rail Transport, thereby committing to updating Argentina's transportation infrastructure.

On 16 March 2022, Undersecretary of Industry, Knowledge Economy, and External Commercial Management Julieta Loustau signed an agreement to create industrial parks in the province of La Salta. Minister of Production and Sustainable Development Martín De los Ríos, Minister of Economy and Public Services Roberto Dib Ashur and Minister of Infrastructure Sergio Camachostated stated that the plan will revitalize Argentina's industrial infrastructure, allowing for greater economic development and employment.¹³³¹ Additionally, the development will be financed over time by the national government, Unión Industrial de Salta, and the Cámara PyME para los parques industriales, otherwise known as the SME Chamber for Industrial Parks, as the ministers emphasized the role of cooperation between different public and private entities for mutual benefit.

On 17 March 2022, directors of Compañía General de Combustibles and Minister Guzman came to an agreement that will see an investment of ARS300 million for developing gas and energy production.¹³³² The company affirmed its commitment to financing upgrades to the energy sector, such as in producing 33 new gas wells in the Austral Basin, and further plans to finance enhancing energy infrastructure. Moreover, Minister Guzman emphasized the government's plans to support other energy development initiatives, such as the Plan Gas Program, and announced interests in future public-private initiatives to fund infrastructure in gas transportation.

aims to adapt existing infrastructure related to science, technology, and innovation. The funding will go to existing centers of research and development, such as the Andean Patagonian Forest Research and Extension Center, and the Center for Research, Development, and Innovation in Health.

On 10 September 2022, Minister of Economy Sergio Massa, met with representatives of multinational energy companies to encourage investment in Argentina.¹³⁴⁷ Notable parties included directors from Chevron and representatives from Haliburton while Minister Massa emphasized the need for foreign investment to develop Argentina's mining infrastructure.

On 12 September 2022, Minister of Economy Sergio Massa met with the Managing Director of the IMF, Kristalina Georgieva, to discuss fiscal stabilization and development in Argentina.¹³⁴⁸ Minister Massa stated continued plans to strengthen reserves, stabilize markets, and bring fiscal order to the economy, emphasizing the importance of external support.

Argentina has fully complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted policies to facilitate public-private partnerships in infrastructure investment, whilst encouraging opportunities to accrue private capital for further projects.

Thus, Argentina receives a score of +1.

Analyst: Firaz Khan

Australia: +1

Australia has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 19 November 2021, the government announced the Cooper and Adavale Basins to be the third basin delivered under the Gas Fired Recovery announced in the 2020-21 federal budget.¹³⁴⁹ The government plans to dedicate more than AUD60 million in new initiatives to bring new gas to the market, putting downward pressure on the prices for oil and gas.

On 10 December 2021, the government invested a further AUD20 million in funding for the Australian 5G Innovation Initiative.¹³⁵⁰ The project will enable use of 5G technologies for organizations and encourage businesses to adopt 5G technology. This project will help support Australia's post-COVID-19 economic recovery, boost productivity, and create jobs.

On 20 December 2021, the government released an Aviation Recovery Framework, to help Australia's aviation sector recover after economic shocks due to the pandemic.¹³⁵¹ The program adds an additional AUD110 million to the assistance provided to the aviation sector during the pandemic.

On 13 January 2021, the Renewable Energy Agency provided up to AUD40 million to support ultra-low cost solar.¹³⁵² This funding was provided to advance the research and commercialisation of solar photovoltaic (PV) technology. The Ultra-Low Cost Solar PV Round remains open to a broad range of applications, including commercial organizations.

On 14 January 2022, the Department of Defense issued a notification of intended procurement activity to declare its intentions of seeking government approval to build 991 live-in accommodations for the Australian Defence Force in the Randwick Barracks in Sydney.¹³⁵³ The Department stated it seeks to procure the accommodations through public-private partnerships, which will provide options to plan, design, finance, and construct the project.

On 25 January 2021, the government began accepting applications for the 2nd round of Securing Raw Materials program.¹³⁵⁴ Valued at AUD35 million, this funding will help businesses capitalize on research capabilities and local knowledge in regional Australia to develop innovative and locally sourced raw material supplies.

On 1 March 2022, the Department of Defense announced it has begun its procurement of public and private partnerships to construct the 991 live-in accommodations for the Australian Defence Force in the Randwick Barracks.¹³⁵⁵ The Department elaborated on the expectations for the accommodations, stating they seek to create an integrated estate that is "affordable, safe, and sustainable." The procurement process entails two stages: first, a request for expressions of interest and, second, a shortlist of qualified candidates who will submit proposals to the department by 14 March 2022.

On 24 May 2022, at the Quad Joint Leaders' meeting comprised of Prime Minister Anthony Albanese of Australia, Prime Minister Narendra Modi of India, Prime Minister Fumio Kishida of Japan, and President Joe Biden, the leaders reaffirmed their commitment to improving infrastructure the Indo-Pacific region through public and private partnerships.¹³⁵⁶ To do so, the four leaders pledged USD50 billion to infrastructure assistance and investment to the region over five years.

On 27 September 2022, the Minister for Infrastructure, Transport, Regional Development, and Local Government Catherine King, announced the Australian Government and the Foundation of Rural and Regional Renewal (FRRR) provided AUD834892 for fifty community-led initiatives.¹³⁵⁷

Australia has fully complied with its commitment to develop infrastructure projects with strong elements of private and public collaboration. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country remains proactive in seeking private and public partnerships when developing vital infrastructure.

Thus, Australia receives a score of +1.

Brazil has partially complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

In January 2022, the government prioritized five major infrastructure projects to receive tax incentives. The combined projects receive a total of BRL9 billion, which includes railway projects, port sector development, and highway infrastructure. Beneficiary companies will receive up to five years of related tax exemption.¹³⁵⁸

On 31 January 2022, the public consultation for the privatization of port of Santos began.¹³⁵⁹ Moreover, the investment in the port's rail system will likely increase the port capacity. The concession is estimated to create up to 60,000 jobs, according to the Minister of Infrastructure.

On 12 February 2022, Minister of Infrastructure Tarcísio Gomes de Freitas stated that the future infrastructure planning and financial flows will be increasingly related to international ESG standards, with a focus on analyzing erosion processes, compensatory planting, adequate treatment of affected communities and compensations.¹³⁶⁰

On 8 September 2022, the government authorized the city of Belo Horizonte to privatize their subway system.¹³⁶¹ This initiative has raised BRL180 billion through the auction and made BRL1.3 trillion for Brazilian investment.

On 13 September 2022, the government finalized the construction of the canal that connects the Sao Francisco river to the Northeastern region.¹³⁶² This new promised canal infrastructure will promote water security by bringing water to the Northeastern region.

Brazil has partially complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted few policies to facilitate public-private partnerships in infrastructure investment.

Thus, Brazil receives a score of 0.

Analyst: Yuyang Jiang

Canada: +1

Canada has complied with its commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment. Canada has launched initiatives for projects resulting in public-private infrastructure development, particularly working through the Canada Infrastructure Bank.

On 10 November 2021, the Canadian Investment Bank (CIB) — a federal Crown Corporation of Canada — announced its partnership with the University Health Network to invest CAD19.3 million into creating the world's largest raw wastewater energy transfer system at Toronto Western Hospital.¹³⁶³ The project is the first of the CIB's Public Building Retrofits Initiative, which aims to bridge the commercial and economic gap in energy savings projects.

On 12 November 2021, the CIB announced its partnership with the Government of Alberta in building 10 irrigation districts and create 7,300 permanent jobs in the province. As part of Alberta's Recovery Plan, the partnership entails investing CAD933 million into the development of the irrigation projects, producing a CAD477 million increase in the province's GDP annually.¹³⁶⁴

On 1 December 2021, the CIB announced its contribution to the Dream Group's 10 building retrofits in Ontario and Saskatchewan, which will be decarbonized and modernized.¹³⁶⁵ The investment comes as part of the CIB's Commercial Building Retrofits Initiative and aims to assist the Dream Group's aim to achieve net-zero carbon emissions by 2035.

On 19 November 2021, the CIB announced its agreement with the Bus Carriers Federation, entailing an investment of CAD400 million from both the CIB and the Ministry of Transport of Quebec into creating 4,000 zero-emission buses as part of Quebec's sustainable transit initiative.¹³⁶⁶ The agreement would allow bus operators to make purchases of one of the 4,000 zero-emission busses, subsequently

reducing greenhouse gas production by 81,000 tonnes per year and contributing to Canada's sustainable development infrastructure.

On 20 and 21 January 2022, Canada attended the first meeting of the G20 Infrastructure Working Group, where was discussed the enhanced role for infrastructure in the recovery from the Covid-19 pandemic, including through scaling up sustainable infrastructure by leveraging private sector participation.¹³⁶⁷

On 4 April 2022, the CIB announced its partnership with the City of Brampton to invest CAD400 million to finance the acquisition of 450 zero-emission buses for the city, aiming to improve the city's sustainable energy infrastructure and reduce emissions by at least 51,750 tonnes annually.¹³⁶⁸

On 6 April 2022, Deputy Prime Minister and Minister of Finance Chrystia Freeland announced that Canada will aim to invest CAD15 billion into The Canada Growth Fund for private investment into "new and green technologies," seeking to attract a private to public investment ratio of three to one.¹³⁶⁹ The fund will be used by Prime Minister Justin Trudeau's cabinet to fund environmental projects that would otherwise not get public support and will be eligible for usage by both international and domestic investors.

On 12 May 2022, the CIB announced it will be investing CAD136.6 million into the Dream Group's 19 development projects in Toronto and Saskatoon as part of its Commercial Building Retrofits Initiative and the Dream Group's aim to achieve net-zero carbon emissions by 2035.¹³⁷⁰ The investment aims to improve energy efficiency infrastructure in Canada and reduce building-related greenhouse gas emissions.

On 1 June 2022, the CIB announced its partnership with Tlingit Homeland Energy Partnership (Tlingit) to invest CAD80 million towards building a 9.2 megawatt hydroelectric facility and 93 kilometers of transmission lines to deliver clean power to the Yukon Territory.¹³⁷¹ CIB's partnership with Tlingit, a company fully-owned by the Taky River Tlingit First Nations, would reduce greenhouse gas emissions by 29,500 tonnes annually and assist in closing the infrastructure gap and reliance on non-renewable energy sources for communities in the Yukon Territory.

On 15 June 2022, the CIB announced an investment of CAD50 million in Efficiency Capital's CAD62.5 million asset management platform, which invests into private sector energy efficiency and

low-carbon retrofits.¹³⁷² The investment is part of the CIB's Commercial Building Retrofit Initiative, which aims to improve energy efficiency infrastructure in Canada and reduce building-related greenhouse gas emissions.

On 20 June 2022, the CIB announced its partnership with Avenue Asset Living Management to commit CAD150 million to retrofitting sustainable, low-density residence buildings across Canada to decrease greenhouse gas emissions by 49 per cent.¹³⁷³

On 21 June 2022, the CIB announced its partnership with Arrow Technology Group Limited Partnership (Arrow) to invest CAD10 billion into securing broadband infrastructure for Indigenous and rural communities in Alberta.¹³⁷⁴ With Arrow responsible for construction, installation, and maintenance of the service, the broadband technology would ensure secure internet access for 17 Indigenous and one rural community in Alberta, stepping closer to closing the infrastructure gap and providing total internet accessibility in Canada.

Canada has taken strong, explicit actions to promote public-private collaboration for infrastructure projects, particularly working through the Canada Infrastructure Bank and thereby adhering to its commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

Thus, Canada receives a score of +1.

Analyst: Abigail Potter

China: + 1

China has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 5 January 2022, Vice Chairman of the National Development and Reform Commission Ning Jizhe signed the Implementation Plan of Jointly Building the Belt and Road Initiative between the Government of the People's Republic of China and the Government of the Kingdom of Morocco with the Moroccan Minister of Foreign Affairs, African Cooperation and Moroccan Expatriates Nasser Bourita.¹³⁷⁵ The Implementation Plan of Jointly Building the Belt and Road Initiative will develop the framework for increased bilateral cooperation in infrastructure construction.

On 6 February 2022, President Xi Jinping signed a memorandum of understanding with President Alberto Fernandez from Argentina on promoting the construction of the Belt and Road initiative which would include the guarantee of USD23.7 billion of financing for investment and infrastructure works.¹³⁷⁶

¹³⁷⁶ Argentina and China seal Silk Road deal, Deutsche Welle (Bonn) 6 February 2022. Access Date: 9 February 2022. <https://www.dw.com/en/argentina-and-china-seal-silk-road-deal/a-60679278>

The meeting also discussed the possibility of expanding local Argentinian participation in infrastructure investment projects. The goal is to enhance regional connectivity and to also promote and diversify Sino-Argentinian economic relations.¹³⁷⁷

On 10 February 2022, the National Development and Reform Commission released guidelines on creating a green and modern environmental infrastructure system by 2030 with the assistance of private capital. The guidelines call for eligible environmental infrastructure projects to seek investment from real estate investment trusts, which will aid in pooling private and public capital.¹³⁷⁸ The guidelines also call for eligible companies to seek investment from the private sector to finance urban environmental projects.

On 3 May 2022, Vice Minister of Finance Xu Hongcai announced plans to issue RMB3.65 trillion in special local government bonds and emphasized these bonds as critical for infrastructure investment and development.¹³⁷⁹ The pooling of private capital through these bonds will assist in developing physical infrastructure such as road systems and digital infrastructure such as the construction of a 5G network and data centres.¹³⁸⁰

On 29 June 2022, the State Council decided to issue up to RMB300 billion in financial bonds to replenish capital investments in infrastructure projects.¹³⁸¹ The increased financial support for these infrastructure projects will close funding gaps and further increase socioeconomic development.

On 25 July 2022, the Ministry of Finance Public Private Partnership Center released its 2022 semi-annual report with data on private-public partnerships.¹³⁸² In the first half of the year, 279 new private-public partnerships were recorded in the national database with an investment of RMB458.6 billion. This includes major investment in transportation and municipal engineering projects totalling RMB194.8 billion and RMB89.9 billion respectively.

China has fully complied with its commitment to further private-public infrastructure collaboration by developing new initiatives within the One Belt One Road framework and calling for the increased pooling of private savings to fund infrastructure initiatives.

Thus, China receives a score of +1.

Access Date: 12 February 2022. <https://www.bmwi.de/Redaktion/EN/Pressemitteilungen/2022/02/20220208-germany-and-france-intend-to-commit-eur1-billion-each-for-new-european-tech-champions-initiative.html>

and Hamburg regarding transit investment.¹³⁹⁶ The project aims to promote the amelioration of infrastructure in the region through the inflow of investment from public and private sources.¹³⁹⁷

On 26 May 2022, Germany backed the South-African-created Just Energy Transition Partnership, additionally supported by the United Kingdom, the United States, France and the European Union who all pledged USD8.5 billion to South Africa and its transition away from carbon-intense electrical systems.¹³⁹⁸ To do so, the investment highlighted the indispensability of public-private partnerships in securing the transition and meeting South Africa's economic, environmental, and social infrastructure investment goals.

Germany has taken strong actions to spearhead new infrastructure initiatives that harness the capital assets of private sector actors, as well as public sector actors. Through increased public-private collaboration on semiconductor production, refurbishment and additions to the Critical Infrastructure Ordinance and a joint initiative with EU member states to mobilize public-private capital into infrastructure, Germany has fully complied with its commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

Thus, Germany receives a score of +1.

India has partially complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment. In line with the G20 Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, it has taken a few steps to promote collaboration between private and public sectors to accrue capital for infrastructure

On 2 November 2021, Prime Minister Narendra Modi announced his support of the National Master Plan (GatiShakti)—a program that will coordinate infrastructure investments across 15 central ministries and various state governments. The plan aims to take existing project schemes and coordinate them with the necessary departments needed to achieve infrastructure goals. The plan will include support for development in inland waterways, dry/land ports, textile clusters, pharmaceutical clusters, defence corridors, electronic parks, industrial corridors, energy production, fishing clusters and agricultural zones. Further, Prime Minister Modi stated that the plan will institutionalize the planning process for stakeholders, allowing projects to be designed with a “common vision” rather than prior fragmented processes. Finally, the plan also contains steps to promote accessibility of data to stakeholders and potential investors, this is to be rooted in a GIS-based spatial planning system along with a monitoring mechanism with regular updates on project progress.¹³⁹⁹

On 1 February 2022, India revealed a budget of USD529.7 billion in the coming year, primarily focusing on investments in infrastructure relating to highways and affordable housing. The new budget is aimed

at supporting economic recovery from the pandemic, where intensive capital expenditure on infrastructure projects is meant to crowd in private investment. Finance Minister Nirmala Sitharaman stated that INR200 billion has been granted for a national highway expansion plan, and more than 400 energy efficient trains are set to be manufactured for use. Additionally, the minister also announced that the central bank will introduce a blockchain based digital currency as well as other innovations to enhance the digital economy. This strategy is meant to be fully mobilized by the 2023 fiscal year, with aims to encourage private capital through government support of necessary infrastructure and investment opportunities.¹⁴⁰⁰

On 18 February 2022, Prime Minister Modi launched 100 agricultural drones that carried out various farm related operations. The development came as part of India's plan to expand the agriculture sector, specifically, through the commercial use of drones and other aerial vehicles. The government plans to lead this motion through providing grants for the use of farm drones in state-run institutions, as drone hiring centres and companies will receive special funding. The government states that the plan and allotted budget will create public-private partnerships for needed high tech farm services.¹⁴⁰¹

On 1 May 2022, the United Arab Emirates announced an investment of USD100 billion in India across various sectors.¹⁴⁰² The agreement came as part of the India-UAE Economic Partnership Summit, in which both countries committed to expanding trade and using the funding to develop infrastructure to maximize economic activity.

On 24 May 2022, at the Quad Joint Leaders' meeting comprised of Prime Minister Anthony Albanese of Australia, Prime Minister Narendra Modi of India, Prime Minister Fumio Kishida of Japan, and President Joe Biden, the leaders reaffirmed their commitment to improving infrastructure the Indo-Pacific region through public and private partnerships.¹⁴⁰³ To do so, the four leaders pledged USD50 billion to infrastructure assistance and investment to the region over five years.

On 2 August 2022, Prime Minister Modi participated in a meeting with Maldives President Ibrahim Mohamed Solih to strengthen their partnership in various bilateral infrastructure projects.¹⁴⁰⁴ The leaders examined the progress made thus far on the contract between National Buildings Construction Cooperation under India's Ministry of Housing and Urban Affairs and JMC Projects to build 4000 social housing units in Hulhumale. Further, India-Maldives cooperation concerning Addu roads and Mosque restoration projects were reviewed by the leaders. A memorandum of understanding was signed between the Ministry of Finance in Maldives and India's Exim bank during this meeting for the financing of police infrastructure in the Maldives.

India has partially complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for

Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted few policies to facilitate public-private partnerships in infrastructure investment.

Thus, India receives a score of 0.

Analysts: Firaz Khan and Rachel Gam

Indonesia: +1

Indonesia has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment. In line with the G20 Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, it has taken many steps to promote collaboration between private and public sectors to accrue capital for infrastructure.

On 15 November 2021, Indonesia signed onto the Regional Comprehensive Economic Partnership (RCEP) along with Australia, New Zealand, China, Japan and Korea, which are also members of the Association of Southeast Asian Nations.¹⁴⁰⁵ RCEP is “the largest regional trading block agreement in the world,” covering approximately 30 per cent of world GDP, world foreign direct investment and population.¹⁴⁰⁶ The agreement calls for the elimination of tariffs among signatories, specifically a 65 per cent cut upon entry-into-force, with gradual cuts up to 92 per cent. Coordinating Minister for the Economy Airlangga Hartarto listed the benefits of the RCEP agreement to Indonesia as “certainty and uniformity of trade rules, a more conducive investment climate, increased business opportunities for goods, services and investment, and strengthening integration into the Regional Value Chain.” RCEP member countries already form the majority of Indonesia’s exports and imports, and 72 per cent of its inward direct investment. RCEP was an initiative of Indonesia in 2011, though the country has yet to fully ratify the agreement despite most other signatories having done so already, due to lingering protectionist concerns. The agreement is projected to be ratified in Indonesia in the first quarter of 2022.

On 7 December 2021, the House of Representatives passed the Central and Regional Governments Financial Relations Bill into law. Director General of Fiscal Balance at the Finance Ministry Astera Primanto Bhakti stated that “the law aimed to increase the regional fiscal capacity, improve the quality of regional spending, and harmonize regional fiscal policies.”¹⁴⁰⁷ The tools for achieving these goals, provided by the law, include the establishment of a more equitable revenue sharing fund for inter-regional transfers, and decentralization of taxation powers to local governments while still promoting harmonization of central and regional fiscal policies.

On 10 January 2022, Minister of Transportation Budi Karya Sumadi encouraged cargo transportation development at Kertajati Airport, expressing plans to transform the airport into a central hub for aircraft maintenance activities and logistics.¹⁴⁰⁸ He submitted a request that calls for “centralizing the aircraft fleet owned by the government to carry out aircraft maintenance at Kertajati Airport” along with a package of

other reforms, such as exemptions on import duties and landing fees, to realize such goals. He also emphasized the necessity of marketing to investors the competitive advantages of the airport, namely its ability to accommodate wide-body aircraft, to facilitate private involvement in development.

On 18 January 2022, the Capital City Bill was signed into law, marking the initiation of development towards Indonesia's new capital, Nusantara, in the East Kalimantan province.¹⁴⁰⁹ This new capital city was set to replace Jakarta by early 2024, to relieve congestion in the current capital—congestion alone costing over USD6 billion annually—and encourage investment outside the island of Java. Projected construction costs for Nusantara sit at around USD35 billion, spanning an area “roughly three times the size of New York City.” Smart city planning to boost efficiencies in government service provision, maritime infrastructure development to encourage lower logistics costs and industrial activity, and a sizeable renewable energy mix, are the key stated guidelines in the construction of Nusantara. Public-private partnership will be essential for funding, with the government planning on covering just under 60 per cent of construction costs.

On 22 January 2022, President Widodo pledged “the elimination of extreme poverty and stunting in Indonesia by 2024” according to the Deputy for Coordination of Social Welfare Improvement at the Coordinating Ministry for Human Development and Culture.¹⁴¹⁰ In accordance with these stated goals, including the heightening of inter-regional connectivity for which is necessary to ensure these goals are met, the Public Works and Public Housing Ministry's Regional Infrastructure Development Agency has announced the undertaking of infrastructure interventions in villages across Indonesia. Tabulated data across agencies, specifically from the National Population and Family Planning Agency, are being integrated to target and prioritize villages that are in most need of basic services and related infrastructure investment.

On 24 January 2022, the Coordinating Minister for Maritime Affairs and Investment Luhut Binsar Pandjaitan announced the construction of a new container port in the Batam Free Trade Zone and Free Port, located just opposite to Singapore.¹⁴¹¹ He pointed out how Indonesia's logistic needs alone account for 23 per cent of costs, much higher than neighboring countries where costs hover at around 13 per cent. He stated plans to decrease costs to 17 per cent by 2024. The port is planned to be highly digitized and eco-friendly. Importantly, Minister Sumadi of the Transportation Ministry said that his ministry has “opened opportunities for the private sector as wide as possible through the construction of ports” by delegating their role to inviting foreign investors together with regional-owned enterprises, with the government handling regulatory affairs in “creating the time frame and study.”

On 26 January 2022, Minister Sumadi encouraged the completion of the Bintan Baru International Airport by 2023, as part of a drive by the Transportation Ministry to develop broadly geographically distributed industrial and tourism sectors. Minister Sumadi unveiled that its development was through the Government and Business Entity Cooperation scheme, a public-private partnership. He further encouraged collaboration with international business actors “who have the ability to move foreign tourists to come to Bintan.”¹⁴¹²

On 27 January 2022, President Widodo made a wide range of declarations at the virtual B20 Inception Meeting, inviting “the G20 and B20 to collaborate to create breakthroughs and concrete actions to make great contributions to the global economic recovery,” ahead of Indonesia’s G20 Presidency.¹⁴¹³ He urged collaboration on transitioning to a green economy, building a digital economy infrastructure, and improving on global health architecture. He outlined the role of Indonesia’s plentiful nickel, bauxite, tin and copper reserves in supplying the world’s green energy demands, conditional on these resources being exported as value-added products (either finished or semi-finished). He encouraged the private sector in Indonesia to invest in a green energy transition through an early retirement program for steam power plants, and in electric car factories to drive decarbonization in the transportation sector. President Widodo emphasized investment in digital platforms for micro small and medium enterprises to market their products, raising bandwidth capacity through the construction of transpacific undersea telecoms cables, and developing a domestic semiconductor industry. He prioritized investment in the health sector to meet domestic needs first and foremost, especially in innovation and development of vaccines and medical equipment. For achieving these declarations, President Widodo emphasized to attendees that “we must display global public and private partnerships to provide global solutions.”

On 16 March 2022, a memorandum of understanding was signed between the Swiss-Indonesian Chamber of Commerce and the Investment Coordinating Board aimed to accelerate trade and investment between Switzerland and Indonesia.¹⁴¹⁴ The memorandum of understanding covers a three-year horizon with plans for liaising on issues such as “investment policies, foreign direct investment, and knowledge transfer.”

On 12 May 2022, President Widodo received a courtesy call from CEO Seifi Ghasemi of American multinational and S&P 500 member corporation Air Products and Chemicals.¹⁴¹⁵ This follows a memorandum of understanding made with Air Products back in November 2021. In the talks it was stated that USD7 billion has so far been realized for Air Products’ investment plan in Indonesia, from a total of USD15 billion. Most of this investment is concentrated in dimethyl ether and methanol production—key inputs to industrial gas production—through projects in West and Central Java provinces, with the remainder allocated to establishing a hydrogen industry powered by state-owned dams.

On 15 May 2022, President Widodo flew to Boca Chica, Texas to meet with Tesla and SpaceX founder Elon Musk.¹⁴¹⁶ Widodo discussed “potential investments, innovations, and technology” with Musk in regard to Indonesia and future opportunities for collaboration. Musk commented on “the great potential” Indonesia possesses, not only in its abundance of crucial resources for supplying the production of electric vehicles, but also by its large domestic consumer/labor base and economic growth that make the country an attractive business partner.

On 2 July 2022, Indonesia signed a comprehensive economic partnership agreement (CEPA) with the United Arab Emirates (UAE).¹⁴¹⁷ The pact intends to increase both annual bilateral trade and investment to USD10 billion each within five years through mutual removal of barriers to trade and investment. Trade barriers will be removed for a larger list of goods and services, with the UAE obtaining “immediate duty-free access to Indonesia” on over 80 per cent of its exports.

On 31 August 2022, a local affiliate of the wholly state-owned Chinese corporation Power Construction Corp. of China commenced construction for the USD17 billion Kayan Cascade project as part of China’s Belt and Road Initiative.¹⁴¹⁸ The project is expected to generate a combined hydroelectric power capacity of 9-gigawatts across five dams. The project is set to be a major force in Indonesia’s goals of achieving more evenly-distributed economic growth, creating more value-added domestic production, and becoming a net-zero carbon society by 2060.

On 1 September 2022, President Widodo launched the “first 5G Smart Mining in Southeast Asia” for PT Freeport Indonesia, one of the world’s largest gold and copper mining companies.¹⁴¹⁹ The project was done in partnership with PT Freeport Indonesia and state-owned telecommunication provider Telkom Group.

Indonesia has fully complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted policies to facilitate public-private partnerships in infrastructure investment, whilst encouraging opportunities to accrue private capital for further projects.

Thus, Indonesia receives a score of +1.

Italy: 0

Italy has partially complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 1 November 2021, Prime Minister Mario Draghi stressed the importance and called on multilateral development banks and the World Bank to leverage risks on investments of infrastructures with the private sector during 26th Conference to the Parties of the United Nations Framework Convention on Climate Change. Prime Minister Draghi suggested that a task force is supposed to be summoned to help on advancing innovative technology as an alternative in reducing carbon emission in support of the previous initiative.

On 30 November 2021, Prime Minister Draghi expressed that public sector and companies should collaborate more on sharing possible risks in research and development of infrastructure, especially when it comes to promising technologies with high fixed costs and the requirement of continuing investments, while he spoke about the National Recovery and Resilience Plan (NRRP).¹⁴²⁰ The NRRP

is Italy's post-pandemic reform and relief package to help further transform Italy's economic structure, infrastructure by the opportunity of post-pandemic recovery.

On 23 December 2021, Italy forwarded its first progress report to its parliament regarding the NRRP, which contained its targets and milestones for 2021 regarding the NRRP.¹⁴²¹ As listed in the Plan, Italy's third major investment plan aimed to allocate EUR11 billion towards the investment into a high-speed rail network. The rail expansion project brings value by connecting the north and south with 274 kilometres of new railway lines and contributes to Italy's goal of investing in infrastructure for sustainable mobility.

On 28 February 2022, a positive preliminary assessment of Italy's request for the financing of EUR21 billion in grants and loans, which is to be invested into its Recovery and Resilience Plan, was delivered by the European Commission in Brussels.¹⁴²² The approved financing of the country's Recovery and Resilience Plan would allow for Italy to enhance its business environment and public administration, making a movement in completing investment projects for both private and public sectors.

On 16 May 2022, Ferrovie dello Stato Italiane presented the 2022-20231 industrial plan, supported by an investment plan worth EUR190 billion.¹⁴²³ The long-term vision focuses on restructuring rail transport, establishing a collaborative and sustainable multimodal transport network, doubling the rail freight transport shares, and self-producing 40 per cent of the FS Group's energy from renewable sources by 2031.¹⁴²⁴ The plan will allow funding for rail infrastructure projects, narrowing the gap between the north and the south of the peninsula.

On 5 July 2022, the European Commission and the Italian national promotional institution, Cassa Depositi e Prestiti (CDP) signed a 6.7 million euros agreement for advisory support to infrastructure and social investment projects. CDP provides project advisory in market development and financial intermediaries, contributing to improved quality of projects, including the "Sustainable Infrastructure Window" and "Social Investment and Skills Window."¹⁴²⁵ The project aims to strengthen and expand the access to infrastructure development and private resources, operations in social and public infrastructure, transport, energy and innovation.

On 14 September 2022, the Ministry for Infrastructure and Sustainable Mobility and the Next Generation EU-backed National Recovery and Resilience Plan (NRRP) pledged EUR100 billion over the next ten years.¹⁴²⁶ This money is to be spent on infrastructure projects.

Italy has partially complied with its commitment to further collaboration between public and private sectors to mobilize private capital for infrastructure investment. The country has called for more

Central Asia and Africa.¹⁴³¹ The seminar provided information to construction companies on investment and business cooperation opportunities for infrastructure in these regions.

On 19 March 2022, the Minister of Land, Infrastructure, Transport and Tourism Tetsuo Saito signed a memorandum of cooperation with Indian Minister of Housing and Urban Affairs Haldeep Singh Puri to promote cooperation in developing urban flood management systems and smart cities.¹⁴³² This initiative is a new addition to a previously signed memorandum of cooperation.

On 11 April 2022, the Ministry of Land, Infrastructure, Transport and Tourism called for the second round of applications in a new public-private partnership agreement.¹⁴³³ These projects will focus on assisting local governments with infrastructure maintenance.

On 24 May 2022, at the Quad Joint Leaders' meeting comprised of Prime Minister Anthony Albanese of Australia, Prime Minister Narendra Modi of India, Prime Minister Fumio Kishida of Japan, and President Joe Biden, the leaders reaffirmed their commitment to improving infrastructure the Indo-Pacific region through public and private partnerships.¹⁴³⁴ To do so, the four leaders pledged USD50 billion to infrastructure assistance and investment to the region over five years.

On 16 August 2022, the Ministry of Land, Infrastructure, Transport and Tourism announced the establishment of a public-private partnership platform to share technical information and cooperate on railway decarbonisation.¹⁴³⁵ The Ministry of Land, Infrastructure, Transport and Tourism plans to hold a seminar where several railway stakeholders present and discuss efforts and technologies concerning railway decarbonisation.

Japan has fully complied with its commitment to further private-public infrastructure collaboration by creating initiatives to share technical expertise and promote cooperation between the private and the public sector.

Thus, Japan receives a score of +1.

Korea: 0

Korea has partially complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment. While infrastructure investment itself remains high, public and private partnerships seem to be uncommon.

On 4 November 2021, the Ministry of Land, Infrastructure, and Transport (MOLIT) announced in partnership with Korea Land and Housing Corporation that they will provide smart technologies to deliver personalized care to the elderly living in permanent rental housing.¹⁴³⁶

On 29 November 2021, MOLIT announced that the Boryeong Undersea Tunnel will open to the public early December.¹⁴³⁷ With a projected cost of KRW488.1 billion and a total length of 6.9 kilometers, the tunnel is now the longest undersea tunnel in Korea and the fifth longest in the world.

On 19 January 2021, MOLIT and the Korea Real Estate Board announced the opening of a “PropTech Village” that will provide working space for start-up companies in the new real property industry.¹⁴³⁸ Such support is expected to relieve the economic burden of start-ups and establish a foundation for growth in the real estate industry.

On 21 May 2022, President Yoon Suk Yeol welcomed President Joe Biden to Korea as part of his anticipated trip to East Asia.¹⁴³⁹ As part of a joint statement issued by both presidents, they agreed to utilize their comparative advantage to enhance public-private cooperation in the development of the technology sector, reaffirming their commitment to furthering collaboration between public and private sectors.

While infrastructure development itself remains considerable in Korea, we see only partial emphasis towards public and public partnerships. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, government and corporate cooperation seems limited in infrastructure development.

Thus, Korea receives a score of 0.

Mexico: +1

Mexico has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 14 December 2021, the Ministry of Economy unveiled its “Invest in Mexico” platform, which aims to grant investors with executive and strategic statistical information and specialized advice and contacts with relevant institutions.¹⁴⁴⁰ The Ministry emphasized that the platform is meant to promote the government’s economic objectives of digital infrastructure expansion, as the platform allows the Ministry to directly attend to investing companies and provide transparency in investment relevant information.

On 3 February 2022, Secretary of the Economy Tatiana Carillo affirmed Mexico’s 2022 Economic Reactivation Plan, stating the critical role of development banks Infonavit and Cofepris in financing national infrastructural projects to revitalize the economy.¹⁴⁴¹ Further, she mentioned the Ministry of Tourism’s goals for coordinating investment with the private sector on 18 infrastructural projects. Moreover, she stated that the government is working on major policies related to the promotion of investment, with business leaders, global companies, foreign chambers and embassies.

On 7 March 2022, the Ministry of Agriculture and Rural Development, the Inter-American Institute for Cooperation on Agriculture and the Food and Agriculture Organization stated goals to construct innovation and linkage structures for small scale producers and women producers from marginalized communities.¹⁴⁴² The coordinated effort will work closely with local agricultural producers, seeking to establish infrastructure such as roads and other transport mechanisms needed to diversify agri-food exports and link small-scale producers to larger value chains and production.

On 22 March 2022, the Ministry of Economy launched the Invest in Mexico Business Center to procure foreign investment in the country.¹⁴⁴³ The Center will provide investors with economic and commercial intelligence information, rapprochement with Mexican agencies and authorities and connections to local companies and suppliers. The Ministry aims to increase investment by providing personalized support to investors, and encouraging connectivity between local firms and agencies, and foreign investors.

On 29 March 2022, Mexico’s pension regulator Consar stated improvements to funding systems for small-scale infrastructure projects.¹⁴⁴⁴ The regulator explained that fund managers conventionally do not find smaller projects attractive, hence, smaller projects must be grouped into a larger bundle of

MXN500 million to attract investment. Therefore, smaller scale social development projects in areas such as water infrastructure, sewerage, and roads, can also receive funding, as these projects will be grouped into a larger investment project.

On 20 April 2022, the Secretariat of Agrarian, Territorial, and Urban Development announced six infrastructure projects in the state of Guerrero.¹⁴⁴⁵ The projects will target community infrastructure through the construction of new community development centers, sports centers, municipal buildings, and other public spaces within a budget of MXN597 million. Furthermore, the Secretariat also stated intentions to collaborate with the National Housing Commission and the private sector, to invest MXN850 million into expanding and building homes for families in Guerrero.

On 9 May 2022, the Secretariat of Agrarian, Territorial, and Urban Development proclaimed the completion of five infrastructure projects assigned by the Urban Improvement program, in marginalized communities in Merida.¹⁴⁴⁶ The projects saw the construction of community development centers, education centers, houses, nurseries, and libraries, within a budget of MXN104 million.

On 11 May 2022, the Secretariat of Agrarian, Territorial, and Urban Development announced nine infrastructure projects in Atlatlahucan, Puente de Ixtla and Temixco with an investment of MXN337 million.¹⁴⁴⁷ The projects will improve community infrastructure including recreational spaces and road networks, to achieve the Urban Improvement program's objectives of renovating infrastructure for marginalized communities.

On 21 May 2022, President Obrador announced that eight municipalities in Sonora and four in Chihuahua, will receive over MXN50 million pesos in funding for new roads.¹⁴⁴⁸ Municipal authorities are encouraged to organize with businesses, trade unions, and locals, to build roads and revitalize local economies.

On 14 July 2022, President Obrador revealed an investment of USD40 billion dollars into Mexican energy infrastructure.¹⁴⁴⁹ The investment comes from the US private sector, which aims to enhance Mexican crude oil extraction capabilities, in partnership with national oil company Pemex. The investment will also go towards pipelines, liquefaction and fertilizer plants. Obrador stated that the

foreign investment is a sign of more to come, as he plans to procure more investments for Mexico's productive industries.

On 4 August 2022, Mexico's Federal Commission of Electricity (CFE) and TC Energy consolidated a strategic partnership to provide millions of Mexicans with increased access to clean energy.¹⁴⁵⁰ The partnership will enable the construction of the Southeast Gateway Pipeline, a 715-kilometer natural gas pipeline that will supply energy to central and southeast Mexico. The CFE applauded the motion between government and the private sector, as the construction will expand the state's goal of providing affordable energy.

On 24 October 2022, California Governor Gavin Newsom announced the state of California and the government of Mexico's partnership to create a new San Diego-Tijuana Port of Entry.¹⁴⁵¹ This partnership will create more infrastructure for the bordering towns.

Mexico has fully complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted policies to facilitate public-private partnerships in infrastructure investment, whilst encouraging opportunities to accrue private capital for further projects.

Thus, Mexico receives a score of +1.

Analyst: Firaz Khan

Russia: +1

Russia has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 19 January 2022, Russia provided a status update to the World Bank Group's private participation in infrastructure (PPI) database on its Tomsk airport terminal development project, which is a private PPI investment project in the transport sector.¹⁴⁵² The PPI is a Brownfield project—one that allows a private entity to take over an existing asset and invest in rehabilitating it—sponsored by NOVAVIND, AO, an architectural and engineering services company located in Moscow. There has been no public disclosure of this contract and no disclosed information on the total amount of government investment, but the airport is expected to have a capacity of 750,000 people.

On 22 January 2022, Russia provided a status update to the World Bank Group's PPI database on its Dagestan 15 million watts wind plant development project, which is a private PPI investment project in the energy sector.¹⁴⁵³ The PPI is a Greenfield project—public-private partnership that collaborates

to build infrastructure project and the private entity is responsible for finances and operations—sponsored by the Hevel Group, a solar energy company. There has been no public disclosure of this contract and no disclosed information on the total amount of government investment.

On 16 June 2022, at the St. Petersburg Economic Forum, the State atomic Energy Corporation Rosatom signed an agreement of intentions with the Republic of Sakha to organize and promote projects based on the SHELF-M reactor.¹⁴⁵⁴ The projects will aim to use the reactor to build 10 million watts nuclear power plants to provide residents in remote areas without energy or transportation infrastructure with a reliable source of electricity. The projects will be implemented under the program operated by the Development of Equipment, Technologies and Scientific Research in the Field of Nuclear Energy Use until 2024.

Russia has fully complied with the commitment to “develop further the collaboration between the public and private investors to mobilise private capital.” Russia has taken efforts to promote the mobilisation of the private sector alongside public funding as a means of supporting the development of infrastructure in particular in both geographic regions and industries of the economy identified as possessing the potential for significant development and modernisation.

Thus, Russia receives a score of +1.

Analyst: Daniel Yihan Mao

Saudi Arabia: +1

Saudi Arabia has with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment. In line with the G20 Roadmap for Infrastructure as an Asset Class and the G20 Infrastructure Investors Dialogue, it has taken many steps to promote collaboration between private and public sectors to accrue capital for infrastructure.

On 10 December 2021, Saudi Global Ports (SGP), backed by the Saudi government’s sovereign wealth vehicle the Public Investment Fund (PIF), was awarded a concession to “help double Riyadh Dry Port’s handling capacity to 1.5 million containers a year by 2030.”¹⁴⁵⁵ SGP will work with the Saudi Railway Company – a state-owned railway company operating over 2,750 kilometers of track – to enhance connectivity between the dry port and container terminals in Dammam Seaport. Furthermore, SGP plans on investing in technologies “such as automation and a unified digital platform,” procuring new equipment and improving existing civil infrastructure to better meet connectivity goals. SGP is operated by PSA International, a Singaporean logistics company with experience in port operations in Antwerp and Singapore, ultimately winning the concession after a public-private tendering process overseen by the Saudi government’s Privatization Supervisory Committee.

On 14 December 2021, the Saudi Water Partnership Company, wholly owned by the Ministry of Finance, invited developers to submit expressions of interest (EOI) for construction of a planned independent water transmission pipeline (IWTP).¹⁴⁵⁶ The pipeline, known as the Rayis-Rabigh IWTP, is set to operate at a capacity of 900,000 cubic meters per day, stretching a total length of 100 kilometers. As was the case for a couple previously announced IWTP projects spanning several thousand kilometers across Saudi Arabia, the Rayis-Rabigh IWTP project will operate under a public-private

partnership model.¹⁴⁵⁷ These IWTP projects are in accordance with the Saudi National Water Strategy 2030, set to mitigate “high transmission costs of pumping water from the coasts to inland” and decrease reliance on non-renewable ground water sources – instead focusing on infrastructure investment in desalination plants and IWTPs for urban consumption and agriculture.¹⁴⁵⁸

On 28 December 2021, the Ministry of Health announced the launch of the expression of interest for the development of two medical cities in Saudi Arabia, the King Faisal Medical City in Abha, and the Prince Mohammad bin Abdul Aziz Medical City in Sakaka. The dedicated medical cities are set to boost bed capacity by 1,024, mainly serving Saudi Arabia’s southern regions. Construction responsibilities and provision of health services are to be undertaken by the private sector “according to modern healthcare models.” This project is in accordance with Vision 2030’s stated goals of “increasing its contribution in providing healthcare services, improving infrastructure and managing health facilities.”¹⁴⁵⁹

On 10 January 2022, the National Center for Privatization and PPP Board of Directors implemented new regulations to the Private Sector Participation Law enacted early 2021, hereby referred to as the “Regulation.” The Regulation has added principles “that should be taken in to consideration in implementing projects,” being of “fairness, transparency, contract enforcement, planning and feasibility.”¹⁴⁶⁰ This includes a commitment to avoiding conflicts of interest, and closely monitoring project execution, hoped to “increase the number of projects, speed up procedures, and mitigate risks.” Furthermore, a minimum project value of public assets to be set aside for privatization have been stipulated by the Regulation, at a value of SAR50 million, with senior leadership positions reserved for Saudi nationals. The Regulation is in accordance with Vision 2030’s stated goals in “unlocking state-owned assets to the private sector and privatizing selected government services” to grow the private sector share of gross domestic product.

On 11 January 2022, the Saudi Ports Authority (Mawani) announced the launch of the Requests for Qualification (RFQ) phase for “the award of eight multi-purpose terminal concessions across eight commercial and industrial ports in Saudi Arabia.”¹⁴⁶¹ Open to international and local investors, the concessions aim to provide services related to “the handling of General Cargo, RoRo, Bulk, Containers and Livestock” under a public-private partnership model of “Build, Operate and Transfer.” This is in accordance with Vision 2030’s stated goals in becoming an international logistical hub.

On 13 January 2022, ACWA Power, Saudi Arabia’s national utility provider, announced the “start of operations at Rabigh Three Co. IWP, the largest independent water desalination plant.”¹⁴⁶² ACWA

Power owns a 70 percent stake in the desalination plant, located in Rabigh, Saudi Arabia, and it is set to operate a capacity of 600,000 cubic meters per day.

On 16 January 2022, the Ministry of Health announced the launch of the EOI for the “Clinical and non-Clinical operations and maintenance of the SABIC Behavioral Care Specialist Hospital Project,” located in North Riyadh’s Al-Nargis district. This hospital project is designed to provide high-quality specialized mental health care and substance addiction treatment for adults and adolescents of both genders, in line with international best practice. SABIC, or the Saudi Basic Industries Corporation, is a subsidiary of Saudi Aramco, with 70 percent of its shares owned by Aramco. SABIC had exclusivity rights as a provider of services, medical and non-medical equipment to the hospital, though with this announcement the Saudi government is opening the provision of such goods and services to the private sector. This will happen under a public-private partnership model. This is in accordance with Vision 2030’s stated goals of “increasing private sector participation in the healthcare sector.”¹⁴⁶³

On 25 January 2022, the Shuqaiq 3 desalination plant, located in the southwestern province of Jizan, was inaugurated.¹⁴⁶⁴ Taking over 9 million man-hours to complete, Shuqaiq 3 is an energy-efficient desalination plant that uses experimental “pure reverse osmosis technology.” It is set to supply over 150 gegalitres of high-quality water annually with a capacity of 450,000 cubic meters per day, meeting the demands of nearly 4 million people in the Asir and Jizan provinces. The project occurred under a public-private partnership model, ultimately awarded to a consortium led by Almar Water Solutions (through Abdul Latif Jameel Enterprises) that invested nearly USD600 million. Deputy President and Vice-Chairman Fady Jameel of Abdul Latif Jameel Enterprises stated belief that the project was in accordance with Vision 2030’s goals through “offering present and future generations the chance to help drive greater water security.”

On 30 January 2022, the Saudi British Bank, operating under the supervision and control of the Saudi Arabian Monetary Authority, announced its commitment to “its role in achieving the goals of Vision 2030 by strengthening its strategic partnerships with government institutions and supporting initiatives and projects aimed at achieving sustainable development.”¹⁴⁶⁵ The commitment was announced at the fifth session of the Riyadh Industrialists Council. This is in accordance with Vision 2030’s Financial Sector Development Program, launched in 2017, aimed to “enable financial institutions to support the growth of the private sector, develop an advanced capital market and to boost and enable financial planning.”¹⁴⁶⁶ Firms engaging in digital transformation initiatives were specifically targeted to receive support by the bank.¹⁴⁶⁷

On 2 February 2022, the Ministry of Human Resources and Social Development announced the launch of the EOI for the development of social care homes within Riyadh and Jeddah, to support up to 559

individuals with “varying degrees of disabilities.”¹⁴⁶⁸ The development project is operating under a public-private partnership model of “Purchase-Finance-Maintain-Operate-Transfer.” This is in accordance with Vision 2030’s stated goals of shifting the government’s role as a service provider to a service regulator.

On 7 February 2022, the Ministry of Communications and Information Technology signed a cooperation agreement with Saudi-based company Quantum Switch Tamasuk for the purpose of developing new data centers with a capacity of 300MW.¹⁴⁶⁹ The company will aim to construct a 60MW data facility each year for the next five years.¹⁴⁷⁰ The data centers will play an important role in both incentivizing hyperscale customers into the country and hosting digital infrastructure for the Saudi public sector.¹⁴⁷¹

On 24 February 2022, the Saudi government’s KSrelief, the country’s official humanitarian aid organization, agreed to “dig 241 surface wells in Niger to help provide water for around 629,000 people,” about three per cent of Niger’s population.¹⁴⁷² The aims of this program are to prevent “diseases caused by polluted water” and improve “supplies for agricultural and livestock farming.”

On 8 March 2022, the Tax and Customs Authority announced the launch of the RFQ phase for the development of a logistics zone for the Jadeedah Arar port project, located on the Saudi-Iraq border.¹⁴⁷³ The development project is operating under a public-private partnership model of “Design, Build, Finance, Operate and Transfer.” This logistics zone project is stated to enable Saudi access to Iraqi markets and strengthen bilateral trade and economic exchange. Warehouses, gas stations, parking lots, retail stores, and manufacturing/housing units for port workers are set to be developed over a one-million-square meter area. This is in accordance with Vision 2030’s stated goals of “strengthening logistical capabilities and increasing the contributions of the private sector in providing and supporting strategic projects.”

On 17 March 2022, the Minister of Transport and Logistics Saleh Bin Nasser Al-Jasser inaugurated Saudi Arabia’s Railway Industrial Opportunities Forum, unveiling economic opportunities exceeding SAR1 billion towards the railway industry, dedicated to developing railway infrastructure through public-private partnerships.¹⁴⁷⁴ This investment is set to “open up the market to new operators, and increase the private sector’s participation in freight operations, train passenger trips, and assets.” These plans are in alignment with long-term goals to increase domestic railroad coverage by over 8,000

kilometers of track, and “achieve local and regional connection, double transport capacity, and adopt modern technology to reduce the environmental impact of transport.”

On 21 March 2022, the Saudi Ports Authority announced the launch of the EOI for “marine services projects for eight major commercial and industrial Saudi ports.”¹⁴⁷⁵ A competitive procurement process is planned to award long-term agreements to experienced private sector companies. Agreement terms include “basic marine services such as anchorage, pilotage, towage, berthing and unberthing and mooring” in addition to pollution control and emergency service provision. This is in accordance with Vision 2030’s stated goals of positioning the Kingdom as an international logistical hub.

On 16 May 2022, the Saudi Export-Import Bank, the state export credit agency, launched its strategic plan for 2022 to 2026, focused on expanding Saudi non-oil exports through closing financial gaps and reducing export risks.¹⁴⁷⁶ In particular, the report outlines “maximizing the economic impact of the bank’s activities and improving customer service, as well as ensuring financial sustainability and operational efficiency.” This is in accordance with Vision 2030’s stated goals of increasing non-oil exports.

On 22 May 2022, the Ministry of Health announced the launch of the expression of interest for developing Al Iman General Hospital staff accommodation facilities.¹⁴⁷⁷ The development project is operating under a public-private partnership model of “Design, Build, Finance, Operate, and Maintain,” with the government seeking private sector development for building “564 housing units and associated parking requirements for 280 cars.” This is in accordance with Vision 2030’s stated goals of increasing private sector participation in the healthcare sector.

On 23 May 2022, the Saudi Export-Import Bank signed a cooperation agreement with the UK Export Finance (UKEF) providing a “general framework that will enable the two [export credit] agencies to combine their financial support to help UK and Saudi Arabian businesses secure export contracts anywhere in the world.”¹⁴⁷⁸ UKEF, the world’s first export credit agency established in 1919, will lend its extensive knowledge and expertise to Saudi EXIM, which itself was recently established in 2020. This is in accordance with Vision 2030’s stated goals of diversifying exports capability.

On 5 June 2022, PIF announced it will buy a 23.97 per cent stake in Capital Bank Group, one of the largest banking groups in Jordan and Iraq.¹⁴⁷⁹ The purchase will cost approximately USD185 million, with the aim of raising the group’s shareholders’ equity to around USD846 million. This is in accordance with Vision 2030’s stated goals of diversifying the Saudi economy.

On 19 June 2022, the Al Madinah Region Development Authority (MDA) announced the launch of the EOI phase for the development of a bus rapid transit (BRT) network to relieve traffic congestion from increasing numbers of residents and pilgrims in the Holy City. The MDA is engaging in a partnership with the private sector, aiming to increase efficiency based on a Design, Build, Finance,

Operate and Maintain model.¹⁴⁸⁰ Three BRT corridors in Al Madinah are to be developed under this project, and the project is to be the first ever public-private partnership for a BRT network in Saudi Arabia.

On 29 June 2022, the Zakat, Tax and Customs Authority announced the launch of the RFQ phase for the upgrading of the land ports of Al-Durrah, Al-Haditha, Halat Ammar, Al-Khafji, Al-Bat'ha and Al-Wadi'ah, aiming to implement a new design prototype for infrastructure improvement.¹⁴⁸¹ This project will be developed under a public-private partnership model of Design, Build, Finance, Maintain and Transfer for a 20-year term excluding the construction period. The project aims to increase the efficiency and competitiveness of the land ports, attract private sector investment, increase the role of the private sector in strategic infrastructure, facilitate inter-border goods and services trade, and produce better socio-economic outcomes and quality of service for users. This is in accordance with Vision 2030's stated goals.

On 6 July 2022, the Wave 2 Schools Project of the Saudi Ministry of Education (MoE) awarded project management company SNC-Lavalin a partnership agreement to construct and build 60 public schools in Madinah over the span of 20 years.¹⁴⁸² The partnership between the MoE, Tatweer Buildings Company and the private sector is expected to provide high-quality infrastructure that will benefit over 50,000 students. This is in accordance with Vision 2030's stated goals of expanding educational services across national regions.

On 5 August 2022, the Ministry of Investment in Saudi Arabia signed a memorandum of understanding with French rail transport manufacturer Alstom.¹⁴⁸³ The agreement aims to strengthen the Saudi transportation sector by creating future opportunities for investment in transportation and establishing Alstom's regional headquarters in Saudi Arabia. This is in accordance with Vision 2030's stated goals to "improve local, regional, and international connectivity of trade and transport networks."¹⁴⁸⁴

On 26 August 2022, the Ministry of Investment in Saudi Arabia and Hungarian airline Wizz Air announced the addition of 20 additional routes linking the Kingdom and key cities in Europe, including Budapest, Milan, Rome, Venice, and Vienna.¹⁴⁸⁵ This aims to develop the Saudi tourism sector.

Saudi Arabia has complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted policies to facilitate public-private partnerships in infrastructure investment, whilst encouraging opportunities to accrue private capital for further projects.

Thus, Saudi Arabia receives a score of +1.

Analysts: Reshad Mubtasim-Fuad and Rachel Gam

South Africa: 0

South Africa has partially with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 4 March 2022, Minister of Employment and Labour Thulas Nxesi launched an employment program to bridge the gap between unemployment and skilled trades, thereby investing in social infrastructure within the country.¹⁴⁸⁶ When addressing the launch, Minister Nxesi reaffirmed the importance of the government working with the private sector to eliminate unemployment.

On 26 May 2022, South Africa created the Just Energy Transition Partnership, backed by the United Kingdom, the United States, France, Germany, and the European Union who all pledged USD8.5 billion to South Africa and its transition away from carbon-intense electrical systems.¹⁴⁸⁷ To do so, the investment highlighted the indispensability of public-private partnerships in securing the transition and meeting South Africa's economic, environmental, and social infrastructure investment goals.

On 15 June 2022, the Department of Public Works and Infrastructure announced the Expanded Public Works Programme, which aims to create economic opportunities for the poor by providing work and training opportunities and services such as the National Youth Service Program and the Artisan Development Program.¹⁴⁸⁸ The services are provided by a collaboration of public-private partnerships that seek to bridge the infrastructure gap by investing in training of trade skills taught by the Department of Public Works and Infrastructure, Provincial Departments of Public Works, National Youth Development Agency, Construction Education and Training Authority, and several private sector companies.

South Africa has partially fulfilled its commitment to further public-private collaboration for infrastructure projects by developing initiatives that encourage public-private partnerships but lacks investments and plans to achieve the desired outcome.

Thus, South Africa receives a score of 0.

Analyst: Yuyang Jiang

Turkey: +1

Turkey has with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 18 December 2021, President Recep Tayyip Erdoğan emphasized that the Turkish government would keep incentivizing Turkish companies and business in engaging into business including infrastructure developments in Africa, while speaking about the action covering the 2022 to 2026

period during the 3rd Turkey-Africa Partnership Summit.¹⁴⁸⁹ Moreover, President Erdoğan also acknowledged the importance of Turkish companies localizing their business in Africa.

On 1 February 2022, President Erdoğan stated that Turkish businesses are ready and will be mainly contributing to the unfolding of infrastructure in Lebanon helping the country to rebuild some of its infrastructure projects.¹⁴⁹⁰ The infrastructure program Turkey provided to help Lebanon will include the one that will help rebuild part of Port of Beirut which has been destroyed due to the Beirut explosion that was happening in 2020, and Turkish government is incentivizing and encouraging more Turkish businesses to firmly join this infrastructure project aimed to provide Lebanon with resources and convenience.

On 18 March 2022, the opening ceremony of the 1915 Çanakkale Bridge was held.¹⁴⁹¹ It is the world's longest suspension bridge with a mid-span of 2023 metres, connecting European and Asian shores, with plans to add more infrastructure such as roadway extensions. It locates south of the Sea Marmara and will accommodate to carry up to 45,000 vehicles across its six lanes each day, encouraging both tourism and economic invigoration in the region.

On 5 April 2022, Minister of Transport and Infrastructure Adil Karaismailoğlu delivered a speech in the Transport Vision 2053 meeting, in Istanbul.¹⁴⁹² A roadmap shared pledge to double the size of its highway network, weigh in on railway transportation and shipment, and to invest billions of dollars in infrastructure by 2053.¹⁴⁹³ He also unveiled the Transport and Logistics Master Plan, which aims to meet the country's transport and communication infrastructure targets with a focus on railways. The investment anticipates contributing over TRY1 trillion to GDP, TRY1.36 trillion to production and creating employment for 27.7 million people. This plan emphasizes the expansion of railway transport from the Turkish passenger to the cargo network for Europe, Western Asia and Africa.¹⁴⁹⁴

On 12 April 2022, Minister of Transport and Infrastructure Adil Karaismailoğlu announced the “2053 Infrastructure Vision” at the “Transport Vision 2053” meeting.¹⁴⁹⁵ The plan includes building a transportation infrastructure worth TRY197.9 billion by 2053. The government noted that it wants to increase its trade share by more than TRY700 billion in the Asian and European markets, aiming to become a logistics center for Asia and Europe by utilizing its geopolitical advantages. It also aims to reduce logistics costs and revitalize the tourism industry through investment in sea transportation,

telecommunications, and air transportation, while focusing on railway expansion and highway construction.

On 19 September 2022, Minister Karaismaioğlu spoke at the 6G Conference that 6G Technology and communication infrastructure, will be a keystone for the public and private sectors in informatics.¹⁴⁹⁶ He emphasized that the production of information is crucial for development in areas of domestic production, high technology and global brand, for fast and secure internet infrastructure, increase in exports and competitiveness in the world. He added that the technology will increase vehicle-pedestrian, vehicle-vehicle communication and vehicle-infrastructure communication with internet access.¹⁴⁹⁷ It is expected that the ministry will aim to contribute USD2,053 trillion to production and USD198 trillion to national income with a total transportation and communication infrastructure investment of USD2 billion.

Through carrying out new and large-scale infrastructure programs and projects internationally, Turkey has strongly furthered collaboration between public and private sectors to mobilize private capital for infrastructure investment.

Thus, Turkey receives a score of +1.

Analysts: Charlie Lecheng Zeng and Chaewon Kang

United Kingdom: +1

The United Kingdom has with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 11 November 2021, the UK government launched the Urban Climate Action program to “support the cities and regions in developing countries most impacted by climate change to accelerate their transition to net zero.”¹⁴⁹⁸ This program is in partnership for its delivery with the German development agency GIZ and the C40 Cities Climate Leadership Group – “a global network of cities focused on climate action.” The UK government has committed GBP27.5 million for the program, to be distributed across cities in Africa, Asia and Latin America in helping meet carbon neutrality by 2050 and “prepare low-carbon infrastructure projects.” Alongside its launch, in accordance with the meeting of the United Nations 26th Conference of the Parties to the Framework Convention on Climate Change on Cities, Regions and Built Environment Day in Glasgow, the UK government has “called on cities yet to make commitments to step up and set a net-zero target.”

On 20 January 2022, the UK government announced it would be targeting small businesses in the digital sector with the launch of its “Help to Grow: Digital” scheme that provides such businesses “with discounts of up to GBP5,000 on approved Digital Accounting and Customer Relations

Management software” and a free skills upgrading platform for building digital competency.¹⁴⁹⁹ This initiative is part of the government’s wider efforts to “back businesses and level up the economy.”

On 21 January 2022, UK battery company Britishvolt was promised to receive funding from the UK government’s Automotive Transformation Fund, established as part of the UK government’s existing Net Zero Strategy that aims to end the sale of new petrol and diesel cars domestically by 2030 alongside other goals. The funding is intended for Britishvolt’s planned gigafactory located in Blyth, Northumberland. The project is estimated to provide “3,000 direct highly-skilled jobs and another 5,000 indirect jobs in the wider supply chain.”¹⁵⁰⁰ The government expects its support to spur “a significant amount of further support from private investors.”

On 27 January 2022, Business and Energy Secretary Kwasi Kwarteng committed GBP100 million in funding for the Sizewell C nuclear power plant project, currently under development, in Suffolk.¹⁵⁰¹ Sizewell C is estimated to provide low-carbon electricity to around 6 million homes and support up to 10,000 jobs in the UK. The funding will be provided under a novel Regulated Asset Base model, set to “lower the cost of each new large-scale nuclear power projects by more than GBP30 billion,” compared to the existing funding model. If the project is successful, the GBP100 million will be reimbursed to the government. If the project fails to reach important milestones, the government will request for shares in Sizewell C Company – owned in majority currently by French state-run energy company EDF – or for an equity stake in the project site. Failure to meet such a request will grant the government a portion of EDF’s financing return and a reimbursement of contributed funds. This model is also stated to broaden the opportunity for public-private partnership in nuclear energy financing, “expected to reduce Britain’s reliance on overseas developers for finance by substantially widening the pool of private investors to include British pension funds, insurers and other institutional investors from like-minded countries.”

On 11 February 2022, the Robotics Growth Partnership, established by the UK government in 2019 to drive domestic innovation in global smart robotics, launched its “Vision for cyber-physical infrastructure.”¹⁵⁰² It is a series of published documents outlining how “a connected ecosystem of virtual and physical infrastructure would help drive faster, cheaper and lower risk innovation in smart robotics as well as other technology areas and across sectors.”¹⁵⁰³

On 2 March 2022, the UK government announced GBP60 million of new government funding to expand life sciences manufacturing in the UK and distributed to qualifying companies through the Life Sciences Innovative Manufacturing Fund.¹⁵⁰⁴ The products manufactured range from “cell and gene

therapies and earlier and better diagnostic technologies, to medical devices.” The funds were directed at projects supporting scalability at the commercial level.

On 24 March 2022, the UK government announced measures to boost growth, productivity, and energy efficiency for households and businesses.¹⁵⁰⁵ These measures include cuts on fuel duty rates for petrol and diesel worth GBP2.4 billion and an extra GBP500 million for vulnerable households through the Household Support Fund.

On 31 March 2022, a grant of GBP15.9 million was awarded from the UK government to chemical producer Croda International Plc, for the purpose of accelerating domestic manufacturing capacity of mRNA COVID vaccines.¹⁵⁰⁶ The grant is intended to “increase both the range and volume of lipids” able to be produced in the UK — lipids being key to the production of the vaccines — at their current facilities in Leek, Staffordshire.

On 6 April 2022, the UK government unveiled the British Energy Security Strategy in light of rising global energy costs and volatility from post-COVID increases in energy demand and supply shocks from the Ukraine-Russia conflict.¹⁵⁰⁷ This strategy focuses on investments in nuclear energy and offshore wind to meet present and future domestic electricity demands. For example, it sets a goal of 25 per cent of projected energy demand being met with nuclear power by 2050 — up to 24 gigawatts — and an additional goal of up to 50 gigawatts of energy powered from offshore wind by 2030. These investments include a GBP120 million sum towards delivering up to eight new nuclear reactors under the “Future Nuclear Enabling Fund.” This announcement also included smaller additional sums allocated to domestic production of onshore wind, heat pump manufacturing, solar, hydrogen, and oil and gas, for meeting medium-to-long-term environmental, economic, and energy security needs.

On 10 May 2022, the UK government announced a “seafarers minimum wage” that requires all regularly-sailing operators to pay at least the minimum to dock in British ports.¹⁵⁰⁸ This “seafarers minimum” will be equivalent to the national minimum wage. Furthermore, the UK government is in talks with European partners to implement a “minimum wage corridor,” restricting the ability of operators to exploit wage loopholes between partner countries.

On 23 May 2022, UK Export Finance (UKEF) signed a cooperation agreement with the Saudi Export-Import Bank (EXIM), providing a “general framework that will enable the two [export credit] agencies to combine their financial support to help UK and Saudi Arabian businesses secure export contracts anywhere in the world.”¹⁵⁰⁹ UKEF, the world’s first export credit agency established in 1919, will lend its extensive knowledge and expertise to Saudi EXIM, which itself was recently established in 2020.

On 23 May 2022, UK government announced its investment of GBP40 million into a new competition operated by the Centre for Connected and Autonomous Vehicles for funding projects “to help bring to market the latest developments in autonomous commercial vehicles,” including self-driving delivery

vehicles and shuttles.¹⁵¹⁰ It is estimated that this market will be worth around GBP42 million in the UK by 2035 and create 38,000 new skilled jobs.

On 26 May 2022, the United Kingdom backed the South-African-created Just Energy Transition Partnership, additionally supported by the United States, France, Germany and the European Union who all pledged USD8.5 billion to South Africa and its transition away from carbon-intense electrical systems.¹⁵¹¹ To do so, the investment highlighted the indispensability of public-private partnerships in securing the transition and meeting South Africa's economic, environmental, and social infrastructure investment goals.

On 30 August 2022, work began on the UK government's GBP5 billion broadband upgrade labelled "Project Gigabit."¹⁵¹² This project is aimed at bringing reliable gigabit broadband to more hard-to-reach communities across the UK deemed too expensive or difficult to connect by commercial broadband providers.

The United Kingdom has fully complied with its commitment to further collaboration between public and private sectors to mobilize capital for infrastructure investment. In accordance with the Roadmap for Infrastructure as an Asset Class, and the G20 Infrastructure Investors Dialogue, the country has drafted many policies to facilitate public-private partnerships in infrastructure investment.

Thus, the United Kingdom receives a score of +1.

Analyst: Reshad Mubtasim-Fuad

United States: +1

The United States has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 2 November 2021, at the United Nations Climate Change Conference, the President Joe Biden reaffirmed the United States Agency for International Development's commitment to the Agriculture Innovation Mission for Climate, pledging to mobilise USD1 billion over five years to the initiative.¹⁵¹³ The program aims to raise agricultural productivity in South Asia and Sub-Saharan Africa by 25 per cent by investing and developing infrastructure that supports climate-smart agriculture and food systems.

On 15 November 2021, the Office of Public Affairs of the United States published a press release with details of the infrastructure deal put forward by the President of the United States.¹⁵¹⁴ It noted that

senior business leaders shared the view of the government that a policy recognising the value of both the public and private sector would be crucial to closing the gap in terms of digital access.

On 9 May 2022, the Deputy Secretary of the Department of Commerce Don Graves, U.S. Senators Debbie Stabenow and Gary Peters, U.S. Congresswomen Brenda Lawrence and Rashida Tlaib, Michigan Lieutenant Governor Garlin Gilchrist II, and Detroit Mayor Mike Duggan, hosted a Supply Chain Summit, for which public and private sector stakeholders were also in attendance.¹⁵¹⁵ The aim of the summit was to encourage connections between the public and private sector, placing emphasis on the importance of government collaboration and support for the under-publicised elements of the private sector including minority-owned small businesses. As part of the event, attendees were separated into breakout sessions with the officials to discuss capital procurement through the federal government.

On 21 May 2022, President Joseph Biden paid a visit to Korea and had a meeting with Korean President Yoon Suk Yeol.¹⁵¹⁶ As part of a joint statement issued by both presidents, they agreed to utilize their comparative advantage to enhance public-private cooperation in the development of the technology sector, reaffirming their commitment to furthering collaboration between public and private sectors.

On 24 May 2022, at the Quad Joint Leaders' meeting comprised of Prime Minister Anthony Albanese of Australia, Prime Minister Narendra Modi of India, Prime Minister Fumio Kishida of Japan, and President Joe Biden, the leaders reaffirmed their commitment to improving infrastructure the Indo-Pacific region through public and private partnerships.¹⁵¹⁷ To do so, the four leaders pledged USD50 billion to infrastructure assistance and investment to the region over five years.

On 26 May 2022, the United States backed the South-African-created Just Energy Transition Partnership, additionally supported by the United Kingdom, France, Germany and the European Union who all pledged USD8.5 billion to South Africa and its transition away from carbon-intensive electrical systems.¹⁵¹⁸ To do so, the investment highlighted the indispensability of public-private partnerships in securing the transition and meeting South Africa's economic, environmental, and social infrastructure investment goals.

replace two diesel generators in the Native Village of Deering and the remaining US\$800,000 was used to replace five generators in the Alaska rural villages of Huslia, Minto, Nulato, Holy Cross, and Shageluk.

On 23 June 2022, the United States Environmental protection agency awarded USD1,200,000—derived from the Diesel Emission Reduction Act—to federally-recognized Indigenous tribes in Washington D.C.¹⁵²⁰ The grant funds projects for Indigenous communities to replace older equipment that utilizes larger amounts of diesel fuel in comparison to newer models. Roughly USD375,000 of the collective USD1,200,000 was used to replace two diesel generators in the Swinomish Indian Tribal Community and the remaining US\$500,000 was used to replace two marine engines within the Quinault Indian Nation.

On 27 June 2022, the US International Development Finance Corporation announced plans to invest up to USD30 billion in India's Omnivore Agritech and Climate Sustainability Fund 3 to fund projects by entrepreneurs developing local food systems, agricultural and climate technology, and bolstering rural economies.¹⁵²¹ The fund will specifically invest capital into companies increasing India's food security, climate resilience, and agricultural infrastructure. The funding comes as part of the G7's Partnership for Global Infrastructure and Investment (PGII) initiative, as its launch aims to fund infrastructure in developing countries.

The United States has fully complied with the commitment to develop further the collaboration between the public and private investors to mobilise private capital.

Thus, the United States receives a score of +1.

Analyst: Daniel Yihan Mao

European Union: +1

The European Union has fully complied with the commitment to further collaboration between public and private sectors to mobilise private capital for infrastructure investment.

On 10 December 2021, the European Investment Bank (EIB) agreed to provide up to EUR95 million for the purchase of battery-powered trains that will replace diesel trains in Berlin and the surrounding area in a public-private investment project.¹⁵²² This partnership is supported by the European Commission with funds from the Connecting Europe Facility for Transport and New Entrants' Reserve programme.

On 20 and 21 January 2022, the European Union attended the first meeting of the G20 Infrastructure Working Group, where was discussed the enhanced role for infrastructure in the recovery from the Covid-19 pandemic, including through scaling up sustainable infrastructure by leveraging private sector participation.¹⁵²³

On 7 March 2022, the EC, the EIB, and the European Investment Fund signed the Guarantee Agreement on a European budget guarantee of EUR19.65 billion to support investment projects across Europe under the InvestEU programme.¹⁵²⁴ InvestEU concentrates on four main policy areas: sustainable infrastructure; research, innovation, and digitisation; small- and medium-sized businesses (SMEs); and social investment and skills. InvestEU aims to attract private partners with the goal of receiving EUR372 billion in additional investment by 2027.

On 1 April 2022, the InvestEU Investment Committee confirmed the guarantee of EUR1.9 billion in EIB financing for the first projects under the programme.¹⁵²⁵ These first projects fall under InvestEU's social investment and skills priority area and will support clean energy, education, improved internet connection, and water and wastewater infrastructure. These projects span the EU and include investments in Finland, Greece, Ireland, Italy, Poland, Portugal, and Spain

On 26 May 2022, the European Union backed the South-African-created Just Energy Transition Partnership, additionally supported by the United Kingdom, the United States, France, and Germany who all pledged USD8.5 billion to South Africa and its transition away from carbon-intense electrical systems.¹⁵²⁶ To do so, the investment highlighted the indispensability of public-private partnerships in securing the transition and meeting South Africa's economic, environmental, and social infrastructure investment goals.

The EU has taken new, strong actions to promote public-private collaboration for infrastructure projects, particularly through the ongoing role of the InvestEU programme and public-private partnerships launched by the EIB.

Thus, the European Union receives a score of +1.

Background

At the 2015 United Nations' Sustainable Development Summit in New York, world leaders adopted 17 key goals named the “Sustainable Development Goals,” (SDGs) that later came into effect in 2016.¹⁵²⁷ Goal Number 5 specifically pertains to gender equality.¹⁵²⁸ To combat gender inequalities, they chose to prioritize “5.1) [ending] all forms of discrimination against all women and girls everywhere; 5.2) Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking and sexual and other types of exploitation; 5.3) Eliminate all harmful practices, such as child, early and forced marriage and female genital mutilation; 5.4) Recognize and value unpaid care and domestic work through the provision of public services, infrastructure and social protection policies and the promotion of shared responsibility within the household and the family as nationally appropriate; 5.5) Ensure women’s full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic and public life; 5.6) Ensure universal access to sexual and reproductive health and reproductive rights as agreed in accordance with the Programme of Action of the International Conference on Population and Development and the

¹⁵²⁷ The Sustainable Development Agenda. United Nations (New York) n.d. Access Date: 6 December 2021. <https://www.un.org/sustainabledevelopment/development-agenda-retired/>

¹⁵²⁸ Goal 5: Achieve gender equality and empower all women and girls. United Nations (New York) n.d. Access Date: 6 December 2021. <https://www.un.org/sustainabledevelopment/gender-equality/>

Beijing Platform for Action and the outcome documents of their review conferences; 5.a) Undertake reforms to give women equal rights to economic resources, as well as access to ownership and control over land and other forms of property, financial services, inheritance and natural resources, in accordance with national laws; 5.b) Enhance the use of enabling technology, in particular information and communications technology, to promote the empowerment of women; 5.c) Adopt and strengthen sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels.”¹⁵²⁹

Since the outbreak of the COVID-19 pandemic in March of 2020, however, gender inequality has been exacerbated as women are disproportionately impacted. The United Nations states that the “COVID-19 pandemic could reverse the limited progress that has been made on gender inequality and women’s rights.”¹⁵³⁰ Due to their general earning and saving less, women have been affected by compounded economic impacts.¹⁵³¹ Sixty per cent of women work in the informal economy, making them more susceptible to poverty. Women’s health has been impacted as a result of reallocated resources, and gender-based violence has increased due to women often being stuck at home with their abusers. In the age of COVID-19, the priorities are that “Gender-based violence, including domestic violence, is mitigated and reduced; Social protection and economic stimulus packages serve women and girls; People support and practise equal sharing of care work; Women and girls lead and participate in COVID-19 response planning and decision-making; and [d]ata and coordination mechanisms include gender perspectives.”¹⁵³²

At the 2008 inaugural summit in Washington, DC, gender inequality was not discussed. It was not until the 2009 London summit where G20 members stated they would “build a fair and family-friendly labour market for both women and men.”¹⁵³³ Additionally, they also committed to “support employment by stimulating growth, investing in education and training, and through active labour market policies, focusing on the most vulnerable.”

At the 2009 Pittsburgh Summit, G20 members stated that they “cannot rest until the global economy is restored to full health, and hard-working families the world over can find decent jobs.”¹⁵³⁴

At the 2010 Toronto Summit, the 2010 Seoul Summit and 2011 Cannes Summit, gender equality and women were excluded from the declarations.

At the 2012 Los Cabos Summit, gender equality was first mentioned outside the context of family dynamics. G20 members stated they would commit to “take concrete actions to overcome the barriers hindering women’s full economic and social participation and to expand economic opportunities for women in G20 economies. We also express our firm commitment to advance gender equality in all areas, including skills training, wages and salaries, treatment in the workplace, and responsibilities in care-giving.”¹⁵³⁵ Additionally, G20 members recognized the “need for women and youth to gain access to

financial services and financial education, asked the GPMI [Global Partnership for Financial Inclusion], the OECD/INFE [Organisation for Economic Co-operation and Development/International Network on Financial Education], and the World Bank to identify barriers they may face and call for a progress report to be delivered by the next Summit.”

Attention to gender inequality issues increased at the 2013 St. Petersburg Summit when G20 members stated that “special attention must be given to those groups facing the greatest barriers to finding or remaining in employment such as youth, women, long-term unemployed, low skilled workers, single parents, people with disabilities and older workers.”¹⁵³⁶

At the 2014 Brisbane Summit, G20 members agreed to “the goal of reducing the gap in participation rates between men and women in our countries by 25 per cent by 2025, taking into account national circumstances, to bring more than 100 million women into the labour force, significantly increase global growth and reduce poverty and inequality.”¹⁵³⁷ The Brisbane Action Plan committed to tackling long-term and structural unemployment, “[supporting citizens] particularly youth and women, to gain and maintain quality employment [as well as] enhancing social cohesion and reducing inequality.”

At the 2015 Antalya Summit, G20 members said they “will continue monitoring the implementation of our Employment Plans as well as our goals to reduce [the] gender participation gap and to foster safer and healthier workplaces also within sustainable global supply chains.”¹⁵³⁸ They also stated that they “will pay particular attention to the needs of smallholder and family farmers, rural women and youth.”

At the 2016 Hangzhou Summit, G20 members agreed to “work to ensure that our economic growth serves the needs of everyone and benefits all countries and all people including in particular women, youth and disadvantaged groups, generating more quality jobs, addressing inequalities and eradicating poverty so that no one is left behind.”¹⁵³⁹ G20 members also agreed to “commit to pursue pro-innovation strategies and policies, support investment in science, technology and innovation (STI), and support skills training for STI – including support for the entry of more women into these fields – and mobility of STI human resources.” Lastly, they “committed to supporting our workforces throughout this transition and to ensuring that the benefits of the NIR [new industrial revolution] extend to all, including women, youth and disadvantaged groups.”

Gender equality was referenced heavily at the 2017 Hamburg Summit. G20 leaders committed to take “further action to improve the quality of female employment and eliminate employment discrimination and reduce gender compensation gaps and provide women with protection from all forms of violence. We will improve women’s access to labour markets through provision of quality education and training, supporting infrastructure, public services and social protection policies and legal reforms, where appropriate.”¹⁵⁴⁰ To address SDGs, they would utilize “effective wage policies, removing barriers women face when striving for higher-paying, higher-quality jobs, tackling occupational and sectoral segregation and fostering women’s career prospects including through entrepreneurship.”¹⁵⁴¹ G20

¹⁵⁴¹ The 2017 G20 Hamburg Summit Commitments, G20 Information Centre (Toronto) 4 October 2017. Access Date: 6 December 2021. <http://www.g20.utoronto.ca/analysis/commitments-17-hamburg.html>

members also committed to promote policies that “help women and men reconcile work and family lives in a more equitable manner.”¹⁵⁴² They also committed to “[take further action to] provide women with protection against all forms of violence.” Additionally, G20 members stated they would “improve women’s access to labour markets through provision of quality education and training, supporting infrastructure, public services and social protection policies and legal reforms, where appropriate.”¹⁵⁴³

At the 2018 Buenos Aires Summit, G20 members declared “to promote initiatives aimed at ending all forms of discrimination against women and girls and gender-based violence. We commit to promoting women’s economic empowerment, including by working with the private sector, to improve labour conditions for all, such as through access to quality and affordable care infrastructure and parental leave, and reducing the gender pay gap. We also commit to promote women’s access to leadership and decision-making positions, the development of women and girls’ digital skills and increasing their participation in STEM (Science, Technology, Engineering and Mathematics) and high-tech sectors. We welcome the continued implementation of the Women Entrepreneurs Financing Initiative (We-Fi), and we thank the Business Women Leaders’ Taskforce for its work. Drawing from this experience, we will consider how to better engage with women entrepreneurs.”¹⁵⁴⁴

At the 2019 Osaka Summit, G20 leaders recognized that unpaid care work “remains a major obstacle to women’s participation in the labour market. We commit to take further action to improve the quality of women’s employment, reduce gender pay gaps, and end all forms of discrimination against women and combat stereotypes.”¹⁵⁴⁵ Moreover, they reaffirmed “the importance of taking measures to eradicate all gender-based violence, abuse and harassment, including in the digital context. We welcome efforts, particularly by the private sector, to promote women’s access to managerial and decision making positions and foster women business leaders and entrepreneurship.”

At the 2020 Riyadh Summit, G20 members acknowledge that women have “been disproportionately affected by the [COVID-19] crisis, and they need to work to ensure that the pandemic does not widen gender inequalities and undermine the progress made in recent decades.”¹⁵⁴⁶ Furthermore, they agreed to “continue to promote gender equality, as well as combat stereotypes, reduce pay gaps, and address the unequal distribution of unpaid work and care responsibilities between men and women. We will step up our efforts towards achieving the Brisbane Goal to reduce the gap in labor force participation between men and women by 25 percent by 2025 along with improving the quality of women’s employment ... We will take steps to remove the barriers to women’s economic participation and entrepreneurship.”

Commitment Features

In response to women and girls being disproportionately affected by the COVID-19 pandemic, the G20 members place women empowerment and gender equity at the core of their efforts moving forward.¹⁵⁴⁷ The G20 Rome Leaders’ Declaration reaffirms members’ commitment in ensuring gender equity, with an emphasis placed on “the pivotal role of women’s and girls’ empowerment and leadership at all levels

¹⁵⁴⁶ G20 Leaders’ Declaration, G20 Information Centre (Toronto) 21 November 2020. Access Date: 7 December 2021. <http://www.g20.utoronto.ca/2020/2020-g20-leaders-declaration-1121.htm>

¹⁵⁴⁷ G20 Rome Leaders’ Declaration, G20 Information Center (Toronto) 31 October 2021. Access Date: 6 December 2021. <http://www.g20.utoronto.ca/2021/211031-declaration.html>

for inclusive and sustainable development.” In order for members to receive full compliance, actions must be committed to support “sustainable, inclusive and resilient recovery across the world” in order to promote gender equity and empowerment and “accelerate progress on all SDGs.”

To “reaffirm” is defined as “to affirm again,” where to affirm is to “assert strongly, state as fact, confirm or ratify a judgment.”¹⁵⁴⁸

To “support” refers to “the action, or act of providing aid, assistance, or backing up an initiative, or entity.”¹⁵⁴⁹ In the context of this commitment, G20 members will commit to and take on concrete actions to ensure and uphold gender equity and women’s and girls’ empowerment.

“Sustainable” is understood as the ability “to last or continue for a long time.”¹⁵⁵⁰ For this commitment, this refers to actions and initiatives that, once put into place, will have the ability to continually operate into the future to create lasting efforts in this commitment area.

“Inclusive” refers to when “all parties are included in the discussion and decision making process.”¹⁵⁵¹ For this commitment, this means that women and girls must be included within the discussion and implementation process in various sectors to ensure that the actions taken truly address their concerns and needs.

“Resilient” is understood as the ability to “return quickly to a previous good condition after problems,” and within this commitment, this is specifically referring to economic resilience.¹⁵⁵² For this commitment, this entails that G20 members should take actions that will support and encourage women’s sustained participation in the formal workforce and economy.

“Recovery” is understood as “the regaining of ... something lost or taken away” or the “restoration or return to any former and better state or condition.”¹⁵⁵³ In the context of this commitment, this entails that the G20 members’ actions must not only aid in rebuilding global efforts within this commitment area that have been adversely affected by the COVID-19 pandemic, but also improve upon and create new efforts in this area.

“Across the world” within this commitment area requires G20 members to take strong action both domestically and internationally. While gender inequality has always been a global problem, the COVID-19 pandemic, and the socioeconomic impacts that resulted from it, has exacerbated this pervasive global issue.¹⁵⁵⁴ Therefore, G20 members should not only act domestically, but also act internationally and support international efforts.

¹⁵⁵⁴ Achieve Gender Equality and Empower All Women and Girls: Progress and Info, United Nations Department of Economic and Social Affairs (New York) n.d. Access Date: 8 December 2021. <https://sdgs.un.org/goals/goal5>

To “promote” refers to actions that “support or renew old efforts or create new efforts in the area... [and t]o contributes to growth or prosperity of, to help bring into being.”¹⁵⁵⁵ For this commitment, actions should not have to be a brand new initiative, but must advance efforts of ensuring gender equity and the empowerment of women and girls.

“Equity” refers to situations “in which everyone is treated fairly and equally.”¹⁵⁵⁶ In the context of this commitment, it entails that G20 members should take actions that will fight against gender-based discrimination in all sectors of life.

To “accelerate” is understood as “to hasten the progress or development of.”¹⁵⁵⁷ The COVID-19 pandemic has adversely affected the progress that has been made on gender equity. Therefore, in the context of this commitment, G20 members must take actions that not only will help global efforts in “get[ting] back on track for achieving gender equality,” but also move forward in all the SDGs, set out by the UN, as well.¹⁵⁵⁸

“Progress” is understood as the “forward or onward movement” of an objective or a goal.¹⁵⁵⁹ In the context of this commitment, progress refers to actions that will further and improve efforts made on the SDGs.

“All” is understood as a “the whole amount, quantity, or extent of.”¹⁵⁶⁰

The SDGs are 17 goals that the UN created that recognize that many global issues, such as poverty and inequality, are all interconnected, and countries must act in a global partnership to tackle these issues. In the context of this commitment, G20 members must take actions that pertain to advancing all SDGs. The sustainable development goals are: “1. No Poverty: end poverty in all its forms everywhere; 2. Zero Hunger: end hunger, achieve food security and nutrition and promote sustainable agriculture; 3. Good Health and Well-Being: ensure healthy lives and promote well-being for all at all ages; 4. Quality Education: ensure inclusive and equitable quality education and promote life-long learning opportunities for all; 5. Gender Equality: achieve gender equality and empower women and girls; 6. Clean Water and Sanitation: ensure availability and sustainable management of water and sanitation for all; 7. Affordable and Clean Energy: ensure access to affordable, reliable, sustainable and modern energy for all; 8. Decent Work and Economic Growth: promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all; 9. Industry, Innovation and Infrastructure: build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation; 10. Reduce Inequalities: reduce inequality within and among countries; 11. Sustainable Cities and Communities: make cities and human settlements inclusive, safe, resilient and sustainable; 12. Responsible Consumption and Production: ensure sustainable consumption and production partners; 13. Climate Action: take urgent action to combat climate change and its impacts; 15. Life Below Water: conserve and sustainably use the oceans, seas and marine resources for sustainable development; 15. Life on Land: protect, restore and promote sustainable use

of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss; 16. Peace, Justice and Strong Institutions: promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels; and 17. Partnerships for the Goals: strengthen the means of implementation and revitalize the global partnership for sustainable development.”¹⁵⁶¹

To “recognize” is understood as “to acknowledge formally” or to “take notice in some definite way.”¹⁵⁶² In the context of this commitment, G20 members must address the problems of gender inequality through strong and clear actions.

“Importance” is understood as having the quality to be “marked by or indicative of significant worth or consequence.”¹⁵⁶³ Women play a vital role within the decision-making process for COVID-19 recovery, as well as many other sectors.¹⁵⁶⁴ The pandemic has highlighted the need for continued international efforts in women empowerment and gender equity, especially during this time of global recovery from the pandemic.

“Women empowerment” refers to encouraging women to “participate fully in economic life across all sectors.”¹⁵⁶⁵ In the context of this commitment, this concept requires G20 members to create actions and initiatives that promote female engagement in various sectors of life, such as STEM or policy making.

Regarding the breadth component, or the range of policy area G20 members must take actions to be deemed fully compliant, members’ overall actions must address and be effective across several SDGs. Members must take actions that will address “key factors such as equal access to education and opportunities, including in STEM sectors, the promotion of women’s entrepreneurship and leadership, the elimination of gender-based violence, the enhancement of social, health, care and educational services, the overcoming of gender stereotypes, and the uneven distribution of unpaid care and domestic work...[as well as] enhance the quality and quantity of women’s employment, with a particular focus on closing the gender pay gap.”¹⁵⁶⁶

For the depth component, or the strength of the actions G20 members are required to make to be deemed fully compliant, members’ actions should reflect their continued support for established efforts in women empowerment and gender equity, while initiating new efforts in this area as well. Strong action must be taken by members to “accelerate progress on all SDGs,” and recovery efforts must be “sustainable, inclusive, and resilient ... across the world.”¹⁵⁶⁷ Thus, actions must not be only limited to domestic efforts, but also aimed to support global recovery in this area; however, actions can be unilateral and are not required to be bilateral or multilateral.

¹⁵⁶⁶ G20 Rome Leaders’ Declaration, G20 Information Center (Toronto) 31 October 2021. Access Date: 6 December 2021. <http://www.g20.utoronto.ca/2021/211031-declaration.html>

¹⁵⁶⁷ G20 Rome Leaders’ Declaration, G20 Information Center (Toronto) 31 October 2021. Access Date: 6 December 2021. <http://www.g20.utoronto.ca/2021/211031-declaration.html>

In order for an action to be considered as a strong action, G20 members need to address the various targets and indicators within the Gender Equality SDG (SDG 5). Compliant actions must go beyond verbal reaffirmation, declaration, and conferences; they must “[a]dopt and strengthen sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels [(Target 5.c)].”¹⁵⁶⁸ Furthermore, members must “track and make public allocations” to ensure that these legal frameworks and policies will aid in eliminating harmful practices, violence, and discrimination against women and girls globally, while promoting “women’s full and effective participation and equal opportunities ... in political, economic and public life [(Target 5.5)].”

G20 members must also take actions that are “sustainable, inclusive, and resilient” for global recovery in this commitment area.¹⁵⁶⁹

Sustainability can be achieved with actions that target eliminating “all forms of violence against all women and girls in the public and private spheres, including trafficking and sexual and other types of exploitation [(Target 5.2)]... [.] child, early and forced marriage and female genital mutilation [(Target 5.3)],” and/or “equal access to education and opportunities.”^{1570, 1571} Furthermore, actions that “[e]nsure universal access to sexual and reproductive health[,] ... reproductive rights [and sexual and reproductive education (Target 5.6)]” will also fall under the sustainable criterion.¹⁵⁷²

“Women have played a critical role in the response to the pandemic as front-line health workers, caregivers, and managers and leaders of the response and recovery efforts,” yet they still remain underrepresented in leadership and decision-making positions at all levels.¹⁵⁷³ Therefore, G20 members can achieve the inclusivity criterion through actions that promote, ensure, and encourage women’s equal participation in decision-making processes (Target 5.5). This can be done through increasing the number of seats that are held by women in national parliaments and local government, especially in the decision-making process for COVID-19 recovery, and managerial positions in the economic sector. Moreover, members must take strong actions that will reform national legislations that give women equal rights and access to economic resources, such as “ownership and control over land and other forms of property, financial services, inheritance and natural resources,” as well as “[e]nhance the use of enabling technology, [and encourage women participation in the STEM sector] ... to promote the empowerment of women [(Target 5.b)].”

The pandemic has also placed an increased burden on unpaid domestic and care workers and are thus forcing many women out of the economic sector and the labour force.¹⁵⁷⁴ Sustained participation from women in all sectors of public life is vital to economic resilience, and thus actions that ensure Target 5.5 will fulfill the criterion of resilient recovery as well. G20 members must take strong action in promoting women participation in all sectors of life in order to reduce the global gender gap in pay and leadership positions, as well as create a resilient economy.

¹⁵⁶⁸ Achieve Gender Equality and Empower All Women and Girls: Targets and Indicators, United Nations Department of Economic and Social Affairs (New York) n.d. Access Date: 8 December 2021. <https://sdgs.un.org/goals/goal5>

Compliant actions from G20 members also need to address multiple SDGs. Due to the interconnected nature of the SDGs, actions within Gender Equality may affect other SDGs as well and compliant actions within these SDGs must also be relevant to women's empowerment. For example, actions that promotes equal access to education and opportunities may impact Quality Education (SDG 4) and Reduced Inequalities (SDG 10), actions that ensures universal health and reproductive rights can affect Good Health and Well-Being (SDG 3), and actions that encourages women's participation in the political or economic sector also can fall under Decent Work and Economic Growth (SDG 8). Thus, in order for a G20 member's action to be considered a strong action, it must be effective across several SDGs.

In order for a G20 member to achieve full compliance (+1), strong action must be taken to address more than twelve SDGs, and must demonstrate all three characteristics of sustainable, inclusive, and resilient recovery.

In order for a G20 member to achieve partial compliance (0), strong action must be taken to address five to twelve SDGs, and must demonstrate two out of the three characteristics of sustainable, inclusive, and resilient recovery.

In order for a G20 member to achieve non-compliance (-1), strong action must be taken to address less than five SDGs, and must demonstrate one out of the three characteristics of sustainable, inclusive, and resilient recovery.

Scoring Guidelines

-1	The G20 member has taken strong action that addresses fewer than five Sustainable Development Goals, and the action demonstrates one of the three characteristics of sustainable, inclusive, OR resilient recovery.
0	The G20 member has taken strong action that addresses five to 12 Sustainable Development Goals, and the action demonstrates two of the three characteristics of sustainable, inclusive, OR resilient recovery.
+1	The G20 member has taken strong action that addresses more than 12 Sustainable Development Goals, and the action demonstrates all three characteristics of sustainable, inclusive, AND resilient recovery.

On 18 November 2021, the Ministry of Productive Development allocated more than USD12 million to policies with a gender perspective.¹⁵⁷⁶ The goal of these policies is to reduce gender gaps by strengthening the career development of women, facilitating access to hierarchical positions, eradicating violence, and promoting equal opportunities.

On 26 November 2021, the Ministry of Labour, along with the Ministry for Women, Gender and Diversity and the Ministry for Culture, signed two protocols to confront and eliminate harassment in the workplace within the performing arts and entertainment sectors.¹⁵⁷⁷ Minister for Women, Gender and Diversity, Elizabeth Gómez Alcorta, said that signing the two protocols helps “to understand that gender-based violence exists in all areas in which we develop. This protocol is part of that path because it implies recognizing that we need to act in this sector as well and that in order to respond to and prevent violence we must all get involved, everyone from every space we occupy.”

On 29 November 2021, the Ministry of Women, Gender and Diversity along with the Human Rights Secretariat of the Ministry of Justice and Human Rights presented a federal project to guarantee the access to sexual and reproductive rights by women and members of the LGBTI+ community.¹⁵⁷⁸ The project consists of a network of institutional references to help women and LGBTI+ users of mental assistance escape gender-based violence.

On 29 November 2021, Chief of the Cabinet of Ministers of the Nation Juan Manzur met with Minister of Social Development Juan Zabaleta to review the “My Piece” national program, which provides subsidies to women to allow them to renovate and expand their houses.¹⁵⁷⁹ This initiative “plays a fundamental role in economic reactivation and the promotion of genuine work, and which also generates a substantial improvement in the quality of life of women from the popular sectors.”

On 3 December 2021, National Directorate of Economy, Equality and Gender, United Nations Organization for Gender Equality and the Empowerment of Women, and UN Women reaffirmed their joint budget with a gender and diversity perspective for 2022.¹⁵⁸⁰ In the government of Argentina’s 2021 national budget, 15.2 per cent was allocated to closing gender gaps by encouraging women who lost their jobs during the pandemic back into the labour market by closing inequality gaps. Moreover, the joint budget consists of two main axes: climate and care. In 2022, the national budget seeks to strengthen the work already done in 2021 and to contribute to economic recovery.

On 7 December 2021, Minister for Women, Gender and Diversity, Elizabeth Gómez Alcorta and Foreign Minister, Santiago Cafiero presented the Action Protocol for Prevention, Guidance and Approach to Situations of Labour Violence and Gender-Based Violence in the Foreign Ministry.¹⁵⁸¹ The plan “establishes a clear and unified institutional action procedure to receive queries and process complaints.”

On 7 December 2021, the Permanent Representative of Argentina to the United Nations, Gusatavo Eduardo Ainchil underlined Argentina’s commitment to promote gender-responsive judicial approaches and to end gender-based violence against women.¹⁵⁸² This is a response to the disruption the pandemic has had on the criminal justice system, which plays an important role in ending gender-based violence, encourage women to come forward to seek justice, and holding perpetrators of gender-based and domestic violence accountable.

On 9 December 2021, Director of Economy, Equality and Gender Mercedes, D’Alessandro represented Argentina at the first World Forum for Children and Youth and advocated for the importance of large public investments in infrastructure and said that the government of Argentina will work with agencies of the national government to achieve such investment in infrastructure.¹⁵⁸³ These social policies aim to contribute “to closing inequality gaps, which is the tool to combat poverty...Recovering the economy with a gender perspective so that it is sustainable must be on the agenda of the States.”

On 9 December 2021, the Ministry of Public Works presented the results of the research investigation ‘Participation of women in science, technology and management of water resources in Argentina’ that was conducted in collaboration with UNESCO via the World Water Resources Assessment Program.¹⁵⁸⁴ The research reported on the current participation of women in science, technology and integrated management of water resources in Argentina within the framework of gender equality and in accordance with the SDGs. The study showed that industries and sectors such as the water sector have been predominantly occupied by males, which raises challenges for women trying to develop their professional careers. The study also proposes fundamental data measurement processes that aim to manage gender inequalities and to implement and strengthen policies that promote a more diverse gender perspective.

On 15 December 2021, the Ministry of Labour, Employment and Social Security, the Ministry of Women, Gender and Diversity, the Ministry of Economy and Productive Development, UN Women, and the International Labour Organisation (ILO) presented a program to “promote decent employment for women through inclusive growth policies and investments in the care economy.”¹⁵⁸⁵ It is a joint program created by UN Women and the ILO to help governments implement policies with

a gender perspective to help recover from the pandemic. It includes three components: growth policy, reactivation of the economy and progress in care policies.

On 21 December 2021, the head of the Cabinet of Ministers of the Nation, Juan Manzur met with the minister of Women, Gender and Diversity, Elizabeth Gómez Alcorta and secretary of Media and Public Communication, Valeria Zapesochny, to discuss the consolidation of gender policies as state policies.¹⁵⁸⁶ At the meeting, the main lines of work carried out by the Ministry, including the National Plan of Action Against Violence for Gender Reasons and implementation of the Micaela Law, were analysed.

On 14 March 2022, the Ministry of Women, Gender and Diversity launched the Program to Strengthen the Leadership of Women and Sexual Diversities in Trade Union Organisations to fight against gender discrimination in leadership roles within trade union organisations.¹⁵⁸⁷ The program will provide training and education to form a national network of support for women in trade unions.

On 27 April 2022, the Assistant Secretary for Inclusion Policies in the World of Work of the Ministry of Labour, Employment and Social Security, Pamela Ares, met with the president of the Women for Justice Network, Ana Casal, to present the 'Decalogue for a Judiciary without Violence, Harassment or Discrimination for Reasons of Gender in Labor Relations.'¹⁵⁸⁸ This document consists of guidelines to develop and enhance current protocols against gender violence and harassment in the judiciary field.

On 4 May 2022, the Government of Argentina and the Economic Commission for Latin America (ECLAC) and the Caribbean signed an agreement for Argentina to hold the 15th Regional Conference on Women in Latin America and the Caribbean later in November of this year.¹⁵⁸⁹ The Regional Conference on Women is this region's main intergovernmental forum on women's rights and gender equality and is organized by ECLAC in coordination with the UN Entity for Gender Equality and the Empowerment of Women.

On 13 May 2022, the Ministry of Labour, Employment and Social Security established the 'Program for the Eradication of Workplace Violence and Harassment in the Cooperative Sector,' which aims to promote work environments without violence and harassment.¹⁵⁹⁰ The program will target workers in the cooperative sector, in federations and in companies registered with the National Institute of Third-Sector Activities and Social Economy and aims to educate workers in preventing and confronting harassment.

On 17 May 2022, the Ministry of Productive Development announced that it will allocate ARS210 million to projects that include a gender perspective within the Produce with Equity program.¹⁵⁹¹ The program is part of a project with the United Nations Development Program with the goal of allocating up to ARS5 million to small companies that intend to include gender equity practices in their management and work environment via Non-Reimbursable Contributions.

On 27 May 2022, the Ministry of Women, Gender and Diversity held the Participatory Federal Forum to create the new 2022-2024 National Action Plan against Gender-Based Violence.¹⁵⁹² The goal of this forum was to better incorporate gender and diversity approaches into public policy planning.

On 1 June 2022, the Ministry of Women, Gender and Diversity launched a reparation policy for victims of femicides, including trans women.¹⁵⁹³ This policy is an extension of a previous agreement called the Accompanying Program that grants financial assistance to women. The reparation policy aims to memorialize victims of femicides, use gender and diversity organizations to develop projects against femicides, and implement the Program for Urgent Support and Immediate Comprehensive Assistance in cases of Extreme Violence for Gender Reasons, which provides economic and psychological support and legal advice to victims.

On 9 June 2022, the Government of Argentina, in collaboration with the United Nations International Fund for Agricultural development and the FONPLATA Development Bank, launched a new rural development project to aid smallholder farmers, especially female farmers, in rural areas of Argentina in their “transition to more resilient agroecology-based production.”¹⁵⁹⁴ A total of USD 59.1 million will be invested by the involved parties and this project will be carried out by the Ministry of Agriculture, Livestock and Fisheries. This program seeks to help alleviate the food insecurity and desert problems that currently exist within Argentina.

On 13 June 2022, the Ministry of Women, Gender and Diversity signed the Equal Trades Seal to incorporate a gender perspective in Labor Training Centers so that they become inclusive institutions for women and the LGBTQ+ community.¹⁵⁹⁵ The main goal of this agreement is to promote the participation of women in jobs that are historically male dominated.

On 8 August 2022, the Argentinian government, with the help of the Inter-American Development Bank, agreed to help increase the productivity of micro, small, and medium-sized enterprises (MSME)

with an USD80 million loan.¹⁵⁹⁶ This program aims to promote innovative and environmentally sustainable development of MSME and strengthen support and resources for women entrepreneurs.¹⁵⁹⁷

Argentina has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. By initiating and investing in federal programs that protect women from violence, promote reproductive and sexual rights and fund public infrastructure for women and girls, SDG 1: No Poverty, SDG 3: Good Health and Well-Being, SDG 4: Quality Education, and SDG 9: Industry, Innovation and Infrastructure are addressed. Furthermore, actions that work towards closing the gender pay gap, promote women's involvement in the workforce as well as protect the well-being of the members of the LGBTI+ community work towards addressing SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 10: Reduced Inequalities, SDG 11: Sustainable Cities and Communities and SDG 16: Peace, Justice and Strong Institutions. These actions also demonstrate all of the three characteristics of a sustainable, inclusive and resilient recovery. However, it has fallen short of the 12 SDGs threshold necessary for a score of full compliance.

Thus, Argentina receives a score of 0.

Australia has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 23 November 2021, the government announced that it will invest AUD22.4 million over five years to establish a Domestic, Family and Sexual Violence Commission to oversee the implementation of the next National Plan to end violence against women and children.¹⁵⁹⁸ In addition to the funding, on 18 November 2021, the Minister for Women, Marise Payne, also added that Australia is committed to implementing Australia's second National Action Plan on Women, Peace and Security 2021-2031, through a survivor-centred approach that recognises gender inequality as a precursor to conflict and sexual violence.

On 14 January 2022, Australia released a draft of "The National Plan to End Violence Against Women and Children 2022-32,"¹⁵⁹⁹ which focuses on the pillars of gender equality, Closing the Gender Gap, intersectionality and the diverse lived experiences of victim-survivors informing policies and solutions. Furthermore, the Minister for Women's Safety Anne Ruston and the Minister for Women Marise Payne announced that the Australian Government would invest AUD1 million to ensure ongoing

engagement with victim-survivors throughout the life of the next National Plan in support of the foundation principle.

On 20 January 2022, Minister for Science and Technology Angus Taylor, announced grants for women in science, technology, engineering and mathematics (STEM) and entrepreneurship to achieve gender equality.¹⁶⁰⁰ This round of the Women in STEM and Entrepreneurship grants offer AUD13 million in total funding support. This is the largest amount of funding to date, with grants of AUD500,000 to AUD1 million available for each grantee. Additionally University scholarships for women in STEM fields were announced, The Australian Academy of Technological Sciences and Engineering (ATSE) is the program delivery partner for the Boosting the Next Generation of Women in STEM program. ATSE will receive AUD41.2 million over seven years from the Australian Government to manage and deliver up to 500 university scholarships to help women in STEM: re-enter workforce, seek higher qualifications and develop senior leadership skills.

On 11 February 2022, the government announced an AUD6.7 million investment to extend women in STEM initiatives.¹⁶⁰¹ AUD2 million over four years will extend the Superstars of STEM program that Science and Technology Australia (STA) will deliver. An additional AUD2.4 million over two years will ensure the work of the Women in STEM Ambassador continues until at least 2025-26. Additionally, AUD2.3 million over four years will be subsidized to the Ambassador's Future You initiative, which aims to promote the involvement of eight- to twelve-year-old girls in STEM fields by showcasing diverse role models and career pathways. In the 2022-2023 budget, Australia has shown support for the above-mentioned initiatives by allocating AUD4.7 million to establish the Supporting Women in Manufacturing initiative to attract and retain more women into high-value, high paid manufacturing careers. Only 20 per cent of girls reported being interested in STEM jobs before 2018, but due to these initiatives, the rate has risen to more than 68 per cent of girls interested in entering the STEM field.

On 4 April 2022, the government released its Budget for 2022-2023, announcing that AUD3.9 million will be provided to support women considering a transition into the technology industry.¹⁶⁰² This will include access to resources, online training, coaching and mentoring to support women to pursue a mid-career transition into the technology workforce.

On 20 May 2022, the Australian Public Service Commission released the "Australian Public Service Gender Equality Strategy 2021-26."¹⁶⁰³ This strategy is a partnership between the Australian Public Service Commission and the Office for Women and aims to continue to create steady and lasting improvements in gender equality. By providing a flexible framework that enables agency-level discussion and targeted actions on shared areas of focus, this strategy helps create better policies, programs and services that help integrate the principles of gender equality into all aspects of work in Australia.

On 22 July 2022, Australian ministers responsible for women and women's safety met to discuss a proposal to create and implement a National Strategy to Achieve Gender Equality as well as outline the priorities for the newly formed Domestic, Family, and Sexual Violence Commission.¹⁶⁰⁴ The commission is a key player in implementing and tracking the progress of the National Plan to End Violence against Women and Children. This plan aims to provide a “decade-long strategy to inform the policy and service frameworks needed to address violence against women and children...[and] include more data sharing around equality targets,” and is planned to be finalized and released in October. Furthermore, plans to review a national women's health plan with an emphasis on reproductive services were also discussed at this meeting.

On 17 August 2022, the Department of the Prime Minister and Cabinet published a press release highlighting ten organizations that are helping to increase women's representation in science, technology, engineering and mathematics (STEM) fields.¹⁶⁰⁵ These organizations deliver programs under the Women's Leadership and Development Program which aim to address “employment barriers and challenge gender stereotypes...[and] provide over 2,800 women and girls across Australia with skills, experience, networks and employment opportunities to enter and increase their leadership opportunities in today's evolving digital STEM sectors.”

On 20 September 2022, the Australian government published the “STEM Equity Monitor,” which is a compilation of data on women's participation and influence in STEM within the country.¹⁶⁰⁶ The report monitors the current state of STEM gender equity in Australia and to measure any changes and trends.

On 19 October 2022, the Workplace Gender Equity Agency, in collaboration with Bankwest Curtin Economic Centre, published the annual Gender Equity Insights.¹⁶⁰⁷ This report identifies trends, policies, and practices that are effective to address gender inequality in the workplace. The report found that the key driver for workforce segregation is due to the gender pay gap. Moreover, the report found that if all industries and occupations in Australia achieved a “40:40:20 gender split,” then the gender pay gap would narrow by a third of what it is now.

On 25 October 2022, the Australian Department of Foreign Affairs and Trade released the Official Development Assistance budget summary 2022-23.¹⁶⁰⁸ This budget allocates AUD1.5 billion to support gender equality efforts across the development program. Of the amount pledged, AUD500 million will be allotted towards the Pacific Women Lead to “promote women's leadership, realise women's rights, and increase the effectiveness of regional gender equality efforts in the Pacific.” Another AUD300 million, spread across over five years, will be allocated to support gender equality in Southeast Asia to build “women's economic empowerment, increasing women's leadership in regional peace and stability and realising women's and girls' rights focused on violence prevention.”

Australia has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the

Brazil has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 22 November 2021, Head of the Ministry of Women, Family and Human Rights, Damares Alves, officialized partnerships with the Military Police, the Court of Justice, the Public Ministry, with the Credit Union of Free Admission of the Central and West Region of Minas Gerais and the Federation of Services of Minas Gerais.¹⁶⁰⁹ This initiative is a part of the ongoing 21 Days of Activism for the End of Violence against Women initiative. Alves states that “the Central will share information between the police, the Court of Justice and the Ministry, in order to have more accurate data so that justice can reach the woman before a tragedy happens.”

On 1 December 2021, the Ministry of Women, Family and Human Rights and the National Supply Company signed a Technical Cooperation Agreement to commit to providing “training courses and other initiatives focused on promoting dignity and economic autonomy through the Qualifica Mulher pilot project” to over 940,000 rural women and traditional communities.¹⁶¹⁰ This initiative contributes to the federal government’s ongoing mission to raise awareness and combat violence against women.

On 2 December 2021, the Ministry of Women, Family, and Human Rights signed a Protocol of Intent to provide professional qualifications to 10,000 women in the state of Amapá. Brazilian Women’s House in Macapá was constructed in order to “bring together services for women in situations of domestic violence, with a focus on humanized care.”¹⁶¹¹ In addition to the Protocol of Intent, the 21 Days of Activism to End Violence against Women initiative was launched in partnership with the government of the state of Amapá.

On 20 December 2021, President Jair Bolsonaro issued a Decree establishing the National Plan to Combat Femicide to reinforce the federal government’s commitment to combating femicide. The Plan aims to “promote actions that make society aware of violence against women and expand the

possibilities of reporting; promote the production and management of information on violence against women and femicide; foster accountability, education and monitoring of perpetrators of violence against women; and guarantee rights and integral, humanized and non-re-victimizing assistance to women in situations of violence, indirect victims and orphans”¹⁶¹² and proposes collaboration with different sectors of the government, including education, health, social assistance, public security, and actors of the Justice System, the Legislative Power and civil society.

On 1 February 2022, the government began the National Week for the Prevention of Pregnancy in Adolescence by announcing the launch of the National Plan for the Primary Prevention of Early Sexual Risk and Adolescent Pregnancy.¹⁶¹³ The initiative aims to address the “erotization of children and adolescents” and teenage pregnancies. The Live Births Information System reported that, in 2020, over 380,000 children were born to mothers between the ages of ten and 19 years old, and over 17,000 girls between the ages of ten and 14 years old. The Federal Government of Brazil announced its mission to reduce the rates of teenage pregnancies by establishing training programs in municipalities and states, educational institutions, and civil society organizations. The Ministries of Women, Family and Human Rights, Education, Citizenship, and Health will collaboratively work towards this goal.

On 8 February 2022, the National Secretariat of Policies for Women and of the Ministry of Women, Family and Human Rights, called government bodies including the State Attorney General’s Office, the Public Security Secretariat, and the National Human Rights Ombudsman to investigate an incidence of political violence against councilor Camila Rosa and the president of the City Council of Aparecida de Goi as, Andr e Fortaleza.¹⁶¹⁴ On 2 February 2022, “Andr e Fortaleza ordered the parliamentarian’s microphone to be turned off, depriving her of her right to political participation, protected by article 2 of Law No. 14.192/2021,” which states that “[p]olitical violence against women is considered to be any action, conduct or omission with the purpose of preventing, obstructing or restricting women’s political rights.”

On 11 February 2022, the Ministry of Women, Family, and Human Rights announced a federal initiative, partnered with the Federal Institute of Santa Catarina, called “Social Autonomy, Generating Income and Valuing Female Work.”¹⁶¹⁵ BRL500,000 was invested into the Qualifica Mulher Project, which will fund courses in “income generation, technology, and appreciation of women’s work; entrepreneurship; communication and customer service; innovation and creativity; digital inclusion; electricity installations and services; citizenship, literacy and literacy” for 490 socially vulnerable women. Assistant Secretary of the National Secretariat for Policies for Women, Viviane Dutra, stated that this initiative aims to “develop the entrepreneurial potential that the students have, in order to provide economic autonomy and better living conditions for them and their families.” The inaugural courses occurred on 11 February 2022, in Tubar o, Santa Catarina.

On 8 March 2022, the Federal Government of Brazil signed off on a variety of initiatives in celebration of Women's Day, including the Mothers of Brazil Program, the National Women's Entrepreneurship Strategy, and the Women's Entrepreneurship Committee.¹⁶¹⁶ These initiatives aim to “promote comprehensive protection for pregnant women and maternity[,] ... [and] create a plan to develop and encourage female entrepreneurship in the country,” respectively.

On 18 April 2022, the Monitoring Center for the Prevention of Domestic and Family Violence was opened in Belo Horizonte by the Minister of Women, Family and Human Rights, Cristiane Britto.¹⁶¹⁷ Nine motor vehicles, computer equipment and an investment of BRL1.2 million from the Federal Government were delivered as a joint effort by the Court of Justice and the Public Ministry.

On 7 May 2022, the Ministry of Women, Family and Human Rights implemented an investment of BRL109,000 as an initiative to guarantee income generation for 20 Quilombola women in the Furnas do Dionísio community.¹⁶¹⁸ This investment, along with implementations of machinery and production structure for bamboo extraction, aim to protect these workers while promoting income generation.

On 7 August 2022, the Ministry of Women, Family and Human Rights commenced the August Lilac Campaign to combat domestic violence against women by spreading awareness about “physical, sexual, psychological, patrimonial, and moral violence.”¹⁶¹⁹ This campaign will instruct women on ways to report aggressions and assaults by advocating through open TV channels and social media, shown in elevators of residential buildings, and displayed within public transportation.

On 21 September 2022, Law No. 14,457/2022 came into effect that establishes the “Employs + Women Program” and amends the Consolidation of Labour Laws.¹⁶²⁰ The Employs + Women program aims to include and retain women in the labour market and “adopts various measures to support parenthood,” such as providing early childhood day care reimbursement, enabling more flexible work regimes, supporting women's return to work after maternity leave, along with many other measures.

Brazil has partially complied with its commitment to take strong action that addresses more than twelve Sustainable Development Goals (SDG). It has addressed SDG 1: No Poverty, SDG 4: Quality Education, SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities, SDG 11: Sustainable Cities and Communities, SDG 12: Responsible Consumption and Production, and SDG 16: Peace Justice and Strong Institution through initiatives targeting rural and traditional communities suffering from gender and economic inequalities through education and professional training. It has also addressed SDG 3:

Good Health and Well-Being through initiatives and commitments to combat gender-based violence and promote sexual health and wellbeing for women and children. These actions also demonstrate all of the three characteristics of a sustainable, inclusive and resilient recovery.

Thus, Brazil receives a score of 0.

Analyst: Shinyoung Kim

Canada: +1

Canada has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 10 November 2021, the Government of Canada's Veteran and Family Well-Being Fund pledged to provide CAD914,150 over five years to the Pepper Pod, a retreat for women Veterans.¹⁶²¹ The fund will support Transition Lifeshops, a program for women to share skills, network and support each other. The program will aid women Veterans' transition to life after service.

On 24 November 2021, Minister of International Development and the Pacific Economic Development Agency of Canada Harjit S. Sajjan, participated in the 27th Canadian Conference on Global Health, announcing CAD325 million in funding 11 projects with Canadian health partners.¹⁶²² It was proposed to mitigate the profound impact of COVID-19 pandemic on health systems, which disproportionately impacted women and girls. The projects will focus on comprehensive sexual and reproductive health and rights services and improving the quality of access to integrated health services.

On 7 December 2021, Minister Sajjan, announced a financial contribution of CAD195 million for 11 nutrition projects to be implemented by Canadian and international partners.¹⁶²³ It will reclaim the nutrition gains lost during the COVID-19 pandemic, with a "focus on the gender dimensions of the nutrition crisis."

On 7 December 2021, Minister of Immigration, Refugees and Citizenship Sean Fraser, on behalf of Minister Sajjan, announced a new initiative for women empowerment in the northern part of Central America.¹⁶²⁴ Canada committed CAD10 million over the next four years to assist women and girls affected by irregular migration and forced displacement in Honduras, Guatemala, and El Salvador. It is expected to help about 5,000 women and girls "to improve living conditions and protection mechanisms."

On 9 December 2021, Minister Sajjan announced Canada's renewal of its support for the Volunteer Cooperation Program through financing almost CAD418 million over seven years, from 2020 to 2027,

with more than half of the funding allocated to sub-Saharan Africa.¹⁶²⁵ The program will fund 13 volunteer development projects partnered with 15 Canadian organisations to mobilise around 10,000 volunteers to work along with 700 organisations in approximately 47 countries. The projects funded through this program advance Canada's Feminist International Assistance Policy, which includes promoting the rights and inclusion of women and girls.

On 16 December 2021, Prime Minister Justin Trudeau, delivered a mandate letter to the newly appointed Minister for Women and Gender Equality and Youth, Marci Ien.¹⁶²⁶ It proposes a plan of the "development of a 10-year National Action Plan to End Gender Based Violence." It mandates Minister Ien to support other Ministers to advance gender equality and inclusion through detailed commitments that aim to achieve seven SDGs.

On 7 January 2022, Bill C-4, a federal bill that amends Canada's Criminal Code came into effect, which "criminalizes the shameful, unscientific, and destructive practice of conversion therapy."¹⁶²⁷ The bill was passed and received royal assent on 8 December 2021.

On 11 January 2022, Minister of International Trade, Export Promotion, Small Businesses and Economic Development Mary Ng, announced a call for proposals for new projects under the Women Entrepreneurship Ecosystem Fund.¹⁶²⁸ CAD25 million was made available for projects that aims "to remove systemic barriers and create more equal access to the resources" to women in business.

On 18 January 2022, Minister of Labour, Seamus O'Regan announced the launch of the 2022 Open Call for Concepts for the Workplace Opportunities: Removing Barriers to Equity (WORBE) program.¹⁶²⁹ The Government of Canada will provide up to CAD3 million annually to make workplaces more representative and inclusive. The WORBE program is designed to help break down barriers to employment in federally regulated workplaces, through funding "the four equity-seeking groups[, one of which includes women,] designated under the Employment Equity Act."

On 19 January 2022, the International Development Research Centre and the Canadian Institutes of Health Research and the Social Sciences and Humanities Research Council proposed a new initiative, anticipated to launch in March 2022, called Women's Health and Economic Empowerment for a COVID-19 Recovery that is Inclusive, Sustainable and Equitable (Women RISE).¹⁶³⁰ It will support a maximum of 20 research teams to conduct action-oriented research on how women's health and their

work (paid or unpaid) intersect and interact with a maximum budget of CAD1 million per grant. It will inform solutions and strategies to improve women’s health and socioeconomic wellbeing during and through recovery from COVID-19.

On 20 January 2022, Minister Ien “announced over CAD8 million for 21 projects to improve the health and wellbeing of women and girls”¹⁶³¹ with the intention to eliminate GBV. It will increase sexual health education while promoting gender equality through addressing harmful gender norms. The Minister granted over CAD450,000 to the Regroupement Naissances Respectées, an organisation that supports gender equality.

On 21 January 2022, Minister Ien announced over CAD14 million to fund 34 projects to support Indigenous women.¹⁶³² The initiative will encourage women empowerment through “improving economic participation, increasing leadership in various sectors, and preventing and eliminating” GBV.

On 24 January 2022, the Parliamentary Secretary to Minister of Veterans Affairs and Associate Minister of National Defence, Darrell Samson, Member of Parliament for Lac-Saint-Louis, Francis Scarpaleggia and Member of Parliament for Dorval—Lachine—LaSalle, Anju Dhillon, announced Veterans Affairs Canada that will provide support to women Veterans and their family members through the Veteran and Family Well-Being Fund, which will total CAD780,000.¹⁶³³

On 27 January 2022, Minister Ien launched a call for proposals to increase frontline Indigenous women and 2SLGBTQQIA+ organisations to address gender-based violence (GBV).¹⁶³⁴ CAD55 million will be funded to help organisations prevent and address the root causes of GBV.

On 2 February 2022, Minister Ng announced a virtual trade mission to Botswana, Senegal, South Africa, Côte d’Ivoire.¹⁶³⁵ The mission is scheduled for 21-24 February 2022, providing opportunities to women-owned and led Canadian businesses in the renewable energy, and information and communications technology sectors.

On 2 February 2022, Minister Ien announced a maximum of CAD7.5 million additional funding for LGBTQ2 Community Capacity Fund, which was launched in 2020.¹⁶³⁶ The Government of Canada will also extend funding for another year. Minister Ien announced that another CAD800,000 will be funded for two LGBTQ2 projects as well.

On 23 February 2022, Minister Ien announced more than CAD1.3 million for three projects to “promote the empowerment of Black women and girls across Canada.”¹⁶³⁷ The projects aim to eliminate the inequalities and provide necessary resources for success. Black Canadian Women in Action is receiving CAD474,095 to strengthen cultural sensitivity training in community organisations; Future Black Female is receiving CAD412,180 “to address the unique challenges” and “create opportunities for Black women;” and Black Women Business Network is receiving CAD489,850 to “identify the root causes of the systemic barriers” in employment.

On 24 February 2022, Minister Ng concluded a virtual trade mission to Botswana, Senegal, South Africa, and Côte d’Ivoire for women-owned and led businesses hosted by the Trade Commissioner Service of Global Affairs Canada and the Canada Africa Chamber of Business.¹⁶³⁸ The four-day mission brought 26 Canadian women entrepreneurs and African business leaders to explore new opportunities in the renewable energy, and information and communications technology sectors.

On 25 February 2022, Marie-Claude Bibeau, Member of Parliament for Compton-Stanstead, on behalf of Minister Ien, announced CAD237,087 for the Corporation de développement communautaire of Haut-Saint-François’s new project to address GBV.¹⁶³⁹ The project will work to identify the root causes of GBV and promote the voices of women and girls on GBV issues in the Haut-Saint-François region.

On 4 March 2022, the National Film Board of Canada (NFB) announced that 60 per cent of all ongoing projects were “directed by women or by teams with equal or greater representation of women than men.”¹⁶⁴⁰ It also allocates 66 per cent of production spending to productions led by women. The NFB achieved gender parity in animation, documentary, and interactive production sectors for the number of productions directed by women and for production budgets allocated to women.

On 7 March 2022, Minister of Justice and Attorney General of Canada David Lametti, and the Minister of Mental Health and Addictions and Associate Minister of Health and Member of Parliament for Toronto – St. Paul’s, Carolyn Bennett, “announced that the Government of Canada is providing financial support to Pro Bono Ontario for a free legal advice hotline for those who have experienced workplace sexual harassment”¹⁶⁴¹ through Justice Canada’s Legal Aid Program. Funding of CAD788,392 over four fiscal years was approved for Pro Bono Ontario starting from 1 April 2021.

On 7 March 2022, Minister of Employment, Workforce Development and Disability Inclusion, Carla Qualtrough, announced 26 projects approved for funding under the Women’s Employment Readiness pilot program.¹⁶⁴² “The pilot program funds organisations to provide and test pre-employment and skills development support for women who face barriers” and “new ways to help employers increase inclusivity in the workplace” across all 13 provinces and territories. It particularly targets racialized women and/or Indigenous women, women with disabilities, women of the LGBTQ2 community and women who have been unemployed for an extended period.

On 8 March 2022, Minister Sajjan announced CAD67.5 million in international assistance for eight projects as a part of Canada’s commitment to put women and girls at the heart of climate action.¹⁶⁴³ The projects “will support women’s leadership and decision making in all aspects of climate change adaptation, mitigation and sustainable natural resource management.” It will support employment and business opportunities in the climate and natural resource sectors, and address the particular needs and challenges of women and girls.

On 8 March 2022, Minister Ng announced the Women Entrepreneurship Loan Fund, the next phase of the CAD6 billion Women Entrepreneurship Strategy. The fund will be distributed to non-profit organisations with existing loan programs to provide additional financing to women entrepreneurs with the focus on start-ups, under-represented groups or sole proprietorships that face greater barriers to finances.¹⁶⁴⁴ Women entrepreneurs are promised to apply for loans of a maximum of CAD50,000 from the chosen organisations.

On 8 March 2022, the Women RISE research initiative was launched. The research will focus on “how women’s health and their work, whether paid or unpaid, intersect and interact in the preparation for, response to and recovery from COVID-19.”¹⁶⁴⁵ It will support a maximum of 20 research teams in low- and middle-income countries to inform solutions and strategies for an equitable COVID-19 recovery. Women RISE undertake the global research priorities identified in the United Nations Research Roadmap for the COVID-19 Recovery.

On 8 March 2022, George Chahal, Member of Parliament of Calgary Skyview, Alberta, on behalf of the Minister Jean-Yves Duclos, announced an investment of CAD886,660 to the University of Calgary to improve access to health programs for Indigenous women and two-spirit persons in Alberta and Saskatchewan.¹⁶⁴⁶ The funding will be used to help implement the Wolf Trail Program Expansion

Project, “a holistic, physical activity-based program designed for Indigenous women.” The project promotes “healthy living and addressing the common risk factors for chronic disease.”

On 8 March 2022, Minister of Labour, Seamus O’Regan Jr., highlighted two projects aiming to remove barriers to employment for Indigenous women.¹⁶⁴⁷ The Native Women’s Association of Canada received CAD386,562 to launch the Addressing Systemic Barriers to Indigenous Women with disabilities’ Economic Security project; and the Women in Leadership Foundation received CAD273,676 for the Indigenous Leadership Circle Project, which explores the barriers that lead to under-representation of Indigenous women in senior management positions in federally regulated workplaces. These projects are funded through the Workplace Opportunities: Removing Barriers to Equity program.

On 16 March 2022, Gary Anandasangaree, Parliamentary Secretary to the Minister of Justice and Attorney General of Canada, and Sean Casey, Member of Parliament for Charlottetown, announced on behalf of the Minister Lametti, that the Government of Canada is providing over CAD1.17 million for two projects in Prince Edward Island to support victims of intimate partner violence and family violence.¹⁶⁴⁸ As women and children are disproportionately victims of such violence, the investment complements efforts of the Government of Canada’s GBV Strategy.

On 16 March 2022, Minister Lametti, and the Executive Director of the Native Women’s Shelter of Montreal, Nakuset, announced funding CAD300,000 over three years through Justice Canada’s Victims Fund to improve access to supports for the families and communities of missing and murdered Indigenous women and girls and 2SLGBTQQIA+ people in Québec.¹⁶⁴⁹ It aims to ensure a “more inclusive and representative justice system that respects the rights of Indigenous peoples, and protects Indigenous women, girls and 2SLGBTQQIA+ people.”

On 28 March 2022, Minister Ng announced a new contribution agreement of CAD4.25 million for the Women Entrepreneurship Knowledge Hub (WEKH).¹⁶⁵⁰ WEKH is one of the pillars of the Women Entrepreneurship Strategy, which is a CAD6 billion program to encourage women’s economic empowerment. The new funding will expand WEKH’s research and its resources to aid women entrepreneurs.

On 6 April 2022, Minister of Crown-Indigenous Relations Marc Miller, announced that the 2021-22 year of The Support for the Wellbeing of Families and Survivors of Missing and Murdered Indigenous Women, Girls and 2SLGBTQQIA+ People Contribution Program has invested over CAD2.5 million

“in 20 Indigenous organizations for healing projects to help families and survivors of missing and murdered Indigenous women, girls and 2SLGBTQQIA+ people.”¹⁶⁵¹

On 6 April 2022, Minister Miller announced CAD1 million funding has been allocated to 17 Indigenous organisations for Indigenous-led projects this year.¹⁶⁵² It aims to “develop methodologies to better understand the issue of violence against Indigenous women, girls, and 2SLGBTQQIA+ people” by improving data collection, analysis and interpretation. The gaps in existing data of other demographic groups will be addressed as well.

On 7 April 2022, the Department of Finance Canada announced Budget 2022, which “introduces new measures to promote a more equitable, more inclusive Canada, and to build communities where everyone is empowered to succeed.”¹⁶⁵³ It aims to address systemic barriers of marginalised communities including women and LGBTQ2 Canadians. It includes: a Federal LGBTQ2 Action Plan that proposes to provide CAD100 million over five years, starting in 2022-23; provision of CAD539.3 million over five years to Women and Gender Equality Canada for the National Action Plan to End GBV; provision of CAD15 million in 2023-24 to Canadian heritage to reflect the diversity of Canadians in news media; provision of CAD40 million to the Canada Periodical Fund starting in 2022-23 to support local and diverse journalism.

On 7 April 2022, the Department of Finance Canada released the 2022 Budget Statement and Impact Report on Gender, Diversity, and Quality of Life.¹⁶⁵⁴ The Report reaffirms the government’s commitment to apply Gender-based Analysis Plus in decision- and policy-making, to ensure that programs and policies are considerate of their impact on people from a variety of perspectives. The budget report supports efforts in reducing literacy gaps, promotes the equal and full participation of women, especially representation of women in the justice systems and leadership. Moreover, the Budget 2022 aims at reducing gender-based violence and harassment, ensuring physical and mental health, including improved access to sexual and reproductive health services, as well as improving infrastructure, such as transit and housing, to ensure the well-being of women.

On 22 April 2022, Minister Sajjan announced CAD40 million additional funding to support the Global Financing Facility’s “Reclaim the Gains” campaign, “bringing Canada’s total contribution to CAD190 million.”¹⁶⁵⁵ The funding will aid “lower-income countries to improve the resilience of their health systems, reverse the impact of COVID-19, and drive long-term improvements for women’s, children’s and adolescents’ health.”

¹⁶⁵¹ Investments under Federal Pathway help healing efforts for MMIWG families and survivors, Crowd-Indigenous Relations and Northern Affairs Canada (Ottawa) 6 April 2022. the memorial's construction. The design includes respect for Indigenous girls, women, and 2SLGBTQQIA+ people according to the Haida principles. This is part of the effort to address "the root causes of violence against Indigenous women, girls, and 2SLGBTQQIA+ individuals."

On 18 September 2022, Minister O'Regan issued a statement recognizing International Equal Pay Day.¹⁶⁸¹ In the statement he highlighted that unequal pay is one of many continuous barriers to women's economic empowerment, their success in the workplace, as well as for the national economic growth. He reiterated the Government of Canada's commitment to closing the pay equity gap through "moving forward with new pay gap reporting measures under the Employment Equity Act," which makes Canada the first country to have publicized pay information for federally regulated workplaces.

On 18 September 2022, Prime Minister Trudeau issued a statement regarding Gender Equality Week, which runs from September 18 until the 24.¹⁶⁸² In his statement, he acknowledges that gender equality is something that Canada still needs to work towards, and that this year's theme is "Equal Rights, Equal Opportunities." To continue to thrive for gender equality, he stated that this year the Government of Canada will be delivering a Canada-wide Early Learning and Child Care system that will help reduce child care costs.

On 21 September 2022, Prime Minister Trudeau announced that Canada will provide CAD1.21 billion to the Global Fund to Fight HIV/AIDS, TB and Malaria; and CAD100 million for the Global Fund's COVID-19 Response Mechanism.¹⁶⁸³ The diseases targeted by the fund are mostly preventable and treatable, but "devastating and deadly diseases that affect the most vulnerable and marginalized, including women and girls who are less likely to have access to life-saving treatments."

Canada has fully complied with its commitment with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has taken actions that address more than 12 SDGs, and the actions demonstrate all three characteristics of sustainable, inclusive, and resilient recovery. It has addressed SDG 10: Reduced Inequalities by taking actions against GBV, as well as protecting female veterans. Initiatives and funding allocated to better protect veterans, indigenous women and the members of the 2SLGBTQQIA+ community addresses SDG 1: No Poverty, SDG 11: Sustainable Cities, and Communities, as well as SDG 16: Peace, Justice and Strong Institutions. SDG 4: Quality Education, SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth and SDG 9: Industry Innovation and Infrastructure by supporting organisations and projects for women in businesses and through nutrition programs, Canada also addresses SDG 2: Zero Hunger. SDG 3: Good Health and Well-Being is addressed by supporting a sustainable recovery from COVID-19 and war, and with their collaborative efforts with other countries across the world, they also addressed SDG 7: Affordable and Clean Energy and SDG 17: Partnership for the Goals. SDG 13: Climate Action is addressed by acknowledging the challenges caused by climate change to women and girls while supporting women working in the climate sector.

Thus, Canada has received a score of +1.

Analyst: Jackie Jiwoo Ko

China: 0

China has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 11 November 2021, Peng Liyuan, a special envoy of the United Nations Educational, Scientific and Cultural Organization called for joint efforts to promote education for women and girls.¹⁶⁸⁴ Peng said that parties should be more determined to promote girls' and women's education, and work together to ensure the fulfillment of education. In 2015, China and UNESCO jointly established the Prize for Girls' and Women's Education. Peng said that China will continue to work with UNESCO to ensure the second phase of the collaboration on the prize is a success.

On 17 December 2021, China's "top legislative body began reviewing a draft amendment to the Women's Rights and Interests Protection Law."¹⁶⁸⁵ This amendment would forbid employers from declaring gender preferences in job postings or ask female candidates about their marital or pregnancy status. Moreover, employers would be required to establish mechanisms to prevent, investigate and respond to sexual harassment complaints.

On 27 December 2021, the All-China Women's Federation and the National Bureau of Statistics jointly released a survey on the Social Status of Women in China.¹⁶⁸⁶ It shows that about 97 per cent of the 30,000 male and female respondents aged 18 to 64 nationwide agreed that women "enjoy a more favourable social environment." In the past decade, women in China have been more involved in economic and social development, with more women moving to secondary industries such as manufacturing and tertiary industries.

On 18 January 2022, China's National Health Commission released work plans to extend women's access to screening services for cervical and breast cancers.¹⁶⁸⁷ The plan aims to expand services to females aged from 35 to 64 in both urban and rural areas. The goal is to cover more than 50 per cent of cervical cancer screening services for eligible women by the end of 2025, while the coverage of breast cancer screening services will increase on a year-by-year basis.

On 3 February 2022, the Beijing Organising Committee for the 2022 Olympic and Paralympic Winter Games published the "Gender Equality Commitment."¹⁶⁸⁸ The committee is committed to promoting Gender Equality and Inclusion initiatives across four pillars: to promote equal participation and gender-equal and fair portrayal, ensure a safe sporting environment for all athletes and participants of the

Olympic Games, promote gender equality in leadership and workforce, and promote equal opportunities right for employees. This document aligns with the “IOC Gender Equality and Inclusion Objectives for 2021-2024.”

On 2 March 2022, the Ministry of Public Security held a teleconference on mobilization and deployment of the national public security organs’ special action to combat the crime of trafficking in women and children.¹⁶⁸⁹ The Ministry of Public Security announced that they were launching a special campaign against the crime of trafficking in women and children from March 1 to December 31. The campaign involves taking multiple measures to attack the crime of trafficking, make every effort to detect accumulated cases, severely punish a group of criminals, rescue a group of abducted women and children, and establish an integrated working mechanism for prevention, combat, rescue and resettlement.

On 30 October 2022, the Government of China passed a new legislation titled “Women’s Rights and Interests Protection Law.”¹⁶⁹⁰ This legislation aims at giving women more protection against gender discrimination and sexual harassment, especially within the workplace. Under this new law, employers will be held accountable if “women’s labour and social security rights and interests are violated.” Moreover, the legislation also “strengthens the protection of the rights and interests of disadvantaged groups such as poor women, elderly women, and disabled women... [as well as] trafficked and kidnapped women.”

China has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has addressed SDG 5: Gender Equality by taking action to promote gender equality and inclusion in sports, SDG 4: Quality Education by promoting education for girls and women, SDG 3: Good Health and Well-Being, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation, and Infrastructure and SDG 11: Sustainable Cities and Communities by extending women’s access to medical services, with a focus on rural communities, and economics by providing more opportunities in secondary and tertiary industries.

Thus, China receives a score of 0.

On 24 December 2021, the government implemented a new legislation, referred to as the Rixain Law, that promotes gender equality within the workplace and the general economy.¹⁶⁹² This law imposes quotas for large corporations with more than 1000 employees to have women representation on the leadership levels of the company. This legislation aims to “counteract gender bias in professional training and higher education,” to promote women’s entrepreneurship, and to raise the quota to 40 per cent by the year 2030, a 15 per cent increase from the 2020 statistics.

On 12 January 2022, the Ministry of Solidarities and Health launched a national strategy against endometriosis, a disease that affects one in ten women.¹⁶⁹³ It is composed of three goals: to understand endometriosis and its causes by establishing a national research program, to establish paths of care within territories and to increase awareness of endometriosis in schools, higher education, workplaces, homes and medical settings to use available treatments.

On 28 January 2022, the French Presidency of the Council of the European Union announced that the EU Member States are joining together to support a stronger economy that stimulates and fosters job creation and social and environmental policies, with gender equality being at the forefront of these efforts and reflected in all aspects of public policy.¹⁶⁹⁴ Member States reaffirmed their commitment to strengthen “the application of the principle of equal pay for equal work or work of equal value between men and women, through pay transparency and enforcement mechanisms in order to improve access to employee information... [and] gender balance on-company boards.”

On 31 January 2022, France, the Czech Republic and Sweden, released a Trio Presidency Declaration on Gender Equality 2022-2023.¹⁶⁹⁵ These European Union Member States “firmly commit [themselves] to promoting gender equality and to [fight] against all forms of discrimination against women at all levels.” The trio presidency will achieve this under the theme of Recovery, especially emphasizing women’s economic empowerment, ensuring equal opportunities for women in all areas of life, as well as fighting against gender-based violence.

On 15 February 2022, Minister of Solidarities and Health Olivier Véran, presided over the first steering committee within the context of the national strategy against endometriosis.¹⁶⁹⁶ The national strategy includes the following priorities over the course of the next four years: to place France as a leader in research and innovation, to guarantee rapid diagnoses and quality access to treatments for women and to communicate and to inform the public of this disease.

On 30 June 2022, the Ministry of Health and Prevention, Ministry of Europe and Foreign Affairs will donate EUR60,000 to Abortions without Borders.¹⁶⁹⁷ This donation aims to facilitate Ukrainian women’s access to abortion procedures.

On 28 September 2022, the Government of France released a statement for International Safe Abortion Day and strongly reaffirmed its continued commitment to protect women’s rights to health, life, and freedom, as well as achieving full gender equality.¹⁶⁹⁸ The statement stressed that France “will continue to relentlessly defend women’s right to bodily autonomy and the recognition of abortion as a fundamental right.”

France has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. By launching its national plan against the prostitution of minors and its national strategy against endometriosis and supporting women’s right to abortion, France targets SDG 3: Good Health and Well-being, SDG 11: Sustainable Cities and Communities, and SDG 16: Peace, Justice and Strong Institutions. France, along with the rest of the EU Member States’, reaffirmation to close the gender pay gaps and ensure a gender balance within the workplace also work toward SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities, and SDG 17: Partnerships for the Goals. These actions also demonstrate all of the three characteristics of a sustainable, inclusive and resilient recovery. However, it has fallen short of the 12 SDGs threshold necessary for full compliance.

Thus, France receives a score of 0.

Germany: +1

Germany has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment.

On 1 November 2021, the Ministry for Economic Cooperation and Development published “Gender Equality in climate policy” to address women’s roles in the mitigation of greenhouse gas emissions and the adaptation to climate change.¹⁶⁹⁹ It addresses the disproportionate impact of climate change to women and women’s roles as agents of change in the following sectors: afforestation, water and food security, transport sector, and energy use and energy security. It concluded that women’s roles in political decision-making led to many advantages in the transition. It also addressed the past contributions of the Federal Ministry for Economic Cooperation and Development to encourage gender equality in climate policies.

On 24 November 2021, the newly appointed German government pledged to alleviate the country's gender pay gap.¹⁷⁰⁰ The government stated that it will support the Europe Union directive on pay transparency that is currently being deliberated. This draft would require employers to publish pay gaps and make efforts to decrease the gap if it is too large, and failing to do so would result in penalties.

On 22 December 2021, “Stronger than Violence” initiative, a part of the action program “Together against violence against women” by the Ministry of Family Affairs, Senior Citizens, Women and Youth, published that it had campaigned active fight against gender-based violence in November 2021.¹⁷⁰¹ The campaign offered important information, resources for help through a QR code, which was freely distributed through the participation of citizens.

On 1 January 2022, the Federal Ministry of Finance issued a G7 Presidency Programme, which states the policy priorities of Germany's G7 Presidency in 2022.¹⁷⁰² “Strengthening gender equality” is stated to be a “key value of the G7's open, inclusive and democratic societies.” It promised to work with the G7 Gender Equality Advisory Council for promotion and development of G7's gender equality goals, especially taking account of intersectionality between gender and other forms of inequalities and discrimination.

On 28 January 2022, Minister of Food and Agriculture, Cem Özdemir, agreed on key aspects during the 14th Berlin Agriculture Ministers' Conference as a part of the Global Forum for Food and Agriculture.¹⁷⁰³ One of the key aspects included “Granting equitable access to agricultural land,” which emphasises that “women, young farmers and indigenous peoples should have access to land.” It is highlighted as an important rule to safeguard food security. The Agricultural Ministers agreed to “support the Voluntary Guidelines on the Responsible Governance of Tenure of Land, Fisheries and Forests issued by the Committee on World Food Security” and its implementation to grant equitable access.

On 28 January 2022, the French Presidency of the Council of the European Union announced that EU Member States are joining together to support a stronger economy that stimulates and fosters job creation and social and environmental policies, with gender equality being at the forefront of these efforts and reflected in all aspects of public policy.¹⁷⁰⁴ Member States reaffirmed their commitment to strengthen “the application of the principle of equal pay for equal work or work of equal value between men and women, through pay transparency and enforcement mechanisms in order to improve access to employee information... ¹⁷⁰⁵ Increase in cases during pandemic. Germany promotes comprehensive anti-FGM strategies, Federal Ministry for Economic Cooperation and Development (Berlin) 4 February 2022. Access Date: 13 May 2022.

<https://www.bmz.de/en/news/press-releases/svenja-schulze-international-day-of-zero-tolerance-against-fgm-104096>

Economic Cooperation and Development is providing EUR37 million to support efforts to fight Gender-based Violence (GBV) with emphasis on FGM. It supports East Africa's regional project for the prevention of FGM by providing EUR5.9 million in Somaliland, Sudan and Ethiopia. It also supports civil society organisations dealing with FGM with EUR2.8 million.

On 4 February 2022, the Federal Ministry for Family Affairs, Senior Citizens, Women and Youth published a Letter of protection against FGM.¹⁷⁰⁶ It “provides information on the criminal liability of” FGM to protect families from the social and familial pressures in their countries of origin, and raise awareness in general. The letter is available in different languages of countries where FGM is prevalent.

On 6 February 2022, Federal Government Commissioner for Human Rights Policy and Humanitarian Assistance, Luise Amtsberg, made a statement denouncing FGM around the world and within the territories of the European Union.¹⁷⁰⁷ In the statement, Commissioner Amtsberg pledged that Germany will “support the Action Coalition on Gender-based Violence and the UN Trust Fund to End Violence against Women with a total of” EUR28.3 million in 2021-22. Commissioner Amtsberg also stated the Federal Government will strengthen preventions of all forms of gender-based violence.

On 17 February 2022, the German government announced that it supports the European Union's proposal of setting a goal to make at least 40 per cent of non-executive company board members to be women.¹⁷⁰⁸ This directive is a significant and crucial step towards achieving greater gender equality in member states where relevant legislation has not been implemented yet, with the emphasis that companies would make better decisions and are more successful if their human resource structure and policy reflects social reality.

On 27 April 2022, the federal cabinet approved the update of the German Stability Programme for 2022, which is provided by the Federal Ministry of Finance.¹⁷⁰⁹ The programme marks its intent to increase labour force participation among women along with older people as a part of its “efforts to increase social inclusion via the labour market” through revising the federal government's Skilled Labour Strategy. The federal government is targeting to increase the statutory minimum wage to EUR12 per hour as a one-off adjustment from 1 October 2022. It will also raise the “minimum income limit for mini-jobs to” EUR520, “which corresponds to 10 weekly working hours on minimum wage;” while raising the minimum income limit for midi-jobs to EUR1,600.

Opportunities. The representatives of W7 will discuss gender equality policy recommendations demands to the G7 during the summit.

On 7 June 2022, a new online platform “YouCodeGirls” officially started, funded by the Federal Ministry for Women.¹⁷¹¹ It is aimed to encourage girls and young women from primary school age to become involved in programming.

On 24 June 2022, German Bundestag, the national parliament of Germany, decided to lift the ban on advertisements for abortions.¹⁷¹² It will allow doctors to provide information about abortion in a personal conversation, and post online whether they perform abortions and their methods.

On 30 June 2022, Federal Family Minister Lisa Paus and Dr. Marco Buschmann presented the cornerstones of the Self-Determination Act.¹⁷¹³ This act is intended to improve life for transgender and intersex people, which will replace the essentially unconstitutional Transsexual Act of 1980.

On 30 June 2022, Federal Ministry for Family Affairs, Senior Citizens, Women and Youth extended the Federal program for immigrant mothers “Strong in the Job”, which aids them in finding employment.¹⁷¹⁴ The program will be extended until the end of 2022, focusing on women from Ukraine. It will ensure that “more than 80 contact points nationwide can continue to place migrant women with family responsibilities in jobs and training.”

On 1 July 2022, Federal Ministry of Finance approved the draft budget for 2023.¹⁷¹⁵ From 2023 to 2026, the Federal Ministry for Family Affairs, Senior Citizens, Women and Youth will have an additional EUR1.5 billion available to strengthen social cohesion.

On 1 July 2022, an evaluation on the effects of the Prostitute Protection Act began.¹⁷¹⁶ The evaluation will be on a scientific basis, accounting for practical application. The completed report will be submitted by July 1, 2025. The evaluation will answer “whether or how the desired goals will be achieved by the introduction of” this law, and “where there may be a need for further regulation.”

On 8 July 2022, Federal Ministry for Equal Opportunities funded the new e-learning program Initiative Free of Clichés.¹⁷¹⁷ It offers careers advice from professionals to young people, decoding people's prejudices and hidden gender role models. It aims to share knowledge on the influence of gender-related role models and guide young people in a way that is impartial from prejudices.

On 11 July 2022, Federal Ministry for Family Affairs, Senior Citizens, Women and Youth updated LGBTI measures, which is used to ensure equality for lesbian, gay, bisexual, transgender and intersex people.¹⁷¹⁸ The update includes a study by the Observatory for Sociopolitical Developments in Europe and plans for legislation. The study will evaluate political measures that protect LGBTIQ persons' equality and from discrimination, which will be published within 2022. Planned legislation includes the replacement of Transsexual Act to a Self-Determination act and establishment of "the basis of a compensation fund for transgender and intersex people who experience bodily harm or a forced divorce due to" Transsexuals Act. Both pieces of legislation are "agreed upon in the Coalition Agreement."

On 12 July 2022, Ferda Ataman was presented as the new Independent Federal commissioner for Anti-Discrimination, who was previously elected as the new head of the anti-discrimination agency in June.¹⁷¹⁹ This contributes to the efforts for women leadership.

On 24 August 2022, Annalena Baerbock, the Foreign Minister, decided that the Federal Foreign Office will join the cliché-free initiative.¹⁷²⁰ It is a part of the effort to support young people study and choose a career free from gender stereotypes in the diverse commitments.

On 7 September 2022, Lisa Paus, Minister of Federal Equal Opportunities, announced legislative measures planned to close the wage gap between men and women in the International Conference, Equal Care and Equal Pay - High time to close the gaps.¹⁷²¹ The measures include: the Management Positions Act and the Pay Transparency Act, Equality Check, and expansion of childcare options and house-hold related services.

On 15 September 2022, the Federal Ministry for Family Affairs, Senior Citizens, Women and Youth updated the LGBTIQ+ policy measures.¹⁷²² The updated policies include development of a National Action Plan and extra counseling resources for sexual and gender diversity. It also outlines planned legislations such as the Self-Determination Act.

Germany has fully complied with its commitment to take strong action that addresses more than twelve SDGs and demonstrates all three characteristics of sustainable, inclusive, and resilient recovery. It has addressed SDG 3: Good Health and Well-Being, SDG 4: Quality Education, and SDG 5: Gender Equality by addressing GBV, FGM, and women employment, and through their collaboration with the European Union and efforts against FGM around the world, Germany has also addressed SDG 17: Partnership for the Goals. SDG8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities, SDG 11: Sustainable Cities and Communities, and SDG 16: Peace, Justice and Strong Institutions were addressed through increasing overall income to increase labour force participation among women. Germany also addressed SDG 1: No Poverty and SDG 2: Zero Hunger by agreeing to grant equitable access to women, young farmers and indigenous peoples. SDG 13: Climate Action and SDG 6: Clean Water and Sanitation is addressed by acknowledging the disproportionate impacts of climate change to women and women's important roles in sectors that involve adaptation to climate change.

Thus, Germany has received a score of +1.

On 25 November 2021, Minister Bonetti met with Marija Pejčinović Burić, the Secretary General of the European Council of Europe.¹⁷³⁸ The meeting held on the International Day for Elimination of Violence against Women and focused on discussed the fight against domestic and international violence on women as well as gender equality that was outlined previously in the Istanbul Convention.

On 3 December 2021, the Italian parliament approved a bill that will tackle gender-based violence, as well as strengthen the systems of surveillance of subjects that have been involved in hate crimes against women. This bill will allow police to take action against suspects of gender-based violence, even if the victim did not report the offense.¹⁷³⁹ Economic support will also be provided to victims as a way to encourage them to report offenses. Mariastella Gelmini, the Regional Affairs Minister, states that this new policy will “decide to set up, for the most serious cases, dynamic protection and supervision which will not affect the freedom of the victim, but at the same time will safeguard her life.”

On 28 January 2022, the French Presidency of the Council of the European Union announced that EU Member States are joining together to support a stronger economy that stimulates and fosters job creation and social and environmental policies, with gender equality being at the forefront of these efforts and reflected in all aspects of public policy.¹⁷⁴⁰ Member States reaffirmed their commitment to strengthen “the application of the principle of equal pay for equal work or work of equal value between men and women, through pay transparency and enforcement mechanisms in order to improve access to employee information ... [and] gender balance on-company boards.”

On 4 February 2022, the Italian Revenue Agency issued Circular No.3/2022 which clarifies tax measures for the 2022 budget, which includes a ten per cent reduction of value added tax rate for feminine hygiene products.¹⁷⁴¹ This will aid in making feminine hygiene products more accessible for more women.

On March 7 2022, the Court of Rome updated Law 164 that recognizes for the first time a person’s gender identity as non-binary in Italy.¹⁷⁴² Now, non-binary people have the legal right to have their gender recognized without a gender-affirming surgery of hormone therapy.

On 8 March 2022, Minister of Foreign Affairs and International Cooperation Luigi Di Maio gave a speech for International Women’s Day reaffirming Italy’s commitment to enforce women’s rights and gender equality.¹⁷⁴³ Further, they promoted the support and commitment of the country in the Ukrainian crisis.

Japan: 0

Japan has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 29 November 2021, Prime Minister Fumio Kishida attended the 65th meeting of the Council for Gender Equality. The aim of the meeting is to discuss the Policy for Women's Empowerment and Gender Equality 2022.¹⁷⁵¹ The four initiatives aim to promote gender equality by ensuring economic independence of women, realizing a society in which women can live with dignity and pride, the expansion of areas for men to engage, and achieve targets set in the Fifth Basic Plan for Gender Equality.¹⁷⁵²

On 1 December 2021, the National Women's Education Center Global Seminar was held on the theme of "Combating Gender-Based Violence: 'Building Back Better' from the Covid-19 Crisis."¹⁷⁵³ This nearly three-week long event presented keynote speakers and reports that spoke on overseas initiatives to promote gender equality.

On 8 March 2022, the Minister of State for Gender Equality, Seiko Noda, gave a speech for International Women's Day.¹⁷⁵⁴ She spoke on the significant impact COVID-19 has had on women in terms of a decline of employment. She reaffirmed Japan's commitment to make improvements in terms of gender equality through "examining concrete policies based on ... women's empowerment, ... the realization of a society in which women live with dignity and pride, ... [and] achieving the goals for the appointment of women."

On 13 May 2022, the South African Minister of Higher Education, Science and Innovation, Dr. Balke Nzimande, launched the Automobile Training and Reskilling in the Post-COVID Economic Recovery for Vulnerable Youth and Women in South Africa Program.¹⁷⁵⁵ This project, while being hosted and advanced in South Africa, is funded by the Government of Japan.

development cooperation projects to address conflict-related sexual violence in Asia. The plan also pledged to participate in the Women, Peace and Security Focal Point Network.

On 2 December 2021, the Ministry of Gender Equality and Family agreed with Sweden's Ministry of Employment to extend the period of Memorandums of Understanding (MOU) to cooperate on international gender equality policies.¹⁷⁶⁰ The MOU was signed on 18 December 2019 to be effective until 17 December 2021.

On 7 December 2021, Minister of Foreign Affairs, Chung Eui-yong, hosted the 2021 UN Peacekeeping Ministerial in Seoul. Chung recognized the importance of promoting the participation of women to make the peacekeeping and peacebuilding operations more inclusive.¹⁷⁶¹ He presented the Korean government's pledge to organize and offer female officer training courses to improve inclusive peacekeeping. The Minister of National Defense, Suh Wook, pledged that Korea will continue to support the performance of women peacekeepers "through close partnerships with the UN and member states."

On 14 December 2021, Minister of Science and Information and Communication Technology Lim Hye Sook, and a delegation from the Ministry and the Embassy visited the American Association for the Advancement of Science (AAAS).¹⁷⁶² Minister Lim discussed women empowerment in STEM and science diplomacy with AAAS by emphasizing the importance of increasing opportunities for women participation.

On 22 December 2021, the Ministry of Economy and Finance reported their plan to "continue with tasks in boosting real economy and keeping prices stable."¹⁷⁶³ The work report includes strengthening incentives for hiring women to provide stronger employment security.

On 20 January 2022, the Ministry of Agriculture, Food and Rural Affairs proposed the annual action plan to nurture female farmers.¹⁷⁶⁴ The plan is a part of the "5-year basic plan to grow farming women in accordance with the Support of Female Farmers and Fishermen Act" enacted in January 2012. The 2022 annual action plan is a part of the 5th plan spanning from 2021 to 2025, which aims to implement the vision of "[realizing] gender equality to ensure a happier life, work and shelter for female agricultural workers." The plan aims to implement 16 policies in four sectors through 43 tasks.

On 21 February 2022, the Ministry of Gender Equality and Family announced that the Exchange of Notes Permitting the Operation of the UN Women Center of Excellence for Gender Equity in the Republic of Korea was signed between the Korean government and UN Women.¹⁷⁶⁵ The Ministry has consulted with UN Women since 2019, and the Exchange of Notes lays the legal basis for the establishment of the Center. The Center will be "the first of its kind to be established in Asia and the first women-related UN office in the Republic of Korea."

On 25 February 2022, the Ministry of Science and ICT [Information and Communications Technology] (MSIT) announced the 2022 Action Plan to Support Women Scientists and Engineers (2022 Action Plan) to enhance women scientists and engineers' capabilities.¹⁷⁶⁶ It will include projects to foster and support women scientists and engineers by innovating the system and culture, and establish support centers. The budget increased by 17.6 per cent compared to 2021.

On 8 March 2022, Korea International Cooperation Agency (KOICA) announced its ongoing projects in developing countries to empower girls and women.¹⁷⁶⁷ It has been "implementing 53 projects related to gender equality in 40 countries," which amounts to USD350 million.

On 23 March 2022, the Ministry of Foreign Affairs released the second Korea-Australia Senior Officials' Policy Dialogue on Our Engagement with Southeast Asia and ASEAN (Association of Southeast Asian Nations).¹⁷⁶⁸ The dialogue included an agreement for the continued collaboration for "the final adoption of the EAS [East Asian Summit] Leaders' Statement on Women's Economic Empowerment, which has been jointly proposed by Korea, Australia and Cambodia."¹⁷⁶⁹

On 30 March 2022, KOICA initiated a four-year Country Partnership Program with Tanzania in the Kigoma Region called the Strengthening Smallholder's Agriculture Value Chain, Gender Equality and Peace in Refugee Hosting Districts.¹⁷⁷⁰ The program aims "to support the Government of Tanzania to achieve Zero Hunger, gender equality, and to maintain peace and security in refugee hosting districts."

On 8 April 2022, MSIT established and finalized the 2022 Action Plan, "which audits the past year's achievements obtained under the 4th Basic Plan to Nurture and Support Talent in Science and Technology"¹⁷⁷¹ from 2021 to 2025. MSIT and related public agencies increased fundings for 2022 to KRW8.843 trillion from KRW5.135 trillion last year to implement four strategies, 14 agendas and 280 projects of the Basic Plan.

On 26 April 2022, the Ministry of Gender Equality and Family announced that the bill for the Act on the Prevention of Stalking and Protection of Victims, etc. passed the Cabinet Meeting.¹⁷⁷² The Ministry plans to have the bill pass the National Assembly within the year. It also increased the budget for free legal support for the victims to KRW3,195 million, increasing KRW254 million from 2021.

On 26 August 2022, the Ministry of Gender Equality and Family announced that free legal services for stalking victims are being expanded to KRW3,195 million this year to support the enforcement of the Act on the Punishment of Stalking Crimes.¹⁷⁷³

Korea has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has addressed SDG 5: Gender Equality by addressing women empowerment and policies, and through their collaboration with Sweden and developing countries like Tanzania, Korea has also addressed SDG 2: Zero Hunger, SDG 16: Peace, Justice and Strong Institution, and SDG 17: Partnership for the Goals. SDG 4: Quality Education, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities, as well as SDG 11: Sustainable Cities and Communities were addressed through strengthening women's employment security and addressing women in peacekeeping efforts and rural areas. However, it has fallen short of the 12 SDGs threshold necessary for full compliance.

Thus, Korea has received a score of 0.

Analyst: Jackie Jiwoo Ko

Mexico: 0

Mexico has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 9 November 2021, the government of Mexico acknowledged the importance of gender equality and human rights for women in combating climate change at the 26th Conference to the Parties of the United Nations Framework Convention on Climate Change.¹⁷⁷⁴ The government of Mexico also promised to present its National Gender and Climate Change Plan for the first three months of 2022.

On 12 November 2021, the government of Mexico and the National Institute for Women presented a plan to stop gender-based violence by preventing forced marriages in the Montaña and Costa Chica regions of Guerrero with the participation of the United Nations Entity for Gender Equality and the Empowerment of Women, the National Commission to Prevent and Eradicate Violence Against Women (CONAVIM) and the National Human Rights Commission.¹⁷⁷⁵ This permanent plan aims to establish state and municipal systems to allow women to access basic services.

On 25 November 2021, the Ministry of Health joined a global campaign by UN Women called 16 days of activism against gender violence.¹⁷⁷⁶ Participation in this campaign aims to guarantee women access to a life without violence by providing Specialized Services for Attention to Violence in the 32 states

of Mexico where victims of gender and sexual violence will be able to access free medical and psychological support, as well as abortion services.

On 25 November 2021, Secretary Adan Augusto Lopez Hernandez affirmed the commitment of the government of Mexico to continue to eradicate violence against women by educating young boys and girls, making transportation and public spaces safe, promoting women's rights, and ensuring the economic autonomy of women.¹⁷⁷⁷

On 30 December 2021, the Ministry of Welfare announced an increase in beneficiaries of welfare programs.¹⁷⁷⁸ Within the beneficiaries, 270,000 working mothers will receive MXN1,600 bimonthly for childcare support.

On 4 January 2022, the government of Mexico announced more resources would be allocated to programs that address gender-based violence as a part of its budget.¹⁷⁷⁹ The budget approved construction of a Justice Center for Women and MXN420 million for subsidies towards shelters for female victims of violence.

On 20 January 2022, the Ministry of Public Education promoted 'Tecnolochicas México,' a series of virtual workshops to promote women in STEM and innovation.¹⁷⁸⁰ The workshops aim to promote gender equity in science and technology fields that are historically male-dominated. These workshops also aim to introduce STEM fields to female high school students.

On 29 January 2022, the Ministry of Welfare announced that working mothers will receive a deposit of MXN1,600 every two months for childcare support and will serve 50,000 beneficiaries.¹⁷⁸¹ The Assistant Secretary of the Ministry of Welfare, María del Rocío García Pérez, stated that this financial support is an act of social justice and aims to close inequality gaps.

On 1 March 2022, the Ministry of Public Education and CONAVIM signed an agreement to confront sexual harassment of women in institutions of higher education with support from the National Institute for Women, the National Council for Science and Technology and the Attorney General's

Office of Mexico City.¹⁷⁸² This agreement aims to prevent, confront and punish sexual violence towards women in higher education.

On 8 March 2022, the Ministry of Health participated in an international virtual forum called “Celebrating the autonomy and empowerment of women and girls” organized by the International Planned Parenthood Federation to discuss unsafe abortions and its health problems and public policies that protect the health of women in Mexico.¹⁷⁸³

On 16 March 2022, the Ministry of Health recognized the importance of the Senate of the Republic’s approval of Convention 190 of the International Labor Organisation, which eliminates violence and sexual aggression in the workplace.¹⁷⁸⁴ This convention makes fundamental advancement towards protecting the rights and safety of women in the workplace, as it deems that any sort of harassment is incompatible with the promotion of decent work and negatively affect workplace and labour relations.

On 4 April 2022, the Ministry of Health, the National Center for Gender Equity and Reproductive Health (CNEGSR), the Program for Social Cohesion in Latin America and CONAVIM hosted an online workshop called ‘Monitoring Tools for Programs aimed at Male Generators of Gender Violence’.¹⁷⁸⁵ The goal of this workshop is to enhance actions against gender violence based on methods used by other countries and to create tools that punish men who participate in gender violence.

On 3 May 2022, the Ministry of Health promoted through the CNEGSR a public health policy to strengthen safe abortion services called Technical Guidelines for safe abortion care in Mexico.¹⁷⁸⁶ The policy aims to align the needs of pregnant women to international quality standards.

On 14 July 2022, the government of Mexico announced the publication of its report of actions carried out in 2021 in compliance with the goals of the National Action Plan following resolution 1325 of the United Nations Security Council on Women, Peace and Security.¹⁷⁸⁷ The actions were divided into four categories per reports of the Secretary General of the United Nations the agenda of Woman, Peace and Security: prevention, participation, protection and relief and recovery. The National Action Plan aims to promote participation on all levels and areas and to make their contributions as actors in construction and maintaining peace more transparent.

On 14 August 2022, Ministry of the Interior announced that it will allocate more than MXN300 million to the Support Program for Women's Experiences in the Federal Entities (PAIMEF) and the Gender Violence Alerts programme.¹⁷⁸⁸ The funding serves to hire specialized personnel to prevent and reduce gender violence. PAIMEF is responsible for hiring professionals, such as lawyers, to help women in lawsuits and cases including the custody of children and divorce, and for providing support those affected by femicide.

Mexico has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. By establishing initiatives to stop gender-based violence in regions of Mexico, promoting STEM industries and career paths to girls and women, protecting women against harassment in the workplace, and giving pensions to women, it has addressed SDG 3: Good Health and Well-Being, SDG 4: Quality Education, SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequality, SDG 11: Sustainable Cities and Communities, SDG 16: Peace, Justice and Strong Institutions, and SDG 17: Partnership for the Goals. These actions also demonstrate all three characteristics of a sustainable, inclusive, and resilient recovery. However, it has fallen short of the 12 SDGs threshold necessary for full compliance.

Thus, Mexico receives a score of 0.

Russia: -1

Russia has failed to comply with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 16 February 2022, the Accounts Chamber of the Russian Federation held a meeting with various representatives from academia.¹⁷⁸⁹ The meeting consisted of discussions between participants on the “main approaches to defining the concepts of gender and inclusivity, practical aspects of theory, the problems of inclusivity and inequality measuring.”

Russia has failed to comply with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. Russia has not taken substantial actions or made collaborative commitments that address more than twelve SDGs, and the actions taken do not demonstrate all three characteristics of sustainable, inclusive, and resilient recovery.

Thus, Russia receives a score of -1.¹⁷⁹⁰

Saudi Arabia: -1

Saudi Arabia has failed to comply with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 25 March 2022, the head of the Social Humanitarian and Cultural Committee of the Kingdom's Permanent Delegation to the United Nations, Sulafa bint Hamid Mousa, spoke at the 66th session of the Commission on the Status of Women, held under the title of "Achieving gender equality and empowerment of all women and girls in the context of climate change, environmental and disaster risk reduction policies and programs."¹⁷⁹¹ She affirmed Saudi Arabia's "keenness to strengthen partnerships and cooperation with the UN and its various bodies at all levels and fields of development and women's empowerment," especially to encourage female participation in these programs and in policy making. Moreover, she called for the strengthening of laws and legislative frameworks that promote women from discrimination.

On 28 September 2022, Saudi Arabia's Small and Medium Enterprises General Authority (Monsha'at) Women Entrepreneurship Department Director, Afnan Ababtain moderated a discussion on regulations and laws that impact women in business within the country.¹⁷⁹² Topics such as the need for further support for women entrepreneurs, equality for women in terms of health care and education, as well as opening up new employment opportunities were covered during the discussion.

Saudi Arabia has failed to comply with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. Saudi Arabia has not taken significant actions or made collaborative commitments that addresses more than 12 SDGs, nor do their actions show all three characteristics of sustainable, inclusive, and resilient recovery.

Thus, Saudi Arabia receives a score of -1.¹⁷⁹³

Access Date: 15 May 2022. <https://www.gov.za/speeches/minister%2%A0blade-nzimande-launches%2%A0automotive-training-and-re-skilling-%2%A0vulnerable-youth-and>

On June 23 2022 South Africa removed COVID-19 rules that made masks mandatory in indoor spaces, limited sized gatherings and travel requirements be limited to a minimum after persevering through South Africa's 5th COVID wave.¹⁸⁰¹

On 18 July 2022 African leaders launched the Education Plus initiative, a moment that will help take action towards keeping adolescent girls in school, going to drastically reduce the female vulnerability to HIV by providing girls in secondary school with lessons that provide them life skills, training and employment and opportunities.¹⁸⁰²

On 27 July 2022, the South African President Cyril Ramaphosa vows for equal pay for Bayna Bayna after AFCON win in Morocco, claiming that "equal pay for equal work you do,"¹⁸⁰³ hoping the minister of finance in the country would also collaborate.

South Africa has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has addressed SDG 1: No Poverty by offering basic income grants, SDG 4: Quality Education by creating victim empowerment programs, SDG 5: Gender Equality and SDG 3: Good Health and Well-Being by passing bills to tackle-gender based violence, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure by providing grants to low income earners and implementing the women in tourism program, SDG 4: Quality Education by launching training and reskilling programs, SDG 10: Reduced Inequalities and SDG 11: Sustainable Cities and Communities by opening police cases for underaged impregnated women, SDG 16: Peace, Justice and Strong Institutions through anti domestic violence initiatives that in turn protect girls within their homes, as well as SDG 17: Partnerships for the Goals by collaborating with other countries. However, it has fallen short of the 12 SDGs threshold necessary for full compliance.

Thus, South Africa has received a score of 0.

Analyst: Giuliana Bertoia-Agredo

Turkey: +1

Turkey has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment.

On 3 November 2021, the Turkish Cooperation and Coordination Agency (TİKA) established a greenhouse garden in the Maputo National Women's Prison in Maputo.¹⁸⁰⁴ The project aimed to promote the professional, social and economic rehabilitation processes of incarcerated women by providing them with vocational training for the agricultural sector.

On 21 March 2022, TİKA in cooperation with Women for Change provided professional equipment to 100 disadvantaged women in Sudan.¹⁸¹⁸ The equipment was for tailoring and the production of both bar and liquid soap. The project provides them with a source of income, and improves their hygiene conditions.

On 18 April 2022, TİKA and the Commercialization Center of Istanbul organized the program “Basic Entrepreneurship Training” for female entrepreneurs who own small-scale businesses in South Africa and Lesotho.¹⁸¹⁹ The program provided 37 female entrepreneurs from different industries with both theoretical training and applied on business plan development and networking. The training aims to support the economic development of partner countries.

On 3 May 2022, TİKA provided 200 Ukrainian families taking shelter in Bosnia Herzegovina with food and hygiene packages.¹⁸²⁰ These packages will support the 200 families who are mostly women and children.

On 18 May 2022, TİKA provided 33 Cameroonian women with theoretical and practical training in professional talents for six months.¹⁸²¹ The courses contributed to women’s socio-economic development in Cameroon.

On 7 June 2022, TİKA and the Turkish Cypriot Chamber of Commerce (KKTO) initiated “Women in the Digital World.”¹⁸²² Women entrepreneurs learned about social media, brand management, graphic design and professional photography. The training helped integrate women into the digital economy as they learned to make their logos at the end of the training and manage a professional social media account.

On 10 June 2022, TİKA supported the Women’s Association “Most,” which operates in Jablanica, Bosnia and Herzegovina, by providing the industrial fruit and vegetable drying oven it needed to increase its production capacity.¹⁸²³ Through donations, TİKA supported the income-generating activities of Bosnian female farmers.

On 20 June 2022, TİKA renovated a gym and events hall in a girls’ orphanage in Tripoli, Lebanon that hosts nearly 150 girls aged 3 to 14.¹⁸²⁴ TİKA also provided various pieces of equipment, including sports and educational materials, to contribute to children’s mental development.

On 4 July 2022, TİKA built a Women's Empowerment Center in Islamabad, Pakistan.¹⁸²⁵ The Women's Empowerment Center will hold vocational training courses on fashion design, sewing-embroidery, and basic and advanced computer skills for widows, orphans and women in poverty.

On 5 August 2022, TİKA opened a packaging workshop and sales office for women producers in Niamey, Niger.¹⁸²⁶ The workshops and sale office allows Nigerian women to receive training on packaging and sales technique, increasing their participation in education and production.

Turkey has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has addressed SDG 1: No Poverty, SDG 2: Zero Hunger, SDG 3: Good Health and Well-Being, SDG 4: Quality Education, and SDG 6: Clean Water and Sanitation by implementing measures that protect and teach women about feminine hygiene, pregnancy, childbirth and post partum. Actions also addressed SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities, SDG 11: Sustainable Cities and Communities, SDG 16: Peace, Justice and Strong Institutions through initiatives that promote the economic inclusion of women, full and productive employment and decent work, and vocational training. Finally, it has addressed SDG 17: Partnership for the Goals by partnering with multiple countries, such as Sudan, Mexico and Colombia, to strengthen the means of implementing initiatives. These actions also demonstrate all three characteristics of a sustainable, inclusive, and resilient recovery.

Thus, Turkey receives a score of +1.

through counselling, violence prevention, education and policies improvements. GBP1.4 million is for the Global Survivors Fund to help support survivors of sexual violence.

On 7 December 2021, the British High Commission and the Commonwealth Parliamentary Association launched the second cohort of the mentorship programme for 35 women parliamentarians in Uganda.¹⁸³⁵ The programme offers one-to-one mentorship support programmes between Ugandan and UK parliamentarians, senior leadership exchanges, and procedure workshops. It aims to empower the beneficiaries to effectively carry out their parliamentary duties and promote gender equality in any leadership agenda.

On 15 December 2021, the Yemen Conflict, Stability and Security Fund (CSSF) team invited bids for projects that increase women's political participation and inclusion in peacebuilding processes.¹⁸³⁶ CSSF supports the UK National Action Plan on Women Peace and Security and the Yemen Gender Strategy. Selected projects will influence formal and informal political structures in Yemen by identifying and tackling areas of support needed to encourage partisan and nonpartisan women political actors.

On 23 December 2021, the Department of Health and Social Care published the Vision for Women's Health Strategy for England.¹⁸³⁷ Based on an analysis of 100,000 responses to call for evidence, the publication outlines a mandate to improve women's health and systemic inequality. The government will appoint a Women's Health Ambassador to facilitate commitments in the vision.

On 28 January 2022, Foreign Secretary Liz Truss pledged GBP97 million of emergency UK aid to the Afghan people to provide life-saving food and emergency health support, as well as water and sanitation facilities.¹⁸³⁸ The funds are also for assistance to survivors of gender-based violence and essential child protection services. This pledge builds on the previous one announced on 12 December 2021 of GBP75 million.

On 21 February 2022, UK Minister for Africa, Vicky Ford, announced that GBP74 million will be allotted for women entrepreneurs and women owned businesses and small and medium enterprises (SMEs).¹⁸³⁹ The financial package will be delivered through a new financing facility between First Bank of Nigeria and British International Investment to promote access to financial inclusion. The facility also includes a technical assistance programme to further develop the bank's ability to support the growth of female-led businesses.

On 7 March 2022, Work and Pensions Secretary, Thérèse Coffey, completed the ratification process for the International Labour Organisation's Violence and Harassment Convention.¹⁸⁴⁰ This Convention is the first international treaty to "recognise everyone's right to a workplace free from violence and harassment, including gender-based violence and harassment." The UK government will also introduce a new duty to require employers to prevent workplace sexual harassment, explicit protections for employees from third party harassment and a statutory Code of Practice on sexual harassment and harassment in the workplace.

On 8 March 2022, Minister for Women Deborah Stedman-Scott launched two initiatives to level up employment opportunities for women while aiding recovery from the COVID-19 pandemic.¹⁸⁴¹ The first initiative is a pilot scheme to improve pay transparency in job application processes without the disclosure of an applicant's salary history. The second initiative help women back into science, technology, engineering and maths (STEM) careers. These initiatives aim to close salary gaps and tackle pay inequality for women.

On 8 March 2022, the UK Intellectual Property Office and other countries' intellectual property offices released a joint statement outlining their commitment to support women in developing, commercialising, and distributing their innovations and creative works.¹⁸⁴² The statement recognizes the importance of reaching gender equality throughout economies for a more sustainable future.

On 8 March 2022, Prime Minister Boris Johnson launched a new GBP20 million global partnership with 11 businesses to improve girls' access to education and employment in developing countries.¹⁸⁴³ The partnership will support programmes with a focus on STEM skills needed in key sectors and the GenU's Passport to Earning platform that provide education for future employment and entrepreneurship opportunities.

On 8 March 2022, the British Embassy Kyiv accepted project proposals on women's rights for the 2022 to 2023 financial year from not-for-profit organisations.¹⁸⁴⁴ In response to the conflict between Russia and Ukraine, the United Kingdom is seeking to strengthen its contribution to the Women, Peace and Security agenda through proposed projects.

On 30 March 2022, Home Secretary Priti Patel launched a new Tackling Domestic Abuse Plan that was developed with input from victims and survivors.¹⁸⁴⁵ The plan aligns closely to the Tackling Violence Against Women and Girls Strategy and sets priorities on crime prevention, victim support and pursuing perpetrators. The plan outlines an investment over three years of GBP81 million for

tackling perpetrators and GBP7.5 million to enable healthcare professionals to better identify, refer and support victims and survivors of domestic abuse.

On 6 April 2022, the Defence Science and Technology Laboratory partnered with Women in Data to create a more inclusive workplace and address the gender imbalance in science, technology, engineering and mathematics.¹⁸⁴⁶ This partnership will also help recruitment opportunities reach other underrepresented groups in science and technology.

On 3 May 2022, Foreign Secretary Liz Truss and other foreign ministers at the Global Partnership for Action on Gender-Based Online Harassment and Abuse signed a joint statement to call attention to the violence that women journalists and media workers face.¹⁸⁴⁷ This multilateral statement urged “all states, media companies, workplaces, technology platforms and civil society groups” to prevent and address offline and online discrimination against women in journalism to defend their freedom of expression and an inclusive mediascape.

On 5 May 2022, Foreign Secretary Liz Truss announced GBP45 million in UK funding for the UN and humanitarian organisations to protect the most vulnerable in Ukraine.¹⁸⁴⁸ Of the package, GBP15 million is for the UN Ukraine Humanitarian Fund to help address sexual and gender-based violence through targeted services, legal support and crisis accommodation. Another GBP15 million is for UNICEF to fund the protection and services for vulnerable groups, such as nutrition support for pregnant women. Funding of GBP10 million is for humanitarian organisations in Moldova and other border countries to protect the basic needs of women and children fleeing the conflict. GBP5 million is for the International Federation of the Red Cross in Ukraine to deliver life-saving assistance, from health care to sexual and gender-based violence services to tackle discrimination, safeguarding and trafficking.

On 13 May 2022, the Department of Health and Social Care opened applications for grants of between GBP200,000 and GBP600,000 per applicant for the voluntary, community and social enterprise sector to support women who experience reproductive issues in their remain or return to the workplace.¹⁸⁴⁹ Projects that provide training and awareness for small and medium enterprises that lack internal support for women are particularly encouraged. This funding aims to reduce the pressure on the National Health Service by supporting the well-being of women employees.

On 24 May 2022, the Department for Education and Home Office launched a new working group dedicated to tackling the number of spiking attacks against students.¹⁸⁵⁰ The working group will test solutions such as drink safety test strips and funding and delivering bystander intervention training to staff in night-time city venues. Home Office Minister for Safeguarding Rachel Maclean today met

victims, campaigners, senior police officers and university leaders to discuss the patterns of attacks and the best way to proceed in strengthening victim's rights in sexual crimes.

On 25 May 2022, the British High Commission Dhaka supported girls' education across Bangladesh at its annually hosted Queen's Birthday Party.¹⁸⁵¹ The sponsorship raised for the event is directed to the British Council's English and Digital for Girls' Education Programme. It aims to improve life-skills for marginalized adolescent Bangladeshi girls and to provide them with self-protection against child marriage, cyber bullying and gender-based harassment.

On 26 May 2022, Minister for Women and Equalities Liz Truss launched the 'Taskforce on Women-Led High-Growth Enterprises' with Anne Boden, the CEO and founder of Starling Bank.¹⁸⁵² The taskforce will support women entrepreneurs through offering them access to finance and growth capital, technology and leadership development. It strives to increase the number of women-led fast-growing businesses through its influence on high growth investors and the wider business community.

On 7 June 2022, the Ministry of Justice announced that non-fatal strangulation as an attempt to control or induce fear will face up to 5 years of sentencing. Non-fatal strangulation is now a specific offence in the Domestic Abuse Act, applicable to British nationals abroad as well.¹⁸⁵³

On 13 June 2022, the Office for Students announced that it will be the provider of up to 2,000 government-funded scholarships to advance digital skills in AI and data science. The funding amounts to a total of GBP 23 million and will be available for women in STEM among other disadvantaged demographics.¹⁸⁵⁴

On 25 June 2022, Prime Minister pledged GBP 217 million for three major education projects across the Commonwealth. GBP 60 million of the pledge will contribute to the Girls in Rwanda Learn programme to improve Rwanda's quality of education. The GOAL's Action for Learning Project will receive up to GBP 130 million to reduce barriers and schooling costs for girls in Pakistan. The remaining GBP 27 million will go toward the Data for Foundational Learning Programme for global education data gathering. These projects are part of the UK's initiative to get 40 million more girls into school by 2026.¹⁸⁵⁵

On 4 July 2022, the Department for Levelling Up, Housing and Communities announced all new public buildings to have separate male and female toilets. Universal washrooms should be provided but not at the expense of female toilets. This approach addresses safety concerns from women with privacy and other concerns.¹⁸⁵⁶

On 8 July 2022, Home Office published the Domestic Abuse Act 2021 statutory guidance. The Act ensures frontline support has the necessary tools and information to meet victims' individual needs and introduces a statutory definition that recognizes all forms of domestic abuse.¹⁸⁵⁷

On 20 July 2022, the Department of Health and Social Care published the first government-led Women's Health Strategy for England to tackle the gender health gap. The strategy aims to provide a new investment of GBP 10 million for a breast screening programme, commit to new research and data gathering, improve fertility services, and ensure women have access to high-quality health information.¹⁸⁵⁸

On 25 July 2022, the Home Secretary announced GBP 50 million for communities across England and Wales to prevent violence against women and girls in public, neighbourhood crime and anti-social behaviour. The fund is awarded to more than 100 projects to implement more CCTV and streetlights in their communities.¹⁸⁵⁹

On 23 August 2022, the UK announced GBP 37.65 million to provide people in Mali, Burkina Faso, Chad, Nigeria and Niger with urgent humanitarian assistance. Within that fund, GBP 19.9 million will support the Sahel Humanitarian Assistance and Protection Programme to help displaced and malnourished women and children.¹⁸⁶⁰

On 23 August 2022, the Department of Health and Social Care announced that women in England and Wales will be able to permanently access early medical abortions at home from 30 August. The access will be via teleconsultation and it is limited to gestation under 9 weeks and 6 days. This ensures that abortion services will continue to be available to women across the country.¹⁸⁶¹

On 1 September 2022, the Ministry of Justice announced an investment of GBP 21 million in women's services to tackle and prevent the root cause of female offending. A further GBP 3.6 million will be allocated to help local services to work more closely together to financially or mentally support female offenders.¹⁸⁶²

On 1 September 2022, the UK government announced humanitarian support of up to GBP 15 million to help Pakistan's flood response. A portion of that fund will go to international aid agencies in helping the protection of women and girls.¹⁸⁶³

On 26 September 2022, the Government delivered its pledge to roll out pre-recorded evidence across every Crown Court in England and Wales. This measure helps victims avoid the stress of a live cross-examination and maintains the defendant’s right to a fair trial. This pledge is part of the Government’s Rape Review Action Plan, which aims to better support victims and boost rape convictions.¹⁸⁶⁴

On 4 October 2022, the UK Ambassador to the General Assembly, Richard Croker delivered a speech on the progress of gender equality in the UK.¹⁸⁶⁵ In his speech, he discussed the UK is committed to support women and girls in three areas: educating girls, empowering women and girls, and ending gender based violence.¹⁸⁶⁶

On 19 October 2022, the United Kingdom, alongside 70 other countries, co-led and co-signed a cross-regional joint statement on sexual and reproductive health and rights and gender equality.¹⁸⁶⁷ In this statement, Minister Ford states that the United Kingdom will “work tirelessly together [with 71 of our partners from across the globe] to advance gender equality and support the human rights of all women and girls everywhere.”

The United Kingdom has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has addressed SDG4: Quality Education and SDG 17: Partnership for the Goals by partnering with the private sector to improve girls’ access to education. It has addressed SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities and SDG 11: Sustainable Cities and Communities by monitoring women’s workplace representation, increasing pay transparency and preventing workplace harassment. It also addressed SDG 16: Peace, Justice and Strong Institution by launching the leadership program for Ugandan Women Parliamentarians and initiating projects to increase women’s political inclusion in Yemen’s peacebuilding processes. It addressed SDG 13: Climate Action and SDG 12: Responsible Consumption and Production, while advancing women empowerment through its funding announced at COP26. Its published Vision for Women’s Health Strategy for England and efforts to improve access to feminine hygiene also addresses SDG 3: Good Health and Well-Being and SDG 6: Clean Water and Sanitation. The UK’s actions for Afghan women also address SDG 1: No Poverty and SDG 2: Zero Hunger.

Thus, the United Kingdom receives a score of +1.

United States: 0

The United States has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 4 November 2021, the United States Government launched the First National Strategy on Gender Equity and Equality.¹⁸⁶⁸ The Gender Strategy provides a comprehensive whole-government approach that called on each federal agency to develop concrete plans for implementation. IT also reaffirms the United States' commitment to "enable the full potential of all individuals, regardless of their sex ... gender identity or expression."

On 11 November 2021, The US Agency for International Development (USAID) Administrator Samantha Power met with Kosovo President Vjosa Osmani where they reaffirmed the partnership between the United States and Kosovo.¹⁸⁶⁹ During the meeting, they discussed topics such as the advancement of women empowerment including addressing gender-based violence and the importance of creating economic and employment opportunities for women.

On 3 December 2021, the White House released an updated National Action Plan to Combat Human Trafficking.¹⁸⁷⁰ USAID has invested more than USD340 million in 83 countries and regions to fight human trafficking.

On 6 December 2021, USAID Administrator Power met with Nobel Peace Prize Laureate Malala Yousafzai to discuss USAID's support to global girls' education.¹⁸⁷¹ They discuss opportunities to advance gender equity and equality, increase girls' education and leadership of girls. Additionally, they focused on education access for women and girls in Afghanistan.

On 7 December 2021, USAID Administrator Power announced that the United States government has intended to invest up to USD11 billion over three years to combat malnutrition in women and children.¹⁸⁷² The initiative included programs to promote exclusive breastfeeding, and improve nutrition and health outcomes for mothers and newborns.

On 11 January, USAID announced the US government's initial contribution of more than USD308 million in humanitarian assistance for the people of Afghanistan.¹⁸⁷³ The contribution is committed to

providing aid to women, girls, minority populations and people with disabilities. Aid included food and nutrition assistance, support for health care facilities and mobile health teams.

On 13 January 2022, USAID launched the MujerProspera (WomanProsper) Challenge which is aimed to advance gender equity and equality in El Salvador, Guatemala and Honduras.¹⁸⁷⁴ The regional challenge is expected to issue up to 14 awards, each valued between USD150,000 and USD500,000. The challenge is focused on seeking solutions that advance women's economic security, employment and/or entrepreneurship.

On 21 January 2022, USAID Administrator Power, on day two of her trip to Bosnia and Herzegovina spoke to a group of young women on issues such as insecurity, lack of economic opportunity and barriers to future employment.¹⁸⁷⁵

On 31 January 2022, USAID Administrator Power and Tuskegee University President Charlotte Morris signed a Memorandum of Understanding in order to promote diversity, equity and inclusion in the international development workforce.¹⁸⁷⁶

On 6 February 2022, USAID Spokesperson Rebecca Chalif announced that the USAID reaffirmed their commitment to ending human rights abuse and gender inequalities such as female genital mutilation and cutting.¹⁸⁷⁷ This announcement came on the International Day of Zero Tolerance for Female Genital Mutilation.

On 10 February 2022, the Women's Bureau from the U.S Department of Labor announced that they will host a webinar on 18 February 2022 addressing "Advancing Equity for African-American Women in the Workforce."¹⁸⁷⁸ The webinar will include discussion on federal resources available to assist Black women in obtaining better job skills, building careers and exploring avenues to business ownership.

On 11 February 2022, USAID's Harry T. Moore Chapter of Blacks in Government and Office of Civil Rights and Diversity hosted "The Maternal Mortality and Morbidity Crisis: A Priority for Black America."¹⁸⁷⁹ The panel included discussions on factors leading to disparities in health outcomes among marginalised groups and suggested ways of alleviating the crisis.

On 28 February 2022, USAID Deputy Administrator Isobel Coleman met with UN Women's Executive Director Sima Sami Bahous to recommit to empowering women and girls globally.¹⁸⁸⁰ They discussed their renewed partnership to tackle gender inequity in the climate crisis, humanitarian disasters, access to education and employment opportunities.

On 8 March 2022, President Biden issued the largest USD2.6 billion budget request to advance gender equity and equality worldwide.¹⁸⁸¹ These investments aim to increase access to education for girls, decrease gender-based violence and help women advance in the workforce. These efforts help promote political stability and economic growth.

On 1 April 2022, the U.S. government announced a ten-year U.S. Strategy to Prevent Conflict and Promote Stability in partnership with Haiti, Libya, Mozambique, Papua New Guinea, and a grouping of Coastal West African countries comprised of Benin, Côte d'Ivoire, Ghana, Guinea and Togo.¹⁸⁸² The Strategy outlines government commitments to foster peace and long-term stability through integrated diplomacy, development, and security-sector engagement. It builds upon progress towards U.S. Strategy on Women, Peace, and Security in advancing gender equality.

On 25 April 2022, Administrator Samantha Power and Honduran Minister of Foreign Affairs Enrique Reina discussed shared priority to address the root causes of irregular migration, including by creating economic opportunities, strengthening democratic governance, and addressing violence against women.¹⁸⁸³

On 13 May 2022, USAID Deputy Administrator for Policy and Programming Isobel Coleman announced USD5.6 million to support the Government of Laos to advance their education and economic growth goals in recovery from the COVID-19 pandemic.¹⁸⁸⁴ The funding includes a USD3 million grant to the World Bank's multi-donor fund, in partnership with Australia, Ireland, and the Ministry of Industry and Commerce, to support micro, small, and medium enterprises, including women-owned businesses. The funds aim to create opportunities for increased and sustainable wages.

On 15 July 2022, the White House hosted the fourth convening of the Trilateral Working Group on Violence against Indigenous Women and Girls with the governments of Mexico and Canada. The three governments discussed initiatives to advance prevention efforts, increase support for survivors, and address root causes that increase the Indigenous community's vulnerability to gender-based violence.¹⁸⁸⁵

On 18 July 2022, the Departments of Defense and Homeland Security, the U.S. Agency for International Development and the Department of State released the second Report on the Implementation of the 2019 U.S. Strategy on Women, Security, and Peace (WPS). The report evaluated the Department of State's Implementation of 2019 U.S. Women Peace and Security Strategy, ensuring annual progress towards including women in global peace and security.¹⁸⁸⁶

On 25 August 2022, the President of the United States proclaimed August 26th as Women's Equality Day to commemorate the movement for universal suffrage, the ratification of the 19th amendment, and to renew US's commitment to advancing gender equity and women's rights.¹⁸⁸⁷

On 14 September 2022, USAID Administrator Samantha Power and Dominican Republic President Luis Abinader discussed shared priorities and future opportunities to deepen the U.S.-Dominican partnership, including the support for women-owned businesses.¹⁸⁸⁸

On 20 September 2022, the Secretary of State, Antony Blinken, launched the Alliance for Afghan Women's Economic Resilience (AWER).¹⁸⁸⁹ AWER is a "new public-private partnership between the Department of State and Boston University that aims to catalyze business, philanthropic, and civil society commitments to advance Afghan women's entrepreneurship, employment, and educational opportunities in Afghanistan and third countries."

On 22 September 2022, Department of State held a briefing discussing efforts to combat gender-based violence, as well as promote women's economic empowerment.¹⁸⁹⁰ The briefing was attended by Katrina Fotovat, a senior official of the State Department's Office of Global Women's Issues.

On 29 September 2022, the United States co-chaired the inaugural Association of Southeast Asian Nations (ASEAN)-United States Ministerial Dialogue on Gender Equality and Women's Empowerment.¹⁸⁹¹ During this event, both parties demonstrated their continued commitment to promote gender equality and women and girls' empowerment in Southeast Asia.

The United States has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. They have addressed SDG 1: No Poverty, SDG 2: Zero Hunger, SDG 3: Good Health and Well-Being by creating programs that address malnutrition and maternal health. Actions addressed SDG 4: Quality Education, SDG 5: Gender Equality and SDG 13: Climate Action by repeatedly promoting and investing in programs that advance women's access to education, especially concurrently with the current climate crisis. SDG 8: Decent Work and

Economic Growth, SDG 9: Industry, Innovation and Infrastructure, SDG 10: Reduced Inequalities and SDG 16: Peace, Justice and Strong Institutions were addressed by providing financial and humanitarian aid to countries that suffer from gender inequities in their government, healthcare and education. Finally, SDG 17: Partnership for the Goals through ample international partnerships and initiatives. However, it has fallen short of the 12 SDGs threshold necessary for full compliance.

Thus, the United States receives a score of 0.

Analysts: Tanmaya Ramprasad and Serena Honekin

European Union: +1

The European Union has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of women empowerment.

On 25 November 2021, the EU Delegation to Ukraine, the Council of Europe Office in Ukraine, and many other EU embassies reaffirmed their “to defending the rights of women and girls in Ukraine to live free from violence,”¹⁸⁹² in the observance of the International Day for Elimination of Violence Against Women. This was done also to accompany the annual international 16 Days of Activism Against Gender-Based Violence Campaign.

On 30 November 2021, the committees on Civil Liberties and Women’s Rights called for legislation to address gender-based cyberviolence.¹⁸⁹³ They requested this legislation to create a common criminal law definition of gender-based cyberviolence, consequences for those committing it and a reparation and preparation plan for victims.

On 6 December 2021, the Employment, Social Policy, Health and Consumer Affairs Council reached a draft of a directive on pay transparency and a conclusion on the impact of artificial intelligence on gender equality in the labour market.¹⁸⁹⁴ The directive on pay transparency is supposed to help close the gender pay gap by enforcing the right to equal pay, and the conclusion on the impact of artificial intelligence on gender equality in the labour market suggests a need for a gender perspective be adopted in artificial intelligence, to improve gender equality.

On 25 January 2022, Elisabeth Moreno, Minister Delegate for Equality between Women and Men, Diversity and Equal Opportunities, stated that the French presidency would work towards completing policies regarding pay transparency and women’s presence on company boards.¹⁸⁹⁵

On 27 January 2022, the European Parliament announced that they will host “Afghan Women Days” on 1 February and 2 February 2022.¹⁸⁹⁶ These days will give Afghan women leaders a platform to spread awareness of what is happening to women in Afghanistan.

On 28 January 2022, the French Presidency of the Council of the European Union announced that the EU Member States are joining together to support a stronger economy that stimulates and fosters job creation and social and environmental policies, with gender equality being at the forefront of these efforts and reflected in all aspects of public policy.¹⁸⁹⁷ Member States reaffirmed their commitment to strengthen “the application of the principle of equal pay for equal work or work of equal value between men and women, through pay transparency and enforcement mechanisms in order to improve access to employee information ... [and] gender balance on-company boards.”

On 31 January 2022, France, the Czech Republic and Sweden, released a Trio Presidency Declaration on Gender Equality 2022-2023.¹⁸⁹⁸ These European Union Member States “firmly commit [themselves] to promoting gender equality and to [fight] against all forms of discrimination against women at all levels.” The trio presidency will achieve this under the theme of Recovery, especially emphasizing women’s economic empowerment, ensuring equal opportunities for women in all areas of life, as well as fighting against gender-based violence.

On 10 February 2022, the European Union, the Government of Nepal and the Government of Finland worked together to provide access to safe water and basic sanitation to the entire population of the Karnali and Sudurpashchim provinces in Nepal.¹⁸⁹⁹ This will help women with their personal menstruation hygiene, as well as help the communities overcome cultural beliefs that stigmatize the female body.

On 8 March 2022, the European Union released the 2022 Report on Gender Equality in the EU.¹⁹⁰⁰ This report builds on top of the European Commission’s Gender equality Strategy 2020-2025 and “focuses on key actions and achievements on gender equality by EU institutions and Member States.” The key areas of the report cover women being free from violence and stereotypes, thriving in a gender-equal economy, leading equally throughout society, having access to gender mainstream and funding, and finally, promoting gender equality and women’s empowerment across the world.

On 8 March 2022, the Commission adopted a legislative proposal to combat violence against women and domestic violence.¹⁹⁰¹ The proposal takes a comprehensive approach by first of all proposing EU-

level harmonisation of a limited amount of crimes amounting to violence against women on the basis of Article 83(1) TFEU. It further introduces measures of protection and access to justice, support of victims, prevention and coordination and cooperation mainly on the basis of Article 82(2) TFEU. It includes new rules regarding “criminalisation of rape, female genital mutilation, and cyber violence; safe reporting and risk assessment procedures; respect for victims privacy in judicial proceedings and right to compensation; support for victims through helplines and rape crisis centres; and Better coordination and cooperation.”¹⁹⁰²

On 8 March 2022, the European Commission’s Joint Research Centre presented an online monitoring portal supporting the implementation of the Gender Equality Strategy 2020 – 2025.¹⁹⁰³ It aims to help in the increasing female labour market participation and economic independence of women and men; reducing the gender pay, earnings and pension gaps and thus fighting poverty among women; promoting equality between women and men in decision-making; combating gender-based violence and protecting and supporting victims; and promoting gender equality and women's rights across the world.”¹⁹⁰⁴ The Portal supports policymakers and enhances public scrutiny on the progress made on the implementation of the Strategy.¹⁹⁰⁵

On 20 May 2022, the Committee of Ministers recommended that member states protect the rights of “migrant, refugee and asylum-seeking women and girls,”¹⁹⁰⁶ based on the commitment of the states to human rights and democracy.

On 7 June 2022, the Europe Union, with joint efforts with the Council of Europe, held the second steering committee meeting for the action “Fostering Women’s Access to Justice in Türkiye.”¹⁹⁰⁷ Small grants were given out at this meeting to upcoming projects that aim to increase women’s legal literacy and awareness, especially for women who are refugees or victims of abuse and violence.

On 7 June 2022, a political agreement was reached between the European Parliament and the Council on the Directive on improving the gender balance among non-executive directors of listed companies proposed by the Commission in 2012.¹⁹⁰⁸ The Directive sets a target for EU companies listed on the EU stock exchanges to accelerate the reach of better gender balance. It sets a “share of 40 per cent of the underrepresented sex among non-executive directors and 33 per cent among all directors.”

On 14 June 2022, the European Union and the Council of Europe jointly held the second multi-stakeholder meeting on “Fostering Women’s Access to Justice in Türkiye.”¹⁹⁰⁹ At this meeting, participants noted key challenges faced by women in accessing justice and aimed to create local and sustainable support networks that alleviate the obstacles women face. An emphasis was placed on increasing the gender sensitivity of legal aid services as well as improving women’s access to these services to enhance legal awareness and literacy.

On 7 September 2022, the Commission presented the European Care Strategy.¹⁹¹⁰ It takes a comprehensive approach to care and addresses both carers and care receivers’ needs over the course of life. It will highlight the gender dimension of care and stress the key role of access to high quality and affordable care services in ensuring that working women and men can combine work and care responsibilities and in closing the gender employment gap.

On 24 October, the European Institute for Gender Equality (EIGE) published the Gender Equality Index 2022.¹⁹¹¹ This year’s thematic focus was “the COVID-19 pandemic and care.” The Gender Equality Index is a tool to measure the progress of gender equality in the EU, developed by EIGE. It gives more visibility to areas that need improvement and ultimately supports policy makers to design more effective gender equality measures.

The European Union has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance of women empowerment. It has addressed SDG 11: Sustainable Cities and Communities and SDG 16: Peace, Justice and Strong Institutions through protecting women’s rights and supporting peace, SDG 10: Reduced Inequalities through working towards equality in the labour market, SDG 8: Decent Work and Economic Growth and SDG 9: Industry, Innovation and Infrastructure in promoting the impact artificial intelligence has on gender equality in the labour market. Furthermore, the “Afghan Women Days” initiative also helped promote SDG 17 by raising awareness of global gender issues. The EU also addressed SDG 4: Quality Education through improving women’s legal awareness and literacy and SDG 3: Good Health and Well-Being and SDG 6: Clean Water and Sanitation through working towards attaining good health and access to clean water for women. The EU’s collaborative actions with other nations of the world also address SDG 17: Partnership for the Goals, and all of the actions mentioned work together in addressing SDG 5: Gender Equality. Lastly, the EU addressed SDG 1: No Poverty with the launch of its online monitoring portal for the Gender Equality Strategy 2020-2025. The EU’s actions also touch on all three characteristics of sustainability, inclusivity, and resiliency. It has therefore met the 12 SDGs threshold necessary for compliance.

Thus, the European Union receives a score of +1.

Background

On 31 October 2021, the G20 Rome Leaders' Declaration reaffirmed their commitment to “support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of nationally owned strategies.”¹⁹¹²

The international community, including G20 leaders, has long been concerned with sustainable, inclusive development. On 25 September 2015, the 2030 Agenda for Sustainable Development was adopted at the United Nations Sustainable Development Summit.¹⁹¹³ This Agenda included 17 SDGs and 169 targets that seek to build on the Millennium Development Goals (MDGs) and complete what they did not achieve. These goals and targets recognize that poverty is the greatest challenge facing the international community and the eradication of poverty is a requirement to achieving sustainable development.

¹⁹¹² G20 Rome Leaders' Declaration, G20 Information Centre (Toronto) 31 October 2021. Access Date: 4 December 2021. <http://www.g20.utoronto.ca/2021/211031-declaration.html>

¹⁹¹³ Transforming our world: the 2030 Agenda for Sustainable Development, United Nations' Department of Economic and Social Affairs (New York) 25 September 2015. Access Date: 4 December 2021. <https://sdgs.un.org/2030agenda>

At the 2008 Washington, D.C. Summit, G20 leaders reaffirmed the importance of the MDGs and “urged both developed and emerging economies to undertake commitments consistent with their capacities and roles in the global economy” amid the economic crisis which occurred that same year.¹⁹¹⁴

At the 2009 London Summit, G20 leaders reaffirmed their commitment to the MDGs and to lay the foundation for a “fair and sustainable” world economy. At the same summit, G20 leaders recognized that the economic crisis at the time had a “disproportionate impact on the vulnerable in the poorest countries” and the G20’s collective responsibility to “mitigate the social impacts [of the crisis] to minimize long-lasting damage to global potential.”¹⁹¹⁵

At the 2009 Pittsburgh Summit, G20 leaders reaffirmed their commitment to the MDGs and launched the Framework for Strong, Sustainable, and Balanced Growth, to “promote balanced and sustainable economic development in order to narrow development imbalances and reduce poverty.”¹⁹¹⁶

At the 2010 Toronto Summit, G20 leaders identified actions needed to achieve the MDGs by 2015 through the September 2010 Millennium Development Goals (MDG) High Level Plenary. G20 leaders also highlighted that “narrowing the development gap and reducing poverty are integral to [the G20’s] broader objective of achieving strong, sustainable and balanced growth and ensuring a more robust and resilient global economy.”¹⁹¹⁷

At the 2010 Seoul Summit, G20 leaders committed to making a “tangible and significant difference in people’s lives, including through the development of infrastructure in developing countries” by reaffirming the continued commitment to MDGs and the Seoul Development Consensus for Shared Growth.¹⁹¹⁸

At the 2011 Cannes Summit, G20 leaders committed to “mobilizing the political will needed to reinsert sustainable development at the heart of the international agenda” through the “Rio +20” Conference.¹⁹¹⁹

At the 2012 Los Cabos Summit, G20 leaders reaffirmed their commitment to working with developing countries to support them in “implementing the nationally driven policies and priorities which are needed to fulfill internationally agreed development goals, particularly the MDGs.”¹⁹²⁰

At the 2013 St. Petersburg Summit, G20 leaders endorsed the Saint Petersburg Development Outlook, which built on the 2010 Seoul Development Consensus for Shared Growth, and reaffirmed their

commitment to achieving the MDGs, particularly through “promoting strong, sustainable, inclusive and resilient growth.”¹⁹²¹

At the 2014 Brisbane Summit, G20 leaders reaffirmed their commitment to development by “ensur[ing] our actions contribute to inclusive and sustainable growth in low-income and developing countries.”¹⁹²²

At the 2015 Antalya Summit, G20 leaders adopted the G20 and Low-Income Developing Countries Framework and committed to developing an action plan in 2016 to “further align [their] work with the 2030 Agenda.”¹⁹²³

At the 2016 Hangzhou Summit, G20 leaders pledged to “enhance policy coherence on sustainable development” and reaffirmed their commitment to align their work with the 2030 Agenda and the Addis Ababa Action Agenda.¹⁹²⁴

At the 2017 Hamburg Summit, G20 leaders reaffirmed their commitment to align their work with the 2030 Agenda and “called on countries to work with stakeholders to strive towards [the Agenda’s] ambitious and integrated implementation and timely realisation in accordance with national circumstances.”¹⁹²⁵

At the 2018 Buenos Aires Summit, G20 leaders reaffirmed their commitment to “leading the transformation towards sustainable development” and support the 2030 Agenda as the framework for advancing this goal and the G20 Action Plan.¹⁹²⁶

At the 2019 Osaka Summit, G20 leaders reaffirmed their commitment to the timely implementation of the 2030 Agenda through “collective and concrete actions [...] to ensure that no one is left behind.”¹⁹²⁷

At the 2020 Riyadh Summit, G20 leaders endorsed the G20 Support to COVID-19 Response and Recovery in Developing Countries, the G20 Guidelines on Quality Infrastructure for Regional Connectivity, and the Financing for Sustainable Development Framework.¹⁹²⁸ The leaders also reaffirmed their commitment to “play a leading role in contributing to the timely implementation” of the 2030 Agenda and the Addis Ababa Action Agenda

Commitment Features

At the 2021 Rome summit, leaders committed to “support a sustainable, inclusive and resilient recovery across the world, able to promote equity and accelerate progress on all SDGs, recognizing the importance

of nationally owned strategies.”¹⁹²⁹ This commitment can be interpreted as having two main goals: supporting recovery and accelerating progress on Sustainable Development Goals. The former target includes four main dimensions to support: “sustainable,” “inclusive,” “resilient” and “equitable.”

“Support” is understood to mean give strength to, encourage, give help or countenance to, back up, further, be actively interested in, and assist.¹⁹³⁰ In the context of the commitment, members can “support” inclusive recovery by taking concrete action towards the maintenance of the commitment’s aforementioned dimensions.

“Sustainable” is understood to mean development where the pattern of resource use aims to meet human needs while preserving the environment; where this pursuit expands from domestic policy to the broader scope of international cooperation.¹⁹³¹ In the context of the commitment, it refers to development that meets the needs of the current recovery period while preserving the environment and potential for repetition of an action.

“Inclusive” is understood to mean all parties are included in the discussion and decision-making process taking into account relative capabilities.¹⁹³² In the context of development, it refers to strengthening the involvement and opportunity of all peoples regardless of background, and ensuring the incorporation of various parties in discussion and development decision making.

“Resilient” is understood to mean able to become strong, healthy, or successful again after something bad occurs.¹⁹³³ In the context of the commitment, it refers to recovery being made to withstand crisis situations, such as pandemics, and the promotion of safeguards to protect future development.

“Equity” is understood to mean fairness or justice in the way people are treated and freedom from bias or favouritism.¹⁹³⁴ In the context of this commitment, it refers to practices that aid all groups; this can include, but is not limited to, prioritization of gender equity and racial equity in development.

“Accelerate” is understood to mean the hastening of progress or development of a goal.¹⁹³⁵ “Accelerating” the progress of this commitment can include the creation of programs, money allocation, changes in legislation and other support methods that will contribute to the catalyzation of SDGs.

“Progress” is understood as the process of improving or developing something over a period of time.¹⁹³⁶ In this commitment, progress entails any concrete action towards the betterment of SDGs.

¹⁹³⁵ Accelerate, Merriam-Webster (Springfield) n.d. Access Date: 6 December 2021. <https://www.merriam-webster.com/dictionary/accelerate>

¹⁹³⁶ Progress, Merriam-Webster (Springfield) n.d. Access Date: 6 December 2021. <https://www.merriam-webster.com/dictionary/progress>

“SDGs” is understood to mean the Sustainable Development Goals that were outlined in the 2030 Agenda for Sustainable Development.¹⁹³⁷ There are 17 SDGs that this commitment refers to: 1) end poverty; 2) end hunger; 3) good health and well-being; 4) quality education; 5) gender equality; 6) clean water and sanitation; 7) affordable and clean energy; 8) decent work and economic growth; 9) industry, innovation and infrastructure; 10) reduced inequalities; 11) sustainable cities and communities; 12) responsible consumption and production; 13) climate action; 14) life below water; 15) life on land; 16) peace, justice and strong institutions; and 17) partnerships for the goals.¹⁹³⁸

“Nationally owned strategies” is understood to mean well-designed, transparent, and country-led financing frameworks that implement development strategies.¹⁹³⁹ In this commitment, as sustainable development goals are being accelerated, they should recognize the importance of strategies that emphasize subnational and national ownership.

Full compliance, or a score of +1, will be given to G20 members that show strong action in at least three of the four dimensions of recovery and work towards the progress of the SDGs. This can include both domestic and international actions that work towards inclusive recovery but focuses on nationally owned strategies. Strong actions may include but are not limited to policy action or changing legislation, money allocation, infrastructure changes, or enforcement of policy; all of which act to promote sustainable, inclusive, resilient and equitable recovery and the advancement of SDGs. On the international level, strong action can include, but is not limited to, joining or participating actively in international organizations that work to advance SDGs, providing financial support to communities that are struggling to meet targets for SDGs, or providing equitable and inclusive opportunity for communities that face barriers to development through government programs or financing.

Partial compliance, or a score of 0, will be assigned to G20 members who exemplify demonstrable action in two of the four dimensions to recovery and work towards the progress of SDGs. These actions can include both strong and weak forms of compliance in the international and domestic sphere. Examples of weak actions include but are not limited to attending meetings on SDGs; reaffirming commitments to sustainable, inclusive, resilient and equitable recovery; denouncing action that works against an inclusive recovery or SDGs; or sharing information on prospective changes in development methods with other G20 members. If a G20 member takes partial action on three dimensions of recovery, it would still be considered partial compliance.

Non-compliance, or a score of -1, will be assigned if the G20 member solely takes demonstrable action in one or zero of the four dimensions to recovery nor has not worked towards the progress of SDGs. For example, if they solely took weak actions to advance SDGs, implement legislation that address only one of the four aforementioned dimensions of recovery, or are made aware of threats to the progress or retrogression of SDGs and do not take action to combat this.

Scoring Guidelines

-1	The G20 member has NOT taken action to support a sustainable, inclusive, equitable, and resilient recovery or accelerate progress on Sustainable Development Goals (SDGs) OR has taken action in only one of the aforementioned four dimensions.
0	The G20 member has taken action to support TWO of the four dimensions of recovery and worked to accelerate progress on SDGs.
+1	The G20 member has taken strong action to support THREE to FOUR dimensions of recovery: 1) sustainability, 2) inclusivity, 3) equitability, 4) resilience AND accelerated progress on SDGs.

Compliance Director: Keab Sharma

Lead Analyst: Olivia Klasios

Argentina: +1

Argentina has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world and to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of nationally owned strategies.

On 19 November 2021, General Trustee of the Nation Carlos Antonio Montero and President of the National Council for the Coordination of Social Policies (CNCPS) Marisol Merquel held a meeting analyzing compliance with the SDGs in organizations that make up the National Public Sector.¹⁹⁴⁰ During this meeting, Deputy General Trustee of the Nation Miranda and Deputy General Trustee Borzi de Lucía signed a collaboration agreement between the General Syndicate of the Nation and the United Nations to promote the design of public policies that allow effective progress to be made in relation to the goals proposed by the UN action plan.

On 25 November 2021, President of the CNCPS Merquel participated with Governor Gustavo Melella in the presentation of the UN mission in Tierra del Fuego, an initiative that aims to promote joint actions between national and provincial governments in the framework of the 2030 Agenda for Sustainable Development.¹⁹⁴¹ According to President Merquel, the mission “is the product of an articulated and coordinated work between the Nation, Province, local governments and the UN to advance jointly in the development and effective fulfillment of the 2030 Agenda and its Sustainable Development Goals, to which we adhere as a Member State of the United Nations.”

On 20 December 2021, Foreign Minister Santiago Cafiero presented the 2021 country report for monitoring progress towards the 17 Sustainable Development Goals.¹⁹⁴² CNCPS President Merquel stated that the objective of the report is to evaluate the situation of each province in Argentina in conversation with municipalities, with the provincial government and the national ministries, to have concrete actions.

On 5 January 2022, CNCPS President Merquel and UN Coordinator in Latin America and the Caribbean Roberto Valente signed a letter of intent to advance and articulate joint actions for the implementation of the Objectives of Sustainable Development of the 2030 Agenda at the national level.¹⁹⁴³ With the signing, the CNCPS and UN Argentina renewed their commitment to the 2030 Agenda.

On 10 January 2022, the Embassy of Argentina in Chile and the Economic Commission for Latin America and the Caribbean's Department of Natural Resources organized a thematic panel exploring innovation, technological development and value addition to lithium exploitation in Argentina, Bolivia and Chile.¹⁹⁴⁴ The objective of this workshop was to analyze the possibilities of technological exchange, industrialization, innovation and value addition in the lithium chain for electric batteries.

On 31 January 2022, the Ministry of Environment and Sustainable Development passed Resolution 2/2022 which approved the creation of the Inclusive Conservation Program to be developed within the scope of the National Directorate of Biodiversity.¹⁹⁴⁵ The program's objective is to implement technical and financial support systems for Indigenous communities and other community locals who wish to conserve the natural ecosystems that exist on their land and use natural resources in a sustainable manner.

On 26 January 2022, Coordinator of the Democratic Governance Area of the United Nations Development Program in Argentina Nora Luzi met with Director General of Political and Electoral Reform Javier Tejerizo to evaluate the progress of joint work and set new goals to further the Sustainable Development Goals established by the 2030 Agenda.¹⁹⁴⁶

On 17 March 2022, the National Inter-Institutional Commission for the Implementation and Monitoring of the SDGs held a plenary meeting which focused on the drafting of the III National Voluntary Report that Argentina will present at the High-Level Conference on Sustainable Development in New York.¹⁹⁴⁷ At the meeting, attendees discussed the central components that will be included in the report including other lines of work that CNCPS has carried out in relation to the implementation of the 2030 Agenda including a new urban agenda.

On 9 May 2022, representatives of the Argentine Global Compact Network held a meeting to advance a cooperation agenda with the CNCPS to advance the implementation of the 2030 Agenda and to develop joint actions that are in keeping with the 2022 Voluntary National Report.¹⁹⁴⁸

On 11 May 2022, Minister of Education Jaime Perczyk announced that the government will be investing more than ARP9 billion in 36,000 scholarships to promote undergraduate and graduate studies in strategic areas for the nation's economic development.¹⁹⁴⁹

On 16 May 2022, National Director of Aquaculture Guillermo Abdala announced that the Ministry of Agriculture, Livestock and Fisheries will invest more than ARP19 million to equip the marine toxins laboratory in Ushuaia with the capacities for monitoring mussel production in the province.¹⁹⁵⁰ Undersecretary of Fisheries and Aquaculture Carlos Liberman stated that the initiative “will complement the investments of entrepreneurs of different sizes, so that the projected production for 2025 would reach between 3,500 and 4,500 tons per year, adding 250 jobs to the formal scheme, with more than 12,000,000 dollars in foreign currency.”

On 18 May 2022, Secretary of University Policies Oscar Alpa participated in the III World Conference on Higher Education in Barcelona, Spain.¹⁹⁵¹ The conference aimed at defining and preparing a new roadmap that tackles the challenges related to the COVID-19 pandemic on educational systems. During the ‘Internationalization of Solidarity’ panel, Secretary Alpa stated that “the common understanding that exists among our regions on the perspective of higher education as a human right and a public good must be valued. Under this premise, academic and solidarity cooperation is necessary to promote the formation of citizens and professionals respectful of cultural diversity, committed to intercultural understanding, the culture of peace and with the capacity to live together and work in a local and global community.”

On 27 May 2022, the CNCPS held a plenary meeting headed by President Merquel and UN Resident Coordinator in Argentina Claudia Mojica for the implementation and monitoring of SDGs.¹⁹⁵² At the meeting, parties shared a preliminary version of the National Voluntary Report regarding the implementation and follow-up of the 2030 Agenda for Sustainable Development 2021, which will be presented at the High Level Political Forum in July 2022. This report summarizes the progress, challenges and commitments of Argentina's implementation of the 2030 Agenda thus far.

On 3 June 2022, the Ministry of Education announced an Integral Environmental Education policy to complement the previously introduced Comprehensive Environmental Education in the Argentine Republic policy.¹⁹⁵³ According to the press release, the new policy “includes different lines of action, focused on the complexity of environmental problems, from a rights perspective: the development of teaching proposals for the approach of this anniversary at all educational levels, the production of educational materials and the proposal of a Teacher Training Section of the National Institute of Teacher Training which begins on 7 June 2022.”

On 15 June 2022, Minister of Health of the Nation Carla Vizzotti, Minister of Transport Alexis Guerrero and Secretary of Climate Change, Sustainable Development and Innovation Cecilia Nicolini participated in the ‘Accelerating the transformation towards sustainable, healthy and safe transport models’ interministerial meeting, which was organized by the Pan American Health Organization.¹⁹⁵⁴ During the meeting, the ministers reaffirmed Argentina’s commitment to sustainable transportation and improving public health through road safety, active mobility and reduced pollution. Minister Guerrero stated that “the challenge is to try to meet the goals that the world has set, not only with the environmental impact, but also with the implications that emissions and climate change have on the health of the planet and human beings.”

On 15 June 2022, the expansion of water treatment plants in Santa Fe and Granadero Baigorria began.¹⁹⁵⁵ These projects will benefit 1,317,799 people and is supported by a National State investment of ARP7.2 million. At the event that signalled the start of construction, President Alberto Fernández stated that, “as a state we must facilitate everything that is necessary for the management of the construction of those works that are not seen and that bring water to Argentines who need it.”

On 12 July 2022, Argentina’s United Nations delegation presented the Third National Voluntary Report on Sustainable Development Goals at the United Nations High Level Political Forum in New York.¹⁹⁵⁶ Following the presentation of the report, Argentina’s delegation participated in bilateral meetings with representatives from India, Spain and the Ecumenical Council with the aim of strengthening common strategies for meeting the sustainable development goals.

On 14 August 2022, the Foreign Ministry announced that three batches of humanitarian aid would be sent to Cuba to alleviate the devastating effects of an oil fire in the city of Matanzas.¹⁹⁵⁷ On 19 August 2022, the Ministry of Health, in coordination with the Foreign Ministry and Ministry of Health, supplied more than seven tons of health supplies to the Matanzas Hospital in response to the devastating oil storage facility explosion in Cuba.¹⁹⁵⁸

On 24 August 2022, Minister Cafiero met with German Secretary of State of the Federal Ministry of Foreign Affairs Tobias Lindner where they agreed to promote renewable energy development projects, such as green hydrogen, and “reiterated the strong commitment of Germany and Argentina to

multilateralism, the promotion and protection of human rights, the protection of the environment and the impact of climate change and biodiversity.”¹⁹⁵⁹

From 8 September to 9 September 2022, Argentina and the United Kingdom co-chaired the 2022 conference of the Coalition for Equal Rights in Buenos Aires, where 42 Member States of the Equal Rights Coalition and more than 140 civil society organizations will jointly commit to defend the human rights of LGBTI+ people.¹⁹⁶⁰

On 12 September 2022, Minister Cafiero met with Assistant Secretary General for United Nations Peacekeeping Operations Jean-Pierre Lacroix and reaffirmed Argentina’s commitment to participating in peacekeeping operations.¹⁹⁶¹

On 20 September 2022, President Fernández addressed member states at the 77th session of the United Nations General Assembly in New York City during which he highlighted the need for the international community to “work on global agreements that ensure democratic stability, peace and coexistence.”¹⁹⁶²

On 22 September 2022, Argentina offered humanitarian aid to Honduras to support the response to the landslides, floods and related damages that occurred after heavy rainfall.¹⁹⁶³

On 30 September 2022, Argentina participated in the XIV Ministerial Forum on the Development of Latin America and the Caribbean during which participants “shared experiences on public policies in the field of development in the social, economic and environmental dimensions, to strengthen regional ties and debate overcoming proposals in the face of current challenges.”¹⁹⁶⁴

Argentina took strong actions to support the equitable, sustainable and resilient dimensions of recovery and accelerated progress on SDGs by signing resolutions that evaluate the progress of SDGs nationally and accelerate the progress of sustainable land usage. Additionally, Argentina has created financial support systems for Indigenous communities in line with SDG targets.

Thus, Argentina has received a score of +1.

Australia: +1

Australia has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 1 November 2021, Prime Minister Scott Morrison and Minister for Foreign Affairs Marise Payne announced an investment of AUD500 million to support Southeast Asian countries in adapting to climate change.¹⁹⁶⁵ This initiative aimed to sustain climate, biodiversity and livelihood through better forestry, land and agricultural management.

On 10 November 2021, the Department of Foreign Affairs and Trade (DFAT) announced it would invest in the Indo-Pacific region's health security by delivering 2.7 million COVID-19 vaccine doses and AUD60 million worth of vaccine storage and access to Vietnam.¹⁹⁶⁶

On 10 November 2021, DFAT committed to sharing 7.5 million COVID-19 vaccine doses with Indonesia.¹⁹⁶⁷

On 17 November 2021, Minister Payne announced AUD460,000 would be granted to 13 projects that strengthen cooperation between Australia and Indonesia's COVID-19 response through the 2021-22 Australia-Indonesia Institute grants program.¹⁹⁶⁸ The selected projects included the development of an online education program, a business resilience hub and a training program to construct local capacity in renewable energy.

On 3 December 2021, DFAT announced AUD492 million in funding to protect the health of all Australians through programs such as the Aged Care Preparedness Support Measures Extension, Support for Aged Care Workers in COVID-19 Program and COVID-19 Indigenous and Remote Response Measures.¹⁹⁶⁹

On 3 December 2021, Minister for Regional Health David Gillespie committed to ensuring equal access to health services of rural communities, aboriginal and Torres Strait Islander Australians.¹⁹⁷⁰ He also announced the extension of the Remote Point of Care Testing Programme and COVID-19 vaccine distribution to rural areas.

On 30 September 2022, Australia announced AUD56.7 million would be invested through the MRFF in 93 innovative medical research projects that aim to improve the health and wellbeing of Australians, including AUD33.6 million to help “reduce the number of Australians affected by heart disease and stroke.”²⁰³⁴

Australia has taken strong actions to support an inclusive, sustainable and resilient recovery across the globe with foreign assistance in responding to the COVID-19 pandemic, natural disasters and climate change. Australia has also accelerated progress on all SDGs and the promotion of equity through financing and launching programs that achieve gender and social equality, develop clean energy and strengthen global partnership.

Thus, Australia receives a score of +1.

Analyst: Ka Ieng Charlotte Lo

Brazil: +1

Brazil has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world and to promote equity and accelerate progress on some Sustainable Development Goals (SDGs).

On 11 November 2021, Brazil joined the new negotiating group on climate change made up of Argentina, Brazil, Paraguay and Uruguay at the Climate Change Conference in Glasgow, Scotland (COP26).²⁰³⁵ Brazil further announced its strong, continuous commitment to climate action and reaffirmed the importance of science and agriculture for global food security and ecosystems.

On 8 December 2021, the government signed a cooperation agreement with the Inter-American Development Bank to contract a 10-year credit line of BRL1.2 billion for federal and state agents to support the “sustainable development of agricultural production chains in the country.”²⁰³⁶

On 16 December 2021, Minister of Foreign Affairs Carlos França alongside MERCOSUR members agreed with the Minister of Commerce of the Republic of Indonesia Muhammad Lutfi to initiate negotiations for a Comprehensive Economic Partnership Agreement (APEA) between MERCOSUR and Indonesia.²⁰³⁷ The APEA seeks to create jobs, support long-term economic growth and lower business and consuming costs by strengthening rules-based trade, increasing commercial and cultural ties and opening more markets.

On 6 January 2022, the Ministry of Health launched the Cuida Mais Brasil programme to make care for women and children in the country's Unified Health System more accessible.²⁰³⁸ The federal government announced that it will provide BRL194 million for the works of “pediatricians and gynecologists-obstetricians together with the Family Health and Primary Care teams.”

On 25 January 2022, President Jair Bolsonaro, in an open letter to the Secretary-General of the Organisation for Economic Co-operation and Development (OECD), announced the country's readiness to initiate its OECD accession process with other OECD members to support sustainable economic growth with inclusivity, the respect to the rule of law and the protection of the environment in mind.²⁰³⁹

On 3 February 2022, President Bolsonaro and President of Peru José Pedro Castillo Terrones endorsed a joint declaration announcing a bilateral agenda to increase cooperation on SDG goals of economic growth and strengthening the means for sustainable development between the two countries.²⁰⁴⁰

On 17 March 2022, Brazil launched the Income and Opportunity program which aims to generate income and increase the purchasing power of Brazilians, especially among those with lower incomes.²⁰⁴¹ This program includes a BRL165 billion stimulus package which provides the public with an early payment of “some public pension checks,” as well as “a new microcredit program and an expansion of payroll deductible loans.”²⁰⁴²

On 21 March 2022, Brazil launched a measure to promote the research, the production of and the sustainable use of biomethane under the decree that established the Federal Strategy for Incentive to the Sustainable Use of Biogas and Biomethane.²⁰⁴³ The government will invest more than BRL7 billion to build 25 new biofuel plants, which will generate 6,500 jobs. This initiative seeks to contribute to the methane emissions reduction target of 30 per cent by 2030 which was highlighted during COP26.

On 25 March 2022, Brazil launched additional actions through the Income and Opportunity Program, offering a series of measures to stabilize the employment rate and the economy by creating more

On 13 April 2022, the Ministry of Environment and Ministry of the Economy launched the Recycling Credit Certificate, or the Recicla+ Program.²⁰⁵¹ This program aims to reduce the generation of waste, improve the value of wastes in their lifecycle by encouraging the use and reuse of waste, provide collaboration between different actors on different ends of the reverse waste logistic systems, protect the environment from excessive, unrecycled wastes and facilitate the consumption of products that have been recycled or use recyclable materials.

On 21 April 2022, Minister of Mines and Energy of Brazil Bento Albuquerque and India's Minister of Oil and Natural Gas Hardeep Singh Puri issued a joint statement on cooperation between Brazil and India in the energy sector and bioenergy and biofuels.²⁰⁵² The statement recognized their "bilateral coordination within G-20 on Climate and Energy, BRICS Energy Ministerial, Biofuture Platform, Clean Energy Ministerial, Mission Innovation initiative and IBSA joint Working Group on energy and the work carried out in the context of the United Nations High-Level Dialogue on Energy." Minister Albuquerque and Minister Puri also agreed to a collaborative effort to make sustainable bioenergy and biofuels as an integral part of the future global energy transition.²⁰⁵³

On 4 May 2022, Minister of Regional Development Rogério Simonetti Marinho announced that the federal government will transfer more than BRL5.9 million to expand "the sewage system, integrated sanitation, water supply and rainwater management" in the following states: Ceará, Goiás, Minas Gerais, Mato Grosso do Sul, Pará, Paraná, Rio Grande do Sul, Santa Catarina, Sergipe and São Paulo.²⁰⁵⁴

On 4 May 2022, President Bolsonaro signed a Provisional Measure that announced the formulation of a program to empower women and youth in the labour force.²⁰⁵⁵ The new program initiates a range of measures to promote good practices in women's employability, such as "flexible work arrangements, qualification in strategic areas for professional advancement and support for women to return to work after maternity leave," as well as measures supporting families such as daycare reimbursement and subsidies for early childhood education. The program also sets out to create 100,000 new job opportunities for professional apprenticeships and to improve young people's qualifications and employment opportunities.

On 5 May 2022, Minister of Women, Family and Human Rights Cristiane Britto announced the expansion of the Qualifica Mulher Project.²⁰⁵⁶ The Project aims to achieve gender equality by offering women professional training through which women can enter the labour force and gradually become

Brazil took strong actions to support the inclusive, equitable, sustainable and resilient dimensions of recovery and accelerated progress on SDGs by supporting APEA, joining partnerships aimed to address climate change, deepening its cooperation with Peru and India in support of the realization of SDGs, investing in environmental security, launching new programs to support gender equality and facilitate professional training for youth, protecting indigenous communities, preventing malaria, aiding flooded regions, investing in their green economy, strengthening waste management mechanisms and initiating economic recovery programs.

Thus, Brazil receives a score of +1.

Analyst: Pengyu Chen

Canada: +1

Canada has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world and to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of nationally owned strategies.

On 2 November 2021, Minister of Environment and Climate Change Steven Guilbeault announced funding of CAD10 million to the National Adaptation Plan Global Network to accelerate developing countries' adaptation to climate change.²⁰⁷⁸ This contribution will disseminate expertise to build resilience towards climate change and encourage participation of civil society in adaptation planning, particularly in Small Island Developing States and least-developed countries. This initiative supplemented the CAD4 million previously committed to promoting gender equality in developing countries, therefore empowering peer support communities for women.

On 3 November 2021, the Government of Canada affirmed that “it would match the CAD9.676 million donated by Canadians to the #GiveAVax Fund through UNICEF Canada,” which aims to provide 3.8 million people with vaccines worldwide.²⁰⁷⁹ The goal is to cover the costs of vaccines' shipment, maintenance in adequate conditions and health care workers' professional and safety training.

On 4 November 2021, the Government of Canada signed the Statement on International Public Support for the Clean Energy Transition at the COP26 conference to divert away public support from the international fossil fuel sector towards clean energy by the end of 2022.²⁰⁸⁰ The aim is to reaffirm their commitment to the Paris Agreement and accelerate the transition towards a net-zero emissions economy by 2050.

On 8 and 9 November 2021, Minister of Foreign Affairs Mélanie Joly and Minister of International Trade, Export Promotion, Small Business and Economic Development Mary Ng endorsed the 32nd Asia-Pacific Economic Cooperation Ministerial Meeting Joint Ministerial Statement 2021.²⁰⁸¹ The

intent is to reaffirm Canada's commitment to collaborate in the fight against COVID-19 through science and accelerate economic recovery through the promotion of international trade and the "long-term, sustainable and inclusive growth in the Asia-Pacific region."

On 17 December 2021, Minister of International Development Harjit S. Sajjan announced that "Canada will increase its pledge to the International Fund for Agricultural Development to CAD112.5 million over three years (2022 to 2024)," a 50 per cent increase over its previous pledge, specifically to support small-scale farmers in developing countries.²⁰⁸² The goal is to reduce food insecurity and rural poverty by aiding small businesses, especially those owned by women, to recover from the economic crisis caused by the COVID-19 virus and adapt to climate change.

On 14 February 2022, Canada announced "a loan of up to CAD500 million to the Government of Ukraine through the Bretton Woods and Related Agreements Act."²⁰⁸³ This funding supplements the CAD120 million loan announced on 21 January 2022 through the Sovereign Loans Program, to support Ukraine's economic resilience and governance reforms, and the CAD6 million to facilitate the loan's implementation.

On 25 February 2022, Canada committed to matching contributions of "individual Canadians to the Canadian Red Cross's Ukraine Humanitarian Crisis up to a maximum of CAD10 million."²⁰⁸⁴

On 1 March 2022, Minister Sajjan committed an additional CAD100 million for established partners to deliver humanitarian services including health care, protection, mobility aid and essential services in Ukraine and the neighbouring region.²⁰⁸⁵

On 10 March 2022, the Government of Canada announced a CAD20 million top-up to match individual donations to the Canadian Red Cross, increasing Canada's total matched funds as part of this initiative to CAD30 million.²⁰⁸⁶ The funds contribute to ongoing humanitarian relief efforts including the distribution of items including blankets, tarps, and cooking supplies in Ukraine and surrounding countries.²⁰⁸⁷

On 31 March 2022, Minister Sajjan announced CAD50 million to support humanitarian needs including food security, healthcare, clean water and protection services in Afghanistan and peripheral

countries.²⁰⁸⁸ This grant supplements the CAD143 million allocated in Canada's budget throughout 2022 to the region in response to the increasing demand for humanitarian assistance.

On 25 April 2022, Minister Ng implemented and launched the Inclusive Women Venture Capital Initiative endowed with CAD15 million as part of the CAD6 billion Women Entrepreneurship Strategy.²⁰⁸⁹ This three-year program aims to build a more inclusive venture capital landscape in Canada by funding not-for-profit organizations that facilitate access to venture capital funding for women entrepreneurs, increase the representation of women or reduce unconscious gender bias in the industry.

On 12 May 2022, Prime Minister Justin Trudeau announced a contribution of CAD732 million to the Access to COVID-19 Tools-Accelerator during the second virtual Global COVID-19 Summit.²⁰⁹⁰ The goal is to strengthen control of COVID-19 worldwide, particularly for high-risk populations, by facilitating access to tests, treatments, vaccines and personal protective equipment in low- and middle-income countries.

On 19 May 2022, Minister Sajjan announced CAD9 million in humanitarian funding for vulnerable groups affected by the war in Ukraine during the G7 Development Ministers' Meeting.²⁰⁹¹ Canada allocated CAD7 million to strengthen a prevention and response system for women and girls subject to sexual and gender-based violence through the UN Population Fund and CAD2 million to meet the essential needs of conflict-affected populations, specifically displaced persons, refugees and people with disabilities through the Humanity and Inclusion program.²⁰⁹²

On 19 May 2022, Canada committed CAD2 million to build a cooperative-managed dairy processing plant in western Ukraine and support local farmers.²⁰⁹³ The goal is to create economic opportunities and enhance food security in the region.²⁰⁹⁴

Monetary Fund's Administered Account for Ukraine to meet its balance of payments and budgetary needs and stabilize its economy.²⁰⁹⁵

On 26 May 2022, Minister Sajjan committed CAD68 million to promote inclusivity, sustainability and resilience in Rwanda and Kenya during his visit to discuss the Vancouver Principles on Peacekeeping, Prevention on the Recruitment and Use of Child Soldiers and Canadian development and humanitarian priorities in the region.²⁰⁹⁶ CAD25 million of the funding is earmarked for “technical and vocational education and training in Kenya’s emerging blue economy sector” to advance development cooperation priorities. CAD37 million is set to fund four projects to promote women empowerment, especially in politics. Minister Sajjan also announced CAD6 million in “humanitarian funding for crisis-affected people, including refugees, in East Africa” to promote local solutions to notably drought, food security and conflict prevention.

On 2 June 2022, Canada announced that they had donated over 14.8 million surplus vaccine doses through the COVAX Facility and 762,080 AstraZeneca doses through direct, bilateral arrangements with Latin American and Caribbean countries to uphold equitable vaccine allocation and “ensure everyone may be immunized against COVID-19.”²⁰⁹⁷ Canada delivered almost 3 million total surplus vaccines to date in 2022, specifically to the Middle Eastern, African, and Caribbean regions. Canada is on track to meet its donation commitment of at least 200 million doses to COVAX by the end of 2022.

On 6 June 2022, Minister for Women and Gender Equality and Youth Marci Ien signed the Canada-Chile memorandum of understanding on ‘Cooperation in Gender Equality and Women’s Empowerment.’²⁰⁹⁸ The memorandum sets out a framework for both governments to “cooperate on the advancement, design, implementation and monitoring of public policies for the promotion of gender equality and women’s empowerment as well as for developing joint programs and policies.”

On 8 June 2022, Canada launched its Greenhouse Gas Offset Credit System to support a green economy.²⁰⁹⁹ The offset system will give municipalities, foresters, farmers, Indigenous communities and others a market-based incentive to undertake innovative projects that reduce greenhouse gases.

On 10 June 2022, Minister responsible for the Federal Economic Development Agency for Southern Ontario Helena Jaczek announced an investment of nearly CAD2 million for Bioenterprise Canada to “deliver the FoodShift program; a green initiative that will help southern Ontario agri-business and

food processors adopt net-zero technologies.”²¹⁰⁰ The project aims to connect agri-business and food processors, who are looking to adopt clean technologies, with cleantech entrepreneurs, who are developing technologies that are ready for market.

On 10 June 2022, Minister Blair announced an advanced payment of CAD207 million to the Government of British Columbia through the Disaster Financial Assistance Arrangements to fund wildfire recovery efforts and climate resilience.²¹⁰¹ This initiative supplements the ongoing financial support from Indigenous Services Canada for assessing flood risks and resolving land issues in the communities of Nooaitch and Shackan.

On 10 June 2022, at the Ninth Summit of the Americas, Prime Minister Trudeau announced over CAD145 million that would be allocated to several countries in Latin America and the Caribbean to address immigration, health and disinformation issues and promote gender equality, democratic governance and digital access.²¹⁰² The funds will mainly be distributed to marginalized communities through partners with an aim to advance socioeconomic development, sustainability, health response, democracy and technological capabilities.

On 26 June 2022, Canada, alongside the other G7 members, pledged to “raise USD600 billion in private and public funds for developing countries” and alleviate food insecurity and soaring energy prices during the meeting in the Bavarian Alps.²¹⁰³

On 28 June 2022, Canada announced a number of financial initiatives that focus on Ukraine at the 2022 G7 Summit at Schloss Elmau, Germany.²¹⁰⁴ These measures include CAD200 million through the IMF Administered Account, which will provide Ukraine with additional control of these funds and reduce administrative burdens; CAD75 million in humanitarian aid to Ukraine and neighbouring countries, which includes the delivery of in-kind food assistance, emergency cash, protection as well as shelter and health services; CAD52 million worth of agricultural solutions to support grain storage and accelerate the export certification process; and, CAD9.7 million to raise accountability for human rights violations. Prime Minister Trudeau also announced that CAD73 million of the CAD100 million in humanitarian assistance that was previously announced at the Stand Up for Ukraine event in April 2022 would be allocated to humanitarian partners that will administer emergency health and protection services.

marine safety and environmental protection” and “improving the marine transportation system and protection of the environment.”²¹²³

Canada took strong actions to promote a sustainable and resilient recovery by joining agreements and announcing grants promoting adaption to climate change in developing countries and providing humanitarian assistance in countries ridden with conflicts and challenges created by the pandemic. Canada has also funded initiatives advancing economic growth, inclusive economic and political participation and equitability.

Thus, Canada has received a score of +1.

Analysts: Zexi Li and Olivia Klasios

China: +1

China has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 12 November 2021, the State Council approved and released the 14th Five-Year Plan for promoting agricultural and rural modernization which targeted to modernize and vitalize agriculture and rural areas by 2035.²¹²⁴ This plan also provided 17 indicators to measure the progress of modernization, including total meat production, contribution rate of agricultural science and technology progress and growth rate of per capita disposable income of rural residents.

On 30 November 2021, President Xi Jinping pledged to provide 600 million free COVID-19 vaccine doses and 400 million jointly produced doses to African countries at the Eighth Ministerial Conference of the Forum on China-Africa Cooperation.²¹²⁵

On 6 December 2021, the General Office of the Chinese Communist Party (Central Office) and the General Office of the State Council approved and issued the Action Plan for Improvement of Rural Living Environment as part of the 14th Five-Year Plan (2021-2025).²¹²⁶ This plan aims to improve living conditions and sanitary facilities in rural areas.

On 15 December 2021, the State Council agreed to the Marine Economy Development Plan as part of the 14th Five-Year Plan.²¹²⁷ This initiative aims to enhance marine technology, modernize maritime industry and use ocean resources sustainably.

employment suitable for college graduates.²¹⁵² The actions included promoting small and medium enterprises' recruitment, supporting business start-ups with loans, interest discounts and tax reductions and speeding up the transformation and upgrading of the manufacturing industry.

On 14 May 2022, the National Development and Reform Commission and the National Energy Administration drew the implementation plan to promote the high-quality development of new energy in the new era.²¹⁵³ The goal of this plan was to accelerate the construction of a clean, low-carbon, safe and highly efficient energy system by expanding the electricity capacity of wind and solar power.

On 24 May 2022, the Ministry of Housing and Urban-Rural Development, the Ministry of Finance and the People's Bank of China allowed 23,000 enterprises to postpone the payment of a total of RMB7.11 billion housing provident fund contributions.²¹⁵⁴ This policy assisted enterprises to overcome difficulties amid the COVID-19 pandemic.

On 30 May 2022, the State Council released an implementation plan to accelerate the high-quality development of new energy in the new era drafted by the National Development and Reform Commission and the National Energy Administration.²¹⁵⁵ This plan aims to promote the establishment of a clean, low-carbon, safe and highly efficient energy system through “building major wind power and photovoltaic power stations in desert areas, integrating new energy exploitation and utilization with rural revitalization, promoting new energy application in industry and construction sectors, and guiding the whole society to consume green energy.”

On 31 May 2022, China announced a package of 33 measures covering fiscal, financial, investment and industrial policies to “revive its pandemic-ravaged economy.”²¹⁵⁶ The State Council aims to further reduce real borrowing costs and strengthen financial support for infrastructure and major projects with this project, in addition to accelerating local government special bond issuance and cash support for firms that hire college graduates.

On 8 June 2022, China adopted a number of targeted measures to bolster the growth of its foreign trade sector.²¹⁵⁷ These measures aim to secure market entities, stabilize their orders and markets and protect their confidence.

On 8 June 2022, Foreign Minister Wang Yi attended the third “China+Central Asia” Foreign Ministers' Meeting, where he made several suggestions including, “improv[ing] the institutional pillars for cooperation among the six countries,” “build[ing] a robust engine for post-pandemic recovery” and

“pool[ing] positive forces for global governance” all within China’s role of a contributor to world economic growth and defender of international equity and justice.²¹⁵⁸

On 19 June 2022, the Central Office issued a tightened regulation on the business activities of officials’ spouses, children and their spouses who run businesses or enterprises.²¹⁵⁹ The new policy limited business activities of relatives of officials at different levels and sectors and required officials to give annual reports on their relatives’ business activities.

On 24 June 2022, the State Council announced a group in the National Medical Products Administration would be set up with the goal of an intensive crackdown on crimes endangering drug safety.²¹⁶⁰ The major task of the group was to investigate and resolve major issues concerning drug safety in cooperation with local governments at and above county level.

On 12 July 2022, the State Council approved the implementation of work-relief programs backed by government-invested projects in “transportation, water conservancy, energy, agriculture and rural areas, urban construction, ecological environment and post-disaster restoration and reconstruction” to boost employment and enable local people work near home with increased incomes.²¹⁶¹

On 4 August 2022, China launched a terrestrial ecosystem carbon monitoring satellite to evaluate terrestrial ecology and resources.²¹⁶² This project can provide “operational support and research services in fields such as environmental protection, surveying and mapping, meteorology, agriculture and disaster reduction.”

On 8 August 2022, Minister Wang and Foreign Minister of Mongolia Batmunkh Battsetseg signed a memorandum of understanding on the cross-border railway connection program at the Gants Mod port to promote the opening of ports and connection of railways and highways.²¹⁶³ They also agreed to continue to cooperate in the Erdene Buren hydropower plant project as part of the in-depth synergy between the Belt and Road Initiative.

On 9 August 2022, the National Healthcare Security Administration released the winning bids for the latest round of centralized drug procurement with the average price cut of 48 per cent.²¹⁶⁴ This procurement is expected to help patients save RMB18.5 billion on medicine.

On 9 August 2022, Minister Wang and Foreign Minister of Korea Park Jin agreed to speed up the negotiations on the China-Korea free trade agreement to ensure the stability of industrial and supply

chains and comply with their commitment to integrity, security, smoothness, openness and inclusiveness.²¹⁶⁵

On 26 August 2022, the Legislative Affairs Commission of the Standing Committee of China's National People's Congress pledged to establish an additional ten local legislative outreach offices to "improve platforms and vehicles through which the general public can express opinions."²¹⁶⁶

On 8 September 2022, Premier Li announced the extension of phased government interest discounts on loans for advancing equipment, increase of credit support for the service sector and phased tax reduction policies to support enterprises investing in innovativeness.²¹⁶⁷

On 22 September 2022, the Foreign Ministry "deployed the Chinese Embassy in Cambodia to conduct the search and rescue operations and emergency response" after a fishing boat carrying Chinese nationals sank off Cambodia's sea and rescued, at minimum, 21 people.²¹⁶⁸

China has taken strong actions to support an inclusive, sustainable and resilient recovery on an international level through providing foreign countries medical and emergency relief aids in responding to the COVID-19 pandemic and natural disasters. China has also accelerated progress on all SDGs and the promotion of equity domestically through implementing action plans that facilitate equal access in healthcare, education and clean sanitation, responsible consumption and protection of the environment.

Thus, China receives a score of +1.

Analyst: Ka Ieng Charlotte Lo

France: +1

France has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world and to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of nationally owned strategies.

On 1 November 2021, the Agence Française de Développement (AFD) signed a EUR7 million grant agreement with the International Fund for Agricultural Development to implement the Resilience of Organizations for Transformative Smallholder Agriculture project that aims to improve food security and resilience to climate change in Gambia.²¹⁶⁹ The funds will serve to increase agricultural productivity, open Gambia's agricultural markets to investments and trade and subsidize family farms and local farmer organizations.

decarbonization.²¹⁷⁰ The aim is to reduce emissions in South Africa by an expected one to 1.5 gigatonnes over the next 20 years and accelerate the transition away from coal towards a climate-resilient electricity-powered economy. France and its partners committed to raising USD8.5 billion through grants, investments and other mechanisms for the first phase of the project.

On 24 November 2021, the AFD signed a preliminary protocol with the Development and Investment Bank of Turkey to purchase EUR100 million in bonds through a private placement.²¹⁷¹ The aim is to accelerate climate adaptation and a transition to a low carbon economy through the financing of at least 75 per cent green projects in Turkey and promote gender equality with the implementation of a Technical Assistance Programme.

On 10 December 2021, the AFD signed a partnership agreement with the Association of Development Financing Institution in Asia and the Pacific (AFIAP) to share knowledge and provide training on green finance practices.²¹⁷² The goal is to “promote climate finance and Sustainable Development Goals among national development banks in Asia and the Pacific” and encourage exchanges and financing between AFIAP members.

On 10 December 2021, France announced it had donated approximately 31 million COVID-19 vaccines to low- and middle-income countries worldwide, particularly in the African and Middle Eastern regions, through the COVAX mechanism during November and December 2021.²¹⁷³

On 2 February 2022, French Ambassador to Liberia Michael Roux signed an agreement to establish a EUR10 million grant to revitalize poor neighbourhoods as part of the Greater Monrovia Integrated Development Project, following up on their Pro-Poor Agenda for Prosperity and Development strategy.²¹⁷⁴ These funds will serve to enhance the accessibility and quality of essential services and public spaces for vulnerable communities by making their infrastructure more climate change resilient.

On 17 February 2022, AFD CEO Rémy Rioux signed two guarantees totaling more than EUR65 million with the European Commission for the FISEA+ and Cityriz Initiatives to support grassroots initiatives and sustainable infrastructure development in Africa.²¹⁷⁵ The initiative comprises an EUR35 million agreement for FISEA+ aimed at reducing risks for potential investments in high-impact funds in Africa and a EUR30 million agreement for Cityriz aimed at strengthening domestic banking markets and reducing lending risks to cities.

On 7 June 2022, the AFD granted EUR250,000 to Srbijavode to fund a feasibility study of a hydraulic network modernization and extension project.²¹⁹¹ This funding closes the first round within the financing campaign totaling EUR35 million that will go towards the replacement and maintenance of 55 pumps and other hydropower systems. The goal is to reform the water system and related digital monitoring systems to better manage irrigation and floods.

On 23 June 2022, Ministry of Europe and Foreign Affairs Catherine Colonna and Minister of Agriculture and Food Sovereignty Marc Fesneau mobilized private sector actors in support of the international Food and Agriculture Resilience Mission (FARM), created to address the food crisis in Ukraine and impacted countries.²¹⁹² The initiative gathered, on top of the private stakeholders, numerous international organizations in a meeting to endorse this mission aimed at bolstering cereal trade, ensuring affordable supplies to vulnerable countries and supporting sustainable production capabilities in Ukraine and Africa.

On 26 June 2022, France, alongside the other G7 members, pledged to “raise USD600 billion in private and public funds for developing countries” and alleviate food insecurity and soaring energy prices during the meeting in the Bavarian Alps.²¹⁹³

On 5 July 2022, the AFD co-financed EUR2 million in partnership with the Foundation of France, a project led by three French civil society organizations, ensuring the integration of refugees from Ukraine within Moldova.²¹⁹⁴ The goal is to provide childcare services and economic opportunities to refugees and build the capacity of local actors to address their needs.

On 5 July 2022, the AFD approved EUR35 million in funding to support civil society projects in the southern Mediterranean region to develop sustainable cities and advance gender equality.²¹⁹⁵ Over three years, EUR3 million will finance the Salam network led in Tunisia and running across four countries to promote social entrepreneurship, particularly among the youth.

On 27 July 2022, France, alongside the International Fund for Agricultural Development (IFAD), reaffirmed their commitment as part of the European FARM program to invest in building climate resilience in agribusiness.²¹⁹⁶ France committed to supporting IFAD by “fully funding for the first year of a secretariat dedicated to the initiative, for an amount of USD3.2 million, and by providing technical

support.”²¹⁹⁷ The initiative focuses on advancing three main goals: fluidity of trade, solidarity with countries subject to the food insecurity crisis and sustainable production.

On 28 July 2022, the AFD signed two financing agreements worth EUR13.72 million and a third worth over EUR8 million with Burkina Faso to bolster the water supply infrastructure.²¹⁹⁸ The goal is to improve access to drinking water and essential services, particularly in Centre-North Burkina Faso, a region that accounts for 35 per cent of internally displaced people.

On 2 August 2022, the AFD approved a EUR150 million climate-oriented loan as part of a policy-based lending initiative to the Philippines to advance climate resilience and mitigation as per the principles outlined in the Paris Agreement.²¹⁹⁹ The funds will notably support farming and fishing businesses adapt to climate change and build renewable energy capabilities through technical assistance.

On 4 September 2022, Minister of State for Development, Francophonie and International Partnerships Chrysoula Zacharopoulou announced a EUR10 million grant for the Africa Adaptation Acceleration Program (AAP) at the Africa Adaptation Summit in Rotterdam.²²⁰⁰ The funds will finance climate adaptation projects in Africa whose implementation will be supported by the AFD. The goal is to deepen European-African cooperation in the fight against climate change.

On 5 September 2022, the AFD and Global Center on Adaptation signed a memorandum of understanding to collaborate on accelerating climate adaptation in Africa during the Africa Adaptation Summit.²²⁰¹ Within the framework of the AAP, both will implement several sustainability projects mobilizing USD25 billion in total, including a locally-led project that will carry over the positive externalities from climate resilience onto vulnerable communities in Rwanda.

On 11 September 2022, Minister of Transport Jean-Baptiste Djebbari committed to signing an agreement on 12 September 2022 to bolster grain exports to developing countries, particularly in the Mediterranean region.²²⁰² France would co-lead a project with Romania aimed at increasing efficiency and capacity at the port of Constant with the use of grain containers as well as the port of Galati. France will contribute technical expertise and financing alongside Bucharest with the goal of supporting Ukraine’s economy.

On 23 September 2022, France announced the launch of an internationally supported program, the “Save Crops Operation,” which seeks to promote access to fertilizers and other critical inputs in vulnerable countries in order to avoid “significant harvest losses which would significantly worsen the food insecurity situation at the global scale.”²²⁰³

On 28 September 2022, France and Germany announced that they will each contribute EUR14 million to the “transport and distribution of 50,000 tonnes of wheat provided free of charge by Ukraine to Somalia and Ethiopia.”²²⁰⁴ This initiative is a response to the severe food crisis that Somalia and Ethiopia are currently experiencing.

France took strong actions to promote sustainable and resilient recovery by signing partnerships and announcing grants promoting adaption to climate change in developing countries and providing humanitarian assistance to contribute to ongoing relief efforts in regions ridden with conflicts. France also supported an inclusive and equitable recovery by implementing social programs and engaging in knowledge transfers in developing countries.

Thus, France has received a score of +1.

Analysts: Zexi Li and Olivia Klasios

Germany: +1

Germany has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 2 November 2021, Germany, the Netherlands, and the Inter-American Development Bank announced a partnership working towards sustainable landscapes and forest protection in the Amazon.²²⁰⁵ The German government pledged EU15 million towards the Amazon Bioeconomy and Forest Management Multi-Donor Trust Fund. The partnership prioritizes three forms of action: resilient and diverse landscapes, Amazon-positive value chains and sustainability within the supply chain.

On 2 November 2021, Germany, France, South Africa, the European Union, the United Kingdom and the United States announced a ‘Just Energy Transition Partnership’ to support South Africa’s efforts toward decarbonization.²²⁰⁶ The goal of this partnership is to reduce emissions rates and support climate action.

On 9 November 2021, Germany and the United Nations Economic Commission for Latin America and the Caribbean (ECLAC) held their biennial meeting and reaffirmed their partnership.²²⁰⁷ The goal of the partnership is to promote the implementation of the policies and programs that fulfill Sustainable Development Goals.

On 13 December 2021, Germany's Federal Ministry for Economic Cooperation and Development passed a draft law for the second supplementary budget of 2021.²²⁰⁸ The budget allocated EU60 billion for the Energy and Climate Fund. This draft law works toward economic recovery and climate protection.

On 24 January 2022, the Minister of Economic Cooperation and Development Svenja Schulze announced the allocation of EUR200 million to the Education Cannot Wait global fund.²²⁰⁹ The goal is to provide education globally for children that are deprived of an education due to external conflict, displacement and other crises.

On 16 March 2022, the Federal Cabinet presented the draft budget for 2022.²²¹⁰ The budget provides EU457.6 billion for expenditure and revenues, reflecting integral political priorities of the coalition agreement: climate change and protection, education, research, and required infrastructure.

On 6 April 2022, the Federal Cabinet approved amendments to the Offshore Wind Energy Act to expand offshore wind energy.²²¹¹ This legislation aims to achieve a rated capacity of offshore wind turbines of a minimum of 30 gigawatts by 2030 and a minimum of 40 gigawatts by 2035.

On 6 April 2022, the Federal Government updated its legislation on renewable energy sources that aims to achieve the 1.5°C pathway in the Paris Climate Agreement.²²¹² This legislation aims to reduce Germany's dependence on fossil fuels. It also provides incentives for sustainable energy transition, aiming to make sustainable energy accepted and established.

On 8 April 2022, the Federal and Länder Governments agreed that Ukrainian refugees will receive basic income benefits come 1 June 2022, to provide the EU2 billion for costs like accommodations and schooling and that all refugees will be registered and dispersed quickly and equally among federal states.²²¹³

On 2 May 2022, Federal Development Minister Svenja Schulze and Indian Ministers signed three joint declarations on development policies in India pertaining to climate change, increasing renewable energies, and agroecology approaches in agriculture.²²¹⁴ Federal Minister Schulze and Indian Foreign Minister Jaishankar jointly signed a declaration of intent on the Indo-German Renewable Energy Partnership, as well as a Joint Declaration of Intent on Triangular Cooperation. Federal Minister Schulze and Indian Agriculture Minister Tomar jointly agreed to a lighthouse initiative on Agroecology and Sustainable Management of Natural Resources. Chancellor Scholz and Prime Minister Modi signed a Green and Sustainable Development Partnership. Germany is funding India with over EU1 billion a year. These projects aim to address greenhouse emissions, address climate change, and foster sustainable urban development.

On 9 May 2022, Chancellor Scholz met with President Emmanuel Macron in Berlin.²²¹⁵ Chancellor Scholz emphasized both countries' humanitarian and financial support for Ukraine and its people, as well as the necessity to transition to sustainable forms of energy.

On 11 May 2022, Chancellor Scholz met with President Fernández in Berlin.²²¹⁶ Chancellor Scholz emphasized the importance of Germany's partnership with Argentina and discussed bilateral economic collaboration, particularly in renewable energies and green hydrogen production.

On 12 May 2022, Chancellor Scholz and US President Joe Biden co-hosted the second digital COVID-19 summit.²²¹⁷ Chancellor Scholz emphasized the ongoing severity of the pandemic and declared Germany's intent to contribute a total of US1.5 billion to the 'Access to Covid-19 Tools Accelerator' in 2022. EU850 million of this contribution will go towards the 'Last Mile Initiative,' which aims to support countries with weaker healthcare systems to administer COVID-19 vaccines.

On 14 May 2022, Federal Minister of Food and Agriculture Cem Özdemir met with his fellow ministers at the G7 Conference of Agriculture Ministers in Stuttgart, Germany.²²¹⁸ As a result of this meeting, the G7 states committed to providing support to Ukraine through securing the food supply and supporting Ukrainian agriculture. The G7 states also announced they will launch a 'Global Alliance for Food Security' to address vulnerable food supplies globally.

On 18 May 2022, Chancellor Scholz attended the North Sea Summit in Esbjerg, Denmark where Chancellor Scholz, Danish Prime Minister Mette Frederiksen, Dutch Prime Minister Mark Rutte and Belgian Prime Minister Alexander de Cro co-signed a joint summit declaration, 'The Summit Declaration of Esbjerg.'²²¹⁹ The joint declaration outlined the countries commitment to replacing fossil fuels with European renewables energies from the North Sea. The joint declaration also outlined joint projects for offshore wind production and electricity and green hydrogen interconnectors.

On 24 May 2022, Chancellor Scholz met with South African President Cyril Ramaphosa in South Africa.²²²⁰ Chancellor Scholz reaffirmed Germany's participation in the "Just Energy Transition Partnership" and their commitment to achieving climate-neutrality.

On 30 May 2022, the Germany announced it would implement a tax relief package for low- and middle-income citizens to combat rising prices, especially in the energy sector.²²²¹ This package includes tax improvements such as raising the commuters' allowance, payments to low-income families and heating cost subsidies.

On 26 June 2022, Germany, alongside the other G7 members, pledged to "raise USD600 billion in private and public funds for developing countries" and alleviate food insecurity and soaring energy prices during the meeting in the Bavarian Alps.²²²²

On 6 July 2022, the Federal Cabinet approved the draft law on the introduction of a new right of residence.²²²³ The law would introduce a one-year residence permit intended for those that hold a 'tolerated' status for an extended period, which would present the opportunity for this demographic to meet the necessary requirements to obtain the permanent right of residence in Germany. This law aims to modernize immigration law and reduce stress on well-integrated refugees.

On 13 July 2022, the Federal Cabinet adopted the 'German Strategy to Strengthen Resilience to Disasters.'²²²⁴ This legislation aims to establish a strategic response to disasters in order to promote resilience during a crisis. This strategy encompasses disaster prevention, preparation, management and follow-up.

On 18 July 2022, Chancellor Scholz and Egyptian President Abdel Fattah El-Sisi co-hosted the Petersburg Climate Dialogue.²²²⁵ Chancellor Scholz emphasized the importance of international efforts to meet the Paris Agreement climate targets and stressed the need to focus on countries that have been or will be significantly impacted by climate change.

On 27 July 2022, Germany adopted the Climate and Transformation Special Fund.²²²⁶ This fund allocates EU177.5 billion between 2023 and 2026. These funds will be used to make energy supplies affordable and reliable while promoting climate protection.

On 10 August 2022, the Federal Cabinet amended the Water Resources Act.²²²⁷ This amendment aims to increase the availability of tap water through drinking fountains.

On 15 August 2022, Chancellor Scholz attended the Nordic-German meeting with Denmark's Prime Minister Mette Frederiksen, Iceland's Prime Minister Karín Jakobsdóttir, Norway's Prime Minister Jonas Gahr Støre, Finland's Prime Minister Sanna Marin and Sweden's Prime Minister Magdalena Andersson.²²²⁸ At the meeting, these leaders emphasized their commitment to democracy, the protection of human rights, the expansion of renewable energies and strong international partnerships.

On 24 August 2022, the Federal Cabinet approved additional energy-saving measures which aim to secure the energy supply in the short and medium term.²²²⁹ This plan outlines concrete measures aimed at public bodies, corporations and private households. These measures contribute to Germany's goals to reduce and eliminate its usage of Russian energy supplies.

On 5 September 2022, Chancellor Scholz discussed Germany's third relief package.²²³⁰ The package consists of EU65 billion, which aims to relieve the burden on citizens. This will be accomplished through measures such as short-term aid and changes to address rising energy prices.

On 14 September 2022, the Federal Cabinet proposed the Inflation Compensation Act, which would ensure taxation is adjusted for inflation for around 48 million citizens.²²³¹ This law would also ensure that families receive targeted tax support. The goal of this law is to ensure citizens aren't further financially burdened.

On 28 September 2022, Germany and France announced that they will each contribute EUR14 million to the "transport and distribution of 50,000 tonnes of wheat provided free of charge by Ukraine to Somalia and Ethiopia."²²³² This initiative is a response to the severe food crisis that Somalia and Ethiopia are currently experiencing.

On 29 September 2022, Chancellor Scholz announced a EUR200 billion "protective shield" to reduce the price of electricity and gas and highlighted that the funds will be "used for is to fund a gas price brake and to help ensure that everyone will be able to cope well and pay their bills."²²³³

Germany has taken strong action to support a sustainable recovery by allocating funds to promote equitable access to education. Germany has also taken weak action to support a sustainable recovery

On 22 August 2022, the Ministry of External Affairs moved to recognize the Coalition for Disaster Resilient Infrastructure (CDRI) as an “Independent and International Legal Entity.”²²⁵³ This recognition enables the CDRI to “pursue functions internationally with all rights, immunities, and privileges as per the United Nations Act, 1947.”

On 29 September 2022, the Supreme Court ruled that “all women are entitled to safe and legal abortion and that the distinction between married and unmarried women in this matter is unconstitutional” and that “under the Medical Termination of Pregnancy Act, the definition of rape must include marital rape.”²²⁵⁴

On 29 September 2022, Minister of Information and Broadcasting Shri Anurag Thakur reviewed the functioning of Doordarshan, All India Radio, Press Information Bureau and Central Bureau of Communication and asked they “conduct a special [Clean India 2.0] campaign from 2 October [2022] for a fortnight” and “emphasised the need to weed out old paper material as well as e-waste.”²²⁵⁵ Minister Thakur highlighted that the objectives of the campaign are to “organize cleaning of public spaces and households.”²²⁵⁶

On 29 September 2022, Minister of Agriculture and Farmers Welfare Shri Narendra Singh Tomar highlighted that “ecosystems for business and welfare has witnessed a sea change under the leadership of [Prime Minister Modi]” and shared the “last mile delivery and connectivity for the welfare of the poorest of the poor and the empowerment of the economically weaker sections of the society with affordable housing, electricity connection, water and sanitation and [liquefied petroleum gas] are bringing pride to the common Indians” during the G-20 Agriculture Minister Meeting held from 28 September 2022 to 29 September 2022 in Bali, Indonesia.²²⁵⁷

India took strong actions towards supporting a resilient, equitable and sustainable recovery while also advancing SDGs by promoting infrastructure development through launching and funding IRIS, progressing sustainable climate action domestically through inaugurating committees and conclaves specializing in energy efficiency, providing COVID-19 vaccines to promote good health and well-being in other countries as well as funding local governments so to further SDGs in rural settings. India also took weak actions towards supporting recovery and advancing SDGs through reaffirming its commitments to international objectives and calling on other countries to do the same.

Thus, India has received a score of +1.

Indonesia: +1

Indonesia has fully complied with its commitment to support actions and cooperation with regards to supporting a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 2 November 2021, President Joko Widodo announced at the World Leaders Summit on Forest and Land Use that Indonesia is willing to share “experiences and knowledge” regarding forest conservation under “the framework of sustainable development.”²²⁵⁸ In his speech, President Widodo noted that forest management should prioritize partnerships with the community and an emphasis on sustainability, addressing the necessity of an inclusive and sustainable recovery.

On 23 November 2021, Vice President Amin hosted the Annual Conference on SDGs Indonesia.²²⁵⁹ The forum aims to accelerate progress on SDGs by obtaining “input and recommendations from experts and practitioners regarding inclusive innovative funding.” Vice President Amin urged agencies and “various parties” to ensure that SDGs are reached through “inclusive, no one left behind efforts.”

On 10 December 2021, President Widodo signed Presidential Decree 105 of 2021, which contains measures to reduce inequality, and fulfill basic needs and basic infrastructure for underdeveloped regions.²²⁶⁰ The decree aims to eradicate disadvantaged regions from poverty in 2024 by allocating village funds towards infrastructure development.

On 14 December 2021, Vice President Amin announced at the 2021 National Stunting Forum that the government will adopt the 2018-2024 National Strategy for the Acceleration of Stunting Prevention in order to be in accordance with SDG targets by 2030.²²⁶¹ Vice President Amin noted that reducing stunting requires “the involvement of all parties” and “urged all related parties to start investing in nutrition interventions.”

On 17 December 2021, Vice President Amin announced in a press statement in the 22nd Congress of the Indonesian Engineers Association that the government aims to increase the number of engineering certifications for “energy transition, as well as achieving the Sustainable Development Goals (SDGs) targets.”²²⁶² As a part of this plan, the government aims to build more higher education institutions capable of training engineers and prepare a “demand site” to encourage “vocational acceleration.”

On 21 December 2021, while chairing the Meeting for Addressing Extreme Poverty in Coastal Areas, Vice President KH Ma'ruf Amin increased the number of regencies aimed at combating poverty from 35 in 2021

On 14 September 2022, Minister Orlando signed the New Skills Fund which allocated EUR1 billion to train workers in the National New Skills Plan to support “digital and ecological transitions.”²³²⁹ This is designed to “defend jobs and increase productivity” in a predominantly tourist driven economy.

On 21 September 2022, the Ministry of Agricultural, Food and Forestry Policies launched the call for new supply chain contracts under the PNRR.²³³⁰ The call dedicates over EUR280million to over 340 companies active in the sector and is aimed at “strategic operating chains in a multi-regional context, which must be sustainable from an environmental point of view and innovative from a technological point of view.”

On 30 September 2022, the Ministry of Agricultural, Food and Forestry Policies announced a decree in which EUR517 million would be made available for 42 projects “concerning strategic investments in the irrigation infrastructure sector.”²³³¹

Italy has taken strong actions towards all the Sustainable Development Goals. Italy has made significant climate change and COVID-19 recovery contributions through both policy and funding. Additionally, they have shown their commitment to international cooperation through finance and eco-friendly financial decisions. In combination with actions in the other three categories, Italy has shown strong actions in the four dimensions of recovery.

Thus, Italy receives a score of +1.

Analyst: Anna Clark

Japan: +1

Japan has fully complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 8 November 2021, Japan established the New Form of Capitalism Realization Headquarters and the corresponding Council of New Form of Capitalism Realization.²³³² This advances domestic efforts to re-focus sustainability and growth in the economy by promoting investments in digital innovation, clean energy technology and workplace reform.

On 9 November 2021, Japan extended USD3.5 million to Pakistan in agreement with the United Nations High Commissioner for Refugees (UNHCR) and UNICEF.²³³³ USD2.1 million will be allocated to the UNHCR for the improvement of primary health, while USD1.4 million will be allocated to UNICEF for safe drinking water. The funds are meant to support domestic services for Afghan refugees travelling into Pakistan.

On 25 February 2022, Japan extended Emergency Grant Aid USD30 million to Ecuador, El Salvador, Colombia, Dominican Republic, Belize, Bolivia, Honduras, Botswana, Gabon, Gambia, Guinea-Bissau, Lesotho, Namibia, Niger, South Africa, Tanzania and Togo.²³⁷¹ This was done in recognition of the immense impact of the COVID-19 pandemic in these regions and will expand the capacity of institutions to provide vaccines by providing medical equipment such as cold-storage facilities.

On 27 February 2022, Japan announced the provision of total USD200 million to Ukraine in humanitarian assistance to support Ukrainian civilians affected by the Russia-Ukraine conflict.²³⁷²

On 3 March 2022, Prime Minister Kishida held the 2nd Council on Economic and Fiscal Policy which assessed domestic impacts of the Russia-Ukraine conflict, particularly the increasing energy prices, concluding to increase wages to reduce consumer burden and provide loans for small and medium enterprises that may struggle with higher oil prices.²³⁷³ In addition, the Council noted that Japan will “seize this opportunity” and strengthen investments in carbon neutral practices and projects that promote sustainable growth.

On 3 March 2022, Japan extended “priority measures to prevent the spread” of COVID-19 in 18 prefectures where the Omicron strain was particularly concentrated.²³⁷⁴ Japan also continues to promote vaccinations through the Self-Defense Forces and local medical practitioners, with more than “60 million people and municipalities” involved in the process of establishing vaccine stations.

On 3 March 2022, Japan announced the launch of “revitalization packages” for small-and-medium enterprises.²³⁷⁵ These assistance efforts include liquidity support and extended loan deadlines and encourage debt forgiveness by banks against small and medium-sized enterprises in recognition of the financial burden that businesses incurred during the COVID-19 pandemic and now the increased energy costs due to the Russia-Ukraine conflict.

On 5 March 2022, Prime Minister Kishida instructed his Cabinet to “dedicate maximum effort to gather and analyze information” and provide these to the public, to “ensure the safety of aircraft, vessels, and other assets” and to “take all possible measures for precaution” against reports of the missile launch by North Korea.²³⁷⁶ These measures protect the wellbeing and integrity of the Japanese population and borders against possible contingencies.

On 8 March 2022, Prime Minister Kishida held the 4th New Capitalism Realization Conference where the key topic was the role of science and technology in sustainable growth.²³⁷⁷ The Conference identified issues of disconnect between researchers, companies and research institutions, to which the

government responded by committing to a research system that emphasizes public-private partnerships. Japan also will shift course to focus on quantum technology, continue efforts in medicine and biomanufacturing to resolve “social issues such as economic growth and global warming,” promote renewable energy and hydrogen and develop “non-carbon power sources such as small nuclear power.” These efforts lay out a sustainable economic future for Japan to be showcased at the 2025 Osaka-Kansai Expo.

On 10 March 2022, Prime Minister Kishida held the 53rd National Strategic Special Zones Advisory Council. The Council designated Osaka Prefecture, Osaka City and Tsukuba City as a Super City, where test methods to realize a digitalised future through regulation reform will be enacted.²³⁷⁸ In addition, Kibichuou Town and Kaga City was designated as Digital Rural Health Special Zones, where digital technology will be utilized to resolve issues in rural areas such as population decline and aging population. These efforts revitalize Japanese communities and encourage local reform.

On 11 March 2022, Japan extended USD100 million to international organizations (including UNHCR, International Committee of the Red Cross (ICRC), UNICEF, WFP, IOM and the UN Office for the Coordination of Humanitarian Affairs) and Japanese non-governmental organizations (NGOs).²³⁷⁹ These funds follow Prime Minister Kishida’s commitment announced 27 February 2022, and will respond to urgent needs in shelter, health, food and child protection in Ukraine and neighboring countries.

On 16 March 2022, Japan established a Liaison and Coordination Meeting to Advance Measures to Assist Ukrainian Evacuees under the Chief Cabinet Secretary to ensure smooth acceptance of Ukrainian refugees into Japan, done in solidarity with the international community against Russia’s invasion of Ukraine.²³⁸⁰

On 16 March 2022, Prime Minister Kishida announced the beginning of transitioning back to “normal times” regarding restrictions against the COVID-19 pandemic.²³⁸¹ The country will increase financial support to hospitals for greater intake capacity and raise the number of medical institutions caring for people recovering from the virus at home to 22,000. Japan will also secure an additional 3 million doses of Merck and Pfizer COVID-19 vaccines over the next six months for the ultimate goal of 15 million Pfizer vaccine doses and 70 million Moderna vaccine doses, as well as 350 million more antigen testing kits. Measures will be realized with the “greatest possible level of vigilance” through an allocated JPY1.35 trillion.

On 16 March 2022, Prime Minister Kishida formally instructed the Cabinet to “assess the state of affairs regarding damage as soon as possible,” to “act in close coordination with local governments... under the principle of prioritizing human life above all else” in emergency disaster responses and provide timely evacuation information to the public.²³⁸² Measures will alleviate the impacts of the earthquake in Miyagi and Fukushima prefectures.

ensure that non-COVID related care is also adequately offered, establishing the Cabinet Secretariat for Crisis Management of Infectious Diseases to swiftly coordinate action against infectious disease crises in the future and transfer food hygiene responsibilities from the Ministry of Health, Labour and Welfare to Consumer Affairs Agency.

On 13 September 2022, Japan announced that it would cancel the direct-ascent anti-satellite missile testing to promote international consideration of responsible behaviour in outer space.²⁴⁴⁸

On 16 September 2022, Japan announced USD7 million through an Emergency Grant Aid to Pakistan in response to the damages caused by the flood disaster that have occurred in Pakistan since mid-June.²⁴⁴⁹

On 29 September 2022, Prime Minister Kishida held the fourth meeting of the Council for the Creation of Future Education and discussed to “build a sustainable society with diversity and inclusiveness” by the “strategic development of the current 300,000 Foreign Students Plan,” the “promotion of the internationalization of education” and the “creation of an environment with the engagement of the business community.”²⁴⁵⁰

Japan took strong actions to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all SDGs, and recognizing the importance of nationally owned strategies (development) by extending financial, material and strategic aid to eligible countries. Japan has especially maintained international presence in COVID-19 pandemic response and joined G7 members against Russia in the Russia- Ukraine conflict. Japan also supported sustainability and inclusivity by launching new initiatives in sustainable energy development domestically.

Thus, Japan has received a score of +1.

Analyst: Kate Hu

Korea: +1

Korea has fully complied with its commitment to support a sustainable, inclusive, and resilient recovery across the world and to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of nationally owned strategies.

On 25 November 2021, the Ministry of Foreign Affairs held the 3rd International Conference on Action with Women and Peace.²⁴⁵¹ The purpose of the conference was to discuss the situation of conflict-related sexual violence in Asia and the urgent need for women’s role and leadership in the process of peace-building. Korea also presented an action plan in the context of the Action with Women and Peace Initiative which promises to fulfill its contributions towards women, peace and the security agenda through concrete actions such as hosting its Annual International Conference on Action with Women and Peace, prioritizing the survivor-centered approach, responding to and preventing conflict-related sexual violence through the development of cooperative projects and through participating in the Women, Peace and Security Focal Point Network.

From 11 December 2021 to 12 December 2021, Minister of Foreign Affairs Chung Eui-yong attended the G7 Foreign and Development Ministers' Meeting in Liverpool, England.²⁴⁵² During the meeting, Minister Chung announced the country's commitment "to contribute to the COVID-19 recovery, to strengthen the resilience of global supply chains and to expand infrastructure investments in the Indo-Pacific region," emphasizing an inclusive and balanced approach in fulfilling these commitments. Minister Chung also brought attention to the need for participating countries to cooperate in restoring the sustainability and resilience of supply chains and expanding infrastructure investment for peace and prosperity in the Indo-Pacific region. Minister Chung also reaffirmed the Korean government's resolute position in the issue of sexual violence in conflict, particularly with regards to women's human rights in Myanmar and Afghanistan.

On 14 December 2021, President Moon Jae-in and Australian Prime Minister Scott Morrison agreed to update their bilateral relations to a comprehensive strategic partnership at the Korea-Australia Expanded Summit in Seoul.²⁴⁵³ The two countries agreed to expand their cooperation to include "supply chain stability and the development and commercialization of low-carbon technology, as well as space and cyber technologies and other future-oriented high-tech fields."

On 21 January 2022, President Moon provided a series of opening remarks for the Saudi-Korean Investment Forum which was held in Riyadh, Saudi Arabia.²⁴⁵⁴ In his speech, President Moon emphasized three key areas for future cooperation between the two countries: cooperation in the field of hydrogen – a key energy source in the era of carbon neutrality; cooperation in future city construction; and cooperation of new growth engines such in healthcare and medical service-related cooperation with regards to diagnostic kits and other epidemic prevention and control supplies, as well as COVID-19 vaccines and treatments.

On 14 February 2022, the Ministry of Science held the seventh meeting of Korea and the EU Joint Committee on Scientific and Technological Cooperation in Seoul.²⁴⁵⁵ This meeting discussed policies to achieve carbon neutrality and brought attention to "five core areas for cooperation: information and communication technology; health and bio; climate change; emerging future technology; research hub; and human capital development." Korea pledged to research cooperatively with the EU to aid in global antibiotic resistance research, understand best practices for controlling the spread of COVID-19 and develop methods to accelerate carbon neutrality.

On 21 February 2022, the Ministry of Oceans and Fisheries announced it would be transferring blue carbon-driven advanced aquaculture technology to Vietnam as part of its official development assistance endeavours. In order to successfully implement the project, the Ministry will "leverage the untapped potential of blue carbon resources that sequester carbon (such as mangroves and other

supply chains and comply with their commitment to integrity, security, smoothness, openness and inclusiveness.²⁴⁷¹

On 11 August 2022, the Ministry of Foreign Affairs announced that it will provide COVID-19 vaccines for Grenada and Mexico, as well as additional doses for Bosnia and Herzegovina.²⁴⁷² Over the period of two weeks starting from the beginning of August, Mexico will be receiving a total of 804,000 doses of Pfizer pediatric vaccine and Grenada will be receiving combined 5,850 and 6,000 doses of the Pfizer and Moderna vaccines. In addition, Bosnia and Herzegovina will be receiving additional 20,4000 doses of the Moderna vaccine.

On 29 August 2022, the Ministry of Gender Equality and Family announced that its 2023 budget would focus on the “expansion of customized services for families including single-parent families, multicultural families, and families requiring childcare, provision of stronger support for victims of the five leading cases of violence such as digital sex crimes, domestic violence, crimes perpetrated by those in power, dating violence, stalking and provision of stronger support for less privileged people like youths in crisis and young women.”²⁴⁷³

On 5 September 2022, the Ministry of Environment announced its plan to “significantly ease the criteria for recognizing circular resources” and to “establish a system to recycle pyrolysis oil from waste plastics and recycle Co2 captured using CCUS (Carbon Capture, Utilization, and Storage) technology.”²⁴⁷⁴

On 22 September 2022, the Ministry of Environment announced its implementation plan for a disposable cups deposit scheme starting in December and a plan to support small business owners in the participating regions of Jeju-do and Sejong.²⁴⁷⁵

Korea took strong actions to promote a sustainable, equitable, inclusive and resilient recovery by strengthening its cooperation with trading partners, creating initiatives that support the health of women and accelerating progress on all Sustainable Development Goals. Korea also took part in numerous roundtables and discussions advancing the Sustainable Development Goals.

Thus, Korea receives a score of +1.

Mexico: +1

Mexico has fully complied with its commitment to support a sustainable, inclusive, and resilient recovery across the world and to promote equity and accelerate progress on all Sustainable Development Goals (SDGs), recognizing the importance of nationally owned strategies.

On 16 December 2021, Mexico donated 1 million AstraZeneca COVID-19 vaccines to Ecuador as part of Mexico's pro tempore presidency of the Community of Latin American and Caribbean States and in solidarity with the nations of the region during the pandemic.²⁴⁷⁶

On 12 January 2022, the Ministry of Economy and Novartis Mexico signed a memorandum of understanding to promote investment in health.²⁴⁷⁷ The memorandum calls for cooperation in actions for economic recovery and promotion of health and investment in Mexico, with which Novartis Mexico will invest USD50 million. Together, they agreed to coordinate actions within the next five years that fall within four strategic pillars, which are: internal market, employment, and business; investment promotion and facilities; international trade; and regionalization and sectors.

On 2 February 2022, Foreign Secretary Marcelo Ebrard visited the Center for Human Resources Specialization in the Automotive Sector and various hybrid assembly plants in Ciudad Modelo, Puebla to facilitate the transition to electric vehicles.²⁴⁷⁸ It was announced that the Foreign Ministry will connect the state of Puebla with the United Nations Industrial Development Organization and the UN Human Settlements Program to create an economic promotion atlas with the methodology that was developed for the Territorial-Industrial Investment Atlas.

On 2 February 2022, Foreign Secretary Ebrard announced a citizen consultation on urban policy priorities that invites citizens to share their concerns and ideas about the future of Mexican cities following the COVID-19 pandemic.²⁴⁷⁹ In addition to the consultation, there will be “Interconnecting Smart Cities” forums that will take place in cities around the country that form part of Mexico's agenda at the 2022 UN-Habitat World Urban Forum for Latin America and the Caribbean in Poland this year.

On 8 February 2022, the Foreign Ministry and the University of California announced the creation of the Mexico-United States Electrical Vehicle Working Group – an initiative which aims to ensure a coordinated and strategic transition towards electromobility that encompasses work in five thematic areas: innovation, human capital, provider development, infrastructure development and governance structures.²⁴⁸⁰ This initiative is in keeping with President Andrés Manuel López Obrador's instructions

to reactivate the economy by focusing on development and projects that attract investment with regards to transitioning the automotive sector to electric vehicles.

On 10 February 2022, Representatives from Mexico, Canada and the United States convened virtually for the Fifth North American Drug Dialogue to follow-up on the progress that has been made since the last meeting in December 2019.²⁴⁸¹ The meeting primarily focused on actions that were undertaken to address the production and trafficking of illegal drugs, the public health harms associated with drug use, overdoses, and illicit finance. Representatives of all three countries agreed to continue to work together to “finalize and adopt a framework that encompasses a comprehensive approach to address drug related issues; to improve and advance cooperation efforts and information sharing to better respond to North American illegal drug production and trafficking; to continue to facilitate information exchange of best practices to strengthen public health approaches to address harms associated with drug use and overdoses; and to strengthen cooperation to address illicit activities.”

On 11 February 2022, Foreign Secretary Ebrard took part in the One Planet Summit for the Ocean that was held in Brest, France.²⁴⁸² The purpose of the Summit was to increase the initiatives taken by the international community to protect marine ecosystems, fight ocean pollution and collectively address the impacts of the climate crisis.

On 18 February 2022, the Foreign Ministry reported that Mexico delivered 2,000 doses of COVID-19 vaccines to Dominica on 17 February 2022 and 10,000 doses to Saint Vincent and the Grenadines on 18 February 2022.²⁴⁸³

On 21 February 2022, the Ministry of Economy announced the creation of an initiative called “Soluciones 2030,” which aims to promote sustainable development at the local level by linking local governments and organizations to innovative projects that provide solutions to the challenges of sustainable development.²⁴⁸⁴ In the first edition of Soluciones 2030, up to 30 local governments and 50 initiatives for innovative solutions to socio-environmental challenges will be selected to participate in the Soluciones 2030 Meeting where participants will strengthen their proposals and work on multi-stakeholder procedures to implement solutions that respond to local challenges of sustainable development.

On 2 March 2022, Mexico and Japan launched a project to strengthen disaster risk governance in Mexico.²⁴⁸⁵ The initiative will center around developing local plans to implement existing disaster risk reduction (DRR) investments in Mexico City and Chiapas with regards to their seismic and hydrological risks. The project will run from May 2022 to June 2025, and includes human resource training, local

Recover Mexico's Natural Heritage.²⁴⁹⁸ The declaration promotes actions related to climate change, environmental services and regenerating nature which will help to ensure Mexico's contributions under the Paris Agreement, the 2030 Agenda for Sustainable Development, the UN Decade on Ecosystem Restoration and the Global Biodiversity Framework.

On 5 August 2022, Mexico attended an event hosted by the Food and Agriculture Organization of the United Nations (FAO) and the United Nations Office for South-South Cooperation, entitled South-South in Action – SSTC in Agricultural Development: FAO's Experiences.²⁴⁹⁹ The event promoted South-South and triangular cooperation, as well as emphasized the importance of mitigating hunger and malnutrition throughout the Global South.

On 12 August 2022, Mexico published its Instrumentation Strategy for a Sustainable Ocean Economy 2021-2024.²⁵⁰⁰ This Strategy represents “a coordinated effort of the current administration to put Mexico on track to fulfill its main commitment to the [High-Level Panel for a Sustainable Ocean Economy] to move towards the sustainable management of its national waters.”

On 19 August 2022, Foreign Secretary Ebrard, signed a memorandum of understanding with the Alumbra Innovations Foundation in La Paz, Baja California Sur to “promote the development of an International Ocean Innovation Cluster; the full participation of communities, the public and private sectors as a catalyst for creating a sustainable ocean economy; and will promote economic justice and the empowerment of coastal communities and artisanal fisheries and the aquaculture sector in global forums.”²⁵⁰¹

On 14 September 2022, the Ministry of Foreign Affairs and the United Nations Development Program in Mexico presented the Mechanism for Investment Facilitation and Promotion Abroad which will “facilitate the processes faced by the private sector and local governments when promoting themselves internationally, and is in accordance with the Sustainable Development Goals.”²⁵⁰²

Mexico took strong actions to promote a sustainable, resilient and equitable recovery by investing in public health resources, creating citizen consultations and donating over a million COVID-19 vaccines to Ecuador and thousands of doses to Dominica, Saint Vincent, and the Grenadines.

Thus, Mexico receives a score of +1.

Russia: 0

Russia has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 16 December 2021, Russia approved the rules for posting publicly available information on the state of the environment. According to the new rules, federal, regional, and local authorities are obligated to publish information on the state of the environment, including the quality of atmospheric air, soil, water, and forest resources, harmful emissions, as well as radiation levels on their official websites or make it available to the public through state and municipal information systems.²⁵⁰³

On 28 December 2021, Russia and the United Nations Development Programme (UNDP) signed two memoranda of understanding investing more than USD14 million in climate action projects.²⁵⁰⁴ These projects consist of addressing marine litter in the Caspian Sea, supporting the UNDP Climate Box initiative, supporting local communities in Uzbekistan and funding the efforts to implement Sustainable Development Goals in Belarus. The goals of these projects are to drive sustainable climate action within various countries and to nationalize and localize SDGs.

On 29 March 2022, the Federal Project “Clean Air” was extended by two years – until 31 December 2026. The project aims to ensure a significant reduction in air pollution in 12 major industrial centers: Bratsk, Krasnoyarsk, Lipetsk, Magnitogorsk, Mednogorsk, Nizhny Tagil, Novokuznetsk, Norilsk, Omsk, Chelyabinsk, Cherepovets and Chita through measures to reduce emissions from industrial enterprises, municipal and transport infrastructure facilities.²⁵⁰⁵

On 21 April 2022, the Ministry of Natural Resources and the Environment announced that in March-April 2022 four new projects for the reclamation of landfills near Moscow “Safonovo,” “Yadrovo,” “Zavolnye” and “Taldomsky” were launched in accordance with the federal project “Clean Country” of the national project “Ecology.” Additionally, in December 2021, contracts were signed for the reclamation of the Egorievsky and Volovich landfills.²⁵⁰⁶

On 22 April 2022, the Ministry of Natural Resources and the Environment reported that it had finished the drafting of the federal law “On Amending the Forest Code of the Russian Federation” and Article 9 of the Federal Law “On Limiting Greenhouse Gas Emissions.” The draft law is aimed at the implementation of climate projects in the field of forest relations on the territory of Russia, ensuring the reduction of greenhouse gas emissions and increasing the absorption of greenhouse gases.²⁵⁰⁷

²⁵⁰³ The Government of Russia approved the rules for posting publicly available information on the state of the environment, Russian Government (Moscow) 18 December 2021. Access Date: 2 February 2022. <http://government.ru/news/44150/>.

²⁵⁰⁷ Forest climate projects will help reduce greenhouse gas emissions, Russian Ministry of Natural Resources and the Environment (Moscow) 22 April 2022. Access Date: 30 May 2022. https://www.mnr.gov.ru/press/news/klimaticheskie_proekty_v_oblasti_lesnykh_otnosheniy_pomogut_sokratit_vybros_y_parnikovykh_gazov/.

Russia took some action to support the fulfillment of SDGs and a sustainable recovery by investing in climate action projects to promote sustainable development on a national and local level. However, Russia's actions were limited and were not strongly focused on inclusivity or equitability.

Thus, Russia has received a score of 0.

Analyst: Keah Sharma

Saudi Arabia: +1

Saudi Arabia has fully complied with the stated goals of the commitment to support a sustainable, inclusive and resilient recovery across the world and to promote equity and accelerate progress on some Sustainable Development Goals (SDGs).

On 13 December 2021, Minister of Finance Mohammed Al-Jadaan announced the government's plan to promote post-pandemic economic growth and continuation of social supports and benefits while remaining fiscally sustainable.²⁵⁰⁸ The budget aims to implement strategic economic programs with economic and social dimensions.

On 23 January 2022, the National Center for Vegetation and Combating Desertification signed a two-year contract with an Imam Turki bin Abdullah Royal Reserve company promising to plant 400,000 tree seedlings.²⁵⁰⁹ The goal of the contract is to preserve natural reserves, restore biodiversity in natural environments and improve quality of life throughout the country.

On 24 January 2022, the Ministry of Economy and Planning signed a memorandum of understanding with the King Abdullah University of Science and Technology.²⁵¹⁰ The purpose of the memorandum is to increase cooperation between government officials and policy experts with scientists and researchers in order to leverage research and evidence in achieving Sustainable Development Goals.

On 3 February 2022, the Steering Committee for Sustainable Development held a meeting under the supervision of the Minister of Economy and Planning Faisal Alibrahim.²⁵¹¹ The purpose of the meeting was to discuss Sustainable Development Goals, the Saudi Kingdom's performance during the past year and the roadmap towards achieving SDGs.

On 6 February 2022, the Deputy Governor of Madinah Prince Saud bin Khalid Al-Faisal oversaw the launch of the Smart Madinah Forum.²⁵¹² The purpose of the forum was to discuss goals to make Medinah one of Saudi Arabia's three most livable cities by increasing its annual economic growth by 3 per cent and reducing unemployment by 5 per cent by 2030.

Emergency Relief Coordinator Martin Griffiths to discuss “the challenges facing the international humanitarian and relief work and best practices to address them.”²⁵⁴⁰

On 29 September 2022, Minister of Environment, Water and Agriculture Abdulrahman Al-Fadley highlighted the “importance of joining international efforts to face challenges of the food security crisis in the world due to the current situation that requires enhancing multilateral international cooperation to increase food production and provide immediate aid to alleviate the severity of the crisis in needy countries” during the G-20 Agriculture Minister Meeting held from 28 September 2022 to 29 September 2022 in Bali, Indonesia.²⁵⁴¹ During the meeting, Minister Al-Fadley “called for setting meaningful investment programs in rural areas and focusing on education, technology and spreading knowledge to provide opportunities for the youth and women, realize the sustainable development and have flexible food systems.”

Saudi Arabia has taken actions to promote sustainable and equitable recovery by committing to the development of biodiversity through planting 400,000 trees within two years and providing food to impoverished communities. Saudi Arabia has taken strong actions in support of an inclusive and resilient recovery to accelerate SDGs during the compliance period. Saudi Arabia has taken strong actions to advance SDGs and recovery such as signing the UN Sustainable Development Cooperation Framework.

Thus, Saudi Arabia receives a score of +1.

Analyst: Arad Farhadi-Niaki

South Africa: +1

South Africa has fully complied with its commitment to support actions and cooperation to support a sustainable, inclusive and resilient recovery, promoting equity and accelerating progress on some Sustainable Development Goals (SDGs).

On 10 November 2021, Minister of Forestry, Fisheries and the Environment Barbara Creecy alongside Ministers of Brazil, India and China, representing Brazil, South Africa, India and China (BASIC), gathered in Glasgow, United Kingdom to attend the 26th Conference of Parties to the United Nations Framework Convention on Climate Change.²⁵⁴² This meeting highlighted that “the BASIC countries continue to lead from the front on climate change actions” and that South Africa had submitted an updated and “significantly more ambitious” Nationally Determined Contribution (NDC) to the Paris Agreement.

On 18 November 2021, Minister of Trade and Industry Ebrahim Patel and industry stakeholders signed the Global Business Services Masterplan.²⁵⁴³ The plan seeks to invite government, industry, social partners and labour to work together for a shared vision and agenda in the economic sector.

On 14 December 2021, Minister of Agriculture, Land Reform and Rural Development Thoko Didiza announced the start of the second phase of the South African Economic Reconstruction and Recovery

Plan.²⁵⁴⁴ This programme seeks to support vulnerable individuals and groups, address the country's unemployment challenge and “sustain self-employment for subsistence producers.”

On 14 December 2021, the Umtata Women's Support Centre, funded by South Africa's National Development Agency, launched the Masiphunge Women Empowerment Programme which aims to bring women in rural regions together using the Masiphunge, or “Let's Have a Cup of Tea' approach.²⁵⁴⁵ This programme aims to make a safe space for women to “heal and encourage holistic wellness physically, spiritually and psychologically” to help reduce gender violence and gender inequality.

On 1 February 2022, Minister of Human Settlement Mmamoloko Kubayi announced the launch of the Property Practitioner Regulatory Authority with the initiation of the Property Practitioners Act.²⁵⁴⁶ The Act seeks to strengthen the regulatory authority of the Human Settlement sector and protect consumers in the property industry. The Act will also help heal historical division and produce an inclusive economic recovery by helping practitioners who have been historically disadvantaged, such as women, people with disabilities and individuals who were disadvantaged by the Apartheid regime.

On 17 February 2022, President Cyril Ramaphosa participated in the African Union – European Union Summit with Minister of International Relations and Cooperation Naledi Pandor.²⁵⁴⁷ Leaders involved in this summit exchanged views and commitments on financing for sustainable and inclusive growth, climate actions, peace, security and governance, as well as sustainable development. Leaders also pledged to launch an ambitious Africa-Europe Investment Package that aims to address global challenges, such as the climate crisis and the COVID-19 pandemic.

On 17 February 2022, Deputy Minister of Basic Education Reginah Mhaule announced the launch of the Learner Pregnancy Policy.²⁵⁴⁸ This policy addresses the negative consequences of early and unintended pregnancy through education, specifically through the provision of the Comprehensive Sexuality Education curriculum. The policy will also “link learners to sexual reproductive health services, care counselling and support.”

On 4 March 2022, Minister of Employment and Labour Thulas Nxesi launched a training project program through a partnership agreement with the Fuze Institute for Humanitarian Praxis and the Unemployment Insurance Fund (UIF) in KwaZulu-Natal.²⁵⁴⁹ The UIF will provide a SAR551 million investment for the program which will allow 19,921 beneficiaries to undergo training in “fibre optics, food handling and mixed farming sectors.”

On 8 April 2022, Minister of Human Settlements Mmamoloko Kubayi announced that the “Cabinet has approved just over 14,000 hectares made up of 167 portions of land held by the Department of

Public Works and Infrastructure for release for human settlements development.”²⁵⁵⁰ This release of land serves to provide the poor and the marginalized in urban areas the access to land and thereby sustain inclusive economic growth in the urban region. The Minister noted that the government has made the decision to revise the income threshold for people applying for social housing. This change will make more people eligible for social housing and thereby allow more people to participate in an inclusive economy in urban areas.

On 5 May 2022, Minister of Finance Enoch Godongwana announced the launch of Southern Africa-Towards Inclusive Development Phase Two.²⁵⁵¹ The second phase of the programme invites academics and policymakers to respond to policy issues, including ways to develop enterprises to grow the employment rate; how to make structural adjustments and transform to address the labour markets and inequality; approaches to mobilize public revenue for inclusive development; macro-fiscal analysis and policy modelling; implementation of reforms; food, energy and water in light of the ongoing climate change.

On 12 May 2022, Minister of Justice and Constitutional Development John Jeffery announced the launch of the Masibambisane Programme, an initiative with multidimensional approaches that seek to empower women of all ages, sexual orientations and gender identities who are affected by gender-based violence.²⁵⁵² The programme “builds on the community-based multistakeholder models that take a zero-tolerance approach to address [gender-based violence and femicide] and that involve local state actors, civil society and community members in prevention and response activities.”²⁵⁵³

On 15 May 2022, Minister Nxesi launched the 5th Global Conference on the Elimination of Child Labour, focusing on the Sustainable Development Goals and topics such as “education, crises and climate change, social protection, youth employment, financing, agriculture, supply chain and inequality.”²⁵⁵⁴ Minister Nxesi also made note of and reaffirmed the South African government’s existing progress in slowing down and eliminating child labour.²⁵⁵⁵

On 23 May 2022, Minister Creecy launched the National Waste Management Fleet to improve the municipal level waste collection services.²⁵⁵⁶ The SAR42.4million-worth plan aims to improve community health by preventing waste pollution as a result of poor, irregular waste services and management in communities.²⁵⁵⁷

On 30 May 2022, the Department of Social Development announced the Social Assistance Amendment Act to increase funding for payments concerning social grants, including “the implementation of the extended Child Support Grant policy for orphans in the care of relatives.”²⁵⁵⁸

On 3 June 2022, Minister of Health Joe Phaahla launched the Global Vax campaign, an initiative with the aim of contributing to the goal of vaccinating 70 per cent of the global population against COVID-19.²⁵⁵⁹ The campaign will increase its capacity to vaccinate the population as well as promote awareness of the facts about the virus and the safety of vaccines.

On 8 June 2022, Minister of Communications and Digital Technologies Khumbudzo Ntshavheni announced that South Africa is implementing a Broadband Connectivity drive through the South Africa (SA) Connect programme.²⁵⁶⁰ The goal of SA Connect is to ensure all South Africans have access to the internet by 2024 and will be complimented by a programme to deploy 4G and 5G networks by 2025.

On 21 June 2022, Cabinet Ministers met with COP President Alok Sharma in Pretoria to review the “progress made since COP26 in advancing the Just Energy Transition Partnership.”²⁵⁶¹ During the meeting, the parties also discussed South Africa’s future progress and affirmed their commitment to ensuring a just transition in which key interests of workers and communities are protected and opportunities for innovation and quality jobs are supported in the green hydrogen and electric vehicle sectors.

On 7 July 2022, the Treasury released the information on the funding framework for the response to the national disaster which was declared on 18 April 2022 due to the flooding that occurred.²⁵⁶² Minister Godongwana highlighted that SAR1 billion would be available funding for emergency relief and for recovery and repair.

On 19 July 2022, the Department of Water and Sanitation called for increased water conservation efforts at Nelson Mandela Bay Metro and reiterated calls for the prevention of water pollution on Mandela Day.²⁵⁶³

On 25 July 2022, President Ramaphosa called on all South Africans to “be part of the solution; to contribute in whatever way they can to ending energy scarcity in South Africa,” in relation to the ongoing energy crisis in the country.²⁵⁶⁴

On 25 July 2022, Minister Patel highlighted the need for “faster implementation of industrialisation efforts” which will “transform the continent’s rich natural resources to high-value capital and consumer goods.”²⁵⁶⁵

On 31 August 2022, Minister in the Presidency Mondli Gungubele hosted a dialogue on gender-based violence and femicide in Gugulethu, Western Cape to address the “prevalent cases of gender-based violence against children and women in Gugulethu and surrounding communities.”²⁵⁶⁶

On 31 August 2022, Minister Nxesi announced the rollout of a suite of funded courses for public servants, offered by the National School of Government, “as part of promoting the professionalization of the public service and improving the performance of public servants in their respective roles and responsibilities in the three spheres of government.”²⁵⁶⁷

On 23 September 2022, the Department of Water and Sanitation hosted a consultation session about the National Water Resource Strategy during which proposals were made that highlighted “the prioritisation of groundwater as a way to augment water supply, improvement of urban planning to prevent water pollution [and the] creation of platforms to promote ideas in the water sector.”²⁵⁶⁸

On 30 September 2022, Minister in the Presidency for Women, Youth and Persons with Disabilities Maite Nkoana-Mashabane announced the gazetting of National Council on Gender-Based Violence and Femicide Bill.²⁵⁶⁹ Minister Nkoana-Mashabane highlighted that this bill represents a “major step forward in driving a multi-sectoral, coherent strategic policy and programming framework to ensure a coordinated national response to the crisis of Gender-Based Violence and Femicide.”

South Africa took strong actions to support the inclusive, equitable, sustainable and resilient dimensions of recovery and accelerated progress on SDGs by updating emissions targets through its NDC to the Paris Agreement, providing stimulus to underprivileged individuals and groups, providing more social housing for the poor and marginalized, launching programs designed to reduce gender inequality, introducing financial recovery assistance for economic recovery and investing in professional training and job creation.

Thus, South Africa has received a score of +1.

Analyst: Pengyu Chen

Turkey: 0

Turkey has partially complied with its commitment to support a sustainable, inclusive and resilient recovery across the world, promoting equity and accelerating progress on all Sustainable Development Goals (SDGs), and recognizing the importance of nationally owned strategies.

On 24 November 2021, the Development and Investment Bank of Turkey (TKYB) signed a preliminary protocol with the AFD to purchase EUR100 million in bonds through a private placement.²⁵⁷⁰ The aim is to accelerate climate adaptation and a transition to a low carbon economy through the financing of at least 75 per cent green projects in Turkey and promote gender equality with the implementation of a Technical Assistance Programme. TKYB will “use the proceeds to finance at least 75% Green projects that contribute to climate mitigation and/or adaptation.”

On 15 September 2022, Turkey participated in a third meeting of the Turkey-US Strategic Mechanism Dialogue during which they “reaffirmed their strong cooperation as partners and NATO [North Atlantic Treaty Organization] Allies and engaged in substantive dialogue on strategic global and regional issues and areas of bilateral cooperation.”²⁵⁷¹

On 19 September 2022, President Erdogan reaffirmed Turkey’s commitment to education at the Transforming Education Summit in New York, stating the “ideal of ‘strong society, strong country’ can only be achieved if human capital is utilized well, and is put through an education process of high quality.”²⁵⁷²

On 21 September 2022, the Ministry of Foreign Affairs released a statement that “renewed [Turkey’s] support to Ukraine’s territorial integrity, independence and sovereignty, which [Turkey has] been emphasizing since the illegal annexation of Crimea in 2014, and reiterated [Turkey’s] readiness to extend all necessary support to resolve the ongoing war on the basis of the said objectives and through peaceful negotiations.”²⁵⁷³

Turkey has taken some weak action to support a sustainable and resilient recovery by attending meetings and reaffirming their support for Ukraine’s territorial integrity. Turkey has taken strong action to support SDGs and support a sustainable and inclusive recovery by accelerating climate adaptation and promoting gender equality through its preliminary protocol with the ADF.

Thus, Turkey receives a score of 0.

On 14 December 2021, the Department for Work and Pensions revealed annual reports showing a total of GBP1 billion in child maintenance payments which means about 800,000 children are now covered by this program.²⁵⁸¹ These payments lift approximately 120,000 above the poverty line and has been a large part of breaking the poverty cycle in the UK.

On 15 December 2021, the Department for Levelling Up, Housing and Communities revealed new building regulations which will create a 30 per cent decrease in carbon dioxide per household.²⁵⁸² This extends beyond housing to general building regulations across the UK and these will come into effect in June 2022 and aid UK on their goal to being net carbon zero in 2030.

On 20 December 2021, the Department for Levelling Up, Housing and Communities announced an additional GBP28 million to vaccinate the homeless and rough sleepers.²⁵⁸³ This will aid increasing vaccine uptake among the homeless and funding emergency accommodation to keep people off the streets. This initiative is also an expansion on the UK government's current COVID-19 strategy.

On 26 January 2022, HM Revenue and Customs announced a GBP2,000 credit for Tax-Free childcare.²⁵⁸⁴ This allows for nearly 316,000 families to receive a share of GBP35 million which is one of the ways the UK government is supporting households with children on low incomes.

On 31 January 2022, UK Export Finance backed a commercial loan of GBP625 million to Jaguar Land Rover to create more sustainable electric cars which is a central part of Prime Minister Boris Johnson's plan for a green industrial revolution.²⁵⁸⁵ This loan is a part of a GBP2.5 billion plan backed by both the government and commercial enterprises.

On 1 February 2022, the Department for Digital, Culture, Media and Sport announced the National Youth Guarantee backed by GBP560 million.²⁵⁸⁶ This plan will bring afterschool activities to all children ages 11 to 18 and up to 25 years old with special needs. The plan has just opened for applications for funding from local organizations.

On 4 March 2022, the Department for Business, Energy and Industrial Strategy announced the funding the green heat network with a total GBP288 million to be rolled out of the next three years.²⁵⁸⁷ This
